

compliance, and are required of all affected facilities subject to the NESHAP.

Form Numbers: None.

Respondents/affected entities:
Primary magnesium refining facilities.

Respondent's obligation to respond:
Mandatory 40 CFR 63, Subpart TTTTT.

Estimated number of respondents:
One (total).

Frequency of response: Semiannually.

Total estimated burden: 972 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$116,000 (per year), which includes \$1,200 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The burden in this ICR has been adjusted to account for more accurate estimates for performance testing costs based on consultations with industry. The previous ICR assumed that a single performance test was conducted once every three years by the affected facility. This ICR adjusts the performance testing costs to reflect that the facility conducts separate performance tests for individual units during the term of the ICR. The regulation, 40 CFR 63.9912, requires performance testing no less frequently than twice (at mid-term and renewal) of each term of the Title V permit, or every 2.5 years, for each emission point. For the facility subject to this rule, we have clarified that multiple emission points must be tested twice during the Title V permit term, with approximately 20 percent of units anticipated to require a retest. This ICR therefore assumes that performance tests are conducted for approximately two emission units in each year during the three-year period of this ICR. Therefore, labor costs have been adjusted to account for submission of notification and reports for performance tests twice annually. This change also results in an increase in the number of responses.

Courtney Kerwin,

Director, Regulatory Support Division.

Clean Air Act Operating Permit Program; Petitions for Objection to State Operating Permit for Gulf Coast Growth Ventures, LLC, Olefins, Derivative, and Utilities Plant, San Patricio County, Texas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final Order on Petition for objection to Clean Air Act title V operating permit.

SUMMARY: The Environmental Protection Agency (EPA) Administrator signed an Order dated May 12, 2022, granting in part and denying in part a Petition dated February 24, 2021 from the Environmental Integrity Project, Sierra Club, Coastal Alliance to Protect our Environment, and Texas Campaign for the Environment. The Petition requested that the EPA object to a Clean Air Act (CAA) title V operating permit issued by the Texas Commission on Environmental Quality (TCEQ) to Gulf Coast Growth Ventures (GCGV), LLC, for its Olefins, Derivative, and Utilities Plant located in San Patricio County, Texas.

ADDRESSES: The EPA requests that you contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section to view copies of the final Order, the Petition, and other supporting information. Out of an abundance of caution for members of the public and our staff, the EPA Region 6 office may be closed to the public to reduce the risk of transmitting COVID-19. Please call or email the contact listed below if you need alternative access to the final Order and Petition, which are available electronically at: <https://www.epa.gov/title-v-operating-permits/title-v-petition-database>.

FOR FURTHER INFORMATION CONTACT: Aimee Wilson, EPA Region 6 Office, Air Permits Section, (214) 665-7596, wilson.aimee@epa.gov.

SUPPLEMENTARY INFORMATION: The CAA affords the EPA a 45-day period to review and object to, as appropriate, operating permits proposed by state permitting authorities under title V of the CAA. Section 505(b)(2) of the CAA authorizes any person to petition the EPA Administrator to object to a title V operating permit within 60 days after the expiration of the EPA's 45-day review period if the EPA has not objected on its own initiative. Petitions must be based only on objections to the permit that were raised with reasonable

specificity during the public comment period provided by the state, unless the petitioner demonstrates that it was impracticable to raise these issues during the comment period or unless the grounds for the issue arose after this period.

The EPA received the Petition from the Environmental Integrity Project, Sierra Club, Coastal Alliance to Protect our Environment, and Texas Campaign for the Environment dated February 24, 2021, requesting that the EPA object to the issuance of operating permit no. O4169, issued by TCEQ to the Olefins, Derivative, and Utilities Plant in San Patricio County, Texas. The Petition claims the proposed permit was issued before GCGV complied with applicable public participation requirements and fails to include and assure compliance with all applicable requirements.

On May 12, 2022, the EPA Administrator issued an Order granting in part and denying in part the Petition. The Order explains the basis for the EPA's decision.

Dated: June 9, 2022.

Dzung Ngo Kidd,

Acting Director, Air and Radiation Division, Region 6.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; Toxic Chemical Release Reporting (Revision)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), Toxic Chemical Release Reporting (EPA ICR Number 2613.04, OMB Control Number 2070-0212) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a request to revise an existing ICR that is currently approved through March 31, 2024. Public comments were previously requested via the **Federal Register** on November 15, 2021 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public.
