#### History and Description of the Remains

In 1890 and 1891, human remains representing, at minimum, four individuals were removed from a mound in Jo Daviess County, IL. Based on the location description, it appears the mound was one of the Crooked Slough Mounds (11JD341). The human remains were excavated by a group of students from Coe College, who donated the skeletal material to the Coe College

Museum, also known as the Bert Bailey Museum. In 2012, the human remains were loaned to the Office of the State Archaeologist so that the Bioarchaeology Program could assist Coe College with NAGPRA compliance. The human remains consist of three adults of unknown age and sex, and one juvenile 1–3 years old of unknown sex (Burial Project 1934). No known individuals were identified. No associated funerary objects are present.

The overall condition of all of the human remains, supported by the limited provenience information available, suggests a date in antiquity. The cranial metrics and severe dental attrition observed on some individuals are both consistent with characteristics of prehistoric Native Americans. However, these human remains cannot be dated or attributed to a particular archeological context in Illinois.

At an unknown date, human remains representing, at minimum, three individuals were removed from a mound at an unknown location in Delaware County, IN. The circumstances of the removal are unknown, but the human remains (Accession #2106) were stored in the collections of the Coe College Museum, also known as the Bert Bailey Museum, in Cedar Rapids, IA. The style of the accession tag is identical to those used for late 19th century donations to the museum. In 2012, the human remains were loaned to the Office of the State Archaeologist so that the Bioarchaeology Program could assist Coe College with NAGPRA compliance. An older, possibly male adult and two adolescents or young adults are represented by the human remains (Burial Project 1934). No known individuals were identified. No associated funerary objects are present.

#### Determinations Made by Coe College

Officials of Coe College, with the concurrence of the Office of the State Archaeologist Bioarchaeology Program, have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice are Native American based on archival information, archeological evidence, and/or osteological analysis.
- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of seven individuals of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(2), a relationship of shared group identity cannot be reasonably traced between the Native American human remains and any present-day Indian Tribe.

- According to final judgments of the Indian Claims Commission or the Court of Federal Claims, the land from which the Native American human remains were removed is the aboriginal land of The Tribes.

- Pursuant to 43 CFR 10.11(c)(1), the disposition of the human remains may be to The Tribes.

#### Additional Requestors and Disposition

Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to Dr. Lara Noldner, Office of the State Archaeologist Bioarchaeology Program, University of Iowa, 700 S Clinton Street, Iowa City, IA 52242, telephone (319) 384-0740, email [lara-noldner@uiowa.edu](mailto:lara-noldner@uiowa.edu), by August 22, 2022. After that date, if no additional requestors have come forward, transfer of control of the human remains to The Tribes may proceed.

Coe College, with the assistance of the Office of the State Archaeologist Bioarchaeology Program, is responsible for notifying The Tribes that this notice has been published.

Dated: July 13, 2022.
