modernization project for the state of Alaska.

The route changes are described below.

T–275: T–275 extends from the Bethel, AK, (BET) VHF Omnidirectional Range Tactical Air Navigation (VORTAC) and the Unalakleet, AK, (UNK) VOR Distance Measuring Equipment (VOR/DME). This action extends the route south from the Bethel, AK, (BET) VORTAC to provide alternate navigation for Colored Federal airway B–7. An additional turn point is added between the Bethel, AK, (BET) VORTAC and the Unalakleet, AK, (UNK) VOR/DME taking the airway slightly to the west to allow for better route connectivity with other proposed and current T-routes. The resulting T-route extends between the ZIKNI, AK, WP and the Unalakleet, AK, (UNK) VOR/DME.

FAA Order JO 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA determined that this airspace action of amending RNAV route T–275 in the vicinity of Bethel, AK qualifies for categorical exclusion under the National Environmental Policy Act (42 U.S.C. 4321 et seq.) and its implementing regulations at 40 CFR part 1500, and in accordance with FAA Order 1050.1F, Environmental Impacts: Policies and Procedures, paragraph 5–6.5a, which categorically excludes from further environmental impact review rulemaking actions that designate or modify classes of airspace areas, airways, routes, and reporting points (see 14 CFR part 71, Designation of Class A, B, C, D, and E Airspace Areas; Air Traffic Service Routes; and Reporting Points), and paragraph 5–6.5i, which categorically excludes from further environmental review the establishment of new or revised air traffic control procedures conducted at 3,000 feet or more above ground level (AGL); procedures conducted below 3,000 feet AGL that do not cause traffic to be routinely routed over noise sensitive areas; modifications to currently approved procedures conducted below 3,000 feet AGL that do not significantly increase noise over noise sensitive areas; and increases in minimum altitudes and landing minima. As such, this action is not expected to result in any potentially significant environmental impacts. In accordance with FAA Order 1050.1F, paragraph 5–2 regarding Extraordinary Circumstances, the FAA has reviewed this action for factors and circumstances in which a normally categorically excluded action may have a significant environmental impact requiring further analysis. Accordingly, the FAA has determined that no extraordinary circumstances exist that warrant preparation of an environmental assessment or environmental impact study.

16 CFR Part 1241

[CPSC Docket No. 2020–0023]

Safety Standard for Crib Mattresses; Correction

AGENCY: Consumer Product Safety Commission.

ACTION: Final rule; correction.

SUMMARY: On February 15, 2022, the U.S. Consumer Product Safety Commission (CPSC) promulgated a final rule establishing a safety standard for crib mattresses. The crib mattress rule incorporated by reference a voluntary standard for crib mattresses that had been published by ASTM International (ASTM) and provided a uniform resource locator (URL) allowing the public to link to ASTM’s website to retrieve a read-only, free copy of ASTM’s voluntary standard for crib mattresses. In this document, CPSC is correcting the URL for ASTM’s website stated in the final rule.

DATES: This correction is effective on August 15, 2022.

SUPPLEMENTARY INFORMATION: The Commission’s regulation at 16 CFR part 1241, titled “Safety Standard for Crib Mattresses,” provides a URL to access the voluntary standard incorporated by reference into CPSC’s mandatory standard. That voluntary standard, ASTM F2933–21, Standard Consumer Safety Specification for Crib Mattresses (approved on June 15, 2021) (ASTM F2933–21), will be available for viewing free of charge on the ASTM website once the rule becomes effective on August 15, 2022. 87 FR 8640 (Feb. 15, 2022). Section 1241.2(a) of the Safety Standard for Crib Mattresses states: “Once incorporated by reference, you may review a read-only copy of ASTM F2933–21 at http://www.astm.org/READINGROOM/.” 87 FR 8674. This URL is incorrect, and the public should be directed instead to: https://www.astm.org/READINGLIBRARY/. Accordingly, the Commission issues this final rule to update 16 CFR 1241.2(a) with the correct URL citation for the ASTM reading library containing voluntary standards incorporated by reference into regulations. This document does not make any substantive changes to the final rule.
