the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before August 29, 2022. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESS: Direct all PRA comments to Cathy Williams, FCC, via email to PRA@fcc.gov and to Cathy.Williams@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0653.

Title: Sections 64.703(b) and (c), Consumer Information—Posting by Aggregators.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents: 56,075 respondents; 5,339,038 responses.

Estimated Time per Response: .017 hours (1 minute) to 3 hours.

Frequency of Response: On occasion reporting requirements; Third party disclosure.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this information collection is found at section 226 [47 U.S.C. 226] and the Consumer Information—Posting by Aggregators.

FEDERAL COMMUNICATIONS COMMISSION

[ET Docket No. 19–138; DA 22–611; FRS 92669]

The Federal Communications Commission: Seeks Comment on a Request for Nationwide Waiver of Intelligent Transportation System Rules To Use C–V2X Technology in the 5.895–5.925 GHz Band

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: The Federal Communications Commission’s Wireless Telecommunications Bureau (WTB) and Public Safety and Homeland Security Bureau (PSHSB) seek comment on a joint filing by certain automakers, state departments of transportation, and equipment manufacturers (collectively, the C–V2X Joint Waiver Parties), requesting a waiver of the Commission’s rules applicable to intelligent transportation system (ITS) operations in the upper 30 megahertz (5.895–5.925 GHz) portion of the 5.850–5.925 GHz Band (5.9 GHz Band) “to permit them to collectively deploy and facilitate deployment of Cellular Vehicle-to-Everything (C–V2X) technology immediately.”

FOR FURTHER INFORMATION CONTACT: Thomas Reed, Attorney Advisor, Mobility Division, Wireless Telecommunications Bureau, at Thomas.Reed@fcc.gov or (202) 418–0531, or Roberto Mussenden, Senior Attorney, Policy and Licensing Division, Public Safety and Homeland Security Bureau, at Roberto.Mussenden@fcc.gov or (202) 418–1428.

SUPPLEMENTARY INFORMATION: This is a summary of a public notice seeking comment on a request for waiver of the Federal Communications Commission’s rules governing intelligent transportation service operations in the 5.895–5.925 GHz Band, ET Docket No. 19–138, DA 22–611, on June 7, 2022. The full text of this document is available for public inspection at the following internet address: https://www.fcc.gov/document/wtb-pshsb-seek-comment-its-rule-waiver-use-c-v2x-59ghz-band. Alternative formats are available for people with disabilities (Braille, large print, electronic files, audio format), by sending an email to FCC504@fcc.gov or calling the Consumer and Governmental Affairs Bureau at 202–418–0530 (voice) or 202–418–0432 (TTY).

Synopsis: By this Public Notice (PN), the Wireless Telecommunications Bureau and the Public Safety and Homeland Security Bureau (the Bureaus) seek comment on a joint filing by certain automakers, state departments of transportation (DOTs), and equipment manufacturers (collectively, the C–V2X Joint Waiver Parties), requesting a waiver of the Commission’s rules applicable to intelligent transportation system (ITS) operations in the upper 30 megahertz (5.895–5.925 GHz) portion of the 5.850–5.925 GHz Band (5.9 GHz Band) “to permit them to collectively deploy and facilitate deployment of Cellular Vehicle-to-Everything (C–V2X) technology immediately.” 1 Specifically, 2

1 This waiver request was submitted by Audi of America, Inc., Ford Motor Company, Jaguar Land Rover, the Utah Department of Transportation, the Virginia Department of Transportation, AALON Technology Inc., Advantech Co., Ltd., Applied Information, Inc., Cohda Wireless Pty Ltd., Commsignia, Inc., Danlaw Inc., HARMAN International Industries, Inc., Kapsch TrafficCom USA Inc., and Panasonic Corporation of North America.

Continued
the C–V2X Joint Waiver Parties seek a waiver of 47 CFR 2.106, NG160 to allow nationwide use of the upper 30 megahertz of the 5.9 GHz Band for C–V2X operating in the Intelligent Transportation System (ITS), conditioned on the technical parameters set forth in Appendix 1 of their submission. They also seek a waiver of certain part 90 and part 95 rules (47 CFR 90.375, 90.377, 90.379, 95.3159, 95.3163, 95.3167, and 95.3189) governing the operation of roadside units (RSUs) and on-board units (OBUs) in the upper 30 megahertz of the 5.9 GHz Band.

In its 5.9 GHz First Report and Order and Further Notice, adopted on November 20, 2020, the Commission retained the upper 30 megahertz of the 5.9 GHz Band for ITS operations, and it required that, following a transition period, ITS operations transition from Dedicated Short-Range Communication (DSRC) technology to C–V2X technology rules. In the Further Notice portion of its decision, the Commission sought comment on the rules for the technical and logistical parameters of C–V2X that ultimately would govern ITS operations in the band. While part 90 ITS licensees operating in the upper 30 megahertz are authorized to operate ITS based ITS prior to adoption of final C–V2X rules, the Commission also recognized that licensees may wish to operate C–V2X-based ITS prior to adoption of those final rules. Accordingly, the Commission directed the Bureaus to issue a public notice providing guidance for licensees that may wish to obtain waivers of the existing DSRC-based rules to operate C–V2X operations, either through a streamlined waiver request process (if requesters qualify), or through our normal section 1.925 waiver process.

Guidance PN. The Guidance PN, issued on August 6, 2021, provided the following guidance to waiver applicants who elect to use the normal section 1.925 process:

If an ITS waiver applicant that seeks authority to operate C–V2X-based roadside units or on-board units in the 5.895–5.925 GHz band is unable to comply with the existing ITS technical rules found in 47 CFR 90.371–90.383 or 47 CFR 95.3167–95.3189, respectively, they should include in their general waiver request the certifications from the streamlined waiver process outlined in this PN that they are unable to meet, the specific existing rules that they are unable to comply with, along with a specific proposal of the technical specifications they seek to use instead, and an explanation of why a waiver is warranted under Section 1.925. To facilitate granting of qualifying waiver requests, and in light of the alternate technical specifications proposed in their waiver, we would generally expect the ITS waiver applicant to include a demonstration showing that their requested waiver would not cause a greater potential for interference to other users operating in the 5.895–5.925 GHz band than DSRC-based operations in this band, and otherwise to address how the public interest would be served by such a waiver under Section 1.925. Based on the proposed change in technical parameters, the waiver request should also address any conditions (e.g., coordination zone radius, per 47 CFR 90.371(b)) necessary to protect Federal Government Relocation Services.

C–V2X Joint Waiver Request. In the C–V2X Joint Waiver Request, the

1.925 GHz First Report and Order, 35 FCC Rcd at 13464, para. 55.

Automakers (Audi, Ford, and Jaguar Land Rover) seek a waiver in order to introduce C–V2X into their vehicle fleets throughout the United States as soon as possible. As noted in their request, the C–V2X Joint Waiver Parties further seek permission for nationwide C–V2X OBU operations. Specifically, they ask that the Commission waive its rules to the extent necessary to allow the Utah and Virginia DOTs to deploy C–V2X RSUs throughout their respective states, both RSUs and OBUs, under the FCC ITS licenses each currently holds, and allow each of the identified automakers to deploy C–V2X-based OBUs in all of its cars sold in the United States. The C–V2X Joint Waiver Parties also request that the Commission waive its rules to the extent necessary to allow the identified equipment manufacturers to obtain the necessary equipment certifications for their C–V2X equipment. The C–V2X Joint Waiver Parties state that while the automakers and state departments of transportation will initially deploy C–V2X technology based on LTE technology (3GPP Releases 14 and 15), the parties request the flexibility to deploy 5G-based C–V2X (3GPP Release 16), as well. If granted, the net effect of the waiver would be to allow C–V2X operations in Utah and Virginia and the equipping of vehicles nationwide with C–V2X OBUs.

In their request, the C–V2X Joint Waiver Parties ask the Commission to permit C–V2X-based operations on 20 megahertz (5905–5925 MHz) in the ITS band, pending adoption of final C–V2X-based rules, which meet the technical parameters set forth in the tables below. 

11 C–V2X Joint Waiver Request at 3–4.
12 C–V2X Joint Waiver Request Supplement at 4.
14 C–V2X Joint Waiver Request at 4–5.
15 Id. at 5.
16 C–V2X Joint Waiver Request Supplement at 4, notes 15, 16.
17 C–V2X Joint Waiver Request Appendix 1 at 10–11; C–V2X Joint Waiver Request Supplement at 3. The C–V2X Joint Waiver Request Supplement did not change the technical parameters proposed in the C–V2X Joint Waiver Request.
C–V2X OBU AND RSU OPERATIONS UNDER C–V2X JOINT WAIVER REQUEST

In their filings, the C–V2X Joint Waiver Parties provide additional discussion and explanation, asserting that the public interest would be served if the Commission were to permit C–V2X operations pending adoption of final C–V2X-based rules, and that these materials provide sufficient support for the Commission to grant waiver(s) of its rules to the extent necessary to permit the proposed C–V2X operations. They contend that their proposed technical parameters for C–V2X operations are generally consistent with DSRC parameters and unlikely to raise interference concerns to existing licensed services in the band. They also agree, as a condition of any waiver grant, they would be obligated to comply with any final rules that the Commission adopts for C–V2X operations.

Public Comment on Waiver. Prior to evaluating the merits of the Joint C–V2X Waiver Request, and in order to assist in assessing the request, the Bureaus seek comment on this waiver request, including whether the request contains sufficient information for the Commission to grant their request or whether additional modifications or clarifications would be appropriate.

Procedural Matters

To develop a complete record on the issues presented by this request, the proceeding will be treated, for ex parte purposes, as a “permit-but-disclose” proceeding in accordance with Section 1.1200(a) of the Commission’s rules, subject to the requirements under Section 1.1206(b). Parties should file all comments and reply comments in ET Docket No. 19–138.

Filing Requirements. Parties may file comments, identified by ET Docket No. 19–138, by any of the following methods:

- Electronic Filers: Comments may be filed electronically using the internet by accessing the ECFS: https://www.fcc.gov/ecfs/
- Paper Filers: Parties who choose to file by paper must file an original and one copy of each filing.

Filings can be sent by commercial courier or by the U.S. Postal Service. All filings must be addressed to the Commission’s Secretary, Office of the Secretary, Federal Communications Commission.

- Commercial deliveries (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9050 Junction Drive, Annapolis Junction, MD 20701.
- U.S. Postal Service First-Class, Express, and Priority mail must be addressed to 45 L Street NE, Washington, DC 20554.

Effective March 19, 2020, and until further notice, the Commission no longer accepts any hand or messenger delivered filings. This is a temporary measure taken to help protect the health and safety of individuals, and to mitigate the transmission of COVID–19. See FCC Announces Closure of FCC Headquarters Open Window and Change in Hand-Delivery Policy, Public Notice, DA 20–304 (March 19, 2020). https://www.fcc.gov/document/fcc-closes-headquarters-open-window-and-changes-hand-delivery-policy.

- During the time the Commission’s building is closed to the general public and until further notice, if more than one docket or rulemaking number appears in the caption of a proceeding, paper filers need not submit two additional copies for each additional docket or rulemaking number; an original and one copy are sufficient.

People with Disabilities: To request materials in accessible formats for people with disabilities (braille, large print, electronic files, audio format), send an email to fcc504@fcc.gov or call the Consumer & Government Affairs Bureau at 202–418–0530 (voice), 202–418–0432 (tty).

Amy Brett, Acting Chief of Staff, Wireless Telecommunications Bureau.
