(b) The petitioner will comply with 30 CFR 75.323.

(c) A qualified person under 30 CFR 75.151 will monitor for methane in the affected area of the mine as is required by the standard.

(d) When not in operation, batteries for the PAPR will be charged on the surface or underground in intake air and in return air outby the last open crosscut.

(e) *The following battery charging products will be used:* PAF–0066 and PAF–1100.

(f) Qualified miners will receive training regarding how to safely use, care for, and inspect the PAPR, and on the Decision and Order before using equipment in the relevant part of the mine. A record of the training will be kept and available upon request.

The petitioner asserts that the alternative method proposed will at all times guarantee no less than the same measure of protection afforded the miners under the mandatory standard.
