equipment and conductors; permissibility.

Modification Request: The petitioner requests a modification of 30 CFR 75.1002(a) to permit use of the CleanSpace EX Powered Respirator within 150 feet of pillar workings or longwall faces.

The petitioner states that:
(a) The petitioner previously used the 3M airstream helmets to provide miners respirable dust protection on the longwall faces.
(b) 3M has discontinued the Airstream helmet, and there are no other MSHA-approved Powered Air Purifying Respirators (PAPRs).
(c) The CleanSpace EX is certified by UL under the ANSI/UL 60079-11 standard to be used in hazardous locations because it meets the intrinsic safety protection level and is acceptable in other jurisdictions for use in mines with the potential for methane accumulation.
(d) The CleanSpace EX Power Unit, manufactured by CleanSpace, has been determined to be intrinsically safe under IECEx and other countries’ standards.
(e) CleanSpace is not pursuing MSHA approval.

The petitioner proposes the following alternative method:
(a) The equipment will be examined at least weekly by a qualified person according to 30 CFR 75.512-2. Examination results will be recorded weekly and may be expunged after one year.
(b) The petitioner will comply with 30 CFR 75.323.
(c) A qualified person under 30 CFR 75.151 will monitor for methane in the affected area of the mine as is required by the standard.
(d) When not in operation, batteries for the PAPR will be charged on the surface or underground in intake air and not within 150 feet of the pillar workings or longwall face.
(e) The following battery charging products will be used: PAF–0066 and PAF–1100.
(f) Qualified miners will receive training regarding how to safely use, care for, and inspect the PAPR, and on the Decision and Order before using equipment in the relevant part of the mine. A record of the training will be kept and available upon request.

The petitioner asserts that the alternative method proposed will at all times guarantee no less than the same measure of protection afforded the miners under the mandatory standard.
