[Docket No. 72-1051; NRC-2018-0052]

Holtec International HI-STORE Consolidated Interim Storage Facility Project

AGENCY: Nuclear Regulatory Commission.

ACTION: Environmental impact statement; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing its final Environmental Impact Statement (FEIS), NUREG-2237, "Environmental Impact Statement for the Holtec International's License Application for a Consolidated Interim Storage Facility for Spent Nuclear Fuel in Lea County, New Mexico." Holtec International (Holtec) has requested a license to construct and operate a consolidated interim storage facility (CISF) for spent nuclear fuel (SNF) and Greater-Than-Class C (GTCC) waste, along with a small quantity of mixed oxide (MOX) fuel. The proposed CISF would be located in southeast New Mexico at a site located approximately halfway between the cities of Carlsbad and Hobbs. The proposed action is the issuance of an NRC license authorizing a CISF to store up to 8,680 metric tons of uranium (MTUs) [9,568 short tons] of SNF in 500 canisters for a license period of 40 years.

DATES: The FEIS referenced in this document is available on July 13, 2022.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with section 51.118 of title 10 of the *Code of Federal*

Regulations (10 CFR) “Final environmental impact statement—notice of availability,” the NRC is making available NUREG-2237, which concerns the NRC’s FEIS for the license application submitted by Holtec to construct and operate a CISF for SNF and GTCC waste, along with a small quantity of MOX fuel, which are collectively referred to in the EIS as SNF and composed primarily of spent uranium-based fuel. The NRC published notice of the draft EIS in the **Federal Register** on March 20, 2020 (85 FR 16150), and the U.S. Environmental Protection Agency noticed the availability of the draft EIS on March 20, 2020 (85 FR 16093). The public comment period on the draft EIS ended on September 22, 2020, and the comments received are addressed in the FEIS. The FEIS is available as indicated in the **ADDRESSES** section of this document.

II. Discussion

The NRC is issuing the FEIS for an application from Holtec requesting a license to authorize construction and operation of a CISF for SNF at a site located approximately halfway between Carlsbad and Hobbs, New Mexico. The proposed CISF project would be built and operated on approximately 421 hectares (ha) [1,040 acres (ac)] of land in Lea County, New Mexico. The storage and operations area, which is a smaller land area within the full property boundary, would include 134 ha [330 ac] of disturbed land. The proposed project area is approximately 51 kilometers (km) [32 miles (mi)] east of Carlsbad, New Mexico, and 54 km [34 mi] west of Hobbs, New Mexico. The proposed action is the issuance of an NRC license authorizing a CISF to store up to 8,680 MTUs [9,568 short tons] of SNF in 500 canisters for a period of 40 years.

The FEIS is being issued as part of the NRC’s process to decide whether to issue a license to Holtec pursuant to 10 CFR part 72. In this FEIS, the NRC staff has assessed the potential environmental impacts to construct and operate the proposed CISF. The NRC staff assessed the impacts of the proposed action and the No-Action alternative on land use; transportation; geology and soils; water resources; ecological resources; air quality; noise; historical and cultural resources; visual and scenic resources; socioeconomic; environmental justice, public and occupational health, and waste management. Additionally, the FEIS analyzes and compares the benefits and costs of the proposed action and the No-Action alternative. In preparing this

FEIS, the NRC staff also considered, evaluated, and addressed the public comments received on the draft EIS. Appendix D of the FEIS summarizes the public comments received and the NRC’s responses.

After comparing the impacts of the proposed action to those of the No-Action alternative, the NRC staff, in accordance with the requirements in 10 CFR part 51, recommends the proposed action, subject to the determinations in the staff’s safety review of the application. This recommendation is based on (i) the Holtec license application, which includes an environmental report and supplemental documents, and Holtec’s responses to the NRC staff’s requests for additional information; (ii) the NRC staff’s consultation with Federal, State, Tribal, local agencies, and input from other stakeholders, including members of the public; (iii) the NRC staff’s independent review; and (iv) the NRC staff’s assessments provided in the FEIS.

Dated: July 14, 2022.

For the Nuclear Regulatory Commission.

John M. Moses,

Deputy Director, Division of Rulemaking, Environmental, and Financial Support, Office of Nuclear Material Safety, and Safeguards.
