these safety incidents and until the
cause of the incidents was determined,
PATH operated its PTC system in
manual mode. Through investigation,
testing, and replication of the events
that led to the safety incidents, PATH
determined on May 23, 2022, the cause
to be a software error. PATH
subsequently developed a procedural
mitigation to prevent the unique series
of events that resulted in the safety
incident. PATH is in parallel rectifying
the software error.

PATH requested to operate its PTC
system in manned automatic train
control mode, with a procedural
mitigation to prohibit the unique series
of events that resulted in the safety
incident, which FRA approved
temporarily. As noted above, FRA’s PTC
regulations require PATH to repair the
software error without undue delay. See
49 CFR 236.1023(j), 236.1029(a).

FRA will publish a further notice,
including an opportunity for comment,
when PATH submits a request for
amendment (RFA) to its PTCS that will
include the update to PATH’s PTC
system rectifying the software error, in
accordance with 49 CFR 236.1021. As
background, before making certain
changes to an FRA-certified PTC system
or the associated FRA-approved PTCSP,
a host railroad must submit, and obtain
FRA’s approval of, an RFA to its PTCSP.
Under 49 CFR 236.1021(e), FRA’s
regulations provide that FRA will
publish a notice in the Federal Register
and invite public comment in
accordance with 49 CFR part 211, if an
RFA includes a request for approval of
a material modification of a signal and
train control system.

Additional information concerning this special permit segment is available in the docket.

The special permit request, proposed special permit with conditions, and draft environmental assessment (DEA) for the TGP 36-inch diameter Line 800–2 Pipeline are available for review and public comments in Docket No. PHMSA–2019–0152. Before issuing a decision on the special permit request, PHMSA will evaluate all comments received on or before the comments closing date. Comments received after the closing date will be evaluated, if it is possible to do so without incurring additional expense or delay.
