SUPPLEMENTARY INFORMATION:

I. Discussion

NUREG–2159, Revision 1, (ADAMS Accession No. ML22143A963) provides guidance to facilitate compliance with applicable provisions in Subpart D of Part 74 of title 10 of the *Code of Federal Regulations* (10 CFR), “Material Control and Accounting of Special Nuclear Material.” NUREG–2159, Revision 1, provides guidance for fuel cycle and other licensees and applicants who may request authorization to hold special nuclear material of moderate strategic significance. Generally, this guidance document discusses acceptable methods licensees and applicants may use to prepare and implement their fundamental nuclear material control plans, and how the NRC will review and inspect these plans.

II. Additional Information

Draft NUREG–2159, Revision 1, was published in **Federal Register** on September 23, 2021 (86 FR 52926) with a 60-day public comment period. The NRC received a request for an extension of the public comment period, granted that request, and extended the comment period by an additional 14 days, ending on December 3, 2021 (86 FR 61795, November 8, 2021). The NRC received four comment submissions from individual commenters during the comment period. All of these submissions were from members of the nuclear industry representing different organizations. In summary, the Nuclear Energy Institute (NEI) incorporated the comments from Centrus/American Centrifuge Operating (Centrus) and Global Nuclear Fuel—Americas (GNF–A), and X-Energy endorsed the NEI’s consolidated comments. The four comment submissions can be found in ADAMS under Accession Nos. ML21337A083 (NEI), ML21300A135 (Centrus), ML21347A942 (GNF–A), and ML21344A034 (X-Energy). The NRC responses to these public comments can

be found in ADAMS under Accession No. ML22080A123. This document explains the changes made to the draft version in response to the public comments.

III. Congressional Review Act

This NUREG is a rule as defined in the Congressional Review Act (5 U.S.C. 801–808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

Dated: July 1, 2022.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Discussion

The NRC staff is issuing for public comment draft Supplement 1 to NUREG–2183. When a final environmental impact statement (FEIS) has been prepared in connection with the issuance of a construction permit for a production or utilization facility, the NRC staff is required to prepare a supplement to the FEIS on the construction permit in connection with any issuance of an operating license for that facility in accordance with paragraph 51.95(b) of title 10 of the *Code of Federal Regulations*.

Draft Supplement 1 to NUREG–2183 updates the prior environmental review by the NRC staff for the SHINE facility construction permit. This supplement only covers matters that differ from or that reflect significant new information concerning matters discussed in NUREG–2183. Draft Supplement 1 to NUREG–2183 includes the NRC staff’s preliminary analysis of the environmental impacts of the proposed action of deciding whether to issue a license to SHINE to operate the SHINE facility for a period of 30 years. After weighing the environmental, economic, technical, and other benefits against environmental and other costs, the NRC staff’s preliminary recommendation, unless safety issues mandate otherwise, is that the operating license be issued as requested.

III. Request for Comment and Public Meeting

The NRC staff will hold a public meeting as an online webinar and teleconference to present an overview of its preliminary analysis and to receive comments on draft Supplement 1 to NUREG–2183. A court reporter will transcribe all comments received during the public meeting and the transcript will be made publicly available. To be considered, comments must be provided either at the transcribed public meeting or in writing, as discussed in the **ADDRESSES** section of this document. The date and time for the public meeting is as follows:

II. Discussion

Omaha Public Power District (OPPD or licensee) is the holder of Facility Operating License No. DPR-40. The license provides, among other things, that the facility is subject to all rules, regulations, and orders of the NRC now or hereafter in effect. The facility is a pressurized-water reactor located in Washington County, NE.

On June 24, 2016, OPPD formally notified the NRC of its intent to permanently cease operations at FCS. By letter dated November 13, 2016, the licensee notified the NRC that it had
