removing obsolete sections of the ICRA model identified in the Response to CHIR No. 14, Questions 3–4; 2 (S) replacing International Accounting Branch (IAB) country numbers with International Organization for Standardization (ISO) codes. See Petition, Proposal Four at 1–3.

Rationale. The Postal Service states that the first proposed change would add a second aggregation step solely for NSA and non-NSA sources available to the ICRA, eliminate sections that are no longer used or serve no purpose, and streamline the ICRA model. See id. at 3–4.

Impact. The Postal Service states that non-public materials filed as part of Library Reference USPS–RM2022–10–NP1 accompanying this proposal show the impact of the proposed changes. See id. at 4. The Postal Service maintains these materials show a net impact of zero on total costs of market dominant and competitive products. See id. at 5. For the proposed change on the cost attribution of NSA products, the Postal Service states that for FY 2021, the proposal would not have caused any positive contribution products to turn negative or any negative products to turn positive, there would have been no impact on Inbound NSAs, and all Outbound NSAs would have remained positive. See id.

Mechanics. The Postal Service details a list of changes, adjustments, and eliminations that would be made to various files by the proposal. See id. at 5–14.
