Summary of Kosovo Compact

Overview of MCC Kosovo Compact

MCC’s five-year Compact with the Government of Kosovo in the amount of \$202,000,000 aims to reduce poverty through economic growth by targeting a binding constraint to economic growth in the country: the unreliable supply of electricity. The Compact will address this constraint through three projects: the Energy Storage Project, the Just and Equitable Transition Acceleration

(JETA) Project, and the American Catalyst Facility for Development (ACFD) Project. The ACFD Project leverages U.S. International Development Finance Corporation (DFC) financing to complement the objectives of the Energy Storage Project. MCC’s investments in Kosovo’s energy sector will accelerate Kosovo’s transition towards an energy future that is more sustainable, inclusive, reliable, and affordable.

Project Summaries

The projects and activities to be completed are:

1. *Energy Storage Project:* The objective of the Energy Storage Project is to support energy security and transition to a cleaner energy future, as reflected by the (1) usage of energy storage systems; (2) availability of the energy storage system; and (3) reduced cost of securing adequate electricity for Kosovo. The project includes three activities:

- *Frequency Restoration Response Activity:* This activity intends to support the transmission system operator in owning and operating approximately 90 megawatt-hours (MWh) of energy reserves to cost-effectively smooth out unexpected imbalances in the electricity grid.

- *Multi-Functional Energy Storage (MFES) Activity:* This activity intends to support a public or public-private partnership battery storage entity in owning and operating approximately 250MWh of energy storage that could be used for frequency restoration reserves, energy arbitrage, or other potential ancillary services, filling in gaps of longer-scale, unexpected outages or shifting energy to cover peak demand.

- *Energy and Climate Policy Support Activity:* This activity intends to support technical and administrative capacity building for energy and climate regulators and the policy and institutional reforms required to ensure the operating environment for energy storage in Kosovo is well defined and regulated through Kosovo’s laws and supported by good planning, maintenance, and cost-reflective tariffs. It also aims to support cross-cutting measures on female employment and entrepreneurship across projects, and policy and institutional reform around pro-poor and gender-inclusive planning in the sector.

2. *JETA Project:* The objectives of the JETA Project are to (1) produce graduates who are hired in relevant jobs in the energy and adjacent sectors; and (2) increase employment of women among participating employers in the
