

238.121(c)(2), regarding interior doors and emergency system back-up power, respectively. As background, in December 2020, FRA denied BW's request for relief to use single-leaf breakable safety glass vestibule doors instead of doors with removal panels per § 238.112(f), because BW did not provide enough information and safety justification for FRA to render an appropriate decision. In its May 31, 2022, petition, BW states it has provided additional information as FRA identified, and renews its request for relief from this requirement. BW also requests new relief from § 238.121(c)(2), pertaining to the requirement that passenger equipment's emergency system back-up power be capable of withstanding shocks leading to individually applied accelerations of 8g/4g/4g (longitudinal/lateral/vertical). BW explains that the 8g/4g/4g accelerations are "inconsistent with the general design approach [for] a Tier III vehicle, which considers accelerations of [5g/3g/3g]." Additionally, BW notes that the Tier III notice of proposed rulemaking consensus language allows this specification if certain conditions are met for other back-up power supply systems. Further, BW notes that the approval of BW's waiver request in December 2020 assumed that the Siemens Velaro "Classic" trainsets would be used. BW requests FRA's confirmation and approval that the relief in this docket would apply to its next generation Siemens Velaro "Novo" trainsets, which are similar in design, but offer better accessibility, energy efficiency, and other improvements compared to the "Classic" trainsets.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted at <http://www.regulations.gov>. Follow the online instructions for submitting comments.
