withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(2)(C) of the Act: (1) the cash deposit rate for the companies listed above will be equal to each company’s weighted-average dumping margin established in the final results of this administrative review (except if that rate is de minimis, in which situation the cash deposit rate will be zero); (2) for merchandise exported by a producer or exporter not covered in this review but covered in a prior completed segment of the proceeding, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original investigation but the producer has been covered in a prior complete segment of this proceeding, the cash deposit rate will be the company-specific rate established for the most recent period for the producer of the merchandise; (4) the cash deposit rate for all other producers or exporters will continue to be 11.25 percent, the all-others rate established in the less-than-fair-value investigation. These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce’s presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Administrative Protective Order

This notice also serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

Notification to Interested Parties

We are issuing and publishing these final results of administrative review in accordance with sections 751(a)(1) and 777(i) of the Act, and 19 CFR 351.221(b)(5).

Dated: July 15, 2022.
Lisa W. Wang,
Assistant Secretary for Enforcement and Compliance.

Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

SUMMARY: Notice is hereby given that the NMFS made a determination on the Tribal Resource Management Plan (Tribal Plan) submitted by the Northwest Indian Fisheries Commission (NWIFC) on behalf of the Northwest Indian Tribes; the submission fulfills the Tribes’ obligations under the protective regulations promulgated for Puget Sound (PS) Chinook salmon, Hood Canal summer-run (HCS) chum salmon, PS steelhead, and Southern (S) eulachon under the Endangered Species Act (ESA). The Tribal Plan describes research and assessment activities that may affect listed PS Chinook salmon, HCS chum salmon, PS steelhead, and S eulachon in Washington State. The research included in the Tribal plan is intended to increase knowledge of species listed under the ESA and to help guide management and conservation efforts. NMFS completed a proposed evaluation of how well the Tribal Plan fulfills ESA criteria, and the Secretary of Commerce (Secretary) made the proposed evaluation available for public comment.

FOR FURTHER INFORMATION CONTACT:
Shivonne Nesbit, Portland, OR (Ph: 503–231–6741, email: shivonne.nesbit@noaa.gov).

SUPPLEMENTARY INFORMATION:
Species Covered in This Notice

The following listed species are covered in this notice:

Chinook salmon (Oncorhynchus tshawytscha): Threatened Puget Sound (PS).
Chum salmon (O. keta): Threatened Hood Canal Summer-run (HCS).
Steelhead (O. mykiss): Threatened (PS).
Eulachon (Thaleichthys pacificus): Threatened southern distinct population segment (SDPS).

Authority

Under section 4 of the ESA, the Secretary is required to adopt such regulations as he deems necessary and advisable for the conservation of the species listed as threatened. The ESA Tribal (d) rule (70 FR 37160; June 28, 2005) states that the ESA section 9 take prohibitions do not apply to Tribal Plans that will not appreciably reduce the likelihood of survival and recovery for the listed species.

Summary of Comments Received

NMFS published notice of its proposed evaluation on the Tribal Plan April 11, 2022 (84 FR 33062). The proposed evaluation was available for public review and comment for 30 days. No comments were received.

The Tribal Plan

The NWIFC—through the Bureau of Indian Affairs and on behalf of the Northwest Indian Tribes—submitted a Tribal Plan for scientific research and assessment activities within the range of the PS Chinook salmon, HCS chum salmon, PS steelhead, and SDPS eulachon. The Northwest Indian Tribes conduct, independently and in cooperation with other agencies, a variety of research and assessment projects. These projects provide the technical basis for managing fisheries and conserving and restoring salmon stocks and their habitat. The need for an improved understanding of salmonid survival in the freshwater and early marine life stages drives much of the current research. The Tribal Plan includes implementation, monitoring, and evaluation procedures designed to ensure that the research is consistent with the objectives of the ESA. The research activities described in the Tribal Plan would take place over a 5 year period starting in 2022.

As 50 CFR 223.209 requires, the Secretary must determine whether the activities proposed in the Tribal Plan would appreciably reduce the likelihood of survival and recovery for PS Chinook salmon, HCS chum salmon, PS steelhead, and SDPS eulachon. NMFS’ final determination is that the Tribal Plan will not appreciably reduce the listed species’ likelihood of survival.

5 See Order.
and recovery. This determination is consistent with NMFS’ obligation to conserve listed species under the ESA and to meet trust obligations to Indian Tribes. The Tribal Plan would sufficiently conserve the listed species and therefore take prohibitions would not apply to the research activities governed by the Tribal Plan.

Dated: July 20, 2022.

Angela Somma,
Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to New England Wind, Phase 1 Park City Wind Marine Site Characterization Surveys

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; Issuance of an incidental harassment authorization.

SUMMARY: In accordance with the regulations implementing the Marine Mammal Protection Act (MMPA) as amended, notification is hereby given that NMFS has issued an incidental harassment authorization (IHA) to Park City Wind, LLC (Park City Wind) to incidentally harass marine mammals during marine site characterization surveys offshore of Massachusetts south through Long Island, New York.

DATES: This Authorization is effective from September 1, 2022 through August 31, 2023.

FOR FURTHER INFORMATION CONTACT: Jenna Harlacher, Office of Protected Resources, NMFS, (301) 427–8401. Electronic copies of the application and supporting documents, as well as a list of the references cited in this document, may be obtained online at: https://www.fisheries.noaa.gov/action/incidental-take-authorization-park-city-wind-llc-new-england-wind-project-phase-1-marine. In case of problems accessing these documents, please call the contact listed above.

SUPPLEMENTARY INFORMATION:

Background

The MMPA prohibits the “take” of marine mammals, with certain exceptions. Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 et seq.) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are proposed or, if the taking is limited to harassment, a notice of a proposed incidental harassment authorization is provided to the public for review.

Authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for taking for subsistence uses (where relevant). Further, NMFS must prescribe the permissible methods of taking and other “means of effecting the least practicable adverse impact” on the affected species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of the species or stocks for taking for certain subsistence uses (referred to in shorthand as “mitigation”); and requirements pertaining to the mitigation, monitoring and reporting of the takings are set forth. The definitions of all applicable MMPA statutory terms cited above are included in the relevant sections below.

Summary of Request

On December 17, 2021, NMFS received a request from Park City Wind for an IHA to take marine mammals incidental to marine site characterization surveys in waters offshore of Massachusetts south through Long Island, New York. The application was deemed adequate and complete on March 25, 2022. On May 27 2022, NMFS published a proposed IHA for public comment (87 FR 32123). Park City Wind’s request is for take of 16 species of marine mammals, by Level B harassment only. Neither Park City Wind nor NMFS expect serious injury or mortality to result from this activity and, therefore, an IHA is appropriate. There are no changes from the proposed IHA to the final IHA.

Description of Planned Activity

Overview

Park City Wind surveys are phase 1 of the New England Wind project located in the BOEM Lease Area OCS—A0534. The New England Wind project is comprised of Phase 1 Park City Wind and Phase 2 Commonwealth Wind (CW), along with associated offshore and onshore cablegs, onshore substations, and onshore operations and maintenance (O&M) facilities (Figure1). Phase 2 is not part of this application.

The purpose of the marine site characterization surveys are to obtain an assessment of seabed (geophysical, geotechnical, and geohazard), ecological, and archeological conditions within the footprint of a planned offshore wind facility development area. Underwater sound resulting from Park City Wind’s planned site characterization survey activities, specifically HRG surveys, has the potential to result in incidental take of marine mammals in the form of Level B harassment.

Dates and Duration

Park City Wind anticipates that HRG survey activities will occur on approximately 636 “vessel days,” with an assumed daily survey distance of 80 km per vessel. This schedule is based on up to 24-hour operations. Each day that a vessel surveys up to approximately 80 kilometers (km) within 24 hours will count as a single survey day, e.g., two survey vessels operating on the same day will count as two survey days. The use of concurrently surveying vessels will facilitate completion of all 636 vessel days within one year. Park City Wind plans to begin survey activities upon receipt of an IHA and continue for up to one year (though the actual duration will likely be shorter, because Park City Wind intends to use up to 3 vessels concurrently). Park City Wind and NMFS calculated the number of active sound source days by dividing the total survey trackline (50,880 km) by the approximate survey distance per day (80 km) anticipated to be achieved.

Specific Geographic Region

HRG survey activities are planned to occur in both Federal offshore waters (including Lease Area OCS—A 0534) and along potential offshore export cable corridors (OEEC) in both Federal and State nearshore waters of Massachusetts, Rhode Island, Connecticut, and New York. The planned survey will be active within the area illustrated in Figure 1. Water depths in the lease area range from about 35 to 60 meters (m) (115 to 197 feet (ft)). Water depths along the
