FEDERAL REGISTER

Vol. 87 Tuesday

No. 142 July 26, 2022

Pages 44265–45002

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 87 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Parts 1 and 2

RIN 0503–AA68

Delegations of Authority

AGENCY: Office of the Secretary, USDA.

ACTION: Final rule.

SUMMARY: This document revises the delegations of authority from the Secretary of Agriculture and general officers of the Department of Agriculture (USDA) to reflect changes and additions to the delegations as summarized below. This rule also amends the scope and applicability of the rules of practice governing formal adjudicatory hearings to include actions initiated under the National Forest Roads and Trails Act.

DATES: Effective July 26, 2022.

FOR FURTHER INFORMATION CONTACT: Melissa McClellan, Office of the General Counsel, (202) 720–5565, *melissa.mcclellan@usda.gov.*

SUPPLEMENTARY INFORMATION:

Overview of Changes

A. Realignment of the Office of Tribal Relations

This rule amends the delegations of authority in 7 CFR part 2 to reflect the realignment of the Office of Tribal Relations (OTR) from a staff office within the Office of Partnerships and Public Engagement (OPPE) to a staff office whose head reports directly to the Secretary of Agriculture (Secretary). *See* Secretary's Memorandum 1077–002 (June 24, 2021), available at *https://www.ocio.usda.gov/document/secretarys-memorandum-1077-002.* The rule relocates the delegations of authority to the Director of OTR from § 2.701 in Subpart V to § 2.39 in Subpart D and removes the delegations of authority to the Director of OPPE related to the Office of Tribal Relations.

B. Realignment of the Office of the Executive Secretariat

This rule amends the delegations of authority in 7 CFR part 2 to reflect the realignment of the Office of the Executive Secretariat (OES). *See* Secretary's Memorandum 1076–06 (Aug. 14, 2020), available at *https://www.ocio.usda.gov/document/secretarys-memorandum-1076-036.* Pursuant to this realignment, the Departmental directives and forms functions previously assigned to the Director of OES have been reassigned to the Director of the Office of Budget and Program Analysis (OBPA). In addition, the Departmental records management functions previously assigned to the Director of OES have been reassigned to the General Counsel. Further, the rule revises the delegations of authority to reflect that the Director of OES and the Secretarial correspondence management function and support for the Immediate Office of the Secretary have been removed from the supervision of the Assistant Secretary for Administration (ASA) and now reside in the Office of the Secretary. To reflect the move of the Director of OES from the Departmental Administration mission area to the Office of the Secretary, this rule redesignates the delegations to the Deputy Secretary at § 2.15 to reserved § 2.14, moves the delegations of authority to the Under Secretary for Trade and Foreign Agricultural Affairs (TFAA) from § 2.26 to § 2.15, and moves the delegations of authority to the Director of OES from § 2.97 to § 2.26. This rule moves § 2.26 to Subpart D, Delegations of Authority to Other General Officers and Agency Heads, and amends the cross-references to the delegations of authority to the Under Secretary for TFAA in §§ 2.22, 2.600, 2.601, and 2.602.

C. Additional Delegations Under the Agriculture Improvement Act of 2018

Section 7611 of the Agriculture Improvement Act of 2018 (''the Act''), Public Law 115–334, renamed the Agriculture Conservation Experienced Services (ACES) program authorized under section 1252 of the Food Security Act of 1985 (16 U.S.C. 3851) the ''Experienced Services Program'' and expanded the authority to cover technical, professional, and administrative services to support the Research, Education, and Economics (REE) mission area of the Department. A previous rule implementing the Act added new delegations for the expanded program authority to the Under Secretary for REE and to the Director of NIFA. *See,* Revision of Delegations of Authority, 85 FR 65500–01 (Oct. 15, 2020). This rule revises the delegations of authority to reflect that the Experienced Services Program authority has been further assigned to the Administrators of the Agricultural Research Service (ARS), the Economic Research Service (ERS), and the National Agricultural Statistics Service (NASS).

Section 8642 of the Act (7 U.S.C. 7655c) established a new authority for the Secretary to carry out activities related to performance-driven research and development, education, and technical assistance for the purpose of facilitating the use of innovative wood products in wood building construction, including the authority to make competitive grants to institutions of higher education. This rule revises the delegations of authority to the Chief of the Forest Service, through the Under Secretary for Natural Resource and Environment (NRE), to include the authority under 7 U.S.C. 7655c, as previously assigned in Secretary's Memorandum 1076–030 (July 1, 2019), available at *https://www.ocio.usda.gov/document/secretarys-memorandum-1076-030.*

D. Service First Initiative

The ''Service First'' initiative, codified at 43 U.S.C. 1703, authorizes the Secretary of Agriculture and the Secretary of the Interior to establish joint projects, co-locate in facilities, and make reciprocal delegations of authority to promote customer service and efficiency. Although initially limited to land management agencies, Congress amended the authority in 2014 to make it available to all bureaus or offices of USDA and the Department of the Interior. This rule extends the Service First authority to the Under Secretary for Farm Production and Conservation (FPAC), following an initial delegation in a Secretary's Memorandum issued January 4, 2021.

E. Miscellaneous Revisions to Part 2

Section 5 of the Department of Agriculture Organic Act of 1956 (7 U.S.C. 2228) authorizes the Department to furnish subsistence to employees

without consideration as, or deduction from, the compensation of such employees where warranted by emergency conditions connected with the work of the Department under regulations prescribed by the Secretary. This rule revises the delegations of authority to the Under Secretary for NRE and the Chief of the Forest Service to confirm that this Departmental authority is available to the Forest Service. Further, this revision to the published delegations confirms the existing authority of the Forest Service to provide subsistence, including quarters and meals, to agency personnel in emergency conditions, such as wildland firefighters, in a manner that takes into account health and safety requirements resulting from the COVID–19 pandemic and other such emergencies.

This rule also modifies the existing delegation of authority from the Under Secretary for NRE to the Chief of the Forest Service at § 2.60 concerning the authority to acquire land under the Weeks Act and special forest receipts acts. The revision streamlines the land acquisition process by removing the exception, for acquisitions of $250,000 in value or greater, to the Chief's delegation of authority to approve such acquisitions and by eliminating the corresponding reservation of authority by the Under Secretary for NRE to approve such land acquisitions.

In addition, this rule makes general updates to the delegations to the Director of the Office of Homeland Security in § 2.95 and the related delegations to the Assistant Secretary for Administration (ASA) in § 2.24(a)(8). The rule moves the delegations to the ASA related to physical security and safety of personnel from 2.24(a)(8) to a new paragraph (a)(11) to reflect that these delegations are further assigned to the Office of Safety, Security, and Protection. This rule also corrects an internal citation in a delegation to the Under Secretary for NRE.

This rule makes revisions throughout Part 2 to reflect the name change of the former Office of Property and Fleet Management to the Office of Environmental Management. *See* Secretary's Memorandum 1077–001 (March 26, 2021), available at *https://www.ocio.usda.gov/document/secretarys-memorandum-1076-037.*

This ruled further amends the existing delegations to the Under Secretary for FPAC and the Administrator of the Farm Service Agency (FSA) under 7 U.S.C. 2204b(b)(4) to enter into cooperative agreements related to outreach and technical assistance for FSA programs, as previously implemented in Secretary's Memorandum 1077–003 (July 26, 2021) available at *https://www.ocio.usda.gov/document/secretarys-memorandum-1077-003.*

F. Addition of National Forest Roads and Trails Act to USDA's Rules of Practice

In addition to the revisions to Part 2, this rule also amends the scope of and applicability of USDA's rules of practice for formal adjudicatory hearings at 7 CFR part 1, subpart H, to include proceedings under the National Forest Roads and Trails Act (FRTA) (16 U.S.C. 534). FRTA requires a formal adjudicatory proceeding for revocation of easements for nonuse, provided the holder requests one within 60 days of receipt of the notice of revocation. Revising 7 CFR 1.131 to add FRTA to the list of statutory provisions does not require public notice and comment as it is a technical, non-discretionary change to comply with statutory law.

Classification

This rule relates to internal agency management. Accordingly, pursuant to 5 U.S.C. 553, notice of proposed rulemaking and opportunity for comment are not required, and this rule may be made effective less than 30 days after publication in the **Federal Register**. This rule also is exempt from the provisions of Executive Orders 12866 and 13771. This action is not a rule as defined by the Regulatory Flexibility Act, as amended by the Small Business Regulatory Enforcement Fairness Act of 1996, 5 U.S.C. 601 *et seq.,* or the Congressional Review Act, 5 U.S.C. 801 *et seq.,* and thus is exempt from the provisions of those acts. This rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

List of Subjects

7 CFR Part 1

Administrative practice and procedure, Agriculture, Antitrust, Claims, Cooperatives, Courts, Equal access to justice, Fraud, Freedom of information, Government employees, Lawyers, Motion pictures, Penalties, Privacy.

7 CFR Part 2

Authority delegations (Government agencies).

Accordingly, as discussed in the preamble, 7 CFR Subtitle A is amended as follows:

Subtitle A—Office of the Secretary of Agriculture

PART 1—ADMINISTRATIVE REGULATIONS

Subpart H—Rules of Practice Governing Formal Adjudicatory Proceedings Instituted by the Secretary Under Various Statutes

■ 1. The authority citation for subpart H is revised to read as follows:

Authority: 5 U.S.C. 301; 7 U.S.C. 61, 87e, 228, 268, 499o, 608c(14), 1592, 1624(b), 1636b, 1638b, 2151, 2279e, 2621, 2714, 2908, 3812, 4610, 4815, 4910, 6009, 6107, 6207, 6307, 6411, 6519, 6520, 6808, 7107, 7734, 8313; 15 U.S.C. 1828; 16 U.S.C. 534, 620d, 1540(f), 3373; 21 U.S.C. 104, 111, 117, 120, 122, 127, 134e, 134f, 135a, 154, 463(b), 621, 1043; 30 U.S.C. 185(o)(1); 43 U.S.C. 1740; 7 CFR 2.27, 2.35.

7 CFR § 1.131

■ 2. Amend § 1.131(a) by adding a statutory provision to the list in alphabetical order to read as follows:

§ 1.31 Scope and applicability of this subpart.

(a) * * *

National Forest Roads and Trails Act (16 U.S.C. 534).

* * * * *

PART 2—DELEGATIONS OF AUTHORITY BY THE SECRETARY OF AGRICULTURE AND GENERAL OFFICERS OF THE DEPARTMENT

■ 3. The authority citation for part 2 continues to read as follows:

Authority: 7 U.S.C. 6912(a)(1); 5 U.S.C. 301; Reorganization Plan No. 2 of 1953, 3 CFR 1949–1953 Comp., p. 1024.

PART 2—[AMENDED]

■ 4. In part 2, revise all references to ''Director, Office of Property and Fleet Management'' to read ''Director, Office of Property and Environmental Management''.

Subpart C—Delegations of Authority to the Deputy Secretary, Under Secretaries, and Assistant Secretaries

§ 2.15 [Redesignated]

■ 5. Redesignate § 2.15 as § 2.14.

§ 2.26 [Redesignated]

■ 6. Redesignate § 2.26 as § 2.15.

■ 7. Amend the newly redesignated § 2.15 by revising paragraphs (a)(1)(iv) and removing and reserving paragraph (a)(1)(vii)(F) to read as follows:

§ 2.15 Under Secretary for Trade and Foreign Agricultural Affairs.

(a) * * *

(1) * * *

(iv) Conduct functions of the Department relating to WTO, the Trade Expansion Act of 1962 (19 U.S.C. 1801 *et seq.*), the Trade Act of 1974 (19 U.S.C. 2101 *et seq.*), the Trade Agreements Act of 1979 (19 U.S.C. 2501 *et seq.*), the Omnibus Trade and Competition Act of 1988 (19 U.S.C. 2901 *et seq.*), and other legislation affecting international agricultural trade including the programs designed to reduce foreign tariffs and other trade barriers.

* * * * *

■ 8. Amend § 2.16 by revising paragraphs (a)(1)(xxviii)(B) and (a)(12) to read as follows:

§ 2.16 Under Secretary for Farm Production and Conservation.

(a) * * *

(1) * * *

(xxviii) * * *

(B) Administer cooperative agreements with Federal agencies, State, local, and tribal governments, nongovernmental organizations, and educational institutions related to outreach and technical assistance for programs carried out by the Farm Service Agency, and, where such cooperative agreements focus on outreach activities to beginning, underserved, or veteran producers, coordinate with the Director, Office of Partnerships and Public Engagement to reduce potential duplication.

* * * * *

(12) Establish programs with any bureau of the U.S. Department of the Interior (DOI), or with other agencies within USDA, in support of the Service First initiative for the purpose of promoting customer service and efficiency, including delegating to employees of DOI and other USDA agencies the authorities of the agencies in the Farm Production and Conservation mission area necessary to carry out projects on behalf of USDA (43 U.S.C. 1703).

* * * * *

■ 9. Amend § 2.20 by revising the introductory text of paragraph (a)(2)(xxiv)(A) and (a)(2)(lv) and adding paragraph (a)(2)(lvi) to read as follows:

§ 2.20 Under Secretary for Natural Resources and Environment.

(a) * * *

(2) * * *

(xxiv) * * *

(A) Administer the forestry aspects of the programs listed in paragraphs (a)(2)(xxiv)(A)(*1*) through (*3*) of this section on the National Forest System, rangelands with national forest boundaries, adjacent rangelands which are administered under formal agreement, and other forest lands;

* * * * *

(lv) Conduct performance-driven research and development, education, and technical assistance for the purpose of facilitating the use of innovative wood products in wood building construction in the United States (7 U.S.C. 7655c) and administer the Wood Innovation Grant program (7 U.S.C. 7655d).

(lvi) Furnish subsistence to employees without consideration as, or deduction from, the compensation of such employees where warranted by emergency conditions connected with the work of the Forest Service (7 U.S.C. 2228).

* * * * *

§ 2.22 [Amended]

■ 10. In § 2.22, revise all references to ''§ 2.26(a)(1)(x)'' to read ''§ 2.15(a)(1)(x)''.

■ 11. Amend § 2.24 by:

■ a. Revising paragraph (a)(8);

■ b. Removing and reserving paragraphs (a)(9)(iii) and (a)(10); and

■ c. Revising paragraph (a)(11).

The revisions read as follows:

§ 2.24 Assistant Secretary for Administration.

(a) * * *

(8) *Related to homeland security.* (i) Serve as the principal advisor to the Secretary on national security, including emergency management, agriculture and food defense, and foreign investments in U.S. agriculture.

(ii) Coordinate activities of the Department, including policies, processes, budget needs, and oversight relating to national security, including emergency management, biodefense, agriculture and food defense, and foreign investments in U.S. agriculture.

(iii) Act as the primary liaison on behalf of the Department with other Federal departments and agencies in activities relating to national security, including emergency management, integrated laboratory networks, agriculture and food defense, foreign investments in U.S. agriculture, national intelligence collection priorities, and interagency coordination and data sharing.

(iv) Coordinate in the Department the gathering of information relevant to early warning and awareness of threats and risks to the food and agriculture critical infrastructure sector; and share that information with, and provide assistance with interpretation and risk characterization of that information to, the intelligence community (as defined in 5 U.S.C. 3003), law enforcement agencies, the Secretary of Defense, the Secretary of Homeland Security, the Secretary of Health and Human Services, and State fusion centers (as defined in section 210A(j) of the Homeland Security Act of 2002 (6 U.S.C. 124h(j)).

(v) Establish and maintain an effective defensive Counterintelligence Program to counter Foreign Intelligence Entity (FIE) threats to Departmental sensitive information and assets that includes identification and risk assessment to sensitive assets, development and implementation of mitigation strategies, integration of counter-FIE efforts across the Department, sharing of threat information and warnings, and promotion of counterintelligence training awareness.

(vi) Liaise with the Intelligence Community to assist in the development of periodic assessments and intelligence estimates, or other intelligence products, that support the defense of the food and agriculture critical infrastructure sector and risks associated with foreign investments in U.S. agriculture.

(vii) Coordinate the conduct, evaluation, and improvement of exercises to identify and eliminate gaps in preparedness and response.

(viii) Produce a Department-wide centralized strategic coordination plan to provide a high-level perspective of the operations of the Department relating to homeland and national security, including emergency management and agriculture and food defense.

(ix) Establish and carry out an interagency Agriculture and Food Threat Awareness Partnership Program, including by entering into cooperative agreements or contracts with Federal, State, or local authorities (7 U.S.C. 6922).

(x) Administer the Department's Emergency Preparedness Program. This includes:

(A) Coordinate the delegations and assignments made to the Department under the Defense Production Act of 1950, 50 U.S.C. App. 2061, *et seq.;* the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121, *et seq.;* and by Executive Orders 12148, ''Federal Emergency Management'' (3 CFR, 1979 Comp., p. 412), 12656, ''Assignment of Emergency Preparedness Responsibilities'' (3 CFR, 1988 Comp., p. 585), and 13603, ''National Defense Resources Preparedness'' (3 CFR, 2012 Comp., p. 225), or any successor to these Executive Orders, to ensure that the Department has sufficient capabilities to

respond to any occurrence, including natural disaster, military attack, technological emergency, or any all hazards incident.

(B) Manage the Department Emergency Operations Center at Headquarters and the Secretary's alternative facilities; provide senior staff with international, national, and regional situational awareness reports; and provide and maintain current information systems technology and National Security Systems to support USDA executive crisis management capability.

(C) Provide facilities and equipment to facilitate inter-agency coordination during emergencies.

(D) Activate the USDA incident management system in accordance with the National Response Framework and the National Incident Management System in the event of a major incident; and provide oversight and coordination of the Department's Emergency Support Functions as outlined in the National Response Framework.

(E) Develop and promulgate policies for the Department regarding emergency preparedness and national security, including matters relating to anti-terrorism and agriculture-related emergency preparedness planning, both national and international, and guidance to USDA State and County Emergency Boards.

(F) [Reserved]

(G) Provide representation and liaison for the Department in contacts with other Federal entities and organizations, including the National Security Council's functional directorates, Homeland Security Council, Office of Management and Budget, Department of Homeland Security, Federal Emergency Management Agency, Office of the Director of National Intelligence, Department of State, Federal Bureau of Investigation, and Department of Defense concerning matters of a national security, multilateral weapons conventions, natural disasters, other emergencies, and agriculture/food-related international civil emergency planning and related activities.

(H) Act as the primary USDA representative for anti-terrorism activities and coordinates and oversees USDA's agroterrorism defense activities and programs.

(I) [Reserved]

(J) Provide guidance and direction regarding radiological emergency preparedness programs and the implementation of the National Response Framework's Nuclear/Radiological Incident Annex to Departmental staff offices, mission areas, and agencies.

(K) Provide program leadership and coordination for USDA's radiological emergency preparedness requirements with respect to Emergency Management and Assistance (44 CFR parts 350 through 352).

(L) Represent USDA on the Federal Radiological Preparedness Coordinating Committee (FRPCC) and Regional Assistance Committees (RACs) and assist them in carrying out their functions.

(M) Support USDA in its management of the Department's emergency response program with respect to radiological emergency response activities.

(N) [Reserved]

(xi) Administer the Controlled Unclassified Information (CUI) program for the Department pursuant to E.O. 13556, ''Controlled Unclassified Information'' (75 FR 68675, 3 CFR, 2011 Comp., p. 267) and 32 CFR part 2002.

(xii) Serve as the primary point of contact for Government Accountability Office (GAO) and Office of the Inspector General (OIG) audits of USDA homeland and national security activities.

(xiii) Coordinate interaction between Department agencies and private sector businesses and industries in emergency planning and public education under Department authorities delegated or assigned under the National Response Framework, National Infrastructure Protection Plan, Defense Production Act of 1950, 50 U.S.C. App. 2061, *et seq.,* and Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121, *et seq.*

(xiv) Oversee the Department's ability to collect and disseminate information and prepare for an agricultural disease emergency, agroterrorism act, or other threat to agricultural biosecurity, and coordinate such activities among agencies and offices within the Department (7 U.S.C. 8912).

(xv) Promulgate Departmental policies, standards, techniques, and procedures and represent the Department in providing security guidance to the Food and Agricultural Sector nationwide. This includes the following duties:

(A) Provide guidance to USDA agencies and the Food and Agricultural Sector in matters of security through use of assessments and development of mitigation strategies.

(B) Represent and act as liaison for the Department in contacts with other Federal security entities and organizations, including the Interagency Security Committee and the Department of Homeland Security.

(C) Provide guidance and direction to ensure agriculture/food security are fully integrated in USDA's security preparations, which are reported to and coordinated with the White House.

(D) Provide assistance to the USDA agencies in preparation for and during a disaster to identify critical assets and possible alternate storage locations.

(xvi) Provide oversight and coordination of the development and administration of the Department Continuity Program. This includes:

(A) Provide guidance and direction regarding continuity of operations to the Office of the Secretary, Departmental staff offices, mission areas, and agencies.

(B) Represent and act as liaison for the Department in contacts with other Federal entities and organizations concerning matters of assigned continuity program responsibilities.

(C) Oversee Department continuity of operations and emergency relocation facility planning, development, equipping, and preparedness to ensure that resources are in a constant state of readiness.

(xvii) Establish procedures to prevent unnecessary access to classified national security information (CNSI) including procedures that require that need for access to CNSI is established before initiating security clearance procedures; and ensure that the number of persons granted access CNSI is limited to the minimum consistent with operational and security requirements:

(A) Direct and administer USDA's CNSI program pursuant to E.O. 13526, ''Classified National Security Information'' (75 FR 707, 3 CFR, 2010 Comp., p. 298), or subsequent orders.

(B) Establish and maintain Information Security policies and procedures for classifying, declassifying, safeguarding, and disposing of CNSI and materials.

(C) Investigate or delegate authority to investigate any potential compromises of CNSI and take corrective action for violations or infractions under section 5.5(b), of E.O. 13526 or any subsequent order.

(D) Develop and maintain oversight of all facilities throughout USDA where CNSI is or will be safeguarded, discussed, or processed including sole authority to liaison with the Central Intelligence Agency concerning guidance, approval, requirements, and oversight of USDA secure facilities.

(xviii) Control within USDA the acquisition, use, and disposal of material and equipment that can be a source of ionizing radiation.

(A) Promulgate policies and procedures for ensuring the safety of USDA employees, the public, and the environment resulting from USDA's use of ionizing radiation sources.

(B) Maintain and ensure compliance with the Nuclear Regulatory Commission regulations (Title 10, Code of Federal Regulations) and license(s) issued to USDA for the acquisition, use, and disposal of radioactive materials.

(xix) Provide administrative supervision to the unit that grants, denies, or revokes security clearances for USDA employees and contractors.

* * * * *

(11) *Related to safety, security, and protection.* (i) Promulgate Departmental policies, standards, techniques, and procedures; and represent the Department in maintaining the security of physical facilities and providing security guidance to the Food and Agricultural Sector nationwide. This includes the following activities:

(A) Lead and coordinate the development and maintenance of a mission critical facility inventory with agency involvement to ensure proper security countermeasures are implemented in the Department's most critical infrastructure.

(B) Provide guidance to USDA agencies in matters of physical security through use of physical security assessments and development of mitigation strategies.

(C) Conduct physical security investigations and compliance reviews Department-wide.

(D) Review and provide coordinated technical physical security assessments for all new construction of laboratories, data centers, germplasm repositories, and other mission critical infrastructure during the design phase, and all leased facilities prior to contract award.

(E) Oversee and manage physical security aspects of the Common Identification Card (LincPass) Program to ensure National Institute of Standards and Technology (NIST) and General Services Administration (GSA) compliancy within the National Capital Region and the physical access to USDA facilities.

(F) Provide enterprise connectivity to agency physical access control systems that provide cost leveraging and provisioning/de-provisioning nationwide.

(ii) Promulgate Departmental regulations, standards, techniques, and procedures and represent the Department in managing and maintaining a comprehensive physical and technical security program including access control, management of special police officer and guard services, executive driving, parking, ID badging in accordance with HSPD–12, occupant emergency and warden services at the USDA Headquarters Complex, George Washington Carver Center and, in coordination with GSA, USDA leased facilities in the Washington, DC metropolitan area, as well as at emergency relocation sites and certain critical facilities specified by the Assistant Secretary for Administration.

(iii) Carry out protection operations for the Secretary, Deputy Secretary, and other individuals as specified in Section 12520 of the Agriculture Improvement Act of 2018, including by authorizing law enforcement officers or special agents to carry firearms; conduct criminal investigations into potential threats to the security of individuals protected under Section 12520; make arrests without a warrant for any offense against the United States committed in the presence of the law enforcement officer or special agent; perform protective intelligence work, including identifying and mitigating potential threats and conducting advance work to review security matters relating to sites and events; and coordinate with local law enforcement authorities (7 U.S.C. 2279k).

* * * * *

Subpart D—Delegations of Authority to Other General Officers and Agency Heads

■ 12. Add § 2.26 to read as follows:

§ 2.26 Director, Office of the Executive Secretariat.

(a) *Delegations.* The following delegations of authority are made by the Secretary to the Director, Office of the Executive Secretariat:

(1) Exercise responsibility for all correspondence control and related records management functions for the Office of the Secretary;

(2) Provide administrative, editorial, and project management support services to the immediate Office of the Secretary.

(b) [Reserved]

■ 13. Amend § 2.30 by adding paragraph (a)(9) to read as follows:

§ 2.30 Director, Office of Budget and Program Analysis.

(a) * * *

(9) Administer the Departmental forms, reports, and directives management programs.

* * * * *

■ 14. Amend § 2.31 by adding paragraph (d) to read as follows:

§ 2.31 General Counsel.

* * * * *

(d) *Related to records management.* Administer the Departmental records management program.

* * * * *

§ 2.38 [Amended]

■ 15. Amend § 2.38 by removing and reserving paragraph (a)(2).

■ 16. Add § 2.39 to read as follows:

§ 2.39 Director, Office of Tribal Relations.

(a) *Delegations.* The following delegations of authority are made by the Secretary to the Director, Office of Tribal Relations.

(1) Serve as the Department's primary point of contact for tribal issues.

(2) Advise the Secretary on policies related to Indian tribes.

(3) Serve as the official with principal responsibility for the implementation of Executive Order 13175, ''Consultation and Coordination with Indian Tribal Governments,'' including the provision of Department-wide guidance and oversight regarding tribal consultation, coordination, and collaboration.

(4) Coordinate the Department's programs involving assistance to American Indians and Alaska Natives.

(5) Enter into cooperative agreements to improve the coordination and effectiveness of Federal programs, services, and actions affecting rural areas (7 U.S.C. 2204b(b)(4)); and to provide outreach and technical assistance to socially disadvantaged farmers and ranchers and veteran farmers and ranchers (7 U.S.C. 2279(c)(4)).

(6) Consult with the Administrator, Foreign Agricultural Service on the implementation of section 3312 of the Agriculture Improvement Act of 2018 (7 U.S.C. 5608) to support greater inclusion of Tribal agricultural food products in Federal trade activities.

(7) In coordination with the Under Secretary for Rural Development, provide technical assistance to improve access by Tribal entities to rural development programs funded by the Department of Agriculture through available cooperative agreement authorities (7 U.S.C. 2671).

(8) Oversee the Tribal Advisory Committee (7 U.S.C. 6921).

(b) [Reserved]

Subpart F—Delegations of Authority by the Under Secretary for Farm Production and Conservation.

■ 17. Amend § 2.42 by removing and reserving paragraph (a)(42) and revising paragraph (a)(50)(ii) to read as follows:

§ 2.42 Administrator, Farm Service Agency.

(a) * * *

(50) * * *

(ii) Administer cooperative agreements with Federal agencies, State, local, and tribal governments, nongovernmental organizations, and educational institutions related to outreach and technical assistance for programs carried out by the Farm Service Agency, and, where such cooperative agreements focus on outreach activities to beginning, underserved, or veteran producers, coordinate with the Director, Office of Advocacy and Outreach to reduce potential duplication.

Subpart J—Delegations of Authority by the Under Secretary for Natural Resources and Environment

■ 18. Amend § 2.60 by revising paragraphs (a)(3) and (a)(64), adding paragraph (a)(65), and removing paragraph (b)(6) to read as follows:

§ 2.60 Chief, Forest Service.

(a) * * *

(3) Acquire, dispose, and lease lands and interest in lands as may be authorized for the protection, management, and administration of the National Forest System, including the authority to approve acquisition of land under the Weeks Act of March 1, 1911, as amended, and special forest receipts acts (Pub. L. 337, 74th Cong., 49 Stat. 866, as amended by Pub. L. 310, 78th Cong., 58 Stat. 227; Pub. L. 505, 75th Cong., 52 Stat. 347, as amended by Pub. L. 310, 78th Cong., 58 Stat. 227; Pub. L. 634, 75th Cong., 52 Stat. 699, as amended by Pub. L. 310, 78th Cong., 58 Stat. 227; Pub. L. 748, 75th Cong., 52 Stat. 1205, as amended by Pub. L. 310, 78th Cong., 58 Stat. 227; Pub. L. 427, 76th Cong., 54 Stat. 46; Pub. L. 589, 76th Cong., 54 Stat. 297; Pub. L. 591, 76th Cong., 54 Stat. 299; Pub. L. 637, 76th Cong., 54 Stat. 402; Pub. L. 781, 84th Cong., 70 Stat. 632).

* * * * *

(64) Conduct performance-driven research and development, education, and technical assistance for the purpose of facilitating the use of innovative wood products in wood building construction in the United States (7 U.S.C. 7655c) and administer the Wood Innovation Grant program (7 U.S.C. 7655d).

(65) Furnish subsistence to employees without consideration as, or deduction from, the compensation of such employees where warranted by emergency conditions connected with the work of the Forest Service (7 U.S.C. 2228).

* * * * *

Subpart K—Delegations of Authority by the Under Secretary for Research, Education, and Economics

■ 19. Amend § 2.65 by adding paragraph (a)(10) to read as follows:

§ 2.65 Administrator, Agricultural Research Service.

(a) * * *

(10) Administer an experienced services program to obtain technical, professional, and administrative services to support the research, education, and economics mission area of the Department (16 U.S.C. 3851).

* * * * *

■ 20. Amend § 2.67 by adding paragraph (a)(3) to read as follows:

§ 2.67 Administrator, Economic Research Service.

(a) * * *

(3) Administer an experienced services program to obtain technical, professional, and administrative services to support the research, education, and economics mission area of the Department (16 U.S.C. 3851).

* * * * *

■ 21. Amend § 2.68 by adding paragraph (a)(15) to read as follows:

§ 2.68 Administrator, National Agricultural Statistics Service.

(a) * * *

(15) Administer an experienced services program to obtain technical, professional, and administrative services to support the research, education, and economics mission area of the Department (16 U.S.C. 3851).

* * * * *

Subpart P—Delegations of Authority by the Assistant Secretary for Administration

■ 22. Amend § 2.94 by revising paragraph (a) introductory text to read as follows:

§ 2.94 Chief Security Director, Office of Safety, Security, and Protection.

(a) Delegations from the Assistant Secretary for Administration. Pursuant to § 2.24(a)(11), and with due deference for delegations to other Departmental Administration officials, the following delegations of authority are made by the Assistant Secretary for Administration to the Chief Security Director:

* * * * *

■ 23. Revise § 2.95 to read as follows:

§ 2.95 Executive Director, Office of Homeland Security.

(a) Delegations from the Secretary. Pursuant to 7 U.S.C. 6922, Executive Order (E.O.) 10450, ''Security Requirements for Government Employment,'' 18 FR 2489, 3 CFR, 1953 Comp., p. 72, as amended; E.O. 12968, ''Access to Classified Information,'' 60 FR 40245, 3 CFR, 1995 Comp., p. 391; E.O. 13526, ''Classified National Security Information,'' 75 FR 707, 3 CFR, 2010 Comp., p. 298; E.O. 13587, ''Structural Reforms to Improve the Security of Classified Networks and Responsible Sharing and Safeguarding of Classified Information,'' 76 FR 63811, 3 CFR, 2012 Comp., p. 276, and 5 CFR part 732, and with due deference for delegations to other Departmental Administration officials, the following delegations of authority are made by the Secretary to the Executive Director, Office of Homeland Security, pursuant to the Executive Director's responsibilities as the Departmental National Security Programs Officer and Senior Official for Insider Threat, as designated by the Secretary:

(1) Manage the personnel security functions of the Department for making eligibility determinations for individuals who require initial or continued eligibility (SEAD 6, Continuous Evaluation, or its successor) for access to classified information or eligibility to hold a sensitive position in accordance with Security Executive Agent Directive (SEAD) 4, National Security Adjudicative Guidelines, or its successor; sponsoring access to Sensitive Compartmented Information (SCI); and suspending, denying, or revoking access to national security information (E.O. 12968 ''Access to Classified Information'', as amended), notwithstanding the Secretary's authority to remove an employee for national security reasons as outlined in 5 U.S.C. 7532.

(2) Manage the personnel security functions of the Department's suitability program for individuals holding Public Trust positions (positions designated as Moderate or High Risk) established pursuant to 5 CFR part 731 and E.O. 13488, ''Granting Reciprocity on Excepted Service and Federal Contractor Employee Fitness and Reinvestigating Individuals in Positions of Public Trust'' (74 FR 4111, 3 CFR, 2010 Comp., p. 189), as amended, to make initial or continued suitability determinations.

(3) Manage, coordinate, develop, and promulgate policies and training regarding personnel security, and serve as USDA's personnel security liaison to the Office of Personnel Management (OPM), who serves as the Suitability Executive Agent (SuitEA) and the Office of the Director of National Intelligence

(ODNI), who serves as the Security Executive Agent (SecEA).

(4) Review and develop recommendations on classifying, declassifying, and safeguarding national security information for which the Secretary is responsible as Original Classification Authority.

(5) Establish, direct, and maintain an Insider Threat program to deter, detect, and mitigate insider threats in accordance with the National Insider Threat Policy and Minimum Standards for Executive Branch Insider Threat Programs, November 21, 2012, and subsequent guidance from the National Insider Threat Task Force (NITTF).

(b) Delegations from the Assistant Secretary for Administration. Pursuant to § 2.24(a)(8), and with due deference for delegations to other Departmental Administration officials, the following delegations of authority are made by the Assistant Secretary for Administration to the Executive Director, Office of Homeland Security:

(1) Serve as the principal advisor to the Secretary on national security, including emergency management, agriculture and food defense, and foreign investments in U.S. agriculture.

(2) Coordinate activities of the Department, including policies, processes, budget needs, and oversight relating to national security, including emergency management, biodefense, agriculture and food defense, and foreign investments in U.S. agriculture.

(3) Act as the primary liaison on behalf of the Department with other Federal departments and agencies in activities relating to national security, including emergency management, integrated laboratory networks, agriculture and food defense, foreign investments in U.S. agriculture, national intelligence collection priorities, and interagency coordination and data sharing.

(4) Coordinate in the Department the gathering of information relevant to early warning and awareness of threats and risks to the food and agriculture critical infrastructure sector; and share that information with, and provide assistance with interpretation and risk characterization of that information to, the intelligence community (as defined in 5 U.S.C. 3003), law enforcement agencies, the Secretary of Defense, the Secretary of Homeland Security, the Secretary of Health and Human Services, and State fusion centers (as defined in section 210A(j) of the Homeland Security Act of 2002 (6 U.S.C. 124h(j)).

(5) Establish and maintain an effective defensive Counterintelligence Program to counter Foreign Intelligence Entity (FIE) threats to Departmental sensitive information and assets that includes identification and risk assessment to sensitive assets, development and implementation of mitigation strategies, integration of counter-FIE efforts across the Department, sharing of threat information and warnings, and promotion of counterintelligence training awareness.

(6) Liaise with the Intelligence Community to assist in the development of periodic assessments and intelligence estimates, or other intelligence products, that support the defense of the food and agriculture critical infrastructure sector and risks associated with foreign investments in U.S. agriculture.

(7) Coordinate the conduct, evaluation, and improvement of exercises to identify and eliminate gaps in preparedness and response.

(8) Produce a Department-wide centralized strategic coordination plan to provide a high-level perspective of the operations of the Department relating to homeland and national security, including emergency management and agriculture and food defense.

(9) Establish and carry out an interagency Agriculture and Food Threat Awareness Partnership Program, including by entering into cooperative agreements or contracts with Federal, State, or local authorities (7 U.S.C. 6922).

(10) Administer the Department's Emergency Preparedness Program. This includes:

(i) Coordinate the delegations and assignments made to the Department under the Defense Production Act of 1950, 50 U.S.C. App. 2061, *et seq.*; the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121, *et seq.*; and by Executive Orders 12148, ''Federal Emergency Management'' (3 CFR, 1979 Comp., p. 412), 12656, ''Assignment of Emergency Preparedness Responsibilities'' (3 CFR, 1988 Comp., p. 585), and 13603, ''National Defense Resources Preparedness'' (3 CFR, 2012 Comp., p. 225), or any successor to these Executive Orders, to ensure that the Department has sufficient capabilities to respond to any occurrence, including natural disaster, military attack, technological emergency, or any all hazards incident.

(ii) Manage the Department Emergency Operations Center at Headquarters and the Secretary's alternative facilities; provide senior staff with international, national, and regional situational awareness reports; and provide and maintain current information systems technology and National Security Systems to support USDA executive crisis management capability.

(iii) Provide facilities and equipment to facilitate inter-agency coordination during emergencies.

(iv) Activate the USDA incident management system in accordance with the National Response Framework and the National Incident Management System in the event of a major incident; and provide oversight and coordination of the Department's Emergency Support Functions as outlined in the National Response Framework.

(v) Develop and promulgate policies for the Department regarding emergency preparedness and national security, including matters relating to anti-terrorism and agriculture-related emergency preparedness planning, both national and international, and guidance to USDA State and County Emergency Boards.

(vi) [Reserved]

(vii) Provide representation and liaison for the Department in contacts with other Federal entities and organizations, including the National Security Council's functional directorates, Homeland Security Council, Office of Management and Budget, Department of Homeland Security, Federal Emergency Management Agency, Office of the Director of National Intelligence, Department of State, Federal Bureau of Investigation, and Department of Defense concerning matters of a national security, multilateral weapons conventions, natural disasters, other emergencies, and agriculture/food-related international civil emergency planning and related activities.

(viii) Act as the primary USDA representative for anti-terrorism activities and coordinates and oversees USDA's agroterrorism defense activities and programs.

(ix) [Reserved]

(x) Provide guidance and direction regarding radiological emergency preparedness programs and the implementation of the National Response Framework's Nuclear/Radiological Incident Annex to Departmental staff offices, mission areas, and agencies.

(xi) Provide program leadership and coordination for USDA's radiological emergency preparedness requirements with respect to Emergency Management and Assistance (44 CFR parts 350 through 352).

(xii) Represent USDA on the Federal Radiological Preparedness Coordinating Committee (FRPCC) and Regional Assistance Committees (RACs) and

assist them in carrying out their functions.

(xiii) Support USDA in its management of the Department's emergency response program with respect to radiological emergency response activities.

(xiv) [Reserved]

(11) Administer the Controlled Unclassified Information (CUI) program for the Department pursuant to E.O. 13556, ''Controlled Unclassified Information'' (75 FR 68675, 3 CFR, 2011 Comp., p. 267) and 32 CFR part 2002.

(12) Serve as the primary point of contact for Government Accountability Office (GAO) and Office of the Inspector General (OIG) audits of USDA homeland and national security activities.

(13) Coordinate interaction between Department agencies and private sector businesses and industries in emergency planning and public education under Department authorities delegated or assigned under the National Response Framework, National Infrastructure Protection Plan, Defense Production Act of 1950, 50 U.S.C. App. 2061, *et seq.,* and Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121, *et seq.*

(14) Oversee the Department's ability to collect and disseminate information and prepare for an agricultural disease emergency, agroterrorism act, or other threat to agricultural biosecurity, and coordinate such activities among agencies and offices within the Department (7 U.S.C. 8912).

(15) Promulgate Departmental policies, standards, techniques, and procedures and represent the Department in providing security guidance to the Food and Agricultural Sector nationwide. This includes the following duties:

(i) Provide guidance to USDA agencies and the Food and Agricultural Sector in matters of security through use of assessments and development of mitigation strategies.

(ii) Represent and act as liaison for the Department in contacts with other Federal security entities and organizations, including the Interagency Security Committee and the Department of Homeland Security.

(iii) Provide guidance and direction to ensure agriculture/food security are fully integrated in USDA's security preparations, which are reported to and coordinated with the White House.

(iv) Provide assistance to the USDA agencies in preparation for and during a disaster to identify critical assets and possible alternate storage locations.

(16) Provide oversight and coordination of the development and administration of the Department Continuity Program. This includes:

(i) Provide guidance and direction regarding continuity of operations to the Office of the Secretary, Departmental staff offices, mission areas, and agencies.

(ii) Represent and act as liaison for the Department in contacts with other Federal entities and organizations concerning matters of assigned continuity program responsibilities.

(iii) Oversee Department continuity of operations and emergency relocation facility planning, development, equipping, and preparedness to ensure that resources are in a constant state of readiness.

(17) Establish procedures to prevent unnecessary access to classified national security information (CNSI) including procedures that require that need for access to CNSI is established before initiating security clearance procedures; and ensure that the number of persons granted access CNSI is limited to the minimum consistent with operational and security requirements:

(i) Direct and administer USDA's CNSI program pursuant to E.O. 13526, ''Classified National Security Information'' (75 FR 707, 3 CFR, 2010 Comp., p. 298), or subsequent orders.

(ii) Establish and maintain Information Security policies and procedures for classifying, declassifying, safeguarding, and disposing of CNSI and materials.

(iii) Investigate or delegate authority to investigate any potential compromises of CNSI and take corrective action for violations or infractions under section 5.5(b), of E.O. 13526 or any subsequent order.

(iv) Develop and maintain oversight of all facilities throughout USDA where CNSI is or will be safeguarded, discussed, or processed including sole authority to liaison with the Central Intelligence Agency concerning guidance, approval, requirements, and oversight of USDA secure facilities.

(18) Control within USDA the acquisition, use, and disposal of material and equipment that can be a source of ionizing radiation.

(i) Promulgate policies and procedures for ensuring the safety of USDA employees, the public, and the environment resulting from USDA's use of ionizing radiation sources.

(ii) Maintain and ensure compliance with the Nuclear Regulatory Commission regulations (Title 10, Code of Federal Regulations) and license(s) issued to USDA for the acquisition, use, and disposal of radioactive materials.

§ 2.97 [Removed and Reserved]

■ 24. Remove and reserve § 2.97.

Subpart U—Delegations of Authority by the Under Secretary for Trade and Foreign Agricultural Affairs

■ 25. Revise § 2.600 to read as follows:

§ 2.600 Deputy Under Secretary for Trade and Foreign Agricultural Affairs

Pursuant to § 2.15(a), subject to reservations in § 2.15(b), and subject to policy guidance and direction by the Under Secretary, the following delegation of authority is made to the Deputy Under Secretary for Trade and Foreign Agricultural Affairs, if appointed, to be exercised only during the absence or unavailability of the Under Secretary: Perform all the duties and exercise all the powers which are now or which may hereafter be delegated to the Under Secretary for Trade and Foreign Agricultural Affairs: Provided, that this authority shall be exercised by the respective Deputy Under Secretary in the order in which he or she has taken office as a Deputy Under Secretary.

■ 26. Amend § 2.601 by revising paragraph (a) introductory text and paragraph (a)(2) to read as follows:

§ 2.601 Administrator, Foreign Agricultural Service.

(a) *Delegations.* Pursuant to § 2.15(a)(1) and (3), subject to reservations in § 2.15(b), the following delegations of authority are made by the Under Secretary for Trade and Foreign Agricultural Affairs to the Administrator, Foreign Agricultural Service:

* * * * *

(2) Conduct functions of the Department relating to WTO, the Trade Expansion Act of 1962 (19 U.S.C. 1801 *et seq.*), the Trade Act of 1974 (19 U.S.C. 2101 *et seq.*), the Trade Agreements Act of 1979 (19 U.S.C. 2501 *et seq.*), the Omnibus Trade and Competition Act of 1988 (19 U.S.C. 2901 *et seq.*), and other legislation affecting international agricultural trade including the programs designed to reduce foreign tariffs and other trade barriers.

* * * * *

§ 2.602 [Amended]

■ 27. In § 2.602 amend paragraph (a) introductory text by revising the references to ''§ 2.26(a)(5)'' to read ''§ 2.15(a)(5)'' and ''§ 2.26(b)'' to read ''2.15(b)''.

* * * * *

Subpart V—Delegations of Authority by the Director, Office of Partnerships and Public Engagement

* * * * *

§ 2.701 [Removed and Reserved]

■ 28. Remove and reserve § 2.701.

The Secretary of Agriculture, Thomas J. Vilsack, having reviewed and approved this document, is delegating the authority to electronically sign this document to Janie S. Hipp, the General Counsel, for purposes of publication in the **Federal Register**.

Janie S. Hipp,

General Counsel.

[FR Doc. 2022–15742 Filed 7–25–22; 8:45 am]

BILLING CODE 3410–90–P

NUCLEAR REGULATORY COMMISSION

10 CFR Part 72

[NRC–2022–0105]

RIN 3150–AK84

List of Approved Spent Fuel Storage Casks: Holtec International HI–STORM Flood/Wind Multipurpose Canister Storage System, Certificate of Compliance No. 1032, Amendment No. 8

AGENCY: Nuclear Regulatory Commission.

ACTION: Direct final rule.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is amending its spent fuel storage regulations by revising the Holtec International HI–STORM Flood/Wind Multipurpose Canister Storage System listing within the ''List of approved spent fuel storage casks'' to include Amendment No. 8 to Certificate of Compliance No. 1032. Amendment No. 8 revises the description in the certificate of compliance for the Holtec International HI–STORM Flood/Wind system to clearly indicate that only the portions of the components that contact the pool water need to be made of stainless steel or aluminum. Amendment No. 8 also incorporates other minor editorial corrections.

DATES: This direct final rule is effective October 11, 2022, unless significant adverse comments are received by August 25, 2022. If this direct final rule is withdrawn as a result of such comments, timely notice of the withdrawal will be published in the **Federal Register**. Comments received after this date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date. Comments received on this direct final rule will also be considered to be comments on a companion proposed rule published in the Proposed Rules section of this issue of the **Federal Register**.

ADDRESSES: Submit your comments, identified by Docket ID NRC–2022–0105, at *https://www.regulations.gov.* If your material cannot be submitted using *https://www.regulations.gov,* call or email the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: William Allen, Office of Nuclear Material Safety and Safeguards; telephone: 301–415–6877; email: *William.Allen@nrc.gov* or Andrew G. Carrera, Office of Nuclear Material Safety and Safeguards; telephone: 301–415–1078; email: *Andrew.Carrera@nrc.gov.* Both are staff of the U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2022–0105 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2022–0105. Address questions about NRC dockets to Dawn Forder, telephone: 301–415–3407, email: *Dawn.Forder@nrc.gov.* For technical questions contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *PDR.Resource@nrc.gov.* For the convenience of the reader, instructions about obtaining materials referenced in this document are provided in the ''Availability of Documents'' section.
- *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8:00 a.m. and 4:00 p.m. (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

Please include Docket ID NRC–2022–0105 in your comment submission. The NRC requests that you submit comments through the Federal rulemaking website at *https://www.regulations.gov.* If your material cannot be submitted using *https://www.regulations.gov,* call or email the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *https://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Rulemaking Procedure

This rule is limited to the changes contained in Amendment No. 8 to Certificate of Compliance No. 1032 and does not include other aspects of the Holtec International HI–STORM Flood/Wind Multipurpose Canister Storage System (Holtec International HI–STORM FW) cask design. The NRC is using the ''direct final rule procedure'' to issue this amendment because it represents a limited and routine change to an existing certificate of compliance that is expected to be non-controversial. The NRC has determined that, with the requested changes, adequate protection of public health and safety will continue to be reasonably assured. The amendment to the rule will become effective on October 11, 2022. However, if the NRC receives any significant adverse comments on this direct final rule by August 25, 2022, then the NRC will publish a document that withdraws this action and will subsequently address the comments received in a final rule as a response to the companion proposed rule published in the Proposed Rules section of this issue of the **Federal Register**. Absent significant modifications to the proposed revisions requiring republication, the NRC will not initiate a second comment period on this action.

A significant adverse comment is a comment where the commenter explains why the rule would be inappropriate, including challenges to the rule's underlying premise or approach, or would be ineffective or unacceptable without a change. A comment is adverse and significant if:

(1) The comment opposes the rule and provides a reason sufficient to require a substantive response in a notice-and-comment process. For example, a substantive response is required when:

(a) The comment causes the NRC to reevaluate (or reconsider) its position or conduct additional analysis;

(b) The comment raises an issue serious enough to warrant a substantive response to clarify or complete the record; or

(c) The comment raises a relevant issue that was not previously addressed or considered by the NRC.

(2) The comment proposes a change or an addition to the rule, and it is apparent that the rule would be ineffective or unacceptable without incorporation of the change or addition.

(3) The comment causes the NRC to make a change (other than editorial) to the rule, certificate of compliance, or technical specifications.

III. Background

Section 218(a) of the Nuclear Waste Policy Act of 1982, as amended, requires that ''[t]he Secretary [of the Department of Energy] shall establish a demonstration program, in cooperation with the private sector, for the dry storage of spent nuclear fuel at civilian nuclear power reactor sites, with the objective of establishing one or more technologies that the [Nuclear Regulatory] Commission may, by rule, approve for use at the sites of civilian nuclear power reactors without, to the maximum extent practicable, the need for additional site-specific approvals by the Commission.'' Section 133 of the Nuclear Waste Policy Act states, in part, that ''[t]he Commission shall, by rule, establish procedures for the licensing of any technology approved by the Commission under Section 219(a) [sic: 218(a)] for use at the site of any civilian nuclear power reactor.''

To implement this mandate, the Commission approved dry storage of spent nuclear fuel in NRC-approved casks under a general license by publishing a final rule that added a new subpart K in part 72 of title 10 of the *Code of Federal Regulations* (10 CFR) entitled ''General License for Storage of Spent Fuel at Power Reactor Sites'' (55 FR 29181; July 18, 1990). This rule also established a new subpart L in 10 CFR part 72 entitled ''Approval of Spent Fuel Storage Casks,'' which contains procedures and criteria for obtaining NRC approval of spent fuel storage cask designs. The NRC subsequently issued a final rule on March 28, 2011 (76 FR 17019), that approved the Holtec International HI–STORM FW System design and added it to the list of NRC-approved cask designs in § 72.214, ''List of approved spent fuel storage casks,'' as Certificate of Compliance No. 1032.

IV. Discussion of Changes

On July 30, 2021, Holtec International (the applicant) submitted an application to amend the HI–STORM FW System. The amendment includes the following changes:

- Update the HI–STORM FW System description in the certificate of compliance to clearly indicate that only the portions of the components that contact the pool water need to be made of stainless steel or aluminum; and
- Incorporate other minor editorial corrections.

As documented in the preliminary safety evaluation report, the NRC performed a safety review of the proposed certificate of compliance amendment request. The NRC determined that this amendment does not reflect a significant change in design or fabrication of the cask. Specifically, the NRC determined that the design of the cask would continue to maintain confinement, shielding, and criticality control in the event of each evaluated accident condition. In addition, any resulting occupational exposure or offsite dose rates from the implementation of Amendment No. 8 would remain well within the limits specified by 10 CFR part 20, ''Standards for Protection Against Radiation.'' Therefore, the NRC found there will be no significant change in the types or amounts of any effluent released, no significant increase in the individual or cumulative radiation exposure, and no significant increase in the potential for or consequences from radiological accidents.

The NRC determined that the amended Holtec International HI–STORM FW System cask design, when used under the conditions specified in the certificate of compliance, the technical specifications, and the NRC's regulations, will meet the requirements of 10 CFR part 72; therefore, adequate protection of public health and safety will continue to be reasonably assured. When this direct final rule becomes effective, persons who hold a general license under § 72.210 may, consistent with the license conditions under § 72.212, load spent nuclear fuel into Holtec International HI–STORM FW System casks that meet the criteria of Amendment No. 8 to Certificate of Compliance No. 1032.

V. Voluntary Consensus Standards

The National Technology Transfer and Advancement Act of 1995 (Pub. L. 104–113) requires that Federal agencies use technical standards that are developed or adopted by voluntary consensus standards bodies unless the use of such a standard is inconsistent with applicable law or otherwise impractical. In this direct final rule, the NRC revises the Holtec International HI–STORM FW System cask design listed in § 72.214. This action does not constitute the establishment of a standard that contains generally applicable requirements.

VI. Agreement State Compatibility

Under the ''Agreement State Program Policy Statement'' approved by the Commission on October 2, 2017, and published in the **Federal Register** on October 18, 2017 (82 FR 48535), this rule is classified as Compatibility Category NRC—Areas of Exclusive NRC Regulatory Authority. The NRC program elements in this category are those that relate directly to areas of regulation

reserved to the NRC by the Atomic Energy Act of 1954, as amended, or the provisions of 10 CFR chapter I. Therefore, compatibility is not required for program elements in this category. Although an Agreement State may not adopt program elements reserved to the NRC, and the Category ''NRC'' does not confer regulatory authority on the State, the State may wish to inform its licensees of certain requirements by means consistent with the particular State's administrative procedure laws.

VII. Plain Writing

The Plain Writing Act of 2010 (Pub. L. 111–274) requires Federal agencies to write documents in a clear, concise, and well-organized manner. The NRC wrote this document to be consistent with the Plain Writing Act as well as the Presidential Memorandum, ''Plain Language in Government Writing,'' published June 10, 1998 (63 FR 31885).

VIII. Environmental Assessment and Finding of No Significant Impact

Under the National Environmental Policy Act of 1969, as amended, and the NRC's regulations in 10 CFR part 51, ''Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions,'' the NRC has determined that this direct final rule, if adopted, would not be a major Federal action significantly affecting the quality of the human environment and, therefore, an environmental impact statement is not required. The NRC has made a finding of no significant impact on the basis of this environmental assessment.

A. The Action

The action is to amend § 72.214 to revise the Holtec International HI–STORM FW System listing within the ''List of approved spent fuel storage casks'' to include Amendment No. 8 to Certificate of Compliance No. 1032.

B. The Need for the Action

This direct final rule amends the certificate of compliance for the Holtec International HI–STORM FW System within the list of approved spent fuel storage casks to allow power reactor licensees to store spent fuel at reactor sites in casks with the approved modifications under a general license. Specifically, Amendment No. 8 revises the certificate of compliance as described in Section IV, ''Discussion of Changes,'' of this document, for the use of the Holtec International HI–STORM FW System.

C. Environmental Impacts of the Action

On July 18,1990 (55 FR 29181), the NRC issued an amendment to 10 CFR part 72 to provide for the storage of spent fuel under a general license in cask designs approved by the NRC. The potential environmental impact of using NRC-approved storage casks was analyzed in the environmental assessment for the 1990 final rule. The environmental assessment for this Amendment No. 8 tiers off of the environmental assessment for the July 18, 1990, final rule. Tiering off past environmental assessments is a standard process under the National Environmental Policy Act of 1969, as amended.

The Holtec International HI–STORM FW System is designed to mitigate the effects of design basis accidents that could occur during storage. Design basis accidents account for human-induced events and the most severe natural phenomena reported for the site and surrounding area. Postulated accidents analyzed for an independent spent fuel storage installation, the type of facility at which a holder of a power reactor operating license would store spent fuel in casks in accordance with 10 CFR part 72, can include tornado winds and tornado-generated missiles, a design basis earthquake, a design basis flood, an accidental cask drop, lightning effects, fire, explosions, and other incidents.

This amendment does not reflect a significant change in design or fabrication of the cask. Because there are no significant design or process changes, any resulting occupational exposure or offsite dose rates from the implementation of Amendment No. 8 would remain well within the 10 CFR part 20 limits. The NRC has also determined that the design of the cask as modified by this rule would still maintain confinement, shielding, and criticality control in the event of an accident. Therefore, the proposed changes will not result in any radiological or non-radiological environmental impacts that significantly differ from the environmental impacts evaluated in the environmental assessment supporting the July 18, 1990, final rule. There will be no significant change in the types or the amounts of any effluent released, no significant increase in the individual or cumulative radiation exposures, and no significant increase in the potential for, or consequences from, radiological accidents. The NRC documented its safety findings in the preliminary safety evaluation report.

D. Alternative to the Action

The alternative to this action is to deny approval of Amendment No. 8 and not issue the direct final rule. Consequently, any 10 CFR part 72 general licensee that seeks to load spent nuclear fuel into the Holtec International HI–STORM FW System in accordance with the changes described in proposed Amendment No. 8 would have to request an exemption from the requirements of §§ 72.212 and 72.214. Under this alternative, interested licensees would have to prepare, and the NRC would have to review, a separate exemption request, thereby increasing the administrative burden upon the NRC and the costs to each licensee. The environmental impacts would be the same as the proposed action.

E. Alternative Use of Resources

Approval of Amendment No. 8 to Certificate of Compliance No. 1032 would result in no irreversible commitment of resources.

F. Agencies and Persons Contacted

No agencies or persons outside the NRC were contacted in connection with the preparation of this environmental assessment.

G. Finding of No Significant Impact

The environmental impacts of the action have been reviewed under the requirements in the National Environmental Policy Act of 1969, as amended, and the NRC's regulations in subpart A of 10 CFR part 51, ''Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions.'' Based on the foregoing environmental assessment, the NRC concludes that this direct final rule, ''List of Approved Spent Fuel Storage Casks: Holtec International HI–STORM Flood/Wind Multipurpose Canister Storage System, Certificate of Compliance No. 1032, Amendment No. 8,'' will not have a significant effect on the human environment. Therefore, the NRC has determined that an environmental impact statement is not necessary for this direct final rule.

IX. Paperwork Reduction Act Statement

This direct final rule does not contain any new or amended collections of information subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). Existing collections of information were approved by the Office of Management and Budget, approval number 3150–0132.

Public Protection Notification

The NRC may not conduct or sponsor, and a person is not required to respond to, a request for information or an information collection requirement unless the requesting document displays a currently valid Office of Management and Budget control number.

X. Regulatory Flexibility Certification

Under the Regulatory Flexibility Act of 1980 (5 U.S.C. 605(b)), the NRC certifies that this direct final rule will not, if issued, have a significant economic impact on a substantial number of small entities. This direct final rule affects only nuclear power plant licensees and Holtec International. These entities do not fall within the scope of the definition of small entities set forth in the Regulatory Flexibility Act or the size standards established by the NRC (§ 2.810).

XI. Regulatory Analysis

On July 18, 1990 (55 FR 29181), the NRC issued an amendment to 10 CFR part 72 to provide for the storage of spent nuclear fuel under a general license in cask designs approved by the NRC. Any nuclear power reactor licensee can use NRC-approved cask designs to store spent nuclear fuel if (1) it notifies the NRC in advance; (2) the spent fuel is stored under the conditions specified in the cask's certificate of compliance; and (3) the conditions of the general license are met. A list of NRC-approved cask designs is contained in § 72.214. On March 28, 2011 (76 FR 17019), the NRC issued an amendment to 10 CFR part 72 that approved the Holtec International HI–STORM FW System design by adding it to the list of NRC-approved cask designs in § 72.214. On July 30, 2021, Holtec International submitted a request to amend the Holtec International HI–STORM FW System as described in Section IV, ''Discussion of Changes,'' of this document.

The alternative to this action is to withhold approval of Amendment No. 8 and to require any 10 CFR part 72 general licensee seeking to load spent nuclear fuel into Holtec International HI–STORM FW System under the changes described in Amendment No. 8 to request an exemption from the requirements of §§ 72.212 and 72.214. Under this alternative, each interested 10 CFR part 72 licensee would have to prepare, and the NRC would have to review, a separate exemption request, thereby increasing the administrative burden upon the NRC and the costs to each licensee.

Approval of this direct final rule is consistent with previous NRC actions. Further, as documented in the preliminary safety evaluation report and environmental assessment, this direct final rule will have no adverse effect on public health and safety or the environment. This direct final rule has no significant identifiable impact or benefit on other government agencies. Based on this regulatory analysis, the NRC concludes that the requirements of this direct final rule are commensurate with the NRC's responsibilities for public health and safety and the common defense and security. No other available alternative is believed to be as satisfactory; therefore, this action is recommended.

XII. Backfitting and Issue Finality

The NRC has determined that the backfit rule (§ 72.62) does not apply to this direct final rule. Therefore, a backfit analysis is not required. This direct final rule revises Certificate of Compliance No. 1032 for the Holtec International HI–STORM FW System, as currently listed in § 72.214. The revision consists of the changes in Amendment No. 8 previously described, as set forth in the revised certificate of compliance and technical specifications.

Amendment No. 8 to Certificate of Compliance No. 1032 for the Holtec International HI–STORM FW System was initiated by Holtec International and was not submitted in response to new NRC requirements, or an NRC request for amendment. Amendment No. 8 applies only to new casks fabricated and used under Amendment No. 8. These changes do not affect existing users of the Holtec International HI–STORM FW System, and the current Amendment No. 5 continues to be effective for existing users. Amendment Nos. 6 and 7 to Certificate of Compliance No. 1032 have not been issued. While current users of this storage system may comply with the new requirements in Amendment No. 8, this would be a voluntary decision on the part of current users.

For these reasons, Amendment No. 8 to Certificate of Compliance No. 1032 does not constitute backfitting under § 72.62 or § 50.109(a)(1), or otherwise represent an inconsistency with the issue finality provisions applicable to combined licenses in 10 CFR part 52. Accordingly, the NRC has not prepared a backfit analysis for this rulemaking.

XIII. Congressional Review Act

This direct final rule is not a rule as defined in the Congressional Review Act.

XIV. Availability of Documents

The documents identified in the following table are available to interested persons, as indicated.

Document	ADAMS accession No./ **Federal Register** citation
Direct Final Rule, 10 CFR Part 72, ''List of Approved Spent Fuel Storage Casks: Holtec International HI–STORM Flood/Wind System, Certificate of Compliance No. 1032; [NRC–2011–0007] RIN 3150–AI90, March 28, 2011.	76 FR 17019.
Application from Holtec International for Certificate of Compliance No. 1032, Amendment No. 8, to HI–STORM FW System, July 30, 2021.	ML21211A608 (package).
User Need Memorandum Package to J. Shepherd from Y. Diaz-Sanabria with Proposed Certificate of Compliance No. 1032, Amendment No. 8; Associated Proposed Technical Specifications; Appendices A and B; and the Preliminary Safety Evaluation Report, April 6, 2022.	ML22019A111 (package).

The NRC may post materials related to this document, including public comments, on the Federal rulemaking website at *https://www.regulations.gov* under Docket ID NRC–2022–0105. In addition, the Federal rulemaking website allows members of the public to receive alerts when changes or additions occur in a docket folder. To subscribe: (1) navigate to the docket folder (NRC–2022–0105); (2) click the ''Subscribe'' link; and (3) enter an email address and click on the ''Subscribe'' link.

List of Subjects in 10 CFR Part 72

Administrative practice and procedure, Hazardous waste, Indians, Intergovernmental relations, Nuclear energy, Penalties, Radiation protection, Reporting and recordkeeping requirements, Security measures, Spent fuel, Whistleblowing.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended; the Energy Reorganization Act of 1974, as amended; the Nuclear Waste Policy

Act of 1982, as amended; and 5 U.S.C. 552 and 553; the NRC is adopting the following amendments to 10 CFR part 72:

PART 72—LICENSING REQUIREMENTS FOR THE INDEPENDENT STORAGE OF SPENT NUCLEAR FUEL, HIGH-LEVEL RADIOACTIVE WASTE, AND REACTOR-RELATED GREATER THAN CLASS C WASTE

■ 1. The authority citation for part 72 continues to read as follows:

Authority: Atomic Energy Act of 1954, secs. 51, 53, 57, 62, 63, 65, 69, 81, 161, 182, 183, 184, 186, 187, 189, 223, 234, 274 (42 U.S.C. 2071, 2073, 2077, 2092, 2093, 2095, 2099, 2111, 2201, 2210e, 2232, 2233, 2234, 2236, 2237, 2238, 2273, 2282, 2021); Energy Reorganization Act of 1974, secs. 201, 202, 206, 211 (42 U.S.C. 5841, 5842, 5846, 5851); National Environmental Policy Act of 1969 (42 U.S.C. 4332); Nuclear Waste Policy Act of 1982, secs. 117(a), 132, 133, 134, 135, 137, 141, 145(g), 148, 218(a) (42 U.S.C. 10137(a), 10152, 10153, 10154, 10155, 10157, 10161, 10165(g), 10168, 10198(a)); 44 U.S.C. 3504 note.

■ 2. In § 72.214, revise Certificate of Compliance No. 1032 to read as follows:

§ 72.214 List of approved spent fuel storage casks.

* * * * *

Certificate Number: 1032.

Initial Certificate Effective Date: June 13, 2011, superseded by Amendment Number 0, Revision 1, on April 25, 2016.

Amendment Number 0, Revision 1, Effective Date: April 25, 2016.

Amendment Number 1 Effective Date: December 17, 2014, superseded by Amendment Number 1, Revision 1, on June 2, 2015.

Amendment Number 1, Revision 1, Effective Date: June 2, 2015.

Amendment Number 2 Effective Date: November 7, 2016.

Amendment Number 3 Effective Date: September 11, 2017.

Amendment Number 4 Effective Date: July 14, 2020.

Amendment Number 5 Effective Date: July 27, 2020.

Amendment Number 6 [Reserved]

Amendment Number 7 [Reserved]

Amendment Number 8 Effective Date: October 11, 2022.

SAR Submitted by: Holtec International.

SAR Title: Final Safety Analysis Report for the HI–STORM FW System.

Docket Number: 72–1032.

Certificate Expiration Date: June 12, 2031.

Model Number: HI–STORM FW MPC–37, MPC–89.

BILLING CODE 7590–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

EPA–R07–OAR–2022–0382; FRL–9767–02–R7]

Air Plan Approval; Missouri; Removal of Control of Emissions From Bakery Ovens

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking final action to approve a revision to the State Implementation Plan (SIP) for the State of Missouri. This final action will amend the SIP to remove a rule related to control of emissions from bakery ovens in St. Louis City and Jefferson, St. Charles, Franklin, and St. Louis Counties. The EPA's approval of this rule revision is in accordance with the requirements of the Clean Air Act (CAA).

DATES: This final rule is effective on August 25, 2022.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R07–OAR–2022–0382. All documents in the docket are listed on the *https://www.regulations.gov* website. Although listed in the index, some information is not publicly available, *i.e.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through *https://www.regulations.gov* or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional information.

FOR FURTHER INFORMATION CONTACT: William Stone, Environmental Protection Agency, Region 7 Office, Air Quality Planning Branch, 11201 Renner Boulevard, Lenexa, Kansas 66219; telephone number: (913) 551–7714; email address: *stone.william@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document ''we,'' ''us,'' and ''our'' refer to EPA.

Table of Contents

I. What is being addressed in this document?

The EPA is approving the removal of 10 Code of State Regulation (CSR) 10–5.440, *Control of Emissions From Bakery Ovens,* from the Missouri SIP. As explained in detail in the EPA's proposed rule, Missouri has demonstrated that removal of 10 CSR 10–5.440 will not interfere with attainment of the NAAQS, reasonable further progress, or any other applicable requirement of the CAA because the rule applied to a single source that has permanently ceased operations and it therefore no longer serves to reduce emissions in the St. Louis Area (87 FR 27048, May 6, 2022). The public comment period on the EPA's proposed rule opened May 6, 2022, the date of its publication in the **Federal Register** and closed on June 6, 2022. During this period, the EPA received no comments. Therefore, the EPA is finalizing its proposal to remove 10 CSR 10–5.440 from the Missouri SIP.

II. Have the requirements for approval of a SIP revision been met?

The State's submission has met the public notice requirements for SIP submissions in accordance with 40 CFR 51.102. The submission also satisfied the completeness criteria of 40 CFR part 51, appendix V. The State provided public notice on this SIP revision from May 15, 2018 to August 2, 2018 and received 11 comments from the EPA. Missouri's July 11, 2019 letter addressed the EPA's comments. The SIP revision meets the substantive SIP requirements of the Clean Air Act (CAA), including section 110 and implementing regulations.

III. What action is the EPA taking?

The EPA is taking final action to approve Missouri's request to remove 10 CSR 10–5.440 from the SIP.

IV. Incorporation by Reference

In this document, the EPA is deleting rules which were previously incorporated by reference from the applicable Missouri SIP. In accordance with requirements of 1 CFR 51.5, the EPA is deleting certain Missouri rules as described in Section I. of this preamble. The EPA has made, and will continue to make, these materials generally available through *www.regulations.gov*

and at the EPA Region 7 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of the National Technology Transfer and Advancement Act (NTTA) because this rulemaking does not involve technical standards; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).
- In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).
- This action is subject to the Congressional Review Act, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).
- Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by September 26, 2022. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Ozone, Volatile organic compounds.

Dated: July 18, 2022.

Meghan A. McCollister,

Regional Administrator, Region 7.

For the reasons stated in the preamble, the EPA amends 40 CFR part 52 as set forth below:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart AA—Missouri

§ 52.1320 [Amended]

■ 2. In § 52.1320, the table in paragraph (c) is amended by removing the entry ''10–5.440'' under the heading ''Chapter 5—Air Quality Standards and Air Pollution Control Regulations for the St. Louis Metropolitan''.

RIN 2070–AL01

Notification of Submission to the Secretary of Agriculture; Pesticides; Certification of Pesticide Applicators; Further Extension to Expiration Date of Certification Plans; Draft Final Rule

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notification of submission to the Secretary of Agriculture.

SUMMARY: This document notifies the public as required by the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) that EPA has forwarded to the United States Department of Agriculture (USDA) a draft final regulatory document concerning ''Pesticides; Certification of Pesticide Applicators; Further Extension to Expiration Date of Certification Plans'' (RIN 2070–AL01). The draft regulatory document is not available to the public until after it has been signed and made available by EPA.

DATES: See Unit I. under **SUPPLEMENTARY INFORMATION**.

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2021–0831, is available at *https://www.regulations.gov* or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW, Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room and the OPP Docket is (202) 566–1744. Please review the visitor instructions and additional information about the docket available at *https://www.epa.gov/dockets.* The docket contains historical information and this **Federal Register** document; it does not contain the draft final rule.

FOR FURTHER INFORMATION CONTACT: Carolyn Schroeder, Pesticide Re-Evaluation Division (Mailcode 7508M), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 566–2376; email address: *schroeder.carolyn@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. What action is EPA taking?

FIFRA section 25(a)(2)(B) requires the EPA Administrator to provide the Secretary of USDA with a copy of any draft final rule at least 30 days before signing it in final form for publication in the **Federal Register**. The draft final rule is not available to the public until after it has been signed by EPA. If the Secretary of USDA comments in writing regarding the draft final rule within 15 days after receiving it, the EPA Administrator shall include the comments of the Secretary of USDA, if requested by the Secretary of USDA, and the EPA Administrator's response to those comments with the final rule that publishes in the **Federal Register**. If the Secretary of USDA does not comment in writing within 15 days after receiving the draft final rule, the EPA Administrator may sign the final rule for publication in the **Federal Register** any time after the 15-day period.

II. Do any statutory and executive order reviews apply to this notification?

No. This document is merely a notification of submission to USDA. As such, none of the regulatory assessment requirements apply to this document.

List of Subjects in Part 171

Environmental protection, Agricultural worker safety, Applicator competency, Certified applicator, Pesticide safety training, Pesticide worker safety, Pesticides and pests, Restricted use pesticides.

Dated: July 20, 2022.

Michal Freedhoff,

Assistant Administrator, Office of Chemical Safety and Pollution Prevention.

[FMR Case 2021–02; Docket No. GSA–FMR–2021–0022; Sequence 01]

RIN 3090–AK52

Federal Management Regulation (FMR); Internet GOV Domain

AGENCY: Office of Information Integrity and Access, Office of Government-wide Policy (OGP), General Services Administration (GSA).

ACTION: Final rule.

SUMMARY: This final rule adopts without changes the interim rule published January 10, 2022, which implemented provisions of the DOTGOV Online Trust in Government Act of 2020 (''DOTGOV'') applicable to GSA that transfer ownership, management and operation of the DotGov Domain Program from the General Services Administration (GSA) to the Department of Homeland Security (DHS) Cybersecurity and Infrastructure Security Agency (CISA). In the interim rule, GSA removed provisions to the existing jurisdiction of the DotGov domain program that had been delegated to the General Services Administration in 1997.

DATES:

Effective: July 26, 2022.

Applicability Date: As of July 26, 2022, this final rule applies to all newly issued, already in operation, and/or renewed domains.

FOR FURTHER INFORMATION CONTACT: For clarification of content, contact Ms. Marina Fox, Office of Government-wide Policy, Office of Information, Integrity, and Access, at 202–253–6448, or by email at *marina.fox@gsa.gov*. For information pertaining to the status or publication schedules, contact the Regulatory Secretariat Division at 202–501–4755 or *GSARegSec@gsa.gov*. Please cite FMR Case 2021–02.

SUPPLEMENTARY INFORMATION:

I. Background

For more than 20 years, GSA supported government organizations and worked to make the DotGov domain a trusted space. The DotGov domain exists so that the online services of bona fide U.S.-based government organizations are easy to identify on the internet. Increasing the use of the DotGov domain helps the public know where to find official government information. DotGov is critical infrastructure: it is central to the availability and integrity of thousands of online services relied upon by millions of users. Since the DotGov domain underpins communication with and within these institutions, cybersecurity significance of all aspects of DotGov's administration has been increasing rapidly. To provide additional cybersecurity support and expand DotGov domain usage among public entities, the DOTGOV was introduced in the U.S. Senate on October 30, 2019, directing GSA to transfer the DotGov program to CISA.

On December 27, 2020, the DOTGOV was signed into law and enacted as part of the Consolidated Appropriations Act, 2021 (Pub. L. 116–260). The Act transfers the DotGov internet domain program, as operated by the General Services Administration under title 41, Code of Federal Regulations, to DHS CISA. The Act also orders that on the date CISA begins operational administration of the DotGov internet domain program, the GSA Administrator shall rescind the requirements in part 102–173 of title 41, Code of Federal Regulations applicable to any Federal, State, local, or territorial government entity, or other publicly controlled entity, including any Tribal government recognized by the Federal Government or a State government that is registering or operating a DotGov internet domain. Finally, the DOTGOV orders that in place of the requirements in part 102–173 of title 41, Code of Federal Regulations, CISA, in consultation with the Director of Management and Budget (OMB), shall establish and publish a new set of requirements for the registration and operation of DotGov domains.

On April 26, 2021, GSA transferred ownership, management and operation of DotGov Domain Program to the Department of Homeland Security (DHS), CISA, and CISA published new DotGov domain issuance guidance for government entities in place of the existing INTERNET GOV DOMAIN requirements in part 102–173 of title 41, Code of Federal Regulations.

Beginning on January 10, 2022, GSA sought public comments on these actions for a period of 60 days through publication of an interim rule in the **Federal Register** (FMR Case 2021–02) at 87 FR 1080. GSA received one general comment, which was in support of the FMR Case 2021–02.

This final rule removes provisions to the existing jurisdiction of the DotGov domain that had been delegated to GSA in 1997 and implements provisions of the DOTGOV applicable to GSA that transfer ownership, management and operation of the DotGov domain program from the GSA to DHS CISA.

DotGov Program History

The DotGov program was created in 1997, and GSA OGP became the designated authority for the top level Domain ''DOT GOV'' registry and registrar and the subdomain registrar for FED.US by a delegation of the National Science Foundation through consensus of the Federal Networking Council and Department of Commerce on October 1, 1997. To provide additional support, GSA entered into an agreement with the Department of the Interior's Bureau of Indian Affairs to facilitate the registration of Native Sovereign Nations (NSNs) in the DotGov domain. In 2003, GSA began using the Intergovernmental Cooperation Act (IGCA) as the authority to provide services to U.S. state and

local governments, and began issuing DotGov domains to state and local government entities.

Under GSA's DotGov program management and operations, domain registrations were approved based on established criteria, detailed in Federal Networking Council request for comments (RFC) 2146, May 1997 and in the Code of Federal Regulations—41 CFR part 102–173. GSA's management of the DotGov program also included DotGov DNS Security (DNSSEC), which gives DNS queries origin authenticity and data integrity. This was accomplished by the inclusion of public keys and the use of digital signatures to DNS information. DNSSEC was deployed on the top level Gov domain root zone in January 2008 in accordance with OMB Memorandum M–08–23.

II. Discussion of the Final Rule

A. Summary of Significant Changes

No significant changes.

B. Analysis of Public Comments

The interim rule was published in the **Federal Register** on January 10, 2022 at 87 FR 1080. One comment was received and was in support of the interim rule.

C. Expected Cost Impact to the Public

There is no expected cost to the public from this rule.

III. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is not a significant regulatory action and, therefore, was not subject to review under section 6(b) of E.O. 12866, Regulatory Planning and Review, dated September 30, 1993.

III. Congressional Review Act

This rule is not a major rule under 5 U.S.C. 804(2). Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (codified at 5 U.S.C. 801–808), also known as the Congressional Review Act or CRA, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. GSA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States.

IV. Regulatory Flexibility Act

This final rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.,* because it applies to agency management or personnel. Therefore, an Initial Regulatory Flexibility Analysis has not been performed.

V. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FMR do not impose recordkeeping or information collection requirements, or the collection of information from offerors, contractors, or members of the public that require the approval of the Office of Management and Budget (OMB) under 44 U.S.C. 3501, *et seq.*

List of Subjects in 41 CFR Part 102–173

Government property management internet Gov Domain.

Robin Carnahan,

Administrator.

PART 102–173—[REMOVED]

■ For the reasons set forth in the preamble, and under the authority of the DOTGOV Online Trust in Government Act of 2020 (Title IX, Division U, H.R. 133, Consolidated Appropriations Act, 2021), GSA adopts the interim rule removing 41 CFR part 102–173, which published at 87 FR 1080 on January 10, 2022, as final without changes.

[FR Doc. 2022–15670 Filed 7–25–22; 8:45 am]

BILLING CODE 6820–14–P

Proposed Rules

Federal Register
Vol. 87, No. 142
Tuesday, July 26, 2022

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

[Docket No. PRM–50–122; NRC–2020–0150]

Accident Source Term Methodologies and Corresponding Release Fractions

AGENCY: Nuclear Regulatory Commission.

ACTION: Petition for rulemaking; denial.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is denying a petition for rulemaking dated May 31, 2020, submitted by Brian Magnuson. The petitioner requested that the NRC revise its regulations to codify the source term methodologies and corresponding release fractions recommended in a report issued by Sandia National Laboratories; to codify a modified version of draft regulatory guide DG–1199, including the source term methodologies recommended in the report and the corresponding release fractions; and to account for high burnup fuel pellet fragmentation, relocation, and dispersal outside of the fuel rod during postulated design basis accidents. The NRC docketed the petition on June 18, 2020, and assigned it Docket No. PRM–50–122. The NRC is denying the petition because the proposed changes would unnecessarily reduce the intended flexibility in the NRC's regulatory approach, and they are not necessary to provide reasonable assurance of adequate protection of public health and safety.

DATES: The docket for PRM–50–122 is closed on July 26, 2022.

ADDRESSES: Please refer to Docket ID NRC–2020–0150 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2020–0150. Address questions about NRC Docket IDs to Dawn Forder; telephone: 301–415–3407; email: *Dawn.Forder@nrc.gov.* For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by sending an email to *PDR.Resource@nrc.gov.* For the convenience of the reader, instructions about obtaining materials referenced in this document are provided in the Availability of Documents section.
- *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–4154737, between 8 a.m. and 4 p.m. (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Adakou Foli, Office of Nuclear Reactor Regulation; telephone: 301–415–1984; email: *Adakou.Foli@nrc.gov,* or Solomon Sahle, Office of Nuclear Material Safety and Safeguards; telephone: 301–415–3781; email: *Solomon.Sahle@nrc.gov.* Both are staff of the U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

SUPPLEMENTARY INFORMATION:

Table of Contents:

I. The Petition

Section 2.802 of title 10 of the *Code of Federal Regulations* (10 CFR), ''Petition for rulemaking—requirements for filing,'' provides an opportunity for any interested person to petition the Commission to issue, amend, or rescind any regulation. On May 31, 2020, the NRC received a petition for rulemaking (PRM) from Brian Magnuson. The petitioner requested that the NRC amend its regulations in § 50.67, ''Accident source term,'' to codify the following:

- the source term methodologies recommended in the Sandia National Laboratories report SAND2008–6601, ''Analysis of Main Steam Isolation Valve Leakage in Design Basis Accidents Using MELCOR 1.8.6 and RADTRAD,'' issued October 2008; and
- a modified version of draft regulatory guide (DG) DG–1199, ''Alternative Radiological Source Terms for Evaluating Design Basis Accidents at Nuclear Power Reactors,'' issued October 2009, that would include the source term methodologies recommended in SAND2008–6601 and the corresponding release fractions.

The petition also requested that the NRC revise § 50.67 to account for high burnup fuel pellet fragmentation, relocation, and dispersal outside of the fuel rod during postulated design-basis accidents.

The DG–1199 was a proposed revision to Regulatory Guide (RG) 1.183, ''Alternative Radiological Source Terms for Evaluating Design Basis Accidents at Nuclear Power Reactors,'' Revision 0, issued July 2000, and was not finalized as an update to RG 1.183. After the issuance of DG–1199 for public comment, the staff received a number of public comments and spent significant efforts in addressing the comments, including resolving different NRC staff views on the approach in addressing certain comments. The efforts included soliciting an independent review of certain aspects of the DG–1199 performed by Sandia National Laboratories. In 2017, the NRC received the final responses from Sandia National Laboratories associated with their independent review.

In late 2020, the NRC resumed RG 1.183 revision efforts after considering a significant amount of insight gained since the initial issuance of the DG–1199, including the 2017 Sandia National Laboratories responses and research pertaining to state-of-the-art source term knowledge, such as the fuel fragmentation, relocation, and dispersal. The planned revision will include this information and also will update RG 1.183 to support accident tolerant fuel

and higher enrichment and burnup levels.

The petition identified concerns with the NRC guidance used to calculate radiological doses to comply with the regulations in § 50.67, stating that (1) the current NRC guidance in RG 1.183 is ''conceptually inaccurate'' and ''nonconservative'' based on SAND2008–6601, and (2) nuclear power plants use varying regulatory guidance (*e.g.,* Technical Information Document (TID)-14844, ''Calculation of Distance Factors for Power and Test Reactor Sites,'' issued March 1962; NUREG–1465, ''Accident Source Terms for Light-Water Nuclear Power Plants,'' issued February 1995; and RG 1.183) that relies on different source term methodologies and corresponding release fractions to satisfy the same regulations. The petition argued that due to these concerns, many nuclear power plants are ''likely not in compliance with some, or all of their applicable regulations and requirements, which ultimately protect people and the environment.'' The petitioner stated that the proposed revision to § 50.67 would eliminate inconsistences resulting from the use of different source term methodologies and release fractions and would provide the requisite means to ensure compliance with the underlying regulations.

II. Public Comments on the Petition

On August 24, 2020 (85 FR 52058), the NRC published a notice of docketing of PRM–50–122 and a request for public comment on the PRM in the **Federal Register**. The public comment period closed on November 9, 2020. The NRC received two comment submissions: (1) one commenter (the petitioner) provided supplemental information in support of the petition, and (2) one commenter (an NRC staff member acting in his personal capacity) opposed the petition. This latter comment was withdrawn from the petition docket because it included non-public information. The NRC reviewed the comments in making its decision on the petition.

A summary of the comment from the petitioner and the NRC's response follows. The comment is available as indicated in the Availability of Documents section of this document.

Comment: The petitioner provided additional concerns related to RG 1.183, Revision 0, such as the treatment of uncertainties in the source terms and the behavior of main steam isolation valve leakage. He stated that such issues provide additional justification for codifying a modified version of DG–1199 in § 50.67.

NRC Response: As discussed in more detail in the Reasons for Denial section of this document, the NRC disagrees with the comment, and finds that RG 1.183, Revision 0 continues to provide an acceptable method to address design-basis accident radiological consequences to comply with the applicable regulations. With regard to the continued acceptability of RG 1.183, Revision 0, additional information also appears in the Differing Professional Opinion case file DPO–2020–002, available as indicated in the Availability of Documents section of this document.

III. Reasons for Denial

The NRC is denying the petition because the requested changes would unnecessarily reduce the intended flexibility inherent in § 50.67 and the NRC's overall regulatory approach in the area of design-basis accident radiological consequence analyses. The NRC's current regulations and oversight activities continue to provide reasonable assurance of adequate protection of public health and safety.

Codifying a specific source term methodology and corresponding release fractions in § 50.67 would unnecessarily limit options for meeting the requirements, whereas § 50.67 currently allows the use of alternative sufficient methods of compliance. A detailed approach for determining source term is provided in RG 1.183, Revision 0, which describes one way to meet the requirements in § 50.67.

In § 50.67, the NRC provides requirements on the acceptable dose criteria from the design-basis analyses based upon a major accident assumed to result in substantial meltdown of the core with subsequent release of appreciable quantities of fission products (see § 50.67; see also TID–14844 and NUREG–1465). The regulatory approach of using design-basis accidents and applying performance-based regulatory requirements is consistent with the approach provided in other NRC regulations, including § 50.46, ''Acceptance criteria for emergency core cooling systems for lightwater nuclear power reactors,'' and § 50.65, ''Requirements for monitoring the effectiveness of maintenance at nuclear power plants.'' Furthermore, when § 50.67 was promulgated, the NRC did not include a defined methodology for demonstrating compliance, consistent with other regulations related to radiological reactor siting criteria, such as § 100.11, ''Determination of exclusion area, low population zone, and population center distance,'' and § 50.34, ''Contents of applications; technical information.'' Instead, § 50.67 allows changes to the defined source term or the development of other technically sound source term values without requiring additional rulemaking, and the NRC still finds this approach to be appropriate. Therefore, instead of codifying a particular source term methodology, the NRC used NUREG–1465 and other technical information to develop RG 1.183 to provide one acceptable methodology for complying with § 50.67, but not the only one. This has provided the NRC and the nuclear industry with both regulatory clarity and the flexibility to consider and incorporate new research and technical advancements while continuing to ensure safety. The approach in § 50.67 is to provide flexibility in applying basic principles to new situations and the use of evolving methods of analyses in the licensing process, and not to include prescriptive methodology in the regulation. This approach reflects the philosophy that the regulation only contains the high-level requirements and that the technical details are contained in guidance and updated, as appropriate, to reflect current knowledge. The NRC finds that § 50.67 continues to provide reasonable assurance of adequate protection and safety given new technologies and continued lessons learned. For example, the current § 50.67 requires that the application contain an evaluation of the consequences of applicable design basis accidents. In addition, § 50.90 requires that applications for license amendments fully describe the desired changes. Therefore, applicants and licensees are required to address significant changes to the fuel design such as increases to fuel burnup limits and potential fuel fragmentation, relocation, and dispersal issues, and the NRC will only approve an amendment if the applicant's analysis demonstrates with reasonable assurance that dose values are met, consistent with the agency's process.

IV. Availability of Documents

The documents identified in the following table are available to interested persons through one or more of the following methods, as indicated.

Document	Date	ADAMS Accession No. or **Federal Register** citation or web site
PRM–50–122, ''Petition to Amend 10 CFR 50.67, *Accident Source Term,* to Include Methodologies and Release Fractions''.	May 31, 2020	ML20170B161

V. Conclusion

For the reasons cited in this document, the NRC is denying PRM–50–122. The current requirements in § 50.67 continue to provide reasonable assurance of adequate protection of public health and safety and should not be revised as proposed in the PRM.

Dated: July 19, 2022.

For the Nuclear Regulatory Commission.

Brooke P. Clark,

Secretary of the Commission.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 72

[NRC–2022–0105]

RIN 3150–AK84

List of Approved Spent Fuel Storage Casks: Holtec International HI–STORM Flood/Wind Multipurpose Canister Storage System, Certificate of Compliance No. 1032, Amendment No. 8

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is proposing to amend its spent fuel storage regulations by revising the Holtec International HI–STORM Flood/Wind Multipurpose Canister Storage System listing within the ''List of approved spent fuel storage casks'' to include Amendment No. 8 to Certificate of Compliance No. 1032. Amendment No. 8 revises the description in the certificate of compliance for the Holtec International HI–STORM Flood/Wind system to clearly indicate that only the portions of the components that contact the pool water need to be made of stainless steel or aluminum. Amendment No. 8 also incorporates other minor editorial corrections.

DATES: Submit comments by August 25, 2022. Comments received after this date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date.

ADDRESSES: Submit your comments, identified by Docket ID NRC–2022–0105, at *https://www.regulations.gov*. If your material cannot be submitted using *https://www.regulations.gov,* call or email the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: William Allen, Office of Nuclear Material Safety and Safeguards; telephone: 301–415–6877; email: *William.Allen@nrc.gov* or Andrew G. Carrera, Office of Nuclear Material Safety and Safeguards; telephone: 301–415–1078; email: *Andrew.Carrera@nrc.gov*. Both are staff of the U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2022–0105 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2022–0105. Address questions about NRC dockets to Dawn Forder, telephone: 301–415–3407, email: *Dawn.Forder@nrc.gov*. For technical questions contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html*. To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *PDR.Resource@nrc.gov*. For the convenience of the reader, instructions about obtaining materials referenced in this document are provided in the ''Availability of Documents'' section.
- *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8:00 a.m. and 4:00 p.m. (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

Please include Docket ID NRC–2022–0105 in your comment submission. The NRC requests that you submit comments through the Federal rulemaking website at *https://www.regulations.gov*. If your material cannot be submitted using *https://www.regulations.gov,* call or email the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *https://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Rulemaking Procedure

Because the NRC considers this action to be non-controversial, the NRC is publishing this proposed rule concurrently with a direct final rule in the Rules and Regulations section of this issue of the **Federal Register**. The direct final rule will become effective on October 11, 2022. However, if the NRC receives any significant adverse comments by August 25, 2022, then the NRC will publish a document that withdraws the direct final rule. If the direct final rule is withdrawn, the NRC will address the comments in a subsequent final rule. Absent significant modifications to the proposed revisions requiring republication, the NRC will not initiate a second comment period on this action in the event the direct final rule is withdrawn.

A significant adverse comment is a comment where the commenter explains why the rule would be inappropriate, including challenges to the rule's underlying premise or approach, or would be ineffective or unacceptable without a change. A comment is adverse and significant if:

(1) The comment opposes the rule and provides a reason sufficient to require a substantive response in a notice-and-comment process. For example, a substantive response is required when:

(a) The comment causes the NRC to reevaluate (or reconsider) its position or conduct additional analysis;

(b) The comment raises an issue serious enough to warrant a substantive response to clarify or complete the record; or

(c) The comment raises a relevant issue that was not previously addressed or considered by the NRC.

(2) The comment proposes a change or an addition to the rule, and it is apparent that the rule would be ineffective or unacceptable without incorporation of the change or addition.

(3) The comment causes the NRC to make a change (other than editorial) to the rule.

For a more detailed discussion of the proposed rule changes and associated analyses, see the direct final rule published in the Rules and Regulations section of this issue of the **Federal Register**.

III. Background

Section 218(a) of the Nuclear Waste Policy Act of 1982, as amended, requires that ''[t]he Secretary [of the Department of Energy] shall establish a demonstration program, in cooperation with the private sector, for the dry storage of spent nuclear fuel at civilian nuclear power reactor sites, with the objective of establishing one or more technologies that the [Nuclear Regulatory] Commission may, by rule, approve for use at the sites of civilian nuclear power reactors without, to the maximum extent practicable, the need for additional site-specific approvals by the Commission.'' Section 133 of the Nuclear Waste Policy Act states, in part, that ''[t]he Commission shall, by rule, establish procedures for the licensing of any technology approved by the Commission under Section 219(a) [sic: 218(a)] for use at the site of any civilian nuclear power reactor.''

To implement this mandate, the Commission approved dry storage of spent nuclear fuel in NRC-approved casks under a general license by publishing a final rule that added a new subpart K in part 72 of title 10 of the *Code of Federal Regulations* (10 CFR) entitled ''General License for Storage of Spent Fuel at Power Reactor Sites'' (55 FR 29181; July 18, 1990). This rule also established a new subpart L in 10 CFR part 72 entitled ''Approval of Spent Fuel Storage Casks,'' which contains procedures and criteria for obtaining NRC approval of spent fuel storage cask designs. The NRC subsequently issued a final rule on March 28, 2011 (76 FR 17019), that approved the Holtec International HI–STORM Flood/Wind Multipurpose Canister Storage System design and added it to the list of NRC-approved cask designs in § 72.214, ''List of approved spent fuel storage casks,'' as Certificate of Compliance No. 1032.

IV. Plain Writing

The Plain Writing Act of 2010 (Pub. L. 111–274) requires Federal agencies to write documents in a clear, concise, well-organized manner. The NRC has written this document to be consistent with the Plain Writing Act as well as the Presidential Memorandum, ''Plain Language in Government Writing,'' published June 10, 1998 (63 FR 31885). The NRC requests comment on the proposed rule with respect to clarity and effectiveness of the language used.

V. Availability of Documents

The documents identified in the following table are available to interested persons as indicated.

Document	ADAMS Accession No./ **Federal Register** citation
Direct Final Rule, 10 CFR Part 72, ''List of Approved Spent Fuel Storage Casks: Holtec International HI–STORM Flood/Wind System, Certificate of Compliance No. 1032; [NRC–2011–0007] RIN 3150–AI90, March 28, 2011.	76 FR 17019.
Application from Holtec International for Certificate of Compliance No. 1032, Amendment No. 8, to HI–STORM FW System, July 30, 2021.	ML21211A608 (package).
User Need Memorandum Package to J. Shepherd from Y. Diaz-Sanabria with Proposed Certificate of Compliance No. 1032, Amendment No. 8; Associated Proposed Technical Specifications; Appendices A and B; and the Preliminary Safety Evaluation Report, April 6, 2022.	ML22019A111 (package).

The NRC may post materials related to this document, including public comments, on the Federal rulemaking website at *https://www.regulations.gov* under Docket ID NRC–2022–0105. In addition, the Federal rulemaking

website allows members of the public to receive alerts when changes or additions occur in a docket folder. To subscribe: (1) navigate to the docket folder (NRC–2022–0105); (2) click the ''Subscribe'' link; and (3) enter an email address and click on the ''Subscribe'' link.

Dated: July 13, 2022.

For the Nuclear Regulatory Commission.

Daniel H. Dorman,

Executive Director for Operations.

BILLING CODE 7590–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2022–0810; Project Identifier AD–2021–01238–T]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for all The Boeing Company Model 777 airplanes. This proposed AD was prompted by fuel system reviews conducted by the manufacturer. This proposed AD would require, depending on the airplane configuration, installation of Teflon sleeves, cap sealing of fasteners, detailed inspections, and corrective actions. This proposed AD would also require revising the existing maintenance or inspection program, as applicable, to incorporate more restrictive airworthiness limitations (AWLs). The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by September 9, 2022.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; internet *www.myboeingfleet.com.* You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. Boeing Alert Service Bulletin 777–57A0050, Revision 6, dated August 18, 2021, is also available at *www.regulations.gov* by searching for and locating Docket No. FAA–2022–0810.

Examining the AD Docket

You may examine the AD docket at *www.regulations.gov* by searching for and locating Docket No. FAA–2022–0810; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, any comments received, and other information. The street address for Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: Kevin Nguyen, Aerospace Engineer, Propulsion Section, FAA, Seattle ACO Branch, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206–231–3555; email: *kevin.nguyen@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2022–0810; Project Identifier AD–2021–01238–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *www.regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Kevin Nguyen, Aerospace Engineer, Propulsion Section, FAA, Seattle ACO Branch, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206–231–3555; email: *kevin.nguyen@faa.gov.* Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA has examined the underlying safety issues involved in fuel tank explosions on several large transport airplanes, including the adequacy of existing regulations, the service history of airplanes subject to those regulations, and existing maintenance practices for fuel tank systems. As a result of those findings, the FAA issued a regulation titled ''Transport Airplane Fuel Tank System Design Review, Flammability Reduction and Maintenance and Inspection Requirements'' (66 FR 23086, May 7, 2001). In addition to new airworthiness standards for transport airplanes and new maintenance requirements, this rule included Special Federal Aviation Regulation No. 88 (SFAR 88), Amendment 21–78. Subsequently, SFAR 88 was amended by Amendment 21–82 (67 FR 57490, September 10, 2002; corrected at 67 FR 70809, November 26, 2002) and Amendment 21–83 (67 FR 72830, December 9, 2002; corrected at 68 FR 37735, June 25, 2003, to change ''21–82'' to ''21–83'').

Among other actions, SFAR 88 requires certain type design (*i.e.,* type certificate (TC) and supplemental type certificate (STC)) holders to substantiate that their fuel tank systems can prevent ignition sources in the fuel tanks. This requirement applies to type design holders for large turbine-powered

transport airplanes and for subsequent modifications to those airplanes. It requires them to perform design reviews and to develop design changes and maintenance procedures if their designs do not meet the new fuel tank safety standards. As explained in the preamble to the rule, the FAA intended to adopt airworthiness directives to mandate any changes found necessary to address unsafe conditions identified as a result of these reviews.

In evaluating these design reviews, the FAA has established four criteria intended to define the unsafe conditions associated with fuel tank systems that require corrective actions. The percentage of operating time during which fuel tanks are exposed to flammable conditions is one of these criteria. The other three criteria address the failure types under evaluation: Single failures, combination of failures, and unacceptable (failure) experience. For all three failure criteria, the evaluations included consideration of previous actions taken that may mitigate the need for further action.

The FAA has determined that the actions identified in this proposed AD are necessary to reduce the potential of ignition sources inside fuel tanks, which, in combination with flammable fuel vapors, could result in fuel tank explosions and consequent loss of the airplane.

The FAA issued AD 2017–11–14, Amendment 39–18913 (82 FR 25954, June 6, 2017) (AD 2017–11–14), for certain The Boeing Company Model 777–200, –200LR, –300, and –300ER series airplanes, to prevent arcing inside the main and center fuel tanks in the event of a fault current or lightning strike, which, in combination with flammable fuel vapors, could result in a fuel tank explosion and consequent loss of the airplane.

AD 2017–11–14 requires certain inspections for certain airplanes, corrective actions if necessary, and installation of Teflon sleeves under certain wire bundle clamps.

Since the FAA issued AD 2017–11–14, it was discovered that more airplanes are affected by the identified unsafe condition, and additional work is required for airplanes on which an earlier revision of the service information was done.

FAA's Determination

The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Boeing Alert Service Bulletin 777–57A0050, Revision 6, dated August 18, 2021. This service information specifies applicable actions that vary depending on the airplane configuration, such as procedures for the installation of Teflon sleeves, cap sealing of fasteners, detailed inspections, and corrective actions. The detailed inspection of and installation of Teflon sleeves includes various locations, such as the rear spar wire bundles, inboard and outboard front spar wire bundles, wing-to-body fairing and environmental control system (ECS) bay wire bundles, front and rear spar bulkhead wire bundles, and wing rear spar wire bundles. The detailed inspection of and cap sealing of fasteners include fasteners in the center fuel tank, left and right main fuel tanks, and right cheek portion of the center fuel tank. Corrective actions include installing Teflon sleeve, installing clamp, and cap sealing fasteners.

The FAA also reviewed Section 9, Airworthiness Limitations (AWLs) and Certification Maintenance Requirements (CMRs), D622W001–9, dated March 2022, of Boeing 777 200/200LR/300/300ER/777F Maintenance Planning Data (MPD) Document. This service information specifies, among other airworthiness limitations, 28–AWL–31 and 28–AWL–32 that address cushion clamps and Teflon sleeving installed on out-of-tank wire bundles installed on brackets that are mounted directly on the fuel tanks.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in **ADDRESSES**.

Proposed AD Requirements in This NPRM

This proposed AD would require doing all applicable actions (*i.e.,* installation of Teflon sleeves, cap sealing of fasteners, detailed inspections, and corrective actions) identified in Boeing Alert Service Bulletin 777–57A0050, Revision 6, dated August 18, 2021. This proposed AD would also require revising the existing maintenance or inspection program, as applicable, to incorporate AWLs 28–AWL–31 and 28–AWL–32 as identified in Section 9, Airworthiness Limitations (AWLs) and Certification Maintenance Requirements (CMRs), D622W001–9, dated March 2022. For information on the procedures and compliance times for the applicable actions specified in paragraph (g) of this AD, see Boeing Alert Service Bulletin 777–57A0050, Revision 6, dated August 18, 2021, at *www.regulations.gov* by searching for and locating Docket No. FAA–2022–0810.

This proposed AD would require revisions to certain operator maintenance documents to include new actions (*e.g.,* inspections) and Critical Design Configuration Control Limitations (CDCCLs). Compliance with these actions and CDCCLs is required by 14 CFR 91.403(c). For airplanes that have been previously modified, altered, or repaired in the areas addressed by this proposed AD, the operator may not be able to accomplish the actions described in the revisions. In this situation, to comply with 14 CFR 91.403(c), the operator must request approval for an alternative method of compliance according to paragraph (m) of this proposed AD.

This NPRM would not supersede AD 2017–11–14. Rather, the FAA has determined that a stand-alone AD would be more appropriate to address the changes. Accomplishment of the actions required by paragraph (g) of this proposed AD would then terminate the requirements of paragraphs (g)(1), (i), and (j) of AD 2017–11–14.

In addition, accomplishment of the revision required by paragraph (i) of this proposed AD would terminate the requirements of paragraphs (g)(6) and (h) of AD 2021–24–12, Amendment 39–21833 (86 FR 73660, December 28, 2021) (AD 2021–24–12). AD 2021–24–12 requires revising the existing maintenance or inspection program, as applicable, to incorporate multiple AWLs, including 28–AWL–31 and 28–AWL–32.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 282 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS *

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Installations, cap sealing, and inspections.	Up to 545 work-hours × $85 per hour = $46,325.	Up to $3,510	Up to $49,835	Up to $14,053,470.

* Table does not include estimated costs for revising the existing maintenance or inspection program.

The FAA has determined that revising the existing maintenance or inspection program takes an average of 90 work-hours per operator, although the agency recognizes that this number may vary from operator to operator. Since operators incorporate maintenance or inspection program changes for their affected fleet(s), the FAA has determined that a per-operator estimate is more accurate than a per-airplane estimate. Therefore, the FAA estimates the average total cost per operator to be $7,650 (90 work-hours × $85 per work-hour).

The FAA estimates the following costs to do any necessary corrective actions that would be required based on the results of the proposed inspections. The agency has no way of determining the number of aircraft that might need these actions:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Corrective actions	Up to 26 work-hours × $85 per hour = $2,210	Up to $3,510	Up to $5,720.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

The Boeing Company: Docket No. FAA–2022–0810; Project Identifier AD–2021–01238–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by September 9, 2022.

(b) Affected ADs

(1) This AD affects AD 2017–11–14, Amendment 39–18913 (82 FR 25954, June 6, 2017) (AD 2017–11–14).

(2) This AD also affects AD 2021–24–12, Amendment 39–21833 (86 FR 73660, December 28, 2021) (AD 2021–24–12).

(c) Applicability

This AD applies to all The Boeing Company Model 777–200, –200LR, –300, –300ER, and 777F series airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 57, Wings.

(e) Unsafe Condition

This AD was prompted by fuel system reviews conducted by the manufacturer. The FAA is issuing this AD to prevent arcing inside the main and center fuel tanks in the event of a fault current or lightning strike, which, in combination with flammable fuel vapors, could result in a fuel tank explosion and consequent loss of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Service Bulletin Actions

For airplanes identified in Boeing Alert Service Bulletin 777–57A0050, Revision 6, dated August 18, 2021: Except as specified in paragraph (h) of this AD, at the applicable times specified in paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 777–57A0050, Revision 6, dated August 18, 2021, do all applicable actions (*i.e.,* installation of Teflon sleeves, cap sealing of fasteners, detailed inspections, and corrective actions) identified in, and in accordance with, the Accomplishment Instructions of Boeing Alert Service Bulletin 777–57A0050, Revision 6, dated August 18, 2021. Do all applicable corrective actions before further flight.

(h) Exceptions to Service Information Specifications

(1) Where Boeing Alert Service Bulletin 777–57A0050, Revision 6, dated August 18, 2021, uses the phrase ''the revision 5 date of

this service bulletin'' or ''the revision 6 date of this service bulletin,'' this AD requires using ''the effective date of this AD.''

(2) Where circle symbol 1 of sheet 2 of Figures 172, 173, and 174 of Boeing Alert Service Bulletin 777–57A0050, Revision 6, dated August 18, 2021, points to the outboard side of rib no. 9 for the locate and cap seal task or the inspection task, as applicable, in step 1 of sheet 3, for this AD, circle symbol 1 points to the seven fasteners located at the inboard side of rib no. 9.

(3) Where circle symbol 1, next to the text ''7 locations,'' of sheet 2 of Figure 175 and Figure 176 of Boeing Alert Service Bulletin 777–57A0050, Revision 6, dated August 18, 2021, points to the outboard side of rib no. 9 for the locate and cap seal task or the inspection task, as applicable, in step 1 of sheet 3, for this AD, circle symbol 1, next to the text ''7 locations,'' points to the seven fasteners located at the inboard side of rib no. 9.

(4) Where circle symbol 1, next to the text ''7 locations,'' of sheet 4 of Figure 179 and Figure 180 of Boeing Alert Service Bulletin 777–57A0050, Revision 6, dated August 18, 2021, points to the outboard side of rib no. 9 for the locate and cap seal task or the inspection task, as applicable, in step 1 of sheet 6, for this AD, circle symbol 1, next to the text ''7 locations,'' points to the seven fasteners located at the inboard side of rib no. 9.

(i) Maintenance or Inspection Program Revision

Within 60 days after the effective date of this AD, revise the existing maintenance or inspection program, as applicable, to incorporate the information for 28–AWL–31 and 28–AWL–32 specified in Section D, ''Airworthiness Limitations-Systems,'' including Subsections D.1, of Section 9, Airworthiness Limitations (AWLs) and Certification Maintenance Requirements (CMRs), D622W001–9, dated March 2022, of Boeing 777–200/200LR/300/300ER/777F Maintenance Planning Data (MPD) Document, except as specified in paragraph (j) of this AD. The initial compliance time for doing airworthiness limitation instructions (ALI) task 28–AWL–32 is at the applicable time specified in paragraph (i)(1) or (2) of this AD:

(1) For airplanes having line numbers (L/Ns) 1 through 503 inclusive: Within 3,750 days after accomplishment of the actions specified in Boeing Service Bulletin 777–57A0050, or within 60 months after the effective date of this AD, whichever occurs later.

(2) For airplanes having L/Ns 504 and subsequent: Within 3,750 days after the date of issuance of the original airworthiness certificate or the date of issuance of the original export certificate of airworthiness; or within 60 months after the effective date of this AD; whichever occurs later.

(j) Exceptions to the AWLs

The following exceptions apply to 28–AWL–31 and 28–AWL–32 of Section D, ''Airworthiness Limitations—Systems,'' including Subsections D.1 of Section 9, Airworthiness Limitations (AWLs) and Certification Maintenance Requirements (CMRs), D622W001–9, dated March 2022, of Boeing 777–200/200LR/300/300ER/777F Maintenance Planning Data (MPD) Document.

(1) In paragraph 1.i., change ''Front Spar Bulkhead (Center Tank)'' to ''Front Spar Bulkhead (Center Wing Tank Fuel Quantity Greater than 12,400 Gallons).''

(2) In paragraph 1.i.II, change ''For 777–200, 777–200LR, 777–300, and 777–300ER airplanes, L/N 562 and on'' to ''L/N 562 and on, except 777F.''

(3) In paragraph 1.i.III., change ''For 777F airplanes, L/N 718 and on'' to ''For 777F airplanes.''

(4) In paragraph 1.j., change ''Rear Spar Bulkhead (Center Tank)'' to ''Rear Spar Bulkhead (Center Wing Tank Fuel Quantity Greater than 12,400 Gallons).''

(k) No Alternative Actions, Intervals, or Critical Design Configuration Control Limitations (CDCCLs)

After the existing maintenance or inspection program has been revised as required by paragraph (i) of this AD, no alternative actions (*e.g.,* inspections), intervals, or CDCCLs may be used unless the actions, intervals, and CDCCLs are approved as an alternative method of compliance (AMOC) in accordance with the procedures specified in paragraph (m) of this AD.

(l) Terminating Action for Certain Requirements of AD 2017–11–14 and AD 2021–24–12

(1) Accomplishment of the actions required by paragraph (g) of this AD terminates the requirements of paragraphs (g)(1), (i), and (j) of AD 2017–11–14.

(2) Accomplishment of the revision required by paragraph (i) of this AD terminates the requirements of paragraphs (g)(6) and (h) of AD 2021–24–12.

(m) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Seattle ACO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (n)(1) of this AD. Information may be emailed to: *9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by The Boeing Company Organization Designation Authorization (ODA) that has been authorized by the Manager, Seattle ACO Branch, FAA, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(n) Related Information

(1) For more information about this AD, contact Kevin Nguyen, Aerospace Engineer, Propulsion Section, FAA, Seattle ACO Branch, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206–231–3555; email: *kevin.nguyen@faa.gov.*

(2) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; internet *www.myboeingfleet.com.* You may view this referenced service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

Issued on June 30, 2022.

Christina Underwood,

Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Overview of the Current Guides

The Guides, 16 CFR part 255, are designed to assist businesses and others in conforming their endorsement and testimonial advertising practices to the requirements of section 5 of the FTC Act. Although the Guides interpret laws administered by the Commission, and thus are advisory in nature, proceedings to enforce the requirements of law as explained in the Guides can be brought under the FTC Act. In any such proceeding, the Commission would have the burden of proving that a particular use of an endorsement or testimonial was deceptive under the law.

The Guides define both endorsements and testimonials broadly to mean any advertising message that consumers are likely to believe reflects the opinions, beliefs, findings, or experience of a party other than the sponsoring advertiser. 16 CFR 255.0(b) and (c). The Guides state that endorsements must reflect the honest opinions, findings, beliefs, or experience of the endorser. 16 CFR 255.1(a). Furthermore, endorsements may not contain any representations that would be deceptive, or could not be substantiated, if made directly by the advertiser. *Id.* The Guides state that an advertisement presenting consumer endorsements about the performance of an advertised product will be interpreted as representing that the product is effective for the purpose depicted in the advertisement. 16 CFR 255.2(a). They further advise that an advertisement employing a consumer endorsement on a central or key attribute of a product will be interpreted as representing that the endorser's experience is representative of what consumers will generally achieve. 16 CFR 255.2(b). If an advertiser does not have adequate substantiation that the endorser's experience is representative, the advertisement should clearly and conspicuously disclose what the generally expected performance would be in the depicted circumstances. *Id.*

The Guides define an expert endorser as someone who, as a result of experience, study, or training, possesses knowledge of a particular subject that is superior to that generally acquired by ordinary individuals. 16 CFR 255.0(e). An expert endorser's qualifications must in fact, give him or her the expertise that he or she is represented as possessing with respect to the endorsement. 16 CFR 255.3(a). Moreover, an expert endorsement must be supported by an actual exercise of that expertise and the expert's evaluation of the product must have been at least as extensive as someone with the same degree of expertise would normally need to conduct in order to support the conclusions presented. 16 CFR 255.3(b).

The Guides advise that when there is a connection between the endorser and the seller of the advertised product that might materially affect the weight or credibility of the endorsement (*i.e.,* the connection is not reasonably expected by the audience), such connection must be fully disclosed. 16 CFR 255.5.

Among other things, the Guides also state that: (1) when the advertisement represents that the endorser uses the endorsed product, the endorser must have been a bona fide user of it at the time the endorsement was given, 16 CFR 255.1(c); (2) advertisers are subject to liability for false or unsubstantiated statements made through endorsements, or for failing to disclose material connections between themselves and their endorsers; and endorsers also may be liable for statements made in the course of their endorsements, 16 CFR 255.1(d); (3) advertisements presenting endorsements by what are represented to be ''actual consumers'' should utilize actual consumers, or clearly and conspicuously disclose that the persons are not actual consumers, 16 CFR 255.2(c); and (4) an organization's endorsement must be reached by a process sufficient to ensure that the endorsement fairly reflects the collective judgment of the organization. 16 CFR 255.4.

II. History of the Guides

In December 1972, the Commission published for public comment proposed Guides Concerning the Use of Endorsements and Testimonials in Advertising, 37 FR 25548 (Dec. 1, 1972). Interested parties submitted extensive comment. On May 21, 1975, the Commission promulgated, under the Federal Trade Commission Act (''FTC Act''), 15 U.S.C. 41–58, three sections of the 1972 proposal as final guidelines (16 CFR 255.0, 255.3 and 255.4) and republished three others, in modified form, for additional public comment. 40 FR 22127 (May 21, 1975). The Commission received public comment on the three re-proposed guidelines, as well as on one of the final guidelines. On January 18, 1980, the Commission promulgated three new sections as final guidelines (16 CFR 255.1, 255.2 and 255.5) and modified an example to one of the final guidelines adopted in May 1975 (16 CFR 255.0 Example 4). 45 FR 3870 (Jan. 18, 1980).

As part of its periodic regulatory review, the Commission sought public comment on the Endorsement Guides in January 2007. 72 FR 2214 (Jan. 18, 2007). In November 2008, the Commission discussed the comments it received in 2007, proposed certain revisions to the Guides, and requested comment on those proposed revisions. 73 FR 72374 (Nov. 28, 2008). In October 2009, the Commission substantively amended the Guides, adding what are now 16 CFR 255.0(a), 255.1(d) and 255.2(a), significantly modifying the guidance in 16 CFR 255.0(b), and modifying or adding numerous examples. 74 FR 53124 (Oct. 15, 2009).

In February 2020, again as part of its ongoing regulatory review process, the Commission published a **Federal Register** notice seeking comment on the overall costs, benefits, and regulatory and economic impact of the Guides as well as a number of specific questions focused on the material connections section of the Guides (16 CFR 255.5). 85 FR 10104 (Feb. 21, 2020). In light of the disruption caused by the Coronavirus pandemic, the Commission extended the comment period for two months. 85 FR 19709 (Apr. 8, 2020).

III. Overview of Comments Received in Response to Regulatory Review Notice

The Commission received 108 unique substantive comments in response to its regulatory review notice.[1] Having

[1] Approximately seventy-five comments were submitted by individual consumers, most of whom were apparently university students fulfilling class assignments. The remaining commenters were: American Influencer Council, Inc. (''AIC''); American Financial Services Association (''AFSA''); Amazon.com, Inc. (''Amazon''); Association of National Advertisers (''ANA''); BBB National Programs (''BBB''); Shirley Boyd, Esq. (''Boyd''); Campaign for a Commercial Free-Childhood and Center for Digital Democracy (''CCFC''); Competition and Markets Authority (''CMA''); Consumer Reports; Council for Responsible Nutrition (''CRN''); Common Sense Media (''CSM''); Consumer World (''CW''); Digital Content Next (''DCN''); Esports Bar Association (''Esports Bar''); Entertainment Software Association (''ESA''); Prof. Chris Jay Hoofnagle (''Hoofnagle''); Interactive Advertising Bureau (''IAB''); Jim Dudukovich, Esq. (''Dudukovich''); IZEA Worldwide, Inc. (''IZEA''); Kleinfeld, Kaplan and Becker LLP (''KK&B''); LEGO Group (''LEGO''); Maastricht University (''Maastricht''); Association of Magazine Media (''MPA''); North American Insulation Manufacturers Association (''NAIMA''); internet and Television Association (''NCTA''); NetChoice; News Media

Continued

considered those comments and its own extensive consumer protection experience, the Commission now proposes various amendments to the Guides and invites comments on these proposed changes.

Most commenters noted that the Guides are beneficial and should be retained,[2] and none disagreed. Some comments praised the current Guides for striking an appropriate balance between protecting consumers and allowing advertisers to communicate creatively and effectively to potential customers.[3]

Most comments responded to specific questions the Commission posed in the February 2020 **Federal Register** notice about certain provisions of the current Guides. Those comments are discussed in Part IV, below, in the context of the specific Guide provisions to which they relate.

In addition, some comments addressed other issues. For example, some commenters said that the Commission should engage in more vigorous enforcement activities related to the Guides [4] and greater educational efforts.[5] Other commenters weighed in on whether the Commission should [6] or should not [7] engage in a rulemaking proceeding to convert some principles in the Guides into trade regulation rules.

Some comments urged the Commission to encourage social media platforms to improve or standardize the built-in tools that some of them offer to facilitate disclosures of material connections by platform users.[8] The Commission supports development of effective, built-in disclosure tools but is concerned that some of the existing ones are too poorly contrasting, fleeting, or small, or may be placed in locations where they do not catch the user's attention. For example, a social media disclosure tool that superimposes a disclosure over a posted picture could be poorly contrasting, making the disclosure inadequate, especially if the picture is only displayed for a few seconds and contains competing text or other information. Similarly, a disclosure tool that superimposes a small disclosure in the bottom left corner of a video for only a few seconds is inconspicuous. Even a tool that employs a disclosure of sufficient size, duration, and contrast could be inadequate if it is displayed above, rather than below, a picture or video that catches the attention of users scrolling through their feeds. Platforms may be exposing endorsers to liability if users rely solely on a platform's inadequate tools for their disclosures. Platforms may also be exposing themselves to liability depending on the representations they make about these tools. Given that platforms play a major role in disseminating and monetizing endorsements, and actively encourage endorsers to promote and amplify their posts, the Commission believes they should carefully evaluate their tools and what they say about them to ensure they are not exposing themselves or their users to liability.

IV. Section-by-Section Discussion of Proposed Revisions to Guides, Comments Received in Response to February 2020 Federal Register Notice, and Requests for Additional Comment

The Commission believes the Guides should be retained but a number of revisions are appropriate. Many of the proposed changes are simply clarifications or additional examples of the principles embodied in the existing Guides. Others enunciate basic principles not expressly set forth in the current Guides but are established in Commission enforcement actions. Several represent substantive changes from the current Guides, based upon increased knowledge of how consumers view endorsements and taking into consideration the comments submitted in response to the February 2020 **Federal Register** notice. Some of the new examples and updates to existing examples reflect the extent to which advertisers have turned increasingly to the use of social media and product reviews to market their products.

The Commission seeks comments on these proposed revisions, which are discussed below by Section.[9]

A. § 255.0—Purpose and Definitions

The Guides currently begin with a purpose and definitions section.

Current § 255.0(b) defines an ''endorsement'' as any advertising message that consumers are likely to believe reflects the opinions, beliefs, findings, or experience of a party other than the sponsoring advertiser. As suggested in a comment, the Commission proposes revising that definition to clarify that ''marketing'' and ''promotional'' messages can be endorsements.[10] When a social media user tags a brand in a post, it generally communicates that the poster uses or likes the brand, so, the revised definition would also indicate that tags in social media posts can be endorsements. Section 255.0(b) also currently states that an ''endorser'' may be an individual, group, or institution. The Commission proposes a modification indicating that an endorser could instead simply appear to be an individual, group, or institution. Thus, the Guides would clearly apply to endorsements by fabricated endorsers.

The Commission proposes to add a footnote to § 255.0(b). It would indicate the availability of detailed staff business guidance regarding endorsements that is updated periodically, while noting that such staff guidance is not approved by or binding upon the Commission. Numerous commenters asked the Commission to update the Guides more frequently, such as every three years.[11] Some commenters asked that the Commission provide detailed guidance in the Guides about acceptable and unacceptable language and placement for disclosures of material connections and their use on particular platforms,[12] while others asked the Commission to continue to allow marketers flexibility in the crafting and placement of necessary disclosures.[13] Commenters also differed on whether to incorporate FTC staff business guidance into the Guides, with some saying it would be useful [14] and others taking the position that the social media landscape is ever-changing and the Guides should focus on general principles.[15] One commenter

suggested cross-referencing staff guidance in the Guides.[16] The Commission believes that its current approach for endorsement-related guidance makes sense, with the Guides focused on general principles and examples, and the more informal and easily updated staff guidance focused on specific questions and issues that arise in this area. The new footnote would ensure that people reading the Guides are aware of this additional staff guidance.

Current § 255.0(d) defines a ''product'' as any product, service, company or industry. At the suggestion of a commenter,[17] the Commission proposes modifying the definition to clarify that a ''product'' includes a ''brand.''

In response to comments requesting further guidance on what constitutes a clear and conspicuous disclosure, the Commission proposes adding a new definition of ''clear and conspicuous'' in a new § 255.0(f). It would define a ''clear and conspicuous'' disclosure as a disclosure that ''is difficult to miss (*i.e.,* easily noticeable) and easily understandable by ordinary consumers.'' It would give specific guidance with respect to visual and audible disclosures, stress the importance of ''unavoidability'' when the communication involves social media or the internet, and say that the disclosure should not be contradicted or mitigated by, or inconsistent with, anything in the communication. While not mandating that a disclosure be both visual and audible under all circumstances, it would say that when the triggering claim is visual the disclosure should be at least visual; that when the triggering claim is audible, the disclosure should be at least audible; that when the triggering claim is both visual and audible, the disclosure should be both; and that a simultaneous audible and visual disclosure is more likely to be clear and conspicuous. Finally, the proposed definition notes that when an endorsement targets a specific audience, such as older adults, its effectiveness will be evaluated from the perspective of members of that group.

Example 1 to § 255.0 currently provides an example of an endorsement and illustrates the principle that an endorsement may not be presented out of context or reworded so as to distort the endorser's opinion. One commenter noted that it was unclear in the example who distorted the endorser's opinion.[18] The Commission proposes to modify the example to clearly identify the responsible party.

Current Example 5 to § 255.0 involves a television advertisement in which a professional golfer implicitly endorses a brand of golf balls by being shown practicing her swing using the balls, even though she says nothing in the ad. The Commission proposes expanding this example to illustrate that use of the same video footage in a social media post can be an endorsement as long as the endorsed brand is tagged or otherwise readily identifiable by viewers.

Example 6 to § 255.0 currently illustrates how a paid actor hosting a product infomercial and reading from a script can still be making an endorsement. The Commission proposes adding a scenario to this example to show how the same actor can talk about the product without making an endorsement and deleting Example 7, which had also focused on illustrating statements that were not endorsements.

Example 8 to § 255.0, which would be renumbered as Example 7, currently provides scenarios in which an individual consumer's social media posts would and would not be considered endorsements. Two commenters asked for further explanation of the Commission's reasoning.[19] The Commission proposes to clarify the example. When a consumer buys the product with her own money under ordinary circumstances and chooses to post about it, the post is not an endorsement under the Guides because the consumer has no connection to the manufacturer beyond being an ordinary purchaser and her message cannot be attributed to the product's manufacturer. The revised example would note that the same would be true for a consumer review. Furthermore, if the consumer received a coupon for a free trial product from the manufacturer simply based upon her purchase history and if the manufacturer did not ask coupon recipients for reviews, then the consumer's unsolicited review would not be an endorsement because it cannot be attributed to the manufacturer. However, if the consumer received the free product as part of a marketing program that periodically provides free products from various manufacturers, where the consumer has the option of writing a review, the consumer's review would be an endorsement because of her connection to the manufacturer through the marketing program.

The Commission proposes adding six new examples to this section. New Example 8 would illustrate an endorsement made through video game play streamed on social media without an express product recommendation. New Example 9 illustrates disclosures that are easily missed and thus are not clear and conspicuous. New Examples 10 and 11 illustrate how a disclosure may need to be evaluated from the perspective of an advertisement's target audience and that disclosures need to be clear and conspicuous on multiple common types of platforms or devices.

New Example 12 derives in part from a commenter's suggestion that the Guides address an incentivized endorser denigrating a competitor's product.[20] The example would state that a fake negative review or another paid or incentivized negative statement about a competitor's service does not meet the definition of an ''endorsement.'' It would note, however, that engaging in such disparagement can be a deceptive practice.

New Example 13 derives from a commenter's suggestion that the Guides state, as alleged in *FTC* v. *Devumi, LLC,*[21] that it is illegal to sell, purchase, or use bots or other fake social media accounts to market goods and services.[22] Because such indicators do not express an advertising message by their mere presence, the example would acknowledge that an endorser's use of fake indicators of social media influence is not itself an endorsement issue. The Commission would note in the example that it is a deceptive practice for users of social media to purchase or create indicators of social media influence and then use them to misrepresent their influence for a commercial purpose and that it is a deceptive practice to sell or distribute such indicators to such users.

B. § 255.1—General Considerations

Section 255.1 sets forth principles that apply to endorsements generally (*e.g.,* endorsements must reflect the honest opinions or experience of the endorser, and they may not convey any representation that would be deceptive if made directly by the advertiser).

Section 255.1(d) currently recognizes that advertisers are subject to liability for false or unsubstantiated statements made through endorsements, or for failing to disclose material connections between themselves and their endorsers. The Commission would indicate that an advertiser may be liable for an

[22] *See* Consumer Reports at 9.

endorser's deceptive statement even when the endorser is not liable. The Commission also proposes adding guidance to this subsection on what actions advertisers should take with respect to their endorsers. Such guidance previously only appeared in an example.

Current § 255.1(d) also recognizes that endorsers themselves may be subject to liability for their statements. Commenters asked for clarification of when endorsers would be liable.[23] The Commission proposes moving the discussion of endorser liability to a new § 255.1(e) and indicating that endorsers may be liable for their statements such as when they make representations that they know or should know to be deceptive. The level of due diligence required by the endorsers will depend on their level of expertise and knowledge, among other factors. Current Examples 3 and 4 involve endorsers who knew or should have known that their statements were deceptive. Section 255.1(e) would also say that a non-expert endorser may also be liable when the endorser makes misleading or unsubstantiated representations about performance or efficacy that are inconsistent with the endorser's personal experience or that were not made or approved by the advertiser and that go beyond the scope of the endorser's personal experience.[24] Current Example 5 involves such an endorser and the Commission proposes updating it to better illustrate this principle. Finally, § 255.1(e) would also note that endorsers may also be liable for failing to disclose unexpected material connections between themselves and an advertiser, such as when they create and disseminate endorsements without such disclosures.

A few commenters suggested that the Guides deal with the disclosure responsibility of intermediaries such as marketing and public relations firms.[25] The Commission proposes adding a new § 255.1(f) explaining the potential liability of intermediaries. Intermediaries, such as advertising agencies and public relations firms, may be liable for their roles in disseminating what they knew or should have known were deceptive endorsements.[26] For example, advertising agencies that intentionally engage in deception or that ignore obvious shortcomings of claims they disseminate may be liable. They may also be liable for their roles with respect to endorsements that fail to disclose unexpected material connections, whether by disseminating advertisements without necessary disclosures of material connection or by hiring and directing the endorsers who fail to make necessary disclosures.[27]

The Commission proposes adding a new § 255.1(g) stating a general principle that the use of an endorsement with the image or likeness of a person other than the actual endorser is deceptive if it misrepresents a material attribute of the endorser.

The Commission proposes modifying current Example 1 to § 255.1 to note that an endorser does not need to go back and modify or delete past social media posts as long as the posts were not misleading when they were made and the dates of the posts are clear and conspicuous to viewers. However, the example would state that if the post was later reposted by the endorser or shared by the publisher, it would suggest to reasonable consumers that the endorser continued to hold the views expressed in the prior post.

The Commission proposes deleting current Example 2 to § 255.1 because it is patently obvious that a person asked to try unmarked products and pick the best one is not communicating that she or he is a regular user of the selected product. The Commission proposes to replace that example with one that illustrates when an endorsement would likely communicate regular use and ownership.

The Commission proposes editing current Example 3 to § 255.1 to indicate that a paid endorser and the company paying the endorser are both potentially liable for the endorser's social media post that fails to disclose the endorser's relationship to the company. The Commission proposes altering the example and adding a new cross-reference in this example to the Guides' material connection provisions (§ 255.5) to make clear that those provisions apply to paid consultants and not just employees or those hired to be endorsers. The Commission also proposes adding alternative language to the example illustrating how the advertiser could be liable when the endorser is not liable.

The Commission proposes adding new Examples 6 and 7 to illustrate the principle in new § 255.1(g) involving the use of an image or likeness of a person other than the actual endorser to misrepresent a material attribute of the endorser. These examples involve endorsements for an acne product using an image of a person with much better skin than the actual endorser, a weight-loss product with an image of a person weighing much less than the actual endorser, and a learn-to-read program with a picture of a significantly younger child than the child of the endorser.

C. § 255.2—Consumer Endorsements

Section 255.2 of the Guides provides guidance specific to the use of consumer endorsements, commonly referred to as testimonials.

Current § 255.2(a) addresses the need for adequate substantiation for claims made through endorsements. The Commission proposes clarifying that this need for substantiation applies to both express and implied claims.

Current § 255.2(b) states that when the advertiser does not have substantiation that an endorser's experience is representative of what consumers will generally achieve, an ad should clearly and conspicuously disclose the generally expected performance in the depicted circumstances. The Commission proposes adding a clarifying statement that the disclosure of the generally expected performance should be presented in a manner that does not itself misrepresent what consumers can expect.

The Commission proposes adding a new § 255.2(d) that addresses consumer reviews and articulates a fundamental principle not expressly set forth in the existing Guides. It would state that in procuring, suppressing, boosting, organizing, or editing consumer reviews of their products, advertisers should not take actions that have the effect of distorting or otherwise misrepresenting what consumers think of their products. It would also note that this is true regardless of whether the reviews are considered ''endorsements'' under the Guides.

The Commission proposes to expand current Example 2 of § 255.2 so as to illustrate how a disclosure of expected results can be misleading when those results are only true under limited circumstances not clearly stated in the ad.

Because current Example 3 of § 255.2 involves serum cholesterol lowering claims, the Commission proposes replacing ''adequate substantiation''

[23] *See, e.g.,* Boyd at 13; and Dudukovich at 18.

[24] The Commission would add a cross-reference to § 255.3 with respect to the responsibilities of an expert endorser.

[25] *See, e.g.,* Boyd at 13; and Maastricht at 7–8.

[26] *See* Complaint at 6, 8, 12–12, 20, *FTC* v. *Marketing Architects, Inc.,* No. 2:18–cv–00050 (D. Me. Feb. 6, 2018), *https://www.ftc.gov/system/files/documents/cases/1623101marketingarchitects complaint.pdf* (defendant advertising agency created and disseminated fictitious weight-loss testimonials).

[27] *See* Complaint at 2–5, *In the Matter of Machinima, Inc.,* No. C–4569 (Sept. 2, 2015), *https://www.ftc.gov/system/files/documents/cases/160317machinimacmpt.pdf.* (respondent recruited, hired, and instructed influencers on behalf of an advertiser, but did not require the influencers to disclose compensation).

with ''competent and reliable scientific evidence,'' the type of substantiation that would be required for such claims.

Current Example 4 of § 255.2 provides two examples of acceptable weight-loss disclosures of generally expected results under different circumstances, one where a testimonialist reports her weight loss over a certain period and one where the testimonialist reports her weight loss without specifying a time period. The Commission proposes editing those disclosures to make them more informative for consumers.[28] The Commission would also add examples of two alternative disclosures that would be inadequate, one involving a disclosure of weight loss per week and the other involving a broad range of possible weight loss.

Another proposed addition to Example 4 discusses and illustrates how outliers can substantially affect the average results such that a disclosure of generally expected results based upon a mean computation would be misleading and how, when such is the case, the disclosure could instead be based upon median results.

The Commission would also add language to Example 4 illustrating a marketer's liability for procuring fake reviews that appear for its product on a third-party review website. The marketer is not only liable for procuring reviews that are not from bona fide users, but is also liable for any unsubstantiated claims made in those fake reviews.[29]

Finally, the Commission proposes adding an alternative scenario to Example 4 involving an advertisement for a weight-loss program. The addition would explain that a disclosure of typical weight loss limited to only successful participants in the program (*e.g.,* only those who stuck with it for six months), ignoring participants who quit, would be inadequate.

The Commission proposes four new examples to illustrate the proposed new § 255.2(d).

New Example 8 addresses an online seller suppressing or not publishing product reviews based upon their star ratings or their negative sentiments.[30] The review portions of the seller's product pages are misleading as to purchasers' actual opinions of the products. The example would also provide examples of reviews that need not be published. The Commission would note that sellers are not required to display customer reviews that contain unlawful, harassing, abusive, obscene, vulgar, or sexually explicit content, or content that is inappropriate with respect to race, gender, sexuality, or ethnicity, or reviews that the seller reasonably believes are fake, so long as the criteria for withholding reviews are applied uniformly to all reviews submitted. The footnote would also note that sellers are not required to display reviews that are unrelated to their products or services and that ''services'' include customer service, delivery, returns, and exchanges. The Commission is particularly interested in consumer expectations regarding product reviews that are solely about related services. Do consumers expect that sellers publish such reviews that are just about a product's shipping or refund practices or the associated customer service together with other product reviews? Finally, the example illustrates that it would be deceptive for a seller to highlight glowing reviews and label them as ''most helpful'' if consumers had not actually voted them most helpful.

New Example 9 addresses paying purchasers to write positive product reviews.[31] Such reviews are deceptive regardless of any disclosure of the payment, because the manufacturer has required that the reviews be positive. The proposed example has a cross-reference for when there is no requirement that the reviews be positive and the reviewers understand that they are free to write negative reviews without suffering any consequences.

New Example 10 addresses the unfair practice of threatening consumers who post negative reviews to third-party websites in order to coerce the consumers to delete their reviews. Such threats can take the form of legal,[32] physical, or other threats. As noted in a new proposed footnote to the Guides, when the threats are incorporated into a form contract, they violate the Consumer Review Fairness Act. 15 U.S.C. 45b(b)(1).

Several commenters suggested addressing review gating, *i.e.,* practices that involve obtaining customer feedback and then sending satisfied and dissatisfied customers down different paths in order to encourage positive reviews and avoid negative reviews.[33] New Example 11 discusses a marketer soliciting feedback from all customers and only inviting those who give positive feedback to write online reviews. It says that such disparate treatment may be an unfair or deceptive practice if it results in the posted reviews being substantially more positive than if the marketer had not engaged in the practice.

D. § 255.3—Expert Endorsements

Section 255.3 provides guidance with respect to expert endorsements.

Current § 255.3(a) addresses advertisements that represent ''directly or by implication'' that an endorser is an expert with respect to the endorsement message. The Commission proposes clarifying that this section applies to representations made ''expressly or by implication.'' [34] The Commission proposes modifying current Example 2 to clarify that the non-medical ''doctor'' expert endorser should have relevant expertise and that the non-medical and non-specialized doctors referenced in the example do not necessarily have enough expertise to endorse the product even with a clear and conspicuous disclosure. The Commission also proposes amending current Example 6—adding a sentence about the potential liability of the expert endorser and the advertiser, including a cross-reference to § 255.1. The Commission would clarify that what matters is the expert's ''purported'' degree of expertise, not the expert's actual degree of expertise. Finally, the Commission would also indicate in Example 6 that scientific evidence is expected to support a serum cholesterol lowering claim.

E. § 255.4—Endorsements by Organizations

Section 255.4 provides guidance specific to the use of endorsements by organizations.

The Commission proposes to renumber the current example in § 255.4 as Example 1 and to add two additional examples.

New Example 2 would say that if a manufacturer sets up an apparently independent review website that reviews the manufacturer's own

[28] Example 4 provides an example of a performance claim requiring substantiation—a claim that WeightAway is an effective weight loss product. The Commission proposes revising that exemplar to include the claim that the endorser's weight loss was not just due to her dietary restrictions and exercise regimen.

[34] The Commission proposes making a similar change to § 255.2(c).

products and competing products, that website is deceptive because it is not in fact independent.[35]

New Example 3 addresses a third-party review site that provides rankings of various manufacturers' products and accepts payments in exchange for higher rankings. This practice was challenged in the Commission's case against LendEDU.[36] One commenter asked whether, based on that case, a disclosure is only required on such websites when they make claims that they are ''objective,'' ''accurate,'' and ''unbiased.'' [37] The revised example would say that a paid ranking boost is deceptive regardless of whether the website makes an express claim of independence or objectivity. It also would note the potential lability of a manufacturer that pays for a higher ranking. Finally, it would say that if a manufacturer makes payments to the review site but not for higher rankings, there should be a clear and conspicuous disclosure regarding the payments, with a cross-reference to an example involving payments for affiliate links.

F. § 255.5—Disclosure of Material Connections

Section 255.5 of the current Guides states that advertisers must disclose connections between themselves and their endorsers that might materially affect the weight or credibility of the endorsement (*i.e.,* the connection is not reasonably expected by the audience). The text of this section also includes the example of a television ad featuring an endorser who is neither represented in the advertisement as an expert nor is known to a significant portion of the viewing public.

The Commission believes the requirement that material connections between advertisers and endorsers be disclosed is appropriate and should be retained. The Commission proposes specifying that such disclosures must be ''clear and conspicuous,'' adding a definition of that phrase (as discussed above), and deleting the more ambiguous statement that such disclosures must be ''fully'' disclosed. It also proposes to delete the existing example from the text of the section and to replace it with more general guidance. A commenter asked for further guidance about what types of relationships could constitute material connections.[38] The proposed revised text of § 255.5 would explain that material connections can include a business, family, or personal relationship; monetary payment; the provision of free or discounted products or services to the endorser, including products or services unrelated to the endorsed product; early access to a product; or the possibility of winning a prize, of being paid, or of appearing on television or in other media promotions. The new guidance would state that a material connection can exist regardless of whether the advertiser requires an endorsement for the payment or free or discounted products.

Several commenters asked that the Commission provide examples of immaterial connections that need no disclosure.[39] The Commission proposes instead to recognize in the text of § 255.5 that some connections may be immaterial because they are too insignificant to affect the weight or credibility given to endorsements.

One commenter suggested that the Guides recognize that, for influencers primarily famous because of their social media presence, their sponsorships are often expected.[40] Without accepting or rejecting that proposition, the Commission proposes stating that an endorser's material connection need not to be disclosed when it is understood or expected by all but an insignificant portion of the audience.

One commenter requested that the Guides state that the exact nature or amount of an endorser's compensation need not be disclosed,[41] while another commenter asked that the Guides require influencers to state the amount of their compensation because it will help star-struck consumers appreciate the lack of honesty in celebrity posts.[42] The Commission proposes clarifying that the disclosure of a material connection does not require the complete details of the connection, but it must clearly communicate the nature of the connection sufficiently for consumers to evaluate its significance.

Commenters also expressed widely diverging opinions on the extent to which the Guides should address disclosures of material connections to children. Most of these commenters agreed that, as children grow, they are better able to understand what advertisements are and to distinguish them from other content. They also agreed that it is easier for children to recognize traditional television advertising than influencer marketing, with its blurring of organic content and marketing. Commenters diverged as to the ages at which and the extent to which disclosures can be effective. Some variously argued that disclosures of material connections are never effective for children, are ineffective at certain young ages, or should be more robust for children at certain ages.[43] At least one commenter argued that disclosures can work for younger kids.[44] Several commenters urged the Commission not to address this issue in the Guides at all and rely instead on self-regulatory organizations.[45] One commenter also noted that improving disclosures can help parents identify advertising to children.[46] Some commenters discussed or cited research studies in this area to support their views [47] or referred to the value of additional research.[48]

The Commission recognizes that it is difficult for children—especially younger children—to discern ads from entertainment or other content in the digital environment, where the lines are blurred much more than in traditional ''linear'' media, like television. For example, it may not be apparent to them when influencers are being paid to promote a product featured in their video and social media posts. Although not addressed in the comments, parents may play a role in promoting children's understanding of advertising and lessening the effects of potentially deceptive practices. The Commission would benefit from more evidence than provided in the comments to develop specific guidance or best practices in this area. FTC staff thus plans to hold a public event to gather research and expert opinion on: (a) children's capacities at different ages and developmental stages to recognize and understand advertising content and distinguish it from other content; (b) the need for and efficacy of disclosures as a solution to the problem facing children of different ages; and, (c) if disclosures can be efficacious, the most effective format, placement, and wording for disclosures. As discussed below, the Commission also proposes

adding a new § 255.6 addressing endorsements directed to children.

The current Example 3 to § 255.5 makes clear that consumers would not expect that a celebrity was paid for endorsing a medical procedure during a routine interview on a television talk show, that knowledge of such a financial interest would likely affect the weight or credibility consumers give to that endorsement, and that the celebrity's financial connection to the advertiser should be disclosed. One commenter said that the Guides should indicate that disclosures at the end of a talk show are not clear and conspicuous.[49] The Commission proposes edits to Example 3 noting that the disclosure should be during the interview and that a disclosure during the show's closing credits is not clear and conspicuous. A different commenter suggested that the Guides say that disclosure obligations exist even if an endorser is not paid for a particular post.[50] Revised Example 3 would say that, if the celebrity makes the endorsement in one of her social media posts, her connection to the advertiser should be disclosed regardless of whether she was paid for the particular post. The revised example would also illustrate that receipt of free or discounted services can constitute a material connection.

One comment suggested that the Guides address the reuse of an influencer's social media endorsement.[51] Revised Example 3 would also state that, when reusing a celebrity's social media posts in its own social media, an advertiser should clearly and conspicuously disclose its relationship to the celebrity (assuming the initial post necessitated a disclosure).

The current Example 4 to § 255.5 addresses the consumer expectation that an expert endorser would be reasonably compensated for appearing in an ad. The Commission proposes clarifying that the existing guidance applies to traditional ads, such as television ads, and adding an alternative scenario involving a post on the expert's own social media account, a context in which consumers would be less likely to expect that the expert was compensated and more likely to expect that the expert is expressing an independent opinion.

The current Example 5 to § 255.5 addresses a scenario in which restaurant patrons are informed before they enter that they will be interviewed by an advertiser as part of its TV promotion of its new food product. A commenter suggested that we clarify why this information is material.[52] The Commission proposes explaining that a patron might want to give the product a good review in the hope of appearing on television.

Several commenters said that incentivized reviews need disclosures even if the incentives are not conditioned on the reviews being positive.[53] Current Example 6 to § 255.5 addresses the situation where ''extras'' who want to work in commercials are recruited to use a product and endorse it in an infomercial in exchange for compensation and exposure. The Commission proposes expanding the example to address ordinary consumers recruited to try a product for free and write online reviews of it in exchange for payment; the example would state the need to disclose this connection in the resulting reviews. The example has a cross-reference to § 255.2(d) and Example 9 of § 255.2 for situations in which an incentive is conditioned on a review being positive or recruited consumers have reason to believe there are or may be negative consequences from posting reviews which are not positive. Multiple comments also raised concerns regarding incentivized reviews being included in an average star rating.[54] The proposed example states that, even if adequate disclosures appear in each incentivized review, the practice could still be deceptive if those solicited reviews' star ratings are included in an average star rating for the product, and their inclusion materially increases that average star rating.

The Commission proposes to modify Example 7 to § 255.5 to say that if a significant proportion of viewers are likely unaware that a woodworking influencer received a valuable piece of equipment for free from its manufacturer, he should clearly and conspicuously disclose that he got it for free. The Commission would make this example conditional in recognition of the possibility that the followers of some influencers or types of influencers may expect that they receive free products from advertisers. The Commission would also add a cross-reference to § 255.1(d) about the liability and responsibilities of advertisers.

The current Example 8 to § 255.5 addresses an employee's endorsement of an employer's product in an online community and the resulting need for a disclosure. A comment asked that the Commission add a statement about the employer educating its employees about disclosure requirements. The Commission proposes adding an explanation of an employer's obligations and noting that this guidance also applies to online consumer reviews.

The Commission is also proposing the addition of three new examples to § 255.5.

The first one arises from the request of commenters that the Commission include an example illustrating conditions under which third-party certifications and seals of approval, which typically require payment to the certifying organization to fund the evaluation, do not require a disclosure.[55] New Example 10, which is a slightly edited version of an example in the Green Guides,[56] recognizes that consumers would reasonably expect that marketers have to pay non-profit, third-party organizations reasonable fees for some certifications and seals.

Second, multiple commenters asked that the Guides address the need to disclose affiliate relationships and the adequacy of affiliate links[57] while one commenter asserted that consumers understand such links and that no disclosure is necessary.[58] New Example 11 addresses the disclosure of affiliate links. It says that a blogger who writes independent content reviewing products and who monetizes that content with affiliate links should clearly and conspicuously disclose the compensation.

Third, new Example 12 recognizes that, just as with television commercials, consumers can reasonably expect that people appearing in certain newer-form advertisements are compensated for their statements.

G. New § 255.6—Endorsements Directed to Children

As discussed above, endorsements directed to children may be of special concern. The Commission proposes adding a section simply acknowledging that fact, as to which we are aware of no disagreement. It would state, ''Endorsements in advertisements addressed to children may be of special concern because of the character of the audience. Practices which would not

[58] *See* NRF at 10.

ordinarily be questioned in advertisements addressed to adults might be questioned in such cases.'' The Commission proposed a very similar section in 1972 as § 255.6,[59] but withdrew it in 1975, stating that it had ''determined that the area of children's advertising could not be completely covered in these Guides.'' [60] The Commission now believes that even as more evidence is gathered about the effects of children's advertising, there is ample basis to recognize that children may react differently than adults to endorsements in advertising or to related disclosures.

Request for Comment

You can file a comment online or on paper. For the Commission to consider your comment, we must receive it on or before September 26, 2022. Write ''Endorsement Guides; P204500'' on your comment. Your comment—including your name and your state—will be placed on the public record of this proceeding, including, to the extent practicable, on the *https://www.regulations.gov* website.

Because of the agency's heightened security screening, postal mail addressed to the Commission will be subject to delay. We strongly encourage you to submit your comments online through the *https://www.regulations.gov* website. To ensure the Commission considers your online comment, please follow the instructions on the web-based form.

If you file your comment on paper, write ''Endorsement Guides; P204500'' on your comment and on the envelope, and mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW, Suite CC–5610 (Annex B), Washington, DC 20580.

Because your comment will be placed on the public record, you are solely responsible for making sure that your comment does not include any sensitive or confidential information. In particular, your comment should not contain sensitive personal information, such as your or anyone else's Social Security number; date of birth; driver's license number or other state identification number or foreign country equivalent; passport number; financial account number; or credit or debit card number. You are also solely responsible for making sure your comment does not include any sensitive health information, such as medical records or other individually identifiable health information. In addition, your comment should not include any ''[t]rade secret or any commercial or financial information which . . . is privileged or confidential''—as provided in Section 6(f) of the FTC Act, 15 U.S.C. 46(f), and FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2)—including competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns, devices, manufacturing processes, or customer names.

Comments containing material for which confidential treatment is requested must be filed in paper form, must be clearly labeled ''Confidential,'' and must comply with FTC Rule 4.9(c). In particular, the written request for confidential treatment that accompanies the comment must include the factual and legal basis for the request and must identify the specific portions of the comment to be withheld from the public record. *See* FTC Rule 4.9(c). Your comment will be kept confidential only if the General Counsel grants your request in accordance with the law and the public interest. Once your comment has been posted publicly at *www.regulations.gov*—as legally required by FTC Rule 4.9(b)—we cannot redact or remove your comment, unless you submit a confidentiality request that meets the requirements for such treatment under FTC Rule 4.9(c), and the General Counsel grants that request.

Visit the FTC website to read this document and the news release describing it. The FTC Act and other laws that the Commission administers permit the collection of public comments to consider and use in this proceeding as appropriate. The Commission will consider all timely and responsive public comments it receives on or before September 26, 2022. For information on the Commission's privacy policy, including routine uses permitted by the Privacy Act, see *https://www.ftc.gov/site-information/privacy-policy.*

List of Subjects in 16 CFR Part 255

Advertising, Trade practices.

■ Accordingly, the Federal Trade Commission proposes to revise 16 CFR part 255 to read as follows:

PART 255—GUIDES CONCERNING USE OF ENDORSEMENTS AND TESTIMONIALS IN ADVERTISING

Sec.

Authority: 38 Stat. 717, as amended; 15 U.S.C. 41–58.

§ 255.0 Purpose and definitions.

(a) The Guides in this part represent administrative interpretations of laws enforced by the Federal Trade Commission for the guidance of the public in conducting its affairs in conformity with legal requirements. Specifically, the Guides address the application of section 5 of the FTC Act (15 U.S.C. 45) to the use of endorsements and testimonials in advertising. The Guides provide the basis for voluntary compliance with the law by advertisers and endorsers. Practices inconsistent with these Guides may result in corrective action by the Commission under section 5 if, after investigation, the Commission has reason to believe that the practices fall within the scope of conduct declared unlawful by the statute. The Guides set forth the general principles that the Commission will use in evaluating endorsements and testimonials, together with examples illustrating the application of those principles. The Guides do not purport to cover every possible use of endorsements in advertising.[1] Whether a particular endorsement or testimonial is deceptive will depend on the specific factual circumstances of the advertisement at issue.

(b) For purposes of this part, an ''endorsement'' means any advertising, marketing, or promotional message (including verbal statements, tags in social media posts, demonstrations, or depictions of the name, signature, likeness or other identifying personal characteristics of an individual or the name or seal of an organization) that consumers are likely to believe reflects the opinions, beliefs, findings, or experiences of a party other than the sponsoring advertiser, even if the views expressed by that party are identical to those of the sponsoring advertiser. The party whose opinions, beliefs, findings, or experience the message appears to reflect will be called the ''endorser'' and could be or appear to be an individual, group, or institution.

(c) The Commission intends to treat endorsements and testimonials identically in the context of its enforcement of the Federal Trade Commission Act and for purposes of

[59] *See* 37 FR 25,548 (Dec. 1, 1972).

[60] *See* 40 FR 22,127 (May 1, 1975).

[1] Staff business guidance applying section 5 of the FTC Act to endorsements and testimonials in advertising is available on the FTC website. Such staff guidance addresses details not covered in these Guides and is updated periodically but is not approved by or binding upon the Commission.

this part. The term endorsements is therefore generally used hereinafter to cover both terms and situations.

(d) For purposes of this part, the term ''product'' includes any product, service, brand, company, or industry.

(e) For purposes of this part, an ''expert'' is an individual, group, or institution possessing, as a result of experience, study, or training, knowledge of a particular subject, which knowledge is superior to what ordinary individuals generally acquire.

(f) For purposes of this part, ''clear and conspicuous'' means that a disclosure is difficult to miss (*i.e.,* easily noticeable) and easily understandable by ordinary consumers. If a communication's representation necessitating a disclosure is made through visual means, the disclosure should be made in at least the communication's visual portion; if the representation is made through audible means, the disclosure should be made in at least the communication's audible portion; and if the representation is made through both visual and audible means, the disclosure should be made in the communication's visual and audible portions. A disclosure presented simultaneously in both the visual and audible portions of a communication is more likely to be clear and conspicuous. A visual disclosure, by its size, contrast, location, the length of time it appears, and other characteristics, should stand out from any accompanying text or other visual elements so that it is easily noticed, read, and understood. An audible disclosure should be delivered in a volume, speed, and cadence sufficient for ordinary consumers to easily hear and understand it. In any communication using an interactive electronic medium, such as social media or the internet, the disclosure should be unavoidable. The disclosure should not be contradicted or mitigated by, or inconsistent with, anything else in the communication. When an endorsement targets a specific audience, such as older adults, ''ordinary consumers'' includes members of that group.

(g) Examples:

(1) *Example 1.* A film critic's review of a movie is excerpted in an advertisement placed by the film's producer. When so used, the excerpt is an endorsement because readers would view it as a statement of the critic's own opinions and not those of the producer. If the excerpt alters or quotes from the text of the review in a way that does not fairly reflect its substance, the advertisement would be deceptive because it distorts the endorser's opinion. (*See* § 255.1(b))

(2) *Example 2.* A television commercial depicts two unidentified shoppers in a supermarket buying a laundry detergent. One comments to the other how clean the advertised brand makes the shopper's clothes. The other shopper then replies, ''I will try it because I have not been fully satisfied with my own brand.'' This obviously fictional dramatization would not be an endorsement.

(3) *Example 3.* In an advertisement for a pain remedy, an announcer unfamiliar to consumers except as a spokesperson for the advertising drug company praises the drug's ability to deliver fast and lasting pain relief. The spokesperson purports to speak, not on the basis of their own opinions, but rather in the place of and on behalf of the drug company. The announcer's statements would not be considered an endorsement.

(4) *Example 4.* A manufacturer of automobile tires hires a well-known professional automobile racing driver to deliver its advertising message in television commercials. In these commercials, the driver speaks of the smooth ride, strength, and long life of the tires. Many consumers are likely to believe this message reflects the driver's personal views, even if the driver does not say so, because consumers recognize the speaker as primarily a racing driver and not merely as a spokesman. Accordingly, consumers may well believe the driver would not speak for an automotive product without actually believing in their statements and having personal knowledge sufficient to form the beliefs expressed. The attribution of these beliefs to the driver makes this message an endorsement under the Guides.

(5) *Example 5.* (i) A television advertisement for a brand of golf balls includes a video of a prominent and well-recognized professional golfer practicing numerous drives off the tee. The video would be an endorsement even though the golfer makes no verbal statement in the advertisement.

(ii) The golfer is also hired to post the video to their social media account. The post is an endorsement if viewers can readily identify the golf ball brand, either because it is apparent from the video or because it is tagged or otherwise mentioned in the post.

(6) *Example 6.* (i) An infomercial for a home fitness system is hosted by a well-known actor. During the infomercial, the actor demonstrates the machine and states, ''This is the most effective and easy-to-use home exercise machine that I have ever tried. Even if the actor is reading from a script, the statement would be an endorsement, because consumers are likely to believe it reflects the actor's personal views.

(ii) Assume that, rather than speaking about their experience with or opinion of the machine, the actor says that the machine was designed by exercise physiologists at a leading university, that it isolates each of five major muscle groups, and that it is meant to be used for fifteen minutes a day. After demonstrating various exercises using the machine, the actor finally says how much the machine costs and how to order it. As the actor does not say or do anything during the infomercial that would lead viewers to believe that the actor is expressing their own views about the machine, there is no endorsement.

(7) *Example 7.* (i) A consumer who regularly purchases a particular brand of dog food decides one day to purchase a new, more expensive brand made by the same manufacturer. The purchaser posts to their social media account that the change in diet has made their dog's fur noticeably softer and shinier, and that in her opinion, the new dog food definitely is worth the extra money. Because the consumer has no connection to the manufacturer beyond being an ordinary purchaser, their message cannot be attributed to the manufacturer and the post would not be deemed an endorsement under the Guides. The same would be true if the purchaser writes a consumer product review on the manufacturer's website, a retailer's website, or an independent review website.

(ii) Assume that rather than purchase the dog food with their own money, the consumer receives it for free because the store routinely tracks purchases and the dog food manufacturer arranged for the store to provide a coupon for a free trial bag of its new brand to all purchasers of its existing brand. The manufacturer does not ask coupon recipients for product reviews and recipients likely would not assume that the manufacturer expects them to post reviews. The consumer's post would not be deemed an endorsement under the Guides because this unsolicited review cannot be attributed to the manufacturer.

(iii) Assume now that the consumer joins a marketing program under which participants periodically receive free products from various manufacturers and can write reviews if they want to do so. If the consumer receives a free bag of the new dog food through this program, their positive review would be considered an endorsement under the Guides because of their connection to the manufacturer through the marketing program.

(8) *Example 8.* A college student, who has earned a reputation as an excellent video game player, live streams their game play. The developer of a new video game pays the student to play and live stream its new game. The student plays the game and appears to enjoy it. Even though the college student does not expressly recommend the game, the game play is considered an endorsement.

(9) *Example 9.* (i) An influencer who is paid to endorse a vitamin product in their social media posts discloses their connection to the product's manufacturer only on the profile pages of their social media accounts. The disclosures are not clear and conspicuous because people seeing their paid posts could easily miss the disclosures.

(ii) Assume now that the influencer discloses their connection to the manufacturer in the posts themselves, but that, in order to see the disclosures, consumers have to click on a link labeled simply ''more.'' Those disclosures are not clear and conspicuous.

(iii) Assume now that the influencer relies solely upon a social media platform's built-in disclosure tool for one of these posts. The disclosure appears in small white text, it is set against the light background of the image that the influencer posted, it competes with unrelated text that the influencer superimposed on the image, and the post appears for only five seconds. The disclosure is easy to miss and thus not clear and conspicuous.

(10) *Example 10.* A television advertisement promotes a smartphone app that purportedly halts cognitive decline. The ad presents multiple endorsements by older senior citizens who are represented as actual consumers who used the app. The advertisement discloses via both audio and visual means that the persons featured are actors. Because the advertisement is targeted at older consumers, whether the disclosure is clear and conspicuous will be evaluated from the perspective of older consumers, including those with diminished auditory, visual, or cognitive processing abilities.

(11) *Example 11.* (i) A social media advertisement promoting a cholesterol-lowering product features a testimonialist who says how says by how much they lowered their serum cholesterol. The claimed reduction greatly exceeds what is typically experienced by users of the product and a disclosure of typical results is required. The marketer has been able to identify from online data collection Spanish speaking individuals with high cholesterol levels who are unable to understand English and microtargets a Spanish-language version of the ad to them, disclosing the typical results in English. The adequacy of the disclosure will be evaluated from the perspective of the targeted individuals.

(ii) Assume now that the ad has a disclosure that is clear and conspicuous when viewed on a computer browser but that is not clear and conspicuous when the ad is rendered on a smartphone. Because some consumers will view the ad on their smartphones, the disclosure is inadequate.

(12) *Example 12.* An exterminator purchases fake negative reviews of competing exterminators. A paid or otherwise incentivized negative statement about a competitor's product is not an endorsement, as that term is used in the Guides. Nevertheless, such statements, *e.g.,* a paid negative review of a competing product, can be deceptive in violation of section 5.

(13) *Example 13.* A motivational speaker buys fake social media followers to impress potential clients. The use by endorsers of fake indicators of social media influence, such as fake social media followers, is not itself an endorsement issue. The Commission notes, however, that it is a deceptive practice for users of social media platforms to purchase or create indicators of social media influence and then use them to misrepresent such influence to potential clients, purchasers, investors, partners, or employees or to anyone else for a commercial purpose. It is also a deceptive practice to sell or distribute such indicators to such users.

§ 255.1 General considerations.

(a) Endorsements must reflect the honest opinions, findings, beliefs, or experience of the endorser. Furthermore, an endorsement may not convey any express or implied representation that would be deceptive if made directly by the advertiser (*see* § 255.2(a) and (b) regarding substantiation of representations conveyed by consumer endorsements).

(b) An advertisement need not present an endorser's message in the exact words of the endorser unless the advertisement presents the endorsement as a quotation. However, the endorsement may not be presented out of context or reworded so as to distort in any way the endorser's opinion or experience with the product. An advertiser may use an endorsement of an expert or celebrity only so long as it has good reason to believe that the endorser continues to subscribe to the views presented. An advertiser may satisfy this obligation by securing the endorser's views at reasonable intervals where reasonableness will be determined by such factors as new information about the performance or effectiveness of the product, a material alteration in the product, changes in the performance of competitors' products, and the advertiser's contract commitments.

(c) When the advertisement represents that the endorser uses the endorsed product, the endorser must have been a bona fide user of it at the time the endorsement was given. Additionally, the advertiser may continue to run the advertisement only so long as it has good reason to believe that the endorser remains a bona fide user of the product (*see* § 255.1(b) regarding the ''good reason to believe'' requirement).

(d) Advertisers are subject to liability for misleading or unsubstantiated statements made through endorsements when there is a connection between the advertiser and the endorser, or for failing to disclose unexpected material connections between themselves and their endorsers (*see* § 255.5). An advertiser may be liable for an endorser's deceptive statement even when the endorser is not liable. Advertisers should:

(1) Provide guidance to their endorsers on the need to ensure that their statements are not misleading and to disclose unexpected material connections;

(2) Monitor their endorsers' compliance; and

(3) Take action sufficient to remedy non-compliance and prevent future non-compliance.

(e) Endorsers may be liable for statements made in the course of their endorsements, such as when an endorser makes a representation that the endorser knows or should know to be deceptive. Also, an endorser who is not an expert may be liable for misleading or unsubstantiated representations regarding a product's performance or effectiveness when the representations are inconsistent with the endorser's personal experience, or were not made or approved by the advertiser and go beyond the scope of the endorser's personal experience (for the responsibilities of an endorser who is an expert, *see* § 255.3). Endorsers may also be liable for failing to disclose unexpected material connections between themselves and an advertiser, such as when an endorser creates and disseminates endorsements without such disclosures.

(f) Intermediaries, such as advertising agencies and public relations firms, may

be liable for their roles in disseminating what they knew or should have known were deceptive endorsements. They may also be liable for their roles with respect to endorsements that fail to disclose unexpected material connections, whether by disseminating advertisements without necessary disclosures or by hiring and directing endorsers who fail to make necessary disclosures.

(g) The use of an endorsement with the image or likeness of a person other than the actual endorser is deceptive if it misrepresents a material attribute of the endorser.

(h) Examples:

(1) *Example 1.* (i) A building contractor states in an advertisement disseminated by an advertiser, ''I use XYZ exterior house paint because of its remarkable quick drying properties and durability.'' This endorsement must comply with the pertinent requirements of § 255.3. Subsequently, the advertiser reformulates its paint to enable it to cover exterior surfaces with only one coat. Prior to continued use of the contractor's endorsement, the advertiser must contact the contractor in order to determine whether the contractor would continue to use the paint and to subscribe to the views presented previously.

(ii) Assume that, before the reformulation, the contractor had posted an endorsement of the paint to their social media account. Even if the contractor would not use or recommend the reformulated paint, there is no obligation to modify or delete their post as long as the date of that post is clear and conspicuous to viewers. If the contractor reposts or the advertiser shares the contractor's original endorsement after the reformulation, consumers would expect that the contractor continued to hold the views expressed in the original post.

(2) *Example 2.* In a radio advertisement, a well-known DJ talks about how much they enjoy making coffee with a particular coffee maker in the morning. The DJ's comments likely communicate that they own and regularly use the coffee maker. If they do not own it or used it only during a demonstration by its manufacturer, the ad would be deceptive.

(3) *Example 3.* (i) A dermatologist is a paid advisor to a pharmaceutical company and is asked by the company to post about its products on their professional social media account. The dermatologist posts that the company's newest acne treatment product is ''clinically proven'' to work. Before giving the endorsement, the dermatologist received a write-up of the clinical study in question, which indicates flaws in the design and conduct of the study that are so serious that they preclude any conclusions about the efficacy of the product. Given their medical expertise, the dermatologist should have recognized the study's flaws and is subject to liability for their false statements made in the advertisement. The advertiser is also liable for the misrepresentation made through the endorsement (*see* § 255.3 regarding the product evaluation that an expert endorser must conduct). Even if the study was sufficient to establish the product's proven efficacy, the pharmaceutical company and the dermatologist are both potentially liable if the endorser fails to disclose their relationship to the company (*see* § 255.5 regarding the disclosure of unexpected material connections).

(ii) Assume that the expert had asked the pharmaceutical company for the evidence supporting its claims and there were no apparent design or execution flaws in the study shown to the expert, but that the pharmaceutical company had withheld a larger and better controlled, non-published proprietary study of the acne treatment which failed to find any statistically significant improvement in acne. The expert's ''clinically proven'' to work claim would be deceptive and the company would be liable for the claim, but because the dermatologist did not have a reason to know that the claim was deceptive, the expert would not be liable.

(4) *Example 4.* A well-known celebrity appears in an infomercial for a hot air roaster that purportedly cooks a chicken perfectly in twenty minutes. During the shooting of the infomercial, the celebrity watches five attempts to cook chickens using the roaster. In each attempt, the chicken is undercooked after twenty minutes and requires forty-five minutes of cooking time. In the commercial, the celebrity places an uncooked chicken in the roaster. The celebrity then takes from a second roaster what appears to be a perfectly cooked chicken, tastes the chicken, and says that if you want perfect chicken every time, in just twenty minutes, this is the product you need. A significant percentage of consumers are likely to believe the statement represents the celebrity's own view and experience even though the celebrity is reading from a script. Because the celebrity knows that their statement is untrue, the endorser is subject to liability. The advertiser is also liable for misrepresentations made through the endorsement.

(5) *Example 5.* (i) A skin care products advertiser hires an influencer to promote its products on the influencer's social media account. The advertiser requests that the influencer try a new body lotion and post a video review of it. The advertiser does not provide the influencer with any materials stating that the lotion cures skin conditions and the influencer does not ask the advertiser if it does. However, believing that the lotion cleared up their eczema, the influencer says in their review, ''This lotion cures eczema. All of my followers suffering from eczema should use it.'' The advertiser is subject to liability for misleading or unsubstantiated representations made through the influencer's endorsement. Furthermore, the influencer, who did not limit their claims to their personal experience and did not have a reasonable basis for their claim that the lotion cures eczema, is subject to liability for the misleading or unsubstantiated representation in endorsement. The influencer and the advertiser may also be liable if the influencer fails to disclose clearly and conspicuously being paid for the endorsement (*see* § 255.5).

(ii) In order to limit its potential liability, the advertiser should provide guidance to its influencers concerning the need to ensure that statements they make are truthful and substantiated and the need to disclose unexpected material connections and take other steps to discourage or prevent non-compliance. The advertiser should also monitor its influencers' compliance and take steps necessary to remove and halt the continued publication of deceptive representations when they are discovered and to ensure the disclosure of unexpected material connections (*see* §§ 255.1(d) and 255.5).

(6) *Example 6.* (i) The website for an acne treatment features accurate testimonials of users who say that the product improved their acne quickly and with no side effects. Instead of using images of the actual endorsers, the website accompanies the testimonials with pictures of different individuals with near perfect skin. The images misrepresent the improvements to the endorsers' complexions.

(ii) The same website also sells WeightAway shakes and features an accurate testimonial from an individual who says, ''I lost 50 pounds by just drinking the shakes.'' Instead of accompanying the testimonial with a picture of the actual endorser, who went from 300 pounds to 250 pounds, the website shows a picture of an individual who appears to weigh about 100 pounds. By suggesting that WeightAway

shakes caused the endorser to lose one-third of their original body weight, the image misrepresents the product's effectiveness. Even if it is accompanied by a picture of the actual endorser, the testimonial could still communicate a deceptive typicality claim.

(7) *Example 7.* A learn-to-read program disseminates a sponsored social media post by a parent saying that the program helped their child learn to read. The picture accompanying the post is not of the endorser and their child. The testimonial is from the parent of a 7-year-old, but the post shows an image of a child who appears to be only 4 years old. By suggesting that the program taught a 4-year-old to read, the image misrepresents the effectiveness of the program.

§ 255.2 Consumer endorsements.

(a) An advertisement employing endorsements by one or more consumers about the performance of an advertised product or service will be interpreted as representing that the product or service is effective for the purpose depicted in the advertisement. Therefore, the advertiser must possess and rely upon adequate substantiation, including, when appropriate, competent and reliable scientific evidence, to support express and implied claims made through endorsements in the same manner the advertiser would be required to do if it had made the representation directly, *i.e.,* without using endorsements. Consumer endorsements themselves are not competent and reliable scientific evidence.

(b) An advertisement containing an endorsement relating the experience of one or more consumers on a central or key attribute of the product or service will likely be interpreted as representing that the endorser's experience is representative of what consumers will generally achieve with the advertised product or service in actual, albeit variable, conditions of use. Therefore, an advertiser should possess and rely upon adequate substantiation for this representation. If the advertiser does not have substantiation that the endorser's experience is representative of what consumers will generally achieve, the advertisement should clearly and conspicuously disclose the generally expected performance in the depicted circumstances, and the advertiser must possess and rely on adequate substantiation for that representation. The disclosure of the generally expected performance should be presented in a manner that does not itself misrepresent what consumers can expect.

(c) Advertisements presenting endorsements by what are represented, expressly or by implication, to be ''actual consumers'' should utilize actual consumers in both the audio and video, or clearly and conspicuously disclose that the persons in such advertisements are not actual consumers of the advertised product.

(d) In procuring, suppressing, boosting, organizing, or editing consumer reviews of their products, advertisers should not take actions that have the effect of distorting or otherwise misrepresenting what consumers think of their products, regardless of whether the reviews are considered endorsements under the Guides.

(e) Examples:

(1) *Example 1.* (i) A web page for a baldness treatment consists entirely of testimonials from satisfied customers who say that after using the product, they had amazing hair growth and their hair is as thick and strong as it was when they were teenagers. The advertiser must have competent and reliable scientific evidence that its product is effective in producing new hair growth.

(ii) The web page will also likely communicate that the endorsers' experiences are representative of what new users of the product can generally expect. Therefore, even if the advertiser includes a disclaimer such as, ''Notice: These testimonials do not prove our product works. You should not expect to have similar results,'' the ad is likely to be deceptive unless the advertiser has adequate substantiation that new users typically will experience results similar to those experienced by the testimonialists.

(2) *Example 2.* (i) An advertisement disseminated by a company that sells heat pumps presents endorsements from three individuals who state that after installing the company's heat pump in their homes, their monthly utility bills went down by $100, $125, and $150, respectively. The ad will likely be interpreted as conveying that such savings are representative of what consumers who buy the heat pump can generally expect. The advertiser does not have substantiation for that representation because, in fact, fewer than 20% of purchasers will save $100 or more. A disclosure such as, ''Results not typical'' or ''These testimonials are based on the experiences of a few people and you are not likely to have similar results'' is insufficient to prevent this ad from being deceptive because consumers will still interpret the ad as conveying that the specified savings are representative of what consumers can generally expect.

(A) In another context, the Commission tested the communication of advertisements containing testimonials that clearly and prominently disclosed either ''Results not typical'' or the stronger ''These testimonials are based on the experiences of a few people and you are not likely to have similar results.'' Neither disclosure adequately reduced the communication that the experiences depicted are generally representative. Based upon this research, the Commission believes that similar disclaimers regarding the limited applicability of an endorser's experience to what consumers may generally expect to achieve are unlikely to be effective. Although the Commission would have the burden of proof in a law enforcement action, the Commission notes that an advertiser possessing reliable empirical testing demonstrating that the net impression of its advertisement with such a disclaimer is non-deceptive will avoid the risk of the initiation of such an action in the first instance.

(B) The advertiser should clearly and conspicuously disclose the generally expected savings and have adequate substantiation that homeowners can achieve those results. There are multiple ways that such a disclosure could be phrased, *e.g.,* ''the average homeowner saves $35 per month,'' ''the typical family saves $50 per month during cold months and $20 per month in warm months,'' or ''most families save 10% on their utility bills.''

(ii) Disclosures like those in *Example 2(i)(B)* could still be misleading, however, if they only apply to limited circumstances that are not described in the advertisement. For example, if the advertisement does not limit its claims by geography, it would be misleading if the disclosure of expected results in a nationally disseminated advertisement was based on the experiences of customers in a southern climate and the experiences of those customers was much better than could be expected by heat pump users in a northern climate.

(3) *Example 3.* An advertisement for a cholesterol-lowering product features individuals who claim that their serum cholesterol went down by 120 points and 130 points, respectively; the ad does not mention the endorsers having made any lifestyle changes. A well-conducted clinical study shows that the product reduces the cholesterol levels of individuals with elevated cholesterol by an average of 15% and the advertisement clearly and conspicuously discloses this fact. Despite the presence of this disclosure, the advertisement would be deceptive if

the advertiser does not have competent and reliable scientific evidence that the product can produce the specific results claimed by the endorsers (*i.e.,* a 130-point drop in serum cholesterol without any lifestyle changes).

(4) *Example 4.* (i) An advertisement for a weight-loss product features a formerly obese person. The endorser says in the ad, ''Every day, I drank 2 WeightAway shakes, ate only raw vegetables, and exercised vigorously for six hours at the gym. By the end of six months, I had gone from 250 pounds to 140 pounds.'' The advertisement accurately describes the endorser's experience, and such a result is within the range that would be generally experienced by an extremely overweight individual who consumed WeightAway shakes, only ate raw vegetables, and exercised as the endorser did. Because the endorser clearly describes the limited and truly exceptional circumstances under which they achieved the claimed results, the ad is not likely to convey that consumers who weigh substantially less or use WeightAway under less extreme circumstances will lose 110 pounds in six months. If the advertisement simply says that the endorser lost 110 pounds in six months using WeightAway together with diet and exercise, however, this description would not adequately alert consumers to the truly remarkable circumstances leading to the endorser's weight loss. The advertiser must have substantiation, however, for any performance claims conveyed by the endorsement (*e.g.,* that WeightAway is an effective weight loss product and that the endorser's weight loss was not caused solely by their dietary restrictions and exercise regimen).

(ii) If, in the alternative, the advertisement simply features ''before'' and ''after'' pictures of a woman who says ''I lost 50 pounds in 6 months with WeightAway,'' the ad is likely to convey that the endorser's experience is representative of what consumers will generally achieve. Therefore, if consumers cannot generally expect to achieve such results, the ad would be deceptive. Instead, the ad should clearly and conspicuously disclose what they can expect to lose in the depicted circumstances (*e.g.,* ''women who use WeightAway for six months typically lose 15 pounds''). A disclosure such as ''Average weight loss is 1–2 pounds per week'' is inadequate and likely deceptive. It does not communicate the period over which such weight loss can be expected and likely implies that such weight loss continues at that rate indefinitely.

(iii) If the ad features the same pictures but the testimonialist simply says, ''I lost 50 pounds with WeightAway,'' and WeightAway users generally do not lose 50 pounds, the ad should disclose what results they do generally achieve (*e.g.,* ''women who use WeightAway lose 15 pounds on average''). A disclosure such as ''most women who use WeightAway lose between 10 and 50 pounds'' is inadequate because the range specified is so broad that it does not sufficiently communicate what users can generally expect.

(iv) Assume that a WeightAway advertisement contains a disclosure of generally expected results that is based upon the mean weight loss of users. If the mean is substantially affected by outliers, then the disclosure would be misleading. For example, if the mean weight loss is 15 pounds, but the median weight loss is 8 pounds, it would be misleading to say that the average weight loss was 15 pounds. In such cases, the disclosure's use of median weight loss instead could help avoid deception, *e.g.,* ''most users lose 8 pounds'' or ''the typical user loses 8 pounds.''

(v) Assume that WeightAway's manufacturer procured a fake consumer review, reading ''I lost 50 pounds with WeightAway,'' and had it published on a third-party review website. This endorsement is deceptive because it was not written by a bona fide user (*see* § 255.1(c)). Moreover, the manufacturer would need competent and reliable scientific evidence that WeightAway is capable of causing 50-pound weight loss.

(vi) Assume that WeightAway is a diet and exercise program and a person appearing in a WeightAway ad says, ''I lost 50 pounds in 6 months with WeightAway.'' Very few WeightAway users lose 50 pounds in 6 months and the ad discloses, ''The typical weight loss of WeightAway users who stick with the program for 6 months is 35 pounds.'' In fact, only one-fifth of those who start the WeightAway program stick with it for 6 months. The disclosure is inadequate because it does not communicate what the typical outcome is for users who start the program. In other words, even with the disclosure, the ad does not communicate what people who join the WeightAway program can generally expect.

(5) *Example 5.* An advertisement presents the results of a poll of consumers who have used the advertiser's cake mixes as well as their own recipes. The results purport to show that the majority believed that their families could not tell the difference between the advertised mix and their own cakes baked from scratch. Many of the consumers are pictured in the advertisement along with relevant, quoted portions of their statements endorsing the product. This use of the results of a poll or survey of consumers represents that this is the typical result that ordinary consumers can expect from the advertiser's cake mix.

(6) *Example 6.* An advertisement appears to show a ''hidden camera'' situation in a crowded cafeteria at breakfast time. A spokesperson for the advertiser asks a series of patrons of the cafeteria for their spontaneous, honest opinions of the advertiser's recently introduced breakfast cereal. Even though none of the patrons is specifically identified during the advertisement, the net impression conveyed to consumers may well be that these are actual customers. If actors have been employed, this fact should be clearly and conspicuously disclosed.

(7) *Example 7.* (i) An advertisement for a recently released motion picture shows three individuals coming out of a theater, each of whom gives a positive statement about the movie. These individuals are actual consumers expressing their personal views about the movie. The advertiser does not need to have substantiation that their views are representative of the opinions that most consumers will have about the movie. Because the consumers' statements would be understood to be the subjective opinions of only three people, this advertisement is not likely to convey a typicality message.

(ii) If the motion picture studio had approached these individuals outside the theater and offered them free tickets if they would talk about the movie on camera afterwards or post about it on social media, that arrangement should be clearly and conspicuously disclosed (*see* § 255.5).

(8) *Example 8.* (i) A camping goods retailer's website has various product pages. Each product page provides consumers with the opportunity to review the product and rate it on a five-star scale. Each such page displays the product's average star rating and a breakdown of the number of reviews with each star rating, followed by individual consumers' reviews and ratings. As such, the website is representing that it is providing an accurate reflection of the view of the purchasers who submitted product reviews to the website. If the retailer chose to suppress or otherwise not publish any reviews with fewer than four stars or reviews that contain negative sentiments, the product pages

would be misleading as to purchasers' actual opinions of the products.

(ii) If the retailer chose not to post reviews containing profanity, that would not be unfair or deceptive even if reviews containing profanity tend to be negative reviews. However, it would be misleading if the retailer blocked only negative reviews containing profanity, but posted positive reviews containing profanity. It would be acceptable for the retailer to have a policy against posting reviews unrelated to the product at issue or related services, for example reviews complaining about the owner's policy positions. But it would be misleading if the retailer chose to filter reviews based on other factors that are only a pretext for filtering them based on negativity. Sellers are not required to display customer reviews that contain unlawful, harassing, abusive, obscene, vulgar, or sexually explicit content, or content that is inappropriate with respect to race, gender, sexuality, or ethnicity, or reviews that the seller reasonably believes are fake, so long as the criteria for withholding reviews are applied uniformly to all reviews submitted. Neither are sellers required to display reviews that are unrelated to their products or services. Customer service, delivery, returns, and exchanges are related to the seller's products and services.

(iii) Assume now, that each product page starts with a glowing five-star review that is labeled as ''the most helpful review.'' Labeling the review as the most helpful suggests it was voted most helpful by consumers visiting the website. If the initial review on each such page was selected by the retailer and was not selected as the most helpful review by other consumers, labeling it as the most helpful would be deceptive.

(9) *Example 9.* A manufacturer offers to pay genuine purchasers $20 each to write positive reviews of its products on third-party review websites. Such reviews are deceptive even if the payment is disclosed because their positive nature is required by, rather than being merely influenced by, the payment. If, however, the manufacturer did not require the reviews to be positive and the reviewers understood that there were no negative consequences from writing negative reviews, a clear and conspicuous disclosure of the material connection would be appropriate (*see* § 255.5 and § 255.6 (f)(2) (Example 6)).

(10) *Example 10.* A manufacturer threatens consumers who post negative reviews of its products to third-party review websites with legal action or with physical threats in order to coerce the consumers to delete their reviews. Such threats amount to an unfair practice because consumers would be misled as to purchasers' actual opinions of the product.[2]

(11) *Example 11.* A marketer contacts recent online, mail-order, and in-store purchasers of its products and asks them to provide feedback to the marketer. The marketer then invites purchasers who give very positive feedback to post online reviews of the products on third-party websites. Less pleased and unhappy purchasers are simply thanked for their feedback. Such a practice may be an unfair or deceptive practice if it results in the posted reviews being substantially more positive than if the marketer had not engaged in the practice. If, in the alternative, the marketer had simply invited all recent purchasers to provide feedback on third-party websites, the solicitation would not have been unfair or deceptive, even if it had expressed its hope for positive reviews.

§ 255.3 Expert endorsements.

(a) Whenever an advertisement represents, expressly or by implication, that the endorser is an expert with respect to the endorsement message, then the endorser's qualifications must in fact give the endorser the expertise that the endorser is represented as possessing with respect to the endorsement.

(b) Although an expert may, in endorsing a product, take into account factors not within the endorser's expertise (such as taste or price), the endorsement must be supported by an actual exercise of that expertise in evaluating product features or characteristics with respect to which the endorser has expertise and which are relevant to an ordinary consumer's use of or experience with the product. This evaluation must have included an examination or testing of the product at least as extensive as someone with the same degree of expertise would normally need to conduct in order to support the conclusions presented in the endorsement. To the extent that the advertisement implies that the endorsement was based upon a comparison to another product or other products, such comparison must have been included in the expert's evaluation; and as a result of such comparison, the expert must have concluded that, with respect to those features on which the endorser is expert and which are relevant and available to an ordinary consumer, the endorsed product is at least equal overall to the competitors' products. Moreover, where the net impression created by the endorsement is that the advertised product is superior to other products with respect to any such feature or features, then the expert must in fact have found such superiority (*see* § 255.1(e) regarding the liability of endorsers).

(c) Examples:

(1) *Example 1.* An endorsement of a particular automobile by one described as an ''engineer'' implies that the endorser's professional training and experience are such that the endorser is well acquainted with the design and performance of automobiles. If the endorser's field is, for example, chemical engineering, the endorsement would be deceptive.

(2) *Example 2.* An endorser of a hearing aid is simply referred to as ''Doctor'' during the course of an advertisement. The ad likely implies that the endorser is a medical doctor with substantial experience in the area of hearing. If the endorser is not a medical doctor with substantial experience in audiology, the endorsement would likely be deceptive. A non-medical ''doctor'' (*e.g.,* an individual with a Ph.D. in audiology) or a physician without substantial experience in the area of hearing might be able to endorse the product, but at minimum, the advertisement must clearly and conspicuously disclose the nature and limits of the endorser's expertise

(3) *Example 3.* A manufacturer of automobile parts advertises that its products are approved by the ''American Institute of Science.'' From its name, consumers would infer that the ''American Institute of Science'' is a bona fide independent testing organization with expertise in judging automobile parts and that, as such, it would not approve any automobile part without first testing its efficacy by means of valid scientific methods. If the American Institute of Science is not such a bona fide independent testing organization (*e.g.,* if it was established and operated by an automotive parts manufacturer), the endorsement would be deceptive. Even if the American Institute of Science is an independent bona fide expert testing organization, the endorsement may nevertheless be deceptive unless the Institute has conducted valid scientific tests of the advertised products and the test results support the endorsement message.

(4) *Example 4.* A manufacturer of a non-prescription drug product represents that its product has been

[2] The Consumer Review Fairness Act makes it illegal for companies to include standardized contract provisions that threaten or penalize people for posting honest reviews. 15 U.S.C. 45b.

selected over competing products by a large metropolitan hospital. The hospital has selected the product because the manufacturer, unlike its competitors, has packaged each dose of the product separately. This package form is not generally available to the public. Under the circumstances, the endorsement would be deceptive because the basis for the hospital's choice—convenience of packaging—is neither relevant nor available to consumers, and the basis for the hospital's decision is not disclosed to consumers.

(5) *Example 5.* A person who is identified as the president of a commercial ''home cleaning service'' states in a television advertisement that the service uses a particular brand of cleanser, instead of leading competitors it has tried, because of this brand's performance. Because cleaning services extensively use cleansers in the course of their business, the ad likely conveys that the president has knowledge superior to that of ordinary consumers. Accordingly, the president's statement will be deemed to be an expert endorsement. The service must, of course, actually use the endorsed cleanser. In addition, because the advertisement implies that the cleaning service has experience with a reasonable number of leading competitors' brands available to consumers, the service must, in fact, have such experience, and have determined, based on its expertise, that the endorsed product's cleaning ability is at least equal (or superior, if such is the net impression conveyed by the advertisement) to that of the leading competitors' products available to consumers. Because in this example the cleaning service's president makes no mention that the endorsed cleanser was ''chosen,'' ''selected,'' or otherwise evaluated in side-by-side comparisons against its competitors, it is sufficient if the service has relied solely upon its accumulated experience in evaluating cleansers without having performed side-by-side or scientific comparisons.

(6) *Example 6.* A medical doctor states in an advertisement for a drug that the product will safely allow consumers to lower their cholesterol by 50 points. If the materials the doctor reviewed were merely letters from satisfied consumers or the results of a rodent study, the endorsement would likely be deceptive because those materials are not the type of scientific evidence that others with the purported degree of expertise would consider adequate to support this conclusion about the product's safety and efficacy. Under such circumstances, both the advertiser and the doctor would be liable for the doctor's misleading representation (*See* § 255.1(d) and (e)).

§ 255.4 Endorsements by organizations.

Endorsements by organizations, especially expert ones, are viewed as representing the judgment of a group whose collective experience exceeds that of any individual member, and whose judgments are generally free of the sort of subjective factors that vary from individual to individual. Therefore, an organization's endorsement must be reached by a process sufficient to ensure that the endorsement fairly reflects the collective judgment of the organization. Moreover, if an organization is represented as being expert, then, in conjunction with a proper exercise of its expertise in evaluating the product under § 255.3, it must utilize an expert or experts recognized as such by the organization or standards previously adopted by the organization and suitable for judging the relevant merits of such products (*see* § 255.1(e) regarding the liability of endorsers).

(a) *Example 1.* A mattress manufacturer advertises that its product is endorsed by a chiropractic association. Because the association would be regarded as expert with respect to judging mattresses, its endorsement must be supported by an evaluation by an expert or experts recognized as such by the organization, or by compliance with standards previously adopted by the organization and aimed at measuring the performance of mattresses in general and not designed with the unique features of the advertised mattress in mind.

(b) *Example 2.* A trampoline manufacturer sets up and operates what appears to be an independent trampoline review website. The site reviews the manufacturer's trampolines, as well as those of competing manufacturers. Because the website falsely appears to be independent, it is deceptive (*see* § 255.5).

(c) *Example 3.* Assume that a third party operates a wireless headphone review website that provides rankings of different manufacturers' wireless headphones from most recommended to least recommended. The website operator accepts money from manufacturers in exchange for higher rankings of their products. Regardless of whether the website makes express claims of objectivity or independence, such paid-for rankings are deceptive. A headphone manufacturer who pays for a higher ranking on the website may also be held liable for the deception. A disclosure that the website operator receives payments from headphone manufacturers would be inadequate because the payments actually determine the headphones' relative rankings. If, however, the review website does not take payments for higher rankings, but receives payments from some of the headphone manufacturers, such as for affiliate link referrals, it should clearly and conspicuously disclose that it receives such payments (*see* § 255.5(k)(11)).

§ 255.5 Disclosure of material connections.

When there exists a connection between the endorser and the seller of the advertised product that might materially affect the weight or credibility of the endorsement and that connection is not reasonably expected by the audience, such connection must be disclosed clearly and conspicuously. Material connections can include a business, family, or personal relationship. They can include monetary payment or the provision of free or discounted products or services (including products or services unrelated to the endorsed product) to an endorser, regardless of whether the advertiser requires an endorsement in return. Material connections can also include other benefits to the endorser, such as early access to a product or the possibility of being paid, of winning a prize, or of appearing on television or in other media promotions. Some connections may be immaterial because they are too insignificant to affect the weight or credibility given to endorsements. Material connections do not need to be disclosed when they are understood or expected by all but an insignificant portion of the audience for an endorsement. A disclosure of a material connection does not require the complete details of the connection, but it must clearly communicate the nature of the connection sufficiently for consumers to evaluate its significance. Additional guidance is provided by the examples in paragraphs (a) through (l) of this section.

(a) *Example 1.* A drug company commissions research on its product by an outside organization. The drug company determines the overall subject of the research (*e.g.,* to test the efficacy of a newly developed product) and pays a substantial share of the expenses of the research project, but the research organization determines the protocol for the study and is responsible for conducting it. A subsequent advertisement by the drug company mentions the research results as the ''findings'' of that research organization. Although the design and conduct of the

research project are controlled by the outside research organization, the weight consumers place on the reported results could be materially affected by knowing that the advertiser had funded the project. Therefore, the advertiser's payment of expenses to the research organization should be disclosed in the advertisement.

(b) *Example 2.* A film star endorses a particular food product in a television commercial. The endorsement regards only points of taste and individual preference. This endorsement must, of course, comply with § 255.1; but, regardless of whether the star's compensation for the commercial is a $1 million cash payment or a royalty for each product sold by the advertiser during the next year, no disclosure is required because such payments likely are ordinarily expected by viewers.

(c) *Example 3.* (1) During an appearance by a well-known professional tennis player on a television talk show, the host comments that the past few months have been the best of the player's career and during this time the player has risen to their highest level ever in the rankings. The player responds by attributing that improvement to seeing the ball better, ever since having laser vision correction surgery at a specific identified clinic. The athlete continues talking about the ease of the procedure, the kindness of the clinic's doctors, the short recovery time, and now being able to engage in a variety of activities without glasses, including driving at night. The athlete does not disclose having a contractual relationship with the clinic that includes payment for speaking publicly about the surgery. Consumers might not realize that a celebrity discussing a medical procedure in a television interview has been paid for doing so, and knowledge of such payments would likely affect the weight or credibility consumers give to the celebrity's endorsement. Without a clear and conspicuous disclosure during the interview that the athlete has been engaged as a spokesperson for the clinic, this endorsement is likely to be deceptive. A disclosure during the show's closing credits would not be clear and conspicuous. Furthermore, if consumers are likely to take away from the interview that the athlete's experience is typical of those who undergo the same procedure at the clinic, the advertiser must have substantiation for that claim.

(2) Assume that the tennis player also touts the results of the surgery—mentioning the clinic by name—in a social media post. Consumers might not realize that the athlete is a paid endorser and, because that information might affect the weight consumers give to the tennis player's endorsement, the relationship with the clinic should be disclosed—regardless of whether it paid the athlete for that particular post. It should be disclosed even if the relationship involves no payments but only the tennis player getting the laser correction surgery for free or at a reduced cost.

(3) Assume that the clinic uses the tennis player's endorsement in its own social media posts. The clinic should clearly and conspicuously disclose its relationship to the athlete in its posts.

(4) Assume that during the appearance on the television talk show, the tennis player is wearing clothes bearing the insignia of an athletic wear company with which the athlete also has an endorsement contract. Although this contract requires wearing the company's clothes not only on the court but also in public appearances, when possible, the athlete does not mention the clothes or the company during the appearance on the show. No disclosure is required because no representation is being made about the clothes in this context.

(d) *Example 4.* (1) A television ad for an anti-snoring product features a physician who says, ''I have seen dozens of products come on the market over the years and, in my opinion, this is the best ever.'' Consumers would expect the physician to be reasonably compensated for appearing in the ad. Consumers are unlikely, however, to expect that an expert endorser like the physician receives a percentage of gross product sales or owns part of the company, and either of these facts would likely materially affect the credibility that consumers attach to the endorsement. Accordingly, the advertisement should clearly and conspicuously disclose such a connection between the company and the physician.

(2) Assume that the physician is also paid to post about the product on social media, a context in which consumers might not expect that the physician was compensated and more likely to expect that the physician is expressing an independent, professional opinion. Accordingly, the post should clearly and conspicuously disclose the doctor's connection with the company.

(e) *Example 5.* (1) In a television advertisement, an actual patron of a restaurant, who is neither known to the public nor presented as an expert, is shown seated at the counter. The diner is asked for a ''spontaneous'' opinion of a new food product served in the restaurant. Assume, first, that the advertiser had posted a sign on the door of the restaurant informing all who entered that day that patrons would be interviewed by the advertiser as part of its television promotion of its new ''meat-alternative'' burger. A patron seeing such a sign might be more inclined to give a positive review of that item in order to appear on television. The advertisement should thus clearly and conspicuously inform viewers that the patrons on screen knew in advance that they might appear in a television advertisement if they gave the burger a good review because that information may materially affect the weight or credibility of the endorsement.

(2) Assume, in the alternative, that the advertiser had not posted the sign and that patrons asked for their opinions about the burger did not know or have reason to believe until after their response that they were being recorded for use in an advertisement. No disclosure is required here, even if patrons were also told, after the interview, that they would be paid for allowing the use of their opinions in advertising.

(f) *Example 6.* (1) An infomercial producer wants to include consumer endorsements in an infomercial for an automotive additive product not yet on the market. The producer's staff selects several people who work as ''extras'' in commercials and asks them to use the product and report back, telling them that they will be paid a small amount if selected to endorse the product in the infomercial. Viewers would not expect that these ''consumer endorsers'' are actors who used the product in the hope of appearing in the commercial and receiving compensation. Because the advertisement fails to disclose these facts, it is deceptive.

(2) Assume that the additive's marketer wants to have more consumer reviews appear on its retail website which sells a variety of its automotive products. The marketer recruits ordinary consumers to get a free product (*e.g.,* a set of jumper cables or a portable air compressor for car tires) and a $30 payment in exchange for posting a consumer review of the free product on the marketer's website. The marketer makes clear and the reviewers understand that they are free to write negative reviews and that there are no negative consequences of doing so. Any resulting review that fails to clearly and conspicuously disclose the incentives provided to that reviewer is likely deceptive (When the resulting reviews must be positive or reviewers believe they might face negative consequences from posting negative reviews, a disclosure would be insufficient, see

§ 255.2(d) and (e)(9)). Even if adequate disclosures appear in each incentivized review, the practice could still be deceptive if the solicited reviews contain star ratings that are included in an average star rating for the product and including the incentivized reviews materially increases that average star rating.

(g) *Example 7.* A woodworking influencer posts on-demand videos of various projects. A tool manufacturer sends the influencer an expensive full-size lathe in the hope that the influencer would post about it. The woodworker uses the lathe for several products and comments favorably about it in videos. If a significant proportion of viewers are likely unaware that the influencer received the lathe free of charge, the woodworker should clearly and conspicuously disclose receiving it for free, a fact that could affect the credibility that viewers attach to the endorsements. The manufacturer should advise the woodworker at the time it provides the lathe that this connection should be disclosed, and it should have reasonable procedures in place to monitor the influencer's postings for compliance and follow those procedures (*see* § 255.1(d)).

(h) *Example 8.* An online community has a section dedicated to discussions of robotic products. Community members ask and answer questions and otherwise exchange information and opinions about robotic products and developments. Unbeknownst to this community, an employee of a leading home robot manufacturer has been posting messages on the discussion board promoting the manufacturer's new product. Knowledge of this poster's employment likely would affect the weight or credibility of the endorsements. Therefore, the poster should clearly and conspicuously disclose their relationship to the manufacturer to community members. To limit its own liability for such posts, the employer should be engaged in appropriate training of employees. To the extent that the employer has directed such endorsements or otherwise has reason to know about them, it should also be monitoring them and taking other steps to ensure compliance (*see* § 255.1(d)). The disclosure requirements in this example would apply equally to consumer reviews of the product posted on retail websites or review platforms.

(i) *Example 9.* A college student signs up to be part of a program in which points are awarded each time a participant posts on social media about a particular advertiser's products. Participants can then exchange their points for prizes, such as concert tickets or electronics. These incentives would materially affect the weight or credibility of the college student's endorsements. They should be clearly and conspicuously disclosed, and the advertiser should take steps to ensure that these disclosures are being provided.

(j) *Example 10.* Great Paper Company sells photocopy paper with packaging that has a seal of approval from the No Chlorine Products Association, a non-profit third-party association. Great Paper Company paid the No Chlorine Products Association a reasonable fee for the evaluation of its product and its manufacturing process. Consumers would reasonably expect that marketers have to pay for this kind of certification. Therefore, there is no unexpected material connection between the company and the association, and the use of the seal without disclosure of the fee paid to the association would not be deceptive.

(k) *Example 11.* A coffee lover creates a blog that reviews coffee makers. The blogger writes the content independently of the marketers of the coffee makers, but includes affiliate links to websites on which consumers can buy these products from their marketers. Whenever a consumer clicks on such a link and buys the product, the blogger receives a small portion of the sale. Because knowledge of this compensation could affect the weight or credibility site visitors give to the blogger's reviews, the reviews should clearly and conspicuously disclose the compensation.

(l) *Example 12.* (1) Near the beginning of a podcast, the host reads what is obviously a commercial for a product. Even without a statement identifying the advertiser as a sponsor, listeners would likely still expect that the podcaster was compensated, so there is no need for a disclosure of payment for the commercial. Depending upon the language of the commercial, however, the audience may believe that the host is expressing their own views in the commercial, in which case the host would need to hold the views expressed (*see* § 255.0(b)).

(2) Assume that the host also mentions the product in a social media post. The fact that the host did not have to make a disclosure in the podcast has no bearing on whether there has to be a disclosure in the social media post.

§ 255.6 Endorsements directed to children.

Endorsements in advertisements addressed to children may be of special concern because of the character of the audience. Practices which would not ordinarily be questioned in advertisements addressed to adults might be questioned in such cases.

By direction of the Commission.

April J. Tabor,

Secretary.

Note: The following statement will not appear in the Code of Federal Regulations: Statement of Chair Lina M. Khan Regarding the Endorsement Guides Review May 19, 2022.

Today, the Commission is voting on releasing proposed revised ''Guides Concerning Use of Endorsements and Testimonials in Advertising'' and publishing a Notice seeking comment on them (''Revised Guides''). These Guides tell companies how to use endorsements, testimonials, influencers, and consumer reviews in ads without deceiving consumers.

These revisions come at a time when influencer marketing is becoming increasingly prevalent and as consumers increasingly rely on online consumer reviews to decide what to buy. Reports indicate that the global influencer marketing industry is set to grow to approximately $16.4 billion in 2022.[1] Indeed, more than 75% of brand marketers intend to dedicate a budget to influencer marketing in 2022.[2] Influencers who are paid, receive free product or services, or have a relationship with a brand sometimes fail to disclose that material connection, hoping to appear more authentic to consumers. Consumers' increasing reliance on online reviews can also incentivize advertisers to harness fake reviews, suppress negative reviews, and amplify positive ones.

I want to highlight three novel aspects of these Revised Guides that strike me as especially important.

First is the Revised Guides' guidance on platforms' relationships with influencer marketing. Digital platforms profit from influencer marketing and should bear greater responsibility in this area.[3] The Revised Guides warn that some platforms' disclosure tools are inadequate and may expose influencers

[1] Werner Geyser, *The State of Influencer Marketing 2022: Benchmark Report,* Influencer Mktg. Hub (Mar. 2, 2022), *https://influencermarketinghub.com/influencer-marketing-benchmark-report/.*

[2] *Id.* In addition, the global number of influencer marketing related service offerings grew by 26% in 2021 alone, reaching 18,900 firms offering or specializing in influencer marketing services.

[3] Ellen Simon, *How Instagram Makes Money,* Investopedia (March 17, 2022), *https://www.investopedia.com/articles/personal-finance/030915/how-instagram-makes-money.asp* (noting that, in 2019, Instagram generated $20 billion in advertising revenue and that 69% of America's marketers planned to spend most of their 2020 influencer budget on Instagram).

to liability or, in some instances, leave platforms themselves open to liability.

Second is the Revised Guides' explicit guidance on consumer reviews, and specifically the discussion of how encouraging fake reviews and suppressing negative reviews can result in law violations. This guidance reflects recent enforcement actions the agency has taken—including a recent final order settling allegations that Fashion Nova blocked negative reviews of its products from being posted on its website.[4]

Third is the Revised Guides' warning that child-directed influencer advertising is of special concern to the Commission. Those who market to children cannot assume that compliance with these guides is a safe harbor.

The kid influencer marketplace is estimated to be as large as $1.7 billion and is rapidly growing.[5] This type of child-directed influencer advertising can pose a host of risks. As one recent report noted, ''unless children are able to differentiate between advertising and other forms of entertainment, and grasp the persuasive intent of advertising, then they are at risk of deception. This is especially true for children under 12, whose advertising literacy—all knowledge and skills related to understanding advertising—has not yet fully developed.'' [6]

There is currently no clear or consistent approach to addressing the problem, and Congress and advocacy groups have called on the FTC to provide guidance on this issue.[7] While we presently lack the full evidentiary record to support specific guidance or to propose best practices, I am eager for more input that will support more concrete action in this important area. Accordingly, in tandem with issuing the Revised Guides today, we are announcing an event to gather information on stealth advertising targeting children. The public event will be held in October and will focus on the blurring of advertising and programming content in child-directed digital media.

I am eager for robust participation at this event and will look forward to learning from the public as we consider how to move forward on this important and timely issue.

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Parts 1112, 1130, and 1240

[CPSC Docket No. CPSC–2020–0010]

Safety Standard for Crib Bumpers/Liners; Withdrawal

AGENCY: Consumer Product Safety Commission.

ACTION: Termination of rulemaking.

SUMMARY: On May 16, 2022, the President signed into law the Safe Sleep for Babies Act of 2021 (SSBA), requiring that crib bumpers, ''regardless of the date of manufacture, shall be considered a banned hazardous product'' under the Consumer Product Safety Act (CPSA). In light of that new statutory direction, CPSC is terminating its pending rulemaking proceeding on crib bumpers/liners, and in a separate notice of proposed rulemaking, proposing to codify the requirements for crib bumpers pursuant to the SSBA. The Commission is also terminating the related proposed rule amendment to include the safety standard for crib bumpers/liners in the list of notice of requirements, as well as the related proposed amendment to identify ''crib bumpers/liners'' as a durable infant or toddler product subject to CPSC's consumer registration requirements.

DATES: The notice of proposed rulemaking published at 85 FR 18878, April 3, 2020, is withdrawn as of July 26, 2022.

ADDRESSES: U.S. Consumer Product Safety Commission, 4330 East West Highway, Bethesda, MD 20814.

FOR FURTHER INFORMATION CONTACT: Pamela J. Stone, Attorney Advisor, U.S. Consumer Product Safety Commission, 4330 East West Highway, Bethesda, MD 20814; telephone: (301) 504–7619; email: *pstone@cpsc.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to section 3 of the Safe Sleep for Babies Act of 2021, H.R. 3182, Public Law 117–126 (SSBA), the Commission is terminating the rulemaking on crib bumpers/liners it commenced under section 104 of the Consumer Product Safety Improvement Act of 2008 (CPSIA), CPSC Docket No. CPSC–2020–0010.[1] Under a separate **Federal Register** document, published elsewhere in this issue of the **Federal Register**, CPSC is issuing a proposed rule stating that crib bumpers are banned under the SSBA.

On April 3, 2020, the Commission published a notice of proposed rulemaking (NPR) that set forth proposed requirements for a safety standard for crib bumpers/liners pursuant to section 104 of the CPSIA (85 FR 18878). The Commission received comments on the proposed rule but has not published a final rule.

On May 3, 2022, Congress passed the SSBA, which the President signed on May 16, 2022. Section 3 of the SSBA requires that, not later than 180 days after enactment, ''crib bumpers, regardless of the date of manufacture, shall be considered a banned hazardous product under section 8 of the Consumer Product Safety Act (15 U.S.C. 2057).'' 15 U.S.C. 2057e.

In light of the SSBA's mandate that crib bumpers shall be considered a banned hazardous product under section 8 of the CPSA, CPSC is no longer proposing to regulate crib bumpers under the CPSIA and is terminating that rulemaking to establish a consumer product safety standard for crib bumpers/liners. In a separate **Federal Register** notice, CPSC proposes to issue a rule stating that crib bumpers are banned pursuant to the SSBA's designation of crib bumpers as a banned hazardous product.

The termination of the crib bumpers/liners rulemaking includes termination of the proposal to amend 16 CFR part 1130 to include ''crib bumpers/liners'' in the definition of a ''durable infant or toddler product.'' 85 FR at 18893. The termination of this rulemaking additionally terminates the proposal to issue a notice of requirements for crib bumpers/liners, which proposed to amend 16 CFR part 1112 to include 16 CFR part 1240, the CFR section where the crib bumpers/liners standard would

[1] On July 19, 2022, the Commission voted 5–0 to issue this notice terminating rulemaking.

have been codified if the standard had become final. *Id.*

Alberta E. Mills,

Secretary, Consumer Product Safety Commission.

[FR Doc. 2022–15905 Filed 7–25–22; 8:45 am]

BILLING CODE 6355–01–P

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1309

[CPSC Docket No. 2022–0024]

Ban of Crib Bumpers

AGENCY: Consumer Product Safety Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: On May 16, 2022, the President signed into law the Safe Sleep for Babies Act of 2021, requiring that crib bumpers, ''regardless of the date of manufacture, shall be considered a banned hazardous product'' under the Consumer Product Safety Act (CPSA). Pursuant to this authority, CPSC is proposing to codify the ban on crib bumpers pursuant to the Safe Sleep for Babies Act, and under a separate document, published elsewhere in this issue of the **Federal Register**, terminate the rulemaking on crib bumpers/liners under the Consumer Product Safety Improvement Act of 2008 (CPSIA).

DATES: Submit comments by August 25, 2022.

ADDRESSES: You can submit comments, identified by Docket No. CPSC–2022–0024, by any of the following methods:

Electronic Submissions: Submit electronic comments to the Federal eRulemaking Portal at: *https://www.regulations.gov.* Follow the instructions for submitting comments. CPSC typically does not accept comments submitted by electronic mail (email), except as described below. CPSC encourages you to submit electronic comments by using the Federal eRulemaking Portal, as described above.

Mail/Hand Delivery/Courier Written Submissions: Submit comments by mail, hand delivery, or courier to: Office of the Secretary, Consumer Product Safety Commission, 4330 East West Highway, Bethesda, MD 20814; telephone (301) 504–7479. If you wish to submit confidential business information, trade secret information, or other sensitive or protected information that you do not want to be available to the public, you may submit such comments by mail, hand delivery, or courier, or you may email them to: *cpsc-os@cpsc.gov.*

Instructions: All submissions must include the agency name and docket number. CPSC may post all comments without change, including any personal identifiers, contact information, or other personal information provided, to: *https://www.regulations.gov.* Do not submit through this website: confidential business information, trade secret information, or other sensitive or protected information that you do not want to be available to the public. If you wish to submit such information, please submit it according to the instructions for mail/hand delivery/courier written submissions.

Docket: To review background documents or comments received on the proposed codification of the Ban on Crib Bumpers, go to: *https://www.regulations.gov,* and insert the docket number, CPSC–2022–0024, into the ''Search'' box, and follow the prompts.

FOR FURTHER INFORMATION CONTACT: Timothy P. Smith, Project Manager, Directorate for Engineering Sciences, U.S. Consumer Product Safety Commission, 5 Research Place, Rockville, MD 20850; telephone: (301)987–2557; email: *tsmith@cpsc.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to section 3 of the Safe Sleep for Babies Act of 2021, H.R. 3182, Public Law 117–126 (SSBA), CPSC is issuing a proposed rule to codify the ban on crib bumpers under the SSBA. Additionally, under a separate **Federal Register** document, published elsewhere in this issue of the **Federal Register**, the Commission is terminating the pending rulemaking on crib bumpers/liners that CPSC initiated under section 104 of the CPSIA, CPSC Docket No. CPSC–2020–0010.

I. Background and Statutory Authority

On April 3, 2020, the Commission published a notice of proposed rulemaking (NPR) that set forth proposed requirements for a safety standard for crib bumpers/liners pursuant to section 104 of the CPSIA (85 FR 18878). The Commission received comments on the proposed rule but has not published a final rule.

On May 3, 2022, Congress passed the SSBA, which the President signed on May 16, 2022. Section 3 of the SSBA requires that, not later than 180 days after enactment, ''crib bumpers, regardless of the date of manufacture, shall be considered a banned hazardous product under section 8 of the Consumer Product Safety Act (15 U.S.C. 2057).'' 15 U.S.C. 2057e.

In light of the SSBA's mandate that crib bumpers shall be considered a banned hazardous product under section 8 of the CPSA, CPSC no longer proposes to regulate crib bumpers under the CPSIA. By separate **Federal Register** *document,* CPSC is terminating the rulemaking to establish a consumer product safety standard for crib bumpers/liners.[1] Instead, CPSC now proposes to achieve a similar improvement to safety by codifying the ban on ''crib bumpers,'' as defined in section 3 of the SSBA, as banned hazardous products.[2]

II. Description of Proposed Ban on Crib Bumpers

In this rulemaking, CPSC proposes to codify the SSBA's mandate that ''crib bumpers'' are banned hazardous products, as set forth below.

A. Definitions

The Commission proposes codifying the definition of ''crib bumper'' used in the SSBA, which states that ''crib bumper'':

- Means any material that is intended to cover the sides of a crib to prevent injury to any crib occupant from impacts against the side of a crib or to prevent partial or complete access to any openings in the sides of a crib to prevent a crib occupant from getting any part of the body entrapped in any opening;
- Includes a padded crib bumper, a supported and unsupported vinyl bumper guard, and vertical crib slat covers; and
- Does not include a non-padded mesh crib liner.

B. Effective Date

The SSBA states that crib bumpers shall be considered banned hazardous products ''not later than 180 days after the enactment of this Act,'' *i.e.,* not later than November 12, 2022. Applying the 180-day effective date referenced by Congress would avoid confusion among manufacturers and retailers, while also being consistent with the 6-month implementation period the Commission proposed in its 2020 NPR to establish a safety standard for crib bumpers/liners. Therefore, CPSC proposes to make the effective date for the ban on crib bumpers November 12, 2022.

C. Inventory

The SSBA states that the ban applies to crib bumpers ''regardless of the date of manufacture.'' Therefore, crib bumpers manufactured before the ban

[1] The NPR used the terms ''crib bumpers,'' ''crib bumpers and liners,'' and ''crib bumpers/liners,'' but this NPR applies only to ''crib bumpers'' as defined in the SSBA.

[2] On July 19, 2022, the Commission voted 5–0 to issue this notice of proposed rulemaking.

becomes effective will be banned hazardous products beginning on the effective date of the SSBA, as well as any crib bumpers manufactured or sold after the effective date.

III. Preemption

Section 3(b)(2)(A) of the Executive Order 12988, *Civil Justice Reform* (Feb. 5, 1996), directs agencies to specify the preemptive effect of any rule. 61 FR 4729 (Feb. 7, 1996). Because the SSBA states that crib bumpers are banned hazardous products, any state performance standards for a ''crib bumper,'' as defined in the SSBA (which expressly excludes non-padded mesh crib liners), would be inconsistent with federal law, and therefore, preempted.

IV. Regulatory Flexibility Act

The Regulatory Flexibility Act, 5 U.S.C. 601–612, requires that agencies review proposed rules for their potential economic impact on small entities, including small businesses, and identify alternatives that may reduce such impact, unless the agency certifies that the rule if promulgated, will not have a significant economic impact on a substantial number of small entities. The SSBA will take effect no later than November 12, 2022. Because the proposed rule is limited to codifying section 3 of the SSBA, with an effective date of November 12, 2022, the proposed rule imposes no additional economic impact on small entities beyond the requirements of the SSBA itself. Therefore, the Commission certifies that this proposed rule will not have a significant economic impact on a substantial number of small entities.

V. Environmental Considerations

The Commission's regulations address whether the agency must prepare an environmental assessment or an environmental impact statement. Under these regulations, certain categories of CPSC actions that have ''little or no potential for affecting the human environment'' do not require an environmental assessment or an environmental impact statement. 16 CFR 1021.5(c). The proposed rule codifying section 3 of the SSBA falls within the categorical exclusion, so no environmental assessment or environmental impact statement is required.

VI. Paperwork Reduction Act

The proposed rule to codify crib bumpers as a banned hazardous product contains no information collection requirements that would be subject to public comment and review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521). However, if the Commission requires testing and certification to this ban, the Commission will expand the existing control number for Third Party Testing of Children's Products, OMB Control No. 3041–0159.

VII. Request for Comments

We invite comments on all aspects of the Commission's proposal to codify the ban on crib bumpers in section 3 of the SSBA with an effective date of November 12, 2022. Comments must be submitted in accordance with the instructions in the **ADDRESSES** section at the beginning of this document. CPSC specifically requests comment on the following:

A. Effective Date: The Commission proposes to implement the crib bumper ban in the SSBA with an effective date of November 12, 2022. Should the Commission adopt this proposed effective date, or an alternative date ''[n]ot later than 180 days after the date of enactment''? If the commenter believes that an effective date later than November 12, 2022, is permitted under section 3 of the SSBA, what is the legal basis for that assertion, and what later date should be adopted?

B. Testing and Certification: When a ban does not remove all products in a product category from the market, testing and certification requirements may apply. For example, CPSC requires a General Certificate of Conformity (GCC) for certain banned hazardous products. *See, e.g., https://www.cpsc.gov/Business--Manufacturing/Testing-Certification/Lab-Accreditation/Rules-Requiring-a-General-Certificate-of-Conformity,* CPSC's website providing guidance that bans set forth in 16 CFR parts 1304, 1305, and 1306 require a GCC. In this case, non-padded mesh crib liners are not within the scope of the SSBA's ban on crib bumpers. Because the crib bumper ban does not eliminate non-padded mesh crib liners from the market, what, if any, testing and certification requirements remain? For example, should CPSC require certification to the ban for non-padded mesh crib liners to demonstrate that a product is *not* within the scope of the ban? Why, or why not? Additionally, should the Commission add ''non-padded mesh crib liners'' to the list of durable infant or toddler products that require a registration card? Why, or why not?

List of Subjects in 16 CFR Part 1309

Administrative practice and procedure, Consumer protection, Infants and children.

For the reasons stated in the preamble, the Commission proposes to add part 1309 to title 16 of the Code of Federal Regulations to read as follows:

PART 1309—BAN OF CRIB BUMPERS

Sec.

Authority: Sec. 3, Pub. L. 117–126, 136 Stat. 1208. 15 U.S.C. 2057e.

§ 1309.1 Purpose and scope.

The purpose of this part is to prohibit the sale of crib bumpers, as defined in § 1309.2, as set forth in the Safe Sleep for Babies Act of 2021.

§ 1309.2 Definitions.

Crib bumper, as used in this part:

a. Means any material that is intended to cover the sides of a crib to prevent injury to any crib occupant from impacts against the side of a crib or to prevent partial or complete access to any openings in the sides of a crib to prevent a crib occupant from getting any part of the body entrapped in any opening;

b. Includes a padded crib bumper, a supported and unsupported vinyl bumper guard, and vertical crib slat covers; and

c. Does not include a non-padded mesh crib liner.

§ 1309.3 Banned hazardous product.

Any crib bumper, as defined in section 1309.2, regardless of the date of manufacture, is a banned hazardous product under section 8 of the Consumer Product Safety Act (15 U.S.C. 2057).

§ 1309.4 Effective date.

The effective date of this ban is November 12, 2022.

Alberta E. Mills,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355–01–P

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1310

[CPSC Docket No. 2022–0025]

Ban of Inclined Sleepers for Infants

AGENCY: Consumer Product Safety Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: On May 16, 2022, the President signed into law the Safe Sleep for Babies Act of 2021 (SSBA), requiring that ''inclined sleepers for infants, regardless of the date of manufacture, shall be considered a banned hazardous product'' under the Consumer Product Safety Act (CPSA). Pursuant to this authority, the U.S. Consumer Product Safety Commission (CPSC, or Commission) is proposing to codify the ban on inclined sleepers for infants.

DATES: Submit comments by August 25, 2022.

ADDRESSES: You can submit comments, identified by Docket No. CPSC–2020–0025, by any of the following methods:

Electronic Submissions: Submit electronic comments to the Federal eRulemaking Portal at: *https://www.regulations.gov.* Follow the instructions for submitting comments. CPSC typically does not accept comments submitted by electronic mail (email), except as described below. CPSC encourages you to submit electronic comments by using the Federal eRulemaking Portal, as described above.

Mail/Hand Delivery/Courier Written Submissions: Submit comments by mail, hand delivery, or courier to: Office of the Secretary, Consumer Product Safety Commission, 4330 East West Highway, Bethesda, MD 20814; telephone (301) 504–7479. If you wish to submit confidential business information, trade secret information, or other sensitive or protected information that you do not want to be available to the public, you may submit such comments by mail, hand delivery, or courier, or you may email them to: *cpsc-os@cpsc.gov.*

Instructions: All submissions must include the agency name and docket number. CPSC may post all comments without change, including any personal identifiers, contact information, or other personal information provided, to: *https://www.regulations.gov.* Do not submit through this website: confidential business information, trade secret information, or other sensitive or protected information that you do not want to be available to the public. If you wish to submit such information, please submit it according to the instructions for mail/hand delivery/courier written submissions.

Docket: For access to the docket to read background documents or comments received, go to: *https://www.regulations.gov,* and insert the docket number, CPSC–2020–0025f, into the ''Search'' box, and follow the prompts.

FOR FURTHER INFORMATION CONTACT: Celestine T. Kish, Project Manager, Directorate for Engineering, U.S. Consumer Product Safety Commission, 5 Research Place, Rockville, MD 20850; telephone: (301) 987–2547; email: *ckish@cpsc.gov.*

SUPPLEMENTARY INFORMATION:

I. Background and Statutory Authority

On May 3, 2022, Congress passed the Safe Sleep for Babies Act of 2021, H.R. 3182, Public Law 117–126, which the President signed on May 16, 2022. Section 2(a) of the SSBA requires that, not later than 180 days after enactment, ''inclined sleepers for infants, regardless of the date of manufacture, shall be considered a banned hazardous product under section 8 of the Consumer Product Safety Act (15 U.S.C. 2057).'' 15 U.S.C. 2057d(a).

II. Description of Proposed Ban on Inclined Infant Sleepers

In this rulemaking, CPSC proposes to codify the SSBA's mandate that ''inclined sleepers for infants'' are a banned hazardous product, as set forth below.[1]

A. Definitions

The Commission proposes codifying the definition of ''inclined sleepers for infants'' as stated in section 2(b) the SSBA: ''a product with an inclined sleep surface greater than ten degrees that is intended, marketed, or designed to provide sleeping accommodations for an infant up to 1 year old.''

B. Effective Date

Section 2(a) of the SSBA states that inclined sleepers for infants shall be considered a banned hazardous product ''not later than 180 days after the enactment of this Act,'' *i.e.,* not later than November 12, 2022. CPSC proposes to make the effective date for this ban November 12, 2022, consistent with 180-day period referenced by Congress.

C. Inventory

The SSBA states that the ban applies to inclined sleepers for infants as defined in section 2 ''regardless of the date of manufacture.'' Therefore, inclined sleepers for infants manufactured before the ban becomes effective will be banned hazardous products beginning on the effective date, as well as any inclined sleepers for infants manufactured or sold on or after the effective date.

III. Preemption

Section 3(b)(2)(A) of Executive Order 12988, *Civil Justice Reform* (Feb. 5, 1996), directs agencies to specify the preemptive effect of any rule. 61 FR 4729 (Feb. 7, 1996). Because the SSBA states that inclined sleepers for infants are banned hazardous products, any state performance standards for inclined sleepers for infants, as those products are defined in the SSBA, would be inconsistent with federal law and therefore preempted by this ban.

IV. Regulatory Flexibility Act

The Regulatory Flexibility Act, 5 U.S.C. 601–612, requires that agencies review proposed rules for their potential economic impact on small entities, including small businesses, and identify alternatives that may reduce such impact, unless the agency certifies that the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities. The SSBA will take effect on November 12, 2022. Because the proposed rule would adopt the same effective date and is limited to codifying the relevant provisions of the SSBA with regard to inclined sleepers for infants, the proposed rule imposes no additional economic impact on small entities beyond the requirements of section 2 of the SSBA. Therefore, the Commission certifies that this proposed rule will not have a significant economic impact on a substantial number of small entities.

V. Environmental Considerations

The Commission's regulations address whether the agency must prepare an environmental assessment or an environmental impact statement. Under these regulations, certain categories of CPSC actions that have ''little or no potential for affecting the human environment'' do not require an environmental assessment or an environmental impact statement. 16 CFR 1021.5(c). The proposed rule codifying section 2 of the SSBA falls within the categorical exclusion, so no environmental assessment or environmental impact statement is required.

[1] On July 19, 2022, the Commission voted 5–0 to issue this notice of proposed rulemaking.

VI. Paperwork Reduction Act

The proposed rule to codify inclined sleepers for infants as a banned hazardous product contains no information collection requirements that would be subject to public comment and review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521). However, if the Commission requires testing and certification to this ban, the Commission will expand the existing control number for Third Party Testing of Children's Products, OMB Control No. 3041–0159.

VII. Request for Comments

We invite comments on all aspects of the Commission's proposal to codify the ban on inclined sleepers for infants under section 2 of the SSBA with an effective date of November 12, 2022. Comments must be submitted in accordance with the instructions in the **ADDRESSES** section at the beginning of this notice. We also invite comment on the following topics:

A. Effective Date: The Commission proposes to implement the inclined sleeper ban in the SSBA with an effective date of November 12, 2022. Should the Commission adopt this proposed effective date, or an alternative date ''[n]ot later than 180 days after the date of enactment''? If the commenter believes that an effective date later than November 12, 2022, is permitted under section 2 of the SSBA, what is the legal basis for that assertion, and what later date should be adopted?

B. Interpretation: In 2021, the Commission promulgated its Safety Standard for Infant Sleep Products (16 CFR part 1236, the ISP Rule), which became effective on June 23, 2022. (86 FR 33022 (June 23, 2021)). Pursuant to 16 CFR 1236.2(b)(10)(i), the ISP Rule defines an ''infant sleep product'' as a ''product marketed or intended to provide a sleeping accommodation for an infant up to 5 months of age, and that is not subject to'' one of the following: 16 CFR part 1218 (bassinets and cradles); 16 CFR part 1219 (full-size cribs); 16 CFR part 1220 (non-full-size cribs); 16 CFR part 1221 (play yards); and 16 CFR part 1222 (bedside sleepers) (collectively, CPSC sleep standards).[2] 86 FR at 33072. The SSBA, by contrast, applies to products ''marketed, intended, or designed'' for infants up to 1 years old. The operative provisions of the SSBA and the ISP Rule thus are not identical. Particularly in that light, the Commission requests comment on interpreting, codifying, and enforcing the SSBA with respect to inclined sleep products, including:

1. How should the Commission interpret and implement the phrase ''sleeping accommodations'' for purposes of the SSBA ban?
2. What, if any, effect should inclusion of the term ''designed'' in the SSBA have on the Commission's interpretation and implementation of the SSBA as compared to the ISP Rule? For example, what significance, if any, might ''designed'' have for inclined products that are not marketed for sleep but in which an infant may fall asleep, such as bouncers, swings, and rockers?
3. In the SSBA, what product characteristics, if any, demonstrate that a product is ''designed'' for sleep?
4. How should the Commission interpret and implement the terms ''marketed'' and ''intended'' as a sleeping accommodation in the SSBA? Should these terms be interpreted and implemented the same as in the ISP Rule? Why or why not?
5. What is the significance of the age distinction between the ISP Rule and the SSBA's ban? How might this difference bear on implementation of the SSBA as compared to the ISP Rule, including with respect to developmental differences between a newborn to 5 month old as identified in the ISP Rule, versus a newborn to 1 year old as identified in the SSBA?
6. How, if at all, should the SSBA's ban of inclined sleepers for infants affect the ISP Rule or the Commission's application of it?

C. Testing and Certification: When a ban does not remove all products in a product category from the market, testing and certification requirements may apply. For example, CPSC requires a General Certificate of Conformity (GCC) for certain banned hazardous products. *See, e.g., https://www.cpsc.gov/Business-Manufacturing/Testing-Certification/Lab-Accreditation/Rules-Requiring-a-General-Certificate-of-Conformity,* CPSC's website providing guidance that bans set forth in 16 CFR parts 1304, 1305, and 1306 require a GCC. In this case, inclined sleepers with an inclined sleep surface of 10 degrees or less, or that are marketed, intended, or designed to provide sleeping accommodations for an infant older than 1 year, are not within the scope of the SSBA's ban. To the extent inclined sleepers remain on the market that are not banned by this rule, and that are not regulated under the ISP Rule, should CPSC require testing and certification to this ban, to demonstrate that a product is *not* within the scope of the ban? Why, or why not?

[2] If an infant sleep product does not already comply with a CPSC sleep standard, the ISP Rule requires the sleep surface angle to measure l0 degrees or less, and the product must meet part 1218 of the Commission's Rules, the bassinet standard, including the definition of a bassinet, meaning the product must have a stand. The ISP Rule applies to both flat and inclined products.

List of Subjects in 16 CFR Part 1310

Administrative practice and procedure, Consumer protection, Infants and children.

For the reasons stated in the preamble, the Commission proposes to add part 1310 to title 16 of the Code of Federal Regulations as follows:

PART 1310—BAN OF INCLINED SLEEPERS FOR INFANTS

Sec.
1310.1 Purpose and scope
1310.2 Definition
1310.3 Banned hazardous product
1310.4 Effective date

Authority: Sec. 2, Pub. L. 117–126, 136 Stat. 1208; 15 U.S.C. 2057d.

§ 1310.1 Purpose and scope

The purpose of this rule is to prohibit the sale of inclined sleepers for infants as set forth in the Safe Sleep for Babies Act of 2021.

§ 1310.2 Definition

Inclined sleeper for infants means ''a product with an inclined sleep surface greater than ten degrees that is intended, marketed, or designed to provide sleeping accommodations for an infant up to 1 year old.''

§ 1310.3 Banned Hazardous product

Any inclined sleeper for infants, regardless of the date of manufacture, is a banned hazardous product under section 8 of the Consumer Product Safety Act (15 U.S.C. 2057).

§ 1310.4 Effective date

The effective date of this ban is November 12, 2022.

Alberta E. Mills,

Secretary, Consumer Product Safety Commission.

[FR Doc. 2022–15904 Filed 7–25–22; 8:45 am]

BILLING CODE 6355–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R04–OAR–2022–0092; FRL–10017–01–R4]

Air Plan Approval; Kentucky; Emissions Inventory Requirements for the 2015 8-Hour Ozone Standard Nonattainment Areas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a State Implementation Plan (SIP) revision submitted by the Commonwealth of Kentucky, through the Kentucky Energy and Environment Cabinet (Cabinet) on December 22, 2021, to address the base year emissions inventory requirements for the 2015 8-hour ozone national ambient air quality standard (NAAQS) for Kentucky counties in the Cincinnati, Ohio-Kentucky 2015 8-hour ozone NAAQS nonattainment area (hereinafter referred to as the Cincinnati, OH-KY Area), and for Kentucky counties in the Louisville, Kentucky-Indiana 2015 8-hour NAAQS nonattainment area (hereinafter referred to as the Louisville, KY-IN Area). Specifically, EPA is proposing to approve Kentucky's SIP revision addressing the emissions inventory requirements for the 2015 8-hour ozone nonattainment areas for the portions of Boone, Campbell, and Kenton Counties in the Cincinnati, OH-KY Area, and Bullitt, Jefferson, and Oldham Counties in the Louisville, KY-IN Area. These requirements apply to all ozone nonattainment areas. This action is being proposed pursuant to the Clean Air Act (CAA or Act).

DATES: Comments must be received on or before August 25, 2022.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R04–OAR–2022–0092 at *www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *www2.epa.gov/dockets/commenting-epa-dockets.*

The telephone number is (404) 562–8994. Ms. LaRocca can also be reached via electronic mail at *larocca.sarah@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

On October 1, 2015, EPA promulgated a revised 8-hour primary and secondary ozone NAAQS, strengthening both from 0.075 parts per million (ppm) to 0.070 ppm (the 2015 8-hour ozone NAAQS). *See* 80 FR 65292 (October 26, 2015). The 2015 8-hour ozone NAAQS is set at 0.070 ppm based on an annual fourth-highest daily maximum 8-hour average concentration averaged over three years. Under EPA's regulations at 40 Code of Federal Regulations (CFR) part 50, the 2015 8-hour ozone NAAQS is attained when the 3-year average of the annual fourth-highest daily maximum 8-hour average ambient air quality ozone concentration is less than or equal to 0.070 ppm. *See* 40 CFR 50.19. Ambient air quality monitoring data for the 3-year period must meet a data completeness requirement. *See* 40 CFR part 50, Appendix U. The ambient air quality monitoring data completeness requirement is met when the average percentage of days with valid ambient monitoring data is greater than 90 percent and no single year has less than 75 percent data completeness as determined using Appendix U.

Upon promulgation of a new or revised ozone NAAQS, the CAA requires EPA to designate as nonattainment any area that is violating the NAAQS based on the three most recent years of ambient air quality data. On June 4, 2018 (effective August 3, 2018), EPA designated the 7-county Cincinnati, OH-KY Area as a Marginal ozone nonattainment for the 2015 8-hour ozone NAAQS.[1] *See* 83 FR 25776. Also, on June 4, 2018 (effective August 3, 2018), EPA designated the five-county Louisville, KY-IN Area as a Marginal ozone nonattainment for the 2015 8-hour ozone NAAQS.[2] The Cincinnati, OH-KY Area and the Louisville, KY-IN Area were designated nonattainment for the 2015 8-hour ozone NAAQS using 2014–2016 ambient air quality data.

On December 6, 2018, EPA finalized a rule titled ''Implementation of the 2015 National Ambient Air Quality Standards for Ozone: Nonattainment Area State Implementation Plan Requirements'' (SIP Requirements Rule) that establishes the requirements that state, tribal, and local air quality management agencies must meet as they develop implementation plans for areas where air quality exceeds the 2015 8-hour ozone NAAQS.[3] *See* 83 FR 62998; 40 CFR part 51, subpart CC. This rule establishes nonattainment area attainment deadlines based on Table 1 of section 181(a) of the CAA, including an attainment deadline of August 3, 2021, three years after the August 3, 2018, effective date, for areas classified as Marginal for the 2015 8-hour ozone NAAQS.

Ground level ozone is not emitted directly into the air but is created by chemical reactions between oxides of nitrogen (NO_X) and volatile organic compounds (VOC) in the presence of sunlight. Emissions from industrial facilities and electric utilities, motor vehicle exhaust, gasoline vapors, and chemical solvents are some of the major sources of NO_X and VOC. Section 182(a)(1) of the CAA requires states with areas designated nonattainment for the ozone NAAQS to submit a SIP revision providing a comprehensive, accurate, and current inventory of actual emissions from all sources of the relevant pollutant or pollutants in such area. NO_X and VOC are the relevant pollutants because they are the precursors—*i.e.,* the pollutants that contribute to the formation—of ozone.

Based on the nonattainment designation, Kentucky was required to develop a SIP revision addressing certain CAA requirements for the Cincinnati, OH-KY Area and the Louisville, KY-IN Area. Among other things, Kentucky was required to submit a SIP revision addressing the emissions inventory requirements in CAA section 182(a)(1).

[1] The Cincinnati, OH-KY Area consists of the following counties: Boone (partial), Campbell (partial), and Kenton (partial) in Kentucky and the entire counties of Butler, Clermont, Hamilton, and Warren in Ohio. EPA took action on the 2015 8-hour ozone NAAQS nonattainment area emissions inventory requirements for Butler, Clermont, Hamilton, and Warren Counties in Ohio in a separate action. *See* 86 FR 12270 (March 3, 2021).

[2] The Louisville, KY-IN Area consists of Bullitt, Jefferson, and Oldham Counties in Kentucky and Clark and Floyd Counties in Indiana. EPA took action on the 2015 8-hour ozone NAAQS nonattainment area emissions inventory requirements for Clark and Floyd Counties in Indiana in a separate action. *See* 87 FR 39750 (July 5, 2022).

[3] The SIP Requirements Rule addresses a range of nonattainment area SIP requirements for the 2015 8-hour ozone NAAQS, including requirements pertaining to attainment demonstrations, reasonable further progress (RFP), reasonably available control technology, reasonably available control measures, major nonattainment new source review, emission inventories, and the timing of SIP submissions and compliance with emission control measures in the SIP.

II. Commonwealth's Submittal

On December 22, 2021, Kentucky submitted a SIP revision addressing the emissions inventory requirements related to the 2015 8-hour ozone NAAQS for the Cincinnati, OH-KY Area and the Louisville, KY-IN Area.[4] EPA is proposing to approve this SIP revision as meeting the inventory requirements of section 182(a)(1) of the CAA and EPA's SIP Requirements Rule. More information on EPA's analysis of Kentucky's SIP revision and how this SIP revision addresses these requirements is provided below.

III. Analysis of Commonwealth's Submittal

As discussed above, section 182(a)(1) of the CAA requires areas to submit a comprehensive, accurate, and current inventory of actual emissions from all sources of the relevant pollutant or pollutants in each ozone nonattainment area. The section 182(a)(1) base year inventory is defined in the SIP Requirements Rule as ''a comprehensive, accurate, current inventory of actual emissions from sources of VOC and NO_X emitted within the boundaries of the nonattainment area as required by CAA section 182(a)(1).'' *See* 40 CFR 51.1300(p). The inventory year must be selected consistent with the baseline year for the RFP plan as required by 40 CFR 51.1310(b),[5] and the inventory must include actual ozone season day emissions as defined in 40 CFR 51.1300(q)[6] and contain data elements consistent with the detail required by 40 CFR part 51, subpart A. *See* 40 CFR 51.1315(a), (c), and (e). In addition, the point source emissions included in the inventory must be reported according to the point source emissions thresholds of the Air Emissions Reporting Requirements (AERR) in 40 CFR part 51, subpart A.

Kentucky selected 2017 as the base year for the emissions inventories, which is the most recent calendar year for which a complete triennial inventory is required to be submitted to the EPA under 40 CFR part 51, subpart A. This base year is consistent with the regulations for 2015 ozone NAAQS nonattainment area base year emission inventory regulations. *See* 40 CFR 51.1315(a) and 51.1310(b). The emissions inventory is based on data developed and submitted by both the Cabinet and Louisville Metro Air Pollution Control District (District)[7] to EPA's 2017 National Emissions Inventory (NEI), and it contains data elements consistent with the requirements of 40 CFR part 51, subpart A.

Kentucky's emissions inventory for the Cincinnati, OH-KY Area and Louisville, KY-IN Area provides 2017 typical average summer day emissions for NO_X and VOC for the following general source categories: point sources, nonpoint sources,[8] on-road mobile sources, and non-road. For the Kentucky portion of the Cincinnati, OH-KY Area, the following percentages represent the portions of each Kentucky county that are located in the Area: Boone: 95 percent; Campbell: 92 percent; and Kenton: 95 percent. The nonattainment area apportionment percentages were applied to the point, nonpoint, and nonroad sectors. For on-road emissions, vehicle miles traveled (VMT) data for the nonattainment portions of the counties were used as inputs to the MOVES 3 model. Annual emission totals were then converted to tons per summer day by taking the calculated annual emissions totals, multiplying them by 25 percent to account for the four seasons, and then dividing by the 92 days of the summer season.[9] For the Kentucky portion of the Louisville, KY-IN Area, summer day emissions were calculated using a ''Summer's Operation Percentage'' as reported by facilities and explained in Appendices E.2 and A.3 of the submittal. Table 1 and Table 2 provide a summary of the emissions inventories for the Kentucky portions of the Cincinnati, OH-KY Area and the Louisville, KY-IN Area, respectively.

[4] On October 15, 2020, the Cabinet submitted a certification that included other required elements for ozone nonattainment areas pursuant to CAA section 182(a)(2)(C), Nonattainment New Source Review, and CAA section 182(a)(3)(B), Emissions statements. On August 12, 2020, KDAQ submitted a certification on behalf of the Louisville Metro Air Pollution Control District that included the required elements for ozone nonattainment areas pursuant to CAA section 182(a)(3)(B), Emissions statements. On April 5, 2022, EPA took final action on the portion of Kentucky's October 15, 2020, submission related to CAA section 182(a)(2)(C), Nonattainment New Source Review. *See* 87 FR 19649. On March 9, 2022, EPA took final action on the District's August 12, 2020, submission related to CAA section 182(a)(3)(B), Emissions statements. *See* 87 FR 13177. On April 26, 2022, EPA took final action on the portion of Kentucky's October 15, 2020, submission related to CAA section 182(a)(3)(B), Emissions statements. *See* 87 FR 24429.

[5] 40 CFR 51.1310(b) states that ''at the time of designation for the ozone NAAQS the baseline emissions inventory shall be the emissions inventory for the most recent calendar year for which a complete triennial inventory is required to be submitted to the EPA under the provisions of subpart A of this part. States may use an alternative baseline emissions inventory provided that the year selected corresponds with the year of the effective date of designation as nonattainment for that NAAQS. All states associated with a multi-state nonattainment area must consult and agree on using the alternative baseline year. The emissions values included in the inventory required by this section shall be actual ozone season day emissions . . . .'' For additional information, please see the guidance document titled ''Emissions Inventory Guidance for Implementation of Ozone and Particulate Matter National Ambient Air Quality Standards (NAAQS) and Regional Haze Regulations,'' EPA–454/B–17–003, July 2017, available at: *https://www.epa.gov/air-emissions-inventories/air-emissions-inventory-guidance-implementation-ozone-and-particulate.*

[6] ''Ozone season day emissions'' is defined as ''an average day's emissions for a typical ozone season work weekday. The state shall select, subject to EPA approval, the particular month(s) in the ozone season and the day(s) in the work week to be represented, considering the conditions assumed in the development of RFP plans and/or emissions budgets for transportation conformity.'' *See* 40 CFR 51.1300(q).

[7] The Cabinet submitted emissions inventories for the KY portion of both the Cincinnati, OH-KY and the Louisville, KY-IN nonattainment areas for the 2015 8-hour ozone standard. The District provided emissions information for the Jefferson County portion of the Louisville, KY-IN nonattainment area for the 2015 8-hour ozone standard.

[8] On June 2, 2022, Kentucky informed EPA that the Base Year (Nonattainment) Emissions Inventory State Implementation Plan it submitted on December 22, 2021, included biogenic emissions in the nonpoint category, whereas biogenic emissions were excluded from the inventories developed for Kentucky's redesignation requests and maintenance plans for the Cincinnati and Louisville Areas, in accordance with EPA Guidance (*Emissions Inventory Guidance for Implementation of Ozone and Particulate Matter National Ambient Air Quality Standards (NAAQS) and Regional Haze Regulations* (May 2017)). Kentucky's June 2, 2022, email is included in the docket for this proposed action.

[9] For sources that reported seasonal operations (primarily in Jefferson County), the seasonal operations data was used to calculate summer emissions, which were then divided by the 92 days in the summer months (June, July, and August) to derive tons per ozone season day/tons per summer day emissions. For the remaining sources, tons per summer day emissions were calculated by dividing annual emissions by four and then by the 92 days of summer. EPA has preliminarily determined that this is an appropriate method for determining summer day emissions, as the average summer operations from facilities reporting such information were determined to be approximately 24.6% to 26.3% (approximately 25%) of the annual emissions. Furthermore, for one of the largest contributors to these remaining emissions, the Louisville International Airport, this method of approximation is supported by data available on monthly flights indicating that flights in June, July, and August made up almost precisely one quarter of total annual flights (25.1%).

TABLE 1—2017 EMISSIONS FOR THE KENTUCKY PORTION OF THE CINCINNATI, OH-KY AREA

[Tons/summer day]

County	Point		Nonpoint		On-road		Non-road	
	NO_X	VOC	NO_X	VOC	NO_X	VOC	NO_X	VOC
Boone	9.47	2.57	1.60	14.78	3.78	2.31	0.67	1.20
Campbell	0.32	0.41	1.08	6.46	1.78	1.08	0.34	0.37
Kenton	0.30	0.66	1.82	7.43	3.77	2.12	0.58	0.65

TABLE 2—2017 EMISSIONS FOR THE KENTUCKY PORTION OF THE LOUISVILLE, KY-IN AREA

[Tons/summer day]

County	Point		Nonpoint		On-road		Non-road	
	NO_X	VOC	NO_X	VOC	NO_X	VOC	NO_X	VOC
Bullitt	0.85	9.33	0.84	18.13	3.49	1.19	0.26	0.42
Jefferson	34.81	21.56	6.66	41.57	20.97	7.85	4.32	4.02
Oldham	0.13	0.04	0.87	5.98	1.85	0.69	0.30	0.41

The emissions reported for the Cincinnati, OH-KY Area and for the Louisville, KY-IN Area reflect the emissions within the portions of Boone, Campbell, and Kenton Counties, and within Bullitt, Jefferson, and Oldham Counties, respectively, comprising the nonattainment areas. The inventory contains point source emissions data for facilities located within the Kentucky portions of the Areas. More detail on the emissions for individual source categories is provided below and in the appendices to Kentucky's December 22, 2021, submittal.

Point sources are large, stationary, identifiable sources of emissions that release pollutants into the atmosphere. NO_X and VOC emissions were calculated by using facility-specific emissions data reported to the 2017 NEI from sources that are required to submit inventory data according to the AERR. A detailed account of the point source emissions can be found in Appendix A of Kentucky's submittal.

Nonpoint sources are small stationary sources of emissions, which due to their large number, collectively have significant emissions (*e.g.,* dry cleaners, service stations). Emissions for these sources were obtained from the 2017 NEI. A detailed account of the nonpoint source emissions can be found in Appendix B of Kentucky's submittal.

On-road mobile sources include vehicles used on roads for transportation of passengers or freight. For both the Cincinnati, OH-KY Area and Louisville, KY-IN Area, on-road emissions inventories were developed using the latest version of EPA's Motor Vehicle Emissions Simulator (MOVES), MOVES3, for each ozone nonattainment county. County level on-road emissions modeling was conducted using county-specific vehicle populations and other local data. A detailed account of the on-road source emissions can be found on page 6, page 12, and in Appendix C of Kentucky's submittal.

Non-road mobile sources include vehicles, engines, and equipment used for construction, agriculture, recreation, and other purposes that do not use the roadways (*e.g.,* lawn mowers, construction equipment, railroad locomotives, and aircraft). Kentucky obtained emissions for the non-road mobile sources from the 2017 NEI. A detailed account of non-road mobile source emissions can be found in Appendix D of the December 22, 2021, submittal.

EPA has preliminarily determined that Kentucky's emissions inventories for the Cincinnati, OH-KY and the Louisville, KY-IN Areas meet the requirements under CAA section 182(a)(1) and the SIP Requirements Rule for the 2015 8-hour ozone NAAQS, as well as the requirements in 40 CFR part 51, subpart A.

IV. Proposed Action

EPA is proposing to approve the SIP revision submitted by Kentucky on December 22, 2021, addressing the base year emissions inventory requirements for the 2015 8-hour ozone NAAQS for the Cincinnati, OH-KY Area and Louisville, KY-IN Area. EPA proposes to find that the Commonwealth's submission meets the requirements of sections 110 and 182 of the CAA.

V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. *See* 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided they meet the criteria of the CAA. This proposed action merely proposes to approve state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because

application of those requirements would be inconsistent with the CAA; and

• Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it impose substantial direct costs on tribal governments or preempt tribal law.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

(Authority: 42 U.S.C. 7401 *et seq.*)

Dated: July 19, 2022.

40 CFR Part 52

[EPA–R04–OAR–2022–0397; FRL–10011–01–R4]

Air Plan Approval; South Carolina: New Source Review Updates

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA or the Agency) is proposing to approve State Implementation Plan (SIP) revisions submitted by the State of South Carolina, through the South Carolina Department of Health and Environmental Control (hereinafter referred to as SC DHEC or South Carolina) via a letter dated February 3, 2022. The SIP revisions include updates to South Carolina's Prevention of Significant Deterioration (PSD) and Nonattainment New Source Review (NNSR) regulations. Specifically, the updates incorporate recent changes to the federal New Source Review (NSR) regulations, consisting of a clarification to the Project Emissions Accounting provisions, updates promulgated in the recent NSR Corrections Rule, and updates to reflect the regulation of greenhouse gases (GHGs) pursuant to the Tailoring Rule. EPA is proposing to approve these revisions pursuant to the Clean Air Act (CAA or Act) and implementing federal regulations.

DATES: Comments must be received on or before August 25, 2022.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R04–OAR–2022–0397 at *www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Andres Febres, Air Regulatory Management Section, Air Planning and Implementation Branch, Air and Radiation Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960. The telephone number is (404) 562–8966. Mr. Febres can also be reached via electronic mail at *febres-martinez.andres@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

The PSD program is a preconstruction permitting program that requires ''major'' stationary sources of air pollution to obtain a PSD permit prior to beginning construction in areas classified as either in attainment with the National Ambient Air Quality Standards (NAAQS) or unclassifiable. *See* CAA section 165. EPA requires PSD SIPs to meet or exceed the minimum requirements codified at 40 CFR 51.166.[1]

The NNSR permitting program is a preconstruction permitting program that requires ''major'' stationary sources of air pollution to obtain an NNSR permit prior to beginning construction in areas classified as being in nonattainment with the NAAQS. *See* CAA section 173. EPA requires NNSR SIPs to meet the minimum requirements codified at 40 CFR 51.165.

Over the years, EPA has updated its rules implementing NNSR and PSD permitting at 40 CFR 51.165 and 40 CFR 51.166, respectively, and as a result of these amendments, states and localities similarly are required to update their SIP-approved rules to ensure consistency with the minimum requirements in federal PSD and NNSR rules. Collectively, EPA commonly refers to its PSD and NNSR permitting programs as major ''new source review'' permitting programs.

On February 3, 2022, SC DHEC submitted SIP revisions to EPA for approval that include changes to South Carolina's major NSR permitting regulations to make them more closely align with federal requirements for PSD and NNSR permitting based on recent updates to the federal NSR regulations.[2] Specifically, these changes update South Carolina's Regulation 61–62.5, Standard No. 7—*Prevention of Significant Deterioration* and Standard No. 7.1—*Nonattainment New Source Review.*[3]

EPA last approved updates to South Carolina's SIP-approved major NSR regulations on October 28, 2021 by acting on an April 24, 2020 submittal from South Carolina. *See* 86 FR 59646. Since the time of South Carolina's previous April 24, 2020 submittal to revise its major NSR rules, EPA has updated the federal major NSR regulations to clarify the Project Emissions Accounting provisions and to correct certain errors in the NSR

[1] Related rules setting forth the federal PSD program for areas without an approved PSD permitting program are codified at 40 CFR 52.21.

[2] EPA notes that the February 3, 2022, submittal was received by EPA on February 4, 2022. For clarity, EPA will refer to this submittal based on the date of the letter.

[3] EPA notes that under the February 3, 2022, cover letter, SC DHEC also submitted updates to the following State Regulations: 61–62.60, *South Carolina Designated Facility Plan and New Source Performance Standards;* Regulation 61–62.63, *National Emission Standards for Hazardous Air Pollutants (NESHAP) for Source Categories;* and Regulation 61–62.70, *Title V Operating Permit Program.* However, South Carolina explains in the February 3, 2022, cover letter that these regulations are not part of the SIP, and they are not being requested for approval by EPA into the South Carolina SIP at this time.

regulations that have accumulated over time.[4] South Carolina's February 3, 2022, SIP submittal seeks to incorporate these updates to the federal rules into the EPA-approved major NSR regulations in the South Carolina SIP. Additionally, as discussed in detail below, South Carolina's SIP submittal seeks to incorporate into the South Carolina SIP updated PSD provisions related to the regulation of GHGs pursuant to the Tailoring Rule,[5] which was previously implemented in South Carolina through legislative action pursuant to South Carolina Joint Resolution H4888 (2010). EPA is proposing to approve these changes as meeting the requirements of the federal PSD and NNSR programs and as being consistent with the CAA. Additional details on South Carolina's February 3, 2022, revisions and EPA's analysis of the changes can be found below.

II. Analysis of the State's Submittal

As previously mentioned, the February 3, 2022, SIP submittal includes changes to South Carolina's PSD and NNSR regulations. Many of these changes are minor and are being proposed to align South Carolina's SIP-approved NSR rules with changes made by EPA in the federal PSD and NNSR regulations. More details on key updates included in the State's proposed changes to the South Carolina SIP are found in sections II.A and II.B below.

A. Regulation 61–62.5, Standard No. 7—Prevention of Significant Deterioration

The February 3, 2022, SIP submittal includes the following key changes to South Carolina's PSD regulations contained within Regulation 61–62.5, Standard No. 7 (hereinafter referred to as ''Standard No. 7'') in order to more closely align them with the federal PSD regulations: (1) Added a definition for the ''sum of the difference'' along with updated wording throughout Standard No. 7 to include this new definition, based on EPA's Project Emissions Accounting Rule; (2) added a definition for ''subject to regulation''; and (3) made several changes throughout the rule based on EPA's recent NSR Corrections Rule. More details on these changes to Standard No. 7 are included below. All other changes to Standard No. 7 are minor edits, such as adding brackets where needed, correcting grammatical errors, and renumbering sections based on added or deleted paragraphs throughout the rule.

i. Revisions To Reflect the Project Emissions Accounting Rule

Under paragraph (A)(2)(d)(vii), South Carolina adds a new definition for the ''sum of the difference,'' which is used for other definitions under paragraphs (A)(2)(d)(iii), (iv), and (vi). Subsequently, the definition for ''*hydrid test for projects that involve multiple types of emissions units,*'' under paragraph (A)(2)(d)(vi), was updated to include a reference to the new definition of the sum of the difference. These changes match those made to the federal PSD regulations at 40 CFR 51.166(a)(7)(iv)(*f*) and (*g*), through EPA's November 24, 2020, Project Emissions Accounting Rule.

ii. Added Definition of ''Subject to Regulation''

GHG emissions were covered for the first time by the PSD and title V operating permit programs effective on January 2, 2011 pursuant to the GHG Tailoring Rule. *See* 75 FR 31514 (June 3, 2010). In the June 3, 2010, notice, EPA described the implementation of the GHG Tailoring Rule, which consisted of the implementation of two steps (known as Step 1 and Step 2 of the GHG Tailoring Rule) and a commitment to establish a third step no later than July 1, 2012. Among the changes established in rulemaking for Step 1 and Step 2 of the GHG Tailoring tule, EPA added the definition for ''Subject to regulation'' to the federal PSD regulations at 40 CFR 51.166(b)(48).

In the implementation of Step 3, EPA decided against further phase-in of the GHG Tailoring Rule. Thus, the thresholds for determining PSD applicability based on emissions of GHGs remained the same as established in Steps 1 and 2 of the Tailoring Rule. *See* 77 FR 41051 (July 12, 2012). However, as part of Step 3 of the GHG Tailoring Rule, EPA revised the regulations under 40 CFR 52.21 to establish Plantwide Applicability Limits (PALs) for GHG emissions. *Id.* Prior to that, PALs were only available for GHGs on a mass basis. EPA's July 12, 2012, rule revised the PAL regulations in 40 CFR 52.21 to allow for GHG PALs to be established on a carbon dioxide equivalent (CO_2e)[6] basis, as well as a mass basis.

On June 23, 2014, the U.S. Supreme Court addressed GHG Tailoring Rule permitting requirements in *Utility Air Regulatory Group (UARG)* v. *EPA,* 573 U.S. 302 (2014). The Supreme Court upheld EPA's regulation of GHGs under the PSD program as applied to Step 1 sources (*i.e.,* sources that are ''major'' for purposes of PSD permitting based on non-GHG pollutants) but further held that EPA may not treat GHGs as air pollutants for the purpose of determining whether a source is a major source (or is undergoing a major modification). Thus, the Court invalidated the PSD and title V permitting requirements for GHG Step 2 sources. As a result of the Supreme Court decision, on April 10, 2015, the United States Court of Appeals for the District of Columbia Circuit (D.C. Circuit) vacated the regulations that implemented Step 2 of the GHG Tailoring Rule, including 40 CFR 51.166(b)(48)(v) and 40 CFR 52.21(b)(49)(v). *Coalition for Responsible Regulation, Inc.* v. *EPA,* 606 Fed. Appx. 6, 7 (D.C. Cir. 2015).

Subsequently, EPA promulgated a good cause final rule on August 19, 2015, entitled ''Prevention of Significant Deterioration and Title V Permitting for Greenhouse Gases: Removal of Certain Vacated Elements'' that removed from the federal regulations the portions of the PSD permitting provisions related to the GHG Step 2 sources that were vacated by the D.C. Circuit earlier that year. *See* 80 FR 50199.

In SC DHEC's February 3, 2022, SIP submittal, South Carolina adds a new definition for ''Subject to regulation'' under paragraph (B)(52) of Standard No. 7, which mostly matches the current federal PSD definition for ''[s]ubject to regulation'' found at 40 CFR 51.166(b)(48). The new definition in paragraph (B)(52) correctly excludes the vacated language mentioned above but adds language related to the implementation of GHG PALs in South Carolina's PSD program under subparagraph (B)(52)(a), which is not found under 51.166(b)(48). Although the language regarding GHG PALs is not found in the federal definition for ''subject to regulation'' under 40 CFR 51.166, the rulemaking for Step 3 of the GHG Tailoring Rule does add the GHG PAL language as part of the definition of ''subject to regulations'' under 40 CFR 52.21. *See* 77 FR 41051 at 41072. In that rulemaking, EPA notes that although the Agency is not adopting the GHG PAL

[4] The ''Prevention of Significant Deterioration (PSD) and Nonattainment New Source Review (NNSR): Project Emissions Accounting'' Rule was finalized on November 24, 2020. *See 85* FR 74890 (hereinafter ''Project Emissions Accounting Rule''). The ''New Source Review Regulations; Correction'' Rule was finalized on July 19, 2021. *See* 86 FR 37918 (hereinafter ''NSR Corrections Rule'').

[5] ''Prevention of Significant Deterioration and Title V Greenhouse Gas Tailoring Rule'' (hereinafter referred to as the ''GHG Tailoring Rule''). *See* 75 FR 31514 (June 3, 2010).

[6] CO_2e emissions refers to emissions of six recognized GHGs which are scaled to equivalent CO_2 emissions by relative global warming potential values and are then summed together to determine a total equivalent emissions value. *See* 40 CFR 51.166 (b)(48)(ii) and 40 CFR 52.21(b)(49)(ii).

language into the existing PSD PAL provisions under 40 CFR 51.166, ''nothing in th[at] action is intended to restrict states from adopting th[ose], or similar, changes into their SIP-approved PAL program[s] if they choose to do so.'' *See id.* at 41070.

EPA additionally notes that although South Carolina appears to be adding provisions of the GHG Tailoring Rule to its PSD program for the first time, the State has been implementing these provisions through a joint resolution that became effective on July 1, 2010.[7] Adding the definition for ''subject to regulation'' into South Carolina's PSD rules merely streamlines the State's rules to current federal PSD standards in 40 CFR 51.166 and 52.21. However, this change has no practical effect because GHG provisions for PSD were already authorized on an interim basis by legislative action in South Carolina.

Finally, following the addition of this new definition, South Carolina renumbers the paragraphs that follow in order to accommodate the new entry. For the reasons described above, EPA believes that South Carolina's new definition is appropriate for incorporation into the SIP and is consistent with the federal PSD regulations.

iii. Revisions To Reflect Updates Contained in the NSR Corrections Rule

Additionally, based on EPA's July 19, 2021, NSR Corrections Rule, South Carolina makes several edits and deletions to Standard No. 7 to match the federal PSD regulations, and these are detailed below.

First, in paragraph (B)(8), which defines Best Available Control Technology (BACT), as well as in paragraph (J)(1), which includes provisions related to the Control Technology Review Provisions of 40 CFR 51.166(j), SC DHEC adds a reference to 40 CFR part 63 in accordance with updates contained in the NSR Corrections Rule.

Second, in paragraphs (B)(30)(c)(v)(1) and (B)(30)(c)(vi), SC DHEC removes references to 40 CFR 51.166 in accordance with the NSR Corrections Rule. These references are unnecessary because these paragraphs already referenced 40 CFR part 51, subpart I, which houses the federal PSD regulations contained within 40 CFR 51.166.

Third, under paragraphs (B)(32)(a)(i), (B)(32)(c)(viii), and (I)(1)(g)(viii), SC DHEC lowers the applicability threshold regarding consideration of fugitive emissions for municipal incinerators from the capacity to charge more than two-hundred and fifty (250) tons of refuse per day to the capacity to charge more than fifty (50) tons of refuse per day. This change broadens the applicability of the State's PSD rule for these types of sources and matches changes made to the federal PSD rule at 40 CFR 51.166(b)(1)(i)(*a*), (b)(1)(iii)(*h*), and (i)(1)(ii)(*h*) through the NSR Corrections Rule.

Fourth, SC DHEC deletes language within subparagraphs (I)(1)(a) through (e), (I)(1)(i), (I)(1)(j), (I)(6) through (11), (M)(1)(e), (M)(1)(g) and (M)(1)(h), from Standard No. 7 and inserts ''[Reserved]'' in their place. This deleted language matches the deletion of corresponding paragraphs in the federal PSD rules through the NSR Corrections Rule. Specifically, EPA removed paragraphs 40 CFR 52.21(i)(1)(i) through (v), (i)(1)(ix), (i)(1)(x), (i)(6) through (11), (m)(1)(v), (m)(1)(vii) and (m)(1)(viii).[8] In addition, South Carolina adds a new ''[Reserved]'' paragraph under (I)(12), which also matches the federal rules at 40 CFR 52.21(i)(12).[9]

Fifth, throughout several paragraphs in Standard No. 7, South Carolina updates internal references. Specifically, SC DHEC updates references in paragraphs (N)(1), (P)(6), (P)(7) and (P)(8) to align its rules with changes to the federal rules at 40 CFR 52.21(n)(1), (p)(6), (p)(7) and (p)(8), respectively.

iv. Other Minor Revisions

Additionally, SC DHEC makes a correction to one of the references in paragraph (AA)(12)(b), which incorrectly listed the requirements of the paragraph as being under ''(AA)(12)(c) through (AA)(12)(b)(i).'' The changes correct the reference to say ''(AA)(12)(c) through (AA)(12)(i)'' instead.

As previously mentioned, all the changes detailed above are either minor edits and corrections or updates to align South Carolina's rules with the minimum requirements for PSD plans (including updates responsive to EPA's Project Emissions Rule, the NSR Corrections Rule, and the Tailoring Rule). For these reasons, EPA is proposing to approve and incorporate into the South Carolina SIP the changes to Standard No. 7.

B. Regulation 61–62.5, Standard No. 7.1—Nonattainment New Source Review

The February 3, 2022, SIP submittal includes the following key changes to South Carolina's NNSR regulations contained within Regulation 61–62.5, Standard No. 7.1 (hereinafter referred to as ''Standard No. 7.1'') to more closely align with the federal NNSR regulations: (1) added a definition for the ''sum of the difference'' based on EPA's Project Emissions Accounting rule; (2) incorporated the federal interpollutant trading provisions for NNSR; and (3) made several changes throughout the rule based on EPA's NSR Corrections Rule. More details on these changes to Standard No. 7.1 are included below.

All other changes to South Carolina's Regulation 61–62.5, Standard No. 7.1, are minor edits, such as grammatical corrections, and renumbering sections based on added or deleted paragraphs throughout the rule.

i. Revisions To Reflect the Project Emissions Accounting Rule

Under paragraph (A)(9), SC DHEC adds a new definition for the ''sum of the difference,'' which is used within other definitions in paragraphs (A)(6), (7) and (8). Subsequently, the definition for ''*hydrid test for projects that involve multiple types of emissions units,*'' under paragraph (A)(8) was updated to include a reference to the new definition of the sum of the difference. These changes match those made to the federal NNSR regulations at 40 CFR 51.165(a)(2)(ii)(F) and (G), through EPA's Project Emissions Accounting Rule.

ii. Revisions To Reflect Updates Contained in the NSR Corrections Rule

Similar to the changes to South Carolina's PSD regulations explained in Section II.A., SC DHEC makes several edits and deletions to Standard No. 7.1 to align this rule with updates to 40 CFR 51.165 resulting from the NSR Corrections Rule. These changes are detailed further below.

[7] On June 11, 2010, the South Carolina Governor signed Joint Resolution H4888, which stated in relevant part that ''[i]n the event that the United States Environmental Protection Agency adopts rules that raise the threshold levels of GHG emissions that will trigger a requirement for emitters of greenhouse gases in South Carolina, notwithstanding any other provision of law, the rules shall be immediately effective in this State on an interim basis and implemented by the South Carolina Department of Health and Environmental Control pursuant to this joint resolution.'' *See https://www.scstatehouse.gov/sess118_2009-2010/bills/4888.htm* (last accessed on June 10, 2022). Subsequently, on March 4, 2011, SC DHEC submitted a letter to EPA confirming that the State has the authority to implement the Tailoring Rule thresholds in their PSD and title V programs. This letter to EPA can be found in the docket for this proposed action.

[8] Although these provisions are contained in 40 CFR 52.21 (which contains federal PSD plan rules rather than minimum requirements for state PSD plans), South Carolina previously adopted these provisions into its PSD plan.

[9] Although this provision is contained in 40 CFR 52.21 (which contains federal PSD plan rules rather than minimum requirements for state PSD plans), South Carolina previously adopted this provision into its PSD plan.

First, under paragraphs (A)(11) [10] and (B)(22), SC DHEC lowers the applicability threshold regarding consideration of fugitive emissions from for municipal incinerators from the capacity to charge more than two-hundred and fifty (250) tons of refuse per day to the capacity to charge more than fifty (50) tons of refuse per day. This change broadens the applicability of South Carolina's Standard No. 7.1 for these types of sources and matches changes made to the federal NNSR rules at 40 CFR 51.165(a)(1)(iv)(C)(*8*) and (a)(4)(viii) through the NSR Corrections Rule.

Although most of paragraphs (A)(11) and (B)(22) are appropriate for incorporation into the South Carolina SIP and match the current federal rules, the State-effective version includes a portion of the definition for ''Chemical process plants'' under (A)(11)(t) and (B)(22)(c)(xx) that has never been approved into the SIP. In particular, the language contained after ''Chemical process plant,'' which states that ''[t]he term chemical processing plants shall not include ethanol production facilities that produce ethanol by natural fermentation included in NAICS codes 325193 or 312140,'' is not currently in the SIP.[11] Due to the ongoing review of the 2007 Ethanol Rule in regards to the federal NNSR regulations, SC DHEC notes in its February 3, 2022, cover letter that it is not requesting EPA to approve these portions of paragraphs (A)(11) and (B)(22) into the SIP at this time.[12]

Second, in paragraph (B)(5), South Carolina adds a reference to 40 CFR part 63 in accordance with updates contained in the NSR Corrections Rule. This paragraph already contains references to Parts 60 and 61 but based on changes to the federal NNSR rules at 40 CFR 51.165(a)(1)(xl), South Carolina adds the reference to Part 63 as well.

Third, in paragraphs (B)(21)(c)(v)(1) and (B)(21)(c)(vi), South Carolina removes the references to 40 CFR 51.166 in accordance with revisions arising from the NSR Corrections Rule. These references were incorrect to use in Standard No. 7.1 because 40 CFR 51.166 contains the Federal PSD regulations, rather than the federal NNSR regulations. Additionally, these references were unnecessary because these paragraphs already referenced 40 CFR part 51, subpart I, which house the federal NNSR regulations, found in 40 CFR 51.165.

Fourth, under paragraph (D)(6), which contains NNSR offset provisions, SC DHEC deletes an outdated reference to EPA's ''Recommended Policy on the Control of Volatile Organic Compounds (42 FR 35314, July 8, 1977).'' Instead, South Carolina points to 40 CFR 51.100(s), where a list of compounds with negligible photochemical reactivity can be found. According to the State's rule, emissions credit may be allowed only for hydrocarbons substituted with one of these compounds. This updated reference matches changes made to the federal NNSR rules at 51.165(a)(3)(ii)(D) through the NSR Corrections Rule.

Finally, under Section (H), specifically in paragraph (H)(1), South Carolina adopts corrections to the federal interprecursor offsetting rules, found at 40 CFR 51.165(a)(11), in order to delete vacated language regarding ozone interprecursor offsetting. Originally, the State-effective version of Section (H) contained language from the December 6, 2018, rule ''Implementation of the 2015 National Ambient Air Quality Standards for Ozone: Nonattainment Area State Implementation Plan Requirements'' (2018 Implementation Rule). *See* 83 FR 62998. These federal provisions were later vacated by the D.C. Circuit through a January 29, 2021, court decision. *See Sierra Club* v. *EPA,* 985 F.3d 1055 (D.C. Cir. 2021). Accordingly, on June 22, 2021, EPA removed this vacated language from 40 CFR 51.165(a)(11) through the NSR Corrections Rule.

South Carolina's previous proposed SIP revision addressing Standard No. 7.1, which was submitted to EPA on April 24, 2020, sought to incorporate Section (H), including the vacated language mentioned above, under paragraph (H)(1), into the SIP. Because of the court decision and vacatur, South Carolina later withdrew its request for EPA to incorporate Section (H) in its entirety into the SIP, through an April 20, 2021, withdrawal letter, and so this section is not currently found in the SIP-approved version of Standard No. 7.1. The February 3, 2022, SIP revision now submits a corrected version of Section (H), with the removal of the vacated language from paragraph (H)(1), for incorporation into the SIP. EPA has evaluated the revised provision and found that the language matches that of the federal NNSR regulation, found at 40 CFR 51.165(a)(11), and is proposing to incorporate it into the South Carolina SIP.

As previously mentioned, all the changes detailed above are either minor edits and corrections or are updates to align South Carolina's rules with minimum requirements in the federal NNSR rule found at 40 CFR 51.165, based on changes made through EPA's Project Emissions Rule and the NSR Corrections Rule. For these reasons, EPA is proposing to approve and incorporate into the South Carolina SIP the changes to Regulation 61–62.5, Standard No. 7.1, except for the parts of subparagraphs (A)(11)(t) and (B)(22)(c)(xx) noted above, as they relate to the Ethanol Rule Provisions of the federal NNSR regulations,

III. Incorporation by Reference

In this document, EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, and as discussed in Sections I and II of this preamble, EPA is proposing to incorporate by reference South Carolina's Regulation 61–62.5, Standard No. 7—*Prevention of Significant Deterioration,* and Standard No. 7.1—*Nonattainment New Source Review,* both state effective on November 26, 2021, except for a portion of paragraphs (A)(11)(t) and (B)(22)(c)(xx) related to the Ethanol Rule Provisions, found in Regulation 61–62.5, Standard No. 7.1. EPA has made, and will continue to make, these materials generally available through *www.regulations.gov*

[10] Paragraph (A)(10) is being renumbered to (A)(11).

[11] On May 1, 2007, EPA published in the **Federal Register** the 2007 Ethanol Rule (72 FR 24060), which amended EPA's PSD and NNSR regulations to exclude ethanol manufacturing facilities that produce ethanol by natural fermentation processes from the ''chemical process plants'' category under the regulatory definition of ''major stationary source.'' Shortly thereafter, EPA received a petition for reconsideration of the 2007 Ethanol Rule provisions from Natural Resources Defense Council (NRDC), which petition EPA initially denied on March 27, 2008. *See* 73 FR 24174 (March 27, 2008). In 2009, EPA received a second petition for reconsideration from NRDC, and NRDC also filed a petition for judicial review in the U.S. Court of Appeals for the District of Columbia Circuit challenging EPA's 2008 denial of its first petition for reconsideration. The court granted a joint motion to hold the case in abeyance, and the case has remained in abeyance. On October 21, 2019, EPA partially granted and partially denied the second petition for reconsideration. *See* 84 FR 59743 (November 6, 2019). Specifically, EPA granted the request for reconsideration with regard to the claim that the 2007 Ethanol Rule did not appropriately address the CAA section 193 anti-backsliding requirements for nonattainment areas. Concurrently, EPA denied the remainder of the requests for reconsideration. This means that states are now able to adopt the Ethanol Rule provisions for their PSD programs but are generally not choosing to do the same for their NNSR programs at this time.

[12] South Carolina's February 3, 2022, cover letter, additionally references a June 21, 2021, withdrawal letter, which was sent to EPA while the Agency was in the process of approving the State's last update to the NSR regulations into the SIP. In the February 3, 2020, letter, SC DHEC confirms that the intention of the June 21, 2021, withdrawal letter remains the same and that it is not requesting EPA to approve the Ethanol Rule provisions, found in Regulation 61–62.5, Standard No. 7.1, at this time.

and at the EPA Region 4 office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

IV. Proposed Action

As described above, EPA is proposing to approve, with the exceptions noted above, the changes to the South Carolina Regulation 61–62.5, Standards No. 7—*Prevention of Significant Deterioration,* and Standard No. 7.1—*Nonattainment New Source Review,* both state effective on November 26, 2021. These changes were submitted by South Carolina on February 3, 2022.

V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. *See* 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. This action merely proposes to approve state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

Because this proposed action merely proposes to approve state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law, this proposed action for the State of South Carolina does not have Tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). Therefore, this proposed action will not impose substantial direct costs on Tribal governments or preempt Tribal law. The Catawba Indian Nation (CIN) Reservation is located within the boundary of York County, South Carolina. Pursuant to the Catawba Indian Claims Settlement Act, S.C. Code Ann. 27–16–120 (Settlement Act), ''all state and local environmental laws and regulations apply to the [Catawba Indian Nation] and are fully enforceable by all relevant state and local agencies and authorities.'' The CIN also retains authority to impose regulations applying higher environmental standards to the Reservation than those imposed by state law or local governing bodies, in accordance with the Settlement Act.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 300

[Docket No. 220720–0160]

RIN 0648–BK93

Pacific Halibut Fisheries; Catch Sharing Plan

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule.

SUMMARY: Under the authority of the Northern Pacific Halibut Act of 1982, this action would create a permitting system for the Pacific halibut commercial and recreational charter halibut fisheries in International Pacific Halibut Commission (IPHC) Regulatory Area 2A off of Washington, Oregon, and California. In addition, this action would establish a regulatory framework for the Area 2A Pacific halibut directed commercial fishery that, consistent with the allocations and coastwide season dates set by the IPHC, allows NMFS to annually determine dates and times the fishery is open and set harvest limits for those periods of time. These permitting and management activities for Area 2A are currently performed by the IPHC; under this proposed rule, NMFS will implement these Area 2A-specific permitting and management activities.

DATES: Comments must be received on or before August 25, 2022.

ADDRESSES: You may submit comments on this document, identified by NOAA–NMFS–2020–0090, by any of the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *https://www.regulations.gov* and enter NOAA–NMFS–2020–0090 in the Search box. Click on the ''Comment'' icon, complete the required fields, and enter or attach your comments.
- *Mail:* Submit written comments to Scott Rumsey, c/o Kathryn Blair, West Coast Region, NMFS, 1201 NE Lloyd Blvd., Suite 1100, Portland, OR 97232.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on *www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, etc.),

confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

Written comments regarding the burden-hour estimates or other aspects of the collection-of-information requirements contained in this proposed rule may be submitted at the following website: *www.reginfo.gov/public/do/PRAMain.*

SUPPLEMENTARY INFORMATION:

Background

The Northern Pacific Halibut Act of 1982 (Halibut Act), 16 U.S.C. 773–773k, gives the Secretary of Commerce (Secretary) general responsibility for implementing the provisions of the Convention between Canada and the United States for the Preservation of the Halibut Fishery of the North Pacific Ocean and Bering Sea (Halibut Convention), signed at Ottawa, Ontario, on March 2, 1953, as amended by a Protocol Amending the Convention (signed at Washington, DC, on March 29, 1979). The Halibut Act requires that the Secretary shall adopt regulations as may be necessary to carry out the purposes and objectives of the Halibut Convention and Halibut Act. 16 U.S.C. 773c. The Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration (NOAA), on behalf of the IPHC, publishes annual management measures governing the Pacific halibut fishery that have been recommended by the IPHC and accepted by the Secretary of State, with concurrence from the Secretary of Commerce. These management measures include coastwide and area-specific mortality limits (also known as allocations and subarea allocations), coastwide season dates, gear restrictions, Pacific halibut size limits for retention, and logbook requirements, among others. The IPHC apportions allocations for the Pacific halibut fishery among regulatory areas: Area 2A (Washington, Oregon, and California), Area 2B (British Columbia), Area 2C (Southeast Alaska), Area 3A (Central Gulf of Alaska), Area 3B (Western Gulf of Alaska), and Area 4 (subdivided into 5 areas, 4A through 4E, in the Bering Sea and Aleutian Islands of Western Alaska).

Additionally, as provided in the Halibut Act, the Regional Fishery Management Councils having authority for the geographic area concerned may develop, and the Secretary of Commerce may implement, regulations governing harvesting privileges among U.S. fishermen in U.S. waters that are in addition to, and not in conflict with, approved IPHC regulations (16 U.S.C. 773c(c)). The Pacific Fishery Management Council (Council) has exercised this authority by developing a catch sharing plan guiding the allocation of halibut, and management of recreational (or sport) fisheries for the IPHC's regulatory Area 2A. The Council's Catch Sharing Plan guides tribal, non-tribal commercial, and recreational halibut fishing off the U.S. west coast by prescribing an allocation formula for the allowable catch, and by describing the general season structure of the fisheries. Since 1988, the National Marine Fisheries Service (NMFS) has approved Catch Sharing Plans and implemented annual regulations consistent with the Catch Sharing Plans that allocate the IPHC regulatory Area 2A Pacific halibut allocation between tribal and non-tribal, and commercial and recreational harvesters. In 1995, NMFS approved a Council-recommended, long-term Catch Sharing Plan (60 FR 14651, March 20, 1995). The Council has recommended and NMFS has approved adjustments to the Catch Sharing Plan each year after discussion at the September and November Council meetings to address the changing needs of these fisheries. In addition, each year NMFS issues management measures to govern the recreational fishery (50 CFR 300.63(b)(1)). These measures include the recreational fishery seasons, allocations, closed areas, and bag limits for Area 2A.

Currently, the IPHC regulates and manages certain aspects of the commercial and recreational charter fisheries in Area 2A. As required under IPHC regulations, in order for a vessel to fish for Pacific halibut in Area 2A, either in the recreational charter fishery or the commercial fishery, the vessel must have a permit issued by the IPHC. (The term 'permit' is synonymous with 'license.' IPHC documents generally use 'license' and NMFS in this rule uses 'permit.') Specifically, the IPHC issues permits for Area 2A vessels participating in the recreational charter fishery and three non-tribal commercial fisheries: a directed commercial fishery, incidental catch of Pacific halibut in the West Coast sablefish fishery, and incidental catch of Pacific halibut in the West Coast salmon troll fishery. In addition, the IPHC sets management measures for the non-tribal directed commercial Pacific halibut fishery (directed commercial fishery), including fishing periods and associated fishing period limits which are announced via IPHC media releases. A fishing period is the period of time during the annual halibut season set by the IPHC when fishing for Pacific halibut is allowed and may span multiple days. A fishing period limit is the maximum amount of Pacific halibut that may be retained and landed by a vessel during one fishing period, and each vessel may only retain Pacific halibut up to the fishing period limit for its vessel class.

As part of this process, the IPHC sets an initial fishing period and fishing period limit in Area 2A for the directed commercial fishery and, if the IPHC determines that the directed commercial fishery allocation for Area 2A has not been exceeded or is not projected to be exceeded after the first fishing period, announces subsequent fishing periods and associated fishing period limits until the Area 2A allocation is or is projected to be reached. Over the last ten years, the number of fishing periods per year has varied between two and five fishing periods. The fishing season for the directed commercial fishery typically operates from late June through August, with fishing periods every other week until the Area 2A directed commercial fishery allocation has been or is projected to be reached. In the past six years (2016–2021), all but one year had three fishing periods; in 2020 there were five fishing periods. Between 2016 and 2021, the directed commercial allocation in Area 2A has ranged between 193,364 and 256,122 lb. (87.71 and 116.18 mt), and the IPHC set fishing periods and fishing period limits to remain within this allocation. As described previously, the Area 2A allocation is determined on an annual basis by the IPHC and may vary from year to year; therefore the directed commercial allocation, as derived through the Catch Sharing Plan's allocation framework, may vary on an annual basis. For most fishing periods during the 2016–2021 seasons, limits were generally set in ascending order, with smaller vessels receiving a lower limit and larger vessels receiving a higher limit. During the past six years, IPHC set one fishing period where all vessel classes were subject to the same fishing period limit. Prior to 2020, fishing periods were 10 hours, and, when setting limits, the IPHC considered the feasibility of a vessel achieving the fishing period limit within this duration of time. The fishing periods were extended to 58 hours

starting in 2020, after a recommendation from the Council to the IPHC and subsequent approval by NMFS, and the IPHC began to set limits under the assumption that more vessels would fish for and achieve the fishing period limit given the extended time for fishing.

Under this proposed action, NMFS would carry out some of the previously mentioned management activities currently conducted by the IPHC. Specifically, NMFS would assume responsibility for issuing vessels permits to fish for Pacific halibut in commercial and recreational charter fisheries in Area 2A, and for issuing annual management measures for the directed commercial fishery. These actions would be in addition to actions NMFS already undertakes such as issuing annual management measures for the Area 2A recreational fisheries (applicable to both charter and private anglers), consistent with the recommendations from the Council and the framework in the Council's Catch Sharing Plan.

Between 2017 and 2019, NMFS, the IPHC, and the Council discussed transitioning specific management activities of the Area 2A fishery from IPHC to NMFS as NMFS and the Council were seen as being able to better address the overlap of Pacific halibut management with domestic fisheries (*e.g.,* groundfish and salmon). At the June 2019 Council meeting, IPHC, NMFS, and the Council agreed to move forward with this transition, with a goal of completing the transition as expeditiously as possible, while maintaining the current management process and structure to minimize disruption in fishery operations. The Council heard public and industry perspectives on the transition of management of the Area 2A commercial halibut fisheries from IPHC to NMFS at its March, September, and November 2020 meetings. In developing this rule, NMFS took into account recommendations from the Council finalized at their November 2020 meeting.

The Council recommended NMFS adopt several permit management measures: issuing permits for all fisheries currently permitted by the IPHC, consisting of the directed, incidental sablefish and salmon commercial fisheries, and recreational charter vessels; setting permit application deadlines; and requiring proof of permit to be on the fishing vessel and made readily available upon request, regardless of the type of permit (*i.e.,* paper or electronic). NMFS considered these recommendations in proposing this rule.

During these Council discussions, the Council also noted that their intention was to continue to discuss directed commercial fishery management for upcoming fishing seasons during its September and November meetings, which are the same meetings during which the Council had previously developed recommendations for the IPHC on the directed commercial fishery, and during which it currently considers recommendations for the Area 2A recreational fishery and other recommendations to the IPHC.

Permitting for Commercial and Recreational Charter Vessels

Currently, no person shall fish for Pacific halibut from a vessel, nor possess Pacific halibut on board a vessel, used either for commercial fishing or as a charter vessel in Area 2A, unless the IPHC has issued a permit valid for fishing in Area 2A to that vessel. Under this proposed rule, NMFS would maintain this requirement for vessels to obtain a permit and would implement a NMFS permitting process. The IPHC issues permits for Area 2A fisheries through a website application and sets permit application deadlines to allow for processing and distribution of permits that aligns with start dates of the incidental and directed commercial fisheries. Under this action, NMFS proposes to use a web-based application with digital submission and delivery of the permit applications and proposes to allow participants to provide either digital or paper proof of permit upon request. Prior to 2020, only the official paper permit mailed by the IPHC to the applicant was allowed for enforcement purposes; after Council discussion with industry and enforcement representatives, the Council recommended that either digital or paper permits are acceptable, as there are no enforcement concerns with either format. NMFS is proposing applications for permits to fish for halibut in Area 2A be required to be submitted by the following dates: (1) incidental salmon fishery permit applications by March 1; (2) incidental sablefish fishery permit applications by March 1; (3) directed commercial fishery permit applications by February 15; and (4) recreational charter vessel applications 15 days prior to participation in the fishery.

NMFS notes that the permit application deadlines for the incidental salmon and sablefish fisheries are two weeks earlier than the same deadlines required by the IPHC (prior to 2020, the incidental sablefish permit deadline was March 15), and are one month before the fisheries open on April 1. The proposed deadline for the directed commercial fishery permit applications is over two months earlier than the existing IPHC deadline for this fishery. The earlier application deadlines will ensure adequate time for NMFS to issue permits in advance of the fishery season start dates and consider the number of applications when determining fishing period limits for the directed commercial fishery. NMFS will issue permits for all applications submitted with the required information and by the applicable deadline under this action. NMFS intends to require application information in addition to what the IPHC requires; specifically, those applying for directed commercial fishery permits must provide vessel length documentation from either the U.S. Coast Guard, state registration form, or a current marine survey. Fishery participants must obtain a new permit each year in order to participate in the Pacific halibut commercial and recreational charter fisheries in Area 2A.

The Regional Administrator may charge fees to cover administrative expenses related to processing and issuance of permits, processing change in ownership or change in vessel registration, divestiture, and appeals of permits. The amount of the fee would be determined in accordance with the NOAA Finance Handbook available at (*https://www.corporateservices.noaa.gov/finance/documents/NOAAFinanceHBTOC_09.06.19.pdf*) and specified on the application form. The fee may not exceed the administrative costs and must be submitted with the application for the application to be considered complete.

Directed Commercial Fishery

The non-tribal directed commercial Pacific halibut fishery is prosecuted in the area south of Point Chehalis, WA (46°53.30′ N lat.). As discussed previously, the IPHC currently manages the fishery through a series of fishing periods with fishing period limits based on the directed commercial fishery allocation distributed by vessel class. The IPHC permit application deadline for this fishery is currently April 30 and the first fishing period limits are announced by the IPHC in mid-to-late May, in advance of the first fishing period (which historically has occurred in late June). This fishery typically operates from late June through August, with fishing periods every other week until the Area 2A directed commercial fishery allocation has been or is projected to be reached. The IPHC uses fishing period limits based on vessel class and the number of permits issued

to help the fishery attain the Area 2A directed commercial fishery allocation while ensuring it is not exceeded. Under this proposed action, NMFS, instead of the IPHC, would implement annual management measures for the directed commercial fishery. Specifically, NMFS will implement directed commercial fishing period(s) and fishing period limits annually through annual proposed and final rules published in the **Federal Register** to ensure the directed commercial fishery allocation is not exceeded.

NMFS will consider any Council recommendations for the annual management measures, as well as public comments received on the proposed rule, when it implements fishing periods, fishing period limits, and any other directed commercial management measures. As noted previously, the Council has stated its intent to develop recommendations on annual directed fishery measures (*e.g.,* timing and duration of the fishing periods) through the same September and November meeting process currently utilized to provide recommendations to the IPHC at its annual meeting.

NMFS will determine directed commercial management measures, including fishing periods and fishing period limits, using similar decision criteria as the IPHC has used to set fishing periods and fishing period limits. The annual rulemaking process may include the announcement of more than one fishing period. In determining fishing period limits, NMFS will consider the directed commercial allocation, vessel class, the number of fishery permit applicants and projected number of participants per vessel class, the average catch of vessels compared to past fishing period limits, and other relevant factors. As the IPHC has done, in setting vessel limits NMFS will take into account the fact that smaller vessels are able to carry less gear and hold fewer Pacific halibut than larger vessels. The intent of these fishing period limits is to ensure that the Area 2A commercial directed fishery does not exceed the directed commercial allocation, while attempting to provide fair and equitable access across participants to an attainable amount of harvest.

As noted previously, NMFS is proposing a permit application deadline for the directed commercial fishery of February 15, which is over two months earlier than the date used by the IPHC. NMFS is proposing this earlier deadline to ensure that directed commercial fishery management measures are in place prior to the initial fishing period(s), traditionally opening in late June. The timing for the annual management measures rule with directed commercial management measures will allow for consideration of any Council recommendations that take place at the September and November meetings, public comments by stakeholders, and the Area 2A catch limit recommendation from the IPHC annual meeting. NMFS intends to annually publish a proposed rule after the Area 2A directed commercial allocation is determined by the IPHC (usually in late January or early February), and will publish a final rule as far in advance of the first directed commercial fishing period as practicable.

During the annual fishing season NMFS may establish additional fishing periods beyond those implemented at the start of the fishing year. For example, if, after the initial directed commercial fishing period(s), the fishery has not attained nor is projected to have attained the directed commercial allocation, NMFS will determine whether additional fishing period(s) are warranted. The decision to add fishing periods in addition to what was published as part of the annual rule establishing the season's management measures will be based on landings information from state fish tickets collected from the initial fishing period(s), and the dual objectives of providing additional opportunity to fishery participants while limiting the risk of exceeding the directed commercial allocation. As soon as practicable after the fishing periods announced in the annual management measures rule have occurred and after analyzing landings data, if the Regional Administrator determines that enough allocation remains to provide additional opportunity across all participants and vessel classes, additional fishing period(s) and applicable fishing period limits will be announced in the **Federal Register**. In the event NMFS takes this inseason action to add additional fishing period(s), fishing period limits will not vary across vessel class and instead will be set at the same amount for each vessel class. Generally, fewer vessels participate in each fishing period as the season progresses (the first fishing period has the highest level of participation and most pounds landed, followed by the second fishing period, etc.). For its inseason management, NMFS is proposing to set vessel limits equal across all size classes when additional fishing periods are determined to be warranted, because the number of vessels participating in each vessel class varies by fishing period and is not the same across years, and participants may choose to engage in any fishing period; thus there is a high degree of uncertainty in the number of participants per vessel class.

Classification

Regulations governing the U.S. fisheries for Pacific halibut are developed by the International Pacific Halibut Commission (IPHC), the Pacific Fishery Management Council, the North Pacific Fishery Management Council, and the Secretary of Commerce. Section 5 of the Northern Pacific Halibut Act of 1982 (Halibut Act, 16 U.S.C. 773c) allows the Regional Council having authority for a particular geographical area to develop regulations governing the allocation and catch of halibut in U.S. Convention waters as long as those regulations do not conflict with IPHC regulations.

This proposed rule has been determined to be not significant for purposes of Executive Order 12866.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities, for the following reasons:

For Regulatory Flexibility Act (RFA) purposes only, NMFS has established a small business size standard for businesses, including their affiliates. A business primarily engaged in commercial fishing (North American Industry Classification System (NAICS) code 11411) is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and has combined annual receipts not in excess of $11 million for all its affiliated operations worldwide (80 FR 81194, December 29, 2015). Previous analyses determined that charterboats are also small businesses (see 77 FR 5477 (February 3, 2012) and 76 FR 2876 (January 18, 2011)). Charter fishing operations are classified under NAICS code 487210, with a corresponding Small Business Association size standard of $7.5 million in annual receipts.

This action would create a permitting system for the Pacific halibut commercial and recreational charter halibut fisheries in Area 2A off of Washington, Oregon, and California. In addition, this action would establish a regulatory framework for the Area 2A Pacific halibut directed commercial fishery that, consistent with the coastwide season dates set by the IPHC, allows NMFS to annually determine

dates and times the fishery is open, fishing period limits, and a process to manage the fishery inseason. The proposed action was developed with input by industry, the public, and the IPHC, and was uncontroversial throughout the Council's public process.

In 2021, the IPHC issued 527 licenses to the recreational charter and commercial fleets for Area 2A. The IPHC issued 93 permits for recreational charter fishery, 190 permits for the directed commercial fishery, 44 permits for incidental commercial Pacific halibut caught in the sablefish, and 200 permits for incidental commercial Pacific halibut caught in the salmon troll fishery. Each affected vessel in these fisheries is a small business, and this proposed rule is considered to equally affect all of these small entities in the same manner, since all vessels participating in these Pacific halibut fisheries are required to have a permit. Additionally, since all vessels in the directed commercial fishery are small businesses, they would be equally affected by the regulatory framework and resulting management measures. Therefore, this rule would not create disproportionate costs between small and large vessels because there are no large entities involved in the halibut fisheries off of the West Coast.

The major impact of halibut management on small entities results from the annual IPHC catch limits for the fishery as a whole and for each IPHC regulatory area, determined independently from this proposed action. Profitability is more heavily influenced by the catch limit decision made by the IPHC, with sector and subarea allocations determined based on the Catch Sharing Plan framework and the allocation formula recommended by the Council. This proposed rule is unlikely to affect overall participation in the directed commercial fishery, since this action would maintain a permit requirement. This action is also unlikely to change the profitability in the commercial and recreational charter fisheries, since profitability is dependent on the amount of allocation available and market forces independent of this action. Therefore, this action will equally impact all vessels in both commercial and recreational charter fisheries, and these revisions will not significantly reduce profit for a substantial number of small entities.

For these reasons, NMFS concludes that the proposed action, if adopted, will not have a significant economic impact on a substantial number of small entities. As a result, an initial regulatory flexibility analysis is not required, and none has been prepared.

This proposed rule contains a collection-of-information requirement subject to review and approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act (PRA). This rule proposes to revise the existing requirements for the collection of information titled ''Northwest Region Federal Fisheries Permits'' (OMB Control Number 0648–0203) by adding a Pacific halibut permit for recreational charter fisheries and a Pacific halibut permit for the commercial fishery. This change will increase the number of respondents for this collection by 550 respondents annually. It will also increase the cost of the collection by $29,150. Public reporting burden for the Pacific halibut permits is estimated to average 20 minutes per respondent, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Public comment is sought regarding: whether this proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the burden estimate; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collection of information, including through the use of automated collection techniques or other forms of information technology. Submit comments on these or any other aspects of the collection of information at *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review'' or by using the search function and entering the control number or title of the collection.

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid OMB Control Number.

List of Subjects in 50 CFR Part 300

Administrative practice and procedure, Antarctica, Canada, Exports, Fish, Fisheries, Fishing, Imports, Indians, Labeling, Marine resources, Reporting and recordkeeping requirements, Russian Federation, Transportation, Treaties, Wildlife.

Dated: July 20, 2022.

Kimberly Damon-Randall,

Acting Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 300, subpart E, is proposed to be amended as follows:

PART 300—INTERNATIONAL FISHERIES REGULATIONS

Subpart E—Pacific Halibut Fisheries

■ 1. The authority citation for part 300, subpart E, continues to read as follows:

Authority: 16 U.S.C. 773–773k.

■ 2. In § 300.61, add definitions for ''Fishing period,'' ''Fishing period limit,'' ''Permit,'' ''Vessel class'' in alphabetical order to read as follows:

§ 300.61 Definitions.

* * * * *

Fishing period means, for purposes of commercial fishing in Commission regulatory Area 2A, dates and/or hours when fishing for Pacific halibut in Area 2A is allowed.

Fishing period limit means, for purposes of commercial fishing in Commission regulatory Area 2A, the maximum amount of Pacific halibut that may be retained and landed by a vessel during one fishing period in Area 2A.

* * * * *

Permit means, for purposes of commercial fishing in Commission regulatory Area 2A, a Pacific halibut fishing permit for Area 2A issued by NMFS pursuant to § 300.63(f).

* * * * *

Vessel class means, for purposes of commercial fishing in Commission regulatory Area 2A, a group of vessels within a specific range of overall length (in feet) (46 CFR 69.9), as designated by the letter A–H pursuant to § 300.63(g).

■ 3. In § 300.63, add paragraphs (f) and (g) to read as follows:

§ 300.63 Catch sharing plan and domestic management measures in Area 2A.

* * * * *

(f) *Pacific Halibut Permits for IPHC Regulatory Area 2A*—(1) *General.* (i) This section applies to persons and vessels that fish for Pacific halibut, or land and retain Pacific halibut, in IPHC Regulatory Area 2A. No person shall fish for Pacific halibut from a vessel, nor land or retain Pacific halibut on board a vessel, used either for commercial fishing or as a recreational charter vessel in IPHC Regulatory Area 2A, unless the NMFS West Coast Region has issued a permit valid for fishing in IPHC Regulatory Area 2A for that vessel.

(ii) A permit issued for a vessel operating in the Pacific halibut fishery in IPHC Regulatory Area 2A shall be valid for one of the following, per paragraph (d) of this section:

(A) The incidental catch during the salmon troll fishery specified in paragraph (b)(2) of this section;

(B) The incidental catch during the sablefish fishery specified in paragraph (b)(3) of this section;

(C) The non-tribal directed commercial fishery during the fishing periods specified in paragraph (g)(1) of this section;

(D) Both the incidental catch during the sablefish fishery specified in paragraph (b)(3) of this section and the non-tribal directed commercial fishery during the fishing periods specified in paragraph (g)(1) of this section; or

(E) The recreational charter fishery.

(iii) A permit issued under paragraph (f) of this section is valid only for the vessel for which it is registered. A change in ownership, documentation, or name of the registered vessel, or transfer of the ownership of the registered vessel will render the permit invalid.

(iv) A vessel owner must contact NMFS if the vessel for which the permit is issued is sold, ownership of the vessel is transferred, the vessel is renamed, or any other reason for which the documentation of the vessel is changed as the change would invalidate the current permit. A new permit application is required if there is a change in any documentation of the vessel. To submit a new permit application follow the procedures outlined under paragraph (f)(2) of this section. If the documentation of the vessel is changed after the deadline to apply for a permit has passed as described at paragraph (f)(2)(ii) of this section, the vessel owner may contact NMFS and provide information on the reason for the documentation change and all permit application information described at paragraph (f)(2) of this section. NMFS may issue a permit, or decline to issue a permit and the applicant may appeal per paragraph (f)(3) of this section.

(v) A permit issued under paragraph (f) of this section must be carried on board that vessel at all times and the vessel operator shall allow its inspection by any authorized officer. The format of this permit may be electronic or paper.

(vi) No individual may alter, erase, mutilate, or forge any permit or document issued under this section. Any such permit or document that is intentionally altered, erased, mutilated, or forged is invalid.

(vii) Permits issued under paragraph (f) of this section are valid only during the calendar year (January 1–December 31) for which it was issued.

(viii) NMFS may suspend, revoke, or modify any permit issued under this section under policies and procedures in title 15 of the U.S. Code, 15 CFR part 904, or other applicable regulations in this chapter.

(2) *Applications*—(i) *Application form.* To obtain a permit, an individual must submit a complete permit application to the NMFS West Coast Region Sustainable Fisheries Division (NMFS) through the NOAA Fisheries Pacific halibut web page at [*web address will be provided when the final rule is published*]. A complete application consists of:

(A) An application form that contains valid responses for all data fields, including information and signatures.

(B) A current copy of the U.S. Coast Guard Documentation Form or state registration form or current marine survey.

(C) Payment of required fees as discussed in paragraph (f)(2)(iv) of this section.

(D) Additional documentation NMFS may require as it deems necessary to make a determination on the application.

(ii) *Deadlines.* (A) Applications for permits for the directed commercial fishery in Area 2A must be received by NMFS no later than 2359 PST on February 15, or by 2359 PST the next business day in February if February 15 is a Saturday, Sunday, or Federal holiday.

(B) Applications for permits which allow for incidental catch of Pacific halibut during the salmon troll fishery and the sablefish primary fishery in Area 2A must be received by NMFS no later than 2359 PST March 1, or by 2359 PST the next business day in March if March 1 is a Saturday, Sunday, or Federal holiday.

(C) Applications for permits for recreational charter vessels which allow for catch of Pacific halibut during the recreational fishery must be received a minimum of 15 days before intending to participate in the fishery, to allow for processing the permit application.

(iii) *Application review and approval.* NMFS shall issue a vessel permit upon receipt of a completed permit application submitted on the NOAA Fisheries website no later than the day before the start date of the fishery the applicant selected. If the application is not approved, NMFS will issue an initial administrative decision (IAD) that will explain the denial in writing. The applicant may appeal NMFS' determination following the process at paragraph (f)(3) of this section. NMFS will decline to act on a permit application that is incomplete or if the vessel or vessel owner is subject to sanction provisions of the Magnuson-Stevens Act at 16 U.S.C. 1858(a) and implementing regulations at 15 CFR part 904, subpart D.

(iv) *Permit fees.* The Regional Administrator may charge fees to cover administrative expenses related to processing and issuance of permits, processing change in ownership or change in vessel registration, divestiture, and appeals of permits. The amount of the fee is determined in accordance with the procedures of the NOAA Finance Handbook for determining administrative costs. Full payment of the fee is required at the time a permit application is submitted.

(3) *Appeals.* In cases where the applicant disagrees with NMFS's decision on a permit application, the applicant may appeal that decision to the Regional Administrator. This paragraph (f)(3) describes the procedures for appealing the IAD on permit actions made in this title under this subpart.

(i) *Who may appeal?* Only an individual who received an IAD that disapproved any part of their application may file a written appeal. For purposes of this section, such individual will be referred to as the ''permit applicant.''

(ii) *Appeal process.* (A) The appeal must be in writing, must allege credible facts or circumstances to show why the criteria in this subpart have been met, and must include any relevant information or documentation to support the appeal. The permit applicant may request an informal hearing on the appeal.

(B) Appeals must be mailed or faxed to: National Marine Fisheries Service, Northwest Region, Sustainable Fisheries Division, ATTN: Appeals, 7600 Sand Point Way NE, Seattle, WA 98115; Fax: 206–526–6426; or delivered to National Marine Fisheries Service at the same address.

(C) Upon receipt of an appeal authorized by this section, the Regional Administrator will notify the permit applicant, and may request additional information to allow action on the appeal.

(D) Upon receipt of sufficient information, the Regional Administrator will decide the appeal in accordance with the permit provisions set forth in this section at the time of the application, based upon information relative to the application on file at NMFS and any additional information

submitted to or obtained by the Regional Administrator, the summary record kept of any hearing and the hearing officer's recommended decision, if any, and such other considerations as the Regional Administrator deems appropriate. The Regional Administrator will notify all interested persons of the decision, and the reasons for the decision, in writing, normally within 30 days of the receipt of sufficient information, unless additional time is needed for a hearing.

(E) If a hearing is requested, or if the Regional Administrator determines that one is appropriate, the Regional Administrator may grant an informal hearing before a hearing officer designated for that purpose after first giving notice of the time, place, and subject matter of the hearing to the applicant. The appellant, and, at the discretion of the hearing officer, other interested persons, may appear personally or be represented by counsel at the hearing and submit information and present arguments as determined appropriate by the hearing officer. Within 30 days of the last day of the hearing, the hearing officer shall recommend in writing a decision to the Regional Administrator.

(F) The Regional Administrator may adopt the hearing officer's recommended decision, in whole or in part, or may reject or modify it. In any event, the Regional Administrator will notify interested persons of the decision, and the reason(s) therefore, in writing, within 30 days of receipt of the hearing officer's recommended decision. The Regional Administrator's decision will constitute the final administrative action by NMFS on the matter.

(iii) *Timing of appeals.* (A) For permit issued under paragraph (f) of this section, if an applicant appeals an IAD, the appeal must be postmarked, faxed, or hand delivered to NMFS no later than 60 calendar days after the date on the IAD. If the applicant does not appeal the IAD within 60 calendar days, the IAD becomes the final decision of the Regional Administrator acting on behalf of the Secretary of Commerce.

(B) Any time limit prescribed in this section may be extended for a period not to exceed 30 days by the Regional Administrator for good cause, either upon his or her own motion or upon written request from the appellant stating the reason(s) therefore.

(iv) *Address of record.* For purposes of the appeals process, NMFS will establish as the address of record, the address used by the permit applicant in initial correspondence to NMFS. Notifications of all actions affecting the applicant after establishing an address of record will be mailed to that address, unless the applicant provides NMFS, in writing, with any changes to that address. NMFS bears no responsibility if a notification is sent to the address of record and is not received because the applicant's actual address has changed without notification to NMFS.

(v) *Status of permits pending appeal.* (A) For all permit actions, the permit registration remains as it was prior to the request until the final decision has been made.

(B) [Reserved]

(g) *Non-tribal directed commercial fishery management.* Each year a portion of Area 2A's overall fishery limit is allocated consistent with the Pacific Fishery Management Council's Catch Sharing Plan to the non-tribal directed commercial fishery and published pursuant to § 300.62. The non-tribal directed commercial fishery takes place in the area south of Point Chehalis, WA (46°53.30′ N lat.).

(1) *Management measures.* Annually, NMFS will determine and publish in the **Federal Register** annual management measures for the upcoming fishing year for the non-tribal directed commercial fishery. This will include dates and lengths for the fishing periods for the Area 2A non-tribal directed commercial fishery, as well as the associated fishing period limits.

(i) *Fishing periods.* NMFS will determine the fishing periods, *e.g.* dates and/or hours that permittees may legally harvest halibut in Area 2A, on an annual basis. This determination will take into account any recommendations provided by the Pacific Fishery Management Council and comments received by the public during the public comment period on the proposed annual management measures rule. The intent of these fishing periods is to ensure the Area 2A Pacific halibut directed commercial allocation is achieved but not exceeded.

(ii) *Fishing period limits.* NMFS will establish fishing period limits, *e.g.* the maximum amount of Pacific halibut that a vessel may retain and land during a specific fishing period, and assign those limits according to vessel class for each fishing period. Fishing period limits may be different across vessel classes (except as described in paragraph (g)(1)(iii) of this section). NMFS will determine fishing period limits following the considerations listed in paragraph (g)(1)(ii)(A) of this section. The intent of these fishing period limits is to ensure that the Area 2A commercial directed fishery does not exceed the directed commercial allocation, while attempting to provide fair and equitable access across fishery participants to an attainable amount of harvest. The limits will be published in annual management measures rules in the **Federal Register** along with a description of the considerations used to determine them.

(A) *Considerations.* When determining fishing period(s) and associated fishing period limits for the directed commercial fishery, NMFS will consider the following factors:

(*1*) The directed commercial fishery allocation;

(*2*) Vessel class;

(*3*) Number of fishery permit applicants and projected number of participants per vessel class;

(*4*) The average catch of vessels compared to past fishing period limits; and

(*5*) Other relevant factors.

(B) *Vessel classes.* Vessel classes are based on overall length (defined at 46 CFR 69.9) shown in the following table:

TABLE 1 TO PARAGRAPH (g)(1)(ii)(B)

Overall length (in feet)	Vessel class
1–25	A
26–30	B
31–35	C
36–40	D
41–45	E
46–50	F
51–55	G
56+	H

(iii) *Inseason action to add fishing periods and associated fishing period limits.* Fishing periods in addition to those originally implemented at the start of the fishing year may be warranted in order to provide the fishery with opportunity to achieve the Area 2A directed commercial fishery allocation, if performance of the fishery during the initial fishing period(s) is different than expected and the directed commercial allocation is not attained through the initial period(s). If NMFS makes the determination that sufficient allocation remains to warrant additional fishing period(s) without exceeding the allocation for the Area 2A directed commercial fishery, the additional fishing period(s) and fishing period limits may be added during the fishing year. If NMFS determines fishing period(s) in addition to those included in an annual management measures rule is warranted, NMFS will set the fishing period limits equal across all vessel classes. The fishing period(s) and associated fishing period limit(s) will be announced in the **Federal Register** and concurrent publication on the hotline. If the amount of directed commercial allocation remaining is determined to be insufficient for an additional fishing

period, the allocation is considered to be taken and the fishery will be closed, as described at paragraph (g)(2) of this section.

(2) *Automatic closure of the non-tribal directed commercial fishery.* The NMFS Regional Administrator or designee will initiate automatic management actions without prior public notice or opportunity to comment. These actions are nondiscretionary and the impacts must have been previously been taken into account.

(i) If NMFS determines that the non-tribal directed commercial fishery has attained its annual allocation or is projected to attain its allocation if additional fishing was to be allowed, the Regional Administrator will take automatic action to close the fishery, via announcement in the **Federal Register** and concurrent notification on the telephone hotline at 206–526–6667 or 800–662–9825.

(ii) [Reserved]

Notices

Federal Register
Vol. 87, No. 142
Tuesday, July 26, 2022

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

Child and Adult Care Food Program: National Average Payment Rates, Day Care Home Food Service Payment Rates, and Administrative Reimbursement Rates for Sponsoring Organizations of Day Care Homes for the Period July 1, 2022 Through June 30, 2023

AGENCY: Food and Nutrition Service, Agriculture (USDA).

ACTION: Notice.

SUMMARY: This notice announces the annual adjustments to the national average payment rates for meals and snacks served in child care centers, outside-school-hours care centers, at-risk afterschool care centers, and adult day care centers; the food service payment rates for meals and snacks served in day care homes; and the administrative reimbursement rates for sponsoring organizations of day care homes, to reflect changes in the Consumer Price Index. Further adjustments are made to these rates to reflect the higher costs of providing meals in Alaska and Hawaii. The adjustments contained in this notice are made on an annual basis each July, as required by the laws and regulations governing the Child and Adult Care Food Program.

Overall, reimbursement rates this year for the Child and Adult Care Food Program increased compared to last year.

DATES: These rates are effective from July 1, 2022 through June 30, 2023.

FOR FURTHER INFORMATION CONTACT: Penny Burke, Branch Chief, Program Monitoring and Operational Support Division, Child Nutrition Programs, Food and Nutrition Service, United States Department of Agriculture, 1320 Braddock Place, Suite 401, Alexandria, Virginia 22314, 303–844–0357.

SUPPLEMENTARY INFORMATION:

Temporary Adjustments Authorized Under the Keep Kids Feed Act of 2022

Child and Adult Care Food Program institutions face continued challenges related to the COVID–19 pandemic. To help alleviate some of those challenges, Section 3 of the Keep Kids Fed Act of 2022 (Public Law 117–158) provides temporary additional funding for each meal and supplement served. This additional reimbursement amount will be available beginning July 1, 2022 and ending on June 30, 2023. The law temporarily provides an additional reimbursement in the amount of 10 cents for each meal and supplement served under the program authorized by section 17 of the Richard B. Russell National School Act (42 U.S. C. 1766). Additionally, the Keep Kids Fed Act of 2022 (Public Law 117–158) authorized a tier II family or group day care home described in subsection (f)(3)(A)(iii) of section 17 of the Richard B. Russell National School Lunch Act (42 U.S.C. 1766) to be considered a tier I family or group day care home for purposes of the program authorized under that section for the same period. This temporary measure will provide tier II homes with tier I reimbursement rates only for the time period beginning July 1, 2022 and ending on June 30, 2023.

Background

Pursuant to sections 4, 11, and 17 of the Richard B. Russell National School Lunch Act (42 U.S.C. 1753, 1759a and 1766), section 4 of the Child Nutrition Act of 1966 (42 U.S.C. 1773) and 7 CFR 226.4, 226.12 and 226.13 of the Program regulations, notice is hereby given of the new payment rates for institutions participating in the Child and Adult Care Food Program (CACFP). As provided for under the law, all rates in the CACFP must be revised annually, on July 1, to reflect changes in the Consumer Price Index (CPI), published by the Bureau of Labor Statistics of the United States Department of Labor, for the most recent 12-month period. These rates are in effect during the period July 1, 2022 through June 30, 2023.

Adjusted Payments

The following national average payment factors and food service payment rates for meals and snacks are in effect from July 1, 2022 through June 30, 2023. All amounts are expressed in dollars or fractions thereof. Due to a higher cost of living, the reimbursements for Alaska and Hawaii are higher than those for all other States. The District of Columbia, Virgin Islands, Puerto Rico, and Guam use the figures specified for the contiguous States. These rates do not include the value of USDA Foods or cash-in-lieu of USDA Foods, which institutions receive as additional assistance for each lunch or supper served to participants under the Program. A notice announcing the value of USDA Foods and cash-in-lieu of USDA Foods is published separately in the **Federal Register**. Adjustments to the national average payment rates for all meals served under the Child and Adult Care Food Program are rounded down to the nearest whole cent.

National Average Payment Rates for Centers (Including Temporary Increases Authorized by the Keep Kid Fed Act Which Expire on June 30, 2023)

The changes in the national average payment rates for centers reflect a 7.40 percent increase during the 12-month period from May 2021 to May 2022 (from 303.481 in May 2021, as previously published in the **Federal Register**, to 325.952 in May 2022) in the food away from home series of the CPI for All Urban Consumers.

Payments for breakfasts served are: *Contiguous States*—paid rate—45 cents (12 cent increase from 2021–2022 annual level), reduced price rate—1 dollar and 91 cents (24 cents increase), free rate—2 dollar and 21 cents (24 cents increase); *Alaska*—paid rate—64 cents (14 cent increase), reduced price rate—3 dollars and 18 cents (33 cents increase), free rate—3 dollars and 48 cents (33 cents increase); *Hawaii*—paid rate –50 cents (12 cent increase), reduced price rate—2 dollars and 26 cents (27 cents increase), free rate—2 dollars and 56 cents (27 cents increase).

Payments for lunch or supper served are: *Contiguous States*—paid rate—47 cents (12 cents increase from 2021–2022 annual level), reduced price rate—3 dollars and 63 cents (37 cents increase), free rate—4 dollars and 03 cents (37 cents increase); *Alaska*—paid rate—71 cents (14 cents increase), reduced price rate—6 dollars and 07 cents (53 cents increase), free rate—6 dollars and 47 cents (53 cents increase); *Hawaii*—paid rate—54 cents (13 cents increase), reduced price rate—4 dollars and 30

cents (42 cents increase), free rate—4 dollars and 70 cents (42 cents increase).

Payments for snack served are: *Contiguous States*—paid rate—19 cents (10 cents increase from 2021–2022 annual level), reduced price rate—64 cents (14 cents increase), free rate—1 dollar and 18 cents (18 cents increase); *Alaska*—paid rate—26 cents (12 cents increase), reduced price rate—97 cents (16 cents increase), free rate—1 dollar and 85 cents (22 cents increase); *Hawaii*—paid rate—21 cents (11 cent increase), reduced price rate—73 cents (15 cents increase), free rate—1 dollar and 36 cents (19 cents increase).

Food Service Payment Rates for Day Care Homes (Including Temporary Increases Authorized by the Keep Kids Fed Act of 2022 Which Expires on June 30, 2023)

The changes in the food service payment rates for day care homes reflect a 11.91 percent increase during the 12-month period from May 2021 to May 2022 (from 255.516 in May 2021, as previously published in the **Federal Register**, to 285.953 in May 2022) in the food at home series of the CPI for All Urban Consumers.

Payments [1] for breakfast served are: *Contiguous States*—Tier I—1 dollar and 66 cents (26 cents increase from 2021–2022 annual level) and Tier II—1 dollar and 66 cents (1 dollar and 15 cent increase); *Alaska*—Tier I—2 dollars and 59 cents (36 cent increase) and Tier II—2 dollars and 59 cents (1 dollar and 80 cent increase); *Hawaii*—Tier I—1 dollar and 91 cents (28 cent increase) and Tier II—1 dollar and 91 cents (1 dollar 33 cent increase).

Payments for lunch and supper served are: *Contiguous States*—Tier I—3 dollars and 04 cents (41 cents increase from 2021–2022 annual level) and Tier II—3 dollars and 04 cents (1 dollar and 45 cent increase); *Alaska*—Tier I—4 dollars and 87 cents (61 cents increase) and Tier II—4 dollars and 87 cents (2 dollar and 30 cent increase); *Hawaii*—Tier I—3 dollars and 55 cents (47 cents increase) and Tier II—3 dollars and 55 cents (1 dollar 69 cent increase).

Payments for snack served are: *Contiguous States*—Tier I—97 cents (19 cents increase from 2021—2022 annual level) and Tier II—97 cents (76 cents increase); *Alaska*—Tier I—1 dollar and 52 cents (25 cent increase) and Tier II—Tier I—1 dollar and 52 cents (1 dollar 17 cent increase); *Hawaii*—Tier I—1 dollar and 12 cents (21 cents increase) and Tier II—1 dollar and 12 cents (87 cents increase).

Administrative Reimbursement Rates for Sponsoring Organizations of Day Care Homes

The changes in the administrative reimbursement rates for sponsoring organizations of day care homes reflect an 8.58 percent increase during the 12-month period, May 2021 to May 2022 (from 269.195 in May 2021, as previously published in the **Federal Register**, to 292.296 in May 2022) in the series for all items of the CPI for All Urban Consumers.

Monthly administrative payments to sponsors for each sponsored day care home are: *Contiguous States*—Initial 50 homes—137 dollars (11 dollars increase from 2021—2022 annual level), next 150 homes—104 dollars (8 dollars increase), next 800 homes—81 dollars (6 dollars increase), each additional home—72 dollars (6 dollars increase); *Alaska*—Initial 50 homes—221 dollars (17 dollars increase), next 150 homes—169 dollars (14 dollars increase), next 800 homes—132 dollars (11 dollars increase), each additional home—116 dollars (9 dollars increase); *Hawaii*—Initial 50 homes—160 dollars (13 dollars increase), next 150 homes—122 dollars (10 dollars increase), next 800 homes—95 dollars (7 dollars increase), each additional home—84 dollars (7 dollars increase).

Payment Chart Including Additional Temporary Reimbursement From the Keep Kids Fed Act of 2022

The following chart illustrates the national average payment factors and food service payment rates for meals and snacks in effect for the school year beginning July 1, 2022 and ending June 30, 2022 and includes the additional reimbursement authorized by the Keep Kids Fed Act of 2022 (Pub. L. 117–158).

BILLING CODE 3410–30–P

[1] The Keep Kids Fed Act of 2022 (Pub. L. 117–158) authorized an additional 10 cent reimbursement per meal or supplement served under the program for the school year beginning July 1, 2022 and ending June 30, 2023. Additionally, all Tier II family daycare homes shall be reimbursed at the Tier I rate for the school year beginning July 1, 2022 and ending June 30, 2023.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

National School Lunch, Special Milk, and School Breakfast Programs, National Average Payments/Maximum Reimbursement Rates

AGENCY: Food and Nutrition Service, Agriculture (USDA).

ACTION: Notice.

SUMMARY: This Notice announces the annual adjustments to the national average payments, the amount of money the Federal Government provides States for lunches, afterschool snacks, and breakfasts served to children

participating in the National School Lunch and School Breakfast Programs; to the maximum reimbursement rates, the maximum per lunch rate from Federal funds that a State can provide a school food authority for lunches served to children participating in the National School Lunch Program; and to the rate of reimbursement for a half-pint of milk served to non-needy children in a school or institution that participates in the Special Milk Program for Children. The annual payments and rates adjustments for the National School Lunch and School Breakfast Programs reflect changes in the Food Away From Home series of the Consumer Price Index for All Urban Consumers. The annual rate adjustment for the Special Milk Program reflects changes in the Producer Price Index for Fluid Milk Products. Further adjustments are made to these rates to reflect higher costs of providing meals in Alaska, Guam, Hawaii, Puerto Rico, and the Virgin Islands. The payments and rates are prescribed on an annual basis each July. Overall, reimbursement rates this year for the National School Lunch, Breakfast Programs and the Special Milk Program increased compared to last year.

DATES: These rates are effective from July 1, 2022 through June 30, 2023.

FOR FURTHER INFORMATION CONTACT: Penny Burke, Branch Chief, Program Monitoring and Operational Support Division, Child Nutrition Programs, Food and Nutrition Service, United States Department of Agriculture, 1320 Braddock Place, Suite 401, Alexandria, VA 22314, 303–844–0357.

SUPPLEMENTARY INFORMATION:

Temporary Adjustments Authorized Under the Keep Kids Fed Act of 2022

School meal operators face continued challenges related to the COVID–19 pandemic. To help alleviate some of those challenges, temporary additional funding for school lunch and school breakfast has been authorized under Section 2 of the Keep Kids Fed Act of 2022 (Pub. L. 117–158). This temporary funding will provide an additional reimbursement in the amount of 40 cents for each lunch served under the school lunch program authorized under the Richard B. Russell National School Lunch Act (42 U.S.C. 1751), and an additional reimbursement in the amount of 15 cents for each breakfast served under the breakfast program established by section 4 of the Child Nutrition Act of 1966 (42 U.S.C. 1773). These additional reimbursement amounts shall only be available for the school year beginning July 1, 2022 and ending on June 30, 2023.

Background

Special Milk Program for Children—Pursuant to section 3 of the Child Nutrition Act of 1966, as amended (42 U.S.C. 1772), the Department announces the rate of reimbursement for a half-pint of milk served to non-needy children in a school or institution that participates in the Special Milk Program for Children. This rate is adjusted annually to reflect changes in the Producer Price Index for Fluid Milk Products, published by the Bureau of Labor Statistics of the Department of Labor.

National School Lunch and School Breakfast Programs—Pursuant to sections 11 and 17A of the Richard B. Russell National School Lunch Act, (42 U.S.C. 1759a and 1766a), and section 4 of the Child Nutrition Act of 1966 (42 U.S.C. 1773), the Department annually announces the adjustments to the National Average Payment Factors and to the maximum Federal reimbursement rates for lunches and afterschool snacks served to children participating in the National School Lunch Program and breakfasts served to children participating in the School Breakfast Program. Adjustments are prescribed each July 1, based on changes in the Food Away From Home series of the Consumer Price Index for All Urban Consumers, published by the Bureau of Labor Statistics of the Department of Labor.

Lunch Payment Levels—Section 4 of the Richard B. Russell National School Lunch Act (42 U.S.C. 1753) provides general cash for food assistance payments to States to assist schools in purchasing food. The Richard B. Russell National School Lunch Act provides two different section 4 payment levels for lunches served under the National School Lunch Program. The lower payment level applies to lunches served by school food authorities in which less than 60 percent of the lunches served in the school lunch program during the second preceding school year were served free or at a reduced price. The higher payment level applies to lunches served by school food authorities in which 60 percent or more of the lunches served during the second preceding school year were served free or at a reduced price.

To supplement these section 4 payments, section 11 of the Richard B. Russell National School Lunch Act (42 U.S.C.1759(a)) provides special cash assistance payments to aid schools in providing free and reduced price lunches. The section 11 National Average Payment Factor for each reduced price lunch served is set at 40 cents less than the factor for each free lunch.

As authorized under sections 8 and 11 of the Richard B. Russell National School Lunch Act (42 U.S.C. 1757 and 1759a), maximum reimbursement rates for each type of lunch are prescribed by the Department in this Notice. These maximum rates are to ensure equitable disbursement of Federal funds to school food authorities.

Performance-Based Reimbursement—In addition to the funding mentioned above, school food authorities certified as meeting the meal pattern and nutrition standard requirements set forth in 7 CFR parts 210 and 220 are eligible to receive performance-based cash assistance for each reimbursable lunch served (an additional eight cents per lunch available beginning July 1, 2022 and adjusted annually thereafter).

Afterschool Snack Payments in Afterschool Care Programs—Section 17A of the Richard B. Russell National School Lunch Act (42 U.S.C. 1766a) establishes National Average Payments for free, reduced price and paid afterschool snacks as part of the National School Lunch Program.

Breakfast Payment Factors—Section 4 of the Child Nutrition Act of 1966 (42 U.S.C. 1773) establishes National Average Payment Factors for free, reduced price, and paid breakfasts served under the School Breakfast Program and additional payments for free and reduced price breakfasts served in schools determined to be in ''severe need'' because they serve a high percentage of needy children.

Adjusted Payments

The following specific section 4, section 11, and section 17A National Average Payment Factors and maximum reimbursement rates for lunch, the afterschool snack rates, and the breakfast rates are in effect from July 1, 2022 through June 30, 2023. Due to a higher cost of living, the average payments and maximum reimbursements for Alaska, Guam, Hawaii, Puerto Rico, and the Virgin Islands are higher than those for all other States. The District of Columbia uses figures specified for the contiguous States. These rates do not include the value of USDA Foods or cash-in-lieu of USDA Foods which schools receive as additional assistance for each meal served to participants under the Program. A notice announcing the value of USDA Foods and cash-in-lieu of USDA Foods is published separately in the **Federal Register**.

Adjustments to the national average payment rates for all lunches served

under the National School Lunch Program, breakfasts served under the School Breakfast Program, and afterschool snacks served under the National School Lunch Program are rounded down to the nearest whole cent.

In addition to the adjustments to the national average payment rates, beginning July 1, 2022 and ending June 30, 2023, Congress has authorized, under the Keep Kids Fed Act of 2022 (Pub. L. 117–158), an additional temporary 40 cents reimbursement for each lunch served under the National School Lunch Program and an additional temporary 15 cents reimbursement for each breakfast served under the School Breakfast Program.

Special Milk Program Payments

For the period July 1, 2022 through June 30, 2023, the rate of reimbursement for a half-pint of milk served to a non-needy child in a school or institution that participates in the Special Milk Program is 27.00 cents reflecting an increase of 5 cents from the School Year (SY) 2021–2022 level. This change is based on the 22.74 percent increase in the Producer Price Index for Fluid Milk Products from May 2021 to May 2022.

As a reminder, schools or institutions with pricing programs that elect to serve milk free to eligible children continue to receive the average cost of a half-pint of milk (the total cost of all milk purchased during the claim period divided by the total number of purchased half-pints) for each half-pint served to an eligible child.

National School Lunch Program Payments (Including Temporary Increases Authorized by the Keep Kids Fed Act Which Expire on June 30, 2023)

Overall, payments for the National School Lunch Program and the Afterschool Snack Program increased from last year's payments due to additional funds for lunch reimbursement made available under the Keep Kids Fed Act of 2022 (P.L. 117–158) and a 7.40 percent increase in the national average payment rates for schools and residential child care institutions for the period July 1, 2022 through June 30, 2023 in the Consumer Price Index for All Urban Consumers for the Food Away From Home series during the 12-month period May 2021 to May 2022 (from a level of 303.481 in May 2021, as previously published in the **Federal Register**, to 325.952 in May 2022).

These changes are reflected below.

Section 4 National Average Payment Factors—In school food authorities that served less than 60 percent free and reduced price lunches in SY 2020–2021, the payments for meals served are: *Contiguous States*—paid rate—77 cents (42 cents increase from the SY 2021—2022 level), free and reduced price rate—77 cents (42 cents increase), maximum rate—85 cents (42 cents increase); *Alaska*—paid rate—1 dollar 1 cents (44 cents increase), free and reduced price rate—1 dollar 1 cents (44 cents increase), maximum rate—1 dollar 11 cents (43 cents increase); *Guam, Hawaii, Puerto Rico, and the Virgin Islands*—paid rate—84 cents (43 cents increase), free and reduced price rate—84 cents (43 cents increase), maximum rate—92 cents (43 cents increase).

In school food authorities that served 60 percent or more free and reduced price lunches in School Year 2020—2021, payments are: *Contiguous States*—paid rate—79 cents (42 cents increase from the SY 2021—2022 level), free and reduced price rate—79 cents (42 cents increase), maximum rate—85 cents (42 cents increase); *Alaska*—paid rate—1 dollar 3 cents (44 cents increase), free and reduced price rate—1 dollar 3 cents (44 cents increase), maximum rate—1 dollar 11 cents (43 cents increase); *Guam, Hawaii, Puerto Rico and the Virgin Islands*—paid rate—86 cents (43 cents increase), free and reduced price rate—86 cents (43 cents increase), maximum rate—92 cents (43 cents increase).

School food authorities certified to receive the performance-based cash assistance will receive an additional 8 cents (adjusted annually) added to the above amounts as part of their section 4 payments.

Section 11 National Average Payment Factors—Contiguous States—free lunch—3 dollars and 56 cents (25 cents increase from the SY 2021—2022 level), reduced price lunch—3 dollars and 16 cents (25 cents increase); *Alaska*—free lunch—5 dollars and 76 cents (39 cents increase), reduced price lunch—5 dollars and 36 cents (39 cents increase); *Guam, Hawaii, Puerto Rico and the Virgin Islands*—free lunch—4 dollars and 16 cents (29 cents increase), reduced price lunch—3 dollars and 76 cents (29 cents increase).

Afterschool Snacks in Afterschool Care Programs—The payments are: *Contiguous States*—free snack—1 dollar and 8 cents (8 cents increase from the SY 2021—2022 level), reduced price snack—54 cents (4 cents increase), paid snack—9 cents (no increase); *Alaska*—free snack –1 dollar and 75 cents (12 cents increase), reduced price snack—87 cents (6 cents increase), paid snack—16 cents (2 cents increase); *Guam, Hawaii, Puerto Rico and the Virgin Islands*—free snack—1 dollar and 26 cents (9 cents increase), reduced price snack—63 cents (5 cent increase), paid snack—11 cents (1 cent increase).

School Breakfast Program Payments (Including Temporary Increases Authorized by the Keep Kids Fed Act Which Expire on June 30, 2023)

Overall, payments for the National School Breakfast Program either remained the same or increased from last year's payments due to additional funds for breakfast reimbursement made available under the Keep Kids Fed Act of 2022 (Pub. L. 117–158) and a 7.40 percent increase in the national average payment rates for schools and residential child care institutions for the period July 1, 2022 through June 30, 2023 in the Consumer Price Index for All Urban Consumers in the Food Away from Home series during the 12-month period May 2021 to May 2022 (from a level of 303.481 in May 2021, as previously published in the **Federal Register**, to 325.952 in May 2022).

These changes are reflected below.

For schools ''not in severe need'' the payments are: *Contiguous States*—free breakfast—2 dollars and 26 cents (29 cents increase from the SY 2021—2022 level), reduced price breakfast—1 dollar and 96 cents (29 cents increase), paid breakfast—50 cents (17 cent increase); *Alaska*—free breakfast—3 dollars and 53 cents (38 cents increase), reduced price breakfast—3 dollars and 23 cents (38 cents increase), paid breakfast—69 cents (19 cent increase); *Guam, Hawaii, Puerto Rico and the Virgin Islands*—free breakfast—2 dollars and 61 cents (32 cents increase), reduced price breakfast—2 dollars and 31 cents (32 cents increase), paid breakfast—55 cents (17 cents increase).

For schools in ''severe need'' the payments are: *Contiguous States*—free breakfast—2 dollars and 67 cents (32 cents increase from the SY 2021—2022 level), reduced price breakfast—2 dollars and 37 cents (32 cents increase), paid breakfast—50 cents (17 cent increase); *Alaska*—free breakfast—4 dollars and 21 cents (43 cents increase), reduced price breakfast—3 dollars and 91 cents (43 cents increase), paid breakfast—69 cents (19 cent increase); *Guam, Hawaii, Puerto Rico and the Virgin Islands*—free breakfast—3 dollars and 09 cents (35 cents increase), reduced price breakfast—2 dollars and 79 cents (35 cents increase), paid breakfast—55 cents (17 cent increase).

Payment Chart Including Additional Temporary Reimbursement The following chart illustrates the temporary increased reimbursement for breakfast and lunch as authorized under the Keep Kids Fed Act of 2022 (Pub. L. 117–158).

Lunch National Average Payment Factors have sections 4 and 11 already combined to indicate the per lunch amount; the maximum lunch reimbursement rates and the breakfast National Average Payment Factors including severe need schools. All amounts are expressed in dollars or fractions thereof. The payment factors and reimbursement rates used for the District of Columbia are those specified for the contiguous States.

DEPARTMENT OF COMMERCE

Census Bureau

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Generic Clearance for Census Bureau Field Tests and Evaluations

AGENCY: Census Bureau, Commerce.

ACTION: Notice of Information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act (PRA) of 1995, invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment on the proposed extension of the Generic Clearance for Census Bureau Field Tests and Evaluations, prior to the submission of the information collection request (ICR) to OMB for approval.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before September 26, 2022.

ADDRESSES: Interested persons are invited to submit written comments by email to Jennifer Hunter Childs (*jennifer.hunter.childs@census.gov*). Please reference Generic Clearance for Census Bureau Field Tests and Evaluations in the subject line of your comments. You may also submit comments, identified by Docket Number USBC–2022–0013, to the Federal e-Rulemaking Portal: *https://www.regulations.gov.* All comments received are part of the public record. No comments will be posted to *https://www.regulations.gov* for public viewing until after the comment period has closed. Comments will generally be posted without change. All Personally Identifiable Information (for example, name and address) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected information. You may submit attachments to electronic comments in Microsoft Word, Excel, or Adobe PDF file formats.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Jennifer Hunter Childs, Assistant Center Chief, Emerging Methods and Applications, Center for Behavioral Science Methods, (202) 603–4827, *jennifer.hunter.childs@census.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

The U.S. Census Bureau plans to request an extension of the current OMB approval to conduct a series of studies to research and evaluate how to improve data collection activities for data collection programs at the Census Bureau. These studies will explore how the Census Bureau can improve efficiency, data quality, and response rates and reduce respondent burden in future census and survey operations, evaluations and experiments.

This information collection will operate as a generic clearance. The estimated number of respondents and annual reporting hours requested cover both the known and yet to be determined tests. A generic clearance is needed for these tests because though each share similar methodology, the exact number of tests and the explicit details of each test to be performed has yet to be determined. Once information collection plans are defined, they will be submitted on an individual basis in order to keep OMB informed as these tests progress.

The Census Bureau plans to test the use of new and improved data collection techniques for self-enumeration and interviewer data-collection tasks surrounding and following the ongoing census and survey operations. The research and evaluation may include: developing alternative enumeration or follow-up questionnaires; usability issues; conducting interviews or debriefings; and non-English language training and interviews. To study enumeration, the Census Bureau may conduct the enumeration directly with a household member or knowledgeable respondent. The questions asked in these studies will be typical census or survey questions and questions related to that content, along with potential attitudinal and satisfaction debriefing questions.

II. Method of Collection

The information will be collected through observations, self-response, face-face interviews, and/or telephone interviews.

III. Data

OMB Control Number: 0607–0971.

Form Number(s): Not yet determined.

Type of Review: Regular submission, Request for an Extension, without Change, of a Currently Approved Collection.

Affected Public: Individuals or households, businesses or other for profit, farms.

Estimated Number of Respondents: 100,000 per year.

Estimated Time per Response: 25 minutes.

Estimated Total Annual Burden Hours: 41,667 hours annually.

Estimated Total Annual Cost to Public: There is no cost to the respondent other than time to answer the information request.

Respondent's Obligation: Voluntary or Mandatory, depending on cited authority.

Legal Authority: Data collection for this project is authorized under the authorizing legislation for the questionnaire being tested. This may be Title 13, Sections 131, 141, 161, 181, 182, 193, and 301 for Census Bureau sponsored surveys, and Title 13 and 15 for surveys sponsored by other Federal agencies. We do not now know what other titles will be referenced, since we do not know what survey questionnaires will be pretested during the course of the clearance.

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed

information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include, or summarize, each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

[FR Doc. 2022–15982 Filed 7–25–22; 8:45 am]

BILLING CODE 3510–07–P

DEPARTMENT OF COMMERCE

Bureau of Industry and Security

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; National Security and Critical Technology Assessments of the U.S. Industrial Base

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on April 4, 2022, during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: Bureau of Industry and Security, Commerce.

Title: National Security and Critical Technology Assessments of the U.S. Industrial Base.

OMB Control Number: 0694–0119.

Form Number(s): None.

Type of Request: Regular submission, revision, and extension of a current information collection.

Number of Respondents: 28,000.

Average Hours per Response: 8 to 14 hours.

Burden Hours: 308,000.

Needs and Uses: The Bureau of Industry and Security (BIS) conducts surveys and assessments of critical U.S. industrial sectors and technologies. Undertaken at the request of various policy, research and development (R&D), and program and planning organizations within the Department of Defense and the Armed Services, Department of Homeland Security (DHS), NASA and other agencies, BIS research, data collection and analysis provide needed information to benchmark industry performance and raise awareness of diminishing manufacturing capabilities.

Affected Public: Business or other for-profit organizations.

Frequency: On Occasion.

Respondent's Obligation: Mandatory.

Legal Authority: Section 705 of the Defense Production Act of 1950, as amended, Executive Orders 12656 and 13603.

This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the collection or the OMB Control Number 0694–0119.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

International Trade Administration

[A–533–871]

Finished Carbon Steel Flanges From India: Final Results of Changed Circumstances Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On June 6, 2022, the U.S. Department of Commerce (Commerce) published its notice of initiation and preliminary results of a changed circumstances review (CCR) of the antidumping duty (AD) order on finished carbon steel flanges (flanges) from India. For these final results, Commerce finds that BFN Forgings Private Limited (BFN) is the successor-in-interest to Bebitz Flanges Works Private Limited (Bebitz) and should be assigned the same AD cash deposit rate for purposes of determining AD liability.

DATES: Applicable July 26, 2022.

FOR FURTHER INFORMATION CONTACT: James R. Hepburn or Fred Baker, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4885 or (202) 482–2924, respectively.

SUPPLEMENTARY INFORMATION:

Background

On April 14, 2022, BFN requested that Commerce conduct an expedited CCR of the AD order on flanges from India [1] to find that BFN is the successor-in-interest to Bebitz.[2] On June 6, 2022, Commerce initiated a CCR and preliminarily determined that BFN is the successor-in-interest to Bebitz.[3] In the *Initiation and Preliminary Results,* we provided all interested parties with an opportunity to comment.[4] We received no comments from any interested party.

[1] *See Finished Carbon Steel Flanges from India and Italy: Antidumping Duty Orders,* 82 FR 40136 (August 24, 2017) (*Order*).

[2] *See* BFN's Letter, ''Finished Carbon Steel Flanges from India: Request for an Expedited Successor-in-Interest Changed Circumstances Review,'' dated April 14, 2022.

[3] *See Finished Carbon Steel Flanges from India: Notice of Initiation and Preliminary Results of Changed Circumstances Review,* 87 FR 34251 (June 6, 2022) (*Initiation and Preliminary Results*), and accompanying Preliminary Decision Memorandum (PDM).

[4] *Id.,* 87 FR at 34252.

Scope of the Order

The merchandise covered by the *Order* is flanges from India. The merchandise subject to the *Order* is currently classified under subheadings 7307.91.5010 and 7307.91.5050 of the Harmonized Tariff Schedule of the United States (HTSUS). They may also be entered under HTSUS subheadings 7307.91.5030 and 7307.91.5070. The HTSUS subheadings are provided for convenience and customs purposes; the written description of the scope is dispositive.[5]

Final Results of Changed Circumstances Review

Because the record contains no information or evidence that calls into question the *Initiation and Preliminary Results,* and because we received no comments from interested parties to the contrary, for the reasons stated in the *Initiation and Preliminary Results,*[6] Commerce finds that BFN is the successor-in-interest to Bebitz.

Instructions to U.S. Customs and Border Protection

As a result of these final results and consistent with established practice, we find that, as the successor-in-interest to Bebitz, entries of flanges from India produced and/or exported by BFN should be subject to the cash deposit rate previously assigned to Bebitz. Commerce will instruct U.S. Customs and Border Protection to suspend liquidation of all shipments of subject merchandise produced and/or exported by BFN and entered, or withdrawn from warehouse, for consumption on or after the publication date of this notice in the **Federal Register** at 0.00 percent, which is the current AD cash deposit rate in effect for subject merchandise produced and/or exported by Bebitz.[7] This cash deposit rate shall remain in effect until further notice.

Administrative Protective Order

This notice serves as a final reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

Notification to Interested Parties

We are issuing and publishing these final results in accordance with sections 751(b)(1) and 777(i)(1) of the Tariff Act of 1930, as amended, and 19 CFR 351.216(e), 351.221(b), and 351.221(c)(3).

Dated: July 20, 2022.

Lisa W. Wang,

Assistant Secretary for Enforcement and Compliance.

International Trade Administration

Notice of Scope Ruling Applications Filed in Antidumping and Countervailing Duty Proceedings

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) received scope ruling applications, requesting that scope inquiries be conducted to determine whether identified products are covered by the scope of antidumping duty (AD) and/or countervailing duty (CVD) orders and that Commerce issue scope rulings pursuant to those inquiries. In accordance with Commerce's regulations, we are notifying the public of the filing of the scope ruling applications listed below in the month of June 2022.

DATES: Applicable July 26, 2022.

FOR FURTHER INFORMATION CONTACT: Terri Monroe, AD/CVD Operations, Customs Liaison Unit, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230, telephone: (202) 482–1384.

Notice of Scope Ruling Applications: In accordance with 19 CFR 351.225(d)(3), we are notifying the public of the following scope ruling applications related to AD and CVD orders and findings filed in or around the month of June 2022. This notification includes, for each scope application: (1) identification of the AD and/or CVD orders at issue (19 CFR 351.225(c)(1)); (2) concise public descriptions of the products at issue, including the physical characteristics (including chemical, dimensional and technical characteristics) of the products (19 CFR 351.225(c)(2)(ii)); (3) the countries where the products are produced and the countries from where the products are exported (19 CFR 351.225(c)(2)(i)(B)); (4) the full names of the applicants; and (5) the dates that the scope applications were filed with Commerce and the name of the scope segment where the scope applications can be found on Commerce's online e-filing and document management system, Antidumping and Countervailing Duty Electronic Service System (ACCESS).[1] This notice does not include applications which have been rejected and not properly resubmitted. The scope ruling applications listed below are available on ACCESS, at *https://access.trade.gov.*

Scope Ruling Applications

Aluminum Extrusions from the People's Republic of China (China) (A–570–967/C–570–968); aluminum pair ramps; [2] produced in and exported from China; submitted by Central Purchasing, LLC dba Harbor Freight Tools (Harbor Freight); June 1, 2022; ACCESS scope segment ''Harbor Freight Aluminum Pair Ramps.''

Crystalline Silicon Photovoltaic Cells, Whether or Not Assembled into Modules (Solar Cells) from China (A–570–979/C–570–980); Power Solar 3-Port 100W solar panel (model A2431) (3 Port 100W Solar Panel); [3] produced in

[1] *See Regulations to Improve Administration and Enforcement of Antidumping and Countervailing Duty Laws,* 86 FR 52300, 52316 (September 20, 2021) (''It is our expectation that the **Federal Register** list will include, where appropriate, for each scope application the following data: (1) identification of the AD and/or CVD orders at issue; (2) a concise public summary of the product's description, including the physical characteristics (including chemical, dimensional and technical characteristics) of the product; (3) the country(ies) where the product is produced and the country from where the product is exported; (4) the full name of the applicant; and (5) the date that the scope application was filed with Commerce.'').

[2] The products subject to Harbor Freight's request include aluminum pair ramps with bolted-on polyester straps with S-hooks and ratchets, produced in and exported from China under HTSUS code 8708.29.5060. The dimensions and loading capacities of the aluminum pair ramps are approx. 12 x 90 inches and 3,000 pounds, 13 x 77 inches and 1,250 pounds, and 12 x 90 inches and 1,500 pounds.

[3] Anker's PowerSolar 3-Port 100W solar panel, Model A2431, is a foldable outdoor panel for charging cell phones and other portable electronic devices. The panel provides total maximum output of 100 Watts. The solar panel is laminated and encased in sewn fabric. The unfolded panel dimensions are approx. 57.7 x 20.7 x 1.8 inches (1,446 x 525 x 45 mm). The dimensions of the retracted case are approx. 20.7 x 18.5 x 3.3 inches (525 x 470 x 85 mm). The unit weighs approx. 11.0 lbs (5 kg). The solar cells have visible parallel grid collector metallic wire lines every 1 mm across each solar panel. The unit has two storage pockets for

and exported from China; submitted by Anker Innovations Limited (Anker); June 2, 2022; ACCESS scope segment ''Anker 3 Port 100W Solar Panel.''

Solar Cells from China (A–570–979/C–570–980); Renogy brand off-grid solar panels; [4] produced in and exported from China; submitted by RNG International Inc. (RNG); June 10, 2022; ACCESS scope segment ''RNG International.''

Notification to Interested Parties

This list of scope ruling applications is not an identification of scope inquiries that have been initiated. In accordance with 19 CFR 351.225(d)(1), if Commerce has not rejected a scope ruling application nor initiated the scope inquiry within 30 days after the filing of the application, the application will be deemed accepted and a scope inquiry will be deemed initiated the following day—day 31.[5] Commerce's practice generally dictates that where a deadline falls on a weekend, Federal holiday, or other non-business day, the appropriate deadline is the next business day.[6] Accordingly, if the 30th day after the filing of the application falls on a non-business day, the next business day will be considered the ''updated'' 30th day, and if the application is not rejected or a scope inquiry initiated by or on that particular business day, the application will be deemed accepted and a scope inquiry will be deemed initiated on the next business day which follows the ''updated'' 30th day.[7]

In accordance with 19 CFR 351.225(m)(2), if there are companion AD and CVD orders covering the same merchandise from the same country of origin, the scope inquiry will be conducted on the record of the AD proceeding. Further, please note that pursuant to 19 CFR 351.225(m)(1), Commerce may either apply a scope ruling to all products from the same country with the same relevant physical characteristics, (including chemical, dimensional, and technical characteristics) as the product at issue, on a country-wide basis, regardless of the producer, exporter, or importer of those products, or on a company-specific basis.

For further information on procedures for filing information with Commerce through ACCESS and participating in scope inquiries, please refer to the Filing Instructions section of the Scope Ruling Application Guide, at *https://access.trade.gov/help/Scope_Ruling_Guidance.pdf.* Interested parties, apart from the scope ruling applicant, who wish to participate in a scope inquiry and be added to the public service list for that segment of the proceeding must file an entry of appearance in accordance with 19 CFR 351.103(d)(1) and 19 CFR 351.225(n)(4). Interested parties are advised to refer to the case segment in ACCESS as well as 19 CFR 351.225(f) for further information on the scope inquiry procedures, including the timelines for the submission of comments.

Please note that this notice of scope ruling applications filed in AD and CVD proceedings may be published before any potential initiation, or after the initiation, of a given scope inquiry based on a scope ruling application identified in this notice. Therefore, please refer to the case segment on ACCESS to determine whether a scope ruling application has been accepted or rejected and whether a scope inquiry has been initiated.

Interested parties who wish to be served scope ruling applications for a particular AD or CVD order may file a request to be included on the annual inquiry service list during the anniversary month of the publication of the AD or CVD order in accordance with 19 CFR 351.225(n) and Commerce's procedures.[8]

Interested parties are invited to comment on the completeness of this monthly list of scope ruling applications received by Commerce. Any comments should be submitted to James Maeder, Deputy Assistant Secretary for AD/CVD Operations, Enforcement and Compliance, International Trade Administration, via email to *CommerceCLU@trade.gov.*

This notice of scope ruling applications filed in AD and CVD proceedings is published in accordance with 19 CFR 351.225(d)(3).

Dated: July 20, 2022.

Scot Fullerton,

Associate Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

[FR Doc. 2022–16010 Filed 7–25–22; 8:45 am]

BILLING CODE 3510–DS–P

storing charging accessories and other devices. The unit's charging is provided via a Female USB–A wire and port.

[4] The products subject to this scope ruling request are Renogy brand off-grid solar panels. Models KIT–STCS100D–NC, RNG–100D–SS, and KIT–STCS100D–VOY20 are off-grid 100 watt solar panels with regular mono crystalline solar cells (100w panel). Models 50D–SS and RKIT50DST are off-grid 50 watt solar panels (50w panel). Each model has a glass cover and has a power output of 100 watts or less. Additionally, each panel has a surface area under 8,000 cm2. The 100w panel's surface area is 6420cm2 and the 50w panel's surface area is 2960cm2. None of the panels have built-in inverters and each one contains a permanently connected wire that terminates in a two-port rectangular connector with two pins in square housings of different colors. Each panel also includes visible parallel grid collector metallic wire lines every 1.4 millimeters across each solar cell. Model RNG–100DB–H is an off-grid 100 watt flexible solar panel with regular mono crystalline solar cells that does not contain a glass cover (flexible panel). The flexible panel has a total power output of 100 watts or less and a maximum surface area of 6,655.74 cm2. The flexible panel is not equipped with a built-in inverter. The flexible panel includes visible parallel grid collector metallic wire lines every 1 millimeters across each solar cell. Additionally, the flexible panel is encased in a laminated material without stitching. Each model is packaged in individual retail boxes with warranty cards and expanded polypropylene, or EPP, corner protectors, in its condition as imported into the United States.

[5] In accordance with 19 CFR 351.225(d)(2), within 30 days after the filing of a scope ruling application, if Commerce determines that it intends to address the scope issue raised in the application in another segment of the proceeding (such as a circumvention inquiry under 19 CFR 351.226 or a covered merchandise inquiry under 19 CFR 351.227), it will notify the applicant that it will not initiate a scope inquiry, but will instead determine if the product is covered by the scope at issue in that alternative segment.

[6] *See Notice of Clarification: Application of ''Next Business Day'' Rule for Administrative Determination Deadlines Pursuant to the Tariff Act of 1930, As Amended,* 70 FR 24533 (May 10, 2005).

[7] This structure maintains the intent of the applicable regulation, 19 CFR 351.225(d)(1), to allow day 30 and day 31 to be separate business days.

[8] *See Scope Ruling Application; Annual Inquiry Service List; and Informational Sessions,* 86 FR 53205 (September 27, 2021).

National Oceanic and Atmospheric Administration

[RTID 0648–XC070]

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to the Office of Naval Research's Arctic Research Activities in the Beaufort and Chukchi Seas (Year 5)

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; proposed incidental harassment authorization; request for comments on proposed authorization and possible renewal.

SUMMARY: NMFS has received a request from Office of Naval Research (ONR) for authorization to take marine mammals incidental to Arctic Research Activities (ARA) in the Beaufort Sea and eastern Chukchi Sea. Pursuant to the Marine Mammal Protection Act (MMPA), NMFS is requesting comments on its proposal to issue an incidental harassment authorization (IHA) to incidentally take marine mammals during the specified

activities. NMFS is also requesting comments on a possible one-time, one-year renewal that could be issued under certain circumstances and if all requirements are met, as described in Request for Public Comments at the end of this notice. NMFS will consider public comments prior to making any final decision on the issuance of the requested MMPA authorization and agency responses will be summarized in the final notice of our decision. The ONR's activities are considered military readiness activities pursuant to the MMPA, as amended by the National Defense Authorization Act for Fiscal Year 2004 (2004 NDAA).

DATES: Comments and information must be received no later than August 25, 2022.

ADDRESSES: Comments should be addressed to Jolie Harrison, Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service and should be submitted via email to *ITP.taylor@noaa.gov*.

Instructions: NMFS is not responsible for comments sent by any other method, to any other address or individual, or received after the end of the comment period. Comments, including all attachments, must not exceed a 25-megabyte file size. All comments received are a part of the public record and will generally be posted online at *www.fisheries.noaa.gov/permit/incidental-take-authorizations-under-marine-mammal-protection-act* without change. All personal identifying information (*e.g.,* name, address) voluntarily submitted by the commenter may be publicly accessible. Do not submit confidential business information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Jessica Taylor, Office of Protected Resources, NMFS, (301) 427–8401. Electronic copies of the application and supporting documents, as well as a list of the references cited in this document, may be obtained online at: *https://www.fisheries.noaa.gov/national/marine-mammal-protection/incidental-take-authorizations-military-readiness-activities*. In case of problems accessing these documents, please call the contact listed above.

SUPPLEMENTARY INFORMATION:

Background

The MMPA prohibits the ''take'' of marine mammals, with certain exceptions. Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are proposed or, if the taking is limited to harassment, a notice of a proposed IHA is provided to the public for review.

Authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for taking for subsistence uses (where relevant). Further, NMFS must prescribe the permissible methods of taking and other ''means of effecting the least practicable adverse impact'' on the affected species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of the species or stocks for taking for certain subsistence uses (referred to in shorthand as ''mitigation''); and requirements pertaining to the mitigation, monitoring and reporting of the takings are set forth.

The 2004 NDAA (Pub. L. 108–136) removed the ''small numbers'' and ''specified geographical region'' limitations indicated above and amended the definition of ''harassment'' as applied to a ''military readiness activity.'' The activity for which incidental take of marine mammals is being requested addressed here qualifies as a military readiness activity. The definitions of all applicable MMPA statutory terms cited above are included in the relevant sections below.

National Environmental Policy Act

To comply with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) and NOAA Administrative Order (NAO) 216–6A, NMFS must review our proposed action (*i.e.,* the issuance of an IHA) with respect to potential impacts on the human environment.

In 2018, the U.S. Navy prepared an Overseas Environmental Assessment (OEA; referred to as an EA in this document) analyzing the project. Prior to issuing the IHA for the first year of this project, NMFS reviewed the 2018 EA and the public comments received, determined that a separate NEPA analysis was not necessary, and subsequently adopted the document and issued a NMFS Finding of No Significant Impact (FONSI) in support of the issuance of an IHA (83 FR 48799; September 27, 2018).

In 2019, the U.S. Navy prepared a supplemental EA. Prior to issuing the IHA in 2019, NMFS reviewed the supplemental EA and the public comments received, determined that a separate NEPA analysis was not necessary, and subsequently adopted the document and issued a NMFS FONSI in support of the issuance of an IHA (84 FR 50007; September 24, 2019).

In 2020, the U.S. Navy submitted a request for a renewal of the 2019 IHA. Prior to issuing the renewal IHA, NMFS reviewed ONR's application and determined that the proposed action was identical to that considered in the previous IHA. Because no significantly new circumstances or information relevant to any environmental concerns had been identified, NMFS determined that the preparation of a new or supplemental NEPA document was not necessary and relied on the supplement EA and FONSI from 2019 when issuing the renewal IHA in 2020 (85 FR 41560; July 10, 2020).

In 2021, the U.S. Navy submitted a request for an IHA for incidental take of marine mammals during continuation of ARA. NMFS reviewed the U.S. Navy's EA and determined it to be sufficient for taking into consideration the direct, indirect, and cumulative effects to the human environment resulting from continuation of the ARA. NMFS subsequently adopted that EA and signed a Finding of No Significant Impact (FONSI) (86 FR 54931, October 5, 2021).

Accordingly, NMFS preliminarily has determined to adopt the U.S. Navy's OEA for Office of Naval Research Arctic Research Activities in the Beaufort and Chukchi Seas 2022–2025, provided our independent evaluation of the document finds that it includes adequate information analyzing the effects on the human environment of issuing the IHA. NMFS is a not cooperating agency on the U.S. Navy's OEA.

We will review all comments submitted in response to this notice prior to concluding our NEPA process or making a final decision on the IHA request.

Summary of Request

On March 21, 2022, NMFS received a request from ONR for an IHA to take marine mammals incidental to ARA in the Beaufort and eastern Chukchi Seas. The application was deemed adequate and complete on June 30, 2022. ONR's request is for take of beluga whales (*Delphinapterus leucas*; two stocks) and ringed seals (*Pusa hispida hispida*) by Level B harassment. Neither ONR nor NMFS expect serious injury or mortality

to result from this activity and, therefore, an IHA is appropriate.

This proposed IHA would cover the fifth year of a larger project for which ONR obtained prior IHAs (83 FR 48799, September 27, 2018; 84 FR 50007, September 24, 2019; 85 FR 53333, August 28, 2020; 86 FR 54931, October 5, 2021) and may request take authorization for subsequent facets of the overall project. This IHA would be valid for a period of one year from the date of issuance (mid-September 2022 to mid- September 2023). The larger project supports the development of an under-ice navigation system under the ONR Arctic Mobile Observing System (AMOS) project. ONR has complied with all the requirements (*e.g.,* mitigation, monitoring, and reporting) of the previous IHAs (83 FR 48799, September 27, 2018; 84 FR 50007, September 24, 2019; 85 FR 53333, August 28, 2020; 86 FR 54931, October 5, 2021).

Description of Proposed Activity

Overview

ONR's ARA include scientific experiments to be conducted in support of the programs named above. Specifically, the project includes the Arctic Mobile Observing System (AMOS) experiments in the Beaufort and Chukchi Seas. Project activities involve acoustic testing and a multi-frequency navigation system concept test using left-behind active acoustic sources. More specifically, these experiments involve the deployment of moored, drifting, and ice-tethered active acoustic sources from the Research Vessel (R/V) Sikuliaq. Another vessel will be used to retrieve the acoustic sources. Underwater sound from the acoustic sources may result in Level B harassment of marine mammals.

Dates and Duration

This proposed action would occur from mid-September 2022 through mid-September 2023. The 2022 cruise would leave from Nome, Alaska on September 14, 2022 using the R/V *Sikuliaq* and involve 120 hours of active source testing. During this first cruise, several acoustic sources would be deployed from the ship. Some acoustic sources will be left behind to provide year-round observation of the Arctic environment. Gliders deployed during the September 2022 cruise may be recovered before the research vessel departs the study area or during a September 2023 cruise. Up to seven fixed acoustic navigation sources transmitting at 900 Hertz (Hz) would remain in place for a year. Drifting and moored oceanographic sensors would record environmental parameters throughout the year. Autonomous weather stations and ice mass balance buoys would also be deployed to record environmental measurements throughout the year (Table 1). The research vessel is planned to return to Nome, Alaska on October 28, 2022. ONR will apply for a renewal or separate IHA, as appropriate, for activities conducted during the planned September 2023 cruise.

During the scope of this proposed project, other activities may occur at different intervals that would assist ONR in meeting the scientific objectives of the various projects discussed above. However, these activities are designated as de minimis sources in ONR's 2022–2023 IHA application (consistent with analyses presented in support of previous Navy ONR IHAs), or would not produce sounds detectable by marine mammals (see discussion on de minimis sources below). These include the deployment of a Woods Hole Oceanographic Institution (WHOI) micromodem, acoustic Doppler current profilers (ADCP), and ice profilers (Table 2).

Geographic Region

This proposed action would occur across the U.S. Exclusive Economic Zone (EEZ) in both the Beaufort and Chukchi Seas, partially in the high seas north of Alaska, the Global Commons, and within a part of the Canadian EEZ (in which the appropriate permits would be obtained by the Navy) (Figure 1). The proposed action would primarily occur in the Beaufort Sea, but the analysis considers the drifting of active sources on buoys into the eastern portion of the Chukchi Sea. The closest point of the study area to the Alaska coast is 110 nm (204 km). The proposed study area is approximately 639,267 km^2.

Detailed Description of Specific Activity

The ONR Arctic and Global Prediction Program supports two major projects: Stratified Ocean Dynamics of the Arctic (SODA) and AMOS. The SODA and AMOS projects have been previously discussed in association with previously issued IHAs (83 FR 40234, August 14, 2018; 84 FR 37240, July 31, 2019). However, only activities relating to the AMOS project will occur during the period covered by this proposed action.

The AMOS project constitutes the development of a new system involving very low (35 Hz)), low (900 Hz), and mid-frequency transmissions (10 kilohertz (kHz)). The AMOS project would utilize acoustic sources and receivers to provide a means of performing under-ice navigation for

gliders and unmanned underwater vehicles (UUVs). This would allow for the possibility of year-round scientific observations of the environment in the Arctic. As an environment that is particularly affected by climate change, year-round observations under a variety of ice conditions are required to study the effects of this changing environment for military readiness, as well as the implications of environmental change to humans and animals. Very-low frequency technology is important in extending the range of navigation systems. The technology also has the potential to allow for development and use of navigational systems that would not be heard by some marine mammal species, and therefore would be less impactful overall.

Active acoustic sources would be lowered from the cruise vessel while stationary, deployed on gliders and UUVs, or deployed on fixed AMOS moorings. This project would use groups of drifting buoys with sources and receivers communicating oceanographic information to a satellite in near real time. These sources would employ low-frequency transmissions only (900 Hz).

The proposed action would utilize non-impulsive acoustic sources, although not all sources will cause take of marine mammals. Any marine mammal takes would only arise from the operation of non-impulsive active sources. Although not currently planned, ice breaking could occur as part of this proposed action if a research vessel needs to return to the study area before the end of the IHA period to ensure scientific objectives are met. In this case, ice breaking could result in potential Level B harassment takes.

Below are descriptions of the equipment and platforms that would be deployed at different times during the proposed action.

Research Vessels

The R/V *Sikuliaq* would perform the research cruise in September 2022 and conduct testing of acoustic sources during the cruise, as well as leave sources behind to operate as a year-round navigation system observation. R/V *Sikuliaq* has a maximum speed of approximately 12 knots (6.2 m/s) with a cruising speed of 11 knots (5.7 m/s) (University of Alaska Fairbanks 2014). The R/V *Sikuliaq* is not an ice breaking ship, but an ice strengthened ship. It would not be icebreaking and therefore acoustic signatures of icebreaking for the R/V *Sikuliaq* are not relevant.

The ship to be used in September 2023 to retrieve any acoustic sources could potentially be the CGC Healy. CGC Healy travels at a maximum speed of 17 knots (8.7 m/s) with a cruising speed of 12 knots (6.2 m/s) (United States Coast Guard 2013), and a maximum speed of 3 knots (1.5 m/s) when traveling through 4.5 feet (1.07 m) of sea ice (United States Coast Guard 2013). While no icebreaking cruise on the CGC Healy is scheduled during the IHA period, need may arise. Therefore, for the purposes of this IHA application, an icebreaking cruise is considered.

The R/V *Sikuliaq,* CGC Healy, or any other vessel operating a research cruise associated with the proposed action may perform the following activities during their research cruises:

- Deployment of moored and/or ice-tethered passive sensors (oceanographic measurement devices, acoustic receivers);
- Deployment of moored and/or ice-tethered active acoustic sources to transmit acoustic signals;
- Deployment of UUVs;
- Deployment of drifting buoys, with or without acoustic sources; or,
- Recovery of equipment.

Moored and Drifting Acoustic Sources

During the September 2022 cruise, active acoustic sources would be lowered from the cruise vessel while stationary, deployed on gliders and UUVs, or deployed on fixed AMOS moorings. This would be done for intermittent testing of the system components. The total amount of active source testing for ship-deployed sources used during the cruise would be 120 hours. The testing would take place near the seven source locations on Figure 1, with UUVs running tracks within the designated box. During this testing, 35 Hz, 900 Hz, and 10 kHz acoustic signals, as well as acoustic modems would be employed.

Up to seven fixed acoustic navigation sources transmitting at 900 Hz would remain in place for a year and continue transmitting during this time. These moorings would be anchored on the seabed and held in the water column with subsurface buoys. All sources would be deployed by shipboard winches, which would lower sources and receivers in a controlled manner. Anchors would be steel ''wagon wheels'' typically used for this type of deployment. Two very low frequency (VLF) sources transmitting at 35 Hz would be deployed in a similar manner. Two Ice Gateway Buoys (IGB) would also be configured with active acoustic sources. Autonomous vehicles would be able to navigate by receiving acoustic signals from multiple locations and triangulating. This is needed for vehicles that are under ice and cannot communicate with satellites. Source transmits would be offset by 15 minutes from each other (*i.e.,* sources would not be transmitting at the same time). All navigation sources would be recovered. The purpose of the navigation sources is to orient UUVs and gliders in situations when they are under ice and cannot communicate with satellites. For the purposes of this proposed action, activities potentially resulting in take would not be included in the fall 2023 cruise; a subsequent application would be provided by ONR depending on the scientific plan associated with that cruise.

TABLE 1—CHARACTERISTICS FOR THE MODELED ACOUSTIC SOURCES FOR THE PROPOSED ACTION

Platform	Acoustic source	Purpose/function	Frequency	Signal strength (dB re1uPa @1m) [1]	Band width
REMUS 600 UUV (1)	WHOI [2]/Micro-modem	Acoustic communication	900–950 Hz [3]	NTE [3] 180 dB by sys design limits.	50 Hz.
	UUV/WHOI Micro-modem	Acoustic communication	8–14 kHz [3]	NTE 185 dB by sys design limits.	5 kHz.
IGB [3] (drifting) (2)	WHOI Micro-modem	Acoustic communication	900–950 Hz ...	NTE 180 dB by sys design limits.	50 Hz.
	WHOI Micro-modem	Acoustic communication	8–14 kHz	NTE 185 dB by sys design limits.	5 kHz.
Mooring (9)	WHOI Micro-modem (7)	Acoustic navigation	900–950 Hz ...	NTE 180 dB by sys design limits.	50 Hz.

TABLE 1—CHARACTERISTICS FOR THE MODELED ACOUSTIC SOURCES FOR THE PROPOSED ACTION—Continued

Platform	Acoustic source	Purpose/function	Frequency	Signal strength (dB re1uPa @1m) [1]	Band width
	VLF [3] (2)	Acoustic navigation	35 Hz	NTE 190 dB	6 Hz.

[1] dB re 1 μPa at 1 m = decibels referenced to 1 micropascal at 1 meter.
[2] WHOI = Woods Hole Oceanographic Institution.
[3] Hz = Hertz; IGB = Ice Gateway Buoy; kHz = 1 kilohertz; NTE = not to exceed; VLF = very low frequency

Activities Not Likely To Result in Take

The following in-water activities have been determined to be unlikely to result in take of marine mammals. These activities are described here but they are not discussed further in this document.

De minimis Sources—The Navy characterizes de minimis sources as those with the following parameters: Low source levels, narrow beams, downward directed transmission, short pulse lengths, frequencies outside known marine mammal hearing ranges, or some combination of these factors (Department of the Navy, 2013b). NMFS concurs with the Navy's determination that the sources they have identified here as de minimis are unlikely to result in take of marine mammals. The following are some of the planned de minimis sources which would be used during the proposed action: Woods Hole Oceanographic Institution (WHOI) micromodem, ADCPs, ice profilers, and additional sources below 160 dB re 1 μPa used during towing operations. ADCPs may be used on moorings. Ice-profilers measure ice properties and roughness. The ADCPs and ice-profilers would all be above 200 kHz and therefore out of marine mammal hearing ranges, with the exception of the 75 kHz ADCP which has the characteristics and de minimis justification listed in Table 2. They may be employed on moorings or UUVs. Descriptions of some de minimis sources are discussed below and in Table 2. More detailed descriptions of these de minimis sources can be found in ONR's IHA application under Section 1.1.1.2.

TABLE 2—PARAMETERS FOR DE MINIMIS NON-IMPULSIVE ACTIVE SOURCES

Source name	Frequency range (kHz)	Sound pressure level (dB re 1 μPa at 1 m)	Pulse length (s)	Duty cycle (percent)	De minimis justification
ADCP	>200, 150, or 75	190	<0.001	<0.1	Very low pulse length, narrow beam, moderate source level.
Nortek Signature 500 kHz Doppler Velocity Log.	500	214	<0.1	<13	Very high frequency.
CTD [1] Attached Echosounder	5–20	160	0.004	2	Very low source level.

[1] Conductivity Temperature Depth.

Drifting Oceanographic Sensors

Observations of ocean-ice interactions require the use of sensors that are moored and embedded in the ice. For the proposed action, it will not be required to break ice to do this, as deployments can be performed in areas of low ice-coverage or free floating ice. Sensors are deployed within a few dozen meters of each other on the same ice floe. Three types of sensors would be used: autonomous ocean flux buoys, Integrated Autonomous Drifters, and ice-tethered profilers. The autonomous ocean flux buoys measure oceanographic properties just below the ocean-ice interface. The autonomous ocean flux buoys would have ADCPs and temperature chains attached, to measure temperature, salinity, and other ocean parameters in the top 20 ft (6 m) of the water column. Integrated Autonomous Drifters would have a long temperate string extending down to 656 ft (200 m) depth and would incorporate meteorological sensors, and a temperature spring to estimate ice thickness. The ice-tethered profilers would collect information on ocean temperature, salinity and velocity down to 820 ft (250 m) depth.

Up to 20 Argo-type autonomous profiling floats may be deployed in the central Beaufort Sea. Argo floats drift at 4,921 ft (1,500 m) depth, profiling from 6,562 ft (2,000 m) to the sea surface once every 10 days to collect profiles of temperature and salinity.

Moored Oceanographic Sensors

Moored sensors would capture a range of ice, ocean, and atmospheric conditions on a year-round basis. These would be bottom anchored, sub-surface moorings measuring velocity, temperature, and salinity in the upper 1,640 ft (500 m) of the water column. The moorings also collect high-resolution acoustic measurements of the ice using the ice profilers described above. Ice velocity and surface waves would be measured by 500 kHz multibeam sonars from Nortek Signatures. The moored oceanographic sensors described above use only de minimis sources and are therefore not anticipated to have the potential for impacts on marine mammals or their habitat.

On-Ice Measurements

On-ice measurement systems would be used to collect weather data. These would include an Autonomous Weather Station and an Ice Mass Balance Buoy. The Autonomous Weather Station would be deployed on a tripod; the tripod has insulated foot platforms that are frozen into the ice. The system would consist of an anemometer, humidity sensor, and pressure sensor. The Autonomous Weather Station also includes an altimeter with a sound source that is de minimis due to its very high frequency (200 kHz). The Ice Mass Balance Buoy is a 20 ft (6 m) sensor string, which is deployed through a 2 inch (5 cm) hole drilled into the ice. The string is weighted by a 2.2 lb (1 kg) lead weight, and is supported by a tripod. The buoy contains a de minimis 200 kHz altimeter and snow depth sensor. Autonomous Weather Stations and Ice Mass Balance Buoys will be deployed,

and will drift with the ice, making measurements. The instruments are destroyed as their host ice floes melt (likely in summer, roughly one year after deployment). After the instruments are deployed they cannot be recovered, and would sink to the seafloor as their host ice floes melted.

Proposed mitigation, monitoring, and reporting measures are described in detail later in this document (please see Proposed Mitigation and Proposed Monitoring and Reporting).

Description of Marine Mammals in the Area of Specified Activities

Sections 3 and 4 of the application summarize available information regarding status and trends, distribution and habitat preferences, and behavior and life history of the potentially affected species. NMFS fully considered all of this information, and we refer the reader to these descriptions, incorporated here by reference, instead of reprinting the information. Additional information regarding population trends and threats may be found in NMFS' Stock Assessment Reports (SARs; *www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-stock-assessments*) and more general information about these species (*e.g.,* physical and behavioral descriptions) may be found on NMFS' website (*https://www.fisheries.noaa.gov/find-species*).

Table 3 lists all species or stocks for which take is expected and proposed to be authorized for this action, and summarizes information related to the population or stock, including regulatory status under the MMPA and Endangered Species Act (ESA) and potential biological removal (PBR), where known. PBR is defined by the MMPA as the maximum number of animals, not including natural mortalities, that may be removed from a marine mammal stock while allowing that stock to reach or maintain its optimum sustainable population (as described in NMFS' SARs). While no serious injury or mortality is anticipated or authorized here, PBR and annual serious injury and mortality from anthropogenic sources are included here as gross indicators of the status of the species and other threats.

Marine mammal abundance estimates presented in this document represent the total number of individuals that make up a given stock or the total number estimated within a particular study or survey area. NMFS' stock abundance estimates for most species represent the total estimate of individuals within the geographic area, if known, that comprises that stock. For some species, this geographic area may extend beyond U.S. waters. All managed stocks in this region are assessed in NMFS' U.S. 2020 SARs (*e.g.,* Muto *et al.* 2021), with the exception of Beaufort Sea beluga whales. The 2020 SAR for the Beaufort Sea stock of beluga whales has temporarily been withdrawn for further review, therefore, the NMFS' U.S. 2021 draft SAR represents the most recent stock assessment for this stock. All values presented in Table 3 are the most recent available at the time of publication (including from the draft 2021 SARs) online at: *www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-stock-assessments.*

TABLE 3—SPECIES LIKELY IMPACTED BY THE SPECIFIED ACTIVITIES

Common name	Scientific name	Stock	ESA/ MMPA status; strategic (Y/N) [1]	Stock abundance (CV, N_{min}, most recent abundance survey) [2]	PBR	Annual M/SI [3]
Order Cetartiodactyla—Cetacea—Superfamily Odontoceti (toothed whales, dolphins, and porpoises)						
Family Monodontidae:						
Beluga Whale	*Delphinapterus leucas*	Beaufort Sea	-, -, N	39,258 (0.229, N/A, 1992)	[4] UND	104
Beluga Whale	*Delphinapterus leucas*	Eastern Chukchi Sea	-, -, N	13,305 (0.51, 8,875, 2012)	178	55
Order Carnivora—Superfamily Pinnipedia						
Family Phocidae (earless seals):						
Ringed Seal [5]	*Pusa hispida hispida*	Arctic	T, D, Y	171,418 (N/A, 158,507, 171,418.	5,100	6,459

[1] Endangered Species Act (ESA) status: Endangered (E), Threatened (T)/MMPA status: Depleted (D). A dash (-) indicates that the species is not listed under the ESA or designated as depleted under the MMPA. Under the MMPA, a strategic stock is one for which the level of direct human-caused mortality exceeds PBR or which is determined to be declining and likely to be listed under the ESA within the foreseeable future. Any species or stock listed under the ESA is automatically designated under the MMPA as depleted and as a strategic stock.

[2] NMFS marine mammal stock assessment reports online at: *www.nmfs.noaa.gov/pr/sars/.* CV is the coefficient of variation; N_{min} is the minimum estimate of stock abundance. In some cases, CV is not applicable [explain if this is the case].

[3] These values, found in NMFS's SARs, represent annual levels of human-caused mortality plus serious injury from all sources combined (*e.g.,* commercial fisheries, ship strike). Annual M/SI often cannot be determined precisely and is in some cases presented as a minimum value or range. A CV associated with estimated mortality due to commercial fisheries is presented in some cases.

[4] The 2016 guidelines for preparing SARs state that abundance estimates older than 8 years should not be used to calculate PBR due to a decline in the reliability of an aged estimate. Therefore, the PBR for this stock is considered undetermined.

[5] Abundance and associated values for ringed seals are for the U.S. population in the Bering Sea only.

As indicated above, the two species (with three managed stocks) in Table 3 temporally and spatially co-occur with the activity to the degree that take is reasonably likely to occur. While bowhead whales (*Balaena mysticetus*), gray whales (*Eschrichtius robustus*), bearded seals (*Erignathus barbatus*), spotted seals (*Phoca largha*), ribbon seals (*Histiophoca fasciata*), have been documented in the area, the temporal and/or spatial occurrence of these species is such that take is not expected to occur, and they are not discussed further beyond the explanation provided below.

Due to the location of the study area (*i.e.,* northern offshore, deep water), there were no calculated exposures for the bowhead whale, gray whale, spotted seal, bearded seal, and ribbon seal from quantitative modeling of acoustic sources. Bowhead and gray whales are closely associated with the shallow waters of the continental shelf in the Beaufort Sea and are unlikely to be exposed to acoustic harassment from this activity (Carretta *et al.,* 2018; Muto *et al.,* 2018). Similarly, spotted seals tend to prefer pack ice areas with water depths less than 200 m during the spring and move to coastal habitats in the summer and fall, found as far north

as 69–72° N (Muto *et al.,* 2018). Although the study area includes some waters south of 72° N, the acoustic sources with the potential to result in take of marine mammals are not found below that latitude and spotted seals are not expected to be exposed. Ribbon seals are found year-round in the Bering Sea but may seasonally range into the Chukchi Sea (Muto *et al.,* 2018). The proposed action occurs primarily in the Beaufort Sea, outside of the core range of ribbon seals, thus ribbon seals are not expected to be behaviorally harassed. Narwhals (*Monodon monoceros*) are considered extralimital in the project area and are not expected to be encountered. As no harassment is expected of the bowhead whale, gray whale, spotted seal, bearded seal, narwhal, and ribbon seal, these species will not be discussed further in this proposed notice.

The Navy has utilized Conn *et al.,* (2014) in their IHA application as an abundance estimate for ringed seals, which is based upon aerial abundance and distribution surveys conducted in the U.S. portion Bering Sea in 2012 (171,418 ringed seals; Muto *et al.,* 2021b). This value is likely an underestimate due to the lack of accounting for availability bias for seals that were in the water at the time of the surveys as well as not including seals located within the shorefast ice zone (Muto *et al.,* 2021b). Muto *et al.,* (2021b) notes that an accurate population estimate is likely larger by a factor of two or more. However, no accepted population estimate is present for Arctic ringed seals. Therefore, in the interest in making conservative decisions, NMFS will also adopt the Conn *et al.,* (2014) abundance estimate (171,418) for further analyses and discussions on this proposed action by ONR.

In addition, the polar bear (*Ursus maritimus*) and Pacific walrus (*Odobenus rosmarus*) may be found both on sea ice and/or in the water within the Beaufort Sea and Chukchi Sea. These species are managed by the U.S. Fish and Wildlife Service (USFWS) and are not considered further in this document.

Beluga Whale

Beluga whales are distributed throughout seasonally ice-covered arctic and subarctic waters of the Northern Hemisphere (Gurevich, 1980), and are closely associated with open leads and polynyas in ice-covered regions (Hazard, 1988). Belugas are both migratory and residential (non-migratory), depending on the population. Seasonal distribution is affected by ice cover, tidal conditions, access to prey, temperature, and human interaction (Frost *et al.,* 1985; Hauser *et al.,* 2014).

There are five beluga stocks recognized within U.S. waters: Cook Inlet, Bristol Bay, eastern Bering Sea, eastern Chukchi Sea, and Beaufort Sea. Two stocks, the Beaufort Sea and eastern Chukchi Sea stocks, have the potential to occur in the location of this proposed action.

A migratory Biologically Important Area (BIA) for belugas in the Eastern Chukchi and Alaskan Beaufort Sea overlaps the southern and western portion of the proposed project site. One migration corridor is in use from April to May. The second corridor, located in the Alaskan Beaufort Sea, is used by migrating belugas from September to October (Calambokidis *et al.,* 2015). During the winter, they can be found foraging in offshore waters associated with pack ice. When the sea ice melts in summer, they move to warmer river estuaries and coastal areas for molting and calving (Muto *et al.,* 2017). Annual migrations can span over thousands of kilometers. The residential Beaufort Sea populations participate in short distance movements within their range throughout the year. Based on satellite tags (Suydam *et al.,* 2001; Hauser *et al.,* 2014), there is some overlap in distribution with the eastern Chukchi Sea beluga whale stock.

During the winter, eastern Chukchi Sea belugas occur in offshore waters associated with pack ice. In the spring, they migrate to warmer coastal estuaries, bays, and rivers where they may molt (Finley, 1982; Suydam, 2009), give birth to, and care for their calves (Sergeant and Brodie, 1969). Eastern Chukchi Sea belugas move into coastal areas, including Kasegaluk Lagoon (outside of the proposed project site), in late June and animals are sighted in the area until about mid-July (Frost and Lowry, 1990; Frost *et al.,* 1993). Satellite tags attached to eastern Chukchi Sea belugas captured in Kasegaluk Lagoon during the summer showed these whales traveled 593 nm (1,100 km) north of the Alaska coastline, into the Canadian Beaufort Sea within three months (Suydam *et al.,* 2001). Satellite telemetry data from 23 whales tagged during 1998–2007 suggest variation in movement patterns for different age and/or sex classes during July-September (Suydam *et al.,* 2005). Adult males used deeper waters and remained there for the duration of the summer; all belugas that moved into the Arctic Ocean (north of 75° N) were males, and males traveled through 90 percent pack ice cover to reach deeper waters in the Beaufort Sea and Arctic Ocean (79–80° N) by late July/early August. Adult and immature female belugas remained at or near the shelf break in the south through the eastern Bering Strait into the northern Bering Sea, remaining north of Saint Lawrence Island over the winter.

Ringed Seals

Ringed seals are the most common pinniped in the proposed project site and have wide distribution in seasonally and permanently ice-covered waters of the Northern Hemisphere (North Atlantic Marine Mammal Commission, 2004). Throughout their range, ringed seals have an affinity for ice-covered waters and are well adapted to occupying both shore-fast and pack ice (Kelly, 1988c). Ringed seals can be found further offshore than other pinnipeds since they can maintain breathing holes in ice thickness greater than 6.6 ft (2 m) (Smith and Stirling, 1975). The breathing holes are maintained by ringed seals using their sharp teeth and claws found on their fore flippers. They remain in contact with ice most of the year and use it as a platform for molting in late spring to early summer, for pupping and nursing in late winter to early spring, and for resting at other times of the year (Muto *et al.,* 2018).

Ringed seals have at least two distinct types of subnivean lairs: Haulout lairs and birthing lairs (Smith and Stirling, 1975). Haul-out lairs are typically single-chambered and offer protection from predators and cold weather. Birthing lairs are larger, multi-chambered areas that are used for pupping in addition to protection from predators. Ringed seals pup on both land-fast ice as well as stable pack ice. Lentfer (1972) found that ringed seals north of Utqiaġvik, Alaska (formally known as Barrow, Alaska) build their subnivean lairs on the pack ice near pressure ridges. Since subnivean lairs were found north of Utqiaġvik, Alaska, in pack ice, they are also assumed to be found within the sea ice in the proposed project site. Ringed seals excavate subnivean lairs in drifts over their breathing holes in the ice, in which they rest, give birth, and nurse their pups for 5–9 weeks during late winter and spring (Chapskii, 1940; McLaren, 1958; Smith and Stirling, 1975). Ringed seals are born beginning in March, but the majority of births occur in early April. About a month after parturition, mating begins in late April and early May.

In Alaskan waters, during winter and early spring when sea ice is at its maximum extent, ringed seals are abundant in the northern Bering Sea, Norton and Kotzebue Sounds, and throughout the Chukchi and Beaufort

seas (Frost, 1985; Kelly, 1988c). Passive acoustic monitoring of ringed seals from a high frequency recording package deployed at a depth of 787 ft (240 m) in the Chukchi Sea 65 nautical miles (120 km) north-northwest of Utqiaġvik, Alaska detected ringed seals in the area between mid-December and late May over the 4 year study (Jones *et al.,* 2014). In addition, ringed seals have been observed near and beyond the outer boundary of the U.S. EEZ (Beland and Ireland, 2010). During the spring and early summer, ringed seals may migrate north as the ice edge recedes and spend their summers in the open water period of the northern Beaufort and Chukchi Seas (Frost, 1985). Foraging-type movements have been recorded over the continental shelf and north of the continental shelf waters (Von Duyke *et al.,* 2020). During this time, sub-adult ringed seals may also occur in the Arctic Ocean Basin (Hamilton *et al.,* 2015; Hamilton *et al.,* 2017).

With the onset of fall freeze, ringed seal movements become increasingly restricted and seals will either move west and south with the advancing ice pack with many seals dispersing throughout the Chukchi and Bering Seas, or remaining in the Beaufort Sea (Crawford *et al.,* 2012; Frost and Lowry, 1984; Harwood *et al.,* 2012). Kelly *et al.,* (2010b) tracked home ranges for ringed seals in the subnivean period (using shore-fast ice); the size of the home ranges varied from less than 1 up to 279 km^2 (median is 0.62 km^2 for adult males and 0.65 km^2 for adult females). Most (94 percent) of the home ranges were less than 3 km^2 during the subnivean period (Kelly *et al.,* 2010b). Near large polynyas, ringed seals maintain ranges, up to 7,000 km^2 during winter and 2,100 km^2 during spring (Born *et al.,* 2004). Some adult ringed seals return to the same small home ranges they occupied during the previous winter (Kelly *et al.,* 2010b). The size of winter home ranges can vary by up to a factor of 10 depending on the amount of fast ice; seal movements were more restricted during winters with extensive fast ice, and were much less restricted where fast ice did not form at high levels (Harwood *et al.,* 2015).

Of the five recognized subspecies of ringed seals, the Arctic ringed seal occurs in the Arctic Ocean and Bering Sea and is the only stock that occurs in U.S. waters. NMFS listed the Arctic ringed seal subspecies as threatened under the ESA on December 28, 2012 (77 FR 76706), primarily due to anticipated loss of sea ice through the end of the 21st century. Climate change presents a major concern for the conservation of ringed seals due to the potential for long-term habitat loss and modification (Muto *et al.,* 2021). Based upon an analysis of various life history features and the rapid changes that may occur in ringed seal habitat, ringed seals are expected to be highly sensitive to climate change (Laidre *et al.,* 2008; Kelly *et al.,* 2010a).

Critical Habitat

On January 8, 2021, NMFS published a revised proposed rule for the Designation of Critical Habitat for the Arctic Subspecies of the Ringed Seal (86 FR 1452). This proposed rule revises NMFS' December 9, 2014, proposed designation of critical habitat for the Arctic subspecies of the ringed seal under the ESA. NMFS identified the physical and biological features essential to the conservation of the species: (1) Snow-covered sea ice habitat suitable for the formation and maintenance of subnivean birth lairs used for sheltering pups during whelping and nursing, which is defined as areas of seasonal landfast (shorefast) ice and dense, stable pack ice, excluding any bottom-fast ice extending seaward from the coastline (typically in waters less than 2 m deep), that have undergone deformation and contain snowdrifts of sufficient depth, typically at least 54 cm deep; (2) Sea ice habitat suitable as a platform for basking and molting, which is defined as areas containing sea ice of 15 percent or more concentration, excluding any bottom-fast ice extending seaward from the coastline (typically in waters less than 2 m deep); and (3) Primary prey resources to support Arctic ringed seals, which are defined to be Arctic cod, saffron cod, shrimps, and amphipods. The revised proposed critical habitat designation comprises a specific area of marine habitat in the Bering, Chukchi, and Beaufort seas, extending from mean lower low water to an offshore limit within the U.S. Exclusive Economic Zone, including a portion of the ONR ARA Study Area (86 FR 1452; January 8, 2021). See the proposed ESA critical habitat rule for additional detail and a map of the proposed area.

The majority of the proposed study area was excluded from the proposed ringed seal critical habitat because the benefits of exclusion due to national security impacts outweighed the benefits of inclusion of this area (86 FR 1452; March 9, 2021). However, as stated in NMFS' second revised proposed rule for the Designation of Critical Habitat for the Arctic Subspecies of the Ringed Seal (86 FR 1452; March 9, 2021), the excluded area contains one or more of the essential features of the Arctic ringed seal's critical habitat. However, the excluded area contains features that are found throughout the specific area designated as critical habitat (87 FR 19232, April 1, 2022), therefore even though this area is excluded from critical habitat designation, habitat with the physical and biological features essential for ringed seal conservation is still available to the species. A small portion of the study area overlaps with ringed seal critical habitat as shown in Figure 2. As described later and in more detail in the Potential Effects of Specified Activities on Marine Mammals and Their Habitat section, we expect minimal impacts to marine mammal habitat as a result of the ONR's activities, including impacts on prey availability.

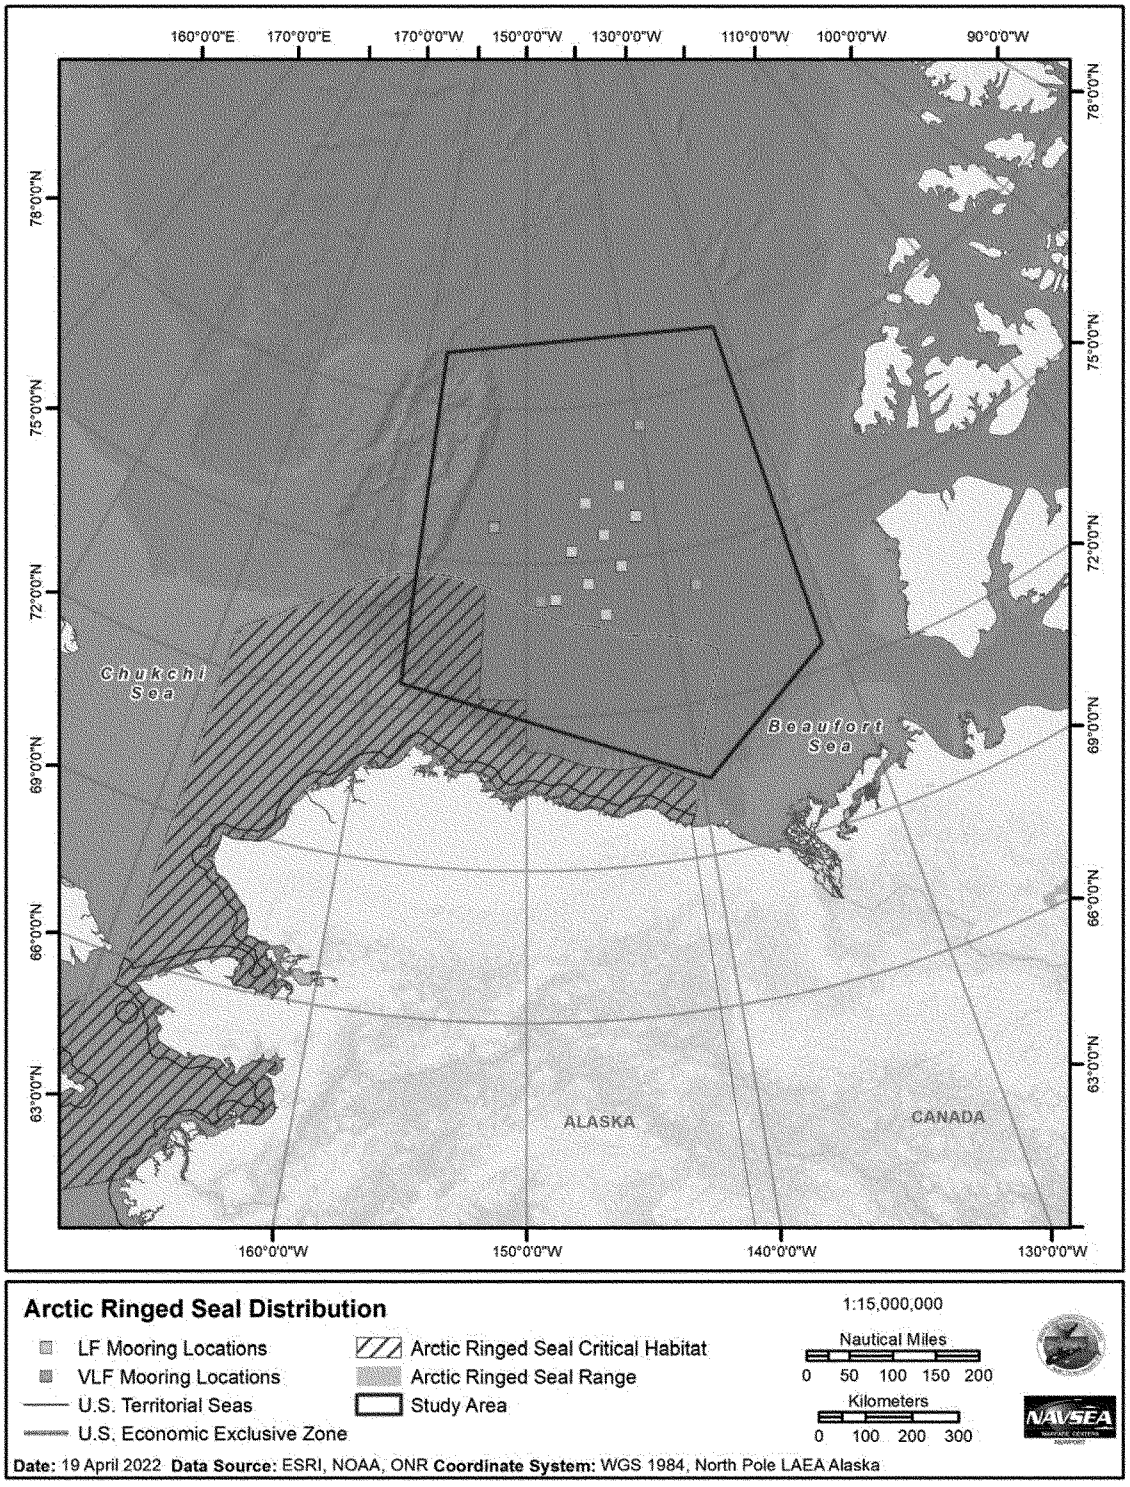

Figure 2. ONR ARA Study Area and Ringed Seal Critical Habitat Overlap

BILLING CODE 3510–22–C

Ice Seal Unusual Mortality Event

Since June 1, 2018, elevated strandings of ringed seals, bearded seals, spotted seals, and several unidentified seals have occurred in the Bering and Chukchi Seas. The National Oceanic and Atmospheric Administration (NOAA), as of September 2019, have declared this event an Unusual Mortality Event (UME). A UME is defined under the MMPA as a stranding that is unexpected, involves a significant die-off of any marine mammal population, and demands immediate response. From June 1, 2018 to January 7, 2022, there have been 368 dead seals reported, with 111 stranding in 2018, 164 in 2019, and 38 in 2020, and 55 in 2021, which is much greater than the average number of strandings

of about 29 seals annually. All age classes of seals have been reported stranded, and a subset of seals have been sampled for genetics and harmful algal bloom/exposure, with a few having histopathology collected. Results are pending and investigation into the cause of the UME is ongoing, yet currently unknown. No ice seals have stranded in 2022, at the time of this publication, yet the UME is still considered ongoing.

There was a previous UME involving ice seals from 2011 to 2016, which was most active in 2011–2012. A minimum of 657 seals were affected. The UME investigation determined that some of the clinical signs were due to an abnormal molt, but a definitive cause of death for the UME was never determined. The number of stranded ice seals involved in this UME, and their physical characteristics, is not at all similar to the 2011–2016 UME, as the seals in 2018–2020 have not been exhibiting hair loss or skin lesions, which were a primary finding in the 2011–2016 UME. More detailed information is available at: *https://www.fisheries.noaa.gov/alaska/marine-life-distress/2018-2022-ice-seal-unusual-mortality-event-alaska.*

Marine Mammal Hearing

Hearing is the most important sensory modality for marine mammals underwater, and exposure to anthropogenic sound can have deleterious effects. To appropriately assess the potential effects of exposure to sound, it is necessary to understand the frequency ranges marine mammals are able to hear. Not all marine mammal species have equal hearing capabilities (*e.g.,* Richardson *et al.,* 1995; Wartzok and Ketten, 1999; Au and Hastings, 2008). To reflect this, Southall *et al.* (2007, 2019) recommended that marine mammals be divided into hearing groups based on directly measured (behavioral or auditory evoked potential techniques) or estimated hearing ranges (behavioral response data, anatomical modeling, etc.). Note that no direct measurements of hearing ability have been successfully completed for mysticetes (*i.e.,* low-frequency cetaceans). Subsequently, NMFS (2018) described generalized hearing ranges for these marine mammal hearing groups. Generalized hearing ranges were chosen based on the approximately 65 decibel (dB) threshold from the normalized composite audiograms, with the exception for lower limits for low-frequency cetaceans where the lower bound was deemed to be biologically implausible and the lower bound from Southall *et al.* (2007) retained. Marine mammal hearing groups and their associated hearing ranges are provided in Table 4.

TABLE 4—MARINE MAMMAL HEARING GROUPS

[NMFS, 2018]

Hearing group	Generalized hearing range *
Low-frequency (LF) cetaceans (baleen whales)	7 Hz to 35 kHz.
Mid-frequency (MF) cetaceans (dolphins, toothed whales, beaked whales, bottlenose whales)	150 Hz to 160 kHz.
High-frequency (HF) cetaceans (true porpoises, *Kogia,* river dolphins, Cephalorhynchid, *Lagenorhynchus cruciger* & *L. australis*).	275 Hz to 160 kHz.
Phocid pinnipeds (PW) (underwater) (true seals)	50 Hz to 86 kHz.
Otariid pinnipeds (OW) (underwater) (sea lions and fur seals)	60 Hz to 39 kHz.

* Represents the generalized hearing range for the entire group as a composite (*i.e.,* all species within the group), where individual species' hearing ranges are typically not as broad. Generalized hearing range chosen based on ~65 dB threshold from normalized composite audiogram, with the exception for lower limits for LF cetaceans (Southall *et al.,* 2007) and PW pinniped (approximation).

The pinniped functional hearing group was modified from Southall *et al.* (2007) on the basis of data indicating that phocid species have consistently demonstrated an extended frequency range of hearing compared to otariids, especially in the higher frequency range (Hemilä *et al.,* 2006; Kastelein *et al.,* 2009; Reichmuth and Holt, 2013).

For more detail concerning these groups and associated frequency ranges, please see NMFS (2018) for a review of available information.

Potential Effects of Specified Activities on Marine Mammals and Their Habitat

This section includes a discussion of the ways that components of the specified activity may impact marine mammals and their habitat. The Estimated Take section later in this document includes a quantitative analysis of the number of individuals that are expected to be taken by this activity. The Negligible Impact Analysis and Determination section considers the content of this section, the Estimated Take section, and the Proposed Mitigation section, to draw conclusions regarding the likely impacts of these activities on the reproductive success or survivorship of individuals and how those impacts on individuals may or may not impact marine mammal species or stocks.

Description of Sound Sources

Here, we first provide background information on marine mammal hearing before discussing the potential effects of the use of active acoustic sources on marine mammals.

Sound travels in waves, the basic components of which are frequency, wavelength, velocity, and amplitude. Frequency is the number of pressure waves that pass by a reference point per unit of time and is measured in Hz or cycles per second. Wavelength is the distance between two peaks of a sound wave; lower frequency sounds have longer wavelengths than higher frequency sounds and attenuate (decrease) more rapidly in shallower water. Amplitude is the height of the sound pressure wave or the 'loudness' of a sound and is typically measured using the dB scale. A dB is the ratio between a measured pressure (with sound) and a reference pressure (sound at a constant pressure, established by scientific standards). It is a logarithmic unit that accounts for large variations in amplitude; therefore, relatively small changes in dB ratings correspond to large changes in sound pressure. When referring to sound pressure levels (SPLs; the sound force per unit area), sound is referenced in the context of underwater sound pressure to one micropascal (1 µPa). One pascal is the pressure resulting from a force of one newton exerted over an area of one square meter. The source level (SL) represents the sound level at a distance of 1 m from the source (referenced to 1 µPa). The received level is the sound level at the listener's position. Note that all underwater sound levels in this document are referenced to a pressure of 1 µPa.

Root mean square (rms) is the quadratic mean sound pressure over the duration of an impulse. RMS is calculated by squaring all of the sound amplitudes, averaging the squares, and

then taking the square root of the average (Urick, 1983). RMS accounts for both positive and negative values; squaring the pressures makes all values positive so that they may be accounted for in the summation of pressure levels (Hastings and Popper, 2005). This measurement is often used in the context of discussing behavioral effects, in part because behavioral effects, which often result from auditory cues, may be better expressed through averaged units than by peak pressures.

When underwater objects vibrate or activity occurs, sound-pressure waves are created. These waves alternately compress and decompress the water as the sound wave travels. Underwater sound waves radiate in all directions away from the source (similar to ripples on the surface of a pond), except in cases where the source is directional. The compressions and decompressions associated with sound waves are detected as changes in pressure by aquatic life and man-made sound receptors such as hydrophones.

The marine soundscape is comprised of both ambient and anthropogenic sounds. Ambient sound is defined as the all-encompassing sound in a given place and is usually a composite of sound from many sources both near and far (ANSI, 1995). The sound level of an area is defined by the total acoustical energy being generated by known and unknown sources. These sources may include physical (*e.g.,* waves, wind, precipitation, earthquakes, ice, atmospheric sound), biological (*e.g.,* sounds produced by marine mammals, fish, and invertebrates), and anthropogenic sound (*e.g.,* vessels, dredging, aircraft, construction).

The sum of the various natural and anthropogenic sound sources at any given location and time—which comprise ''ambient'' or ''background'' sound—depends not only on the source levels (as determined by current weather conditions and levels of biological and shipping activity) but also on the ability of sound to propagate through the environment. In turn, sound propagation is dependent on the spatially and temporally varying properties of the water column and sea floor, and is frequency-dependent. Because of the dependence on a large number of varying factors, ambient sound levels can be expected to vary widely over both coarse and fine spatial and temporal scales. Sound levels at a given frequency and location can vary by 10–20 dB from day to day (Richardson *et al.,* 1995). The result is that, depending on the source type and its intensity, sound from the specified activity may be a negligible addition to the local environment or could form a distinctive signal that may affect marine mammals.

Underwater sounds fall into one of two general sound types: impulsive and non-impulsive (defined in the following paragraphs). The distinction between these two sound types is important because they have differing potential to cause physical effects, particularly with regard to hearing (*e.g.,* Ward, 1997 in Southall *et al.,* 2007). Please see Southall *et al.,* (2007) for an in-depth discussion of these concepts.

Impulsive sound sources (*e.g.,* explosions, gunshots, sonic booms, impact pile driving) produce signals that are brief (typically considered to be less than one second), broadband, atonal transients (ANSI, 1986; Harris, 1998; NIOSH, 1998; ISO, 2003; ANSI, 2005) and occur either as isolated events or repeated in some succession. Impulsive sounds are all characterized by a relatively rapid rise from ambient pressure to a maximal pressure value followed by a rapid decay period that may include a period of diminishing, oscillating maximal and minimal pressures, and generally have an increased capacity to induce physical injury as compared with sounds that lack these features. However and as previously noted, no impulsive acoustic sources will be used during ONR's proposed action.

Non-impulsive sounds can be tonal, narrowband, or broadband, brief or prolonged, and may be either continuous or non-continuous (ANSI, 1995; NIOSH, 1998). Some of these non-impulsive sounds can be transient signals of short duration but without the essential properties of pulses (*e.g.,* rapid rise time). Examples of non-impulsive sounds include those produced by vessels, aircraft, machinery operations such as drilling or dredging, vibratory pile driving, and active sonar sources that intentionally direct a sound signal at a target that is reflected back in order to discern physical details about the target. These active sources are used in navigation, military training and testing, and other research activities such as the activities planned by ONR as part of the proposed action. The duration of such sounds, as received at a distance, can be greatly extended in a highly reverberant environment.

Acoustic Impacts

Please refer to the information given previously regarding sound, characteristics of sound types, and metrics used in this document. Anthropogenic sounds cover a broad range of frequencies and sound levels and can have a range of highly variable impacts on marine life, from none or minor to potentially severe responses, depending on received levels, duration of exposure, behavioral context, and various other factors. The potential effects of underwater sound from active acoustic sources can potentially result in one or more of the following: temporary or permanent hearing impairment, non-auditory physical or physiological effects, behavioral disturbance, stress, and masking (Richardson *et al.,* 1995; Gordon *et al.,* 2003; Nowacek *et al.,* 2007; Southall *et al.,* 2007; Gotz *et al.,* 2009). The degree of effect is intrinsically related to the signal characteristics, received level, distance from the source, and duration of the sound exposure. In general, sudden, high level sounds can cause hearing loss, as can longer exposures to lower level sounds. Temporary or permanent loss of hearing will occur almost exclusively for noise within an animal's hearing range. In this section, we first describe specific manifestations of acoustic effects before providing discussion specific to the proposed activities in the next section.

Permanent Threshold Shift—Marine mammals exposed to high-intensity sound, or to lower-intensity sound for prolonged periods, can experience hearing threshold shift (TS), which is the loss of hearing sensitivity at certain frequency ranges (Finneran, 2015). TS can be permanent (PTS), in which case the loss of hearing sensitivity is not fully recoverable, or temporary (TTS), in which case the animal's hearing threshold would recover over time (Southall *et al.,* 2007). Repeated sound exposure that leads to TTS could cause PTS. In severe cases of PTS, there can be total or partial deafness, while in most cases the animal has an impaired ability to hear sounds in specific frequency ranges (Kryter, 1985).

Temporary Threshold Shift—TTS is the mildest form of hearing impairment that can occur during exposure to sound (Kryter, 1985). While experiencing TTS, the hearing threshold rises, and a sound must be at a higher level in order to be heard. In terrestrial and marine mammals, TTS can last from minutes or hours to days (in cases of strong TTS). In many cases, hearing sensitivity recovers rapidly after exposure to the sound ends.

When PTS occurs, there is physical damage to the sound receptors in the ear (*i.e.,* tissue damage), whereas TTS represents primarily tissue fatigue and is reversible (Southall *et al.,* 2007). In addition, other investigators have suggested that TTS is within the normal bounds of physiological variability and tolerance and does not represent

physical injury (*e.g.,* Ward, 1997). Therefore, NMFS does not consider TTS to constitute auditory injury.

Relationships between TTS and PTS thresholds have not been studied in marine mammals—PTS data exists only for a single harbor seal (Kastak *et al.,* 2008)—but are assumed to be similar to those in humans and other terrestrial mammals. PTS typically occurs at exposure levels at least several decibels above (a 40-dB threshold shift approximates PTS onset; *e.g.,* Kryter *et al.,* 1966; Miller, 1974) that inducing mild TTS (a 6-dB threshold shift approximates TTS onset; *e.g.,* Southall *et al.,* 2007). Based on data from terrestrial mammals, a precautionary assumption is that the PTS thresholds for impulse sounds (such as impact pile driving pulses as received close to the source) are at least six dB higher than the TTS threshold on a peak-pressure basis and PTS cumulative sound exposure level (SEL) thresholds are 15 to 20 dB higher than TTS cumulative SEL thresholds (Southall *et al.,* 2007).

Marine mammal hearing plays a critical role in communication with conspecifics, and interpretation of environmental cues for purposes such as predator avoidance and prey capture. Depending on the degree (elevation of threshold in dB), duration (*i.e.,* recovery time), and frequency range of TTS, and the context in which it is experienced, TTS can have effects on marine mammals ranging from discountable to serious. For example, a marine mammal may be able to readily compensate for a brief, relatively small amount of TTS in a non-critical frequency range that occurs during a time where ambient noise is lower and there are not as many competing sounds present. Alternatively, a larger amount and longer duration of TTS sustained during time when communication is critical for successful mother/calf interactions could have more serious impacts.

Many studies have examined noise-induced hearing loss in marine mammals (see Finneran (2015) and Southall *et al.* (2019) for summaries). For cetaceans, published data on the onset of TTS are limited to the captive bottlenose dolphin, beluga, harbor porpoise, and Yangtze finless porpoise, and for pinnipeds in water, measurements of TTS are limited to harbor seals, elephant seals, and California sea lions. These studies examine hearing thresholds measured in marine mammals before and after exposure to intense sounds. The difference between the pre-exposure and post-exposure thresholds can be used to determine the amount of threshold shift at various post-exposure times. The amount and onset of TTS depends on the exposure frequency. Sounds at low frequencies, well below the region of best sensitivity, are less hazardous than those at higher frequencies, near the region of best sensitivity (Finneran and Schlundt, 2013). At low frequencies, onset-TTS exposure levels are higher compared to those in the region of best sensitivity *(i.e.,* a low frequency noise would need to be louder to cause TTS onset when TTS exposure level is higher), as shown for harbor porpoises and harbor seals (Kastelein *et al.,* 2019a, 2019b, 2020a, 2020b). In addition, TTS can accumulate across multiple exposures, but the resulting TTS will be less than the TTS from a single, continuous exposure with the same SEL (Finneran *et al.,* 2010; Kastelein *et al.,* 2014; Kastelein *et al.,* 2015a; Mooney *et al.,* 2009). This means that TTS predictions based on the total, cumulative SEL will overestimate the amount of TTS from intermittent exposures such as sonars and impulsive sources. Nachtigall *et al.* (2018) and Finneran (2018) describe the measurements of hearing sensitivity of multiple odontocete species (bottlenose dolphin, harbor porpoise, beluga, and false killer whale) when a relatively loud sound was preceded by a warning sound. These captive animals were shown to reduce hearing sensitivity when warned of an impending intense sound. Based on these experimental observations of captive animals, the authors suggest that wild animals may dampen their hearing during prolonged exposures or if conditioned to anticipate intense sounds. Another study showed that echolocating animals (including odontocetes) might have anatomical specializations that might allow for conditioned hearing reduction and filtering of low-frequency ambient noise, including increased stiffness and control of middle ear structures and placement of inner ear structures (Ketten *et al.,* 2021). Data available on noise-induced hearing loss for mysticetes are currently lacking (NMFS, 2018).

Behavioral effects—Behavioral disturbance may include a variety of effects, including subtle changes in behavior (*e.g.,* minor or brief avoidance of an area or changes in vocalizations), more conspicuous changes in similar behavioral activities, and more sustained and/or potentially severe reactions, such as displacement from or abandonment of high-quality habitat. Behavioral responses to sound are highly variable and context-specific and any reactions depend on numerous intrinsic and extrinsic factors (*e.g.,* species, state of maturity, experience, current activity, reproductive state, auditory sensitivity, time of day), as well as the interplay between factors (*e.g.,* Richardson *et al.,* 1995; Wartzok *et al.,* 2003; Southall *et al.,* 2007; Weilgart, 2007; Archer *et al.,* 2010; Southall *et al.,* 2021). Behavioral reactions can vary not only among individuals but also within an individual, depending on previous experience with a sound source, context, and numerous other factors (Ellison *et al.,* 2012), and can vary depending on characteristics associated with the sound source (*e.g.,* whether it is moving or stationary, number of sources, distance from the source). A review of marine mammal responses to anthropogenic sound was first conducted by Richardson (1995). More recent reviews (Nowacek *et al.,* 2007; Ellison *et al.,* 2012; Gomez *et al.,* 2016) addressed studies conducted since 1995 and focused on observations where the received sound level of the exposed marine mammal(s) was known or could be estimated. Gomez *et al.* (2016) conducted a review of the literature considering the contextual information of exposure in addition to received level and found that higher received levels were not always associated with more severe behavioral responses and vice versa. Southall *et al.* (2016) states that results demonstrate that some individuals of different species display clear yet varied responses, some of which have negative implications, while others appear to tolerate high levels, and that responses may not be fully predictable with simple acoustic exposure metrics (*e.g.,* received sound level). Rather, the authors state that differences among species and individuals along with contextual aspects of exposure (*e.g.,* behavioral state) appear to affect response probability.

The following subsections provide examples of behavioral responses that provide an idea of the variability in behavioral responses that would be expected given the differential sensitivities of marine mammal species to sound and the wide range of potential acoustic sources to which a marine mammal may be exposed. Behavioral responses that could occur for a given sound exposure should be determined from the literature that is available for each species, or extrapolated from closely related species when no information exists, along with contextual factors. Available studies show wide variation in response to underwater sound; therefore, it is difficult to predict specifically how any given sound in a particular instance

might affect marine mammals perceiving the signal. If a marine mammal does react briefly to an underwater sound by changing its behavior or moving a small distance, the impacts of the change are unlikely to be significant to the individual, the stock, or population. However, if a sound source displaces marine mammals from an important feeding or breeding area for a prolonged period, impacts on individuals and populations could be significant (*e.g.,* Lusseau and Bejder, 2007; Weilgart, 2007; NRC, 2003). There are broad categories of potential response, which we describe in greater detail here, that include alteration of dive behavior, alteration of foraging behavior, effects to breathing, interference with or alteration of vocalization, avoidance, and flight.

Changes in dive behavior can vary widely, and may consist of increased or decreased dive times and surface intervals as well as changes in the rates of ascent and descent during a dive (*e.g.,* Frankel and Clark, 2000; Costa *et al.,* 2003; Ng and Leung, 2003; Nowacek *et al.,* 2004; Goldbogen *et al.,* 2013). Seals exposed to non-impulsive sources with a received sound pressure level within the range of calculated exposures (142–193 dB re 1 µPa), have been shown to change their behavior by modifying diving activity and avoidance of the sound source (Götz *et al.,* 2010; Kvadsheim *et al.,* 2010). Variations in dive behavior may reflect interruptions in biologically significant activities (*e.g.,* foraging) or they may be of little biological significance. The impact of an alteration to dive behavior resulting from an acoustic exposure depends on what the animal is doing at the time of the exposure and the type and magnitude of the response.

Disruption of feeding behavior can be difficult to correlate with anthropogenic sound exposure, so it is usually inferred by observed displacement from known foraging areas, the appearance of secondary indicators (*e.g.,* bubble nets or sediment plumes), or changes in dive behavior. As for other types of behavioral response, the frequency, duration, and temporal pattern of signal presentation, as well as differences in species sensitivity, are likely contributing factors to differences in response in any given circumstance (*e.g.,* Croll *et al.,* 2001; Nowacek *et al.;* 2004; Madsen *et al.,* 2006; Yazvenko *et al.,* 2007; Melcón *et al.,* 2012). In addition, behavioral state of the animal plays a role in the type and severity of a behavioral response, such as disruption to foraging (*e.g.,* Silve *et al.,* 2016; Wensveen *et al.,* 2017). A determination of whether foraging disruptions incur fitness consequences would require information on or estimates of the energetic requirements of the affected individuals and the relationship between prey availability, foraging effort and success, and the life history stage of the animal. Goldbogen *et al.* (2013) indicate that disruption of feeding and displacement could impact individual fitness and health. However, for this to be true, we would have to assume that an individual could not compensate for this lost feeding opportunity by either immediately feeding at another location, by feeding shortly after cessation of acoustic exposure, or by feeding at a later time. There is no indication this is the case, particularly since unconsumed prey would likely still be available in the environment in most cases following the cessation of acoustic exposure. Information on or estimates of the energetic requirements of the individuals and the relationship between prey availability, foraging effort and success, and the life history stage of the animal will help better inform a determination of whether foraging disruptions incur fitness consequences.

Respiration naturally varies with different behaviors, and variations in respiration rate as a function of acoustic exposure can be expected to co-occur with other behavioral reactions, such as a flight response or an alteration in diving. However, respiration rates in and of themselves may be representative of annoyance or an acute stress response. Studies with captive harbor porpoises showed increased respiration rates upon introduction of acoustic alarms (Kastelein *et al.,* 2001; Kastelein *et al.,* 2006) and emissions for underwater data transmission (Kastelein *et al.,* 2005). Various studies also have shown that species and signal characteristics are important factors in whether respiration rates are unaffected or change, again highlighting the importance in understanding species differences in the tolerance of underwater noise when determining the potential for impacts resulting from anthropogenic sound exposure (*e.g.,* Kastelein *et al.,* 2005, 2006, 2018; Gailey *et al.,* 2007; Isojunno *et al.,* 2018).

Marine mammals vocalize for different purposes and across multiple modes, such as whistling, echolocation click production, calling, and singing. Changes in vocalization behavior in response to anthropogenic noise can occur for any of these modes and may result from a need to compete with an increase in background noise or may reflect increased vigilance or a startle response. For example, in the presence of potentially masking signals, humpback whales and killer whales have been observed to increase the length of their songs (Miller *et al.,* 2000; Fristrup *et al.,* 2003; Foote *et al.,* 2004), while right whales have been observed to shift the frequency content of their calls upward while reducing the rate of calling in areas of increased anthropogenic noise (Parks *et al.,* 2007; Rolland *et al.,* 2012). Killer whales off the northwestern coast of the United States have been observed to increase the duration of primary calls once a threshold in observing vessel density (*e.g.,* whale watching) was reached, which has been suggested as a response to increased masking noise produced by the vessels (Foote *et al.,* 2004; NOAA, 2014). In some cases, however, animals may cease or alter sound production in response to underwater sound (*e.g.,* Bowles *et al.,* 1994; Castellote *et al.,* 2012; Cerchio *et al.,* 2014). Studies also demonstrate that even low levels of noise received far from the noise source can induce changes in vocalization and/or behavioral responses (Blackwell *et al.,* 2013, 2015).

Avoidance is the displacement of an individual from an area or migration path as a result of the presence of a sound or other stressors, and is one of the most obvious manifestations of disturbance in marine mammals (Richardson *et al.,* 1995). Avoidance is qualitatively different from the flight response, but also differs in the magnitude of the response (*i.e.,* directed movement, rate of travel, *etc.*). Oftentimes avoidance is temporary, and animals return to the area once the noise has ceased. Acute avoidance responses have been observed in captive porpoises and pinnipeds exposed to a number of different sound sources (Kastelein *et al.,* 2001; Finneran *et al.,* 2003; Kastelein *et al.,* 2006a; Kastelein *et al.,* 2006b; Kastelein *et al.,* 2015b; Kastelein *et al.,* 2015c; Kastelein *et al.,* 2018). Short-term avoidance of seismic surveys, low frequency emissions, and acoustic deterrents have also been noted in wild populations of odontocetes (Bowles *et al.,* 1994; Goold, 1996; Goold and Fish, 1998; Stone *et al.,* 2000; Morton and Symonds, 2002; Hiley *et al.,* 2021) and to some extent in mysticetes (Malme *et al.,* 1984; McCauley *et al.,* 2000; Gailey *et al.,* 2007). Longer-term displacement is possible, however, which may lead to changes in abundance or distribution patterns of the affected species in the affected region if habituation to the presence of the sound does not occur (*e.g.,* Blackwell *et al.,* 2004; Bejder *et al.,* 2006; Teilmann *et al.,* 2006).

Forney *et al.* (2017) described the potential effects of noise on marine mammal populations with high site

fidelity, including displacement and auditory masking. In cases of Western gray whales (Weller *et al.,* 2006) and beaked whales, anthropogenic effects in areas where they are resident or exhibit site fidelity could cause severe biological consequences, in part because displacement may adversely affect foraging rates, reproduction, or health, while an overriding instinct to remain in the area could lead to more severe acute effects. Avoidance of overlap between disturbing noise and areas and/or times of particular importance for sensitive species may be critical to avoiding population-level impacts because (particularly for animals with high site fidelity) there may be a strong motivation to remain in the area despite negative impacts.

A flight response is a dramatic change in normal movement to a directed and rapid movement away from the perceived location of a sound source. The flight response differs from other avoidance responses in the intensity of the response (*e.g.,* directed movement, rate of travel). Relatively little information on flight responses of marine mammals to anthropogenic signals exist, although observations of flight responses to the presence of predators have occurred (Connor and Heithaus, 1996). The result of a flight response could range from brief, temporary exertion and displacement from the area where the signal provokes flight to, in extreme cases, marine mammal strandings (Evans and England, 2001). There are limited data on flight response for marine mammals in water; however, there are examples of this response in species on land. For instance, the probability of flight responses in Dall's sheep *Ovis dalli dalli* (Frid, 2003), hauled-out ringed seals *Phoca hispida* (Born *et al.,* 1999), Pacific brant (*Branta bernicl nigricans*), and Canada geese (*B. canadensis*) increased as a helicopter or fixed-wing aircraft more directly approached groups of these animals (Ward *et al.,* 1999). However, it should be noted that response to a perceived predator does not necessarily invoke flight (Ford and Reeves, 2008), and whether individuals are solitary or in groups may influence the response.

Habituation can occur when an animal's response to a stimulus wanes with repeated exposure, usually in the absence of unpleasant associated events (Wartzok *et al.,* 2003). Animals are most likely to habituate to sounds that are predictable and unvarying. It is important to note that habituation is appropriately considered as a ''progressive reduction in response to stimuli that are perceived as neither aversive nor beneficial,'' rather than as, more generally, moderation in response to human disturbance (Bejder *et al.,* 2009). The opposite process is sensitization, when an unpleasant experience leads to subsequent responses, often in the form of avoidance, at a lower level of exposure. As noted, behavioral state may affect the type of response. For example, animals that are resting may show greater behavioral change in response to disturbing sound levels than animals that are highly motivated to remain in an area for feeding (Richardson *et al.,* 1995; NRC, 2003; Wartzok *et al.,* 2003). Controlled experiments with captive marine mammals have showed pronounced behavioral reactions, including avoidance of loud sound sources (Ridgway *et al.,* 1997; Finneran *et al.,* 2003). Observed responses of wild marine mammals to loud impulsive sound sources (typically seismic airguns or acoustic harassment devices) have been varied but often consist of avoidance behavior or other behavioral changes suggesting discomfort (Morton and Symonds, 2002; see also Richardson *et al.,* 1995; Nowacek *et al.,* 2007).

Data on hooded seals (*Cystophora cristata*) indicate avoidance responses to signals above 160–170 dB re 1 µPa (Kvadsheim *et al.,* 2010), and data on grey (*Halichoerus grypus*) and harbor seals indicate avoidance response at received levels of 135–144 dB re 1 µPa (Götz *et al.,* 2010). In each instance where food was available, which provided the seals motivation to remain near the source, habituation to the signals occurred rapidly. In the same study, it was noted that habituation was not apparent in wild seals where no food source was available (Götz *et al.,* 2010). This implies that the motivation of the animal is necessary to consider in determining the potential for a reaction. In one study to investigate the under-ice movements and sensory cues associated with under-ice navigation of ice seals, acoustic transmitters (60–69 kHz at 159 dB re 1 µPa at 1 m) were attached to ringed seals (Wartzok *et al.,* 1992a, Wartzok *et al.,* 1992b). An acoustic tracking system then was installed in the ice to receive the acoustic signals and provide real-time tracking of ice seal movements. Although the frequencies used in this study are at the upper limit of ringed seal hearing, the ringed seals appeared unaffected by the acoustic transmissions, as they were able to maintain normal behaviors (*e.g.,* finding breathing holes).

Behavioral disturbance can also impact marine mammals in more subtle ways. Increased vigilance may result in costs related to diversion of focus and attention (*i.e.,* when a response consists of increased vigilance, it may come at the cost of decreased attention to other critical behaviors such as foraging or resting). These effects have generally not been observed in marine mammals, but studies involving fish and terrestrial animals have shown that increased vigilance may substantially reduce feeding rates and efficiency (*e.g.,* Beauchamp and Livoreil, 1997; Fritz *et al.,* 2002; Purser and Radford, 2011). In addition, chronic disturbance can cause population declines through reduction of fitness (*e.g.,* decline in body condition) and subsequent reduction in reproductive success, survival, or both *(e.g.,* Harrington and Veitch, 1992; Daan *et al.,* 1996; Bradshaw *et al.,* 1998).

Many animals perform vital functions, such as feeding, resting, traveling, and socializing, on a diel cycle (24-hour cycle). Disruption of such functions resulting from reactions to stressors such as sound exposure are more likely to be significant if they last more than one diel cycle or recur on subsequent days (Southall *et al.,* 2007). Consequently, a behavioral response lasting less than one day and not recurring on subsequent days is not considered particularly severe unless it could directly affect reproduction or survival (Southall *et al.,* 2007). Note that there is a difference between multi-day substantive behavioral reactions and multi-day anthropogenic activities. For example, just because an activity lasts for multiple days does not necessarily mean that individual animals are either exposed to activity-related stressors for multiple days or, further, exposed in a manner resulting in sustained multi-day substantive behavioral responses.

Behavioral response studies have been conducted on odontocete responses to sonar. Sperm whales were exposed to pulsed active sonar (1–2 kHz) at moderate source levels and high source levels, as well as continuously active sonar at moderate levels for which the summed energy (SEL) equaled the summed energy of the high source level pulsed sonar (Isojunno *et al.,* 2020). Foraging behavior did not change during exposures to moderate source level sonar, but non-foraging behavior increased during exposures to high source level sonar and to the continuous sonar, indicating that the energy of the sound (the SEL) was a better predictor of response than SPL. Time of day of the exposure was also an important covariate in determining the amount of non-foraging behavior, as were order effects (*e.g.* the SEL of the previous exposure); Isojunno *et al.* (2021) found that higher SELs reduced sperm whale buzzing (*i.e.,* foraging).

Duration of continuous sonar activity also appears to impact sperm whale displacement and foraging activity (Stanistreet *et al.,* 2022). During long bouts of sonar lasting up to 13 consecutive hours, occurring repeatedly over an 8 day naval exercise (median and maximum SPL = 120 dB and 164 dB), sperm whales substantially reduced how often they produced clicks during sonar, indicating a decrease or cessation in foraging behavior. Curé *et al.* (2021) also found that sperm whales exposed to continuous and pulsed active sonar were more likely to produce low or medium severity responses with higher cumulative SEL. Specifically, the probability of observing a low severity response increased to 0.5 at approximately 173 dB SEL and observing a medium severity response reached a probability of 0.35 at cumulative SELs between 179 and 189 dB. These results again demonstrate that the behavioral state and environment of the animal mediates the likelihood of a behavioral response, as do the characteristics (*e.g.,* frequency, energy level) of the sound source itself.

Many of the contextual factors resulting from the behavioral response studies (*e.g.,* close approaches by multiple vessels or tagging) would not occur during the proposed action. Odontocete behavioral responses to acoustic transmissions from non-impulsive sources used during the proposed action would likely be a result of the animal's behavioral state and prior experience rather than external variables such as ship proximity; thus, any behavioral responses are expected to be minimal and short term.

To assess the strength of behavioral changes and responses to external sounds and SPLs associated with changes in behavior, Southall *et al.,* (2007) developed and utilized a severity scale, which is a 10 point scale ranging from no effect (labeled 0), effects not likely to influence vital rates (low; labeled from 1 to 3), effects that could affect vital rates (moderate; labeled 4 to 6), to effects that were thought likely to influence vital rates (high; labeled 7 to 9). Southall *et al.,* (2021) updated the severity scale by integrating behavioral context (*i.e.,* survival, reproduction, and foraging) into severity assessment. For non-impulsive sounds (*i.e.,* similar to the sources used during the proposed action), data suggest that exposures of pinnipeds to sources between 90 and 140 dB re 1 µPa do not elicit strong behavioral responses; no data were available for exposures at higher received levels for Southall *et al.,* (2007) to include in the severity scale analysis. Reactions of harbor seals were the only available data for which the responses could be ranked on the severity scale. For reactions that were recorded, the majority (17 of 18 individuals/groups) were ranked on the severity scale as a 4 (defined as moderate change in movement, brief shift in group distribution, or moderate change in vocal behavior) or lower; the remaining response was ranked as a 6 (defined as minor or moderate avoidance of the sound source).

Behavioral Responses to Ice Breaking Noise- Ringed seals on pack ice showed various behaviors when approached by an icebreaking vessel. A majority of seals dove underwater when the ship was within 0.5 nm (0.93 km) while others remained on the ice. However, as icebreaking vessels came closer to the seals, most dove underwater. Ringed seals have also been observed foraging in the wake of an icebreaking vessel (Richardson *et al.,* 1995). In studies by Alliston (1980; 1981), there was no observed change in the density of ringed seals in areas that had been subject to icebreaking. Alternatively, ringed seals may have preferentially established breathing holes in the ship tracks after the icebreaker moved through the area. Previous observations and studies using icebreaking ships provide a greater understanding in how seal behavior may be affected by a vessel transiting through the area.

Adult ringed seals spend up to 20 percent of the time in subnivean lairs during the winter season (Kelly *et al.,* 2010b). Ringed seal pups spend about 50 percent of their time in the lair during the nursing period (Lydersen and Hammill, 1993). During the warm season ringed seals haul out on the ice. In a study of ringed seal haul out activity by Born *et al.,* (2002), ringed seals spent 25–57 percent of their time hauled out in June, which is during their molting season. Ringed seal lairs are typically used by individual seals (haulout lairs) or by a mother with a pup (birthing lairs); large lairs used by many seals for hauling out are rare (Smith and Stirling, 1975). If the non-impulsive acoustic transmissions are heard and are perceived as a threat, ringed seals within subnivean lairs could react to the sound in a similar fashion to their reaction to other threats, such as polar bears (their primary predators), although the type of sound would be novel to them. Responses of ringed seals to a variety of human-induced sounds (*e.g.,* helicopter noise, snowmobiles, dogs, people, and seismic activity) have been variable; some seals entered the water and some seals remained in the lair. However, in all instances in which observed seals departed lairs in response to noise disturbance, they subsequently reoccupied the lair (Kelly *et al.,* 1988d).

Ringed seal mothers have a strong bond with their pups and may physically move their pups from the birth lair to an alternate lair to avoid predation, sometimes risking their lives to defend their pups from potential predators (Smith, 1987). If a ringed seal mother perceives the proposed acoustic sources as a threat, the network of multiple birth and haulout lairs allows the mother and pup to move to a new lair (Smith and Hammill, 1981; Smith and Stirling, 1975). The acoustic sources from this proposed action are not likely to impede a ringed seal from finding a breathing hole or lair, as captive seals have been found to primarily use vision to locate breathing holes and no effect to ringed seal vision would occur from the acoustic disturbance (Elsner *et al.,* 1989; Wartzok *et al.,* 1992a). It is anticipated that a ringed seal would be able to relocate to a different breathing hole relatively easily without impacting their normal behavior patterns.

Stress responses— An animal's perception of a threat may be sufficient to trigger stress responses consisting of some combination of behavioral responses, autonomic nervous system responses, neuroendocrine responses, or immune responses (*e.g.,* Seyle, 1950; Moberg, 2000). In many cases, an animal's first and sometimes most economical (in terms of energetic costs) response is behavioral avoidance of the potential stressor. Autonomic nervous system responses to stress typically involve changes in heart rate, blood pressure, and gastrointestinal activity. These responses have a relatively short duration and may or may not have a significant long-term effect on an animal's fitness.

Neuroendocrine stress responses often involve the hypothalamus-pituitary-adrenal system. Virtually all neuroendocrine functions that are affected by stress—including immune competence, reproduction, metabolism, and behavior—are regulated by pituitary hormones. Stress-induced changes in the secretion of pituitary hormones have been implicated in failed reproduction, altered metabolism, reduced immune competence, and behavioral disturbance (*e.g.,* Moberg, 1987; Blecha, 2000).

The primary distinction between stress (which is adaptive and does not normally place an animal at risk) and ''distress'' is the cost of the response. During a stress response, an animal uses glycogen stores that can be quickly replenished once the stress is alleviated. In such circumstances, the cost of the stress response would not pose serious

fitness consequences. However, when an animal does not have sufficient energy reserves to satisfy the energetic costs of a stress response, energy resources must be diverted from other functions. This state of distress will last until the animal replenishes its energetic reserves sufficient to restore normal function.

Relationships between these physiological mechanisms, animal behavior, and the costs of stress responses are well studied through controlled experiments and for both laboratory and free-ranging animals (*e.g.,* Holberton *et al.,* 1996; Hood *et al.,* 1998; Jessop *et al.,* 2003; Krausman *et al.,* 2004; Lankford *et al.,* 2005). Stress responses due to exposure to anthropogenic sounds or other stressors and their effects on marine mammals have also been reviewed (Fair and Becker, 2000; Romano *et al.,* 2002b) and, more rarely, studied in wild populations (*e.g.,* Romano *et al.,* 2002a). These and other studies lead to a reasonable expectation that some marine mammals will experience physiological stress responses upon exposure to acoustic stressors and that it is possible that some of these would be classified as ''distress.'' In addition, any animal experiencing TTS would likely also experience stress responses (NRC, 2003).

Auditory masking— Sound can disrupt behavior through masking, or interfering with, an animal's ability to detect, recognize, or discriminate between acoustic signals of interest (*e.g.,* those used for intraspecific communication and social interactions, prey detection, predator avoidance, navigation) (Richardson *et al.,* 1995). Masking occurs when the receipt of a sound is interfered with by another coincident sound at similar frequencies and at similar or higher intensity, and may occur whether the sound is natural (*e.g.,* snapping shrimp, wind, waves, precipitation) or anthropogenic (*e.g.,* shipping, sonar, seismic exploration) in origin. The ability of a noise source to mask biologically important sounds depends on the characteristics of both the noise source and the signal of interest (*e.g.,* signal-to-noise ratio, temporal variability, direction), in relation to each other and to an animal's hearing abilities (*e.g.,* sensitivity, frequency range, critical ratios, frequency discrimination, directional discrimination, age or TTS hearing loss), and existing ambient noise and propagation conditions.

Under certain circumstances, marine mammals experiencing significant masking could also be impaired from maximizing their performance fitness in survival and reproduction. Therefore, when the coincident (masking) sound is anthropogenic, it may be considered harassment when disrupting or significantly altering behavior patterns. It is important to distinguish TTS and PTS, which persist after the sound exposure, from masking, which occurs during the sound exposure. Because masking (without resulting in TS) is not associated with abnormal physiological function, it is not considered a physiological effect, but rather a potential behavioral effect.

The frequency range of the potentially masking sound is important in determining any potential behavioral impacts. For example, low-frequency signals may have less effect on high-frequency echolocation sounds produced by odontocetes but are more likely to affect detection of mysticete communication calls and other potentially important natural sounds such as those produced by surf and some prey species. The masking of communication signals by anthropogenic noise may be considered as a reduction in the communication space of animals (*e.g.,* Clark *et al.,* 2009) and may result in energetic or other costs as animals change their vocalization behavior (*e.g.,* Miller *et al.,* 2000; Foote *et al.,* 2004; Parks *et al.,* 2007; Di Iorio and Clark, 2009; Holt *et al.,* 2009). Masking can be reduced in situations where the signal and noise come from different directions (Richardson *et al.,* 1995), through amplitude modulation of the signal, or through other compensatory behaviors (Houser and Moore, 2014). Masking can be tested directly in captive species (*e.g.,* Erbe, 2008), but in wild populations it must be either modeled or inferred from evidence of masking compensation. There are few studies addressing real-world masking sounds likely to be experienced by marine mammals in the wild (*e.g.,* Branstetter *et al.,* 2013).

Masking affects both senders and receivers of acoustic signals and can potentially have long-term chronic effects on marine mammals at the population level as well as at the individual level. Low-frequency ambient sound levels have increased by as much as 20 dB (more than three times in terms of SPL) in the world's ocean from pre-industrial periods, with most of the increase from distant commercial shipping (Hildebrand, 2009). All anthropogenic sound sources, but especially chronic and lower-frequency signals (*e.g.,* from vessel traffic), contribute to elevated ambient sound levels, thus intensifying masking. Due to the transient nature of marine mammals to move and avoid disturbance, masking is not likely to have long-term impacts on marine mammal species within the proposed study area.

Potential Effects on Prey— The marine mammal species in the study area feed on marine invertebrates and fish. Studies of sound energy effects on invertebrates are few, and primarily identify behavioral responses. It is expected that most marine invertebrates would not sense the frequencies of the acoustic transmissions from the acoustic sources associated with the proposed action. Although acoustic sources used during the proposed action may briefly impact individuals, intermittent exposures to non-impulsive acoustic sources are not expected to impact survival, growth, recruitment, or reproduction of widespread marine invertebrate populations.

The fish species residing in the study area include those that are closely associated with the deep ocean habitat of the Beaufort Sea. Nearly 250 marine fish species have been described in the Arctic, excluding the larger parts of the sub-Arctic Bering, Barents, and Norwegian Seas (Mecklenburg *et al.,* 2011). However, only about 30 are known to occur in the Arctic waters of the Beaufort Sea (Christiansen and Reist, 2013). Although hearing capability data only exist for fewer than 100 of the 32,000 named fish species, current data suggest that most species of fish detect sounds from 50 to 100 Hz, with few fish hearing sounds above 4 kHz (Popper, 2008). It is believed that most fish have the best hearing sensitivity from 100 to 400 Hz (Popper, 2003). Fish species in the study area are expected to hear the low-frequency sources associated with the proposed action, but most are not expected to detect sound from the mid-frequency sources. Human generated sound could alter the behavior of a fish in a manner than would affect its way of living, such as where it tries to locate food or how well it could find a mate. Behavioral responses to loud noise could include a startle response, such as the fish swimming away from the source, the fish ''freezing'' and staying in place, or scattering (Popper, 2003). Misund (1997) found that fish ahead of a ship showed avoidance reactions at ranges of 160 to 489 ft (49 to 149 m). Avoidance behavior of vessels, vertically or horizontally in the water column, has been reported for cod and herring, and was attributed to vessel noise. While acoustic sources associated with the proposed action may influence the behavior of some fish species, other fish species may be equally unresponsive. Overall effects to fish from the proposed

action would be localized, temporary, and infrequent.

Effects to Physical and Foraging Habitat—Ringed seals haul out on pack ice during the spring and summer to molt (Reeves *et al.,* 2002; Born *et al.,* 2002). Additionally, some studies (Alliston, 1980; 1981) suggested that ringed seals might preferentially establish breathing holes in ship tracks after vessels move through the area. The amount of ice habitat disturbed by activities is small relative to the amount of overall habitat available and there will be no permanent or longer-term loss or modification of physical ice habitat used by ringed seals. Vessel movement would have minimal effect on physical beluga habitat as beluga habitat is solely within the water column. Furthermore, the deployed sources that would remain in use after the vessels have left the survey area have low duty cycles and lower source levels, and any impacts to the acoustic habitat of marine mammals would be minimal.

Estimated Take

This section provides an estimate of the number of incidental takes proposed for authorization through this IHA, which will inform both NMFS' consideration of ''small numbers'' and the negligible impact determinations.

Harassment is the only type of take expected to result from these activities. For this military readiness activity, the MMPA defines ''harassment'' as (i) Any act that injures or has the significant potential to injure a marine mammal or marine mammal stock in the wild (Level A harassment); or (ii) Any act that disturbs or is likely to disturb a marine mammal or marine mammal stock in the wild by causing disruption of natural behavioral patterns, including, but not limited to, migration, surfacing, nursing, breeding, feeding, or sheltering, to a point where the behavioral patterns are abandoned or significantly altered (Level B harassment).

Authorized takes would be by Level B harassment only, in the form of disruption of behavioral patterns and/or TTS for individual marine mammals resulting from exposure to ONR's acoustic sources. Based on the nature of the activity, Level A harassment is neither anticipated nor proposed to be authorized.

As described previously, no serious injury or mortality is anticipated or proposed to be authorized for this activity. Below we describe how the proposed take numbers are estimated.

For acoustic impacts, generally speaking, we estimate take by considering: (1) acoustic thresholds above which NMFS believes the best available science indicates marine mammals will be behaviorally harassed or incur some degree of permanent hearing impairment; (2) the area or volume of water that will be ensonified above these levels in a day; (3) the density or occurrence of marine mammals within these ensonified areas; and, (4) the number of days of activities. We note that while these factors can contribute to a basic calculation to provide an initial prediction of potential takes, additional information that can qualitatively inform take estimates is also sometimes available (*e.g.,* previous monitoring results or average group size). For the proposed IHA, ONR employed an advanced model known as the Navy Acoustic Effects Model (NAEMO) for assessing the impacts of underwater sound. Below, we describe the factors considered here in more detail and present the proposed take estimates.

Acoustic Thresholds

NMFS recommends the use of acoustic thresholds that identify the received level of underwater sound above which exposed marine mammals would be reasonably expected to be behaviorally harassed (equated to Level B harassment) or to incur PTS of some degree (equated to Level A harassment).

Level B Harassment—Though significantly driven by received level, the onset of behavioral disturbance from anthropogenic noise exposure is also informed to varying degrees by other factors related to the source or exposure context (*e.g.,* frequency, predictability, duty cycle, duration of the exposure, signal-to-noise ratio, distance to the source), the environment (*e.g.,* bathymetry, other noises in the area, predators in the area), and the receiving animals (hearing, motivation, experience, demography, life stage, depth) and can be difficult to predict (*e.g.,* Southall *et al.,* 2007, 2021, Ellison *et al.,* 2012). Based on what the available science indicates and the practical need to use a threshold based on a metric that is both predictable and measurable for most activities, NMFS typically uses a generalized acoustic threshold based on received level to estimate the onset of behavioral harassment. NMFS generally predicts that marine mammals are likely to be behaviorally harassed in a manner considered to be Level B harassment when exposed to underwater anthropogenic noise above root-mean-squared pressure received levels (RMS SPL) of 120 dB (referenced to 1 micropascal (re 1 µPa)) for continuous (*e.g.,* vibratory pile-driving, drilling) and above RMS SPL 160 dB re 1 µPa (rms) for non-explosive impulsive (*e.g.,* seismic airguns) or intermittent (*e.g.,* scientific sonar) sources.

In this case, NMFS is proposing to adopt the Navy's approach to estimating incidental take by Level B harassment from the active acoustic sources for this action, which includes use of dose response functions. The Navy's dose response functions were developed to estimate take from sonar and similar transducers, but are not applicable to ice breaking. Multi-year research efforts have conducted sonar exposure studies for odontocetes and mysticetes (Miller *et al.,* 2012; Sivle *et al.,* 2012). Several studies with captive animals have provided data under controlled circumstances for odontocetes and pinnipeds (Houser *et al.,* 2013a; Houser *et al.,* 2013b). Moretti *et al.,* (2014) published a beaked whale dose-response curve based on passive acoustic monitoring of beaked whales during U.S. Navy training activity at Atlantic Underwater Test and Evaluation Center during actual Anti-Submarine Warfare exercises. This information necessitated the update of the behavioral response criteria for the U.S. Navy's environmental analyses.

Southall *et al.,* (2007), and more recently Southall *et al.,* (2019), synthesized data from many past behavioral studies and observations to determine the likelihood of behavioral reactions at specific sound levels. While in general, the louder the sound source the more intense the behavioral response, it was clear that the proximity of a sound source and the animal's experience, motivation, and conditioning were also critical factors influencing the response (Southall *et al.,* 2007; Southall *et al.,* 2019). After examining all of the available data, the authors felt that the derivation of thresholds for behavioral response based solely on exposure level was not supported because context of the animal at the time of sound exposure was an important factor in estimating response. Nonetheless, in some conditions, consistent avoidance reactions were noted at higher sound levels depending on the marine mammal species or group allowing conclusions to be drawn. Phocid seals showed avoidance reactions at or below 190 dB re 1 µPa at 1m; thus, seals may actually receive levels adequate to produce TTS before avoiding the source.

Odontocete behavioral criteria for non-impulsive sources were updated based on controlled exposure studies for dolphins and sea mammals, sonar, and safety (3S) studies where odontocete behavioral responses were reported after

exposure to sonar (Antunes *et al.,* 2014; Houser *et al.,* 2013b; Miller *et al.,* 2011; Miller *et al.,* 2014; Miller *et al.,* 2012). For the 3S study, the sonar outputs included 1–2 kHz up- and down-sweeps and 6–7 kHz up-sweeps; source levels were ramped up from 152–158 dB re 1 µPa to a maximum of 198–214 re 1 µPa at 1 m. Sonar signals were ramped up over several pings while the vessel approached the mammals. The study did include some control passes of ships with the sonar off to discern the behavioral responses of the mammals to vessel presence alone versus active sonar.

The controlled exposure studies included exposing the Navy's trained bottlenose dolphins to mid-frequency sonar while they were in a pen. Mid-frequency sonar was played at 6 different exposure levels from 125–185 dB re 1 µPa (rms). The behavioral response function for odontocetes resulting from the studies described above has a 50 percent probability of response at 157 dB re 1 µPa. Additionally, distance cutoffs (20 km for MF cetaceans) were applied to exclude exposures beyond which the potential of significant behavioral responses is considered to be unlikely.

The pinniped behavioral threshold was updated based on controlled exposure experiments on the following captive animals: hooded seal, gray seal (*Halichoerus grypus*), and California sea lion (Götz *et al.,* 2010; Houser *et al.,* 2013a; Kvadsheim *et al.,* 2010). Hooded seals were exposed to increasing levels of sonar until an avoidance response was observed, while the grey seals were exposed first to a single received level multiple times, then an increasing received level. Each individual California sea lion was exposed to the same received level ten times. These exposure sessions were combined into a single response value, with an overall response assumed if an animal responded in any single session. The resulting behavioral response function for pinnipeds has a 50 percent probability of response at 166 dB re 1 µPa. Additionally, distance cutoffs (10 km for pinnipeds) were applied to exclude exposures beyond which the potential of significant behavioral responses is considered unlikely. For additional information regarding marine mammal thresholds for PTS and TTS onset, please see NMFS (2018) and Table 6.

Empirical evidence has not shown responses to non-impulsive acoustic sources that would constitute take beyond a few km from a non-impulsive acoustic source, which is why NMFS and the Navy conservatively set distance cutoffs for pinnipeds and mid-frequency cetaceans (U.S. Department of the Navy, 2017a). The cutoff distances for fixed sources are different from those for moving sources, as they are treated as individual sources in Navy modeling given that the distance between them is significantly greater than the range to which environmental effects can occur. Fixed source cutoff distances used were 2.7 nm (5 km) for pinnipeds and 5.4 nm (10 km) for beluga whales (Table 5). As some of the on-site drifting sources could come closer together, the drifting source cutoffs applied were 5.4 nm (10 km) for pinnipeds and 10.8 nm (20 km) for beluga whales (Table 5). Regardless of the received level at that distance, take is not estimated to occur beyond these cutoff distances. Range to thresholds were calculated for the noise associated with icebreaking in the study area. These all fall within the same cutoff distances as non-impulsive acoustic sources; range to behavioral threshold for both beluga whales and ringed seal were under 2.7 nm (5 km), and range to TTS threshold for both under 15 m (Table 5).

TABLE 5—THRESHOLDS[1] AND CUTOFF DISTANCES FOR SOURCES BY SPECIES

Species	Behavioral threshold for non-impulsive acoustic sources	Fixed source behavioral threshold cutoff distance[3] (km)	Drifting source behavioral threshold cutoff distance[3] (km)	Behavioral threshold for ice breaking sources	Ice breaking source cutoff distance[3] (km)	TTS threshold	PTS threshold
Ringed Seal ..	Pinniped Dose Response Function[2].	5	10	120 dB re 1 µPa step function.	<5	181 dB SEL cumulative.	201 dB SEL cumulative.
Beluga Whale	Mid-Frequency BRF dose Response Function[2].	10	20	120 dB re 1 µPa step function.	<15	178 dB SEL cumulative.	198 dB SEL cumulative.

[1] The threshold values provided are assumed for when the source is within the animal's best hearing sensitivity. The exact threshold varies based on the overlap of the source and the frequency weighting.
[2] See Figure 6–1 in application.
[3] Take is not estimated to occur beyond these cutoff distances, regardless of the received level.

Level A harassment—NMFS' Technical Guidance for Assessing the Effects of Anthropogenic Sound on Marine Mammal Hearing (Version 2.0) (Technical Guidance, 2018) identifies dual criteria to assess auditory injury (Level A harassment) to five different marine mammal groups (based on hearing sensitivity) as a result of exposure to noise from two different types of sources (impulsive or non-impulsive). ONR's proposed activity includes the use of non-impulsive acoustic sources; however, Level A harassment is not expected as a result of the proposed activities nor is it proposed to be authorized by NMFS.

These thresholds are provided in the table below. The references, analysis, and methodology used in the development of the thresholds are described in NMFS' 2018 Technical Guidance, which may be accessed at: *www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-acoustic-technical-guidance.*

TABLE 6—THRESHOLDS IDENTIFYING THE ONSET OF PERMANENT THRESHOLD SHIFT

Hearing group	PTS onset thresholds* (received level)	
	Impulsive	Non-impulsive
Low-Frequency (LF) Cetaceans	*Cell 1:* $L_{p,0\text{-pk,flat}}$: 219 dB; $L_{E,p,\ LF,24h}$: 183 dB	*Cell 2:* $L_{E,p,\ LF,24h}$: 199 dB
Mid-Frequency (MF) Cetaceans	*Cell 3:* $L_{p,0\text{-pk,flat}}$: 230 dB; $L_{E,p,\ MF,24h}$: 185 dB	*Cell 4:* $L_{E,p,\ MF,24h}$: 198 dB
High-Frequency (HF) Cetaceans	*Cell 5:* $L_{p,0\text{-pk,flat}}$: 202 dB; $L_{E,p,\ HF,24h}$: 155 dB	*Cell 6:* $L_{E,p,\ HF,24h}$: 173 dB

TABLE 6—THRESHOLDS IDENTIFYING THE ONSET OF PERMANENT THRESHOLD SHIFT—Continued

Hearing group	PTS onset thresholds * (received level)	
	Impulsive	Non-impulsive
Phocid Pinnipeds (PW) (Underwater)	*Cell 7:* $L_{p,0\text{-pk,flat}}$: 218 dB; $L_{E,p,\ PW,24h}$: 185 dB	*Cell 8:* $L_{E,p,\ PW,24h}$: 201 dB
Otariid Pinnipeds (OW) (Underwater)	*Cell 9:* $L_{p,0\text{-pk,flat}}$: 232 dB; $L_{E,p,\ OW,24h}$: 203 dB	*Cell 10:* $L_{E,p,\ OW,24h}$: 219 dB

* Dual metric thresholds for impulsive sounds: Use whichever results in the largest isopleth for calculating PTS onset. If a non-impulsive sound has the potential of exceeding the peak sound pressure level thresholds associated with impulsive sounds, these thresholds are recommended for consideration.

Note: Peak sound pressure level ($L_{p,0\text{-pk}}$) has a reference value of 1 µPa, and weighted cumulative sound exposure level ($L_{E,p}$) has a reference value of 1µPa²s. In this Table, thresholds are abbreviated to be more reflective of International Organization for Standardization standards (ISO 2017). The subscript "flat" is being included to indicate peak sound pressure are flat weighted or unweighted within the generalized hearing range of marine mammals (*i.e.,* 7 Hz to 160 kHz). The subscript associated with cumulative sound exposure level thresholds indicates the designated marine mammal auditory weighting function (LF, MF, and HF cetaceans, and PW and OW pinnipeds) and that the recommended accumulation period is 24 hours. The weighted cumulative sound exposure level thresholds could be exceeded in a multitude of ways (*i.e.,* varying exposure levels and durations, duty cycle). When possible, it is valuable for action proponents to indicate the conditions under which these thresholds will be exceeded.

Quantitative Modeling

The Navy performed a quantitative analysis to estimate the number of marine mammals likely to be exposed to underwater acoustic transmissions above the previously described threshold criteria during the proposed action. Inputs to the quantitative analysis included marine mammal density estimates obtained from the Kaschner *et al.* (2006) habitat suitability model and Cañadas *et al.* (2020), marine mammal depth occurrence (U.S. Department of the Navy, 2017b), oceanographic and mammal hearing data, and criteria and thresholds for levels of potential effects. The quantitative analysis consists of computer modeled estimates and a post-model analysis to determine the number of potential animal exposures. The model calculates sound energy propagation from the proposed non-impulsive acoustic sources, the sound received by animat (virtual animal) dosimeters representing marine mammals distributed in the area around the modeled activity, and whether the sound received by animats exceeds the thresholds for effects.

The Navy developed a set of software tools and compiled data for estimating acoustic effects on marine mammals without consideration of behavioral avoidance or mitigation. These tools and data sets serve as integral components of the Navy Acoustic Effects Model (NAEMO). In NAEMO, animats are distributed non-uniformly based on species-specific density, depth distribution, and group size information and animats record energy received at their location in the water column. A fully three-dimensional environment is used for calculating sound propagation and animat exposure in NAEMO. Site-specific bathymetry, sound speed profiles, wind speed, and bottom properties are incorporated into the propagation modeling process. NAEMO calculates the likely propagation for various levels of energy (sound or pressure) resulting from each source used during the training event.

NAEMO then records the energy received by each animat within the energy footprint of the event and calculates the number of animats having received levels of energy exposures that fall within defined impact thresholds. Predicted effects on the animats within a scenario are then tallied and the highest order effect (based on severity of criteria; *e.g.,* PTS over TTS) predicted for a given animat is assumed. Each scenario, or each 24-hour period for scenarios lasting greater than 24 hours is independent of all others, and therefore, the same individual marine mammal (as represented by an animat in the model environment) could be impacted during each independent scenario or 24-hour period. In few instances, although the activities themselves all occur within the proposed study location, sound may propagate beyond the boundary of the study area. Any exposures occurring outside the boundary of the study area are counted as if they occurred within the study area boundary. NAEMO provides the initial estimated impacts on marine species with a static horizontal distribution (*i.e.,* animats in the model environment do not move horizontally).

There are limitations to the data used in the acoustic effects model, and the results must be interpreted within this context. While the best available data and appropriate input assumptions have been used in the modeling, when there is a lack of definitive data to support an aspect of the modeling, conservative modeling assumptions have been chosen (*i.e.,* assumptions that may result in an overestimate of acoustic exposures):

- Animats are modeled as being underwater, stationary, and facing the source and therefore always predicted to receive the maximum potential sound level at a given location (*i.e.,* no porpoising or pinnipeds' heads above water);
- Animats do not move horizontally (but change their position vertically within the water column), which may overestimate physiological effects such as hearing loss, especially for slow moving or stationary sound sources in the model;
- Animats are stationary horizontally and therefore do not avoid the sound source, unlike in the wild where animals would most often avoid exposures at higher sound levels, especially those exposures that may result in PTS;
- Multiple exposures within any 24-hour period are considered one continuous exposure for the purposes of calculating potential threshold shift, because there are not sufficient data to estimate a hearing recovery function for the time between exposures; and
- Mitigation measures were not considered in the model. In reality, sound-producing activities would be reduced, stopped, or delayed if marine mammals are detected by visual monitoring.

Due to these inherent model limitations and simplifications, model-estimated results should be further analyzed, considering such factors as the range to specific effects, avoidance, and the likelihood of successfully implementing mitigation measures. This analysis uses a number of factors in addition to the acoustic model results to predict acoustic effects on marine mammals, as described below in the

Marine Mammal Occurrence and Take Estimation section.

The underwater radiated noise signature for icebreaking in the central Arctic Ocean by CGC Healy during different types of ice-cover was characterized in Roth *et al.* (2013). The radiated noise signatures were characterized for various fractions of ice cover. For modeling, the 8/10 and 3/10 ice cover were used. Each modeled day of icebreaking consisted of 16 hours of 8/10 ice cover and 8 hours of 3/10 ice cover. The sound signature of the 5/10 icebreaking activities, which would correspond to half-power icebreaking, was not reported in (Roth *et al.* 2013); therefore, the full-power signature was used as a conservative proxy for the half-power signature. Icebreaking was modeled for eight days total. Since ice forecasting cannot be predicted more than a few weeks in advance, it is unknown if icebreaking would be needed to deploy or retrieve the sources after one year of transmitting. Therefore, the potential for an icebreaking cruise on CGC Healy was conservatively analyzed within this request for an IHA. As the R/V *Sikuliaq* is not expected to be ice breaking, acoustic noise created by ice breaking is only modeled for the CGC Healy. Figures 5a and 5b in Roth *et al.* (2013) depict the source spectrum level versus frequency for 8/10 and 3/10 ice cover, respectively. The sound signature of each of the ice coverage levels was broken into 1-octave bins (Table 7). In the model, each bin was included as a separate source on the modeled vessel. When these independent sources go active concurrently, they simulate the sound signature of CGC Healy. The modeled source level summed across these bins was 196.2 dB for the 8/10 signature and 189.3 dB for the 3/10 ice signature. These source levels are a good approximation of the icebreaker's observed source level (provided in Figure 4b of (Roth *et al.,* 2013)). Each frequency and source level was modeled as an independent source, and applied simultaneously to all of the animats within NAEMO. Each second was summed across frequency to estimate sound pressure level (root mean square [SPL_{RMS}]). Any animat exposed to sound levels greater than 120 dB was considered a take by Level B harassment. For PTS and TTS, determinations, sound exposure levels were summed over the duration of the test and the transit to the deep water deployment area. The method of quantitative modeling for icebreaking is considered to be a conservative approach; therefore, the number of takes estimated for icebreaking are likely an overestimate and would not be expected to reach that level.

TABLE 7—MODELED BINS FOR 8/10 (FULL POWER) AND 3/10 (QUARTER POWER) ICE COVERAGE ICE BREAKING ON THE CGC HEALY

Frequency (Hz)	8/10 source level (dB)	3/10 source level (dB)
25	189	187
50	188	182
100	189	179
200	190	177
400	188	175
800	183	170
1600	177	166
3200	176	171
6400	172	168
12800	167	164

For non-impulsive sources, NAEMO calculates the SPL and SEL for each active emission during an event. This is done by taking the following factors into account over the propagation paths: bathymetric relief and bottom types, sound speed, and attenuation contributors such as absorption, bottom loss, and surface loss. Platforms such as a ship using one or more sound sources are modeled in accordance with relevant vehicle dynamics and time durations by moving them across an area whose size is representative of the testing event's operational area.

Marine Mammal Occurrence and Take Estimation

In this section we provide information about the occurrence of marine mammals, including density or other relevant information that will inform the take calculations. We also describe how the marine mammal occurrence information is synthesized to produce a quantitative estimate of the take that is reasonably likely to occur and proposed for authorization.

The beluga whale density numbers utilized for quantitative acoustic modeling are from the Navy Marine Species Density Database (U.S. Department of the Navy 2014). Where available (*i.e.,* June through 15 October over the continental shelf primarily), density estimates used were from Duke density modeling based upon line-transect surveys (Cañadas *et al.,* 2020). The remaining seasons and geographic area were based on the habitat-based modeling by Kaschner *et al.* (2006) and Kaschner (2004). Density for beluga whales was not distinguished by stock and varied throughout the project area geographically and monthly; the range of densities in the project area during September I shown in Table 8. The density estimates for ringed seals are based on the habitat suitability modeling by Kaschner *et al.,* (2006) and Kaschner (2004) and shown in Table 8 as well.

TABLE 8—DENSITY ESTIMATES OF IMPACTED SPECIES

Common name	Density estimates (animals/km^2)
Beluga whale (Beaufort Sea) Stock	0.000506 to 0.5176
Beluga whale (Eastern Chukchi Sea Stock).	
Ringed seal (Arctic Stock)	0.1108 to 0.3562

Take of all species would occur by Level B harassment only. NAEMO estimated for potential TTS exposure and predicted one exposure of ringed seals may occur as a result of the proposed activities. Table 9 shows the total number of requested takes by Level B harassment that NMFS proposes to authorize for both beluga whale stocks and the Arctic ringed seal stock based upon NAEMO modeled results.

Density estimates for beluga whales are equal as estimates were not distinguished by stock (Kaschner *et al.,* 2006; Kaschner, 2004). The ranges of the Beaufort Sea and Eastern Chukchi Sea beluga whales vary within the study area throughout the year (Hauser *et al.,* 2014). Based upon the limited information available regarding the expected spatial distributions of each stock within the study area, take has been apportioned equally to each stock (Table 9). In addition, in NAEMO, animats do not move horizontally or react in any way to avoid sound. Therefore, the current model may overestimate non-impulsive acoustic impacts.

TABLE 9—REQUESTED TAKE BY LEVEL B HARASSMENT

Species	Non-impulsive active acoustics (behavioral)	Icebreaking (behavioral)	Icebreaking (TTS)	Total proposed authorized take	Percentage of stock requested for take [1]
				Behavioral/TTS	
Beluga whale—Beaufort Sea Stock	134	11	0	145/0	0.369
Beluga whale—Eastern Chukchi Sea Stock	134	11	0	145/0	1.09
Ringed seal	2,839	538	1	3,377/1	1.97

[1] Percentage of stock taken calculated based on proportion of number of Level B takes per the stock population estimate provided in Table 3–1 in the application.

Proposed Mitigation

In order to issue an IHA under section 101(a)(5)(D) of the MMPA, NMFS must set forth the permissible methods of taking pursuant to the activity, and other means of effecting the least practicable impact on the species or stock and its habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of the species or stock for taking for certain subsistence uses. NMFS regulations require applicants for incidental take authorizations to include information about the availability and feasibility (economic and technological) of equipment, methods, and manner of conducting the activity or other means of effecting the least practicable adverse impact upon the affected species or stocks, and their habitat (50 CFR 216.104(a)(11)). The NDAA for FY 2004 amended the MMPA as it relates to military readiness activities and the incidental take authorization process such that ''least practicable impact'' shall include consideration of personnel safety, practicality of implementation, and impact on the effectiveness of the military readiness activity.

In evaluating how mitigation may or may not be appropriate to ensure the least practicable adverse impact on species or stocks and their habitat, as well as subsistence uses where applicable, NMFS considers two primary factors:

(1) The manner in which, and the degree to which, the successful implementation of the measure(s) is expected to reduce impacts to marine mammals, marine mammal species or stocks, and their habitat, as well as subsistence uses. This considers the nature of the potential adverse impact being mitigated (likelihood, scope, range). It further considers the likelihood that the measure will be effective if implemented (probability of accomplishing the mitigating result if implemented as planned), the likelihood of effective implementation (probability implemented as planned), and;

(2) The practicability of the measures for applicant implementation, which may consider such things as cost, impact on operations, and, in the case of a military readiness activity, personnel safety, practicality of implementation, and impact on the effectiveness of the military readiness activity.

Mitigation for Marine Mammals and Their Habitat

The Navy would be required to abide by the mitigation measures below. These measures are expected to: further minimize the likelihood of ship strikes; reduce the likelihood that marine mammals are exposed to sound levels during acoustic source deployment that would be expected to result in TTS or more severe behavioral responses and also to ensure that there are no other interactions between the deployed gear and marine mammals, and; further ensure that there are no impacts to subsistence uses.

Ships operated by or for the Navy have at least one personnel assigned to stand watch at all times, day and night, when moving through the water. Watch personnel must be trained through the U.S. Navy Marine Species Awareness Training Program, which standardizes watch protocols and trains personnel in marine species detection to prevent adverse impacts to marine mammal species. While in transit, ships must be alert at all times, use extreme caution and proceed at a safe speed such that the ship can take proper and effective action to avoid a collision with any marine mammals.

During mooring or UUV deployment, visual observation would start 15 minutes prior to and continue throughout the deployment within the mitigation zone of 180 ft (55 m, roughly one ship length) around the deployed mooring. Deployment will stop if a marine mammal is visually detected within the exclusion zone. Deployment will re-commence if any one of the following conditions are met: (1) The animal is observed exiting the exclusion zone, (2) the animal is thought to have exited the exclusion zone based on its course and speed, or (3) the exclusion zone has been clear from any additional sightings for a period of 15 minutes for pinnipeds and 30 minutes for cetaceans.

Ships would avoid approaching marine mammals head-on and would maneuver to maintain a mitigation zone of 500 yards (yd; 457 m) around observed cetaceans, and 200 yd (183 m) around all other marine mammals, provided it is safe to do so in ice-free waters. Ships captains and subsistence whalers would also maintain at-sea communication to avoid conflict of ship transit with hunting activity.

If a marine mammal species for which take is not authorized is encountered or observed within the mitigation zone, or a species for which authorization was granted but the authorized number of takes have been met, activities must cease. Activities may not resume until

the animal is confirmed to have left the area.

These requirements do not apply if a vessel's safety is at risk, such as when a change of course would create an imminent and serious threat to safety, person, or vessel, and to the extent that vessels are restricted in their ability to maneuver. No further action is necessary if a marine mammal other than a cetacean continues to approach the vessel after there has already been one maneuver and/or speed change to avoid the animal. Avoidance measures should continue for any observed cetacean in order to maintain a mitigation zone of 500 yd (457 m).

Based on our evaluation of the applicant's proposed measures, NMFS has preliminarily determined that the proposed mitigation measures provide the means of effecting the least practicable impact on the affected species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of such species or stock for subsistence uses.

Proposed Monitoring and Reporting

In order to issue an IHA for an activity, section 101(a)(5)(D) of the MMPA states that NMFS must set forth requirements pertaining to the monitoring and reporting of such taking. The MMPA implementing regulations at 50 CFR 216.104(a)(13) indicate that requests for authorizations must include the suggested means of accomplishing the necessary monitoring and reporting that will result in increased knowledge of the species and of the level of taking or impacts on populations of marine mammals that are expected to be present while conducting the activities. Effective reporting is critical both to compliance as well as ensuring that the most value is obtained from the required monitoring.

Monitoring and reporting requirements prescribed by NMFS should contribute to improved understanding of one or more of the following:

- Occurrence of marine mammal species or stocks in the area in which take is anticipated (*e.g.,* presence, abundance, distribution, density);
- Nature, scope, or context of likely marine mammal exposure to potential stressors/impacts (individual or cumulative, acute or chronic), through better understanding of: (1) action or environment (*e.g.,* source characterization, propagation, ambient noise); (2) affected species (*e.g.,* life history, dive patterns); (3) co-occurrence of marine mammal species with the action; or (4) biological or behavioral context of exposure (*e.g.,* age, calving or feeding areas);
- Individual marine mammal responses (behavioral or physiological) to acoustic stressors (acute, chronic, or cumulative), other stressors, or cumulative impacts from multiple stressors;
- How anticipated responses to stressors impact either: (1) long-term fitness and survival of individual marine mammals; or (2) populations, species, or stocks;
- Effects on marine mammal habitat (*e.g.,* marine mammal prey species, acoustic habitat, or other important physical components of marine mammal habitat); and,
- Mitigation and monitoring effectiveness.

While underway, the ships (including non-Navy ships operating on behalf of the Navy) utilizing active acoustics will have at least one watch person during activities. Watch personnel must undertake extensive training through the Navy's Marine Species Awareness Training. Their duties may be performed in conjunction with other job responsibilities, such as navigating the ship or supervising other personnel. While on watch, personnel employ visual search techniques, including the use of binoculars, using a scanning method in accordance with the U.S. Navy Marine Species Awareness Training or civilian equivalent. A primary duty of watch personnel is to detect and report all objects and disturbances sighted in the water that may be indicative of a threat to the ship and its crew, such as debris, or surface disturbance. Per safety requirements, watch personnel also report any marine mammals sighted that have the potential to be in the direct path of the ship as a standard collision avoidance procedure.

While underway, the ships (including non-Navy ships operating on behalf of the Navy) utilizing active acoustics and towed in-water devices will have at least one watch person during activities. While underway, watch personnel must be alert at all times and have access to binoculars. Each day, the following information should be recorded:

- Vessel name;
- Watch personnel names and affiliations;
- Effort type (*i.e.,* transit or deployment); and
- Environmental conditions (at the beginning of watch personnel shift and whenever conditions changed significantly), including Beaufort Sea State and any other relevant weather conditions including cloud cover, fog, sun glare, and overall visibility to the horizon.

Watch personnel must use standardized data collection forms, whether electronic or hard copy, as well as distinguish between marine mammal sightings that occur during ship transit or acoustic source deployment. Upon visual observation of a marine mammal, the following information would be recorded:

- Date/time of sighting;
- Identification of animal (*e.g.,* genus/species, lowest possible taxonomic level, or unidentified) and the composition of the group if there is a mix of species;
- Location (latitude/longitude) of sighting;
- Estimated number of animals (high/low/best)
- Description (as many distinguishing features as possible of each individual seen, including length, shape, color, pattern, scars or markings, shape and size of dorsal fin, shape of head, and blow characteristics);
- Detailed behavior observations (*e.g.,* number of blows/breaths, number of surfaces, breaching, spyhopping, diving, feeding, traveling; as explicit and detailed as possible; length of time the animal was observed within the harassment zone; note any observed changes in behavior);
- Distance from ship to animal;
- Direction of animal's travel relative to the vessel
- Platform activity at time of sighting (*i.e.,* transit, deployment); and
- Weather conditions (*i.e.,* Beaufort Sea State, cloud cover).

The U.S. Navy has coordinated with NMFS to develop an overarching program plan in which specific monitoring would occur. This plan is called the Integrated Comprehensive Monitoring Program (ICMP) (Department of the Navy, 2011). The ICMP has been developed in direct response to Navy permitting requirements established through various environmental compliance efforts. As a framework document, the ICMP applies by regulation to those activities on ranges and operating areas for which the Navy is seeking or has sought incidental take authorizations. The ICMP is intended to coordinate monitoring efforts across all regions and to allocate the most appropriate level and type of effort based on a set of standardized research goals, and in acknowledgement of regional scientific value and resource availability.

The ICMP is focused on Navy training and testing ranges where the majority of Navy activities occur regularly as those areas have the greatest potential for

being impacted. ONR's ARA in comparison is a less intensive test with little human activity present in the Arctic. Human presence is limited to the deployment of sources that would take place over several weeks. Additionally, due to the location and nature of the testing, vessels and personnel would not be within the study area for an extended period of time. As such, more extensive monitoring requirements beyond the basic information being collected would not be feasible as it would require additional personnel and equipment to locate seals and a presence in the Arctic during a period of time other then what is planned for source deployment. However, ONR will record all observations of marine mammals, including the marine mammal's species identification, location (latitude and longitude), behavior, and distance from project activities. ONR will also record date and time of sighting. This information is valuable in an area with few recorded observations.

If any injury or death of a marine mammal is observed during the 2022–2023 ARA, the Navy will immediately halt the activity and report the incident to the Office of Protected Resources, NMFS, and the Alaska Regional Stranding Coordinator, NMFS. The following information must be provided:

- Time, date, and location of the discovery;
- Species identification (if known) or description of the animal(s) involved;
- Condition of the animal(s) (including carcass condition if the animal is dead);
- Observed behaviors of the animal(s), if alive;
- If available, photographs or video footage of the animal(s); and
- General circumstances under which the animal(s) was discovered (*e.g.,* deployment of moored or drifting sources or by transiting vessel).

ONR will provide NMFS OPR and AKR with a draft monitoring report within 90 days of the conclusion of each research cruise, or sixty days prior to the issuance of any subsequent IHA for this project, whichever comes first. The draft monitoring report will include data regarding acoustic source use and any mammal sightings or detection documented. The report will include the estimated number of marine mammals taken during the activity. The report will also include information on the number of shutdowns recorded. If no comments are received from NMFS within 30 days of submission of the draft final report, the draft final report will constitute the final report. If comments are received, a final report must be submitted within 30 days after receipt of comments.

Negligible Impact Analysis and Determination

NMFS has defined negligible impact as an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival (50 CFR 216.103). A negligible impact finding is based on the lack of likely adverse effects on annual rates of recruitment or survival (*i.e.,* population-level effects). An estimate of the number of takes alone is not enough information on which to base an impact determination. In addition to considering estimates of the number of marine mammals that might be ''taken'' through harassment, NMFS considers other factors, such as the likely nature of any impacts or responses (*e.g.,* intensity, duration), the context of any impacts or responses (*e.g.,* critical reproductive time or location, foraging impacts affecting energetics), as well as effects on habitat, and the likely effectiveness of the mitigation. We also assess the number, intensity, and context of estimated takes by evaluating this information relative to population status. Consistent with the 1989 preamble for NMFS' implementing regulations (54 FR 40338; September 29, 1989), the impacts from other past and ongoing anthropogenic activities are incorporated into this analysis via their impacts on the baseline (*e.g.,* as reflected in the regulatory status of the species, population size and growth rate where known, ongoing sources of human-caused mortality, or ambient noise levels).

To avoid repetition, the discussion of our analysis applies to beluga whales and ringed seals, given that the anticipated effects of this activity on these different marine mammal stocks are expected to be similar. Where there are meaningful differences between species or stocks, or groups of species, in anticipated individual responses to activities, impact of expected take on the population due to differences in population status, or impacts on habitat, they are described independently in the analysis below.

Underwater acoustic transmissions associated with the proposed ARA, as outlined previously, have the potential to result in Level B harassment of beluga seals and ringed seals in the form of behavioral disturbances. No serious injury, mortality, or Level A harassment are anticipated to result from these described activities. Effects on individual belugas or ringed seals taken by Level B harassment could include alteration of dive behavior and/or foraging behavior, effects to breathing rates, interference with or alteration of vocalization, avoidance, and flight. More severe behavioral responses are not anticipated due to the localized, intermittent use of active acoustic sources. However, exposure duration is likely to be short-term and individuals will, most likely, simply be temporarily displaced by moving away from the acoustic source. Exposures are, therefore, unlikely to result in any significant realized decrease in fitness for affected individuals or adverse impacts to stocks as a whole.

Arctic ringed seals are listed as threatened under the ESA. The primary concern for Arctic ringed seals is the ongoing and anticipated loss of sea ice and snow cover resulting from climate change, which is expected to pose a significant threat to ringed seals in the future (Muto *et al.,* 2021). In addition, Arctic ringed seals have also been experiencing a UME since 2019 although the cause of the UME is currently undetermined. As mentioned earlier, no mortality or serious injury to ringed seals is anticipated nor proposed to be authorized. Due to the short-term duration of expected exposures and required mitigation measures to reduce adverse impacts, we do not expect the proposed ARA to affect annual rates of ringed seal survival and recruitment that may threaten population recovery or exacerbate the ongoing UME.

A small portion of the proposed ARA study area overlaps with ringed seal critical habitat. Although this habitat contains features necessary for ringed seal formation and maintenance of subnivean birth lairs, basking and molting, and foraging, these features are also available throughout the rest of the designated critical habitat area. Displacement of ringed seals from the proposed ARA study area would likely not interfere with their ability to access necessary habitat features. Therefore, we expect minimal impacts to any displaced ringed seals as similar necessary habitat features would still be available nearby.

The proposed ARA study area also overlaps with a beluga whale migratory BIA. Due to the small amount of overlap between the BIA and the proposed ARA study area as well as the low intensity and short-term duration of acoustic sources and required mitigation measures, we expect minimal impacts to migrating belugas. Shutdown zones will reduce the potential for Level A harassment of belugas and ringed seals, as well as the severity of any Level B

harassment. The requirements of trained dedicated watch personnel and speed restrictions will also reduce the likelihood of any ship strikes to migrating belugas.

In all, the proposed ARA are expected to have minimal adverse effects on marine mammal habitat. While the activities may cause some fish to leave the area of disturbance, temporarily impacting marine mammals' foraging opportunities, this would encompass a relatively small area of habitat leaving large areas of existing fish and marine mammal foraging habitat unaffected. As such, the impacts to marine mammal habitat are not expected to impact the health or fitness of any marine mammals.

In summary and as described above, the following factors primarily support our preliminary determination that the impacts resulting from this activity are not expected to adversely affect any of the species or stocks through effects on annual rates of recruitment or survival:

- No serious injury or mortality is anticipated or authorized;
- Impacts would be limited to Level B harassment only;
- Only temporary behavioral modifications are expected to result from these proposed activities;
- Impacts to marine mammal prey or habitat will be minimal and short term.

Based on the analysis contained herein of the likely effects of the specified activity on marine mammals and their habitat, and taking into consideration the implementation of the proposed monitoring and mitigation measures, NMFS preliminarily finds that the total marine mammal take from the proposed activity will have a negligible impact on all affected marine mammal species or stocks.

Unmitigable Adverse Impact Analysis and Determination

In order to issue an IHA, NMFS must find that the specified activity will not have an ''unmitigable adverse impact'' on the subsistence uses of the affected marine mammal species or stocks by Alaskan Natives. NMFS has defined ''unmitigable adverse impact'' in 50 CFR 216.103 as an impact resulting from the specified activity: (1) That is likely to reduce the availability of the species to a level insufficient for a harvest to meet subsistence needs by: (i) Causing the marine mammals to abandon or avoid hunting areas; (ii) Directly displacing subsistence users; or (iii) Placing physical barriers between the marine mammals and the subsistence hunters; and (2) That cannot be sufficiently mitigated by other measures to increase the availability of marine mammals to allow subsistence needs to be met.

Subsistence hunting is important for many Alaska Native communities. A study of the North Slope villages of Nuiqsut, Kaktovik, and Utqiaġvik (formally Barrow) identified the primary resources used for subsistence and the locations for harvest (Stephen R. Braund & Associates, 2010), including terrestrial mammals (caribou, moose, wolf, and wolverine), birds (geese and eider), fish (Arctic cisco, Arctic char/Dolly Varden trout, and broad whitefish), and marine mammals (bowhead whale, ringed seal, bearded seal, and walrus). Ringed seals and beluga whales are likely located within the project area during this proposed action, yet the proposed action would not remove individuals from the population nor behaviorally disturb them in a manner that would affect their behavior more than 100km farther inshore where subsistence hunting occurs.. The permitted sources would be placed far outside of the range for subsistence hunting. The closest active acoustic source (fixed or drifting) within the proposed project site that is likely to cause Level B take is approximately 110 nm (204 km) from land. This ensures a significant standoff distance from any subsistence hunting area. The closest distance to subsistence hunting (70 nm, or 130 km) is well the largest distance from the sound sources in use at which behavioral harassment would be expected to occur (20 km) described above. Furthermore, there is no reason to believe that any behavioral disturbance of beluga whales or ringed seals that occurs far offshore (we do not anticipate any Level A harassment) would affect their subsequent behavior in a manner that would interfere with subsistence uses should those animals later interact with hunters.

In addition, ONR has been communicating with the Native communities about the proposed action. The ONR chief scientist for AMOS gave a virtual briefing on ONR research planned for 2022–2023 Alaska Eskimo Whaling Commission (AEWC) meeting in February 2022. This briefing communicated the lack of effect on subsistence hunting due to the distance of the sources from hunting areas. ONR scientists also attend Arctic Waterways Safety Committee (AWSC) and AEWC meetings regularly to discuss past, present, and future ARA. While no take is anticipated to result during transit, points of contact for at-sea communication will also be established between ship captains and whalers to avoid any conflict of ship transit with hunting activity.

Based on the description of the specified activity, distance of the study area from subsistence hunting grounds, the measures described to minimize adverse effects on the availability of marine mammals for subsistence purposes, and the proposed mitigation and monitoring measures, NMFS has preliminarily determined that there will not be an unmitigable adverse impact on subsistence uses from ONR's proposed activities.

Peer Review of the Monitoring Plan—The MMPA requires that monitoring plans be independently peer reviewed where the proposed activity may affect the availability of a species or stock for taking for subsistence uses (16 U.S.C. 1371(a)(5)(D)(ii)(III)). Given the factors discussed above, NMFS has also determined that the activity is not likely to affect the availability of any marine mammal species or stock for taking for subsistence uses, and therefore, peer review of the monitoring plan is not warranted for this project.

Endangered Species Act

Section 7(a)(2) of the Endangered Species Act of 1973 (ESA: 16 U.S.C. 1531 *et seq.*) requires that each Federal agency insure that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of designated critical habitat. To ensure ESA compliance for the issuance of IHAs, NMFS consults internally whenever we propose to authorize take for endangered or threatened species, in this case with Alaska Regional Office (AKR).

NMFS is proposing to authorize take of ringed seals, which are listed under the ESA. The Permits and Conservation Division has requested initiation of section 7 consultation with the AKR for the issuance of this IHA. NMFS will conclude the ESA consultation prior to reaching a determination regarding the proposed issuance of the authorization.

Proposed Authorization

As a result of these preliminary determinations, NMFS proposes to issue an IHA to ONR for conducting their fifth year of ARA in the Beaufort and eastern Chukchi Seas from September 2022—September 2023, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated. A draft of the proposed IHA can be found at: *www.fisheries.noaa.gov/permit/incidental-take-authorizations-under-marine-mammal-protection-act.*

Request for Public Comments

We request comment on our analyses, the proposed authorization, and any other aspect of this notice of proposed IHA for the proposed ARA. We also request comment on the potential renewal of this proposed IHA as described in the paragraph below. Please include with your comments any supporting data or literature citations to help inform decisions on the request for this IHA or a subsequent renewal IHA.

On a case-by-case basis, NMFS may issue a one-time, one-year renewal IHA following notice to the public providing an additional 15 days for public comments when (1) up to another year of identical or nearly identical activities as described in the Description of Proposed Activities section of this notice is planned or (2) the activities as described in the Description of Proposed Activities section of this notice would not be completed by the time the IHA expires and a renewal would allow for completion of the activities beyond that described in the *Dates and Duration* section of this notice, provided all of the following conditions are met:

• A request for renewal is received no later than 60 days prior to the needed renewal IHA effective date (recognizing that the renewal IHA expiration date cannot extend beyond one year from expiration of the initial IHA).

• The request for renewal must include the following:

(1) An explanation that the activities to be conducted under the requested renewal IHA are identical to the activities analyzed under the initial IHA, are a subset of the activities, or include changes so minor (*e.g.,* reduction in pile size) that the changes do not affect the previous analyses, mitigation and monitoring requirements, or take estimates (with the exception of reducing the type or amount of take).

(2) A preliminary monitoring report showing the results of the required monitoring to date and an explanation showing that the monitoring results do not indicate impacts of a scale or nature not previously analyzed or authorized.

Upon review of the request for renewal, the status of the affected species or stocks, and any other pertinent information, NMFS determines that there are no more than minor changes in the activities, the mitigation and monitoring measures will remain the same and appropriate, and the findings in the initial IHA remain valid.

Dated: July 20, 2022.

Shannon Bettridge,

Chief, Marine Mammal and Sea Turtle Conservation Division,Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Draft Environmental Assessment for the Installation of a High Frequency Radar at Hightower Park in Satellite Beach, Florida

AGENCY: National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce.

ACTION: Notice of Availability; Request for Comments.

SUMMARY: NOAA has prepared a draft environmental assessment (EA) for the installation of a high frequency radar at Hightower Park in Satellite Beach, Florida. We are making the environmental assessment available to the public for review and comment.

DATES: Written comments must be submitted on or before August 25, 2022.

ADDRESSES: The Draft EA is available online at *https://ioos.noaa.gov/hightower-beach-park.*

If you wish to comment on the Draft EA, please send comments via email to U.S. IOOS Office at *hightowerbeachpark@noaa.gov.*

FOR FURTHER INFORMATION CONTACT: Mequela Moreno, U.S. Integrated Ocean Observing System (IOOS), Regions Budget & Policy Division, by email *mequela.moreno@noaa.gov,* by phone 240–533–9433, or by mail at 1315 East West-Highway, SSMC3, 2nd Floor, Silver Spring, MD 20910.

SUPPLEMENTARY INFORMATION: NOAA's U.S. Integrated Ocean Observing System (IOOS) Program Office has prepared a draft environmental assessment of potential impacts for the installation of a high frequency radar (HFR) at Hightower Beach Park, in the City of Satellite Beach, Florida.

The HFR would be installed south and shoreward of the parking lot at Hightower Beach Park, approximately 100 ft. (30 meters) away. Coordinates: Latitude: 28.194372° N; Longitude: 80.594403° W (WGS 84 datum).

The proposed action at Hightower Beach Park HFR installation is part of a large, on-going initiative to fill HFR coverage gaps along the southeast coastline. HFR systems measure the speed and direction of ocean surface currents in near real time. The HFR systems are managed by Southeast Coastal Ocean Observing Regional Association (SECOORA) and the Integrated Ocean Observing System (IOOS®), which is a national-regional partnership working to provide new tools and forecasts to improve safety, enhance the economy, and protect our environment. IOOS was created by the Integrated Coastal and Ocean Observation System Act of 2009 (Pub. L. 111–11), and amended by the Coordinated Ocean Observation and Research Act of 2020 (Pub. L. 116–271, Title I), codified at (33 U.S.C. 3601–3610).

Surface current mapping is integral to research, supporting oceanographic, fisheries, and meteorological forecasting activities. Surface current mapping is also vital for U.S. Coast Guard search and rescue activities, monitoring and tracking hazardous materials, monitoring water quality, including tracking harmful algal blooms, and supporting marine navigation.

IOOS proposes that the installation and operation of the HFR would have no significant impact on the environment. The EA has been prepared in accordance with the National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*) and Council on Environmental Quality implementing regulations (40 CFR parts 1500–1508), as well as the Integrated Coastal and Ocean Observation System Act of 2009 (Pub. L. 111–11), as amended by the Coordinated Ocean Observation and Research Act of 2020 (Pub. L. 116–271, Title I), codified at (33 U.S.C. 3601–3610).

Carl C. Gouldman,

Director, U.S. Integrated Ocean Observing System Office, National Ocean Service, National Oceanic and Atmospheric Administration.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XC170]

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Pacific Fishery Management Council's (Pacific Council) Scientific and Statistical Committee's (SSC's) Groundfish Subcommittee will hold an online meeting to discuss coordination of ageing efforts to inform 2023 and 2025 groundfish stock assessments.

DATES: The online meeting will be held on Thursday, August 11, 2022, from 9 a.m. to 12 p.m., Pacific Daylight Time.

ADDRESSES: This meeting will be held online. Specific meeting information, including directions on how to join the meeting and system requirements will be provided in the meeting announcement on the Pacific Council's website (see *www.pcouncil.org*). You may send an email to Mr. Kris Kleinschmidt (*kris.kleinschmidt@noaa.gov*) or contact him at (503) 820–2412 for technical assistance.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220–1384.

FOR FURTHER INFORMATION CONTACT: Mr. John DeVore, Staff Officer, Pacific Council; telephone: (503) 820–2413.

SUPPLEMENTARY INFORMATION: The SSC's Groundfish Subcommittee will discuss the availability of ageing structures collected by the states and NMFS in fishery sampling and surveys that may inform stock assessments prioritized for 2023 and 2025. The SSC's Groundfish Subcommittee will recommend how ageing labs should prioritize the ageing of these structures to optimize the availability of data for 2023 and 2025 stock assessments. These recommendations will be provided to the SSC and the Pacific Council for their deliberations at their September meetings.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt (*kris.kleinschmidt@noaa.gov*; (503) 820–2412) at least 10 days prior to the meeting date.

(Authority: 16 U.S.C. 1801 *et seq.*)

Dated: July 21, 2022.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BUREAU OF CONSUMER FINANCIAL PROTECTION

Publication of FY 2019 Service Contract Inventory

AGENCY: Bureau of Consumer Financial Protection.

ACTION: Notice of public availability of FY 2019 Service Contract Inventory.

SUMMARY: In accordance with section 734 of Division C of the Consolidated Appropriations Act of 2010, the Consumer Financial Protection Bureau (Bureau) is publishing this notice to advise the public of the availability of the FY 2019 service contract inventory. This inventory provides information on service contract actions over $25,000, which the Bureau funded during FY 2019. The information is organized by function to show how contracted resources were used by the agency to support its mission. The inventory has been developed in accordance with the guidance issued by the Office of Management and Budget's Office of Federal Procurement Policy (OFPP). The Bureau has posted its inventory on the Bureau's Open Government homepage at the following link: *https://www.consumerfinance.gov/open.*

DEPARTMENT OF DEFENSE

Department of the Army

[Docket ID: USA–2022–HQ–0015]

Proposed Collection; Comment Request

AGENCY: Department of the Army, Department of Defense (DoD).

ACTION: 60-Day information collection notice.

SUMMARY: In compliance with the *Paperwork Reduction Act of 1995,* the U.S. Army Training and Doctrine Command, G3/5/7 announces a proposed public information collection and seeks public comment on the

provisions thereof. Comments are invited on: whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the agency's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by September 26, 2022.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

Mail: Department of Defense, Office of the Assistant to the Secretary of Defense for Privacy, Civil Liberties, and Transparency, Regulatory Directorate, 4800 Mark Center Drive, Attn: Mailbox 24, Suite 08D09, Alexandria, VA 22350–1700.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to the US Army G–1, Directorate of Personnel Management, ATTN: Scott Wood, ACQUIRE Systems Manager, 1D367, 300 Pentagon, Washington DC 20301, email to *scott.e.wood3.civ@army.mil* or call (730) 695–7520.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Army Recruiting Information: Army Recruiting Information Support System and Accessions Information Environment; OMB Control Number 0702–AAIE.

Needs and Uses: The required collection of information provides U.S. Army field recruiters with an automated tool to collect information on all prospective U.S. Army, Army Reserve, Army National Guard, Army Cadet Command, U.S. Army Military Academy candidates, enlistees, officers and health profession personnel voluntarily requesting entrance into active duty. The required information collected is used to create the initial personnel record/data to prescreen perspective applicants, line officers and health professionals to determine if they meet established mandated qualifications for induction and processing into the U.S. Army. The information is also collected to process security clearances for those individuals requiring clearances for sensitive and classified positions.

Affected Public: Individuals or households.

Annual Burden Hours: 1,000,000.

Number of Respondents: 250,000.

Responses per Respondent: 1.

Annual Responses: 250,000.

Average Burden per Response: 4 hours.

Frequency: On occasion.

The respondents are recruiting applicants (accessions) which includes, civilians, veterans and cross component recruits. Other collection instruments/documents are completed by applicants and recruiters into the system of record as applicable to their recruiting and application purposes. All completed instruments of the collection reside in the system of record which has safeguards in place to protect privacy information. Both the electronic online Army Recruiting Information Support System (ARISS) and Accessions Information Environment (AIE) systems provide a comprehensive integration, interface and standardization of all programs that manage personnel resources in support of recruiting and collecting personnel private information to induct Army applicants into the U.S. Army. The current (legacy) system ARISS, will eventually be subsumed by the emergent AIE system.

Dated: July 20, 2022.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Submission for OMB Review; Comment Request

AGENCY: Office of the Under Secretary of Defense for Acquisition and Sustainment (OUSD(A&S)), Department of Defense (DoD).

ACTION: 30-Day information collection notice.

SUMMARY: The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act.

DATES: Consideration will be given to all comments received by August 25, 2022.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Angela Duncan, 571–372–7574, *whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil.*

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Office of Local Defense Community Cooperation Economic Adjustment Data System; OMB Control Number 0704–0625.

Type of Request: Extension.

Number of Respondents: 62.

Responses per Respondent: 6.

Annual Responses: 372.

Average Burden per Response: 100 minutes.

Annual Burden Hours: 620 hours.

Needs and Uses: The Office of Local Defense Community Cooperation in coordination with other Federal Agencies, delivers a program of technical and financial assistance to enable states and communities to plan and carry out civilian responses to workforce, business, and community needs arising from Defense actions; cooperate with military installations and leverage public and private capabilities to deliver public infrastructure and services to enhance the military mission and achieve facility and infrastructure savings; and increase military, civilian, and industrial readiness and resiliency, and support military families. The Economic Adjustment Data System supports this mission by providing a platform for authorized grant applicants to submit their application packages, and for grant awardees to submit quarterly or semi-annual performance reports. Respondents will be States, U.S. Territories, counties, municipalities, other political subdivisions of a state, special purpose units of a state or local government, other instrumentalities of a

state or local government, and tribal nations supporting a military installation or the defense industrial base.

Affected Public: State, Local, or Tribal Government; Business or other for-profit; Not-for-profit Institutions.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Ms. Jasmeet Seehra.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to SMART Program Office, 4800 Mark Center Drive, Suite 17C08, Alexandria, VA, 22350–3600, Dr. Brandon Cochenour, 240–526–1123.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Science, Mathematics and Research for Transformation Scholarship Program; DD Forms 3067–2, 3067–4, 3067–7, 3067–8, 3067–9, 3067–11, 3067–12, 3067–13, 3067–15; OMB Control Number 0704–0466.

Needs and Uses: Science, Mathematics and Research for Transformation Scholarship Program (SMART) is designed to increase the number of new civilian science, technology, engineering, and mathematics (STEM) entrants to the DoD. Additionally, the SMART Program develops and retains current DoD civilian STEM employees that are critical to the national security functions of the DoD and are needed in the DoD's workforce. SMART awards scholarships, ranging from 1.5 to 5 years, to undergraduate and graduate level students pursuing a degree in one of 21 technical disciplines. Upon graduation, scholars fulfill a service commitment with the DoD facility that nominated the scholar for an award. The information collection activity under review is a statutory and functional requirement necessary to administer the scholarship program.

Affected Public: Individuals or households.

Annual Burden Hours: 31,920.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Unmet Needs of Transgender Military Patients at Madigan Army Medical Center; OMB Control Number 0720–MAMC.

Needs and Uses: This collection is necessary in order to identify the unmet needs of transgender patients at Madigan Army Medical Center. Policy changes (and subsequent reversal) regarding transgender military members has limited transgender patient care and has led to confusion around services provided. Military providers do not generally have experience or special training in caring for the transgender population and may lack the expertise needed for optimal patient care. This activity will develop and distribute an anonymous survey to accomplish the goal of identifying these unmet needs in order to find areas for improvement and optimize transgender care at Madigan Army Medical Center.

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID: DoD–2022–OS–0086]

Proposed Collection; Comment Request

AGENCY: Defense Security Cooperation Agency (DSCA), Department of Defense (DoD).

ACTION: 60-Day information collection notice.

SUMMARY: In compliance with the *Paperwork Reduction Act of 1995,* the Defense Security Cooperation Agency announces a proposed public information collection and seeks public comment on the provisions thereof. Comments are invited on: whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the agency's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by September 26, 2022.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

Federal eRulemaking Portal: https://www.regulations.gov. Follow the instructions for submitting comments.

Mail: Department of Defense, Office of the Assistant to the Secretary of Defense for Privacy, Civil Liberties, and Transparency, Regulatory Directorate, 4800 Mark Center Drive, Attn: Mailbox 24, Suite 08D09, Alexandria, VA 22350–1700.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *https://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to DSCA, Defense Security Cooperation Agency, 2800 Defense Pentagon Washington, DC 20301–2800, Joshua Dill, 717–743–1026.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: The GlobalNET Collection; OMB Control Number 0704–0558.

Needs and Uses: The purpose of the GlobalNET system is to provide a collaborative social networking environment/capability where students, alumni, faculty, partners, and other community members and subject matter experts can find relevant and timely information about pertinent subject matter experts and conduct required training. GlobalNET also collects information on students in order to allow regional center personnel to manage students while enrolled at regional centers.

Affected Public: Individuals and households.

Annual Burden Hours: 500.

Number of Respondents: 6,000.

Responses per Respondent: 1.

Annual Responses: 6,000.

Average Burden per Response: 5 minutes.

Frequency: On occasion.

Dated: July 20, 2022.

Office of the Secretary

[Docket ID: DoD–2022–OS–0085]

Proposed Collection; Comment Request

AGENCY: Office of the Under Secretary of Defense for Acquisition and Sustainment (OUSD(A&S)), Department of Defense (DoD).

ACTION: 60-Day information collection notice.

SUMMARY: In compliance with the *Paperwork Reduction Act of 1995,* the Defense Logistics Agency (DLA) announces a proposed public information collection and seeks public

comment on the provisions thereof. Comments are invited on: whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the agency's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by September 26, 2022.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

Mail: Department of Defense, Office of the Assistant to the Secretary of Defense for Privacy, Civil Liberties, and Transparency, Regulatory Directorate, 4800 Mark Center Drive, Attn: Mailbox 24, Suite 08D09, Alexandria, VA 22350–1700.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to Defense Logistics Agency Headquarters, ATTN: Ms. Nina Beshai, J62BK Information Operations, 8725 John Kingman Road, Fort Belvoir, VA 22060–6221, or call (571) 767–9810.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: DLA Police Center Records; DLA Form 635; OMB Control Number 0704–0514.

Needs and Uses: The DLA Police Center system houses data of civilian and military personnel of DLA, contractor employees, and other persons who have committed or are suspected of having committed any criminal act (felony or misdemeanor), as well as any violations of laws, regulations, or ethical standards on DLA-controlled activities or facilities. The information is used by DLA police officers, DLA installation support offices, and the DLA Office of General Counsel (OGC) to monitor progress of cases and to develop non-personal statistic data on crime and criminal investigative support for the future. DLA OGC also uses the data to review cases, determine appropriate legal action, and coordinate on all available remedies. Information is released to DLA managers who use the information to determine actions required to correct the causes of loss and to take appropriate action against DLA employees or contractors in cases of their involvement. Records are also used by DLA police to monitor the progress of incidents, identify crime-conducive conditions, and prepare crime vulnerability assessments.

Affected Public: Individuals or households.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: DoD Sexual Assault Prevention and Response Office Victim-Related Inquiries; DD Form 2985, DD Form 2985–1; OMB Control Number 0704–0565.

Needs and Uses: This information collection requirement is necessary to facilitate a timely response and appropriate resolution to inquiries from DoD sexual assault victims/survivors, support personnel and others. Collection of this information is used to support victims and survivors of sexual assault in their recovery and to maintain a database of inquiries that documents the nature and status of inquiries in order to provide adequate follow-up services and inform sexual assault prevention and response program and policy improvements while promoting

victim recovery. Military sexual assault victims, parents, other family members, and friends requesting assistance can contact the Sexual Assault Prevention and Response Office (SAPRO) by completing the DD Form 2985, ''Department of Defense Sexual Assault Prevention and Response Office Request for Assistance.'' After receiving permission from the requesting individual, the request for assistance is referred to the appropriate agency for action to facilitate a resolution.

Affected Public: Individuals or households.

Submission for OMB Review; Comment Request

AGENCY: Office of the Under Secretary of Defense for Personnel and Readiness (OUSD(P&R)), Department of Defense (DoD).

ACTION: 30-Day information collection notice.

SUMMARY: The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act.

DATES: Consideration will be given to all comments received by August 25, 2022.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Angela Duncan, 571–372–7574, *whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil.*

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Department of Defense Education Activity Research Request Program; DoDEA Form 1304.01–F1; OMB Control Number 0704–0457.

Type of Request: Revision.

Number of Respondents: 50.

Responses per Respondent: 1.

Annual Responses: 50.

Average Burden per Response: 1 hour.

Annual Burden Hours: 50 hours.

Needs and Uses: The Department of Defense Education Activity (DoDEA) Research Study Request form is administered annually and is used to conduct research involving DoDEA schools, teachers, principals, students, and parents. DoDEA receives requests from researchers both internal to DoDEA

as well as outside the Federal government or DoD, to conduct research studies in DoDEA schools and districts. This information collection is needed to aid in the systematic and consistent collection of information on proposed research in accordance with guidelines established in DoDEA Administrative Instruction 1304.01, ''Research Request Program.''

Affected Public: Individuals or households.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Ms. Jasmeet Seehra.

DEPARTMENT OF DEFENSE

Department of the Navy

[Docket ID: USN–2022–HQ–0023]

Proposed Collection; Comment Request

AGENCY: Department of the Navy, Department of Defense (DoD).

ACTION: 60-Day information collection notice.

SUMMARY: In compliance with the *Paperwork Reduction Act of 1995,* the Department of the Navy announces a proposed public information collection and seeks public comment on the provisions thereof. Comments are invited on: whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the agency's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by September 26, 2022.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

Mail: Department of Defense, Office of the Assistant to the Secretary of Defense for Privacy, Civil Liberties, and Transparency, Regulatory Directorate, 4800 Mark Center Drive, Attn: Mailbox 24, Suite 08D09, Alexandria, VA 22350–1700.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to the United States Naval Academy, 121 Blake Road, RM 311 Annapolis, MD 21402–1300, ATTN: Ms. Shannon Campbell, or call 410–293–1550.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Naval Academy Candidate Application Package; USNA Forms 1110/7, 5710/1, 5710/2, 1531/3, 1110/5, 1110/21, 5500/31, 1531/11, 1531/16, 1531/178, and 1531/17; OMB Control Number 0703–0036.

Needs and Uses: This information requirement is used to determine the eligibility, competitive standing, and the scholastic and leadership potential of candidates for an appointment to the United States Naval Academy (USNA). Prior performance, including academic achievements, involvement in extracurricular activities and performance in leadership positions, has been found to be an excellent predictor of success. Without this information, the Naval Academy's ability to recruit qualified candidates will be seriously impacted. An analysis of the information collected is made by the Admissions Board in order to gauge the qualifications of individual candidates. Respondents are applicants for admission to the USNA, persons interested in applying for admission to the USNA, school officials for those applicants, Chain of Command officials for active duty applicants, person's providing recommendations for applicants, Blue and Gold Officers, Embassy or Naval Attachés for international applicants from other countries, and local law enforcement officials.

Affected Public: Individuals or households.

Annual Burden Hours: 135,484.

Number of Respondents: 114,188.

Responses per Respondent: 1.

Annual Responses: 114,188.

Average Burden per Response: 71.19 minutes.

Frequency: As required.

Dated: July 20, 2022.

BILLING CODE 5001–06–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2022–SCC–0067]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Guaranty Agency Financial Report

AGENCY: Federal Student Aid (FSA), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing an extension without change of a currently approved collection.

DATES: Interested persons are invited to submit comments on or before August 25, 2022.

ADDRESSES: Written comments and recommendations for proposed information collection requests should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this information collection request by selecting ''Department of Education'' under

''Currently Under Review,'' then check ''Only Show ICR for Public Comment'' checkbox. Comments may also be sent to *ICDocketmgr@ed.gov.*

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Beth Grebeldinger, 202–377–4018.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Guaranty Agency Financial Report.

OMB Control Number: 1845–0026.

Type of Review: An extension without change of a currently approved collection.

Respondents/Affected Public: State, Local, and Tribal Governments; Private Sector.

Total Estimated Number of Annual Responses: 432.

Total Estimated Number of Annual Burden Hours: 23,760.

Abstract: The Department of Education (ED) is requesting renewal by extension of the information collection 1845–0026 for the Guaranty Agency Financial Report. There has been no change to the underlying statute or regulations.

The Guaranty Agency Financial Report is used by a guaranty agency to request payments of reinsurance for defaulted student loans; make payments for amounts due ED, for collections on default and lender of last resort loan (default) claims on which reinsurance has been paid and for refunding amounts previously paid for reinsurance claims. The form is also used to determine required reserve levels for agencies; and to collect debt information as required for the ''Report on Accounts and Loans Receivable Due from the Public,'' SF 220–9 (Schedule 9 Report) as required by the U.S. Department of Treasury.

Dated: July 21, 2022.

Juliana Pearson,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Notice of Intent Regarding Bipartisan Infrastructure Law Support for Resilient and Efficient Building Energy Code Implementation

AGENCY: Office Energy Efficiency and Renewable Energy, Building Technologies Office, Department of Energy (DOE).

ACTION: Notice of intent.

SUMMARY: The U.S. Department of Energy (DOE) issued a Notice of Intent (NOI) to issue a Funding Opportunity Announcement (FOA) entitled ''Building Energy Codes, Resilient and Efficient Codes Implementation'' in accordance with the Bipartisan Infrastructure Law (BIL). The aim of this anticipated FOA is to support successful, widespread, and sustained implementation of updated building energy codes by states, local governments, and across the U.S. and range of affected stakeholders.

DATES: The NOI was issued on July 21, 2022.

ADDRESSES: The NOI was issued via the EERE Exchange [1] system available at *https://eere-exchange.energy.gov/.*

FOR FURTHER INFORMATION CONTACT: Jeremy Williams, (202) 441–1288, *jeremy.williams@ee.doe.gov.* Further information is available at *https://www.energycodes.gov/RECI-codes-workshop.*

SUPPLEMENTARY INFORMATION: Section 40511 of the BIL [2] provides $225 million in funding supporting resilient and efficient building codes, and directs the Secretary of Energy to establish a competitive program enabling sustained cost-effective implementation of updated building energy codes. In accordance with Section 40511, DOE intends to issue a Funding Opportunity Announcement (FOA) entitled ''Building Energy Codes, Resilient and Efficient Codes Implementation''. The aim of this anticipated FOA is to support successful, widespread and sustained implementation of updated building energy codes by states, local governments, and across the U.S. and range of affected stakeholders. More information is available via the DOE Building Energy Codes Program at *https://www.energycodes.gov/RECI-codes-workshop.*

DOE previously published, on April 18, 2022, in the **Federal Register** a request for information (RFI) (DE–FOA–0002755) and held a public workshop related to Section 40511 of the BIL preceding this Notice. *See* 87 FR 22874. Through the RFI, DOE requested public input regarding the solicitation process and structure of a potential FOA, considering a range of issues and approaches which enable sustained, cost-effective implementation of updated building energy codes, and in accordance with Section 40511. The RFI was issued on April 12, 2022, and associated public workshop was held on April 27, 2022. More information is available at: *https://www.energycodes.gov/RECI-codes-workshop.*

Signing Authority

This document of the Department of Energy was signed on July 21, 2022, by Kelly J. Speakes-Backman, Principal Deputy Assistant Secretary for Energy Efficiency and Renewable Energy, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 6972–033]

Ampersand Hollow Dam Hydro LLC; Notice Soliciting Applications

On April 29, 2021, Ampersand Hollow Dam Hydro LLC (Ampersand), licensee for the Hollow Dam Hydroelectric Project No. 6972, filed a pre-application document (PAD) and notice of its intent (NOI) to file an application for a subsequent license for the 1,060-kilowatt project pursuant to section 15(b)(1) of the Federal Power Act (FPA). On the same date, Ampersand filed a request to use the Commission's Traditional Licensing Process, which the Director, Division of Hydropower Licensing, approved on June 25, 2021. On June 27, 2022, Ampersand filed notice of the withdrawal of its NOI and PAD, indicating it is no longer seeking a subsequent license for the project.

The project is located on the West Branch Oswegatchie River in the town of Fowler in St. Lawrence County, New York. The principal project works consist of: (a) a 350.5-foot-long concrete gravity dam; (b) a reservoir with a surface area of 16 acres and storage volume of 220 acre-feet; (c) two vertical submersible hydraulic turbine-generator units; (d) a concrete intake-powerhouse structure; (e) a tailrace; (f) a 200-foot-long, 2.3-kilovolt (kV) transmission line; (g) a 2.4-kV generator bus; and (h) a 2.4/34.5-kV step-up transformer. Ampersand estimates the average annual generation of the project to be 3,900 megawatt-hours.

Pursuant to Rule 216(b) of the Commission's Rules of Practice and Procedure,[1] a withdrawal of a pleading is effective at the end of 15 days from the date of filing the notice of withdrawal. No motion in opposition to the notice of withdrawal has been filed, and the Commission has taken no action to disallow the withdrawal; thus, the withdrawal became effective on July 12, 2022.

Any party interested in filing a license application for a subsequent license for a project must first file a NOI[2] and PAD.[3] Although the Integrated Licensing Process (ILP) is the default pre-filing process, section 5.3(b) of the Commission's regulations allows a potential license applicant to request to use alternative licensing procedures when it files its NOI.[4]

This notice sets a deadline of 120 days from the date of this notice for interested applicants, other than the existing licensee, to file NOIs, PADs, and requests to use an alternative licensing process as discussed above.

In the event that no other applicant files an application for a license by April 30, 2024, the current licensee will be provided with written notice that no timely application for the project has been filed.[5] Within 90 days of such written notice, the current licensee must file a schedule for the filing of a surrender application for the project.[6]

Questions concerning this notice should be directed to Claire Rozdilski, (202) 502–8259 or *claire.rozdilski@ferc.gov.*

Dated: July 20, 2022.

Debbie-Anne A. Reese,

Deputy Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER22–2413–000]

PGR 2021 Lessee 9, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of PGR 2021 Lessee 9, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is August 9, 2022.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact the Federal Energy Regulatory Commission at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

Cabin Creek Solar, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of Cabin Creek Solar, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is August 9, 2022.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (http://www.*ferc*.gov) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact the Federal Energy Regulatory Commission at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

Dated: July 20, 2022.

Debbie-Anne A. Reese,

Deputy Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER22–2404–000]

Gunsight Solar, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of Gunsight Solar, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is August 9, 2022.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact the Federal Energy Regulatory Commission at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

Dated: July 20, 2022.

[Docket No. RM98–1–000]

Records Governing Off-the-Record Communications; Public Notice

This constitutes notice, in accordance with 18 CFR 385.2201(b), of the receipt of prohibited and exempt off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive a prohibited or exempt off-the-record communication relevant to the merits of a contested proceeding, to deliver to the Secretary of the Commission, a copy of the communication, if written, or a summary of the substance of any oral communication.

Prohibited communications are included in a public, non-decisional file associated with, but not a part of, the decisional record of the proceeding. Unless the Commission determines that the prohibited communication and any responses thereto should become a part of the decisional record, the prohibited off-the-record communication will not be considered by the Commission in reaching its decision. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record communication and may request that the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such a request only when it determines that fairness so requires. Any person identified below as having made a prohibited off-the-record communication shall serve the document on all parties listed on the official service list for the applicable proceeding in accordance with Rule 2010, 18 CFR 385.2010.

Exempt off-the-record communications are included in the decisional record of the proceeding, unless the communication was with a cooperating agency as described by 40 CFR 1501.6, made under 18 CFR 385.2201(e)(1)(v).

The following is a list of off-the-record communications recently received by the Secretary of the Commission. The communications listed are grouped by docket numbers in ascending order. These filings are available for electronic review at the Commission in the Public Reference Room or may be viewed on the Commission's website at *http://www.ferc.gov* using the eLibrary link. Enter the docket number, excluding the last three digits, in the docket number field to access the document. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov* or toll free at (866) 208–3676, or for TTY, contact (202) 502–8659.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2955–011]

City of Watervliet; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380, the Office of Energy Projects has reviewed the application for license for the Normanskill Hydroelectric Project, located on the Normans Kill in the Town of Guilderland, in Albany County,

New York, and has prepared an Environmental Assessment (EA) for the project. The project does not occupy federal land.

The EA contains staff's analysis of the potential environmental impacts of the project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

The Commission provides all interested persons with an opportunity to view and/or print the EA via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number, excluding the last three digits in the docket number field, to access the document. For assistance, contact FERC Online Support at *FERCOnlineSupport@ferc.gov* or toll-free at (866) 208-3676, or for TTY, (202) 502–8659.

You may also register online at *https://ferconline.ferc.gov/eSubscription.aspx* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

Any comments should be filed within 45 days from the date of this notice.

The Commission strongly encourages electronic filing. Please file comments using the Commission's eFiling system at *https://ferconline.ferc.gov/eFiling.aspx.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *https://ferconline.ferc.gov/QuickComment.aspx.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support. In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include docket number P–2955–011.

For further information, contact Woohee Choi at (202) 502–6336 or *woohee.choi@ferc.gov.*

Dated: July 20, 2022.

Debbie-Anne A. Reese,

Deputy Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER22–2423–000]

SR DeSoto I Lessee, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of SR DeSoto I Lessee, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is August 9, 2022.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact the Federal Energy Regulatory Commission at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

Dated: July 20, 2022.

Combined Notice of Filings

Take notice that the Commission has received the following Natural Gas Pipeline Rate and Refund Report filings:

Filings Instituting Proceedings

Docket Numbers: RP22–1059–000.

Applicants: Dauphin Island Gathering Partners.

Description: Cash Out Report for 2022 of Dauphin Island Gathering Partners.

Filed Date: 7/19/22.

Accession Number: 20220719–5218.

Comment Date: 5 p.m. ET 8/1/22.

Docket Numbers: RP22–1060–000.

Applicants: Transcontinental Gas Pipe Line Company, LLC.

Description: Compliance filing: Rate Schedules GSS & LSS EGTS Penalty Flow Through Refund Report to be effective N/A.

Filed Date: 7/20/22.

Accession Number: 20220720–5004.

Comment Date: 5 p.m. ET 8/1/22.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at:*http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: July 20, 2022.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–R09–OAR–2022–0360; FRL–9787–01–R9]

Clean Air Act Grant; Ventura County Air Pollution Control District; Opportunity for Public Hearing

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed action; determination with request for comments and notice of opportunity for public hearing.

SUMMARY: The EPA is proposing to determine that the reduction in expenditures of recurrent non-Federal funds for the Ventura County Air Pollution Control District (''VCAPCD'' or ''District'') in support of its continuing air program under section 105 of the Clean Air Act (CAA) for the calendar year 2021 are a result of non-selective reductions in expenditures. This determination, when final, will permit the VCAPCD to receive grant funding for fiscal year (FY) 2022 from the EPA under section 105 of the CAA.

DATES: Comments and/or requests for a public hearing must be received by the EPA at the address stated below on or before August 25, 2022.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R09–OAR–2022–0360 at *https://www.regulations.gov*. For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Proprietary Business Information (PBI) or Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*e.g.,* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about PBI/CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.* If you need assistance in a language other than English or if you are a person with disabilities who needs a reasonable accommodation at no cost to you, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Roberto Gutierrez, EPA Region IX, Grants and Program Integration Office, Air and Radiation Division, 75 Hawthorne Street, San Francisco, CA 94105; phone at (415) 947–4276 or email address at *gutierrez.roberto@epa.gov.*

SUPPLEMENTARY INFORMATION: Section 105 of the CAA provides grant funding to air pollution control agencies for the prevention and control of air pollution or implementation of national primary and secondary ambient air quality standards. In accordance with 40 CFR 35.145(a), the Regional Administrator may provide air pollution control agencies up to three-fifths of the approved costs of implementing programs for the prevention and control of air pollution. CAA Section 105 grants require a cost share (also referred to as a match requirement) of 40%. Program activities relevant to the match consist of both recurring and non-recurring (unique, one-time only) expenses. In addition, air pollution control agencies must meet a maintenance of effort (MOE) requirement in accordance with section 105(c)(1) of the CAA, 42 U.S.C. 7405.

The MOE provision requires that an eligible agency spend at least the same dollar level of funds as it did in the previous grant year for the costs of recurring activities. Specifically, section 105(c)(1) of the CAA, 42 U.S.C. 7405(c)(1), provides that, ''No agency shall receive any grant under this section during any fiscal year when its expenditures of non-Federal funds for recurrent expenditures for air pollution control programs will be less than its expenditures were for such programs during the preceding fiscal year.'' However, pursuant to CAA section 105(c)(2), 42 U.S.C. 7405(c)(2), the EPA may still award a grant to an agency not meeting the requirements of section 42 U.S.C. 7405(c)(1), ''. . . if the Administrator, after notice and opportunity for public hearing, determines that a reduction in expenditures is attributable to a non-selective reduction in the expenditures in the programs of all Executive branch agencies of the applicable unit of Government.'' These statutory requirements are repeated in the EPA's implementing regulations at 40 CFR 35.140–35.148. The EPA issued a memorandum dated September 30, 2011, entitled ''Updated Information for Determining a Non-Selective Reduction'' with guidance to recipients on what constitutes a nonselective reduction. In consideration of the legislative history, the guidance clarified that a non-selective reduction does not necessarily mean that each executive branch agency needs to be reduced in equal proportion. However, it must be clear to the EPA, from the weight of evidence, that a recipient's CAA-related air program is not being disproportionately impacted or singled out for a reduction.

A section 105 grant recipient must submit a final federal financial report no later than 90 days from the close of its grant period that documents all of its federal and non-federal expenditures for the completed period. The recipient seeking an adjustment to its MOE for that period must provide the rationale and the documentation necessary to enable the EPA to determine that a nonselective reduction has occurred. In order to expedite that determination, the

recipient must provide details of the budget action and the comparative fiscal impacts on all the jurisdiction's executive branch agencies, and the recipient's air program. The recipient needs to identify any executive branch agencies or programs that should be excepted from comparison and explain why. The recipient must provide evidence that the air program is not being singled out for a reduction or being disproportionately reduced. Documentation in key areas is needed including budget data specific to the recipient's air program, and comparative budget data between the recipient's air program, the agency containing the air program, and the other executive branch agencies. The EPA may also request information from the recipient about how impacts on its program operations will affect its ability to meet its CAA obligations and requirements, and documentation that explains the cause of the reduction, such as legislative changes or the issuance of a new executive order.

In FY 2021, the EPA awarded the VCAPCD $1,106,518, which represented approximately 10% of the VCAPCD budget. In FY2022, the EPA intends to award the VCAPCD $1,115,038, which represents approximately 12% of the VCAPCD budget.

VCAPCD's final federal financial report for FY2020 indicated that VCAPCD's MOE level was $6,055,144. VCAPCD's final federal financial report for FY2021 indicates that VCAPCD's expenditure on recurrent activities is $5,620,253. That level of expenditure is not sufficient to meet the MOE requirements for FY2021 under section 105 because it is not equal to or greater than the MOE for the previous fiscal year.

In order for the VCAPCD to be eligible to receive its FY2022 CAA section 105 grant, the EPA must make a determination (after notice and an opportunity for a public hearing) that the reduction in expenditures from 2020 to 2021 is attributable to a non-selective reduction in the expenditures in the programs of the VCAPCD.

The VCAPCD is a single-purpose air pollution control agency. It is the unit of government for CAA section 105(c)(2) purposes.

On February 7, 2022, the VCAPCD submitted a request to the EPA seeking a reduction for the required MOE for FY2021. The District provided supplemental information pertaining to its request on June 1, 2022. The VCAPCD explained that it was unable to meet its MOE requirement due to a decrease in reoccurring services and supplies expenses, particularly rent payments. VCAPCD was renting office space up until mid-2021 when they moved into a building they purchased to serve as their permanent office space. In FY2020 the District paid $626,800 in rent as a recurring cost. In FY2021, the District paid six months of rent, or $259,754, and categorized the cost as nonrecurring. Since moving into the new offices the District no longer pays rent and the decrease in expenditure significantly impacts VCAPCD's MOE from previous years. Additionally, the District experienced significant payroll changes impacting its overall budget. In FY2021 VCAPCD approved a general salary increase for all employees. Other changes included senior level employees retiring, with some positions filled by entry level staff at lower starting salaries, and other positions remaining vacant due to the conditions caused by the COVID–19 pandemic. Lastly, many services and supplies were postponed or reduced due to the COVID–19 pandemic. Travel for conferences, trainings, and seminars were cancelled, held virtually, or postponed.

The EPA proposes to find that the request for a reset of VCAPCD's MOE meets the requirements for a non-selective reduction under CAA section 105. The VCAPCD's reduction in rent as a recurrent expenditure, the inability to fill vacant positions created by retirements, and a significant cut back on expenditures caused by the COVID–19 pandemic contributed to the reduction in expenditures.

The EPA proposes that the MOE for VCAPCD's FY2021 CAA section 105 grant be reduced to $5,520,253 to address the non-selective reduction of recurrent expenditures discussed above.

This notice constitutes a request for public comment and an opportunity for public hearing as required by the CAA. All written substantive comments received by August 25, 2022 on this proposal will be considered. The EPA will conduct a public hearing on this proposal only if a written request for such is received by the EPA by August 25, 2022. If no written request for a hearing is received or if the EPA determines that the issues raised are insubstantial, the EPA will proceed to the final action to award the fiscal year 2022 grant to VCAPCD.

Dated: July 20, 2022.

Elizabeth Adams,

Director, Air and Radiation Division, Region IX.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–SFUND–2004–0008; FRL–9754–01–OLEM]

Proposed Information Collection Request; Comment Request; Consolidated Superfund Information Collection Request

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency is planning to submit an information collection request (ICR), ''Consolidated Superfund Information Collection Request'' (EPA ICR No. 1487.14, OMB Control No. 2050–0179) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. Before doing so, EPA is soliciting public comments on specific aspects of the proposed information collection as described below. This is a proposed extension of the ICR, which is currently approved through March 31, 2023. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Comments must be submitted on or before September 26, 2022.

ADDRESSES: Submit your comments, referencing Docket ID No. EPA–HQ–SFUND–2004–0008, online using *www.regulations.gov* (our preferred method) or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Yolanda Singer, Office of Superfund Remediation and Technology Innovation, Assessment and Remediation Division, (5204T), Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: 202–506–1045; email address: *singer.yolanda@epa.gov.*

SUPPLEMENTARY INFORMATION: Supporting documents which explain in detail the information that the EPA will be collecting are available in the public

docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *https://www.epa.gov/dockets.*

Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: This ICR covers the following: (1) the collection of information under 40 CFR part 35, subpart O, which establishes the administrative requirements for cooperative agreements funded under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) for state, federally-recognized Indian tribal governments, and political subdivision response actions; (2) the application of the Hazard Ranking System (HRS) by states as outlined by CERCLA section 105 that amends the National Oil and Hazardous Substances Pollution Contingency Plan (NCP) to include criteria prioritizing releases throughout the United States before undertaking remedial action at uncontrolled hazardous waste sites; and (3) the remedial portion of the Superfund program as specified in CERCLA and the NCP. For cooperative agreements and Superfund state contracts for Superfund response actions, the information is collected from applicants and/or recipients of EPA assistance and is used to make awards, pay recipients, and collect information on how federal funds are being utilized. EPA requires this information to meet its federal stewardship responsibilities. Recipient responses are required to obtain a benefit (federal funds) under 2 CFR part 200, ''Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards to Non-Federal Entities'' and under 40 CFR part 35, ''State and Local Assistance.'' For the Superfund site evaluation and the Hazard Ranking System, the states will apply the HRS by identifying and classifying those releases or sites that warrant further investigation. The HRS score is crucial since it is the primary mechanism used to determine whether a site is eligible to be included on the National Priorities List (NPL). Only sites on the NPL are eligible for Superfund-financed remedial actions. For the NCP information collection, some community involvement activities covered by this ICR are not required at every site (*e.g.,* Technical Assistance Grants) and depend very much on the community and the nature of the site and cleanup. All community activities seek to involve the public in the cleanup of the sites, gain the input of community members, and include the community's perspective on the potential future reuse of Superfund NPL sites. Community involvement activities can enhance the remedial process and increase community acceptance and the potential for productive and beneficial reuse of the sites.

Form Numbers: 6200–11.

Respondents/affected entities: State, Local or Tribal Governments; U.S. Territories; Communities.

Respondent's obligation to respond: Required to obtain benefits (40 CFR part 35; CERCLA section 105, 40 CFR part 300).

Estimated number of respondents: 13,182 (total).

Frequency of response: Annually.

Total estimated burden: 196,557 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: $463,497 (per year), includes $0 annualized capital or operation & maintenance costs.

Changes in estimates: There is no change in the total estimated respondent burden compared with the ICR currently approved by OMB. This is because there was no current change in program requirements. EPA expects estimates to likely rise due to an increase in the respondent universe as a result of increased funding from the Infrastructure Investment and Jobs Act of 2021 (Pub. L. 117–58).

Brigid Lowery,

Division Director, Assessment and Remediation Division, Office of Superfund Remediation and Technology Innovation.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–R09–OAR–2022–0401; FRL–9786–01–R9]

Clean Air Act Grant; Santa Barbara County Air Pollution Control District; Opportunity for Public Hearing

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed action; determination with request for comments and notice of opportunity for public hearing.

SUMMARY: The EPA is proposing to determine that the reduction in expenditures of non-Federal funds for the Santa Barbara County Air Pollution Control District (SBCAPCD) in support of its continuing air program under section 105 of the Clean Air Act (CAA) for the calendar year 2021 is a result of non-selective reductions in expenditures. This determination, when final, will permit the SBCAPCD to receive grant funding for fiscal year (FY) 2022 from the EPA, under section 105 of the CAA.

DATES: Comments and/or requests for a public hearing must be received by the EPA at the address stated below on or before August 25, 2022.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R09–OAR–2022–0401 at *https://www.regulations.gov*. For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. The EPA may publish any comment received to its public docket. Please do not submit any information you consider to be Proprietary Business Information (PBI) or Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*e.g.,* on the web,

cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about PBI/CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.* If you need assistance in a language other than English or if you are a person with a disability who needs a reasonable accommodation at no cost to you, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Angela Latigue, EPA Region IX, Grants & Program Integration Office, Air Division, 75 Hawthorne Street, San Francisco, CA 94105; phone at (415) 947–4170 or email address at *latigue.angela@epa.gov.*

SUPPLEMENTARY INFORMATION: Section 105 of the CAA provides grant funding to air pollution control agencies for the prevention and control of air pollution or implementation of national primary and secondary ambient air quality standards. In accordance with 40 CFR 35.145(a), the Regional Administrator may provide air pollution control agencies up to three-fifths of the approved costs of implementing programs for the prevention and control of air pollution. Air pollution control agencies are required to provide a 40% cost share (also referred to as a match requirement) to receive CAA Section 105 grants. Program activities relevant to the match consist of both recurring and non-recurring (unique, one-time only) expenses. In addition, section 105(c)(1) of the CAA, 42 U.S.C. 7405(c)(1), requires grant recipients to meet a maintenance of effort (MOE).

The MOE provision requires that an eligible agency spend at least the same dollar level of funds as it did in the previous grant year but only for the costs of recurring activities. Specifically, section 105(c)(1) of the CAA, 42 U.S.C. 7405(c)(1), provides that ''No agency shall receive any grant under this section during any fiscal year when its expenditures of non-Federal funds for recurrent expenditures for air pollution control programs will be less than its expenditures were for such programs during the preceding fiscal year.'' However, pursuant to CAA section 105(c)(2), 42 U.S.C. 7405(c)(2), the EPA may still award a grant to an agency not meeting the requirements of section 105(c)(1), ''. . . if the Administrator, after notice and opportunity for public hearing, determines that a reduction in expenditures is attributable to a non-selective reduction in the expenditures in the programs of all Executive branch agencies of the applicable unit of Government.'' These statutory requirements are repeated in the EPA's implementing regulations at 40 CFR 35.140–35.148. The EPA issued a memorandum dated September 30, 2011, entitled ''*Updated Information for Determining a Non-Selective Reduction*'' with additional guidance to recipients on what constitutes a nonselective reduction. In consideration of legislative history, the guidance clarified that a non-selective reduction does not necessarily mean that each executive branch agency needs to be reduced in equal proportion. However, it must be clear to the EPA, from the weight of evidence, that a recipient's CAA-related air program is not being disproportionately impacted or singled out for a reduction.

A section 105 grant recipient must submit a final federal financial report no later than 120 days from the close of its grant period that documents all of its federal and non-federal expenditures for the completed period. The recipient seeking an adjustment to its MOE for that period must provide the rationale and the documentation necessary to enable the EPA to make a determination that a nonselective reduction has occurred. In order to expedite that determination, the recipient must provide details of the budget action and the comparative fiscal impacts on all the jurisdiction's executive branch agencies and the recipient's air program. The recipient needs to identify any executive branch agencies or programs that should be excepted from comparison and explain why. The recipient must provide evidence that the air program is not being singled out for a reduction or being disproportionately reduced. Documentation in key areas is needed including budget data specific to the recipient's air program, and comparative budget data between the recipient's air program, the agency containing the air program, and the other executive branch agencies. The EPA may also request information from the recipient about how impacts on its program operations will affect its ability to meet its CAA obligations and requirements; and documentation which explains the cause of the reduction, such as legislative changes or the issuance of a new executive order.

In fiscal year (FY) 2021, the EPA awarded the SBCAPCD $527,490, which represented approximately 7% of the SBCAPCD budget. In FY2022, the EPA intends to award the SBCAPCD approximately $531,494, which represents approximately 7% of the SBCAPCD budget.

SBCAPCD's final federal financial report for FY2020 indicated that SBCAPCD's MOE level was $7,890,365. The MOE level for FY2021 was reduced to $7,790,365 after formal approval of a non-selective reduction. SBCAPCD's final federal financial report for FY2021 indicates that SBCAPCD's MOE level is at $7,318,050. This level of expenditure is not sufficient to meet the MOE requirements for FY2021 under section 105 because it is not equal to or greater than the MOE for the previous fiscal year.

In order for the SBCAPCD to be eligible to receive its FY2022 CAA section 105 grant, the EPA must make a determination (after notice and an opportunity for a public hearing) that the reduction in expenditures from 2021 to 2022 is attributable to a non-selective reduction in recurrent expenditures in the programs of the SBCAPCD.

The SBCAPCD is a single-purpose air pollution control agency. It is the unit of government for CAA section 105(c)(2) purposes. The main factor for SBCAPCD's MOE shortfall in FY2021 continues to stem from weakened economic conditions caused by the COVID–19 pandemic that resulted in decreases in services and supplies. This budget category was decreased approximately $510,000 from FY19–20 to FY20–21, which is approximately an 11.5% decrease to this recurring expenditure.

The EPA proposes to find that the request for a reset of SBCAPCD's MOE meets the requirements for a non-selective reduction under CAA section 105. The SBCAPCD's MOE reduction resulted from a loss of revenues due to a significant cut back on expenditures caused by the COVID–19 pandemic. Increases in pass-through monies from the California Air Resources Board for multiple state grant projects also impacted the SBCAPCD's overall operating budget. However, such pass-through monies are not considered recurrent expenditures and are not included in calculating MOE.

The EPA proposes that the MOE for SBCAPCD's FY2021 CAA section 105 grant be reduced to $6,700,000 to address the non-selective reduction of expenditures discussed above.

This notice constitutes a request for public comment and an opportunity for public hearing as required by the CAA. All written comments received by August 25, 2022 on this proposal will be considered. The EPA will conduct a public hearing on this proposal only if

a written request for such is received by the EPA by August 25, 2022. If no written request for a hearing is received or if the EPA determines that the issues raised are insubstantial, the EPA will proceed to the final action to award the fiscal year 2022 grant to the SBCAPCD.

Dated: July 20, 2022.

Elizabeth Adams,

Director, Air and Radiation Division, Region IX.

BILLING CODE 6560–50–P

FEDERAL MEDIATION AND CONCILIATION SERVICE

Request for Arbitration Panel

AGENCY: Federal Mediation and Conciliation Service (FMCS).

ACTION: 60-Day notice and request for comments.

SUMMARY: The Federal Mediation and Conciliation Service (FMCS), invites the general public and other Federal Agencies to take this opportunity to comment on the following information collection request, Request for Arbitration Panel, (FMCS Form R–43). This information collection request was previously approved by the Office of Management Budget (OMB) and FMCS is requesting a revision of a currently approved collection. The Request for Arbitration Panel, (FMCS Form R–43), allows FMCS to comply with its statutory obligation pursuant to the statute to make governmental facilities available for voluntary arbitration. To carry out this policy, FMCS have issued regulations which provide for the operation and maintenance of a roster of professional arbitrators. The arbitrators are private citizens, not employees of FMCS, and are paid by the parties for hearing and deciding the issues submitted under a collective bargaining agreement and in other circumstances. The Request for Arbitration Panel (FMCS Form R–43) is used by the parties, labor and management individually or jointly, to request that FMCS furnish a list of arbitrators.

DATES: Comments must be submitted on or before September 26, 2022.

ADDRESSES: You may submit comments, identified by the Request for Arbitration Panel (FMCS Form R–43), through one of the following methods:

- *Email:* Arthur Pearlstein, *apearlstein@fmcs.gov;*
- *Mail:* Arthur Pearlstein, HQ Office of Arbitration, One Independence Square, 250 E St. SW, Washington, DC 20427. Please note that at this time, mail is sometimes delayed. Therefore, we encourage emailed comments.

FOR FURTHER INFORMATION CONTACT: Arthur Pearlstein, 202–606–8103, *apearlstein@fmcs.gov.*

SUPPLEMENTARY INFORMATION: Copies of the agency form are available here. Paper copies are available from the Office of Arbitration Services by emailing Arthur Pearlstein at the email address above. Please ask for the Request for Arbitration Panel (FMCS Form R–43).

I. Information Collection Request

Agency: Federal Mediation and Conciliation Service.

Form Number: OMB No. 3076–0016.

Type of Request: Revision of a currently approved collection.

Affected Entities: Individual who request a list of arbitrators.

Frequency: In most instances, this form is completed once.

Abstract: Title II of the Labor Management Relations Act of 1947, 29 U.S.C. 171(b), provides that ''the settlement of issues between employers and employees through collective bargaining may advance by making available full and adequate governmental facilities for conciliation, mediation, and voluntary arbitration . . .'' 29 U.S.C. 171(b). Pursuant to the statute and 29 CFR part 1404, FMCS has long maintained a roster of qualified, private labor arbitrators to hear disputes arising under collective bargaining agreements and provide fact finding and interest arbitration. The purpose of this information collection is to facilitate the processing of the parties' request for arbitration assistance.

Burden: The number of respondents is approximately 11,000 individuals per year. The time required to complete this form is approximately ten minutes.

II. Request for Comments

FMCS solicits comments to:

i. Evaluate whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.

ii. Enhance the accuracy of the agency's estimates of the burden of the proposed collection of information.

iii. Enhance the quality, utility, and clarity of the information to be collected.

iv. Minimize the burden of the collections of information on those who are to respond, including the use of appropriate automated, electronic collection technologies or other forms of information technology.

III. The Official Record

The official records are electronic records.

List of Subjects

Labor-Management Relations.

Dated: July 21, 2022.

Anna Davis,

Deputy General Counsel.

BILLING CODE 6732–01–P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board's Freedom of Information Office at *https://www.federalreserve.gov/foia/request.htm.* Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)).

Comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Ann E. Misback, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington, DC 20551–0001, not later than August 25, 2022.

A. Federal Reserve Bank of Chicago (Colette A. Fried, Assistant Vice President) 230 South LaSalle Street, Chicago, Illinois 60690–1414:

1. *Hoosier Heartland State Bancorp Employee Stock Ownership and Savings Plan Trust, Crawfordsville, Indiana;* to become a bank holding company by acquiring additional voting shares of up

to 27.91 percent of Hoosier Heartland State Bancorp, and thereby indirectly acquiring Hoosier Heartland State Bank, both of Crawfordsville, Indiana.

B. Federal Reserve Bank of Dallas (Karen Smith, Director, Applications) 2200 North Pearl Street, Dallas, Texas 75201–2272:

1. *TransPecos Financial Corp., San Antonio, Texas;* to acquire Luling Bancshares, Inc., and thereby indirectly acquire Citizens State Bank of Luling, both of Luling, Texas.

Board of Governors of the Federal Reserve System.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

BILLING CODE P

FEDERAL RESERVE SYSTEM

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice, request for comment.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) invites comment on a proposal to extend for three years, without revision, the Reporting and Disclosure Requirements of Community Reinvestment Act (CRA)-Related Agreements (Regulation G) (FR G; OMB No. 7100–0299).

DATES: Comments must be submitted on or before September 26, 2022.

ADDRESSES: You may submit comments, identified by FR G, by any of the following methods:

- *Agency website: https://www.federalreserve.gov/.* Follow the instructions for submitting comments at *https://www.federalreserve.gov/apps/foia/proposedregs.aspx.*
- *Email: regs.comments@federalreserve.gov.* Include the OMB number or FR number in the subject line of the message.
- *FAX:* (202) 452–3819 or (202) 452–3102.
- *Mail:* Federal Reserve Board of Governors, Attn: Ann E. Misback, Secretary of the Board, Mailstop M–4775, 2001 C St. NW, Washington, DC 20551.

All public comments are available from the Board's website at *https://www.federalreserve.gov/apps/foia/proposedregs.aspx* as submitted, unless modified for technical reasons or to remove personally identifiable information at the commenter's request. Accordingly, comments will not be edited to remove any confidential business information, identifying information, or contact information. Public comments may also be viewed electronically or in paper in Room M–4365A, 2001 C St. NW, Washington, DC 20551, between 9:00 a.m. and 5:00 p.m. on weekdays. For security reasons, the Board requires that visitors make an appointment to inspect comments. You may do so by calling (202) 452–3684. Upon arrival, visitors will be required to present valid government-issued photo identification and to submit to security screening in order to inspect and photocopy comments.

Additionally, commenters may send a copy of their comments to the Office of Management and Budget (OMB) Desk Officer for the Federal Reserve Board, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW, Washington, DC 20503, or by fax to (202) 395–6974.

FOR FURTHER INFORMATION CONTACT: Federal Reserve Board Clearance Officer—Nuha Elmaghrabi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, Washington, DC 20551, (202) 452–3829.

SUPPLEMENTARY INFORMATION: On June 15, 1984, OMB delegated to the Board authority under the Paperwork Reduction Act (PRA) to approve and assign OMB control numbers to collections of information conducted or sponsored by the Board. In exercising this delegated authority, the Board is directed to take every reasonable step to solicit comment. In determining whether to approve a collection of information, the Board will consider all comments received from the public and other agencies.

During the comment period for this proposal, a copy of the proposed PRA OMB submission, including the draft reporting form and instructions, supporting statement, and other documentation, will be made available on the Board's public website at *https://www.federalreserve.gov/apps/reportforms/review.aspx* or may be requested from the agency clearance officer, whose name appears above. Final versions of these documents will be made available at *https://www.reginfo.gov/public/do/PRAMain,* if approved.

Request for Comment on Information Collection Proposal

The Board invites public comment on the following information collection, which is being reviewed under authority delegated by the OMB under the PRA. Comments are invited on the following:

a. Whether the proposed collection of information is necessary for the proper performance of the Board's functions, including whether the information has practical utility;

b. The accuracy of the Board's estimate of the burden of the proposed information collection, including the validity of the methodology and assumptions used;

c. Ways to enhance the quality, utility, and clarity of the information to be collected;

d. Ways to minimize the burden of information collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

e. Estimates of capital or startup costs and costs of operation, maintenance, and purchase of services to provide information.

At the end of the comment period, the comments and recommendations received will be analyzed to determine the extent to which the Board should modify the proposal.

Proposal Under OMB Delegated Authority To Extend for Three Years, Without Revision, the Following Information Collection

Collection title: Reporting and Disclosure Requirements of Community Reinvestment Act (CRA)-Related Agreements.

Collection identifier: FR G.

OMB control number: 7100–0299.

Frequency: Annually and quarterly.

Respondents: State member banks and their subsidiaries; bank holding companies; savings and loan holding companies; affiliates of bank holding companies and savings and loan holding companies, other than banks, savings associations, and subsidiaries of banks and savings associations; and nongovernmental entities or persons (NGEPs) that enter into covered agreements with any of the aforementioned entities.

Estimated number of respondents: Reporting: insured depository institutions (IDIs) and affiliates—Copy of agreements to agency, 1; List of agreements to agency, 1; Annual report, 1; Filing NGEP annual report, 1; Reporting: NGEP—Copy of agreements to agency, 2, Annual report, 2; Disclosure: IDI and affiliates—Covered agreements to public, 1, Agreements relating to activities of CRA affiliates, 1; and Disclosure: NGEP Covered agreements to public, 2.

Estimated average hours per response: Reporting: IDI and affiliates—Copy of agreements to agency, 1; List of

agreements to agency, 1; Annual report, 4; Filing NGEP annual report, 1; Reporting: NGEP—Copy of agreements to agency, 1, Annual report, 4; Disclosure: IDI and affiliates—Covered agreements to public, 1, Agreements relating to activities of CRA affiliates, 1; and Disclosure: NGEP Covered agreements to public, 1.

Estimated annual burden hours: Reporting: IDI and affiliates—Copy of agreements to agency, 2; List of agreements to agency, 2; Annual report, 4; Filing NGEP annual report, 1; Reporting: NGEP—Copy of agreements to agency, 2, Annual report, 8; Disclosure: IDI and affiliates—Covered agreements to public, 2, Agreements relating to activities of CRA affiliates, 2; and Disclosure: NGEP Covered agreements to public, 2.

General description of report: Regulation G—Disclosure and Reporting of CRA-Related Agreements [1] implements section 711 of the Gramm-Leach-Bliley Act (GLBA),[2] which requires IDIs, affiliates of IDIs, and NGEPs to disclose written agreements entered into in connection with fulfillment of the CRA.[3]

Legal authorization and confidentiality: The disclosure and reporting requirements of Regulation G are authorized pursuant to the Board's authority to prescribe regulations to carry out the purposes of section 711 of GLBA.[4] The FR G disclosure and reporting requirements are mandatory.

The disclosure and reporting requirements of section 711 and Regulation G require relevant parties to disclose covered agreements to the public.[5] However, as explained in the preamble to Regulation G, an entity subject to Regulation G may submit separate public and complete versions of its covered agreements to the Board with a request for confidential treatment for the complete version.[6] As stated in the preamble, the Board would release only the public version unless it received a request under the Freedom of Information Act (FOIA) for the entirety of the CRA-related agreement.[7]

Regulation G states that in responding to a request for a covered agreement from an individual or entity under the public disclosure provisions of section 711, an NGEP, insured depository institution, or affiliate may withhold from the public information that the party believes the relevant supervisory agency could withhold from disclosure under the FOIA.[8] Information contained in covered agreements may be exempt from disclosure under exemption 4 of the FOIA, which protects public commercial or financial information, which is both customarily and actually treated as private by the respondent.[9] Information contained in covered agreements may also be exempt from disclosure under exemption 6 of the FOIA, which protects personnel and medical files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, [10] and under exemption 8 of the FOIA, which protects information contained in ''examination, operating, or condition reports'' obtained in the bank supervisory process.[11]

Board of Governors of the Federal Reserve System, July 20, 2022.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

FEDERAL TRADE COMMISSION

[File No. P222100]

HISA Enforcement Rule Modification

AGENCY: Federal Trade Commission.

ACTION: Notice of Horseracing Integrity and Safety Authority (HISA) proposed rule modification; request for public comment.

SUMMARY: The Horseracing Integrity and Safety Act of 2020 recognizes a self-regulatory nonprofit organization, the Horseracing Integrity and Safety Authority, which is charged with developing proposed rules on a variety of subjects. Those proposed rules and proposed rule modifications take effect only if approved by the Federal Trade Commission. The proposed rules and rule modifications must be published in the **Federal Register** for public comment. Thereafter, the Commission has 60 days from the date of publication to approve or disapprove the proposed rule or rule modification. The Authority submitted to the Commission a proposed rule modification on Enforcement on June 5, 2022. The Office of the Secretary of the Commission determined that the proposal complied with the Commission's rule governing such submissions. This document publicizes the Authority's proposed rule modification's text and explanation, and it seeks public comment on whether the Commission should approve or disapprove the proposed rule modification.

DATES: If approved, the HISA proposed rule modification would take effect upon approval, and the Commission must approve or disapprove the proposed rule modification September 26, 2022. Comments must be received on or before August 9, 2022.

ADDRESSES: Interested parties may file a comment online or on paper by following the instructions in the Comment Submissions part of the **SUPPLEMENTARY INFORMATION** section below. Write ''HISA Enforcement Rule Modification'' on your comment and file your comment online at *https://www.regulations.gov* under docket number FTC–2022–0044. If you prefer to file your comment on paper, mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW, Suite CC–5610 (Annex B), Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Austin King (202–326–3166), Associate General Counsel for Rulemaking, Office of the General Counsel, Federal Trade Commission, 600 Pennsylvania Avenue NW, Washington, DC 20580.

SUPPLEMENTARY INFORMATION:

Background

The Horseracing Integrity and Safety Act of 2020 [1] recognizes a self-regulatory nonprofit organization, the Horseracing Integrity and Safety Authority, which is charged with developing proposed rules on a variety of subjects. Those proposed rules and proposed rule modifications take effect only if approved by the Federal Trade Commission.[2] The proposed rules and rule modifications must be published in the **Federal Register** for public comment.[3] Thereafter, the Commission has 60 days from the date of publication to approve or disapprove the proposed rule or rule modification.[4]

Pursuant to Section 3053(a) of the Horseracing Integrity and Safety Act of 2020 and Commission Rule 1.142, notice is hereby given that, on June 5, 2022, the Horseracing Integrity and Safety Authority (''HISA'' or the ''Authority'') filed with the Federal Trade Commission an Enforcement proposed rule modification and supporting documentation as described in Items I, II, III, and IX below, which Items have been prepared by the Authority. The Office of the Secretary of the Commission determined that the filing complied with the Commission's rule governing such submissions.[5] The Commission publishes this notice to solicit comments on the proposed rule modification from interested persons.

I. Self-Regulatory Organization's Statement of the Background, Purpose of, and Statutory Basis for, the Proposed Rule Modification

a. Background and Purpose

The Horseracing Integrity and Safety Act of 2020 (''Act'') recognizes that the establishment of a national set of uniform standards for racetrack safety and medication control will enhance the safety and integrity of horseracing. The racetrack safety standards are established in the Rule 2000 Series, the ''Racetrack Safety Program,'' filed by the Authority with the Commission on December 6, 2021. The Rule 2000 Series was published in the **Federal Register** on January 5, 2022 [6] and subsequently approved by the Commission by Order dated March 3, 2022.[7] On December 20, 2021, the Authority filed with the Commission the Rule 8000 Series, which establish penalties and adjudicatory procedures for the enforcement of rules promulgated by the Authority. The Rule 8000 Series was published in the **Federal Register** January 26, 2022 [8] and approved by the Commission by Order dated March 25, 2022.[9]

In its Order, the Commission directed the Authority to file modifications to three provisions in the Rule Series 8000, stating as follows: ''The Commission directs the Authority (1) to not impose the proposed sanction in Rule 8200(b)(6) on a covered person until such time as the Authority has proposed, and the Commission has approved, a rule modification that is more narrowly tailored; (2) to file with the Commission, by July 1, 2022, a supplemental proposed rule modification explicitly stating guidelines for confidentiality and public reporting at the different stages of the processes outlined in the Enforcement rule; and (3) to file with the Commission, by July 1, 2022, a supplemental proposed rule modification in which the Authority further defines the meaning of 'object' and 'device' within proposed Rule 8400(a)(2)'s list of items eligible for seizure and provides a process for the return of seized property if no violation is found.'' [10]

The Authority therefore proposes the rule changes described in this Notice in order to fulfill the Commission's directives. In addition, the Authority on its own initiative proposes to amend the Rule 8000 Series and to supplement it with additional provisions. Some of these amendments and supplements have been prompted by comments and suggestions received from interested members of the horseracing industry since the rules were filed on December 20, 2021.

The violations, adjudications, and search procedures in the Rule 8000 Series are tailored to the unique aspects of horseracing in that violations of the rules of horseracing do arise in the sport and must be penalized. Violations must be effectively penalized to deter future violations and to ensure that horseracing is conducted in a fair and transparent manner that ensures public confidence in the integrity of the sport. Various specific violations are established in Rule 8100, and the schedule of sanctions set forth in Rule 8200 provides the specific penalties that are the consequence of committing a rule violation. The schedule is tailored to the unique aspects of horseracing in that it imposes revocations, suspensions, substantial fines, exclusions from racetrack grounds, and other penalties that are commonly imposed upon licensed participants in horseracing.

Before a penalty is imposed, persons alleged to have committed violations are entitled to a fair hearing at which they are afforded an opportunity to present evidence in defense of a charged violation. While a full process hearing is available on appeal of cases to the Commission pursuant to 15 U.S.C. 3058(b), hearing processes are also necessary before various bodies of the Authority to make sure that any penalties imposed upon Covered Persons are adjudicated carefully and fairly. This ensures that violations are consistently and fairly penalized. The provisions set forth in Rule 8300 establish the rules and parameters of the various hearing processes. These provisions also provide for appeals to the Board of the Authority to review any decisions rendered against a Covered Person who is charged with a violation. The various hearing procedures are keyed to the unique organizational structure of the Authority. Rules 8200(d) and 8360 also establish procedures for notices of violations and hearings to adjudicate the denial, suspension, or revocation of racetrack accreditation in those instances in which racetracks are alleged to have committed violations of the Racetrack Safety rules. Racetrack safety is of course unique to horseracing and is essential to ensure that horseracing is conducted safely and in a fair and transparent manner.

The successful prosecution of violations requires the investigation of all the circumstances surrounding an alleged violation. Central to any investigation is the power to gain access to the books, records, and certain premises of persons believed to have committed a violation; to subpoena witnesses; and to take testimony under

[10] *Id.* at 35–36.

oath of any person with knowledge of the circumstances regarding a violation. Rule 8400 specifically confers these powers upon the Authority and penalizes any obstruction or failure to comply with the investigatory powers set forth in the section.

The proposed rule modification is described in detail in Item II of this Notice. Various rules pertaining to horseracing and equestrian sports that were consulted in the development of this proposed rule modification are available as Exhibit A at the docket at *https://www.regulations.gov.* In conformity with 15 U.S.C. 3057(d)(2) of the Act, the various modifications described take into account the unique aspects of horseracing, are designed to ensure fair and transparent horseraces, and will serve to deter safety and performance violations. Anti-doping and medication control rule violations will be established in detail in proposed rules to be filed later this year.

On May 13, 2022, HISA representatives shared a draft of the proposed rule modification with a number of interested stakeholders for input. Those interested stakeholders included: Racing Officials Accreditation Program; Racing Medication and Testing Consortium (Scientific Advisory Committee); Water Hay Oats Alliance; National Thoroughbred Racing Association; The Jockey Club; The Jockeys' Guild; Thoroughbred Racing Association; Arapahoe Park; Grants Pass Downs; Arizona Downs; Colonial Downs; Thoroughbred Owners of California; California Horse Racing Board; National Horsemen's Benevolent and Protective Association; Thoroughbred Horsemen's Association Mid-Atlantic Safety Coalition; Thoroughbred Owners and Breeders Association; Kentucky Thoroughbred Association; American Association of Equine Practitioners; American Veterinary Medical Association; Delaware Racing Commission; New York Racing Association, Stronach Racing Group (5 thoroughbred racetracks); Churchill Downs (6 thoroughbred racetracks); Keeneland; and Del Mar. On May 13, 2022, the rule modification proposal was made available to the public for review and comment on the HISA website at *https://www.hisausregs.org.* Several comments were received from various stakeholders, which are outlined in Item III of this Notice. Available at the docket on *https://www.regulations.gov* as Exhibit B are copies of all pre-submission comments received concerning the proposed rule modification.

With the review, input, and ultimate approval of the Authority's Board of Directors, the proposed rule modification to the Rule 8000 Series modifies and enhances the penalties and adjudication procedures for the enforcement of rules promulgated by the Authority.

b. Statutory Basis

The Horseracing Integrity and Safety Act of 2020, 15 U.S.C. 3051 through 3060.

II. Self-Regulatory Organization's Statement of the Terms of Substance of the Enforcement Proposed Rule Modification and Discussion of Alternatives

Rule 8200(b)(6), as originally filed with the Commission on December 20, 2021, established a penalty that operated to ''bar a Covered Person from associating with all Covered Persons concerning any matter under the jurisdiction of the Commission and the Authority during the period of a suspension.'' The Commission directed the Authority to ''not impose this sanction on a covered person until such time as the Authority has proposed, and the Commission has approved, a rule modification that is more narrowly tailored.'' [11] In response to this directive, the Authority considered alternative sanctions currently in place in various state racing jurisdictions. The Authority now proposes to replace the penalty language quoted above with a different sanction in Rule 8200(b)(6), which will authorize the Authority to ''deny a Covered Person or a Covered Horse access to any location under the jurisdiction of the Authority during the period of a suspension.'' With this revision, Rule 8200(b)(6) will no longer place broad restraints upon a Covered Person's association with other Covered Persons but instead will prohibit a Covered Person from entering upon grounds under the jurisdiction of the Authority. The provision will accomplish the same basic end, which is to restrict Covered Persons from direct involvement with racing activities on grounds under the jurisdiction of the Authority during the period of a suspension. The restriction makes the suspension meaningful and deters future violations, thus furthering the goal of ensuring fair and transparent horseraces in a manner consistent with 15 U.S.C. 3057(d). By operating to exclude a Covered Person from horseracing grounds, the provision is tailored to the unique aspects of horseracing and is similar to provisions in the regulations of Kentucky and Minnesota, as well as the Model Rules of the Association of Racing Commissioners International (''ARCI'').

In its Order, the Commission also directed the Authority ''to file with the Commission by July 1, 2022 a supplemental proposed rule modification explicitly stating guidelines for confidentiality and public reporting at the different stages of the processes outlined in the Enforcement rule.'' [12] The Authority proposes to amend the Rule Series 8000 to include a new Rule 8380, entitled ''Guidelines for Confidentiality and Public Reporting.'' The rule draws upon a similar provision in the rules of the International Equestrian Federation (''FEI'') that governs public disclosure and confidentiality in the realm of equestrian sports.[13] Provisions of this kind in horseracing regulations are typically spare and lacking in detail, but the FEI Rules provide a sound framework for the development of the Authority's proposed rule.

The rule serves the interest of providing greater transparency to the public concerning the adjudication of rule violations. In many cases involving the violation of medication rules in particular, little is known by the public of the details of an alleged violation beyond rumor and speculation. This is because, in many racing jurisdictions, regulators—particularly at the initial level of adjudication before the state stewards—are prohibited from disclosing information concerning the alleged violation. The proposed Rule 8380 will loosen these restrictions and require the Authority to disclose basic facts about the alleged violation, including ''(1) the identity of the Covered Person who is the subject of the alleged violation, (2) the identity of any applicable Covered Horse, and (3) the rule violated and, where appropriate, the basis of the asserted violation.'' The rule also permits the Authority to comment on any information disclosed by the Covered Person charged with the alleged violation. In some instances, persons charged have made public statements concerning contested facts, and regulators should have the ability to respond to inaccurate comments if they cast unfounded doubt upon the legitimacy of the disciplinary process or of horseracing in general.

In addition, Rule 8380 also contains provisions that permit the Authority to refrain from any public disclosure in situations that would compromise an

[11] *Id.* at 15.

[12] *Id.* at 29.

[13] *See* FEI Equine Anti-Doping and Controlled Medication Regulations, Article 13.

ongoing investigation or in circumstances in which the Covered Person charged with a violation is a minor. Conversely, the Authority is permitted in the interest of public safety to make any disclosure that concerns a violation or circumstance that poses a serious and imminent risk of harm to Covered Persons, Covered Horses, or the public. Rule 8380 further provides for the disclosure of detailed information within 20 days of the imposition of a sanction, the resolution of a matter between the parties, or the dismissal of the action.

By providing the public with information concerning alleged violations, the public disclosure rule works toward the goal of ensuring fair and transparent horseraces in a manner consistent with 15 U.S.C. 3057(d). It takes into account the unique aspects of the adjudication of alleged violations of the rules of horseracing, and by strengthening the system of adjudication it helps to deter future violations while at the same time enhancing public confidence in the sport.

In its Order, the Commission directed the Authority ''to submit to the Commission a supplemental proposed rule modification by July 1, 2022, in which the Authority further defines the meaning of 'object' and 'device' within proposed Rule 8400(a)(2)'s list of items eligible for seizure ('medication, drug, substance, paraphernalia, object, or device') and that provides a process for the return of seized property if no violation is found.'' [14]

It is difficult to define ''object'' or ''device'' with precision, and other racing rules consulted by the Authority do not provide definitions for these or similar terms in a seizure context. Nevertheless, the proposed modification amends the language of the Rule as originally filed to specify that the Authority may seize ''any object or device reasonably believed to have been used in furtherance of the violation or suspected violation.'' Objects that might be used in furtherance of prohibited activity include intravenous tubing, oral dosing syringes, needles, nasal gastric tubes, various types of container bags and vials, and many other items. The language is broad enough to include devices such as computers and phones if there is reason to believe that these devices have been used in furtherance of a violation. In doping and medication-violation cases in particular, it is often found that information concerning medications and drugs administered to horses are stored on computers and phones. Rather than try to construct definitions of ''object'' or ''device'' that will likely be vague and fail to include certain items while including others in an overly expansive manner, the Authority has proposed language that closely ties the terms ''object'' and ''device'' to the violation being investigated; seizure is justified only if the object or device is reasonably believed to have been used in furtherance of the violation or suspected violation.

Additionally, and pursuant to the directive of the Commission, the proposed rule modification includes a new provision in Rule 8400(a)(3) that requires the Authority to return seized property upon the final resolution of a violation, so long as the possession of the property is not specifically prohibited by the Act or the rules of the Authority. Many racing jurisdictions return property as a matter of course, though not specifically required to do so; the Authority's rule requires property to be returned unless specifically prohibited.

The changes to the language referencing the words ''object'' and ''device,'' as directed by the Commission, take into account the unique aspects of horseracing violation investigations, especially the necessities of seizure in medication-violation cases. By providing effective measures to seize evidence, the modification enhances the investigation and successful adjudication of violations, thus deterring future violations in a manner consistent with 15 U.S.C. 3057(d). An effective enforcement system builds public confidence in the sport by ensuring that horseracing is conducted in a fair and transparent manner. The return policy is adopted as a matter of fairness to Covered Persons whose property has been seized; property that is not specifically prohibited under the Authority's rules shall be returned upon the final resolution of a violation.

In addition to the amendments directed by the Commission, the Authority has also proposed several modifications on its own initiative. And, in some instances, rule changes have been prompted in response to comments previously received during the formal comment period after the filing of the Rule 8000 Series with the Commission on December 20, 2021.

Rule 8400(a)(2) gives the Authority the power to ''seize any medication, drug, substance, paraphernalia, object, or device in violation or suspected violation of any provision of 15 U.S.C. Chapter 57A or the regulations of the Authority.'' As noted in the Commission's Order, some commenters to the Rule 8000 Series expressed concerns that the seizure provisions were overbroad, though the referenced language in the Rule 8000 Series as originally filed was approved by the Commission.[15] The language of the rule tracked the statutory language at 15 U.S.C. 3054(c)(1), which states in pertinent part that the Authority ''shall develop uniform procedures and rules authorizing—(i) access to offices, racetrack facilities, other places of business, books, records, and personal property of covered persons that are used in the care, treatment, training, and racing of covered horses.'' It should also be noted that statutes in other state racing jurisdictions are similarly broad (such as Kentucky). The Commission addressed this matter in detail in the Order approving the Enforcement rules, noting that the commenters' objections are really with the Act itself.[16] Nevertheless, to allay the concerns expressed, the Authority has filed a proposed rule modification that restricts the scope of Rule 8400(1)(a). Specifically, the new language authorizes the Commission, the Authority, or their designees to have free access to books, records, offices, racetrack facilities, and other places of business of both Covered Persons and any person who owns a Covered Horse or performs services on a Covered Horse, but the language requires that the items and locations subject to access must relate to the care, treatment, training, and racing of Covered Horses. This provision is included to clarify that items and locations unrelated to horseracing may not be accessed by the Authority.

Rule 8100(g) is modified to include as a violation the ''failure of a Responsible Person to register a Covered Horse.'' After the Rule 8000 Series was filed on December 20, 2021, the Authority developed and filed, on April 25, 2022, the Rule 9000 Series, ''Registration of Covered Persons and Covered Horses.'' The Commission approved the Registration rule by Order dated June 29, 2022.[17] Rule 9000(i) requires Responsible Persons to ensure that Covered Horses are registered with the Authority. A penalty is therefore added to Rule 8100(g) to authorize the imposition of sanctions for failure to do so.

In Rule 8200(b), ''Imposition of Sanctions,'' the Authority proposes to

[14] Enforcement Rule Order at 34–35.

[15] *See id.* at 30–35.

[16] *See id.* at 34.

[17] *See* Fed. Trade Comm'n, Order Approving Registration Rule Proposed by Horseracing Integrity & Safety Auth., at 1 (June 29, 2022), *https://www.ftc.gov/system/files/ftc_gov/pdf/P222100CommissionOrderRegistrationRuleFinal.pdf.*

modify this provision to specify that any penalties imposed under that Rule shall be ''in proportion to the nature, chronicity, and severity of the violation.'' This language provides a rubric or standard to guide discretion in the imposition of penalties. In the same paragraph, a scrivener's error is corrected to refer to the Rule 8000 Series to make clear that sanctions are imposed after hearings conducted under the rules of both the Rule 7000 and 8000 Series. Additionally, the Authority proposes to modify Rule 8200(b)(2)(ii) concerning the fines that may be imposed for second violations of Authority rules. Under the Rule as originally filed, the fine was established at $50,000.00 to $100,000.00; the Rule will be modified to state that a fine may be imposed in an amount ''up to $100,000.00.'' This modification will give the Authority greater flexibility in assessing a fine in proportion to the nature, chronicity, and severity of the violation.

Rule 8200(d) is amended to recognize that ''one or more stewards'' may issue a Notice of Suspected or Actual Violation, in addition to the Authority and the Racetrack Safety Committee. In addition, the Authority proposes to amend Rule 8200(d)(iii) to permit the Authority to consider ''any other relevant factor'' in establishing the time period allowed for a Covered Person to respond to a Notice of Suspected or Actual Violation. This catch-all provision is added to allow consideration of all relevant factors pertaining to the response time, in addition to the seriousness of the violation and the imminence of risk to Covered Persons, Covered Horses, Covered Horseraces or the public.

The Authority is proposing modifications to several provisions in Rule 8300 to elaborate upon the procedures to be followed by track-level stewards in adjudicating penalties. The provisions to be amended are Rule 8320(a), Rule 8320(b)(3), and Rule 8330(c), and the language of the amendment is similar in each rule. The amendment states more explicitly than the original language in the rules that the stewards shall adjudicate all alleged violations of Rules 2271(b) or 2272 relating to the use of Shock Wave Therapy, violations of Rule 2280 relating to the use of the riding crop, and violations of Rule 2273 relating to the use of other electrical or mechanical devices. The amendment also makes clear that the stewards shall utilize the hearing procedures of the state jurisdiction in which a violation is alleged to have occurred.

The amendment further addresses the broader issue of whether a state racing commission has entered into an agreement under which the state stewards serve in an adjudicatory capacity under the Rule 8000 Series and enforce the Rule 2200 Series. In those states in which the state racing commission has not entered into an agreement with the Authority, the amendment provides that stewards appointed by the Authority to enforce the Rule 2200 Series shall adjudicate these cases. Since the burden of enforcing these rules will not be heavy in many jurisdictions, only one steward may be necessary to adjudicate violations under the Rule 2200 Series. If this is the case in a particular jurisdiction, the amendment makes clear that one steward may adjudicate these violations regardless of whether the state jurisdiction's rules require two or three stewards to rule on violations. In addition, the amendment to Rule 8320(a) further provides that all testimony at a stewards' hearing shall be given under oath, and a record of the hearing shall be kept by use of an audio recorder, video recording, or court reporter's transcript. While this is already routinely done in many jurisdictions, the new language makes the requirement explicit.

The Authority proposes to amend Rule 8320(b)(1) and Rule 8330(a) in an identical manner to specify that when a case is referred to the National Stewards Panel by the Racetrack Safety Committee or the Board, ''one or more members'' of the Panel may be designated to adjudicate the case. This amendment is included to bring Rule 8330 in conformity with Rules 3000 and 7000 Series, which will establish and set forth the procedures applicable to the National Stewards Panel. These rules are under development and will be filed with the Commission prior to January 1, 2023.

Several amendments are proposed to modify Rule 8340, ''Initial Hearings Conducted Before the Racetrack Safety Committee or the Board of the Authority.'' Rule 8340(3) as previously filed states that ''[a]ll testimony in proceedings before the Board or the Racetrack Safety Committee shall be given under oath;'' that paragraph is amended to further state that ''a record of the proceedings shall be kept in stenographic or recorded form.'' Rule 8340(h) is amended to make clear that a party to initial hearings before the Board or the Racetrack Safety Committee is entitled to be represented by counsel at the party's expense.

Additional rules are proposed for inclusion in Rule 8340 that permit the Board and the Racetrack Safety Committee to appoint a presiding officer to assist in the conduct of hearings. Rule 8340(i) specifies that the presiding officer may be assigned to exercise various powers similar to those that are performed by administrative law judges in contested proceedings at the state and federal level. These powers are set forth with specificity in the proposed rule and generally serve to ensure the orderly conduct of the presentation of evidence and witnesses and to regulate the conduct of parties and their attorneys. The Authority consulted and closely followed similar provisions in the ''Hearing Rules and Procedures'' of the New York Racing Association in developing these rules.

The presiding officer may also be directed by the Board and the Racetrack Safety Committee under Rule 8340(j) to prepare a hearing report with a recommended penalty, if applicable, and the parties may be required to file briefs for consideration by the hearing officer in preparing the hearing report. The rule states that once the hearing report has been received by the Racetrack Safety Committee or the Board, these bodies may adopt, modify, or reject any or all the hearing report, including any recommended penalty. These rules parallel similar concepts in Kentucky's statutory scheme concerning the conduct of administrative hearings by an administrative law judge. Rule 8350, ''Appeal to the Board,'' is amended in paragraphs (h) and (i) to permit the Board in appeal proceedings to appoint a hearing officer under the same rules set forth in Rule 8340 concerning the conduct of initial hearings and the preparation of a hearing report. Additionally, Rule 8350(e) is amended to specify that the Board has the discretion to decide an appeal solely upon written submissions or in the alternative to conduct a hearing upon the issues raised by the appeal. In the same rule, the word ''heard'' is replaced with the word ''reviewed'' to conform to the change. Rule 8350(c) is modified to provide that a stay may be issued on appeal not only by the Board but also ''by any official or body of the Authority to whom the Board delegates the authority to review requests for stay.''

Rule 8360, ''Accreditation Procedures,'' is amended in several places to include the words ''suspended'' or ''suspension,'' to conform to Rule 2116, ''Suspension and Revocation of Accreditation,'' which authorizes suspension as a penalty. Rule 8360(f)(1) is revised to refer more precisely to the ''Board'' in the context of the rule, rather than the ''Authority.'' The word ''an'' is added to correct a scrivener's error in Rule 8360(f)(2). A

short provision, Rule 8011, is added to specify that time is calculated under the Rule 8000 Series in calendar days and that, if the last day of a specified period of time falls on a Saturday, Sunday, or holiday, the last day shall be considered to be the next working day following the Saturday, Sunday, or holiday.

III. Self-Regulatory Organization's Summary of Comments Received Pre-Submission and Its Responses to Those Comments

As encouraged by the Commission's procedural rule, the Authority, before finalizing this submission to the Commission, made a draft of the Enforcement proposed rule modification available to the public for review and comment on the HISA website, *https://www.hisausregs.org/.* Comments on the proposed rule modification were received from five individuals and groups in the horseracing industry: The Jockey Club, The Jockeys' Guild, Racing Officials Accreditation Program (''ROAP''), Colonial Downs Racetrack, and the American Association of Equine Practitioners (''AAEP'').

Two of the commenters, Colonial Downs Racetrack and AAEP, stated that they had reviewed the proposed rule modification and had no suggested changes to offer. The three other commenters, The Jockey Club, The Jockeys' Guild, and ROAP, did not question or critique the proposed rule modifications as a whole but instead offered constructive suggestions to fine-tune various provisions in the initial drafts of the proposed rule modification. The Authority adopted a number of these suggested changes into the proposed rule modification as it developed into its final form.

ROAP suggested that a lengthy sentence in an initial draft of Rule 8320(a) concerning adjudication by the stewards be broken into two sentences for clarity. The Authority amended the sentence according to the suggestion, with some additional modifications. The Jockeys' Guild suggested that a short provision be added to Rule 8200(d), Notice of Suspected or Actual Violation, to clarify that the Authority may make a finding of no violation after review of a Covered Person's response to a Notice. Language was added in conformity with the suggestion.

The Jockey Club suggested that Rule 8340(c)(3), which requires notice to be provided in advance of a hearing before the Board or the Racetrack Safety Committee, be amended to replace ''alleged violation'' with ''rule or rules allegedly violated.'' This suggestion is well taken and is included in the proposed rule modification for clarity.

The Authority also implemented a suggestion from The Jockey Club that language be added to permit hearings by the Board and the Racetrack Safety Committee under Rules 8340(a) and (b) and Rule 8350 to be conducted both in-person and through the use of audio-visual teleconferencing. This language was included in the draft, and the Authority added language to permit the use of telephone audio systems as well.

The Jockey Club also helpfully suggested that, if a hearing report is created, the parties should be permitted to file exceptions to the reports ''as a matter of right.'' The draft language of Rule 8340(j) was therefore amended to make clear that exceptions may be filed by the parties to a hearing report.

The Authority declined to make some of the changes suggested by the commenters. Two of the suggestions were of more significance than the rest. The Jockey Club suggested that the seven-day deadline for a Covered Person's response to a Notice of Suspected or Actual Violation in Rule 8200(d)(1)(iii) be extended to twenty or thirty days. The Authority declined to make this change because some violations may present a hazard to racing participants and the public, and a rapid resolution of the matter is necessary. Nevertheless, the Rule provides for a longer response time ''as deemed appropriate and specified in the notice,'' based on the seriousness of the violation and the imminence of risk to Covered Persons, Covered Horses, and the public. In cases where those concerns are not present, it is anticipated that a longer response time will be specified in the notice as appropriate to the case.

The Jockeys' Guild suggested that the term ''good cause'' be further defined in Rule 8350, which provides that a penalty may be stayed upon good cause shown. The Authority considered this change but opted to let the rule stand as written. This term is frequently employed without further definition in many areas of the law, and it is difficult to enumerate all of the factual circumstances that may qualify as a showing of ''good cause.''

The remaining suggestions that the Authority declined to adopt involved minor revisions to various rules that the Authority believed were unnecessary to effectuate the intention of the rules. Some of the comments received posed questions about the application of a provision, rather than suggesting specific changes. In such instances no change was made, but the Authority is working diligently to educate and inform the racing community about the new rules to be implemented by the Authority.

All of the changes proposed in the proposed rule modification are intended to enhance the Rule 8000 Series in a manner consistent with 15 U.S.C. 3057(d). An effective enforcement system builds public confidence in the sport by ensuring that Covered Horseraces are conducted in a fair and transparent manner. The proposed rules are carefully tailored to the unique character of horseracing and to the organizational structure of the Authority. Covered Persons will benefit from the effective enforcement of the rules, the standards of integrity in racing that the rules establish, and the deterrence of violations. The safety and well-being of Covered Horses, always a primary concern to the Authority, will be safeguarded by the elaborate Rule 2000 Series Racetrack Safety rules promulgated by the Authority, and by the Rule 8000 Series that ensures that the Racetrack Safety rules are effectively enforced.

IV. Legal Authority

This rule modification is proposed by the Authority for approval or disapproval by the Commission under 15 U.S.C. 3053(c)(1).

V. Effective Date

If approved by the Commission, this proposed rule modification will take effect immediately.

VI. Request for Comments

Members of the public are invited to comment on the Authority's proposed rule modification. The Commission requests that factual data on which the comments are based be submitted with the comments. The supporting documentation referred to in the Authority's filing, as well as the written comments it received before submitting the proposed rule modification to the Commission, are available for public inspection at *https://www.regulations.gov* under docket number FTC–2022–0044.

The Commission seeks comments that address the decisional criteria provided by the Act. The Act gives the Commission two criteria against which to measure proposed rules and rule modifications: ''The Commission shall approve a proposed rule or modification if the Commission finds that the proposed rule or modification is consistent with—(A) this chapter; and (B) applicable rules approved by the Commission.'' [18] In other words, the Commission will evaluate the proposed

[18] 15 U.S.C. 3053(c)(2).

rule modification for its consistency with the specific requirements, factors, standards, or considerations in the text of the Act as well as the Commission's procedural rule.

Although the Commission must approve the proposed rule modification if the Commission finds that the proposed rule modification is consistent with the Act and the Commission's procedural rule, the Commission may consider broader questions about the health and safety of horses or the integrity of horseraces and wagering on horseraces in another context: ''The Commission may adopt an interim final rule, to take effect immediately, . . . if the Commission finds that such a rule is necessary to protect—(1) the health and safety of covered horses; or (2) the integrity of covered horseraces and wagering on those horseraces.'' [19] The Commission may exercise its power to issue an interim final rule on its own initiative or in response to a petition from a member from the public. If members of the public wish to provide comments to the Commission that bear on protecting the health and safety of horses or the integrity of horseraces and wagering on horseraces but do not discuss whether the Authority's Enforcement proposed rule modification is consistent with the Act or the applicable rules, they should not submit a comment here. Instead, they are encouraged to submit a petition requesting that the Commission issue an interim final rule addressing the subject of interest. The petition must meet all the criteria established in the Rules of Practice (Part 1, Subpart D); [20] if it does, the petition will be published in the **Federal Register** for public comment. In particular, the petition for an interim final rule must ''identify the problem the requested action is intended to address and explain why the requested action is necessary to address the problem.'' [21] As relevant here, the petition should provide sufficient information for the public to comment on, and for the Commission to find, that the requested interim final rule is ''necessary to protect—(1) the health and safety of covered horses; or (2) the integrity of covered horseraces and wagering on those horseraces.'' [22]

VII. Comment Submissions

You can file a comment online or on paper. For the Commission to consider your comment, we must receive it on or before August 9, 2022. Write ''HISA Enforcement Rule Modification'' on your comment. Your comment—including your name and your State—will be placed on the public record of this proceeding, including, to the extent practicable, on the website *https://www.regulations.gov*.

Because of the public health emergency in response to the COVID–19 outbreak and the Commission's heightened security screening, postal mail addressed to the Commission will be subject to delay. The Commission strongly encourages that comments be submitted online through the *https://www.regulations.gov* website. To ensure that the Commission considers online comment, please follow the instructions on the web-based form.

If you file your comment on paper, write ''HISA Enforcement Rule Modification'' on your comment and on the envelope, and mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW, Suite CC–5610 (Annex B), Washington, DC 20580.

Because your comment will be placed on the public record, you are solely responsible for making sure that your comment does not include any sensitive or confidential information. In particular, your comment should not contain sensitive personal information, such as your or anyone else's Social Security number; date of birth; driver's license number or other State identification number or foreign country equivalent; passport number; financial account number; or credit or debit card number. You are also solely responsible for making sure your comment does not include any sensitive health information, such as medical records or other individually identifiable health information. In addition, your comment should not include any ''[t]rade secret or any commercial or financial information which . . . is privileged or confidential''—as provided in Section 6(f) of the FTC Act, 15 U.S.C. 46(f), and FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2)—including in particular competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns, devices, manufacturing processes, or customer names.

Comments containing material for which confidential treatment is requested must be filed in paper form, must be clearly labeled ''Confidential,'' and must comply with FTC Rule 4.9(c), 16 CFR 4.9(c). In particular, the written request for confidential treatment that accompanies the comment must include the factual and legal basis for the request and must identify the specific portions of the comment to be withheld from the public record. *See* FTC Rule 4.9(c). Your comment will be kept confidential only if the General Counsel grants your request in accordance with the law and the public interest. Once your comment has been posted publicly at *https://www.regulations.gov*—as legally required by FTC Rule 4.9(b), 16 CFR 4.9(b)—we cannot redact or remove your comment, unless you submit a confidentiality request that meets the requirements for such treatment under FTC Rule 4.9(c), and the General Counsel grants that request.

Visit the FTC website to read this document and the news release describing it. The FTC Act and other laws that the Commission administers permit the collection of public comments to consider and use in this proceeding as appropriate. The Commission will consider all timely and responsive public comments it receives on or before August 9, 2022. For information on the Commission's privacy policy, including routine uses permitted by the Privacy Act, see *https://www.ftc.gov/siteinformation/privacypolicy*.

VIII. Communications by Outside Parties to the Commissioners or Their Advisors

Written communications and summaries or transcripts of oral communications respecting the merits of this proceeding, from any outside party to any Commissioner or Commissioner's advisor, will be placed on the public record. *See* 16 CFR 1.26(b)(5).

IX. Self-Regulatory Organization's Proposed Rule Language

The following language reflects the Enforcement rule with the proposed modifications incorporated. A redline version that shows every way in which the previously approved Enforcement rule would be modified by the proposed rule modification is available as Exhibit C on the docket at *https://www.regulations.gov*.

8000. Violations, Sanctions, Hearing Procedures, and Investigatory Powers

8011. Calculation of Time

In calculating any period of time prescribed in the Rule 8000 Series, time shall be calculated in calendar days. If the last day of a specified period of time falls on a Saturday, Sunday, or holiday, then the last day of the period shall be considered to be the next working day immediately following the Saturday, Sunday, or holiday.

[20] 16 CFR 1.31; *see* Fed. Trade Comm'n, Procedures for Responding to Petitions for Rulemaking, 86 FR 59851 (Oct. 29, 2021).

[21] 16 CFR 1.31(b)(3).

[22] 15 U.S.C. 3053(e).

8100. Violations

Violations under this Rule shall include:

(a) Failure to cooperate with the Authority or an agent of the Authority during any investigation;

(b) Failure to respond truthfully, to the best of a Covered Person's knowledge, to a question of the Authority or an agent of the Authority with respect to any matter under the jurisdiction of the Authority;

(c) Tampering or attempted tampering with the application of the safety, performance, or anti-doping and medication control rules or process adopted by the Authority, including:

(1) Intentional interference, or an attempt to interfere, with an official or agent of the Authority;

(2) Procurement or the provision of knowingly false information to the Authority or agent of the Authority; and

(3) The intimidation of, or an attempt to intimidate, a potential witness;

(d) Assisting, encouraging, aiding, abetting, conspiring, covering up, or any other type of intentional complicity involving a racetrack safety violation, or the violation of a period of suspension or ineligibility;

(e) Threatening or seeking to intimidate a person with the intent of discouraging the person from the good faith reporting to the Authority, an agent of the Authority, or the Commission, of information that relates to:

(1) A suspected or alleged violation of a rule in the Rule 2200 Series; or

(2) A suspected or alleged noncompliance with a rule in the Rule 2200 Series;

(f) Failure to comply with a written order or ruling of the Authority or an agent of the Authority pertaining to a racing matter or investigation;

(g) Failure to register with the Authority, failure of a Responsible Person to register a Covered Horse, making a knowingly false statement or omission of information in an application for registration with the Authority, or failure to advise the Authority of material changes in the application information as required under any provision in Authority regulations;

(h) Perpetrating or attempting to perpetrate a fraud or misrepresentation in connection with the care or racing of a Covered Horse;

(i) Failure to remit fees as required under 15 U.S.C. 3052(f)(3); and

(j) Failure by a Racetrack to collect equitable allocation amounts among Covered Persons in conformity with the funding provisions of 15 U.S.C. 3052(f)(3) and any rules pertaining thereto.

8200. Schedule of Sanctions for Violations; Consent Decrees; Notice of Suspected or Actual Violation

(a) Application. This Schedule shall apply to any violation of, or failure to comply with, the Act or regulations promulgated by the Authority by a Covered Person, except for:

(1) Anti-doping and medication control rule violations as established in the Rule 3000 Series; and

(2) State laws or regulations not pre-empted by 15 U.S.C. 3054(b).

(b) Imposition of Sanction. The Authority, the Racetrack Safety Committee, the stewards, any steward or body of stewards selected from the National Stewards Panel, or an Arbitral Body, after any hearing required to be conducted in accordance with the Rule 7000 Series or Rule 8000 Series and upon finding a violation or failure to comply with the regulations of the Authority with the exceptions identified in paragraph (a), may impose one or more of the following sanctions on a Covered Person for each violation of the rules of the Authority, in proportion to the nature, chronicity, and severity of the violation:

(1) For a violation of Rule 2271(b) or 2272 relating to the use of Shock Wave Therapy, a violation of Rule 2273 relating to the use of other electrical or mechanical devices, or a violation of Rule 2280 relating to the use of the riding crop, impose the penalties set forth in Rules 2272, 2274, 2282, and 2283, in addition to any penalty set forth in Rule 8200(b)(2) through (12);

(2) Impose a fine upon a Covered Person in the following amounts:

(i) Up to $50,000.00 for a first violation, or

(ii) Up to $100,000.00 for a second violation of the same or similar nature to a prior violation, or any violation that due to its nature, chronicity, or severity poses an actual or potential threat of harm to the safety, health, and welfare of Covered Persons, Covered Horses, or the integrity of Covered Horseraces;

(3) Deny or suspend the registration of a Covered Person for a definite period, probationary period, or a period contingent on the performance of a particular act;

(4) Revoke the registration of a Covered Person subject to reapplication at a specified date;

(5) Impose a lifetime ban from registration with the Authority;

(6) Deny a Covered Person or a Covered Horse access to any location under the jurisdiction of the Authority during the period of a suspension;

(7) Impose a temporary or permanent cease and desist order against a Covered Person;

(8) Require a Covered Person as a condition of participation in horseracing to take any remedial or other action that is consistent with the safety, welfare, and integrity of Covered Horses, Covered Persons, and Covered Horseraces;

(9) Deny or require the forfeiture of purse money, disqualify a horse, or make changes to the order of finish in Covered Races as consistent with the safety, welfare, and integrity of Covered Horses, Covered Persons, and Covered Horseraces;

(10) Censure a Covered Person;

(11) Prohibit a Racetrack from conducting any Covered Horserace; or

(12) Impose any other sanction as a condition of participation in horseracing as deemed appropriate by the Authority in keeping with the seriousness of the violation and the facts of the case, and that is consistent with the safety, welfare, and integrity of Covered Horses, Covered Persons, and Covered Horseraces.

(c) Consent Decrees. The Authority shall have the discretion to enter into a consent decree or other similar agreement with a Covered Person as necessary to promote the safety, welfare, and integrity of Covered Horses, Covered Persons, and Covered Horseraces.

(d) Notice of Suspected or Actual Violation.

(1) The Authority, the Racetrack Safety Committee, or one or more stewards may issue a Notice of Suspected or Actual Violation to a Covered Person in any case in which the Authority has reason to believe that the Covered Person has violated or has failed to comply with any provision of regulations of the Authority. The notice shall:

(i) Identify the provision or provisions which the Covered Person is believed to have violated;

(ii) Specify with reasonable particularity the factual basis of the Authority's belief that the provision has been violated; and

(iii) Provide the Covered Person at least 7 days to respond, or a longer period as deemed appropriate and specified in the Notice based upon:

(A) The seriousness of the violation;

(B) The imminence of risk to Covered Persons, Covered Horses, Covered Horseraces, or the public; or

(C) Any other relevant factor.

(2) Upon receipt of the Notice of Suspected or Actual Violation, the Covered Person shall respond in writing to the issuing body within the time period specified in the notice. The Covered Person shall include in the response:

(i) A statement by the Covered Person admitting the violation or explaining the reasons why the Covered Person believes that a violation has not occurred;

(ii) All relevant details concerning the circumstances of the suspected or actual violation, including the results of any investigation undertaken by the Covered Person of the circumstances, and identification of any persons responsible for the circumstances; and

(iii) A detailed explanation of any remedial plan the Covered Person proposes to undertake to cure the suspected or actual violation and the date of the expected completion of the remedial plan.

(3) Upon receipt of the written response of the Covered Person, the issuing body may accept any proposed remedial plan, subject to any reasonable modifications the issuing body deems necessary, or it may initiate disciplinary proceedings in conformity with the provisions of Rule 8300. If the issuing body determines that no violation has occurred, the issuing body shall so inform the Covered Person and no further action shall be taken.

8300. Disciplinary Hearings and Accreditation Procedures

8310. Application

An alleged violation or failure to comply with the provisions of the Rule 2200 Series and any alleged violation of the rules set forth in Rule 8100 shall be adjudicated in accordance with this Rule 8300 Series, except that:

(a) An alleged violation of the anti-doping and medication control rule provisions in the Rule 3000 Series shall be adjudicated in accordance with the procedures set forth therein; and

(b) This regulation shall not apply to the adjudication of violations arising under state laws, racing rules, and regulations not preempted under 15 U.S.C. 3054(b).

8320. Adjudication of Violations in the Rule 2200 Series

(a) The stewards shall adjudicate all alleged violations of Rules 2271(b) or 2272 relating to the use of Shock Wave Therapy, Rule 2280 relating to the use of the riding crop, and Rule 2273 relating to the use of other electrical or mechanical devices. The stewards shall apply the hearing procedures of the state jurisdiction in which the violation is alleged to have occurred. Provided, however, that in any state that has not entered into an agreement with the Authority under which the state stewards serve in an adjudicatory capacity under the Rule 8000 Series and enforce the Rule 2200 Series, a hearing may be conducted by one or more stewards, notwithstanding any state rule to the contrary. All testimony at a stewards' hearing shall be given under oath, and a record of the hearing shall be kept by use of an audio recorder, video recording, or court reporter's transcript. Any ruling by the stewards finding a violation may be appealed to the Board of the Authority under the procedures described in Rule 8350. An appeal shall be filed in writing within 10 days of the issuance of the ruling by the stewards.

(b) With regard to any matter involving an alleged violation of a rule in the Rule 2200 Series other than those set forth in paragraph (a) above, the Racetrack Safety Committee may, at its discretion and taking into account the seriousness of the alleged violation and the facts of the case:

(1) Refer the matter to one or more members of the National Stewards Panel for adjudication in conformity with the procedures established in the Rule 7000 Series;

(2) Refer the matter to an independent Arbitral Body for adjudication in conformity with the procedures established in the Rule 7000 Series;

(3) Refer the matter to the stewards for adjudication in accordance with the hearing procedures of the applicable state jurisdiction. Provided, however, that in any state that has not entered into an agreement with the Authority under which the state stewards serve in an adjudicatory capacity under the Rule 8000 Series and enforce the Rule 2200 Series, a hearing may be conducted by one or more stewards, notwithstanding any state rule to the contrary; or

(4) Conduct a hearing upon the matter itself, under the procedures set forth in Rule 8340.

8330. Adjudication of Rule 8100 Violations

With regard to any matter involving an alleged violation of a rule established in Rule 8100, the Board of the Authority may, at its discretion and taking into account the seriousness of the violation and the facts of the case:

(a) Refer the matter to one or more members of the National Stewards Panel for adjudication in conformity with the procedures established in the Rule 7000 Series;

(b) Refer the matter to an independent Arbitral Body for adjudication in conformity with the procedures established in the Rule 7000 Series;

(c) Refer the matter to the stewards for adjudication in accordance with the hearing procedures of the applicable state jurisdiction. Provided, however, that in any state that has not entered into an agreement with the Authority under which the state stewards shall serve in an adjudicatory capacity under the Rule 8000 Series and enforce the Rule 2200 Series, a hearing may be conducted by one or more stewards, notwithstanding any state rule to the contrary; or

(d) Conduct a hearing upon the matter itself, under the procedures set forth in Rule 8340.

8340. Initial Hearings Conducted Before the Racetrack Safety Committee or the Board of the Authority

(a) An initial hearing before the Board shall be conducted by a panel of three Board members. The Board chair shall appoint the panel members and shall also designate one of them as the chair of the panel. At the discretion of the panel of the Board, an initial hearing may be conducted in person or by means of an audio-visual teleconferencing system or a telephone audio system.

(b) An initial hearing before the Racetrack Safety Committee shall be heard by a quorum of the Racetrack Safety Committee. The Racetrack Safety Committee Chair shall act as the chair of the hearing panel unless the Chair is unavailable, in which case the Racetrack Safety Committee Chair shall designate a member of the quorum to act as the chair of the panel. At the discretion of the Racetrack Safety Committee, an initial hearing may be conducted in person or by means of an audio-visual teleconferencing system or a telephone audio system.

(c) Persons entitled to notice of a hearing before the Board or the Racetrack Safety Committee shall be informed not less than 20 days prior to the hearing of:

(1) The time, place, and nature of the hearing;

(2) The legal authority and jurisdiction under which the hearing is to be held;

(3) A description of the rule or rules allegedly violated, specifying by number the rule allegedly violated; and

(4) A statement of the factual basis of the alleged violation in sufficient detail to provide adequate opportunity to prepare for the hearing.

(d) At any time prior to, during, or after the hearing, the Board or the Racetrack Safety Committee in its discretion may require the submission of written briefs or other information as will assist in the hearing of the matter.

(e) All testimony in proceedings before the Board or the Racetrack Safety Committee shall be given under oath,

and a record of the proceedings shall be kept in stenographic or recorded form.

(f) The burden of proof shall be on the party alleging the violation to show, by a preponderance of the evidence, that the Covered Person has violated or failed to comply with a provision of or is responsible for a violation of a provision of the Authority's regulations.

(g) The Board or the Racetrack Safety Committee shall allow a full presentation of evidence and shall not be bound by the technical rules of evidence. However, the Board or the Racetrack Safety Committee may disallow evidence that is irrelevant or unduly repetitive of other evidence. The Board or the Racetrack Safety Committee shall have the authority to determine, in its sole discretion, the weight and credibility of any evidence or testimony. The Board or the Racetrack Safety Committee may admit hearsay evidence if it determines the evidence is of a type that is commonly relied on by reasonably prudent people. Any applicable rule of privilege shall apply in hearings before the Board or the Committee.

(h) A party shall be entitled to present its case or defense by oral or documentary evidence, to be represented by counsel at the party's expense, to submit rebuttal evidence, and to conduct such limited cross-examination as may be required for a full and true disclosure of the facts.

(i) Presiding Officer for the Conduct of the Hearing. The Board or the Racetrack Safety Committee may appoint a presiding officer to assist in regulating the orderly conduct of and presentation of evidence at the hearing. The Board or the Racetrack Safety Committee may assign to the presiding officer any or all of the following powers, in any manner that the Board or Racetrack Safety Committee determines is most appropriate based upon the nature and complexity of the subject matter of the hearing. The presiding officer may be granted the power to:

(1) Rule upon requests, including all requests for adjournments;

(2) Set the time and place of hearing, recesses, and adjournments;

(3) Administer oaths and affirmations;

(4) Summon and examine witnesses, including the authority to direct a party to appear and to testify;

(5) Order that opening and closing statements be made;

(6) Admit or exclude evidence;

(7) Allow oral argument, so long as it is recorded;

(8) Issue orders limiting the scope and length of cross-examination, the length of briefs, and other similar matters;

(9) Order the parties to appear for a prehearing conference to consider matters that may simplify the issues or expedite the proceeding; and

(10) Perform all acts and take all measures necessary for the maintenance of order and the efficient conduct of the hearing.

(j) Presiding Officer for the Submission of a Hearing Report. The Board or the Racetrack Safety Committee may direct a presiding officer to issue in writing a hearing report at the conclusion of the hearing and to submit it to the Board or the Racetrack Safety Committee and all parties. A copy of the record of the hearing shall accompany the hearing report. The hearing report shall set forth findings of fact, conclusions of law, and a recommended disposition. If the presiding officer finds that imposition of a penalty under Rule 8200 upon a party to the hearing is warranted, the recommended penalty shall be set forth in specific detail, including the length of any suspension and the amount of any fine. If so directed by the Board or the Racetrack Safety Committee, the presiding officer shall establish a schedule for the filing by the parties of:

(1) Briefs to be considered by the presiding officer prior to the presiding officer's preparation of the hearing report; and

(2) Exceptions to the presiding officer's hearing report after the hearing report has been delivered to the parties. The exceptions may include for consideration and adoption by the Board or the Racetrack Safety Committee the particular findings of fact, conclusions of law, and recommendations for disposition with which the party disagrees and the reasons for such disagreement, any general comments by the party on the suitability of the hearing report, and the party's alternative proposed findings of fact, conclusions of law, and recommendations for disposition. A party shall send a copy of its exceptions to all other parties or their attorneys and presiding officer.

(k) Review by the Board or the Racetrack Safety Committee. Upon receipt of the record of the hearing, and of any hearing report and exceptions thereto submitted pursuant to paragraph (j), the Board or the Racetrack Safety Committee shall review the record and submissions. The period for review shall not exceed 20 days unless extended by the Board or the Racetrack Safety Committee upon notice to all parties.

(*l*) Written Decision. The Board or the Racetrack Safety Committee shall issue to all parties within 30 days of the close of the review period a written decision setting forth findings of fact, conclusions of law, and the disposition of the matter including any penalty imposed. If a hearing report has been received, the Board and the Racetrack Safety Committee shall have discretion to adopt, modify, or reject any or all of the hearing report including, but not limited to, the appropriate disposition of the proceeding and any penalty recommended.

8350. Appeal to the Board

(a) Any decision rendered by the Racetrack Safety Committee, the stewards, the National Stewards Panel, or an Arbitral Body may be appealed on the record to the Board. The decision may be appealed by a party to the decision, or the decision may be reviewed upon the Board's own initiative and at its discretion.

(b) Any decision rendered by an initial Board hearing panel may be appealed on the record to the Board, to be reviewed by a quorum of the Board which shall not include the Board members who were on the panel in the initial hearing. The decision may be appealed by a party to the decision, or the decision may be reviewed upon the Board's own initiative and at its discretion.

(c) An appeal shall not automatically stay the decision. A party may request the Board to stay the decision. A stay may be issued by the Board, or any official or body of the Authority to whom the Board delegates the authority to review requests for stay, for good cause shown.

(d) A party to the decision may appeal to the Board by filing with the Board a written request for an appeal within 10 days of receiving a written order. The appeal request shall contain the following information:

(1) The name, address, and telephone number, if any, of the appellant;

(2) A description of the objections to the decision;

(3) A statement of the relief sought; and

(4) Whether the appellant desires to have a hearing of the appeal.

(e) The Board may in its discretion review a decision based solely upon written submissions scheduled for filing with such timing and response requirements as the Board may require. Alternatively, or in addition to written submissions, the Board may set a date, time, and place for a hearing. Notice shall be given to the appellant in writing and shall set out the date, time, and place of the hearing, and shall be served personally or sent by electronic or U.S. mail to the last known address of the

appellant. If the appellant objects to the date of the hearing, the appellant may obtain a continuance, but the continuance shall not automatically stay imposition of a sanction or prolong a stay issued by the Board. At the discretion of the Board, the hearing may be conducted in person or by means of an audio-visual videoconferencing system or a telephone audio system.

(f) Upon review of the decision that is the subject of the appeal, the Board shall uphold the decision unless it is clearly erroneous or not supported by the evidence or applicable law.

(g) Upon completing its review, the Board may:

(1) Accept the decision;

(2) Reject or modify the decision, in whole or in part;

(3) Remand the matter, in whole or in part, to the stewards, Racetrack Safety Committee, the National Stewards Panel, or an Arbitral Body, as the case may be, for further proceedings as appropriate; or

(4) Conduct further proceedings on the matter as appropriate, including but not limited to requiring the submission of written briefs or, in extraordinary circumstances and at the Board's discretion, the taking of additional testimony before the Board under oath.

(h) The Board may appoint a presiding officer to assist in regulating the orderly conduct of and presentation of evidence at a hearing in accordance with Rule 8340(i). The Board may also direct a presiding officer to issue in writing a hearing report at the conclusion of the hearing in accordance with Rule 8340(j).

(i) The Board shall issue its written decision based on the record and any further proceedings, testimony, or hearing report and exceptions thereto submitted in accordance with Rule 8340(k). If a hearing report and exceptions have been submitted, the Board's written decision shall in accordance with Rule 8340(*l*) include findings of fact, conclusions of law, and the disposition of the matter including any penalty imposed. The Board shall not be bound by the timing provisions in Rules 8340(k) and (*l*) relating to the period for review and the issuance by the Board of its written decision. A copy of the Board's decision shall be served upon all parties by first class mail, electronic mail, or personal service.

(j) The decision of the Board shall be the final decision of the Authority.

8360. Accreditation Procedures

(a) Any decision issued by the Authority denying, suspending, or revoking racetrack accreditation may:

(1) Be appealed within 10 days by the Racetrack to the Authority for a de novo hearing reviewing the Authority's decision; or

(2) Reviewed by the Authority on its own initiative.

(b) The Authority's order suspending or revoking accreditation shall be stayed automatically pending review of the decision by the Authority.

(c) At its discretion, the Authority may request and consider any additional information from any source that may assist in the review.

(d) The Racetrack may request to make a presentation before the Authority concerning racetrack safety and any remedial efforts proposed to be undertaken by the Racetrack. At its discretion, the Authority may permit the Racetrack to make such presentation.

(e) In conducting its review, that Authority may consider all factors that it deems appropriate, including but not limited to:

(1) The extent and magnitude of any deficiencies in racetrack operations conducted at the Racetrack;

(2) The threat posed by the deficiencies to the safety and integrity of horseracing conducted at the Racetrack;

(3) The adequacy of the efforts the Racetrack proposes to undertake or has undertaken to remedy all deficiencies at the Racetrack;

(4) The likelihood and timeframe within which compliance will be achieved by the Racetrack, given the resources available to the Racetrack and the past record of the Racetrack in achieving and maintaining compliance with the rules of the Authority; and

(5) Any other factors the Authority deems relevant to its review.

(f) Upon completing its review, the Authority may take one or more of the following actions:

(1) Order that the Racetrack's accreditation be denied, suspended, or revoked, upon a vote in favor of denial or revocation by two-thirds of a quorum of the members of the Board;

(2) Reinstate accreditation subject to any requirements the Authority deems necessary to ensure that horseracing will be conducted in a manner consistent with racetrack safety and integrity. The Authority may also impose a fine upon reinstatement in an amount not to exceed $50,000.00. The Authority may require the Racetrack to report at prescribed intervals on the status of racetrack safety operations and remedial efforts to improve safety pursuant to the Authority's racetrack safety rules; or

(3) Prohibit a Racetrack from conducting any Covered Horserace.

8370. Final Civil Sanction

Any decision rendered by the Board of the Authority under Rule 8350, or the Authority under Rule 8360, shall constitute a final civil sanction subject to appeal and review in accordance with the provisions of 15 U.S.C. 3058.

8380. Guidelines for Confidentiality and Public Reporting

As used in this Rule, ''public disclosure'' means the dissemination or distribution of information by the Authority to the general public.

(a) This Rule shall apply to an alleged violation of any provision of the Act, the Rule 2000 Series, the Rule 8000 Series, or the Rule 9000 Series. It shall not apply to:

(1) An alleged violation of the anti-doping and medication control rule provisions in the Rule 3000 Series; or

(2) An alleged violation arising under state laws, racing rules, and regulations not preempted under 15 U.S.C. 3054(b).

(b) After notice of a violation of any provision in the Rule 2200 Series, the Rule 8000 Series, or the Rule 9000 Series has been provided to a Covered Person by the Authority or any official or body authorized to adjudicate violations under the Rule 8000 Series, the Authority shall publicly disclose the following information relating to the alleged violation:

(1) The identity of any Covered Person who is the subject of the alleged violation;

(2) The identity of any applicable horse; and

(3) The rule violated and, where appropriate, the basis of the asserted violation.

(c) Information as described in paragraph (b) concerning a violation of the Rule 2100 Series shall be disclosed in accordance with this Rule by the Authority either upon issuance of a Notice of Suspected or Actual Violation, or at any time thereafter, as deemed appropriate by the Authority.

(d) If at any time information pertaining to an alleged violation is publicly disclosed by the Covered Person charged with the violation or any employee or agent of the Covered Person, the Authority may comment on the information publicly disclosed by the Covered Person.

(e) The Authority shall not be required to make public disclosure if public disclosure will compromise an ongoing investigation or proceeding. When the Authority determines that an ongoing investigation or proceeding will no longer be compromised by public disclosure, the Authority shall at such time make any public disclosure required under this Rule.

(f) Notwithstanding any provision to the contrary in the rules of the Authority, the Authority may make public disclosure of any relevant information at any time, including prior to delivery of notice of a violation, if the Authority determines that such disclosure:

(1) Concerns a violation or circumstance that poses a serious and imminent risk of harm to Covered Persons, Covered Horses, or the public; or

(2) Is otherwise in the best interest of horseracing conducted at Covered Horseraces.

(g) The Authority shall publicly disclose the resolution of an alleged violation no later than 20 calendar days after the earlier of:

(1) The imposition of a final civil sanction;

(2) A resolution between the Authority and the Covered Person; or

(3) The dismissal of the allegation or a finding of no violation by the Authority.

(h) Public disclosure under paragraph (g)(1) & (2) shall include the following:

(1) The name of the Covered Person who committed the violation and any Covered Horse affected by the violation;

(2) The Rule violated;

(3) The sanction imposed;

(4) The order or other ruling issued in the matter; and

(5) The results of any appellate decisions concerning the violation.

(i) Public Disclosure shall not be required under this Rule if the Covered Person alleged to have committed a violation is a minor. Public disclosure concerning a case involving a minor shall be at the discretion of the Authority and in proportion to the facts and circumstances of the case.

(j) Publication shall be accomplished at a minimum by placing the required information on the Authority's website or publishing it through other means.

(k) Pursuant to 15 U.S.C. 3054, this Rule shall preempt any provision of State law or regulation, including those pertaining to data practice and privacy laws.

8400. Investigatory Powers

(a) The Commission, the Authority, or their designees:

(1) Shall have free access to:

(i) With regard to Covered Persons, books, records, offices, racetrack facilities, and other places of business of Covered Persons that relate to the care, treatment, training, and racing of Covered Horses; and

(ii) With regard to any person who owns a Covered Horse or performs services on a Covered Horse, books, records, offices, facilities, and other places of business that relate to the care, treatment, training, and racing of Covered Horses.

(2) May seize any medication, drug, substance, or paraphernalia in violation or suspected violation of any provision of 15 U.S.C. Chapter 57A or the regulations of the Authority, and any object or device reasonably believed to have been used in furtherance of the violation or suspected violation.

(b) Upon final resolution of a violation, the Commission, the Authority, or their designees shall return seized property, including but not limited to phones, computers, and other repositories of electronic data, the possession of which is not specifically prohibited by the Act or the rules of the Authority.

(c) A Covered Person shall:

(1) Cooperate with the Commission, the Authority, or their designees during any investigation; and

(2) Respond truthfully to the best of the Covered Person's knowledge if questioned by the Commission, the Authority, or their designees about a racing matter.

(d) A Covered Person or any officer, employee, or agent of a Covered Person shall not hinder a person who is conducting an investigation under or attempting to enforce or administer any provision of 15 U.S.C. Chapter 57A or the regulations of the Authority.

(e) The Commission or the Authority may issue subpoenas for the attendance of witnesses in proceedings within their jurisdiction, and for the production of documents, records, papers, books, supplies, devices, equipment, and all other instrumentalities related to matters within the jurisdiction of the Commission or the Authority.

(f) Failure to comply with a subpoena or with the other provisions of this Rule may be penalized by the imposition of one or more penalties set forth in Rule 8200.

(g) The Commission or the Authority may administer oaths to witnesses and require witnesses to testify under oath in matters within the jurisdiction of the Commission or the Authority.

By direction of the Commission.

April J. Tabor,

Secretary.

BILLING CODE 6750–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Submission for OMB Review; ACF Performance Progress Report, ACF–OGM–SF–PPR–B (OMB #0970–0406)

AGENCY: Office of Grants Management, Administration for Children and Families, HHS.

ACTION: Request for public comment.

SUMMARY: The Office of Grants Management (OGM), in the Administration for Children and Families (ACF) is requesting a 3-year extension of the form ACF–OGM–SF–PPR–B (OMB #0970–406, expiration 11/30/2022). There are minor changes requested to the form.

DATES: *Comments due within 30 days of publication.* OMB must make a decision about the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. You can also obtain copies of the proposed collection of information by emailing *infocollection@acf.hhs.gov.* Identify all emailed requests by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: ACF's OGM is proposing the continued collection of program performance data for ACF's discretionary grantees using the existing ACF–OGM–SF–PPR–B (OMB #0970–0406, expiration 11/30/2022) form with minor changes to improve the function of the form. Revisions include collection of the Unique Entity Identifier instead of the Data Universal Numbering System, a rewording of the submission instructions to be more inclusive of all possible report submission methods utilized across ACF, and the addition of a program indicator to collect information on activities recipients conducted during the reporting period to address or advance equity. The form, developed by OGM, was created from the basic template of the OMB-approved reporting format of the Program

Performance Report. OGM uses this data to ensure grantees are proceeding in a satisfactory manner in meeting the approved goals and objectives of the project and if funding should be continued for another budget period.

OMB grants policy requires grantees to report on performance. Specific citations are contained in 45 CFR part 75 Uniform Administrative Requirements, Cost Principles, and Audit Requirements for HHS Awards.

Respondents: All ACF discretionary grantees. State governments, Native American Tribal governments, Native American Tribal Organizations, local governments, universities, and nonprofits with or without 501(c)(3) status with the IRS.

ANNUAL BURDEN ESTIMATES

Instrument	Total number of respondents	Annual number of responses per respondent	Average burden hours per response	Annual burden hours
ACF–OGM–SF–PPR–B	6,000	2	1	12,000

Estimated Total Annual Burden Hours: 12,000.

Authority: 45 CFR part 75.

Mary B. Jones,

ACF/OPRE Certifying Officer.

BILLING CODE 4184–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2022–N–0863]

Agency Information Collection Activities; Proposed Collection; Comment Request; Monthly Monitoring Study

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (PRA), Federal Agencies are required to publish a notice in the **Federal Register** concerning each proposed collection of information and to allow 60 days for public comment in response to the notice. This notice solicits comments on a proposed information collection entitled ''Monthly Monitoring Study.''

DATES: Either electronic or written comments on the collection of information must be submitted by September 26, 2022.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of September 26, 2022. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2022–N–0863 for the ''Monthly Monitoring Study'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: JonnaLynn Capezzuto, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–3794, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3521), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Monthly Monitoring Study

OMB Control Number 0910–NEW

This information collection supports the development and implementation of FDA public education campaigns related to tobacco use. To reduce the public health burden of tobacco use in the United States and educate the public—especially young people—about the dangers of tobacco use, FDA's Center for Tobacco Products is developing and implementing multiple public education campaigns.

FDA launched ''The Real Cost'' in February 2014, seeking to reduce tobacco use among at-risk youth ages 12–17 in the United States who are open to smoking cigarettes and/or using electronic nicotine delivery systems (ENDS) products, or have already experimented with cigarettes and/or ENDS products. Given the rapidly evolving tobacco landscape in the United States, frequent and nimble data collection strategies are needed to keep pace and provide relevant information to FDA to inform its tobacco prevention media campaign development about changes in tobacco use and emerging products among youth and young adults.

In an effort to inform specified recommendations around ''The Real Cost'' and FDA's other public education programs to reduce tobacco-related death and disease, more research is needed to understand the trends in use and perceptions of novel and emerging tobacco products, as well as awareness and preferences related to emerging tobacco products and specific brands and device types so that the FDA can develop new media campaign messages that resonate with youth and young adults. The purpose of the Monthly Monitoring Study is to collect primary data from youth and young adults, ages 15 to 24 years old, in the United States to monitor perceptions and use of emerging and novel tobacco products and emerging trends in brand and device awareness and use.

The study will be conducted using web-based surveys that are self-administered on personal computers or web enabled mobile devices. The study will use an online survey to collect data from up to 27,000 youth and young adults ages 15 to 24 years to monitor perceptions about and trends in use of ENDS and other emerging tobacco products. Participants will be recruited through social media advertisements. To achieve the required pace of data collection, the study will not contact parents of youth under 18 years old for parental permission and will obtain a waiver of parental permission from the institutional review board. The study will include questions about marijuana use to allow the study team to differentiate between use of current and emerging tobacco products and marijuana, which can be used in tobacco products such as ENDS and little cigar/cigarillos. The survey will take approximately 20 minutes to complete per participant. This survey will ask participants to provide feedback on tobacco use and quitting behavior, as well as brand and device preferences, tobacco information sources, peer influence and perceptions, and marijuana use.

The aim of the Monthly Monitoring Study is to answer the following questions:

- What are the trends in brand and device use for ENDS products and other emerging tobacco products among youth and young adults ages 15 to 24 years in the United States? What are their perceptions of these products?
- How is respondent tobacco use affected by environmental factors, including peer influence and other external factors such as COVID–19?
- What are the primary sources of new product information and where are these products purchased/acquired?
- What are the primary sources of health information for ENDS and other emerging tobacco products?

In support of the provisions of the Family Smoking Prevention and Tobacco Control Act that require FDA to protect the public health and to reduce tobacco use by minors, FDA requests OMB approval to collect data for the Monthly Monitoring Study.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED REPORTING BURDEN [1]

Type of respondent/activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Youth Screener	27,000	1	27,000	0.04167 (2.5 minutes)	1,125
Youth Assent	13,500	1	13,500	0.04167 (2.5 minutes)	563
Youth Online Survey	13,500	1	13,500	0.3333 (20 minutes)	4,500
Young Adult Screener	27,000	1	27,000	0.04167 (2.5 minutes)	1,125
Young Adult Consent	13,500	1	13,500	0.04167 (2.5 minutes)	563

TABLE 1—ESTIMATED REPORTING BURDEN [1]—Continued

Type of respondent/activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Young Adult Online Survey	13,500	1	13,500	0.3333 (20 minutes)	4,500
Total					12,376

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

We expect the screening process (2.5 minutes per response) to yield a 2 to 1 ratio of eligible participants. We will need to screen approximately 54,000 potential participants (27,000 youth and 27,000 young adults) over the study period. Participants determined to be eligible through the screener will complete a youth assent or young adult consent (2.5 minutes per response) and the online survey (20 minutes per response).

Over the course of the study period, we intend to survey approximately 1,500 youth ages 15–17, and young adults ages 18–24, every 1 to 2 months. The survey will be repeated with a new cross-sectional sample approximately every month or every other month over a period of 18 months. We will obtain a final sample size of 27,000 youth and young adults (13,500 youth and 13,500 young adults) over the course of the study period. Respondents will be allowed to complete an additional, cross-sectional survey after 6 months.

Dated: July 20, 2022.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2020–N–1729]

Revocation of Emergency Use of a Drug During the COVID–19 Pandemic; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the revocation of the Emergency Use Authorization (EUA) (the Authorization) issued to Gilead Sciences, Inc. (Gilead) for VEKLURY (remdesivir). FDA revoked the Authorization on April 25, 2022, under the Federal Food, Drug, and Cosmetic Act (FD&C Act) given the approval of a supplemental new drug application (NDA) for VEKLURY, which expanded the approved indication to cover the authorized population. The revocation, which includes an explanation of the reasons for the revocation, is reprinted in this document.

DATES: The Authorization is revoked as of April 25, 2022.

ADDRESSES: Submit written requests for single copies of the Authorization and/or revocation to the Office of Counterterrorism and Emerging Threats, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 1, Rm. 4338, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your request or include a fax number to which the Authorizations may be sent. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the Authorizations.

FOR FURTHER INFORMATION CONTACT: Michael Mair, Office of Counterterrorism and Emerging Threats, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 1, Rm. 4340, Silver Spring, MD 20993–0002, 301–796–8510 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION:

I. Background

Section 564 of the FD&C Act (21 U.S.C. 360bbb–3) as amended by the Project BioShield Act of 2004 (Pub. L. 108–276) and the Pandemic and All-Hazards Preparedness Reauthorization Act of 2013 (Pub. L. 113–5) allows FDA to strengthen the public health protections against biological, chemical, nuclear, and radiological agents. Among other things, section 564 of the FD&C Act allows FDA to authorize the use of an unapproved medical product or an unapproved use of an approved medical product in certain situations. On May 1, 2020, FDA issued an Authorization (EUA 046) to Gilead for remdesivir, subject to the terms of the Authorization. Notice of the issuance of the Authorization was published in the **Federal Register** on September 11, 2020 (85 FR 56231), as required by section 564(h)(1) of the FD&C Act. Subsequent amendments to the Authorization on August 28, 2020, October 1, 2020, October 16, 2020, October 22, 2020, and January 21, 2022, were made available on FDA's website.

II. EUA Criteria for Issuance No Longer Met

Under section 564(g)(2) of the FD&C Act, the Secretary of HHS may revoke an EUA if, among other things, the criteria for issuance are no longer met. On April 25, 2022, FDA revoked the EUA for VEKLURY because the criteria for issuance were no longer met. Under section 564(c)(3) of the FD&C Act, an EUA may be issued only if FDA concludes there is no adequate, approved,[1] and available alternative to the product for diagnosing, preventing, or treating the disease or condition. On April 25, 2022, FDA approved a supplemental NDA to NDA 214787 for VEKLURY, which expanded the approved indication to the following:

> Veklury is a severe acute respiratory syndrome coronavirus 2 (SARS-CoV–2) nucleotide analog RNA polymerase inhibitor indicated for the treatment of coronavirus disease 2019 (COVID–19) in adults and pediatric patients (28 days of age and older and weighing at least 3 kg) with positive results of direct SARS-CoV–2 viral testing, who are:
> - Hospitalized, or
> - Not Hospitalized and have mild-to-moderate COVID–19 and are at high risk for progression to severe COVID–19, including hospitalization or death.

FDA has concluded that VEKLURY approved under NDA 214787 is an adequate, approved, and available alternative to the VEKLURY available for emergency use for the treatment of COVID–19 for purposes of section 564(c)(3) of the FD&C Act. Accordingly, FDA revoked EUA 046 for emergency use of VEKLURY, pursuant to section 564(g)(2) of the FD&C Act.

III. Electronic Access

[1] In the context of section 564, the term ''approved'' refers to a product that is approved, licensed, or cleared under section 505, 510(k), or 515 of the FD&C Act (21 U.S.C. 355, 360(k), or 360(e)) or section 351 of the Public Health Service Act (42 U.S.C. 262). See section 564(a)(2) of the FD&C Act.

An electronic version of this document and the full text of the Authorization and revocation are available on the internet from *https://www.fda.gov/emergency-preparedness-and-response/mcm-legal-regulatory-and-policy-framework/emergency-use-authorization* and *https://www.regulations.gov/.*

IV. The Revocation

Having concluded that the criteria for revocation of the Authorization under section 564(g) of the FD&C Act are met, FDA has revoked the EUA for Gilead's VEKLURY (remdesivir). The revocation in its entirety follows and provides an explanation of the reasons for revocation, as required by section 564(h)(1) of the FD&C Act.

BILLING CODE 4164–01–P

U.S. FOOD & DRUG ADMINISTRATION

April 25, 2022

Gilead Sciences, Inc.
Attention: Madelyn Low, MBS
Manager, Regulatory Affairs
333 Lakeside Drive
Foster City, CA 94404

RE: Emergency Use Authorization 046

Dear Ms. Low:

This letter is to notify you of the revocation of the Emergency Use Authorization (EUA 046) for emergency use of Gilead Sciences, Inc.'s ("Gilead") Veklury (remdesivir), issued initially on May 1, 2020, and amended on August 28, 2020, October 1, 2020, October 16, 2020, October 22, 2020, and January 21, 2022.

The authorization of a drug for emergency use under section 564 of the Federal Food, Drug, and Cosmetic Act (the Act) (21 U.S.C. 360bbb-3) may, pursuant to section 564(g)(2) of the Act, be revised or revoked when the criteria under section 564(b)(1) of the Act no longer exist, the criteria under section 564(c) of the Act for issuance of such authorization are no longer met, or other circumstances make such revision or revocation appropriate to protect the public health or safety.

FDA has determined that the criteria for issuance of such authorization under section 564(c) of the Act are no longer met. Under section 564(c)(3) of the Act, an EUA may be issued only if FDA concludes there is no adequate, approved[1], and available alternative to the product for diagnosing, preventing, or treating the disease or condition.

On April 25, 2022, the Agency approved a supplemental New Drug Application (NDA) to NDA 214787, which expanded the approved indication to the following:

> *Vekhury is a severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) nucleotide analog RNA polymerase inhibitor indicated for the treatment of coronavirus disease 2019 (COVID-19) in adults and pediatric patients (28 days of age and older and weighing at least 3 kg) with positive results of direct SARS-CoV-2 viral testing, who are:*
>
> - *Hospitalized, or*
> - *Not Hospitalized and have mild-to-moderate COVID-19, and are at high risk for progression to severe COVID-19, including hospitalization or death.*

Page 2 – Ms. Low, Gilead Sciences, Inc.

Based on this approval, FDA has concluded that NDA 214787 for Veklury is an adequate, approved[1], and available alternative to Veklury available for emergency use, for the treatment of COVID-19 for purposes of section 564(c)(3) of the Act.

Accordingly, FDA revokes EUA 046 for emergency use of Veklury, pursuant to section 564(g)(2) of the Act. As of the date of this letter, the Veklury that was authorized by FDA for emergency use under EUA 046 is no longer authorized by FDA.

Notice of this revocation will be published in the *Federal Register*, pursuant to section 564(h)(1) of the Act.

Sincerely,

/s/

Jacqueline A. O'Shaughnessy, Ph.D.
Acting Chief Scientist
Food and Drug Administration

[1] In the context of section 564, the term "approved" refers to a product that is approved, licensed, or cleared under section 505, 510(k), or 515 of the Act or section 351 of the Public Health Service Act. See section 564(a)(2) of the Act.

Dated: July 19, 2022.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–C

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2022–N–0862]

Agency Information Collection Activities; Proposed Collection; Comment Request; The Real Cost Campaign Outcomes Evaluation Study: Cohort 3

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA, Agency, or we) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (PRA), Federal Agencies are required to publish a notice in the **Federal Register** concerning each proposed collection of information and to allow 60 days for public comment in response to the notice. This notice

solicits comments on a proposed information collection titled ''The Real Cost Campaign Outcomes Evaluation Study: Cohort 3.''

DATES: Submit either electronic or written comments on the collection of information by September 26, 2022.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before September 26, 2022. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of September 26, 2022. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2022–N–0862 for ''The Real Cost Campaign Outcomes Evaluation Study: Cohort 3.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: JonnaLynn Capezzuto, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–3794, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3521), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

The Real Cost Campaign Outcomes Evaluation Study: Cohort 3

OMB Control Number 0910—NEW

This information collection supports the development and implementation of FDA public education campaigns related to tobacco use. To reduce the public health burden of tobacco use in the United States and educate the public—especially young people—about the dangers of tobacco use, the FDA Center for Tobacco Products (CTP) is developing and implementing multiple public education campaigns.

FDA launched ''The Real Cost'' in February 2014, seeking to reduce tobacco use among at-risk youth ages 12–17 in the United States who are open to smoking cigarettes and/or using electronic nicotine delivery systems (ENDS) products, or have already experimented with cigarettes and/or ENDS products. Complementary

evaluation studies, including the ''Evaluation of FDA's Public Education Campaign on Teen Tobacco (ExPECTT),'' were designed and implemented to measure awareness of and exposure to ''The Real Cost'' paid media campaign among youth ages 12–17 in targeted areas of the United States.

The first cohort (ExPECTT: Cohort 1) assessed the campaign's impact on outcome variables of interest from November 2013 to November 2016. The second cohort (ExPECTT: Cohort 2) has been assessing the campaign's impact on outcome variables of interest from June 2018 and will run through August 2022. To continue assessing the impact of ''The Real Cost'' campaign, FDA will implement The Real Cost Campaign Outcomes Evaluation Study: Cohort 3. The study will consist of four waves of data collection, including the baseline survey and three followup (FU) surveys. Online surveys with youth ages 11–20 will be conducted at baseline.

Online surveys of youth will be conducted in the United States to measure the effectiveness of FDA's ''The Real Cost'' campaign. The purpose of FDA's The Real Cost Campaign Outcomes Evaluation Study: Cohort 3 is to provide credible evidence that changes in key outcomes can be attributed to exposure to the campaign. The strength of the attribution is determined by the ability of the evaluation approach to rule out alternative explanations for observed changes in key outcomes. Attributing effects to a campaign require using multiple, complementary methods that build a case that exposure to the campaign leads to changes in key outcomes. For a national campaign evaluation, FDA can improve attribution by carefully assessing potential confounders. To improve attribution, we intend to measure variation in both potential campaign exposure (*e.g.,* market-level delivery) and self-reported campaign exposure to media advertising.

The goal of The Real Cost Campaign Outcomes Evaluation Study: Cohort 3 is to determine whether future waves of ''The Real Cost'' public education campaign will influence any of the following key outcomes:

- Awareness of campaign messages
- Specific beliefs targeted by messages (message-targeted beliefs)
- Psychosocial predictors or precursors of tobacco use behavior
  - Health and addiction risk perceptions
  - Perceived loss of control or threat to freedom expected from tobacco use
  - Anticipated guilt, shame, and regret from tobacco use
  - Perceptions of prevalence, approval, and popularity of tobacco use
  - Pro-health changes in normative beliefs about tobacco product use
  - Tobacco use susceptibility
  - Intention or willingness to use tobacco
  - Intention to quit and/or reduce daily consumption

In support of the provisions of the Tobacco Control Act (Pub. L. 11–31) that require FDA to protect the public health and to reduce tobacco use by minors, FDA requests OMB approval to collect information to evaluate CTP's public education campaign ''The Real Cost'' through the Evaluation Study: Cohort 3.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

Respondent/activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Parent Recruitment Study Materials—Main: Baseline & Followup 2 Replenishment	545,000	1	545,000	0.17 (10 mins)	92,650
Parent Screener—Main: Baseline & Followup 2 Replenishment	272,500	1	272,500	0.08 (5 mins)	21,800
Household Roster—Main: Baseline & Followup 2 Replenishment	5,500	1	5,500	0.08 (5 mins)	440
CATI Screener—Main: Baseline & Followup 2 Replenishment	2,000	1	2,000	0.08 (5 mins)	160
Parent Permission—Main: Baseline & Followup 1,2,3	21,600	1	21,600	0.08 (5 mins)	1,728
Youth Assent—Main: Baseline & Followup 1,2,3	21,600	1	21,600	0.08 (5 mins)	1,728
Youth Survey—Main: Baseline & Followup 1,2,3	21,600	1	21,600	0.50 (30 mins)	10,800
Youth Screener—Supplemental	5,000	1	5,000	0.08 (5 mins)	400
Youth Assent—Supplemental: Baseline & Followup 1,2,3	4,428	1	4,428	0.08 (5 mins)	355
Youth Survey—Supplemental: Baseline & Followup 1,2,3	4,428	1	4,428	0.50 (30 mins)	2,214
Total					132,275

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

Main Data Collection

The main data collection will include a baseline survey and three FU surveys. The recruitment sample for the main data collection is youth ages 11–17. We intend to replenish the longitudinal sample at FU2 to obtain 6,000 youth respondents to maintain at least 4,800 respondents at each wave. We expect the screening process to yield a 100:1 ratio of eligible responding households. We estimate that we will mail 400,000 recruitment/study material packages (10 minutes per response) in order to receive at least 200,000 completed screeners (5 minutes per response) by adults within households. Households completing the screener by mail will be contacted to complete a computer-assisted telephone interview (CATI) where an interviewer will determine eligibility and obtain parental permission (5 minutes per response). For households identified as eligible for the study during the screening process (*i.e.,* the presence of one or more youth ages 11 to 17), we will ask the parent/guardian to list all eligible youth in their households for study selection, a process called rostering (5 minutes per response). We estimate from the 200,000 completed screeners, we will recruit 6,000 eligible youth from the 4,000 eligible households.

Baseline

At baseline, we plan to collect data from approximately 6,000 youth respondents from the 4,000 eligible households identified through screening. More than one eligible youth

per household may be recruited for the study. These 6,000 youth respondents are estimated to provide baseline assent (5 minutes per response) and complete the survey (30 minutes per response). For these youth respondents, we will ask the parent/guardian to provide permission (5 minutes per response) for the youth to participate in the study. We estimate that we will lose approximately 20 percent of the original baseline sample at each FU wave.

Followup 1

We estimate that we will retain 80 percent of the sample from baseline and collect data from 4,800 respondents (5 minutes per response) at FU1. These 4,800 youth respondents are estimated to provide assent (5 minutes per response) for FU1 and complete the survey (30 minutes per response). For these youth respondents, we will ask the parent/guardian to provide permission (5 minutes per response) for the youth to participate in the study. We do not intend to replenish the sample at FU1.

Followup 2

We estimate that we will retain 80 percent of the sample from FU1 resulting in 3,840 respondents at FU2. To replenish the longitudinal sample at FU2, we will send additional ''baseline'' screeners to new households. We intend to send recruitment/study material packages to an additional 145,000 households (10 minutes per response) to receive an estimated 72,500 completed screeners (5 minutes per response). For households identified as eligible for the study during the screening process (*i.e.,* the presence of 1 or more youth ages 11 to 17), we will ask the parent/guardian to list all eligible youth in their households for study selection, a process called rostering (5 minutes per response). Households completing the screener by mail will be contacted to complete a CATI where an interviewer will determine eligibility and obtain parental permission (5 minutes per response). From these completed screeners, we estimate that we will obtain data from an additional 2,160 youth within approximately 1,500 households. Replenishing the sample will allow us to obtain 6,000 youth respondents at FU2 (3,840 from the original sample, and 2,160 from the replenishment sample) and maintain a minimum study sample of 4,800 respondent at all study waves. These 6,000 youth respondents are estimated to provide assent (5 minutes per response) for FU2 and complete the survey (30 minutes per response). For these youth respondents, we will ask the parent/guardian to provide permission (5 minutes per response) for the youth to participate in the study.

Followup 3

We estimate that we will retain 80 percent of the sample from FU2 and collect data from 4,800 respondents at FU3. We do not intend to replenish the sample at FU3. These 4,800 youth respondents are estimated to provide assent (5 minutes per response) for FU2 and complete the survey (30 minutes per response). For these youth respondents, we will ask the parent/guardian to provide permission (5 minutes per response) for the youth to participate in the study.

Supplemental Data Collection

In addition to the main data collection, we intend to collect data from subpopulations shown to be at higher risk of initiating use of cigarettes and ENDS products, such as youth who identify as LGBTQ+ and youth who have a mental health disorder. Data collection will consist of online self-administered surveys of participants recruited through social media advertisements. The recruitment sample for this data collection will be youth ages 14 to 20 who meet the subpopulation criteria. We intend to collect data at baseline from 1,500 respondents. We anticipate that we will need to screen 5,000 respondents (5 minutes per response) to obtain a baseline sample of 1,500 respondents who meet the subpopulation criteria. At baseline, we plan to collect data from approximately 1,500 respondents identified as eligible through screening. These 1,500 youth respondents are estimated to provide assent (5 minutes per response) and complete the survey (30 minutes per response). We estimate that we will lose approximately 20 percent of the original baseline sample at each FU wave; therefore, estimating 1,200 respondents at FU1, 960 respondents at FU2, and 768 respondents at FU3. For the FU samples, youth will provide assent (5 minutes per response) and complete the survey (30 minutes per response).

Dated: July 19, 2022.

Lauren K. Roth,

Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Human Genome Research Institute; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of a meeting of the National Advisory Council for Human Genome Research.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Advisory Council for Human Genome Research.

Date: August 1, 2022.

Time: 2:00 p.m. to 3:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Human Genome Research Institute, National Institutes of Health, 6700B Rockledge Drive, Suite 3100, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Rudy O. Pozzatti, Ph.D., Scientific Review Officer, Scientific Review Branch, National Human Genome Research Institute, National Institutes of Health, 6700B Rockledge Drive, Suite 3100 Bethesda, MD 20892, (301) 402–0838, *pozzattr@mail.nih.gov*.

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

Information is also available on the Institute's/Center's home page: *http://www.genome.gov/council,* where an agenda and any additional information for the meeting will be posted when available.

National Institutes of Health

Government-Owned Inventions; Availability for Licensing

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The invention listed below is owned by an agency of the U.S. Government and is available for licensing to achieve expeditious commercialization of results of federally-funded research and development. Foreign patent applications are filed on selected inventions to extend market coverage for companies and may also be available for licensing.

FOR FURTHER INFORMATION CONTACT: Theodoric Mattes at 240–627–3827, or *theodoric.mattes@nih.gov.* Licensing information may be obtained by communicating with the Technology Transfer and Intellectual Property Office, National Institute of Allergy and Infectious Diseases, 5601 Fishers Lane, Rockville, MD 20852; tel. 301–496–2644. A signed Confidential Disclosure Agreement will be required to receive copies of unpublished information related to the invention.

SUPPLEMENTARY INFORMATION: Technology description follows:

Lymphatic Filariasis Biomarkers for Detection and Surveillance

Description of Technology:

Lymphatic filariasis (elephantiasis; LF) is a neglected tropical disease that affects over 120 million people throughout the tropics and subtropics of Asia, Africa, the Western Pacific, and parts of the Caribbean and South America. LF results from infection with the filarial parasites *Wuchereria bancrofti* or *Brugia malayi.* Current methods of confirming active infection by *W. bancrofti* or *B. malayi* include microscopy and immunoassays using serum/plasma extracted from the patient. However, the sensitivity of microscopy detection varies among patients, and immunoassays show cross-reactivity with antibodies directed towards other parasites, such as *Onchocerca volvulus* or *Loa loa* whose geographic distribution can overlap with the LF-causing filarial parasites.

This new technology addresses the limitations of cross-reactivity through the detection of a single antigen, Wb5B, selected due to a lack of homologs in other filarial parasites that infect humans. Preliminary data indicates that Wb5B is immunogenic, highly specific (>99%), and accurate (>90%) for the detection of *W. bancrofti* infection in sera from humans and other mammalian sources. The antigen can be isolated in soluble form for integration in a variety of diagnostic assay formats.

The subject technology, including the antigen sequence as well as plasmids enabling bacterial, insect, and mammalian cell expression, is available for licensing for commercial development in accordance with 35 U.S.C. 209 and 37 CFR part 404, as well as for further development and evaluation under a research collaboration.

There may be the potential to combine this technology with another NIAID-developed biomarker technology (Wb123, available for licensing; see HHS Ref. No. E–281–2010–0, ''Diagnostic Assays and Methods of Use for Detection of Filarial Infection'') for the development of a multiplex assay for detection of active *W. bancrofti* infection for diagnostic or surveillance purposes.

Potential Commercial Applications:

- Diagnostics for *W. bancrofti* infection
- Surveillance for *W. bancrofti* prevalence

Competitive Advantages:

- Increased specificity compared to available diagnostics
- Differentiation from other parasites with similar geographic footprints

Development Stage: Pre-Clinical.

Inventors: Thomas B. Nutman, Sasisekhar Bennuru, both of NIAID.

Intellectual Property: U.S. Provisional Patent Application Serial No. 63/347,794, filed June 1, 2022.

Related Inventions: Diagnostic Assays and Methods of Use for Detection of Filarial Infection (HHS Reference No. E–281–2010–0).

Licensing Contact: To license this technology, please contact Theodoric Mattes at 240–627–3827, or *theodoric.mattes@nih.gov.,* and reference E–093–2022–0.

Collaborative Research Opportunity: The National Institute of Allergy and Infectious Diseases is seeking statements of capability or interest from parties interested in collaborative research to further develop, evaluate, or commercialize this technology. For collaboration opportunities, please contact Theodoric Mattes at 240–627–3827, or *theodoric.mattes@nih.gov.*

Dated: July 14, 2022.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2022–0343; OMB Control Number 1625–0126]

Information Collection Request to Office of Management and Budget

AGENCY: Coast Guard, DHS.

ACTION: Sixty-day notice requesting comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, the U.S. Coast Guard intends to submit an Information Collection Request (ICR) to the Office of Management and Budget (OMB), Office of Information and Regulatory Affairs (OIRA), requesting an extension of its approval for the following collection of information: 1625–0126, Requirements for Vessels that Perform Certain Aquaculture Support Operations; without change. Our ICR describes the information we seek to collect from the public. Before submitting this ICR to OIRA, the Coast Guard is inviting comments as described below.

DATES: Comments must reach the Coast Guard on or before September 26, 2022.

ADDRESSES: You may submit comments identified by Coast Guard docket number [USCG–2022–0343] to the Coast Guard using the Federal eRulemaking Portal at *https://www.regulations.gov.* See the ''Public participation and request for comments'' portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

A copy of the ICR is available through the docket on the internet at *https://www.regulations.gov.* Additionally, copies are available from: COMMANDANT (CG–6P), ATTN: PAPERWORK REDUCTION ACT MANAGER, U.S. COAST GUARD, 2703 MARTIN LUTHER KING JR. AVE SE, STOP 7710, WASHINGTON, DC 20593–7710.

FOR FURTHER INFORMATION CONTACT: A.L. Craig, Office of Privacy Management, telephone 202–475–3528, or fax 202–372–8405, for questions on these documents.

SUPPLEMENTARY INFORMATION:

Public Participation and Request for Comments

This notice relies on the authority of the Paperwork Reduction Act of 1995; 44 U.S.C. 3501 *et seq.,* chapter 35, as amended. An ICR is an application to OIRA seeking the approval, extension, or renewal of a Coast Guard collection of information (Collection). The ICR contains information describing the Collection's purpose, the Collection's likely burden on the affected public, an explanation of the necessity of the Collection, and other important information describing the Collection. There is one ICR for each Collection.

The Coast Guard invites comments on whether this ICR should be granted based on the Collection being necessary for the proper performance of Departmental functions. In particular, the Coast Guard would appreciate comments addressing: (1) the practical utility of the Collection; (2) the accuracy of the estimated burden of the Collection; (3) ways to enhance the quality, utility, and clarity of information subject to the Collection; and (4) ways to minimize the burden of the Collection on respondents, including the use of automated collection techniques or other forms of information technology.

In response to your comments, we may revise this ICR or decide not to seek an extension of approval for the Collection. We will consider all comments and material received during the comment period.

We encourage you to respond to this request by submitting comments and related materials. Comments must contain the OMB Control Number of the ICR and the docket number of this request, [USCG–2022–0343], and must be received by September 26, 2022.

Submitting Comments

We encourage you to submit comments through the Federal eRulemaking Portal at *https://www.regulations.gov.* If your material cannot be submitted using *https://www.regulations.gov,* contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions. Documents mentioned in this notice, and all public comments, are in our online docket at *https://www.regulations.gov* and can be viewed by following that website's instructions. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted.

We accept anonymous comments. All comments received will be posted without change to *https://www.regulations.gov* and will include any personal information you have provided. For more about privacy and submissions in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020).

Information Collection Request

Title: Requirements for Vessels that Perform Certain Aquaculture Support Operations.

OMB Control Number: 1625–0126.

Summary: This information is required to ensure that a vessel engaged in certain aquaculture operations has applied for and received a waiver in accordance with 46 U.S.C. 12102(d)(1). A vessel owner or operator must notify Coast Guard and provide a copy of the waiver.

Need: The Coast Guard regulations are prescribed 46 CFR part 106. The Coast Guard uses the information in this collection to ensure compliance with the requirements.

Forms: None.

Respondents: Owners and operators of aquaculture operations.

Frequency: On occasion.

Hour Burden Estimate: The estimated burden has increased from 2 hours to 3 hours a year, due to an increase in the estimated annual number of responses.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended.

Dated: July 20, 2022.

Kathleen Claffie,

Chief, Office of Privacy Management, U.S. Coast Guard.

Information Collection Request

Title: Regulated Navigation Area; Reporting Requirements for Barges Loaded with Certain Dangerous Cargoes, Inland Rivers, Eighth Coast Guard District and the Illinois Waterway, Ninth Coast Guard District.

OMB Control Number: 1625–0105.

Summary: The Coast Guard requires position and intended movement reporting, and fleeting operations reporting, from barges carrying certain dangerous cargoes (CDCs) in the inland rivers within the Eighth and Ninth Coast Guard Districts. The reporting requirements are found in 33 CFR 165.830 and 165.921.

Need: This information is used to ensure port safety and security and to ensure the uninterrupted flow of commerce.

Forms: N/A.

Respondents: Owners, agents, masters, towing vessel operators, or persons in charge of barges loaded with CDCs or having CDC residue operating on the inland rivers located within the Eighth and Ninth Coast Guard Districts.

Frequency: On occasion.

Hour Burden Estimate: The estimated burden remains 4 hours a year.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended.

Dated: July 20, 2022.

Kathleen Claffie,

Chief, Office of Privacy Management, U.S. Coast Guard.

Information Collection Request

Title: Barges Carrying Bulk Hazardous Materials.

OMB Control Number: 1625–0104.

Summary: This information is needed to ensure the safe shipment of bulk hazardous liquids in barges. The requirements are necessary to ensure that barges meet safety standards and to ensure that barge's crewmembers have the information necessary to operate barges safely.

Need: 46 U.S.C. 3703 authorizes the Coast Guard to prescribe rules related to the carriage of liquid bulk dangerous cargoes. 46 CFR 151 prescribes rules for barges carrying bulk liquid hazardous materials.

Forms: N/A.

Respondents: Owners and operators of tank barges.

Frequency: On occasion.

Hour Burden Estimate: The estimated burden has increased from 24,752 hours a year to 27,262 hours, due to an increase in the estimated annual number of respondents.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended.

Dated: July 20, 2022.

Kathleen Claffie,

Chief, Office of Privacy Management, U.S. Coast Guard.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2022–0002]

Final Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: Notice.

SUMMARY: Flood hazard determinations, which may include additions or modifications of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or regulatory floodways on the Flood Insurance Rate Maps (FIRMs) and where applicable, in the supporting Flood Insurance Study (FIS) reports have been made final for the communities listed in the table below. The FIRM and FIS report are the basis of the floodplain management measures that a community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the Federal Emergency Management Agency's (FEMA's) National Flood Insurance Program (NFIP).

DATES: The date of December 15, 2022 has been established for the FIRM and, where applicable, the supporting FIS report showing the new or modified flood hazard information for each community.

ADDRESSES: The FIRM, and if applicable, the FIS report containing the final flood hazard information for each community is available for inspection at the respective Community Map Repository address listed in the tables below and will be available online through the FEMA Map Service Center at *https://msc.fema.gov* by the date indicated above.

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Mapping and Insurance eXchange (FMIX) online at *https://www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final determinations listed below for the new or modified flood hazard information for each community listed. Notification of these changes has been published in newspapers of local circulation and 90 days have elapsed since that publication. The Deputy Associate Administrator for Insurance and Mitigation has resolved any appeals resulting from this notification.

This final notice is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR part 67. FEMA has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR part 60.

Interested lessees and owners of real property are encouraged to review the new or revised FIRM and FIS report available at the address cited below for each community or online through the FEMA Map Service Center at *https://msc.fema.gov.*

The flood hazard determinations are made final in the watersheds and/or communities listed in the table below.

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2022–0002]

Changes in Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: Notice.

SUMMARY: New or modified Base (1-percent annual chance) Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, and/or regulatory floodways (hereinafter referred to as flood hazard determinations) as shown on the indicated Letter of Map Revision (LOMR) for each of the communities listed in the table below are finalized. Each LOMR revises the Flood Insurance Rate Maps (FIRMs), and in some cases the Flood Insurance Study (FIS) reports, currently in effect for the listed communities.

DATES: Each LOMR was finalized as in the table below.

ADDRESSES: Each LOMR is available for inspection at both the respective Community Map Repository address listed in the table below and online through the FEMA Map Service Center at *https://msc.fema.gov.*

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Mapping and Insurance eXchange (FMIX) online at *https://www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final flood hazard determinations as shown in the LOMRs for each community listed in the table below. Notice of these modified flood hazard determinations has been published in newspapers of local circulation and 90 days have elapsed since that publication. The Deputy Associate Administrator for Insurance and Mitigation has resolved any appeals resulting from this notification.

The modified flood hazard determinations are made pursuant to section 206 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.,* and with 44 CFR part 65. The currently effective community number is shown and must be used for all new policies and renewals.

The new or modified flood hazard information is the basis for the floodplain management measures that the community is required either to adopt or to show evidence of being already in effect in order to remain qualified for participation in the National Flood Insurance Program (NFIP).

This new or modified flood hazard information, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities.

This new or modified flood hazard determinations are used to meet the floodplain management requirements of the NFIP. The changes in flood hazard determinations are in accordance with 44 CFR 65.4.

Interested lessees and owners of real property are encouraged to review the final flood hazard information available at the address cited below for each community or online through the FEMA Map Service Center at *https://msc.fema.gov.*

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7050–N–42]

30-Day Notice of Proposed Information Collection: HUD-Administered Small Cities Program Performance Assessment Report, OMB Control No.: 2506–0020

AGENCY: Office of Policy Development and Research, Chief Data Officer, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below will be submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

DATES: *Comments Due Date:* August 25, 2022.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: HUD Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503; fax: 202–395–5806. Email: *OIRA_Submission@omb.eop.gov.* Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

FOR FURTHER INFORMATION CONTACT: Anna P. Guido, Reports Management Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email her at *Anna.P.Guido@hud.gov* or telephone 202–402–5535. This is not a toll-free number. Copies of available documents submitted to OMB may be obtained from Ms. Guido.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD has submitted to OMB a request for approval of the information collection described in Section A. The **Federal Register** notice that solicited public comment on the information collection for a period of 60 days was published on May 6, 2022, at 87 FR 27180.

A. Overview of Information Collection

Title of Information Collection: HUD-Administered Small Cities Program Performance Assessment Report.

OMB Approval Number: 2506–0020.

Type of Request: Extension of a currently approved collection.

Form Number: HUD–4052.

Description of the need for the information and proposed use: Section 104(e) of the Housing and Community Development Act (HCDA) of 1974 require that each grantee must submit a performance and evaluation report to HUD. An extension without change of a currently approved collection is requested for the annual performance assessment report, submitted by the grantees in the Small Cities program enabling HUD to track program progress.

Information collection	Number of respondents	Frequency of response	Responses per annum	Burden hour per response	Annual burden hours	Hourly cost per response	Annual cost
HUD–4052	40	1.0	40	4.0	160	$43.04	$6,886.40

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) If the information will be processed and used in a timely manner;

(3) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(4) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(5) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses. HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. chapter 35.

Anna P. Guido,

Department Reports Management Officer, Office of the Chief Data Officer.

Bureau of Indian Affairs

[223A2100DD/AAKC001030/ A0A501010.999900]

Indian Gaming; Approval of Tribal-State Class III Gaming Compact in the State of Arizona

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: This Notice publishes the approval of the Yavapai-Prescott Indian Tribe—State of Arizona Amended and Restated Gaming Compact (Compact) and the Agreement to Amend Compact (Amendment) between the Yavapai-Prescott Indian Tribe (Tribe) and the State of Arizona (State).

DATES: The compact and amendment take effect on July 26, 2022.

FOR FURTHER INFORMATION CONTACT: Ms. Paula L. Hart, Director, Office of Indian Gaming, Office of the Deputy Assistant Secretary—Policy and Economic Development, Washington, DC 20240, (202) 219–4066.

SUPPLEMENTARY INFORMATION: Under section 11 of the Indian Gaming Regulatory Act (IGRA), Public Law 100–497, 25 U.S.C. 2701 *et seq.,* the Secretary of the Interior shall publish in the **Federal Register** notice of approved Tribal-State compacts for the purpose of engaging in Class III gaming activities on Indian lands. As required by 25 CFR 293.4, all compacts and amendments are subject to review and approval by the Secretary. The Yavapai-Prescott Indian Tribe and the State of Arizona agreed to the Compact and then to the Amendment. The Compact permits various types of gaming, including video devices, house banked card games, off-track pari-mutuel wagering, dealer controlled electronic games, sports wagering, fantasy sports contests, and live table games on the Tribe's Indian lands. The Compact includes provisions requiring the Tribe to pay the State from the Tribe's net win in exchange for substantial exclusivity in the State and for regulatory costs. The Compact provides that the Tribe will have the responsibility to administer and enforce regulatory requirements. The Amendment clarifies certain definitions and provisions in the Compact. The Compact and the Amendment are approved.

Bryan Newland,

Assistant Secretary—Indian Affairs.

BILLING CODE 4337–15–P

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–IMR–WUPA–32891; PPIMFLAGS2, PPMPSPD1Z.YM]

Determination of Eligibility for Consideration as Wilderness Areas, Wupatki National Monument, Arizona

AGENCY: National Park Service, Interior

ACTION: Notice of Determination of Wilderness Eligibility for Lands in Wupatki National Monument.

SUMMARY: Pursuant to the Wilderness Act of 1964, and in accordance with National Park Service (NPS) Management Policies (2006), Section 6.2.1, the NPS has completed a Wilderness Eligibility Assessment to determine if lands within Wupatki National Monument (Wupatki or monument) meet criteria indicating eligibility for preservation as wilderness.

ADDRESSES: A map of lands assessed is on file at Wupatki National Monument Headquarters, 6400 U.S. 89, Flagstaff, AZ 86004.

FOR FURTHER INFORMATION CONTACT: Acting Superintendent Kristofer Butcher, Flagstaff Area National Monuments, 6400 U.S. 89, Flagstaff, AZ 86004, Telephone: 928–526–1157 or 205–410–3543, email address: *Kristofer_butcher@nps.gov.*

SUPPLEMENTARY INFORMATION: Wupatki National Monument has determined that a significant portion of the lands within the monument are eligible for wilderness designation. Areas determined to be eligible for wilderness designation total 34,194 acres or 96.5% of Wupatki's total 35,424 acres, with the remaining 1,230 acres or 3.5% of total monument acreage determined not eligible for wilderness designation.

Eligible wilderness areas at Wupatki National Monument are subdivided into the following areas:

Eligible Wilderness Area 1: 6,284 acres. This area contains outstanding grassland resources with some juniper savanna in the eastern portions. The landscape is dominated by basalt mesas and offers prime habitat for pronghorn antelope. The area is largely undeveloped and retains most of its primeval character. This area is managed to protect pronghorn habitat and sensitive cultural resources. The western-most portion of this area is affected by the presence of Highway 89 but is still eligible to be designated as wilderness.

Eligible Wilderness Area 2: 21,168 acres. Almost the entire area is undeveloped, with few signs of people and one rarely used administrative road (Crack-in-Rock Road). This area generally appears to be affected primarily by natural forces. The area offers a variety of habitats including pristine grassland, juniper savanna, and cold desert scrub, and is bisected by a prominent geologic feature known as the Doney monocline. The monocline contains deeply incised washes including Antelope Wash, and outstanding views of the Painted Desert, Little Colorado River valley to the north and east, and the San Francisco Peaks to the south. Spectacular features found in this area include red formations of Moenkopi sandstone and areas such as Deadman Wash, which extends from well south of the monument around the north side of the San Francisco Peaks, all the way to the Little Colorado River.

Eligible Wilderness Area 3: 1,929 acres. This area surrounds Wupatki

National Monument's primary interpretive feature, the Visitor Center, and the housing area. Some development has occurred within this area to support monument operations; however, it is confined to the Wupatki Visitor Center area and on top of the Woodhouse Mesa. One above ground utility line runs to Woodhouse Mesa, however, as the monument strives to become more energy efficient and self-sufficient, it will pursue removing the above ground line. The rest of the area consists of Doney Mountain and Deadman Wash. Although this wilderness area is less than 5,000 acres, this area can be managed as wilderness because the landscape is homogenous with the surrounding eligible wilderness areas but is bisected by the primary road that goes through Wupatki. This area has many locations not affected by modern development and the potential for seclusion exists in this area. The area outside of the administrative zones is undeveloped and is affected primarily by natural forces.

Eligible Wilderness Area 4: 4,813 acres. This area contains outstanding Moenkopi sandstone outcrops and deep washes. The landscape is dominated by basalt mesas and offers prime locations for isolation and quiet. The area is largely undeveloped and retains most of its primeval character except for an interpretive pueblo site with associated parking area and access road (Wukoki Pueblo), a small administrative area used for maintenance activities (New Heiser) and a special use permit residence with associated road access. At the expiration of the special use permit for the residence, the area will be rehabilitated to restore natural conditions.

In accordance with NPS Management Policies (2006), Section 6.2.2, Wupatki National Monument will prepare a wilderness study to determine if any portions of the monument should be recommended for inclusion in the National Wilderness Preservation System as defined in the Wilderness Act of 1964.

Charles F. Sams, III,

Director, National Park Service.

BILLING CODE 4312–52–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–718 (Fifth Review)]

Glycine From China; Scheduling of Expedited Five-Year Review

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice of the scheduling of an expedited review pursuant to the Tariff Act of 1930 (''the Act'') to determine whether revocation of the antidumping duty order on glycine from China would be likely to lead to continuation or recurrence of material injury within a reasonably foreseeable time.

DATES: April 8, 2022.

FOR FURTHER INFORMATION CONTACT: Tyler Berard (202–205–3354), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for this review may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION:

Background.—On April 8, 2022, the Commission determined that the domestic interested party group response to its notice of institution (87 FR 112, January 3, 2022) of the subject five-year review was adequate and that the respondent interested party group response was inadequate. The Commission did not find any other circumstances that would warrant conducting a full review.[1] Accordingly, the Commission determined that it would conduct an expedited review pursuant to section 751(c)(3) of the Tariff Act of 1930 (19 U.S.C. 1675(c)(3)).

For further information concerning the conduct of this review and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A, D, E, and F (19 CFR part 207).

Please note the Secretary's Office will accept only electronic filings at this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov*). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

Staff report.—A staff report containing information concerning the subject matter of the review has been placed in the nonpublic record, and will be made available to persons on the Administrative Protective Order service list for this review on July 21, 2022. A public version will be issued thereafter, pursuant to section 207.62(d)(4) of the Commission's rules.

Written submissions.—As provided in section 207.62(d) of the Commission's rules, interested parties that are parties to the review and that have provided individually adequate responses to the notice of institution,[2] and any party other than an interested party to the review may file written comments with the Secretary on what determinations the Commission should reach in the review. Comments are due on or before July 28, 2022 and may not contain new factual information. Any person that is neither a party to the five-year review nor an interested party may submit a brief written statement (which shall not contain any new factual information) pertinent to the review by July 28, 2022. However, should the Department of Commerce (''Commerce'') extend the time limit for its completion of the final results of its review, the deadline for comments (which may not contain new factual information) on Commerce's final results is three business days after the issuance of Commerce's results. If comments contain business proprietary information (BPI), they must conform with the requirements of sections 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures,* available on the Commission's website at *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf,* elaborates upon the Commission's procedures with respect to filings.

In accordance with sections 201.16(c) and 207.3 of the rules, each document filed by a party to the review must be served on all other parties to the review (as identified by either the public or BPI

[1] A record of the Commissioners' votes is available from the Office of the Secretary and at the Commission's website.

[2] The Commission has found the response to its notice of institution filed on behalf of GEO Specialty Chemicals, Inc., a domestic producer of glycine, to be individually adequate. Comments from other interested parties will not be accepted (*see* 19 CFR 207.62(d)(2)).

service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Determination.—The Commission has determined this review is extraordinarily complicated and therefore has determined to exercise its authority to extend the review period by up to 90 days pursuant to 19 U.S.C. 1675(c)(5)(B).

Authority: This review is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to section 207.62 of the Commission's rules.

By order of the Commission.

Issued: July 20, 2022.

Katherine M. Hiner,

Acting Secretary to the Commission.

[FR Doc. 2022–15936 Filed 7–25–22; 8:45 am]

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1260]

Certain Toner Supply Containers and Components Thereof (II); Notice of Commission Final Determination Finding a Violation of Section 337; Issuance of a General Exclusion Order and Cease and Desist Orders; Termination of the Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission (''Commission'') has found a violation of section 337 of the Tariff Act of 1930, as amended, in this investigation and has issued a general exclusion order (''GEO'') prohibiting the importation of certain infringing toner supply containers and components thereof, as well as cease and desist orders (''CDOs'') against certain defaulting respondents. The investigation is terminated.

FOR FURTHER INFORMATION CONTACT: Lynde Herzbach, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–3228. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal, telephone (202) 205–1810.

SUPPLEMENTARY INFORMATION: On April 13, 2021, the Commission instituted this investigation based on a complaint filed by Canon Inc. of Tokyo, Japan; Canon U.S.A., Inc. of Melville, New York; and Canon Virginia, Inc. of Newport News, Virginia (collectively, ''Canon''). 86 FR 19287–88 (Apr. 13, 2021). The complaint, as supplemented, alleges violations of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337) (''section 337''), based on the importation into the United States, the sale for importation, and the sale within the United States after importation of certain toner supply containers and components thereof by reason of infringement of certain claims of thirteen patents: U.S. Patent Nos. 10,209,667; 10,289,060; 10,289,061; 10,295,957; 10,488,814; 10,496,032; 10,496,033; 10,514,654; 10,520,881; 10,520,882; 8,565,649 (''the '649 patent''); 9,354,551 (''the '551 patent''); and 9,753,402 (''the '402 patent''). *Id.* at 19287. The complaint further alleges that a domestic industry (''DI'') exists. *Id.*

The Commission instituted two separate investigations based on the complaint and defined the scope of the present investigation as whether there is a violation of section 337 based on the allegations of infringement as to the asserted claims of the '649, '551, and '402 patents (collectively, ''the Asserted Patents'') as to the accused products identified in the notice of investigation (''NOI''). *Id.* The NOI named eleven respondents: (1) Sichuan XingDian Technology Co., Ltd. (''Sichuan Xing Dian'') of Sichuan, China; (2) Sichuan Wiztoner Technology Co., Ltd. (''Sichuan Wiztoner'') of Sichuan, China; (3) Anhuiyatengshangmaoyou xiangongsi (''Yatengshang'') of Ganyuqu, China; (4) ChengDuXiang ChangNanShiYouSheBeiYouXianGong Si (''ChengDuXiang'') of SiChuanSheng, China; (5) Digital Marketing Corporation d/b/a Digital Buyer Marketing Company (''Digital Buyer'') of Los Angeles, California; (6) Do It Wiser, LLC d/b/a Image Toner of Wilmington, Delaware; (7) Hefeierlandianzishangwuyouxian gongsi (''Erlandianzishang'') of Chengdushi, China; (8) MITOCOLOR INC. (''TopInk'') of Rowland Heights, California; (9) Xianshi yanliangqu canqiubaihuodianshanghang of Shanxisheng, China; (10) Zhuhai Henyun Image Co., Ltd. of Zhuhai, China (collectively, the ''Defaulting Respondents''); and (11) Shenzhenshi Keluodeng Kejiyouxiangognsi (''KenoGen'') of Guangdong, China. *Id.* The Office of Unfair Import Investigations (''OUII'') is also named as a party. *Id.* at 19287–88. The Commission's determination in Inv. No. 337–TA–1259 will separately address any violation of section 337 based on infringement of the asserted claims of the remaining patents in Canon's complaint. *See* 86 FR 19284–86 (Apr. 13, 2021).

On May 27, 2021, the Commission granted Canon's motion to amend the complaint and NOI to change the identification of Do It Wiser, LLC d/b/a Image Toner to Do It Wiser, Inc. d/b/a Image Toner (hereinafter, ''Do It Wiser'') and to make related changes in paragraph 31 of the complaint. Order No. 6 (May 17, 2021), *unreviewed by* 86 FR 29806–07 (June 3, 2021).

On September 7, 2021, the Commission terminated the following asserted claims from the investigation based on Canon's withdrawal of the complaint as to those claims: (i) claim 2 of the '649 patent; (ii) claims 2, 3, 6, and 7 of the '551 patent; and (iii) claims 25–27, 39–41, and 46 of the '402 patent. Order No. 10 (Aug. 12, 2021), *unreviewed by* Comm'n Notice (Sept. 7, 2021).

Also on September 7, 2021, the Commission terminated respondent KenoGen from the investigation based on Canon's withdrawal of the complaint as to KenoGen. Order No. 12 (Aug. 13, 2021), *unreviewed by* Comm'n Notice (Sept. 7, 2021). As a result, the ten Defaulting Respondents are the only respondents remaining in this investigation.

On October 29, 2021, the Commission found the Defaulting Respondents in default for failing to respond to the complaint and NOI and failing to show cause why they should not be found in default. Order No. 15 (Sept. 29, 2021), *unreviewed by* Comm'n Notice (Oct. 29, 2021).

On October 1, 2021, Canon filed a motion seeking summary determination that the Defaulting Respondents have violated section 337 and requesting a recommendation that the Commission issue a general exclusion order (''GEO''), issue cease and desist orders (''CDOs'') against certain respondents, and set a one hundred percent (100%) bond for any importations of infringing goods during the period of Presidential review. On October 25, 2021, OUII filed a response supporting Canon's motion and requested remedial relief. No Defaulting Respondent filed a response to Canon's motion.

On February 11, 2022, the presiding Chief Administrative Law Judge (''CALJ'') issued an initial determination (''ID'') granting Canon's motion and finding violations of section 337 by the Defaulting Respondents. Specifically, the ID finds that: (i) the Commission has subject matter, personal, and in rem jurisdiction in this investigation; (ii) Canon has standing to assert the Asserted Patents; (iii) Canon has satisfied the importation requirement as to all Defaulting Respondents; (iv) the accused products practice claims 1, 6, 7, 12, 25, and 26 of the '649 patent, claims 1, 4, and 5 of the '551 patent, and claims 1, 15–18, 32, 36, and 37 of the '402 patent; (v) Canon has satisfied the technical prong of the DI requirement with respect to the Asserted Patents; (vi) Canon has satisfied the economic prong of the DI requirement with respect to the Asserted Patents; and (vii) no claim of the Asserted Patents has been shown invalid. The CALJ's recommended determination on remedy and bonding recommended that the Commission: (i) issue a GEO; (ii) issue CDOs against eight respondents (*i.e.,* Digital Buyer, Do It Wiser, TopInk, Sichuan XingDian, Sichuan Wiztoner, Yatengshang, ChengDuXiang, and Erlandianzishang); and (iii) set a 100 percent bond for any importations of infringing products during the period of Presidential review. No party petitioned for review of the subject ID.

The Commission did not receive any submissions on the public interest from the parties pursuant to Commission Rule 210.50(a)(4) (19 CFR 210.50(a)(4)). The Commission also did not receive any submissions on the public interest from members of the public in response to the Commission's **Federal Register** notice. 87 FR 9379–80 (Feb. 18, 2022).

On March 30, 2022, the Commission determined to review the ID in part. 87 FR 19707–09 (Apr. 5, 2022). Specifically, the Commission determined to review the ID's analysis of the economic prong of DI requirement. *Id.* The Commission further requested briefing on remedy, bonding, and the public interest. *Id.*

On April 13, 2022, Canon and OUII filed their initial written responses to the Commission's request for briefing. On April 10, 2021, Canon and OUII filed reply submissions.

Having reviewed the record of the investigation, including the ID and Canon's and OUII's submissions, the Commission has found a violation of section 337 with respect to Defaulting Respondents. The Commission affirms, with modified analysis, the ID's findings that the economic prong of the DI requirement has been satisfied under section 337(a)(3)(A) and (B). *See* 19 U.S.C. 1337(a)(3)(A), (B). (Commissioner Kearns finds the economic prong satisfied under section 337(a)(3)(A) and takes no position with respect to section 337(a)(3)(B)). (Commissioner Stayin writes separately, but joins the Commission's determination that the economic prong of the DI requirement has been satisfied under section 337(a)(3)(A) and (B).) The Commission also corrects two typographical errors on pages 50 and 58 of the ID, as explained in the Commission's opinion.

Moreover, the Commission finds that the statutory requirements for issuance of a GEO under section 337(g)(2) are met. *See* 19 U.S.C. 1337(g)(2). The Commission also finds it appropriate to issue CDOs against Digital Buyer, Do It Wiser, TopInk, Sichuan XingDian, Sichuan Wiztoner, Yatengshang, ChengDuXiang, and Erlandianzishang. *See* 19 U.S.C. 1337(g)(1). In addition, the Commission finds that the public interest factors do not preclude issuance of the requested relief. *See* 19 U.S.C. 1337(g)(1).

The Commission therefore has determined that the appropriate remedy in this investigation is: (1) a GEO prohibiting the unlicensed entry of certain toner supply containers and components thereof that infringe one or more of claims 1, 6, 7, 12, 25, and 26 of the '649 patent; claims 1, 4, and 5 of the '551 patent; or claims 1, 15, 16, 17, 18, 32, 36, and 37 of the '402 patent; and (2) CDOs against Digital Buyer, Do It Wiser, TopInk, Sichuan XingDian, Sichuan Wiztoner, Yatengshang, ChengDuXiang, and Erlandianzishang. The Commission has also determined that the bond during the period of Presidential review shall be in the amount of 100 percent of the entered value of the Accused Products that are subject to the GEO and CDOs. *See* 19 U.S.C. 1337(j).

The Commission's reasoning in support of its determinations is set forth more fully in its opinion. The Commission's opinion and orders were delivered to the President and to the United States Trade Representative on the day of their issuance. The investigation is terminated.

While temporary remote operating procedures are in place in response to COVID–19, the Office of the Secretary is not able to serve parties that have not retained counsel or otherwise provided a point of contact for electronic service. Accordingly, pursuant to Commission Rules 201.16(a) and 210.7(a)(1) (19 CFR 201.16(a), 210.7(a)(1)), the Commission orders that the Complainant complete service for any party without a method of electronic service noted on the attached Certificate of Service and shall file proof of service on the Electronic Document Information System (EDIS).

The Commission vote for this determination took place on July 20, 2022.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in Part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: July 20, 2022.

Katherine Hiner,

Acting Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Toxic Substances Control Act

On July 19, 2022, the Department of Justice lodged a proposed Consent Decree (the ''Consent Decree'') with the District Court of the Southern District of New York in a lawsuit entitled *United States of America* v. *CISNE NY Construction, Inc., et al.,* Civil Action No. 22–338.

In this action, the United States seeks, as provided under Toxic Substances Control Act (''TSCA''), injunctive relief from Edison Ruilova and CISNE Contracting, Inc., among others, in connection with the defendants' unlawful work practices during renovations governed by an implementing regulation of the TSCA—the Renovation, Repair, and Painting Rule, 40 CFR part 745 (the ''RRP Rule''). The proposed settlement resolves the United States' claims against two of five defendants, requires Edison Ruilova and CISNE Contracting, Inc. to pay $25,000, and imposes injunctive relief. The injunctive relief required of the settling defendants mandates ongoing compliance with the RRP Rule, completion of an RRP Checklist at all worksites, and notification of EPA in advance of projects that implicate the RRP Rule.

The publication of this notice opens the public comment on the proposed settlement. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States of America* v. *CISNE NY Construction, Inc.,* DJ #90–5–2–1–12386. All comments must be submitted no later than 30 days after the

publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	Send them to:
By email	*pubcomment-ees.enrd@usdoj.gov.*
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

During the public comment period, the settlement may be examined and downloaded at this Justice Department website: *http://www.usdoj.gov/enrd/Consent_Decrees.html.* We will provide a paper copy of the settlement upon written request and payment of reproduction costs. Please email your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Please enclose a check or money order for $11.75 (25 cents per page reproduction cost) payable to the United States Treasury.

Susan M. Akers,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–P

DEPARTMENT OF LABOR

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Reemployment Services and Eligibility Assessment Program

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Employment and Training Administration (ETA)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that the agency receives on or before August 25, 2022.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) if the information will be processed and used in a timely manner; (3) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (4) ways to enhance the quality, utility and clarity of the information collection; and (5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

FOR FURTHER INFORMATION CONTACT: Mara Blumenthal by telephone at 202–693–8538, or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: The authority to implement this reporting requirement is found in the Social Security Act (SSA) section 303(a)(6), 42 U.S.C. 503(a)(6), which requires that state law include provision for: ''the making of such reports, in such form and containing such information, as the Secretary of Labor may from time-to-time require, and compliance with such provisions as the Secretary of Labor may from time- to-time find necessary to assure the correctness and verification of such reports.'' The Secretary interprets section 303(a)(6) of the SSA to authorize DOL to prescribe standard definitions, methods and procedures, and reporting requirements for the collection of information on benefit payment accuracy and the reemployment of Unemployment Insurance (UI) benefit recipients and to ensure accuracy and verification of these data. This information is collected through Forms ETA 9128 (Reemployment and Eligibility Assessment Workload) and ETA 9129 (Reemployment Services and Eligibility Assessment Outcomes). For additional substantive information about this ICR, see the related notice published in the **Federal Register** on November 23, 2021 (86 FR 66593).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Agency: DOL–ETA.

Title of Collection: Reemployment Services and Eligibility Assessment Program.

OMB Control Number: 1205–0456.

Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Respondents: 53.

Total Estimated Number of Responses: 424.

Total Estimated Annual Time Burden: 1,234 hours.

Total Estimated Annual Other Costs Burden: $0.

(Authority: 44 U.S.C. 3507(a)(1)(D))

Dated: July 20, 2022.

DEPARTMENT OF LABOR

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Unemployment Insurance Data Validation Program

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Employment and Training Administration (ETA)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that the agency receives on or before August 25, 2022.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open

for Public Comments'' or by using the search function.

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) if the information will be processed and used in a timely manner; (3) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (4) ways to enhance the quality, utility and clarity of the information collection; and (5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

FOR FURTHER INFORMATION CONTACT: Mara Blumenthal by telephone at 202–693–8538, or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: The Unemployment Insurance Data Validation Program requires States to operate a system for ascertaining the validity of specified unemployment insurance data they submit to the Employment and Training Administration on certain reports they are required to submit monthly or quarterly. Some of these data are used to assess performance, including for the Government Performance and Results Act of 1993 (GPRA), or determine States' grants for UI administration. This information collection is authorized by Section 303(a)(6) of the Social Security Act. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on January 24, 2022 (87 FR 3588).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. FOR FURTHER INFORMATION CONTACT: Nicole Bouchet by telephone at 202–693–0213, or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: The Chief Evaluation Office (CEO) in DOL has commissioned an evaluation of the Pathway Home grant program. The program aims to improve the ability of people in the justice system to find meaningful employment and avoid repeat involvement in the criminal justice system. The Evaluation of the Pathway Home Grant Program (Pathway Home Evaluation) offers a unique opportunity to build knowledge about the implementation and effectiveness of these programs. CEO contracted with Mathematica and its subcontractors, Social Policy Research Associates and the Council of State Governments Justice Center, to conduct an implementation and impact study. This information collection request seeks OMB clearance for new data collection for the Pathway Home Evaluation. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on November 4, 2021 (86 FR 60917).

This information collection is subject to the PRA. DEPARTMENT OF LABOR

Agency Information Collection Activities; The 1,2-Dibromo-3-Chloropropane Standard

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Occupational Safety & Health Administration (OSHA)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that the agency receives on or before August 25, 2022.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

FOR FURTHER INFORMATION CONTACT: Nicole Bouchet by telephone at 202–693–0213, or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: The standard requires employers to train workers about the hazards of 1,2-Dibromo-3-Chloropropane (DBCP), to monitor worker exposure, to provide medical surveillance, and maintain accurate records of worker exposure to DBCP. These records will be used by employers, workers, physicians and the Government to ensure that workers are not harmed by exposure to DBCP in the workplace. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on May 20, 2022 (87 FR 31000).

MILLENNIUM CHALLENGE CORPORATION

[MCC FR 22–09]

Notice of Entering Into a Compact With the Democratic Republic of Timor-Leste

AGENCY: Millennium Challenge Corporation.

ACTION: Notice.

SUMMARY: In accordance with the provisions of the Millennium Challenge Act of 2003, as amended, the Millennium Challenge Corporation (MCC) is publishing a summary of the Millennium Challenge Compact (Compact) between the United States of America, acting through MCC, and the Democratic Republic of Timor-Leste (Timor-Leste). Representatives of MCC and Timor-Leste signed the Compact on July 19, 2022. The complete text of the Compact has been posted at: *https://assets.mcc.gov/content/uploads/compact-timor-leste.pdf.*

(Authority: 22 U.S.C. 7709(b)(3))

Dated: July 21, 2022.

Thomas G. Hohenthaner,

Acting VP/General Counsel and Corporate Secretary.

Summary of Timor-Leste Compact

Overview of the MCC Timor-Leste Compact

MCC's five-year Compact with the Democratic Republic of Timor-Leste in the amount of $420 million aims to reduce poverty through economic growth. The Compact seeks to assist Timor-Leste in addressing the human capital constraint to economic growth through two primary projects: the Water, Sanitation, and Drainage (''WSD'') Project and the Teaching and Leading the Next generation of Timorese (''TALENT'') Project.

Project Summaries

The projects and activities to be completed are:

1. Water, Sanitation, and Drainage Project

The primary objective of the WSD Project is to reduce fecal pathogens in piped and stored drinking water and groundwater. The project aims to mitigate exposure to sanitary waste and pathogens in water, households, and the environment through investments in infrastructure, policy and institutional reform, and social and behavior change. The project will focus its interventions in the capital city of Dili and four nearby municipalities (Aileu, Ermera, Liquica, and Manatuto). Specifically, the WSD Project will support the following activities:

- *Activity 1: Water Disinfection.* This activity will supply disinfected water to Dili and the four municipalities of Timor-Leste through the design and construction of an onsite sodium hypochlorite generation plant.
- *Activity 2: Sanitation.* This activity includes the design and construction of a new wastewater treatment plant, an ocean outfall, wastewater collection systems, and wastewater connections to households and businesses.

• *Activity 3: Associated Drainage.* This activity supports the implementation of the sanitary sewer system described in the Sanitation Activity through the construction of in-street drainage infrastructure in areas where conflicts with sewer lines would otherwise occur.

• *Activity 4: Institutional Reform.* To ensure long-term sustainability of the WSD Project's infrastructure investments, this activity will support the capacity building and institutional development of Timor-Leste's independent public water utility with a focus on strengthening asset management expertise and operations and maintenance capacity. The activity will further promote sustainability through targeted assistance to Timor-Leste's independent water regulator to develop and implement regulations and public awareness around sanitation and disinfection.

• *Activity 5: Household Water and Hygiene.* This social and behavior change activity includes interventions to increase household and community awareness of the benefits of, and support for, the construction and maintenance of household sanitation units as well as the adoption and maintenance of key behaviors to secure sustained community buy-in for household sanitation infrastructure

2. Teaching and Leading the Next Generation of Timorese Project

The primary objective of the TALENT Project is to improve student learning outcomes. To achieve this objective, the project will invest in teacher and school leader education and training, which are critical to improving student learning. The project will establish the Center of Excellence and improve the pedagogical and leadership skills of existing and future secondary school teachers and leaders through the development and deployment of targeted trainings. Future teachers and a subset of existing teachers will receive professional certification through the Center of Excellence during the life of the Compact. Ultimately, it is expected that all secondary teachers will be required to have Center of Excellence certification in order to be eligible for employment in a government secondary school in Timor-Leste. The project will employ a gender-responsive approach in all activities and place a concerted focus on increasing the number of women as teachers and school leaders in secondary schools through a dedicated sub-activity. Specifically, the TALENT Project will support the following activities:

• *Activity 1: Center of Excellence.* This activity will establish a new autonomous institution in Timor-Leste to provide professional training and certification to future secondary teachers entering the workforce, as well as training and certification of a portion of current secondary teachers.

• *Activity 2: Teacher Training.* This activity involves the development of curriculum, materials, and faculty to train current and future teachers to improve their pedagogical skills that lead to improvements in numeracy, literacy, and soft skills. It also includes the professional certification of all newly trained secondary teachers and a subset of current teachers.

• *Activity 3: School Leadership Training.* This activity will support the training of school leaders to create effective schools through strong school leadership, both in school management and in terms of instructional leadership. It includes the development of curriculum and training materials and the delivery of trainings to current and future school leaders. Training will focus on competencies in school leadership, including gender and social inclusion and information communications technology in education.

• *Activity 4: Ensuring Excellence.* This activity ensures accessibility and quality of all activities carried out under the Center of Excellence. It includes support for quality assurance and monitoring, information and communication technology, and language needs, as well as a specific sub-activity focused on increasing the number of women in teaching and leadership positions in secondary schools.

Compact Budget

The Compact budget is up to $484,000,000, which includes up to $420,000,000 funded by MCC and a contribution from Timor-Leste of $64,000,000.

TABLE 1—TIMOR-LESTE COMPACT BUDGET

Project/activity	Budget (US$)
Water, Sanitation, and Drainage Project	308,205,050
Activity 1: Water Disinfection	8,270,509
Activity 2: Sanitation	278,846,498
Activity 3: Associated Drainage	8,938,044
Activity 4: Institutional Reform	6,950,000
Activity 5: Household Water and Hygiene	5,200,000
Teaching and Leading the Next generation of Timorese Project	40,190,538
Activity 1: Center of Excellence	14,599,454
Activity 2: Teacher Training	14,664,142
Activity 3: School Leadership Training	5,039,535
Activity 4: Ensuring Excellence	5,887,407
Monitoring and Evaluation	6,800,000
Program Administration	64,804,412
Total MCC Funding	420,000,000
Total Government Contribution	64,000,000
Total Program	484,000,000

NATIONAL SCIENCE FOUNDATION

Sunshine Act Meetings

The National Science Board's (NSB) Committee on Oversight hereby gives notice of the scheduling of a teleconference for the transaction of National Science Board business pursuant to the National Science Foundation Act and the Government in the Sunshine Act.

TIME AND DATE: Friday, July 29, 2022, from 1:00–2:00 p.m. EDT.

PLACE: This meeting will be held by video conference through the National Science Foundation.

STATUS: Open.

MATTERS TO BE CONSIDERED: The agenda of the teleconference is: Committee Chair's opening remarks, including review of pillars for action in the 2022–2024 term; discussion of demographic data collection; Office of the Inspector General report; Chief Financial Officer report; and Committee Chair's closing remarks.

CONTACT PERSON FOR MORE INFORMATION: Point of contact for this meeting is: (Chris Blair, *cblair@nsf.gov*), 703/292–7000. Members of the public can observe this meeting through a You Tube livestream. Access the livestream at *https://youtu.be/dJFgYVVao2I.*

Chris Blair,

Executive Assistant to the National Science Board Office.

BILLING CODE 7555–01–P

NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Comment Request

AGENCY: National Science Foundation.

ACTION: Submission for OMB review; comment request.

SUMMARY: The National Science Foundation (NSF) has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1995. This is the second notice for public comment; the first was published in the **Federal Register**, and no comments were received. NSF is forwarding the proposed submission to the Office of Management and Budget (OMB) for clearance simultaneously with the publication of this second notice.

DATES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAmain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314, or send email to *splimpto@nsf.gov.* Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including federal holidays).

Comments: Comments regarding (a) whether the proposed collection of information is necessary for the proper performance of the functions of the NSF, including whether the information shall have practical utility; (b) the accuracy of the NSF's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, use, and clarity of the information on respondents; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to the points of contact in the **FOR FURTHER INFORMATION CONTACT** section.

Copies of the submission may be obtained by calling 703–292–7556. NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number, and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

SUPPLEMENTARY INFORMATION:

Title of Collection: NCSES Generic Clearance for Improvement Projects.

OMB Number: 3145–0174.

Abstract: Established within the National Science Foundation by the America COMPETES Reauthorization Act of 2010 § 505, codified in the National Science Foundation Act of 1950, as amended, the National Center for Science and Engineering Statistics (NCSES)—one of 13 principal federal statistical agencies—serves as a central Federal clearinghouse for the collection, interpretation, analysis, and dissemination of objective data on science, engineering, technology, research and development for use by practitioners, researchers, policymakers, and the public. NCSES conducts about a dozen nationally representative surveys to obtain the data for these purposes. The Generic Clearance will be used to ensure that the highest quality data are obtained from these surveys. State of the art methodology will be used to develop, evaluate, and test questionnaires and survey concepts as well as to research and improve survey and statistical methodologies. This may include field or pilot tests of questions for future large-scale surveys, as needed. The Generic Clearance will also be used to test and evaluate data dissemination tools and methods in an effort to improve access for data users.

Use of the Information: The purpose of these studies is to use the latest and most appropriate methodology to improve NCSES surveys, evaluate new data collection efforts, and evaluate data dissemination tools and mechanisms. Methodological findings may be presented externally. Improved NCSES surveys, data collections, and data dissemination will help policymakers in decisions on research and development funding, graduate education, and the scientific and engineering workforce, as well as contributing to reduced survey costs.

Expected Respondents: The respondents will be from industry, academia, nonprofit organizations, members of the public, and State, local, and Federal governments. Respondents will be either individuals or institutions, depending on the topic under investigation. NCSES expects to use both qualitative and quantitative procedures, in various modes (*e.g.,* in-person, telephone, web). Up to 28,515 respondents will be contacted across all projects. No respondent will be contacted more than twice in one year under this generic clearance. Every effort will be made to use technology to limit the burden on respondents from small entities.

Estimate of Burden: NCSES estimates that a total reporting and recordkeeping burden of 11,500 hours will result from activities to improve its survey collections and data dissemination tools. The calculation is shown in Table 1.

TABLE 1—POTENTIAL SURVEYS FOR IMPROVEMENT PROJECTS, WITH THE NUMBER OF RESPONDENTS AND BURDEN HOURS

Survey or information collection	2022–25 number of respondents	2022–25 number of hours
Survey of Doctorate Recipients	5000	1100
Survey of Earned Doctorates	2500	945
National Training, Education, and Workforce Survey	660	400
Other surveys of the science and engineering workforce	1250	550
Higher Education Research & Development Survey	450	350
Federally Funded Research & Development Centers (FFRDC) Survey	80	100
State Government Research & Development Survey	150	225
Survey of Nonprofit Research Activities	200	200
Business Enterprise Research & Development Survey	50	150
Survey of Scientific & Engineering Facilities	300	200
Public Perceptions of Science	1100	180
Data dissemination tools and mechanisms	3100	800
Projects conducted under the NCSES Broad Agency Announcement (BAA)	3675	3300
Other surveys and projects not specified	10000	3000
Total	28515	11500

Dated: July 20, 2022.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

NUCLEAR REGULATORY COMMISSION

[NRC–2022–0001]

Sunshine Act Meetings

TIME AND DATE: Weeks of July 25, August 1, 8, 15, 22, 29, 2022. The schedule for Commission meetings is subject to change on short notice. The NRC Commission Meeting Schedule can be found on the internet at: *https://www.nrc.gov/public-involve/public-meetings/schedule.html.*

PLACE: The NRC provides reasonable accommodation to individuals with disabilities where appropriate. If you need a reasonable accommodation to participate in these public meetings or need this meeting notice or the transcript or other information from the public meetings in another format (*e.g.,* braille, large print), please notify Anne Silk, NRC Disability Program Specialist, at 301–287–0745, by videophone at 240–428–3217, or by email at *Anne.Silk@nrc.gov.* Determinations on requests for reasonable accommodation will be made on a case-by-case basis.

STATUS: Public.

Members of the public may request to receive the information in these notices electronically. If you would like to be added to the distribution, please contact the Nuclear Regulatory Commission, Office of the Secretary, Washington, DC 20555, at 301–415–1969, or by email at *Wendy.Moore@nrc.gov* or *Betty.Thweatt@nrc.gov.*

MATTERS TO BE CONSIDERED:

Week of July 25, 2022

There are no meetings scheduled for the week of July 25, 2022.

Week of August 1, 2022—Tentative

There are no meetings scheduled for the week of August 1, 2022.

Week of August 8, 2022—Tentative

There are no meetings scheduled for the week of August 8, 2022.

Week of August 15, 2022—Tentative

There are no meetings scheduled for the week of August 15, 2022.

Week of August 22, 2022—Tentative

There are no meetings scheduled for the week of August 22, 2022.

Week of August 29, 2022—Tentative

There are no meetings scheduled for the week of August 29, 2022.

CONTACT PERSON FOR MORE INFORMATION: For more information or to verify the status of meetings, contact Wesley Held at 301–287–3591 or via email at *Wesley.Held@nrc.gov.*

The NRC is holding the meetings under the authority of the Government in the Sunshine Act, 5 U.S.C. 552b.

Dated: July 21, 2022.

For the Nuclear Regulatory Commission.

Wesley W. Held,

Policy Coordinator, Office of the Secretary.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–250 and 50–251; NRC–2018–0074]

Florida Power & Light Company; Turkey Point Nuclear Generating Unit Nos. 3 and 4

AGENCY: Nuclear Regulatory Commission.

ACTION: Subsequent license renewal environmental report supplement; receipt.

SUMMARY: In response to the U.S. Nuclear Regulatory Commission's (NRC) Memorandum and Order, CLI–22–03 (February 24, 2022), the NRC received Environmental Report, Supplement 2, related to the subsequent renewal of Renewed Facility Operating License Nos. DPR–31 and DPR–41, which authorize Florida Power & Light Company (FPL, the applicant) to operate Turkey Point Nuclear Generating (Turkey Point) Unit Nos. 3 and 4. The Environmental Report, Supplement 2, addresses certain environmental impacts of operating Turkey Point for an additional period of 20 years beyond those dates. The NRC is currently reviewing the acceptability of the tendered Environmental Report, Supplement 2, for docketing.

DATES: The subsequent license renewal submittal referenced in this document was available on June 21, 2022.

ADDRESSES: Please refer to Docket ID NRC–2018–0074 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

• *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2018–0074. Address questions about Docket IDs to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

• *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.

• *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8:00 a.m. and 4:00 p.m. Eastern Time (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Tam Tran, Office of Nuclear Materials Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–3617, email: *Tam.Tran@nrc.gov.*

SUPPLEMENTARY INFORMATION: The NRC has received an Environmental Report, Supplement 2, (ML22160A301) from Florida Power & Light Company, dated June 9, 2022, related to the subsequent renewal of the operating licenses for Turkey Point. The current subsequently renewed operating licenses for Turkey Point Unit Nos. 3 and 4 expire on July 19, 2032, and April 10, 2033, respectively. The Turkey Point units are Pressurized Water Reactors located in Homestead, Miami-Dade County, Florida. The acceptability for docketing of the tendered supplement to the Environmental Report will be the subject of subsequent **Federal Register** notices. A copy of the subsequent license renewal Environmental Report, Supplement 2, for Turkey Point, is also available for inspection near the site, at the Naranja Branch Library, 14850 SW 280 Street, Homestead, Florida 33032.

Dated: July 20, 2022.

For the Nuclear Regulatory Commission.

John M. Moses,

Deputy Director, Division of Rulemaking, Environmental, and Financial Support, Office of Nuclear Materials, Safety and Safeguards.

BILLING CODE 7590–01–P

OFFICE OF PERSONNEL MANAGEMENT

Excepted Service

AGENCY: U.S. Office of Personnel Management (OPM).

ACTION: Notice.

SUMMARY: This notice identifies Schedule A, B, and C appointing authorities applicable to a single agency that were established or revoked from August 1, 2019 to August 31, 2019.

FOR FURTHER INFORMATION CONTACT: Julia Alford, Senior Executive Resources Services, Senior Executive Services and Performance Management, Employee Services, 202–606–2246.

SUPPLEMENTARY INFORMATION: In accordance with 5 CFR 213.103, Schedule A, B, and C appointing authorities available for use by all agencies are codified in the Code of Federal Regulations (CFR). Schedule A, B, and C appointing authorities applicable to a single agency are not codified in the CFR, but the Office of Personnel Management (OPM) publishes a notice of agency-specific authorities established or revoked each month in the **Federal Register** at *www.gpo.gov/fdsys/.* OPM also publishes an annual notice of the consolidated listing of all Schedule A, B, and C appointing authorities, current as of June 30, in the **Federal Register**.

Schedule A

No Schedule A Authorities to report during August 2019.

Schedule B

No Schedule B Authorities to report during August 2019.

Schedule C

The following Schedule C appointing authorities were approved during August 2019.

Agency name	Organization name	Position title	Authorization No.	Effective date
DEPARTMENT OF AGRICULTURE	Office of the Under Secretary for Rural Development.	Confidential Assistant	DA190188	08/16/2019

OFFICE OF PERSONNEL MANAGEMENT

Excepted Service

AGENCY: Office of Personnel Management (OPM).

ACTION: Notice.

SUMMARY: This notice identifies Schedule A, B, and C appointing authorities applicable to a single agency that were established or revoked from November 1, 2021 to November 30, 2021.

FOR FURTHER INFORMATION CONTACT: Julia Alford, Senior Executive Resources Services, Senior Executive Services and Performance Management, Employee Services, 202–606–2246.

SUPPLEMENTARY INFORMATION: In accordance with 5 CFR 213.103, Schedule A, B, and C appointing authorities available for use by all agencies are codified in the Code of Federal Regulations (CFR). Schedule A, B, and C appointing authorities applicable to a single agency are not codified in the CFR, but the Office of Personnel Management (OPM) publishes a notice of agency-specific authorities established or revoked each month in the **Federal Register** at *www.gpo.gov/fdsys/.* OPM also publishes an annual notice of the consolidated listing of all Schedule A, B, and C appointing authorities, current as of June 30, in the **Federal Register**.

Schedule A

No Schedule A Authorities to report during November 2021.

Schedule B

No Schedule B Authorities to report during November 2021.

Schedule C

The following Schedule C appointing authorities were approved during November 2021.

Agency name	Organization name	Position title	Authorization No.	Effective date
DEPARTMENT OF AGRICULTURE	Office of Under Secretary for Natural Resources and Environment.	Confidential Assistant	DA220015	11/05/2021

BILLING CODE 6325–39–P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–601, OMB Control No. 3235–0673]

Proposed Collection; Comment Request; Extension: Rule 15c3–5

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (''PRA'') (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') is soliciting comments on the existing collection of information provided for in Rule 15c3–5 (17 CFR 240.15c3–5) under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*) (''Exchange Act''). The Commission plans to submit this existing collection of information to the Office of Management and Budget (''OMB'') for extension and approval.

Rule 15c3–5 under the Exchange Act requires brokers or dealers with access to trading directly on an exchange or alternative trading system (''ATS''), including those providing sponsored or direct market access to customers or other persons, to implement risk management controls and supervisory procedures reasonably designed to manage the financial, regulatory, and other risks of this business activity.

The rule requires brokers or dealers to establish, document, and maintain certain risk management controls and supervisory procedures as well as regularly review such controls and procedures, and document the review, and remediate issues discovered to assure overall effectiveness of such controls and procedures. Each such broker or dealer is required to preserve a copy of its supervisory procedures and a written description of its risk management controls as part of its books and records in a manner consistent with Rule 17a–4(e)(7) under the Exchange Act. Such regular review is required to be conducted in accordance with written procedures and is required to be documented. The broker or dealer is required to preserve a copy of such written procedures, and documentation of each such review, as part of its books and records in a manner consistent with Rule 17a-4(e)(7) under the Exchange Act, and Rule 17a-4(b) under the Exchange Act, respectively.

In addition, the Chief Executive Officer (or equivalent officer) is required to certify annually that the broker or dealer's risk management controls and supervisory procedures comply with the rule, and that the broker-dealer conducted such review. Such certifications are required to be preserved by the broker or dealer as part of its books and records in a manner consistent with Rule 17a-4(b) under the Exchange Act. Compliance with Rule 15c3–5 is mandatory.

Respondents consist of broker-dealers with access to trading directly on an exchange or ATS. The Commission estimates that there are currently 520 respondents. To comply with Rule 15c3–5, these respondents will spend a total of approximately 83,200 hours per year (160 hours per broker-dealer × 520 broker-dealers = 83,200 hours). At an average internal cost per burden hour of approximately $401.89, the resultant total related internal cost of compliance for these respondents is $33,437,040 per year (83,200 burden hours multiplied by approximately $401.89/hour). In addition, for hardware and software expenses, the Commission estimates that the average annual external cost would be approximately $20,500 per broker-dealer, or $10,660,000 in the aggregate ($20,500 per broker-dealer × 520 brokers and dealers = $10,6660,000).

Written comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's estimates of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing by September 26, 2022.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

Please direct your written comments to: David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington,

DC 20549, or send an email to: *PRA_Mailbox@sec.gov.*

Dated: July 20, 2022.

J. Matthew DeLesDernier,

Deputy Secretary.

[FR Doc. 2022–15914 Filed 7–25–22; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–661, OMB Control No. 3235–0721]

Submission for OMB Review; Comment Request: Extension: Form 1–SA

Upon Written Request Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget this request for extension of the previously approved collection of information discussed below.

Form 1–SA (17 CFR 239.92) is used to file semiannual reports by Tier 2 issuers under Regulation A, an exemption from registration under the Securities Act of 1933 (15 U.S.C. 77a *et seq.*). Tier 2 issuers under Regulation A conducting offerings of up to $50 million within a 12-month period are required to file Form 1–SA. Form 1–SA provides semiannual, interim financial statements and information about the issuer's liquidity, capital resources and operations after the issuer's second fiscal quarter. The purpose of the Form 1–SA is to better inform the public about companies that have conducted Tier 2 offerings under Regulation A. We estimate that approximately 55 issuers file Form 1–SA annually. We estimate that Form 1–SA takes approximately 188.0427 hours to prepare. We estimate that 85% of the 188.0427 hours per response (159.8363 hours) is prepared by the company for a total annual burden of 8,791 hours (159.8363 hours per response × 55 responses).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

The public may view background documentation for this information collection at the following website: *www.reginfo.gov.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice by August 25, 2022 to (i) *www.reginfo.gov/public/do/PRAMain* and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549, or by sending an email to: *PRA_Mailbox@sec.gov.*

Dated: July 20, 2022.

J. Matthew DeLesDernier,

Deputy Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95328; File No. SR–CBOE–2022–038]

Self-Regulatory Organizations; Cboe Exchange, Inc.; Notice of Filing of a Proposed Rule Change To Amend Rule 5.32

July 20, 2022.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 7, 2022, Cboe Exchange, Inc. (the ''Exchange'' or ''Cboe Options'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe Exchange, Inc. (the ''Exchange'' or ''Cboe Options'') proposes to amend Rule 5.32. The text of the proposed rule change is provided below.

(additions are *Italicized;* deletions are [bracketed])

* * * * *

Rules of Cboe Exchange, Inc.

* * * * *

Rule 5.32. Order and Quote Book Processing, Display, Priority, and Execution

(a)–(d) No change.

(e) *Cancel/Replace. If a User submits a cancel/replace message for a resting order, regardless of whether the cancel/replace message modifies any terms of the resting order, the order loses its priority position and is placed in a priority position based on the time the System receives the cancel/replace message, unless the User only (1) decreases the quantity of an order, (2) modifies the Max Floor (if a Reserve Order), or (3) modifies the stop price (if a Stop or Stop-Limit order), in which case the order retains its priority position.* [Depending on how an order is modified, the order may change priority position as follows:

(1) If the price of an order is changed, the order loses position and is placed in a priority position as if the System received the order at the time the order was changed.

(2) If the quantity of an order is decreased, it retains its priority position.

(3) If the quantity of an order is increased, it loses its priority position and is placed in a priority position as if the System received the order at the time the quantity of the order is increased.]

* * * * *

The text of the proposed rule change is also available on the Exchange's website (*http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 5.32(e) to describe the impact on priority of a ''no-change'' order[3] (*i.e.,* an order submitted to cancel or replace a resting order that does not change any

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] In this context, the term ''order'' includes bids and offers submitted in bulk messages. A bulk message means a single electronic message a user submits with an M (Market-Maker) capacity to the Exchange in which the User may enter, modify, or cancel up to an Exchange-specified number of bids and offers. *See* Rule 1.1 (definition of bulk message, which provides that the System handles a bulk message bid or offer in the same manner as it handles an order or quote, unless the Rules specify otherwise).

terms of an order) and of a cancel/replace message that does not change the price or size of a resting order but changes another term of an order. Current Rule 5.32(e) describes whether a resting order's priority position may change if it is modified with a cancel/replace message. Specifically, current Rule 5.32(e) states if the price of an order is changed, the order loses position and is placed in a priority position as if the System received the order at the time the order was changed. If the quantity of an order is decreased, it retains its priority position. If the quantity of an order is increased, it loses its priority position and is placed in a priority position as if the System received the order at the time the quantity of the order is increased.

Rule 5.32(e), however, is currently silent regarding how the System handles a cancel-replace message comprised of a no-change order or an order that changes terms other than price and size. The Exchange recently determined that if the System receives a no-change order, the resting order would lose its priority position; however, if the System receives a ''no-change'' bid or offer in a bulk message, the resting bid or offer would not lose its priority position. The Exchange proposes to harmonize the handling of all no-change orders and quotes so that any ''no-change'' order or bulk message bid or offer will lose priority, as well as add to the Rules how the System handles no-change orders. Additionally, the Exchange proposes to codify current System functionality that causes a resting order to lose its priority position if any cancel/replace message is submitted if any term other than the Max Floor (if a Reserve Order) [4] or the stop price (if a Stop or Stop-Limit order [5]) is modified. Therefore, the proposed rule change amends Rule 5.32(e) to state if a User submits a cancel/replace message for a resting order, regardless of whether the cancel/replace message modifies any terms of the resting order, the order loses its priority position and is placed in a priority position based on the time the System receives the cancel/replace message, unless the User only (1) decreases the quantity of an order (as is currently set forth in the Rules), (2) modifies the Max Floor (if a Reserve Order), or (3) modifies the stop price (if a Stop or Stop-Limit order), in which case the order retains its priority position.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[6] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [7] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [8] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange believes the proposed rule change will remove impediments to and perfect the mechanism of a free and open market as well as protect investors by adding transparency to the Rules regarding how the System handles cancel/replace messages that change no order terms or change order terms other than price and size. The Exchange believes consistency in handling of all no-change orders and quotes will simplify order handling and thus further benefit investors. The Exchange believes it is reasonable for a user's resting order to lose priority if that user submits a cancel/replace order, including a no-change order, to replace that resting order (other than the three exceptions). Ultimately, the purpose of a cancel and replace message is to replace a resting order with a new order; therefore, it is appropriate for the System to treat that replacement order as a new order for purposes of priority. Despite the fact that a cancel/replace message that does not modify the price or size of a resting order (and thus has no investment purpose), a user elected to send that new order to the Exchange despite having an identical order resting on the Exchange's book and use System capacity to do so. Therefore, the Exchange believes it promotes just and equitable principles of trade to treat that replacement order as a new order for priority purposes. The Exchange believes the proposed rule change encourages users to submit to the Exchange only bona fide cancel/replace orders that have legitimate investment purposes and discourages use of System capacity to send unnecessary message traffic.

As set forth in the current Rule 5.32(e), a cancel/replace order that decreases the size of a resting order would continue to not result in a loss of priority position is an order. The Exchange believes it is appropriate to continue to not have this type of cancel/replace order cause a loss of priority because it is consistent with a partial execution of that order, which would similarly not cause a loss of priority.[9] Unlike a no-change order, an order to reduce the size of a resting order may have a legitimate investment purpose, such as to reduce execution risk. Additionally, the Exchange believes it will remove impediments to and perfect the mechanism of a free and open market as well as protect investors by adding transparency to codify that a change to the Max Floor (if a Reserve Order) or the stop price (if a Stop or Stop-Limit order) will not cause a resting order to lose priority because it is unnecessary given the handling of those orders and the fact that at that time there is no priority to lose. Such handling is consistent with the definitions and handling of both of

[4] A ''Reserve Order'' is a limit order with both a portion of the quantity displayed (''Display Quantity'') and a reserve portion of the quantity (''Reserve Quantity'') not displayed. Both the Display Quantity and Reserve Quantity of the Reserve Order are available for potential execution against incoming orders. When entering a Reserve Order, a User must instruct the Exchange as to the quantity of the order to be initially displayed by the System (''Max Floor''). If the Display Quantity of a Reserve Order is fully executed, the System will, in accordance with the User's instruction, replenish the Display Quantity from the Reserve Quantity using one of the below replenishment instructions. If the remainder of an order is less than the replenishment amount, the System will display the entire remainder of the order. The System creates a new timestamp for both the Display Quantity and Reserve Quantity of the order each time it is replenished from reserve. A User may attach an instruction for random replenishment (where the System randomly replenishes the Display Quantity for the order with a number of contracts not outside a replenishment range, which equals the Max Floor plus and minus a replenishment value established by the User when entering a Reserve Order with a Random Replenishment instruction) or fixed replenishment (the System will replenish the Display Quantity of an order with the number of contracts equal to the Max Floor).

[5] A ''Stop (Stop-Loss)'' order is an order to buy (sell) that becomes a market order when the consolidated last sale price (excluding prices from complex order trades if outside of the NBBO) or NBB (NBO) for a particular option contract is equal to or above (below) the stop price specified by the User. A ''Stop-Limit'' order is an order to buy (sell) that becomes a limit order when the consolidated last sale price (excluding prices from complex order trades if outside the NBBO) or NBB (NBO) for a particular option contract is equal to or above (below) the stop price specified by the User.

[6] 15 U.S.C. 78f(b).

[7] 15 U.S.C. 78f(b)(5).

[8] *Id.*

[9] *See* Rule 5.32(d).

those order types. Specifically, as set forth in the definition of a Reserve Order, the Max Floor amount is relevant for replenishment of the Display Quantity of the order after execution, and once replenished, the System creates a new timestamp for both the Display Quantity and Reserve Quantity of the order each time it is replenished from reserve (*i.e.,* prioritizes it in the book at the time of replenishment). Therefore, there is no need for a loss in priority due to a change in the Max Floor amount because that order will have its priority reset once it is replenished with that new amount. Similarly, as set forth in the definitions of Stop and Stop-Limit orders, those orders become market or limit orders, respectively, once triggered and thus placed on the book as market or limit orders and prioritized based on that time. The stop price is the piece of information that determines when these orders will be triggered. As a result, there is no need for an order to lose priority due to a change in the stop price given that those orders have not yet been prioritized on the Book and will be prioritized once triggered and entered into the Book for potential execution.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because the System will handle all cancel/replace orders from all users in the same manner. All cancel/replace orders, except for the three exceptions, will cause the resting order to lose priority. The three types of cancel/replace orders that will not cause a resting order to lose priority and are consistent with current order handling rules. The Exchange does not believe that the proposed rule change will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because the proposed rule change only impacts priority of orders resting on the Exchange's book and thus will have no impact on terms of an order that are disseminated to market participants or on trading outside of the Exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission will:

A. by order approve or disapprove such proposed rule change, or

B. institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–CBOE–2022–038 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–CBOE–2022–038. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal offices of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–CBOE–2022–038, and should be submitted on or before August 16, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[10]

J. Matthew DeLesDernier,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95342; File No. SR–C2–2022–015]

Self-Regulatory Organizations; Cboe C2 Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Rules Regarding Complex Orders

July 20, 2022.

Pursuant to the provisions of Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 14, 2022, Cboe C2 Exchange, Inc. (the ''Exchange'' or ''C2'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe C2 Exchange, Inc. (the ''Exchange'' or ''C2'') proposes to amend its Rules regarding complex orders. The text of the proposed rule change is provided in Exhibit 5.

[10] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

The text of the proposed rule change is also available on the Exchange's website (*https://markets.cboe.com/us/options/regulation/rule_filings/ctwo/*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Rules regarding complex orders. Specifically, the Exchange proposes to make trading available for complex orders in any ratio, as well as makes [sic] a clarifying change to the complex order rules.

Currently, the definition of complex order in Rule 1.1 provides that the term ''complex order'' means any order involving the concurrent purchase and/or sale of two or more different series in the same class (the ''legs'' or ''components'' of the complex order), for the same account, in a ratio equal to or greater than one-to-three (.333) and less than or equal to three-to-one (3.00) and for the purposes of executing a particular investment strategy. As such, only complex orders with a ratio equal to or greater than one-to-three (.333) and less than or equal to three-to-one (3.00) may currently be submitted for trading on the Exchange. The proposed rule change amends the definition of complex order in Rule 1.1 to provide that a ''complex order'' is any order involving the concurrent purchase and/or sale of two or more different series in the same class (the ''legs'' or ''components'' of the complex order), for the same account, in any ratio and for the purposes of executing a particular investment strategy. The Exchange notes that its affiliated options exchange, Cboe Options, recently amended its complex order rules in the same manner as proposed herein to permit complex orders with ratios less than one-to-three and greater than three-to-one to be eligible for electronic processing.[3] The Exchange proposes to accept complex orders with ratios larger than three-to-one or smaller than one-to-three for execution in order to provide execution opportunities for all complex orders, including those with investment strategies that do not fit within the three-to-one ratio requirement (which opportunities are afforded to those complex orders submitted to Cboe Options today).

While the proposed rule change will allow complex orders of any ratio to be traded on the Exchange, the Exchange does not propose to extend the complex order priority in Rule 5.33(f)(2)[4] to complex orders with ratios equal to or greater than one-to-three and less than or equal to three-to-one to complex orders with larger ratios. Instead, the proposed rule change amends Rule 5.33(f)(2) to provide that, if a complex order has a ratio less than one-to-three (.333) or greater than three-to-one (3.00), the component(s) of the complex order for the leg(s) with a Customer order at the BBO must execute at a price that improves the price of that Customer order(s) on the Simple Book (the Exchange notes that this proposed rule change is described below in further detail). The proposed rule change also makes certain nonsubstantive changes to the complex priority rule. The Exchange notes that execution of complex orders with any ratio will continue to not be permitted at net prices: (i) that would cause any component of the complex strategy to be executed at a price of zero; (ii) worse than the Synthetic Best Bid or Offer (''SBBO''); (iii) that would cause any component of the complex strategy to be executed at a price worse than the individual component prices on the Simple Book; or (iv) worse than the price that would be available if the complex order legged into the Simple Book.

Specifically, regarding the nonsubstantive changes to Rule 5.33(f)(2), the proposed rule change combines subparagraph (2) with (5) (and reformats the subparagraphs with lettering, which is consistent with the general format of the Exchange Rules), as the provisions are interlinked. Specifically, Rule 5.33(f)(2)(2) provides that the System does not execute a complex order pursuant to 5.33 at a net price worse than the SBBO. Separately, Rule 5.33(f)(2)(5) provides that the System does not execute a complex order pursuant to Rule 5.33 ahead of orders on the Simple Book without improving the BBO on at least one component of the complex strategy by at least $0.01—in other words, a complex order could only execute against complex interest by improving the SBBO (and thus not worse than the SBBO). Because these two provisions are interrelated, the Exchange believes it is appropriate to combine them into proposed Rule 5.33(f)(2)(D).[5] The proposed rule change amends language in proposed Rule 5.33(f)(2)(D) to provide that the System does not execute a complex order pursuant to Rule 5.33 at a net price worse than the SBBO and adds subparagraph (i) to additionally provide that if a complex order has a ratio equal to or greater than one-to-three (.333) and less than or equal to three-to-one (3.00), at least one component of the complex order must execute at a price that improves the BBO for that component, which is consistent with the current rule and current functionality for complex orders in ratios that may currently be submitted on the Exchange. The proposed nonsubstantive rule changes to restructure Rule 5.33(f)(2) have no impact on complex order priority with respect to complex orders that may

[3] *See* Securities Exchange Act Release No. 94204 (February 9, 2022), 87 FR 8625 (February 15, 2022) (SR–CBOE–2021–046). The Cboe Options' filing SR–CBOE–2021–046 also amended Cboe Option's complex order rules to allow the minimum increment for bids and offers on complex orders with any ratio to be in $0.01 or greater (legs were already permitted to be executed in pennies on Cboe Options). The Exchange notes that Rule 5.33(f)(1) currently provides that the minimum increment for bids and offers on a complex order is $0.01, and the components of a complex order may be executed in $0.01 increments, regardless of the minimum increments otherwise applicable to the individual components of the complex order. As a result, all complex orders (including those with larger ratios as proposed in this filing) and their legs will be able to execute in pennies, and all bids and offers on all complex orders (including those with larger ratios, as proposed) will be able to be expressed in a minimum increment of $0.01.

[4] The System does not execute a complex order pursuant to this Rule 5.33 at a net price (1) that would cause any component of the complex strategy to be executed at a price of zero; (2) worse than the SBBO; (3) that would cause any component of the complex strategy to be executed at a price worse than the individual component price on the Simple Book; (4) worse than the price that would be available if the complex order Legged into the Simple Book; or (5) ahead of orders on the Simple Book without improving the BBO on at least one component of the complex strategy by at least $0.01. The Exchange notes pursuant to Rule 5.33(d)(5) and (e), complex orders will execute against orders and quotes in the Simple Book (including customer orders) prior to executing against complex orders.

[5] The proposed rule change makes other nonsubstantive changes to the sentence structure as a result of the combination of provisions, as well as other nonsubstantive changes to the formatting and paragraph structure for added clarity and consistency with the structure of corresponding Cboe Options Rule 5.33(f)(2).

currently execute on the Exchange and are consistent with and align the Exchange's complex order priority rule with the structure of Cboe Options Rule 5.33(f)(2)(A), which governs Cboe Options complex order priority.[6]

Regarding the proposed rule change to incorporate complex orders with larger-ratios, as proposed, into the complex order priority provision, the proposed rule change adds subparagraph (ii) to Rule 5.33(f)(2)(D), as proposed. As described above, Rule 5.33(f)(2)(D), as proposed, provides that the System does not execute a complex order pursuant to Rule 5.33 at a net price worse than the SBBO, and, as proposed subparagraph (ii) provides, if the complex order has a ratio less than one-to-three (.333) or greater than three-to-one (3.00), the component(s) of the complex order for the leg(s) with a Customer order at the BBO must execute at a price that improves the price of that Customer order(s) on the Simple Book. As a result, to the extent a complex order with a ratio of four-to-one (for example) is submitted for electronic execution, the complex order may be executed at a net debit or credit price only if each leg of the order betters the corresponding bid (offer) of a customer order(s) in the Simple Book. Therefore, the complex order priority rules will continue to protect Customer interest on the Simple Book. The proposed rule change regarding complex order priority for complex order ratios less than one-to-three (.333) or greater than three-to-one (3.00) is consistent with the corresponding complex priority rule on Cboe Options[7] as it applies to complex order ratios less than one-to-three (.333) or greater than three-to-one (3.00) electronically submitted to Cboe Options, as previously approved by the Commission.[8]

The proposed rule change also updates Rule 5.33(g) to reflect that the System accepts for electronic processing complex orders with more than four legs. Current Rule 5.33(g) states that a complex order may execute against orders and quotes resting in the Simple Book pursuant to Rule 5.33(d)(5)(A)(i) and (e)(1) if it can execute in full or in a permissible ratio and if it has no more than a maximum number of legs (which the Exchange determines on a class-by-class basis and may be two, three or four), subject to certain restrictions, including that non-Customer complex orders with two option legs that are both buy or both sell and that are both calls or both puts may not leg into the Simple Book and all complex orders with three or four option legs that are all buy or all sell may not leg into the Simple Book. The proposed rule change modifies the parenthetical regarding legging restrictions to indicate that the maximum number the Exchange may determine on a class-by-class basis may be up to 16, as the Exchange's System currently accepts complex orders with up to that many legs for electronic processing.[9] The proposed rule change makes no changes to which or how complex orders may leg into the Simple Book but rather updates this provision to reflect current functionality. This proposed rule change is consistent with the corresponding Cboe Options Rule 5.33(g).[10]

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[11] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[12] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[13] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange believes the proposed rule change will remove impediments to and perfect the mechanism of a free and open market and benefit investors, because it will provide market participants with execution opportunities on the Exchange for all their complex trading and hedging strategies, regardless of ratio. Market participants may determine that investment and hedging strategies with ratios greater than three-to-one or less than one-to-three are appropriate for their investment purposes, and the Exchange believes it will benefit market participants if they have the flexibility to submit their investment and hedging strategies on the Exchange to achieve their desired investment results. The proposed rule change will further remove impediments to and perfect the mechanism of a free and open market and a national market system, as it will allow complex orders to be submitted on the Exchange in the same manner as complex orders may already be submitted on its affiliated options exchange, Cboe Options,[14] which currently permits orders of any ratio to be submitted to the exchange, as previously approved by the Commission.[15] Additionally, the proposed rule change will continue to protect customer order interest on the Simple Book, as all complex orders with a ratio greater than three-to-one or less than one-to-three will be executed only if each leg of the order improves the price of a customer order on the Simple Book on each leg. Again, as noted above, the proposed rule change regarding

[6] *See* Cboe Options Rule 5.33(f)(2)(A); *and see* Securities Exchange Act Release No. 95006 (May 31, 2022), 87 FR 34334 (June 6, 2022) (SR–CBOE–2022–024).

[7] *See* Cboe Options Rule 5.33(f)(2)(A)(iv)(b). The Exchange notes priority on the Exchange is slightly different than on Cboe Options, has the Exchange does not have the concept of priority customer and thus will always execute complex orders against interest in the Simple Book if possible prior to executing complex orders against other complex interest.

[8] *See* Securities Exchange Act Release No. 94204 (February 9, 2022), 87 FR 8625 (February 15, 2022) (SR–CBOE–2021–046). SR–CBOE–2021–046 did not make any changes to complex orders with ratios equal to or greater than one-to-three (.333) and less than or equal to three-to-one (3.00) available on Cboe Options and Cboe Options continues to allow trading in such complex orders with smaller ratios today. Likewise, the Exchange notes that this proposal does not make any changes to currently permissible complex order ratios (equal to or greater than one-to-three (.333) and less than or equal to three-to-one (3.00)) and such complex orders with smaller ratios will continue to be available for trading on the Exchange, consistent with Cboe Options.

[9] *See* Cboe Notice C2021060800, *Cboe Options Introduces 16-Leg Maximum for Non-FLEX Complex Orders* (June 8, 2021), *available at* Cboe Options Introduces 16-Leg Maximum for Non-FLEX Complex Orders; *see also Cboe US Options Complex Book Process* (technical specifications last updated April 20, 2022), Section 2.3.2, *available at* US Options Complex Book Process.

[10] *See* Cboe Options Rule 5.33(g); *and see* Securities Exchange Act Release No. 95006 (May 31, 2022), 87 FR 34334 (June 6, 2022) (SR–CBOE–2022–024).

[11] 15 U.S.C. 78f(b).

[12] 15 U.S.C. 78f(b)(5).

[13] *Id.*

[14] The Exchange notes that its affiliated options exchange, Cboe EDGX Exchange, Inc. (''EDGX''), also intends to file a similar rule filing to allow complex orders of any ratio to be submitted on EDGX.

[15] *See supra* note 10. Prior to the Commission's approval of SR–CBOE–2022–046, larger ratio complex orders were already permitted to be submitted to Cboe Options' trading floor for execution in open outcry. The Commission's approval of SR–CBOE–2022–046 allowed larger ratio complex orders to be submitted for electronic trading.

complex order priority for complex order ratios less than one-to-three (.333) or greater than three-to-one (3.00) is consistent with the corresponding complex priority rule on Cboe Options as it applies to larger ratio orders submitted for electronic trading on Cboe Options.[16] The nonsubstantive proposed rule change to restructure the provisions regarding complex order priority in Rule 5.33(f)(2) is intended to simplify the rule text regarding when legs of complex orders must improve prices of orders on the Simple Book, while adding clarity to the rule text through an update in its formatting and aligning such provision with the structure of Cboe Option's corresponding complex priority rule. This proposed rule change has no impact on electronic complex order priority while still increasing investor understanding.

The proposed nonsubstantive rule change to the provision regarding complex order legging in Rule 5.33(g) will protect investors, as it merely updates the provision to reflect that the System accepts for electronic processing complex orders with more than four legs. The proposed rule change makes no changes to which or how complex orders may leg into the Simple Book but rather updates this provision to reflect current functionality and align with Cboe Options corresponding rule.[17]

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe the proposed rule change to allow for complex orders in any ratio to be submitted to the Exchange will impose any burden on intramarket competition, as the proposed rule change will apply in the same manner to all Trading Permit Holders (''TPHs''). TPHs will have the discretion to submit complex orders with any ratio for trading on the Exchange. The Exchange does not believe the proposed rule change will impose any burden on intermarket competition as it relates to the execution of orders on the Exchange and will continue to protect the leg markets, including customer orders on the Simple Book. The Exchange believes the proposed rule change may promote competition, as market participants will have additional flexibility to execute their trading and hedging strategies in any ratio, and in the same manner that is already permitted on the Exchange's affiliated options exchange, Cboe Options. Also, other options exchanges are welcome to modify their systems to permit higher/lower ratio orders to execute electronically or on their trading floors.

The proposed nonsubstantive rule change to restructure the provisions regarding complex order priority in Rule 5.33(f)(2) and the proposed nonsubstantive rule change to Rule 5.33(g) are not intended for competitive purposes, but rather are intended to, respectively, simplify and add clarity to the complex priority rule text and to clarify a provision, reflecting more accurately current System functionality. The Exchange does not believe that the proposed nonsubstantive rule changes will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act, because the change will apply in the same manner to all investors. The proposed nonsubstantive rule changes have no impact on trading and thus will not change how any investors' complex orders are processed or executed on the Exchange. As noted above, the proposed rule changes make no changes to which or how complex orders may leg into the Simple Book. The Exchange does not believe that the proposed nonsubstantive rule changes will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act, because the proposed rule changes have no impact on how complex orders trade, as they merely make a structural update and clarifying updates.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act[18] and subparagraph (f)(6) of Rule 19b–4 thereunder.[19]

A proposed rule change filed under Rule 19b–4(f)(6)[20] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[21] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay. The Exchange notes that complex orders with any ratio currently are eligible for electronic processing on Cboe Options, and that the proposal does not introduce any new or novel functionality.[22] The Exchange states that waiver of the operative delay will benefit investors by providing them with the flexibility to submit bona-fide multi-legged trading or hedging strategies in any ratio to the Exchange. In addition, the Exchange states that waiver of the operative delay with respect to the proposed non-substantive rule changes to clarify and simplify rule text will benefit investors by providing additional transparency regarding the Exchange's rules as soon as possible.

The Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. The Commission believes that the proposal will benefit investors by providing investors with an additional venue for trading complex orders with any ratio, including complex orders with a ratio less than one-to-three or greater than three-to-one. As discussed above, the Commission approved a Cboe Options proposal allowing complex orders with any ratio to trade electronically and to be quoted, as well as executed, in $0.01 increments.[23] The Commission notes that the priority provisions in proposed Exchange Rule 5.33(f)(2)(D)(ii) for complex orders with a ratio less than one-to-three or greater than three-to-one—which require each component leg of such an order with a Customer order at the BBO to execute at a price that improves the price of the Customer order(s) on the Simple Book—are consistent with the requirements of

[16] *See supra* note 9.

[17] *See supra* note 12.

[18] 15 U.S.C. 78s(b)(3)(A)(iii).

[19] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[20] 17 CFR 240.19b–4(f)(6).

[21] 17 CFR 240.19b–4(f)(6)(iii).

[22] *See supra* note 3.

[23] *See id.*

Cboe Options Rule 5.33(f)(2)(A)(iv)(b).[24] Accordingly, the Exchange's proposal to allow market participants to submit complex orders with any ratio to the Exchange does not raise new or novel regulatory issues. The Commission believes that the proposed non-substantive changes to Exchange Rules 5.33(f)(2) will modify the format of that rule so that it is consistent with the format of Cboe Rule 5.33(f)(2), and that the proposed non-substantive change to Exchange Rule 5.33(g) will update the rule and make it consistent with Cboe Rule 5.33(g). Accordingly, the Commission waives the operative delay and designates the proposed rule change operative upon filing.[25]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–C2–2022–015 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–C2–2022–015. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–C2–2022–015, and should be submitted on or before August 16, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[26]

J. Matthew DeLesDernier,

Deputy Secretary.

[FR Doc. 2022–15934 Filed 7–25–22; 8:45 am]

BILLING CODE 8011–01–P

[24] As noted above, unlike Cboe Options, the Exchange does not have the concept of a priority customer. *See supra* note 7. The Exchange notes that pursuant to Exchange Rules 5.33(d)(5) and (e), complex orders execute against orders and quotes in the Simple Book (including customer orders) prior to executing against complex orders. *See supra* note 4.

[25] For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95334; File No. SR–NYSE–2022–28]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Make a Non-Substantive Change to Rule 7.31(a)(2)(B) Regarding Limit Order Price Protection

July 20, 2022.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that on July 8, 2022, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to make a non-substantive change to Rule 7.31(a)(2)(B) regarding Limit Order Price Protection. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to make a non-substantive change to Rule 7.31(a)(2)(B) regarding Limit Order Price Protection.

Rule 7.31(a)(2)(B) (''Limit Order Price Protection'') provides that a Limit Order to buy (sell) will be rejected if it is priced at or above (below) the greater of $0.15 or a specified percentage away from the National Best Offer (National Best Bid) (''NBO'' and ''NBB,'' respectively). The rule currently states that the ''specified percentage is equal to the corresponding 'numerical guideline' percentage set forth in paragraph (c)(1) of Rule 7.10 (Clearly Erroneous Executions) for the Core Trading Session.'' Pursuant to Rule 7.10(c)(1), those numerical guidelines are as follows: 10% for securities with a reference price up to and including

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

$25.00, 5% for securities with a reference price greater than $25.00 and up to and including $50.00, and 3% for securities with a reference price greater than $50.00.

The Exchange proposes to amend Rule 7.31(a)(2)(B) to delete the cross-reference to Rule 7.10(c)(1) and instead include the specified percentages from Rule 7.10(c)(1) as a table in the text of Rule 7.31(a)(2)(B) itself, as follows:

Reference price	Specified percentage
Greater than $0.00 up to and including $25.00	10
Greater than $25.00 up to and including $50.00	5
Greater than $50.00	3

The Exchange does not propose any change to the percentages themselves or when they would apply. Accordingly, the proposed change would be non-substantive and would raise no novel issues.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[4] in general, and with Section 6(b)(5),[5] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Exchange believes that the proposed change to Rule 7.31(a)(2)(B) would remove impediments to and perfect the mechanism of a free and open market and a national market system, and in general, protect investors and the public interest because deleting the cross-reference to Rule 7.10(c)(1) and instead including the relevant percentages from Rule 7.10(c)(1) in the text of Rule 7.31(a)(2)(B) itself will enhance the clarity of the rule.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposed rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not intended to address competitive issues but rather would be a non-substantive change to delete the cross-reference to Rule 7.10(c)(1) and instead include the relevant percentages from Rule 7.10(c)(1) in the text of Rule 7.31(a)(2)(B) itself.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and; (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[6] and Rule 19b–4(f)(6)[7] thereunder.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSE–2022–28 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSE–2022–28. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSE–2022–28 and should be submitted on or before August 16, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[8]

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Meetings

TIME AND DATE: Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Public Law 94–409, that the Securities and Exchange Commission Small Business Capital Formation Advisory Committee

will hold a public meeting on Tuesday, August 2, 2022, via videoconference.

PLACE: The meeting will be conducted by remote means (videoconference) and/or at the Commission's headquarters, 100 F Street NE, Washington, DC 20549. Members of the public may watch the webcast of the meeting on the Commission's website at *www.sec.gov.*

STATUS: The meeting will begin at 10:00 a.m. (ET) and will be open to the public. This Sunshine Act notice is being issued because a majority of the Commission may attend the meeting.

MATTERS TO BE CONSIDERED: The agenda for the meeting includes matters relating to rules and regulations affecting small and emerging businesses and their investors under the federal securities laws.

CONTACT PERSON FOR MORE INFORMATION: For further information and to ascertain what, if any, matters have been added, deleted or postponed; please contact Vanessa A. Countryman from the Office of the Secretary at (202) 551–5400.

(Authority: 5 U.S.C. 552b)

Dated: July 22, 2022.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95335; File No. SR–NYSEAMER–2022–30]

Self-Regulatory Organizations; NYSE American LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Make a Non-Substantive Change to Rule 7.31E(a)(2)(B) Regarding Limit Order Price Protection

July 20, 2022.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that on July 8, 2022, NYSE American LLC (''NYSE American'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to make a non-substantive change to Rule 7.31E(a)(2)(B) regarding Limit Order Price Protection. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to make a non-substantive change to Rule 7.31E(a)(2)(B) regarding Limit Order Price Protection.

Rule 7.31E(a)(2)(B) (''Limit Order Price Protection'') provides that a Limit Order to buy (sell) will be rejected if it is priced at or above (below) the greater of $0.15 or a specified percentage away from the National Best Offer (National Best Bid) (''NBO'' and ''NBB,'' respectively). The rule currently states that the ''specified percentage is equal to the corresponding 'numerical guideline' percentage set forth in paragraph (c)(1) of Rule 7.10E (Clearly Erroneous Executions) for the Core Trading Session.'' Pursuant to Rule 7.10E(c)(1), those numerical guidelines are as follows: 10% for securities with a reference price up to and including $25.00, 5% for securities with a reference price greater than $25.00 and up to and including $50.00, and 3% for securities with a reference price greater than $50.00.

The Exchange proposes to amend Rule 7.31E(a)(2)(B) to delete the cross-reference to Rule 7.10E(c)(1) and instead include the specified percentages from Rule 7.10E(c)(1) as a table in the text of Rule 7.31E(a)(2)(B) itself, as follows:

Reference price	Specified percentage
Greater than $0.00 up to and including $25.00	10
Greater than $25.00 up to and including $50.00	5
Greater than $50.00	3

The Exchange does not propose any change to the percentages themselves or when they would apply. Accordingly, the proposed change would be non-substantive and would raise no novel issues.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[4] in general, and with Section 6(b)(5),[5] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Exchange believes that the proposed change to Rule 7.31E(a)(2)(B) would remove impediments to and perfect the mechanism of a free and open market and a national market system, and in general, protect investors and the public interest because deleting the cross-reference to Rule 7.10E(c)(1) and instead including the relevant percentages from Rule 7.10E(c)(1) in the text of Rule 7.31E(a)(2)(B) itself will enhance the clarity of the rule.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposed rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not intended to address competitive issues but rather would be a non-substantive change to delete the cross-reference to Rule 7.10E(c)(1) and instead include the relevant percentages from Rule 7.10E(c)(1) in the text of Rule 7.31E(a)(2)(B) itself.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] 15 U.S.C. 78f(b).

[5] 15 U.S.C. 78f(b)(5).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and; (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[6] and Rule 19b–4(f)(6)[7] thereunder.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEAMER–2022–30 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEAMER–2022–30. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEAMER–2022–30 and should be submitted on or before August 16, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[8]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95331; File No. SR–Phlx–2022–31]

Self-Regulatory Organizations; Nasdaq PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Extend the Clearly Erroneous Pilot to October 20, 2022

July 20, 2022.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 19, 2022, Nasdaq PHLX LLC (''Phlx'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to extend the current pilot program related to Phlx Equity 4, Rule 3312 (Clearly Erroneous Transactions) to the close of business on October 20, 2022.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/phlx/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to extend the current pilot program related to Equity 4, Rule 3312, Clearly Erroneous Transactions, to the close of business on October 20, 2022. The pilot program is currently due to expire on July 20, 2022.

On September 10, 2010, the Commission approved, on a pilot basis, changes to Equity 4, Rule 3312 that, among other things: (i) provided for uniform treatment of clearly erroneous execution reviews in multi-stock events involving twenty or more securities; and (ii) reduced the ability of the Exchange to deviate from the

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

objective standards set forth in the rule.[3] Following this, on September 30, 2010, the Exchange adopted changes to conform its Rule 3312 to Nasdaq's and BX's rules 11890.[4] In 2013, the Exchange adopted a provision designed to address the operation of the Plan.[5] Finally, in 2014, the Exchange adopted two additional provisions providing that: (i) a series of transactions in a particular security on one or more trading days may be viewed as one event if all such transactions were effected based on the same fundamentally incorrect or grossly misinterpreted issuance information resulting in a severe valuation error for all such transactions; and (ii) in the event of any disruption or malfunction in the operation of the electronic communications and trading facilities of an Exchange, another SRO, or responsible single plan processor in connection with the transmittal or receipt of a trading halt, an Officer, acting on his or her own motion, shall nullify any transaction that occurs after a trading halt has been declared by the primary listing market for a security and before such trading halt has officially ended according to the primary listing market.[6]

These changes were originally scheduled to operate for a pilot period to coincide with the pilot period for the Plan to Address Extraordinary Market Volatility (the ''Limit Up-Limit Down Plan'' or ''LULD Plan'').[7] In April 2019, the Commission approved an amendment to the LULD Plan for it to operate on a permanent, rather than pilot, basis.[8] In light of that change, the Exchange amended Equity 4, Rule 3312 to untie the pilot program's effectiveness from that of the LULD Plan and to extend the pilot's effectiveness to the close of business on October 18, 2019.[9] Subsequently, the Exchange amended Rule 3312 to extend the pilot's effectiveness to the close of business on July 20, 2022.[10]

The Exchange now proposes to amend Equity 4, Rule 3312 to extend the pilot's effectiveness for a further three months until the close of business on October 20, 2022. If the pilot period is not either extended, replaced or approved as permanent, the prior versions of paragraphs (a)(2)(C), (c)(1), (b)(i), and (b)(ii) shall be in effect, and the provisions of paragraphs (g) through (i) shall be null and void.[11] In such an event, the remaining sections of Rule 3312 would continue to apply to all transactions executed on the Exchange. The Exchange understands that the other national securities exchanges and Financial Industry Regulatory Authority (''FINRA'') will also file similar proposals to extend their respective clearly erroneous execution pilot programs, the substance of which are identical to Rule 3312.

The Exchange does not propose any additional changes to Equity 4, Rule 3312. Extending the effectiveness of Rule 3312 for an additional three months will provide the Exchange and other self-regulatory organizations additional time to consider whether further amendments to the clearly erroneous execution rules are appropriate.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of Section 6(b) of the Act,[12] in general, and Section 6(b)(5) of the Act,[13] in particular, in that it is designed to remove impediments to and perfect the mechanism of a free and open market and a national market system, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest and not to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that the proposed rule change promotes just and equitable principles of trade in that it promotes transparency and uniformity across markets concerning review of transactions as clearly erroneous. The Exchange believes that extending the clearly erroneous execution pilot under Equity 4, Rule 3312 for an additional three months would help assure that the determination of whether a clearly erroneous trade has occurred will be based on clear and objective criteria, and that the resolution of the incident will occur promptly through a transparent process. The proposed rule change would also help assure consistent results in handling erroneous trades across the U.S. equities markets, thus furthering fair and orderly markets, the protection of investors and the public interest. Based on the foregoing, the Exchange believes the amended clearly erroneous executions rule should continue to be in effect on a pilot basis while the Exchange and other self-regulatory organizations consider whether further amendments to these rules are appropriate.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposal would ensure the continued, uninterrupted operation of harmonized clearly erroneous execution rules across the U.S. equities markets while the Exchange and other self-regulatory organizations consider whether further amendments to these rules are appropriate. The Exchange understands that the other national securities exchanges and FINRA will also file similar proposals to extend their respective clearly erroneous execution pilot programs. Thus, the proposed rule change will help to ensure consistency across market centers without implicating any competitive issues.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[14] and Rule 19b–4(f)(6) thereunder.[15] Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has

[5] *See* Securities Exchange Act Release No. 68820 (February 1, 2013), 78 FR 9436 (February 8, 2013) (SR-Phlx-2013–12).

[6] *See* Securities Exchange Act Release No. 72434 (June 19, 2014), 79 FR 36110 (June 25, 2014) (SR-Phlx-2014–27).

[7] *See* Securities Exchange Act Release No. 67091 (May 31, 2012), 77 FR 33498 (June 6, 2012) (the ''Limit Up-Limit Down Release'').

[8] *See* Securities Exchange Act Release No. 85623 (April 11, 2019), 84 FR 16086 (April 17, 2019) (approving Eighteenth Amendment to LULD Plan).

[9] *See* Securities Exchange Act Release No. 85632 (April 11, 2019), 84 FR 16057 (April 17, 2019) (SR-Phlx-2019–14).

[10] *See* Securities Exchange Act Release No. 94765 (April 20, 2022), 87 FR 24602 (April 26, 2022) (SR-Phlx-2022–19).

[11] *See* notes 3–6, *supra*. The prior versions of paragraphs (a)(2)(C), (c)(1), (b)(i), and (b)(ii) generally provided greater discretion to the Exchange with respect to breaking erroneous trades.

[12] 15 U.S.C. 78f(b).

[13] 15 U.S.C. 78f(b)(5).

[14] 15 U.S.C. 78s(b)(3)(A)(iii).

[15] 17 CFR 240.19b–4(f)(6).

become effective pursuant to Section 19(b)(3)(A)(iii) of the Act [16] and subparagraph (f)(6) of Rule 19b–4 thereunder.[17]

A proposed rule change filed under Rule 19b–4(f)(6) [18] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[19] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange asked that the Commission waive the 30 day operative delay so that the proposal may become operative immediately upon filing. Waiver of the 30-day operative delay would extend the protections provided by the current pilot program, without any changes, while a permanent proposal for clearly erroneous execution reviews is being considered.[20] For this reason, the Commission hereby waives the 30-day operative delay and designates the proposed rule change as operative upon filing.[21]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–Phlx–2022–31 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–Phlx–2022–31. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–Phlx–2022–31 and should be submitted on or before August 16, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[22]

J. Matthew DeLesDernier,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95341; File No. SR–NYSENAT–2022–10]

Self-Regulatory Organizations; NYSE National, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Its Fee Schedule Related to Colocation

July 20, 2022.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that on July 6, 2022, NYSE National, Inc. (''NYSE National'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its Fee Schedule related to colocation to specify that the NMS feeds that are included in the Included Data Products are no longer available over the Liquidity Center Network (''LCN''). The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fee Schedule related to colocation to specify that the NMS feeds that are included in the Included Data Products are no longer available over the Liquidity Center Network (''LCN'').[4]

Background

The LCN and the IP network are the two local area networks in the Mahwah Data Center that are available to Users.[5] General Note 5 of the Fee Schedule explains that when a User purchases a service that includes access to the LCN or IP network, it receives connectivity to any of the ''Included Data Products'' that it selects, subject to any technical provisioning requirements and authorization from the provider of the data feed. The Included Data Products include, among others, the ''NMS feeds,'' which are the Consolidated Tape System and Consolidated Quote System (''CTA'' and ''CQ,'' respectively) data feeds and the Options Price Reporting Authority (''OPRA'') data feed.[6]

Before May 2020, connectivity to the NMS feeds was available on only the LCN and IP networks. In May 2020, the Commission approved the Exchange's proposal to offer Users access to the new ''NMS network,'' an alternate, dedicated network that connects to the NMS feeds faster than the LCN or IP networks.[7] Pursuant to that filing, the Exchange amended the notes regarding the services available in colocation to provide that if a User purchases a service that includes a 10 Gb or 40 Gb LCN or IP network connection, that service would also include a connection to the NMS network of the same size, at no additional charge.

Currently, the NMS feeds are available to Users on all three of the NMS network, IP network, and LCN, but at varying speeds. The NMS feeds are published first to the NMS network, which then republishes them to the IP network, which then republishes them to the LCN. This means that connectivity to the NMS feeds is fastest over the NMS network and slowest over the LCN. This also means that receiving the NMS feeds from more than one of these networks does not provide redundancy protection to Users; if connectivity to the NMS feeds over the NMS network were to be interrupted, so would connectivity to those feeds over the IP network and LCN, since the three networks publish the NMS feeds to each other in sequence.

Despite the Exchange's introduction of the NMS network in May 2020, some Users have failed to avail themselves of the option to receive the NMS feeds over that faster network at no additional cost. Other Users have opted to receive the NMS feeds over the NMS network, but have not yet formally asked the Exchange to stop also sending them the NMS feeds over the other networks (*i.e.,* IP network or LCN) for which those Users have ports.

At the same time, traffic over the LCN has been increasing. Increases in options trading volume in recent years on the NYSE American Options and NYSE Arca Options exchanges have increased the size of the market data feeds from those markets, thereby increasing the network bandwidth requirements overall for the market data feeds of the Exchange and the Affiliate SROs that are included in the Included Data Products (the ''NYSE Group Market Data'' feeds) over the LCN. As a result, the LCN connections over which some Users continue to receive the NMS feeds are increasingly burdened as the NYSE Group Market Data Feeds continue to grow in size.

To address these issues, the Exchange proposes to remove the NMS feeds from the Included Data Products available on the LCN. Doing so would permit Users to receive connectivity to the NYSE Group Market Data feeds over their LCN connections, while the NMS feeds would remain available to Users at no additional charge over the NMS network, at faster speeds than they were available over the LCN.

To accomplish this change, the Exchange proposes to amend General Note 5 of the Fee Schedule as follows (proposed addition italicized):

5. When a User purchases a service that includes access to the LCN or IP network it receives connectivity to any of the Included Data Products that it selects, subject to any technical provisioning requirements and authorization from the provider of the data feed. *Connectivity to the NMS feeds is not available over the LCN, but is available over the IP network and the NMS network described below in General Note 6.* Market data fees for the Included Data Products are charged by the provider of the data feed. A User can change the Included Data Products to which it receives connectivity at any time, subject to authorization from the provider of the data feed. The Exchange is not the exclusive method to connect to the Included Data Products.

Application and Impact of the Proposed Changes

Currently, 34 Users receive the NMS feeds over the LCN, but 23 of those 34 Users have access to the NMS network already enabled, such that they also receive the NMS feeds over the NMS network. To implement this proposal with respect to those 23 Users, the Exchange has notified the Users that their connections to the NMS feeds over LCN will be discontinued but that they will continue to receive the NMS feeds over the NMS network.

The other 11 Users that receive the NMS feeds over the LCN do not currently have NMS network access enabled, but are entitled to such access at no additional charge, since their existing LCN service includes a connection of the same size to the NMS network. The Exchange has notified these 11 Users that their connections to the NMS feeds over LCN will be discontinued, and all 11 of them have submitted orders to begin receiving the NMS feeds over an NMS network connection at no additional charge. The Exchange is currently in the process of installing NMS network connections for those 11 Users.[8]

Users would experience no interruption in their ability to connect to the NMS feeds as a result of the proposed change, and would receive the NMS feeds faster as a result of the proposed change. No User would be required to purchase any additional products or services from the Exchange to transition their NMS feed connectivity to the NMS network, or to an IP network connection they have already purchased.

[4] The Exchange is an indirect subsidiary of Intercontinental Exchange, Inc. (''ICE''). Each of the Exchange's affiliates New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., and NYSE Chicago, Inc. (together, the ''Affiliate SROs'') has submitted substantially the same proposed rule change to propose the changes described herein. *See* SR–NYSE–2022–27, SR–NYSEAMER–2022–28, SR–NYSEArca–2022–39, and SR–NYSECHX–2022–15.

[5] For purposes of the Exchange's colocation services, a ''User'' means any market participant that requests to receive colocation services directly from the Exchange. *See* Securities Exchange Act Release No. 83351 (May 31, 2018), 83 FR 26314 at n.9 (June 6, 2018) (SR–NYSENAT–2018–07). As specified in the Fee Schedule, a User that incurs colocation fees for a particular colocation service pursuant thereto would not be subject to colocation fees for the same colocation service charged by the Affiliate SROs.

[6] *See id.*

[7] *See* Securities Exchange Act Release No. 88837 (May 7, 2020), 85 FR 28671 (May 13, 2020) (SR–NYSE–2019–46, SR–NYSEAMER–2019–34, SR–NYSEArca–2019–61, SR–NYSENAT–2019–19). *See also* Securities Exchange Act Release No. 88972 (May 29, 2020), 85 FR 34472 (June 4, 2020) (SR–NYSECHX–2020–18).

[8] Seven of these 11 Users also currently have access to the IP network and could have chosen to receive the NMS feeds over their IP network connections at no additional charge, but instead all 11 have opted to receive the NMS feeds over the faster NMS network.

The proposed changes would not apply differently to distinct types or sizes of market participants. Rather, they would apply to all Users equally. The purchase of any colocation service is completely voluntary and the Fee Schedule is applied uniformly to all Users.

No fees are affected by this proposal.

Implementation Date

The Exchange is in the process of transitioning all remaining Users that receive the NMS feeds over the LCN to begin receiving the feeds over NMS network connections at no additional charge. The Exchange expects this transition process to be completed before October 2022. Once that transition is complete, the Exchange proposes to implement this rule change by Customer Notice, at which point the option of receiving the NMS feeds over the LCN would be removed from the Fee Schedule.

Competitive Environment

The proposed changes are not otherwise intended to address any other issues relating to colocation services and/or related fees, and the Exchange is not aware of any problems that Users would have in complying with the proposed change.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[9] in general, and furthers the objectives of Section 6(b)(5) of the Act,[10] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that discontinuing the availability of the NMS feeds on the LCN would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest. Users that currently receive the NMS feeds on the LCN would receive the same data at a faster speed via the NMS or IP network, with no interruption of their ability to connect to the NMS feeds. Connectivity to the NMS feeds over the NMS network would be available at no additional charge to affected Users, since their existing LCN service includes a connection of the same size to the NMS network. In addition, connectivity to the NMS feeds over the IP network would be at no additional charge to Users that have already purchased access to the IP network. The Exchange believes that providing connectivity to the same feeds at a faster speed at no additional charge would perfect the mechanisms of a free and open market and a national market system.

The Exchange believes that the proposed rule change does not significantly affect the protection of investors or the public interest. The proposed rule change would simply give Users that currently receive the NMS feeds on the LCN the opportunity to receive the same data at a faster speed via the NMS network or the IP network, at no additional charge (if they choose to receive the NMS feeds over the NMS network or an already-established IP network connection), with no interruption of their ability to connect to the NMS feeds.

The Exchange believes that discontinuing the availability of the NMS feeds on the LCN would not permit unfair discrimination between customers, issuers, brokers, or dealers, because the proposed change would apply equally to all Users that currently receive the NMS feeds over the LCN. Nor does the proposed change advantage Users of the LCN over Users of the IP network, since, as indicated in the Fee Schedule, services that include a 10 Gb or 40 Gb LCN or IP connection also include a connection to the NMS network of the same size, at no additional charge.

The Exchange believes that the proposed change would facilitate transactions in securities, remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors and the public interest because removing the NMS feeds from the LCN would permit Users to receive connectivity to the NYSE Group Market Data feeds over their LCN connections, while the NMS feeds would remain available to Users at no additional charge over the NMS network, at faster speeds than they were available over the LCN. As noted above, increases in options trading volume in recent years on the NYSE American Options and NYSE Arca Options exchanges have increased the size of the market data feeds from those markets, thereby increasing the network bandwidth requirements for the NYSE Group Market Data feeds over the LCN.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[11] the Exchange believes that the proposed rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange believes that the proposed rule change would not place any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any competitive issues, but rather would provide Users that currently receive the NMS feeds on the LCN the same data at a faster speed via the NMS or IP network, at no additional charge (if they choose to receive the NMS feeds over the NMS network or an already-established IP network connection), with no interruption of their ability to connect to the NMS feeds.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [12] and Rule 19b–4(f)(6) thereunder.[13] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b-4(f)(6)(iii) thereunder.[14]

Continued

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [15] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSENAT–2022–10 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSENAT–2022–10. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street, NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSENAT–2022–10 and should be submitted on or before August 16, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[16]

J. Matthew DeLesDernier,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95340; File No. SR–NYSECHX–2022–15]

Self-Regulatory Organizations; NYSE Chicago, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Its Fee Schedule Related To Colocation

July 20, 2022.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on July 6, 2022, the NYSE Chicago, Inc. (''NYSE Chicago'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its Fee Schedule related to colocation to specify that the NMS feeds that are included in the Included Data Products are no longer available over the Liquidity Center Network (''LCN''). The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fee Schedule related to colocation to specify that the NMS feeds that are included in the Included Data Products are no longer available over the Liquidity Center Network (''LCN'').[4]

Background

The LCN and the IP network are the two local area networks in the Mahwah Data Center that are available to Users.[5] General Note 5 of the Fee Schedule explains that when a User purchases a service that includes access to the LCN or IP network, it receives connectivity to any of the ''Included Data Products'' that it selects, subject to any technical provisioning requirements and authorization from the provider of the data feed. The Included Data Products include, among others, the ''NMS feeds,'' which are the Consolidated Tape

Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[15] 15 U.S.C. 78s(b)(2)(B).

[16] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] The Exchange is an indirect subsidiary of Intercontinental Exchange, Inc. (''ICE''). Each of the Exchange's affiliates New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., and NYSE National, Inc. (together, the ''Affiliate SROs'') has submitted substantially the same proposed rule change to propose the changes described herein. *See* SR–NYSE–2022–27, SR–NYSEAMER–2022–28, SR–NYSEArca–2022–39, and SR–NYSENAT–2022–10.

[5] For purposes of the Exchange's colocation services, a ''User'' means any market participant that requests to receive colocation services directly from the Exchange. *See* Securities Exchange Act Release No. 87408 (October 28, 2019), 84 FR 58778 at n.6 (November 1, 2019) (SR–NYSECHX–2019–12). As specified in the Fee Schedule, a User that incurs colocation fees for a particular colocation service pursuant thereto would not be subject to colocation fees for the same colocation service charged by the Affiliate SROs.

System and Consolidated Quote System (''CTA'' and ''CQ,'' respectively) data feeds and the Options Price Reporting Authority (''OPRA'') data feed.[6]

Before May 2020, connectivity to the NMS feeds was available on only the LCN and IP networks. In May 2020, the Commission approved the Exchange's proposal to offer Users access to the new ''NMS network,'' an alternate, dedicated network that connects to the NMS feeds faster than the LCN or IP networks.[7] Pursuant to that filing, the Exchange amended the notes regarding the services available in colocation to provide that if a User purchases a service that includes a 10 Gb or 40 Gb LCN or IP network connection, that service would also include a connection to the NMS network of the same size, at no additional charge.

Currently, the NMS feeds are available to Users on all three of the NMS network, IP network, and LCN, but at varying speeds. The NMS feeds are published first to the NMS network, which then republishes them to the IP network, which then republishes them to the LCN. This means that connectivity to the NMS feeds is fastest over the NMS network and slowest over the LCN. This also means that receiving the NMS feeds from more than one of these networks does not provide redundancy protection to Users; if connectivity to the NMS feeds over the NMS network were to be interrupted, so would connectivity to those feeds over the IP network and LCN, since the three networks publish the NMS feeds to each other in sequence.

Despite the Exchange's introduction of the NMS network in May 2020, some Users have failed to avail themselves of the option to receive the NMS feeds over that faster network at no additional cost. Other Users have opted to receive the NMS feeds over the NMS network, but have not yet formally asked the Exchange to stop also sending them the NMS feeds over the other networks (*i.e.,* IP network or LCN) for which those Users have ports.

At the same time, traffic over the LCN has been increasing. Increases in options trading volume in recent years on the NYSE American Options and NYSE Arca Options exchanges have increased the size of the market data feeds from those markets, thereby increasing the network bandwidth requirements overall for the market data feeds of the Exchange and the Affiliate SROs that are included in the Included Data Products (the ''NYSE Group Market Data'' feeds) over the LCN. As a result, the LCN connections over which some Users continue to receive the NMS feeds are increasingly burdened as the NYSE Group Market Data Feeds continue to grow in size.

To address these issues, the Exchange proposes to remove the NMS feeds from the Included Data Products available on the LCN. Doing so would permit Users to receive connectivity to the NYSE Group Market Data feeds over their LCN connections, while the NMS feeds would remain available to Users at no additional charge over the NMS network, at faster speeds than they were available over the LCN.

To accomplish this change, the Exchange proposes to amend General Note 5 of the Fee Schedule as follows (proposed addition italicized):

5. When a User purchases a service that includes access to the LCN or IP network it receives connectivity to any of the Included Data Products that it selects, subject to any technical provisioning requirements and authorization from the provider of the data feed. *Connectivity to the NMS feeds is not available over the LCN, but is available over the IP network and the NMS network described below in General Note 6.* Market data fees for the Included Data Products are charged by the provider of the data feed. A User can change the Included Data Products to which it receives connectivity at any time, subject to authorization from the provider of the data feed. The Exchange is not the exclusive method to connect to the Included Data Products.

Application and Impact of the Proposed Changes

Currently, 34 Users receive the NMS feeds over the LCN, but 23 of those 34 Users have access to the NMS network already enabled, such that they also receive the NMS feeds over the NMS network. To implement this proposal with respect to those 23 Users, the Exchange has notified the Users that their connections to the NMS feeds over LCN will be discontinued but that they will continue to receive the NMS feeds over the NMS network.

The other 11 Users that receive the NMS feeds over the LCN do not currently have NMS network access enabled, but are entitled to such access at no additional charge, since their existing LCN service includes a connection of the same size to the NMS network. The Exchange has notified these 11 Users that their connections to the NMS feeds over LCN will be discontinued, and all 11 of them have submitted orders to begin receiving the NMS feeds over an NMS network connection at no additional charge. The Exchange is currently in the process of installing NMS network connections for those 11 Users.[8]

Users would experience no interruption in their ability to connect to the NMS feeds as a result of the proposed change, and would receive the NMS feeds faster as a result of the proposed change. No User would be required to purchase any additional products or services from the Exchange to transition their NMS feed connectivity to the NMS network, or to an IP network connection they have already purchased.

The proposed changes would not apply differently to distinct types or sizes of market participants. Rather, they would apply to all Users equally. The purchase of any colocation service is completely voluntary and the Fee Schedule is applied uniformly to all Users.

No fees are affected by this proposal.

Implementation Date

The Exchange is in the process of transitioning all remaining Users that receive the NMS feeds over the LCN to begin receiving the feeds over NMS network connections at no additional charge. The Exchange expects this transition process to be completed before October 2022. Once that transition is complete, the Exchange proposes to implement this rule change by Customer Notice, at which point the option of receiving the NMS feeds over the LCN would be removed from the Fee Schedule.

Competitive Environment

The proposed changes are not otherwise intended to address any other issues relating to colocation services and/or related fees, and the Exchange is not aware of any problems that Users would have in complying with the proposed change.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[9] in general, and furthers the objectives of Section 6(b)(5) of the Act,[10] in particular, because it is

[6] *See id.*

[7] *See* Securities Exchange Act Release No. 88837 (May 7, 2020), 85 FR 28671 (May 13, 2020) (SR–NYSE–2019–46, SR–NYSEAMER–2019–34, SR-NYSEArca–2019–61, SR–NYSENAT–2019–19). *See also* Securities Exchange Act Release No. 88972 (May 29, 2020), 85 FR 34472 (June 4, 2020) (SR–NYSECHX–2020–18).

[8] Seven of these 11 Users also currently have access to the IP network and could have chosen to receive the NMS feeds over their IP network connections at no additional charge, but instead all 11 have opted to receive the NMS feeds over the faster NMS network.

[9] 15 U.S.C. 78f(b).

[10] 15 U.S.C. 78f(b)(5).

designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that discontinuing the availability of the NMS feeds on the LCN would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest. Users that currently receive the NMS feeds on the LCN would receive the same data at a faster speed via the NMS or IP network, with no interruption of their ability to connect to the NMS feeds. Connectivity to the NMS feeds over the NMS network would be available at no additional charge to affected Users, since their existing LCN service includes a connection of the same size to the NMS network. In addition, connectivity to the NMS feeds over the IP network would be at no additional charge to Users that have already purchased access to the IP network. The Exchange believes that providing connectivity to the same feeds at a faster speed at no additional charge would perfect the mechanisms of a free and open market and a national market system.

The Exchange believes that the proposed rule change does not significantly affect the protection of investors or the public interest. The proposed rule change would simply give Users that currently receive the NMS feeds on the LCN the opportunity to receive the same data at a faster speed via the NMS network or the IP network, at no additional charge (if they choose to receive the NMS feeds over the NMS network or an already-established IP network connection), with no interruption of their ability to connect to the NMS feeds.

The Exchange believes that discontinuing the availability of the NMS feeds on the LCN would not permit unfair discrimination between customers, issuers, brokers, or dealers, because the proposed change would apply equally to all Users that currently receive the NMS feeds over the LCN. Nor does the proposed change advantage Users of the LCN over Users of the IP network, since, as indicated in the Fee Schedule, services that include a 10 Gb or 40 Gb LCN or IP connection also include a connection to the NMS network of the same size, at no additional charge.

The Exchange believes that the proposed change would facilitate transactions in securities, remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors and the public interest because removing the NMS feeds from the LCN would permit Users to receive connectivity to the NYSE Group Market Data feeds over their LCN connections, while the NMS feeds would remain available to Users at no additional charge over the NMS network, at faster speeds than they were available over the LCN. As noted above, increases in options trading volume in recent years on the NYSE American Options and NYSE Arca Options exchanges have increased the size of the market data feeds from those markets, thereby increasing the network bandwidth requirements for the NYSE Group Market Data feeds over the LCN.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[11] the Exchange believes that the proposed rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange believes that the proposed rule change would not place any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any competitive issues, but rather would provide Users that currently receive the NMS feeds on the LCN the same data at a faster speed via the NMS or IP network, at no additional charge (if they choose to receive the NMS feeds over the NMS network or an already-established IP network connection), with no interruption of their ability to connect to the NMS feeds.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

[11] 15 U.S.C. 78f(b)(8).

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [12] and Rule 19b–4(f)(6) thereunder.[13] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[14]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [15] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSECHX–2022–15 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange

[13] 17 CFR 240.19b–4(f)(6).

[14] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires the Exchange to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[15] 15 U.S.C. 78s(b)(2)(B).

Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSECHX–2022–15. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSECHX–2022–15 and should be submitted on or before August 16, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[16]

J. Matthew DeLesDernier,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–338, OMB Control No. 3235–0376]

Submission for OMB Review; Comment Request: Extension: Schedule 14D–1F

Upon Written Request Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget this request for extension of the previously approved collection of information discussed below.

Schedule 14D–1F (17 CFR 240.14d–102) is a form that may be used by any person (the ''bidder'') making a cash tender or exchange offer for securities of any issuer (the ''target'') incorporated or organized under the laws of Canada or any Canadian province or territory that is a foreign private issuer, where less than 40% of the outstanding class of the target's securities that is the subject of the offer is held by U.S. holders. Schedule 14D–1F is designed to facilitate cross-border transactions in the securities of Canadian issuers. The information required to be filed with the Commission provides security holders with material information regarding the bidder as well as the transaction so that they may make informed investment decisions. The information provided is mandatory and all information is made available to the public upon request. Schedule 14D–1F takes approximately 2 hours per response to prepare and is filed by approximately 2 respondents annually for a total reporting burden of 4 hours (2 hours per response × 2 responses).

An agency may conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

The public may view background documentation for this information collection at the following website: *www.reginfo.gov*. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice by August 25, 2022 to (i) *www.reginfo.gov/public/do/PRAMain* and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549, or by sending an email to: *PRA_Mailbox@sec.gov*.

Dated: July 20, 2022.

J. Matthew DeLesDernier,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95329; File No. SR–NASDAQ–2022–043]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Extend the Current Pilot Program Related to Nasdaq Equity 11, Rule 11890 (Clearly Erroneous Transactions) to the Close of Business on October 20, 2022

July 20, 2022.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 19, 2022, The Nasdaq Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to extend the current pilot program related to Nasdaq Equity 11, Rule 11890 (Clearly Erroneous Transactions) to the close of business on October 20, 2022.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/nasdaq/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[16] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to extend the current pilot program related to Equity 11, Rule 11890, Clearly Erroneous Transactions, to the close of business on October 20, 2022. The pilot program is currently due to expire on July 20, 2022.

On September 10, 2010, the Commission approved, on a pilot basis, changes to Equity 11, Rule 11890 that, among other things: (i) provided for uniform treatment of clearly erroneous execution reviews in multi-stock events involving twenty or more securities; and (ii) reduced the ability of the Exchange to deviate from the objective standards set forth in the rule.[3] In 2013, the Exchange adopted a provision designed to address the operation of the Plan.[4] Finally, in 2014, the Exchange adopted two additional provisions providing that: (i) a series of transactions in a particular security on one or more trading days may be viewed as one event if all such transactions were effected based on the same fundamentally incorrect or grossly misinterpreted issuance information resulting in a severe valuation error for all such transactions; and (ii) in the event of any disruption or malfunction in the operation of the electronic communications and trading facilities of an Exchange, another SRO, or responsible single plan processor in connection with the transmittal or receipt of a trading halt, an Officer, acting on his or her own motion, shall nullify any transaction that occurs after a trading halt has been declared by the primary listing market for a security and before such trading halt has officially ended according to the primary listing market.[5]

These changes were originally scheduled to operate for a pilot period to coincide with the pilot period for the Plan to Address Extraordinary Market Volatility (the ''Limit Up-Limit Down Plan'' or ''LULD Plan'').[6] In April 2019, the Commission approved an amendment to the LULD Plan for it to operate on a permanent, rather than pilot, basis.[7] In light of that change, the Exchange amended Equity 11, Rule 11890 to untie the pilot program's effectiveness from that of the LULD Plan and to extend the pilot's effectiveness to the close of business on October 18, 2019.[8] Subsequently, the Exchange amended Rule 11890 to extend the pilot's effectiveness to the close of business on July 20, 2022.[9]

The Exchange now proposes to amend Equity 11, Rule 11890 to extend the pilot's effectiveness for a further three months until the close of business on October 20, 2022. If the pilot period is not either extended, replaced or approved as permanent, the prior versions of paragraphs (a)(2)(C), (c)(1), (b)(i), and (b)(ii) shall be in effect, and the provisions of paragraphs (g) through (i) shall be null and void.[10] In such an event, the remaining sections of Rule 11890 would continue to apply to all transactions executed on the Exchange. The Exchange understands that the other national securities exchanges and Financial Industry Regulatory Authority (''FINRA'') will also file similar proposals to extend their respective clearly erroneous execution pilot programs, the substance of which are identical to Rule 11890.

The Exchange does not propose any additional changes to Equity 11, Rule 11890. Extending the effectiveness of Rule 11890 for an additional three months will provide the Exchange and other self-regulatory organizations additional time to consider whether further amendments to the clearly erroneous execution rules are appropriate.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of Section 6(b) of the Act,[11] in general, and Section 6(b)(5) of the Act,[12] in particular, in that it is designed to remove impediments to and perfect the mechanism of a free and open market and a national market system, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest and not to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that the proposed rule change promotes just and equitable principles of trade in that it promotes transparency and uniformity across markets concerning review of transactions as clearly erroneous. The Exchange believes that extending the clearly erroneous execution pilot under Equity 11, Rule 11890 for an additional three months would help assure that the determination of whether a clearly erroneous trade has occurred will be based on clear and objective criteria, and that the resolution of the incident will occur promptly through a transparent process. The proposed rule change would also help assure consistent results in handling erroneous trades across the U.S. equities markets, thus furthering fair and orderly markets, the protection of investors and the public interest. Based on the foregoing, the Exchange believes the amended clearly erroneous executions rule should continue to be in effect on a pilot basis while the Exchange and other self-regulatory organizations consider whether further amendments to these rules are appropriate.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposal would ensure the continued, uninterrupted operation of harmonized clearly erroneous execution rules across the U.S. equities markets while the Exchange and other self-regulatory organizations consider whether further amendments to these rules are appropriate. The Exchange understands that the other national securities exchanges and FINRA will also file similar proposals to extend their respective clearly erroneous execution pilot programs. Thus, the proposed rule change will help to ensure consistency across market centers without implicating any competitive issues.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

[11] 15 U.S.C. 78f(b).

[12] 15 U.S.C. 78f(b)(5).

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [13] and Rule 19b–4(f)(6) thereunder.[14] Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act [15] and subparagraph (f)(6) of Rule 19b–4 thereunder.[16]

A proposed rule change filed under Rule 19b–4(f)(6) [17] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[18] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange asked that the Commission waive the 30 day operative delay so that the proposal may become operative immediately upon filing. Waiver of the 30-day operative delay would extend the protections provided by the current pilot program, without any changes, while a permanent proposal for clearly erroneous execution reviews is being considered.[19] For this reason, the Commission hereby waives the 30-day operative delay and designates the proposed rule change as operative upon filing.[20]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NASDAQ–2022–043 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street, NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2022–043. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NASDAQ–2022–043 and should be submitted on or before August 16, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[21]

J. Matthew DeLesDernier,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95326; File No. SR–OCC–2022–802]

Self-Regulatory Organizations; The Options Clearing Corporation; Notice of Filing of Advance Notice Related to a Master Repurchase Agreement as Part of The Options Clearing Corporation's Overall Liquidity Plan

July 20, 2022.

Pursuant to Section 806(e)(1) of Title VIII of the Dodd-Frank Wall Street Reform and Consumer Protection Act, entitled Payment, Clearing and Settlement Supervision Act of 2010 (''Clearing Supervision Act'') [1] and Rule 19b–4(n)(1)(i) [2] under the Securities Exchange Act of 1934 (''Exchange Act'' or ''Act''),[3] notice is hereby given that on July 7, 2022, The Options Clearing Corporation (''OCC'') filed with the Securities and Exchange Commission (''Commission'') an advance notice as described in Items I, II and III below, which Items have been prepared primarily by OCC. The Commission is publishing this notice to solicit comments on the advance notice from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Advance Notice

This advance notice is submitted in connection a proposed change to its operations in the form of executing a committed master repurchase agreement with a bank counterparty as part of OCC's overall liquidity plan. The proposed changes do not require any changes to the text of OCC's By-Laws or Rules. All terms with initial capitalization that are not otherwise defined herein have the same meaning as set forth in the OCC By-Laws and Rules.[4]

[1] 12 U.S.C. 5465(e)(1).

[2] 17 CFR 240.19b–4(n)(1)(i).

[3] 15 U.S.C. 78a *et seq.*

[4] OCC's By-Laws and Rules can be found on OCC's public website: *https://www.theocc.com/Company-Information/Documents-and-Archives/By-Laws-and-Rules.*

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Advance Notice

In its filing with the Commission, OCC included statements concerning the purpose of and basis for the advance notice and discussed any comments it received on the advance notice. The text of these statements may be examined at the places specified in Item IV below. OCC has prepared summaries, set forth in sections (A) and (B) below, of the most significant aspects of these statements.

(A) Clearing Agency's Statement on Comments on the Advance Notice Received From Members, Participants or Others

Written comments were not and are not intended to be solicited with respect to the advance notice and none have been received. OCC will notify the Commission of any written comments received by OCC.

(B) Advance Notices Filed Pursuant to Section 806(e) of the Payment, Clearing, and Settlement Supervision Act

Description of the Proposed Change

As the sole clearing agency for standardized U.S. securities options listed on national securities exchanges registered with the Commission (''listed options''), OCC is obligated to make certain payments. In the event of a Clearing Member default, OCC would be obligated to make payments, on time, related to that member's clear transactions. To meet such payment obligations, OCC maintains access to cash from a variety of sources, including, a requirement for members to pledge cash collateral to OCC and various agreements with banks and other counterparties (''liquidity facilities'') to provide OCC with cash in exchange for collateral, such as U.S. Government securities. OCC routinely considers potential market stress scenarios that could affect such payment obligations. Based on such considerations, OCC now believes that it should seek to expand its liquidity facility to increase OCC's access to cash to manage a member default.

OCC is proposing to expand its liquidity facilities to include a new arrangement with a bank to provide cash to OCC. Specifically, this advance notice concerns a change to OCC's operations to execute a master repurchase agreement with a bank counterparty as part of OCC's overall liquidity plan, which includes OCC's arrangements to access cash in exchange for U.S. Government securities deposited by Clearing Members in respect of their Clearing Fund requirements to meet OCC's settlement obligations. OCC is not, as part of this advance notice, proposing to require its members or other market participants provide additional or different collateral to OCC. Rather, the purpose of the proposal is to provide OCC with another vehicle for accessing cash to meet its payment obligations, including in the event that one of its members fails to meet its payment obligations to OCC.[5]

Background

OCC's current liquidity plan provides it with access to a diverse set of funding sources, including banks (*i.e.,* OCC's syndicated credit facility),[6] the Non-Bank Liquidity Facility program,[7] and Clearing Members' Cash Clearing Fund Requirement.[8] OCC is proposing to add to these sources a master repurchase agreement (''MRA'') with a bank counterparty (the ''Bank Repo Facility program''). This program would mirror the Repo Liquidity Facility that OCC executed with a bank counterparty in 2020 after obtaining a notice of no objection from the Commission (''2020 Bank Repo Facility''),[9] except that in this case, the committed amount will be up to $1 billion (as opposed to $500 million) and the bank counterparty will be one to which OCC has minimal other credit exposure. The counterparty would be one that has already been approved by OCC as a liquidity provider and would be subject to routine monitoring under OCC's Third-Party Risk Management Framework,[10] which meets or exceeds the monitoring process discussed in the advance notice for the 2020 Bank Repo Facility.[11]

Although the MRA would be based on the standard form of master repurchase agreement,[12] OCC would require the MRA, or an annex thereto, to contain certain additional provisions tailored to help ensure certainty of funding and operational effectiveness, as described in more detail below. OCC believes that these provisions are necessary and appropriate to integrate the program into its operations and in order to promote safety and soundness consistent with OCC's systemic responsibilities. OCC provided a summary of the additional terms and conditions (''Summary of Terms'') as presented to the Board in confidential Exhibit 3 to File No. SR–OCC–2022–802.[13] Because the arrangements between OCC and the bank counterparty have not been fully negotiated, OCC has identified the following as key standards that would need to be incorporated into the MRA.

The Proposed Program: Standard Repurchase Agreement Terms

The MRA would be structured like a typical repurchase arrangement in which the buyer (*i.e.,* the bank counterparty) would purchase from OCC, from time to time, U.S. Government securities (''Eligible Securities'').[14] OCC, as the seller, would transfer Eligible Securities to the buyer in exchange for a payment by the buyer to OCC in immediately available funds (''Purchase Price''). The buyer would simultaneously agree to transfer the purchased securities back to OCC at a specified later date (''Repurchase Date'') or on OCC's demand against the transfer of funds by OCC to the buyer in an amount equal to the outstanding Purchase Price plus the accrued and

[5] OCC may also use the Clearing Fund to address liquidity shortfalls arising from the failure of any bank, securities or commodities clearing organization, or investment counterparty to perform any obligation to OCC when due. *See* OCC Rule 1006(f)(1)(C); Exchange Act Release No. 94304 (Feb. 24, 2022), 87 FR 11776 (Mar. 2, 2022) (SR–OCC–2021–014).

[6] *See* Exchange Act Release No. 88971 (May 28, 2020), 85 FR 34257 (June 3, 2020) (SR–OCC–2020–804).

[7] *See* Exchange Act Release No. 89039 (June 10, 2020), 85 FR 36444 (June 16, 2020) (SR–OCC–2020–803); Exchange Act Release No. 76821 (Jan. 4, 2016), 81 FR 3208 (Jan. 20, 2016) (SR–OCC–2015–805); Exchange Act Release No. 73979 (Jan. 2, 2015), 80 FR 1062 (Jan. 8, 2015) (SR–OCC–2014–809).

[10] *See* Exchange Act Release No. 90797 (Dec. 23, 2020), 85 FR 86592 (Dec. 30, 2020) (SR–OCC–2020–014). The Third-Party Risk Management Framework is available on OCC's public website. *See* Documents & Archives, *https://www.theocc.com/Company-Information/Documents-and-Archives.*

[11] *See* Exchange Act Release No. 88120 (Feb. 5, 2020), 85 FR 7812 (Feb. 11, 2020) (SR–OCC–2020–801).

[12] The standard form master repurchase agreement is published by the Securities Industry and Financial Markets Association (''SIFMA'') and is commonly used in the repurchase market by institutional investors.

[13] In addition to the Summary of Terms, the confidential Exhibit 3 to File No. SR–OCC–2022–802 includes a summary of OCC management's recommendation to expand OCC's external liquidity sources as well as a discussion of the analysis underlying that recommendation.

[14] OCC would use U.S. government securities that are included in Clearing Fund contributions by Clearing Members and margin deposits of any Clearing Member that has been suspended by OCC for the repurchase arrangements. OCC Rule 1006(f) and OCC Rule 1104(b) authorize OCC to obtain funds from third parties through securities repurchases using these sources. The officers who may exercise this authority include the Chairman, Chief Executive Officer, and Chief Operating Officer.

unpaid price differential (together, ''Repurchase Price''), which is the interest component of the Repurchase Price.

At all times while a transaction is outstanding, OCC would be required to maintain a specified amount of securities or cash margin with the buyer.[15] The market value of the securities supporting each transaction would be determined daily, typically based on a price obtained from a generally recognized pricing source. If the market value of the purchased securities is determined to have fallen below OCC's required margin, OCC would be required to transfer to the buyer sufficient cash or additional securities reasonably acceptable to the buyer so that OCC's margin requirement is satisfied.[16] If the market value of the purchased securities is determined to have risen to above OCC's required margin, OCC would be permitted to require the return of excess purchased securities from the buyer.

As in a typical master repurchase agreement, an event of default would occur with respect to the buyer if the buyer failed to purchase securities on a Purchase Date, failed to transfer purchased securities on any applicable Repurchase Date, or failed to transfer any interest, dividends or distributions on purchased securities to OCC within a specified period after receiving notice of such failure. An event of default would occur with respect to OCC if OCC failed to transfer purchased securities on a Purchase Date or failed to repurchase purchased securities on an applicable Repurchase Date. The MRA would also provide for standard events of default for either party, including a party's failure to maintain required margin or an insolvency event with respect to the party. Upon the occurrence of an event of default, the non-defaulting party, at its option, would have the right to accelerate the Repurchase Date of all outstanding transactions between the defaulting party and the non-defaulting party, among other rights. For example, if OCC were the defaulting party with respect to a transaction and the buyer chose to terminate the transaction, OCC would be required to immediately transfer the Repurchase Price to the buyer. If the buyer were the defaulting party with respect to a transaction and OCC chose to terminate the transaction, the buyer would be required to deliver all purchased securities to OCC. If OCC or the buyer did not timely perform, the non-defaulting party would be permitted to buy or sell, or deem itself to have bought or sold, securities as needed to be made whole and the defaulting party would be required to pay the costs related to any covering transactions. Additionally, if OCC was required to obtain replacement securities as a result of an event of default, the buyer would be required to pay the excess of the price paid by OCC to obtain replacement securities over the Repurchase Price.

The Proposed Program: Customized Features To Promote Certainty of Funding and Operational Effectiveness

In addition to the typical repurchase arrangements, OCC would require the MRA, or an annex thereto, to contain certain additional provisions tailored to help ensure certainty of funding and operational effectiveness.[17]

Commitment to Fund

The buyer would provide a funding commitment of up to $1 billion, with the commitment extending for one year (plus or minus one day). The buyer would be obligated to enter into transactions under the MRA up to its committed amount so long as no default had occurred and OCC transferred sufficient Eligible Securities. The buyer would be obligated to enter into transactions even if OCC had experienced a material adverse change, such as the failure of a Clearing Member. This commitment to provide funding would be a key departure from ordinary repurchase arrangements and a key requirement for OCC.

Funding Mechanics

Funding mechanics would be targeted so that OCC would receive the Purchase Price in immediately available funds within 60 minutes of its request for funds and delivery of Eligible Securities and, if needed, prior to OCC's regular daily settlement time.[18] These targeted funding mechanics would allow OCC to receive needed liquidity in time to satisfy settlement obligations, even in the event of a default by a Clearing Member or a market disruption. The funding mechanism may be, for example, delivery versus payment/receive versus payment[19] or another method acceptable to OCC that both satisfies the objectives of the Bank Repo Facility and presents limited operational risks.[20]

No Rehypothecation

The buyer would not be permitted to grant any third party an interest in purchased securities. This requirement is important to reduce the risk that a third party could interfere with the buyer's transfer of the purchased securities on the Repurchase Date. Further, the buyer would agree to provide OCC with daily information about the account the buyer uses to hold the purchased securities. This visibility would allow OCC to act quickly in the event the buyer violates any requirements.

Early Termination Rights

OCC would have the ability to terminate any transaction upon written notice to the buyer, but the buyer would only be able to terminate a transaction upon the occurrence of an event of default with respect to OCC, as further described below. A notice of termination by OCC would specify a new Repurchase Date prior to the originally agreed upon Repurchase Date. Upon the early termination of a transaction, the buyer would be required to return all purchased securities to OCC and OCC would be required to pay the Repurchase Price. This optional early termination right is important to OCC because OCC's liquidity needs may change unexpectedly over time and as a result OCC may not want to keep a transaction outstanding as long as originally planned.

Substitution

OCC would have the ability to substitute any Eligible Securities for purchased securities in its discretion by a specified time, so long as the Eligible Securities satisfy any applicable criteria contained in the MRA and the transfer of the Eligible Securities would not create a margin deficit, as described

[15] OCC expects that it would be required to maintain margin equal to 102% of the Repurchase Price, which is a standard rate for arrangements involving Government securities.

[16] OCC expects that it would use Clearing Fund securities and securities posted as margin by defaulting Clearing Members, as more fully discussed in footnote 14.

[17] OCC expects that the MRA will also include other, more routine, provisions such as the method for giving notices and basic due authorization representations by the parties.

[18] This would include OCC's regular daily settlement time and any extended settlement time implemented by OCC in an emergency situation under Rule 505.

[19] Delivery versus payment/receive versus payment is a method of settlement under which payment for securities must be made prior to or simultaneously with delivery of the securities.

[20] Unlike for the Non-Bank Liquidity Facility, OCC would not require the Bank Repo Facility counterparty to maintain cash and investments in a designated account in which OCC has visibility. OCC required a designated account for Non-Bank Liquidity Facility counterparties in order to facilitate prompt funding by counterparties that, unlike the Bank Repo Facility counterparty, are not commercial banks and therefore are not in the business of daily funding.

above.[21] This substitution right is important to OCC because it must be able to manage requests of Clearing Members to return excess or substitute Eligible Securities in accordance with established operational procedures.

Events of Default

Beyond the standard events of default for a failure to purchase or transfer securities on the applicable Purchase Date or Repurchase Date, as described above, OCC would require that the MRA not contain any additional events of default that would restrict OCC's access to funding. Most importantly, OCC would require that it would not be an event of default if OCC suffers a ''material adverse change.'' [22] This provision is important because it provides OCC with certainty of funding, even in difficult market conditions.

The agreement also provides that upon the occurrence of an event of default, in addition to the non-defaulting party's right to accelerate the Repurchase Date of all outstanding transactions or to buy or sell securities as needed to be made whole, the non-defaulting party may elect to take the actions specified in a ''mini close-out'' provision of the MRA rather than declaring an event of default. For example, if the buyer fails to transfer purchased securities on the applicable Repurchase Date, rather than declaring an event of default, OCC may (1) if OCC has already paid the Repurchase Price, require the buyer to repay the Repurchase Price, (2) if there is a margin excess, require the buyer to pay cash or delivered purchased securities in an amount equal to the margin excess, or (3) declare that the applicable transaction, and only that transaction, will be immediately terminated, and apply default remedies under the MRA to only that transaction. Therefore, if the buyer fails to deliver purchased securities on any Repurchase Date, OCC would have remedies that allow it to mitigate risk with respect to a particular transaction, without declaring an event of default with respect to all transactions under the MRA.

The Proposed Program: Annual Renewal

As discussed above, MRA would be for an annual term. OCC anticipates that it will renew the MRA with the same bank counterparty based on the same or substantially similar terms. At each renewal, OCC would evaluate the commitment amount so that OCC's available liquidity resources remain properly calibrated to its activities and settlement obligations. OCC would submit another advance notice with respect to such renewal for the same term only if: (i) OCC determines its liquidity needs merit funding levels above the $1 billion, (ii) OCC should seek to change the terms and conditions of the MRA in a manner that materially affects the nature or level of risk presented by OCC,[23] (iii) OCC should seek to add counterparties or substitute the bank counterparty to the Bank Repo Facility program, or (iv) the bank counterparty has experienced a negative change to its credit profile or a material adverse change since the latest renewal of the MRA. As such, annual renewals for the Bank Liquidity Facility would proceed in a similar manner to renewals of term commitments under the Non-Bank Liquidity Facility—another MRA liquidity source.[24]

OCC does not believe that, absent one or more of the changes described above, renewal of the MRA would constitute a change to OCC's operations that could materially affect the nature or level of risks presented by OCC so as to require an advance notice under Section 806(e)(1) of the Clearing Supervision Act.[25] Accordingly OCC would consider such a renewal to be on substantially the same terms and conditions such that executing such renewal would not be subject to the requirement to file an advance notice filing pursuant to Section 806(e)(1) of the Clearing Supervision Act.[26] If OCC determines to make changes to the Bank Repo Facility in a subsequent filing, it would include in that filing the proposed conditions to the terms of any renewals that could be done without an additional advance notice.

Anticipated Effect on and Management of Risk

Completing timely settlement is a key aspect of OCC's role as a clearing agency performing central counterparty services. OCC believes that the overall impact of the Bank Repo Facility on the risks presented by OCC would be to reduce settlement risk associated with OCC's operations as the clearing agency for all listed options. The Bank Repo Facility would reduce settlement risk by providing an additional source of liquidity that would promote the reduction of risks to OCC, its Clearing Members and the options market in general because it would allow OCC to obtain short-term funds to address liquidity demands arising out of the default or suspension of a Clearing Member, in anticipation of a potential default or suspension of Clearing Members, the insolvency of a bank, another securities or commodities clearing organization, or a counterparty with which OCC has invested Clearing Member funds, or the failure of such a bank, clearing organization or investment counterparty to meet an obligation to OCC when due. The resulting reduction in OCC settlement risk would lead to a corresponding reduction in systemic risk and would have a positive impact on the safety and soundness of the clearing system by enabling OCC to have continuous access to funds to settle its obligations to its Clearing Members. In order to sufficiently perform this key role in promoting market stability, it is critical that OCC continuously has access to funds to settle its obligations.

Providing for another committed source of liquidity resources would also help OCC manage the allocation between its sources of liquidity by giving OCC more flexibility to adjust the

[21] In addition to its substitution rights, OCC could cause the return of purchased securities by exercising its optional early termination rights under the Master Repurchase Agreement. If OCC were to terminate the transaction, the buyer would be required to return purchased securities to OCC against payment of the corresponding Repurchase Price.

[22] When included in a contract, a ''material adverse change'' is typically defined as a change that would have a materially adverse effect on the business or financial condition of a company.

[23] For the purposes of clarity, OCC would not consider changes to pricing or changes in representations, covenants, and terms of events of default, to be changes to a term or condition that would require the filing of a subsequent advance notice provided that pricing is at the then prevailing market rate and changes to such other provisions are immaterial to OCC as the seller and do not impair materially OCC's ability to draw against the facility.

[24] *See* Exchange Act Release No. 76821, 81 FR at 3209 (describing OCC's proposal to submit an advance notice in connection with a renewal of commitments under the Non-Bank Liquidity Facility if: (i) OCC determined that its liquidity needs merited commitments above or below certain levels; (ii) OCC should seek to change the terms and conditions of the Non-Bank Liquidity Facility; and (iii) the commitment counterparty experienced a negative change to its credit profile or a material adverse change since entering the commitment or the latest renewal of the commitment). OCC subsequently submitted an advance notice pursuant to that commitment to support its ability to onboard multiple liquidity providers below the identified thresholds and with different term lengths to replace expiring commitments, *see* Exchange Act Release No. 89039, 85 FR at 36445–46, and has, concurrent with the filing of SR–OCC–2022–802, submitted another advance notice to eliminate the current cap to that program in favor of a floor for external liquidity across all sources. The Bank Repo Facility would retain a cap and a limit on adding new counterparties because OCC is proposing this facility as a discrete MRA with a single counterparty. To the extent OCC determines to add additional commitments or counterparties to the Bank Repo Facility in the future, OCC would first file an advance notice.

[25] 12 U.S.C. 5465(e)(1).

[26] *Id.*

mix of liquidity resources based on market conditions, availability and shifting liquidity needs. If circumstances arise that affect OCC's current liquidity resources from another of its facilities, an additional source of liquidity resources would allow OCC to reallocate liquidity resources as necessary to avoid a shortfall in its overall liquidity resources.[27]

The Bank Repo Facility, like any liquidity source, would involve certain risks, but OCC would structure the program to mitigate those risks. Most of these risks are standard in any master repurchase agreement. For example, the buyer could fail to deliver, or delay in delivering, purchased securities to OCC by the applicable Repurchase Date. OCC will address this risk by seeking a security interest from the buyer in that portion of the purchased securities representing the excess of the market value over the Repurchase Price, or by obtaining other comfort from the buyer that the purchased securities will be timely returned. Further, the purchased securities generally will not be ''on-the-run'' securities, *i.e.,* the most recently issued Treasury securities. The demand in the marketplace for Treasury securities, for uses other than collateral, is much greater for on-the-run Treasury securities, and therefore, OCC believes the buyer will have little incentive to retain the securities transferred by OCC.

The mechanics under the Bank Repo Facility would be structured so that OCC could avoid losses by paying the Repurchase Price. For example, OCC will have optional early termination rights, under which OCC would be able to accelerate the Repurchase Date of any transaction by providing written notice to the buyer and paying the Repurchase Price. Through this mechanism, OCC can maintain the benefit of the Bank Repo Facility, while mitigating any risk associated with a particular transaction.

The Bank Repo Facility would be structured to avoid potential third-party risks, which are typical of repurchase arrangements. The prohibition on buyer rehypothecation and use of purchased securities would reduce the risk to OCC of a buyer default.

As with any repurchase arrangement, OCC is subject to the risk that it may have to terminate existing transactions and accelerate the applicable Repurchase Date with respect to the buyer due to changes in the financial health or performance of the buyer. Terminating transactions could negatively affect OCC's liquidity position. However, any negative effect is reduced by the fact that OCC maintains a number of different financing arrangements, and thus will have access to liquidity sources in the event the Bank Repo Facility is no longer a viable source.

Under the MRA, OCC would be obligated to transfer additional cash or securities as margin in the event the market value of any purchased securities decreases. OCC seeks to ensure it can meet any such obligation by monitoring the value of the purchased securities and maintaining adequate cash resources to make any required payments. Such payments are expected to be small in comparison to the total amount of cash received for each transfer of purchased securities.

Consistency With the Payment, Clearing and Settlement Supervision Act

The stated purpose of the Clearing Supervision Act is to mitigate systemic risk in the financial system and promote financial stability by, among other things, promoting uniform risk management standards for systemically important financial market utilities and strengthening the liquidity of systemically important financial market utilities.[28] Section 805(a)(2) of the Clearing Supervision Act [29] also authorizes the Commission to prescribe risk management standards for the payment, clearing and settlement activities of designated clearing entities, like OCC, for which the Commission is the supervisory agency. Section 805(b) of the Clearing Supervision Act [30] states that the objectives and principles for risk management standards prescribed under Section 805(a) shall be to:

- promote robust risk management;
- promote safety and soundness;
- reduce systemic risks; and
- support the stability of the broader financial system.

The Commission has adopted risk management standards under Section 805(a)(2) of the Clearing Supervision Act and the Exchange Act in furtherance of these objectives and principles.[31] Rule 17Ad–22 requires registered clearing agencies, like OCC, to establish, implement, maintain, and enforce written policies and procedures that are reasonably designed to meet certain minimum requirements for their operations and risk management practices on an ongoing basis.[32] Therefore, the Commission has stated [33] that it believes it is appropriate to review changes proposed in advance notices against Rule 17Ad–22 and the objectives and principles of these risk management standards as described in Section 805(b) of the Clearing Supervision Act.[34]

OCC believes that the proposed changes are consistent with Section 805(b)(1) of the Clearing Supervision Act [35] because the proposed Bank Repo Facility would provide OCC with an additional source of committed liquidity to meet its settlement obligations while at the same time being structured to mitigate certain operational risks, as described above, that arise in connection with this committed liquidity source. In this way, the proposed changes are designed to promote robust risk management; promote safety and soundness; reduce systemic risks; and support the stability of the broader financial system.

OCC believes that the Bank Repo Facility is also consistent with the requirements of Rule 17Ad–22(e)(7) under the Act.[36] Rule 17Ad–22(e)(7) requires OCC to establish, implement, maintain and enforce written policies and procedures reasonably designed to effectively measure, monitor, and manage liquidity risk that arises in or is borne by OCC, including measuring, monitoring, and managing its settlement and funding flows on an ongoing and timely basis, and its use of intraday liquidity, as specified in the rule.[37] In particular, Rule 17Ad–22(e)(7)(i) under the Act [38] directs that OCC meet this obligation by, among other things, ''[m]aintaining sufficient liquid resources at the minimum in all relevant currencies to effect same-day . . . settlement of payment obligations with a high degree of confidence under a wide range of foreseeable stress scenarios that includes, but is not limited to, the default of the participant family that would generate the largest aggregate payment obligation for [OCC] in extreme but plausible market conditions.''

As described above, the Bank Repo Facility would provide OCC with a readily available liquidity resource that

[27] For example, OCC has authority under OCC Rule 1002(a)(i) to temporarily increase the cash funding requirement in its Clearing Fund for the protection of OCC, Clearing Members or the general public.

[37] *Id.*

[38] 17 CFR 240.17Ad–22(e)(7)(i).

would enable it to, among other things, continue to meet its obligations in a timely fashion and as an alternative to selling Clearing Member collateral under what may be stressed and volatile market conditions. For these reasons, OCC believes that the proposal is consistent with Rule 17Ad–22(e)(7)(i).[39]

Rule 17Ad–22(e)(7)(ii) under the Act requires OCC to establish, implement, maintain and enforce written policies and procedures reasonably designed to hold qualifying liquid resources sufficient to satisfy payment obligations owed to Clearing Members.[40] Rule 17Ad–22(a)(14) of the Act defines ''qualifying liquid resources'' to include, among other things, lines of credit without material adverse change provisions, that are readily available and convertible into cash.[41] The MRA under the Bank Repo Facility would not be subject to any material adverse change provision and would be designed to permit OCC to, among other things, help ensure that OCC has sufficient, readily-available qualifying liquid resources to meet the cash settlement obligations of its largest Clearing Member Group. Therefore, OCC believes that the proposal is consistent with Rule 17Ad–22(e)(7)(ii).[42]

For the foregoing reasons, OCC believes that the proposed changes are consistent with Section 805(b)(1) of the Clearing Supervision Act[43] and Rule 17Ad–22(e)(7)[44] under the Act.

III. Date of Effectiveness of the Advance Notice and Timing for Commission Action

The proposed change may be implemented if the Commission does not object to the proposed change within 60 days of the later of (i) the date the proposed change was filed with the Commission or (ii) the date any additional information requested by the Commission is received. OCC shall not implement the proposed change if the Commission has any objection to the proposed change.

The Commission may extend the period for review by an additional 60 days if the proposed change raises novel or complex issues, subject to the Commission providing the clearing agency with prompt written notice of the extension. A proposed change may be implemented in less than 60 days from the date the advance notice is filed, or the date further information requested by the Commission is received, if the Commission notifies the clearing agency in writing that it does not object to the proposed change and authorizes the clearing agency to implement the proposed change on an earlier date, subject to any conditions imposed by the Commission.

OCC shall post notice on its website of proposed changes that are implemented. The proposal shall not take effect until all regulatory actions required with respect to the proposal are completed.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the advance notice is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–OCC–2022–802 on the subject line.

Paper Comments

- Send paper comments in triplicate to Vanessa Countryman, Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–OCC–2022–802. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the advance notice that are filed with the Commission, and all written communications relating to the advance notice between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of OCC and on OCC's website at *https://www.theocc.com/Company-Information/Documents-and-Archives/By-Laws-and-Rules.*

All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly.

All submissions should refer to File Number SR–OCC–2022–802 and should be submitted on or before August 16, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[45]

J. Matthew DeLesDernier,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–049, OMB Control No. 3235–0070]

Submission for OMB Review; Comment Request: Extension: Form 10–Q

Upon Written Request Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget this request for extension of the previously approved collection[s] of information discussed below.

Form 10–Q (17 CFR 249.308a) is filed by issuers of securities to satisfy their quarterly reporting obligations pursuant to Section 13 or 15(d) of the Exchange Act (''Exchange Act'') (15 U.S.C. 78m or 78o(d)). The information provided by Form 10–Q is intended to ensure the adequacy of information available to investors about an issuer. Form 10–Q takes approximately 182.08663 hours per response to prepare and is filed by approximately 22,925 respondents. We estimated that 75% of the approximately 182.08663 hours per response (136.56497 hours) is prepared by the company for an annual reporting burden of 3,130,752 hours (136.56497 hours per response × 22,925 responses).

An agency may conduct or sponsor, and a person is not required to respond

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95338; File No. SR–NYSEAMER–2022–28]

Self-Regulatory Organizations; NYSE American LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the NYSE American Equities Price List and Fee Schedule and the NYSE American Options Fee Schedule Related to Colocation

July 20, 2022.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that on July 6, 2022, NYSE American LLC (''NYSE American'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the NYSE American Equities Price List and Fee Schedule and the NYSE American Options Fee Schedule (together, the ''Price List and Fee Schedule'') related to colocation to specify that the NMS feeds that are included in the Included Data Products are no longer available over the Liquidity Center Network (''LCN''). The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Price List and Fee Schedule related to colocation to specify that the NMS feeds that are included in the Included Data Products are no longer available over the Liquidity Center Network (''LCN'').[4]

Background

The LCN and the IP network are the two local area networks in the Mahwah Data Center that are available to Users.[5] General Note 5 of the Price List and Fee Schedule explains that when a User purchases a service that includes access to the LCN or IP network, it receives connectivity to any of the ''Included Data Products'' that it selects, subject to any technical provisioning requirements and authorization from the provider of the data feed. The Included Data Products include, among others, the ''NMS feeds,'' which are the Consolidated Tape System and Consolidated Quote System (''CTA'' and ''CQ,'' respectively) data feeds and the Options Price Reporting Authority (''OPRA'') data feed.[6]

Before May 2020, connectivity to the NMS feeds was available on only the LCN and IP networks. In May 2020, the Commission approved the Exchange's proposal to offer Users access to the new ''NMS network,'' an alternate, dedicated network that connects to the NMS feeds faster than the LCN or IP networks.[7] Pursuant to that filing, the Exchange amended the notes regarding the services available in colocation to provide that if a User purchases a service that includes a 10 Gb or 40 Gb LCN or IP network connection, that service would also include a connection to the NMS network of the same size, at no additional charge.

Currently, the NMS feeds are available to Users on all three of the NMS network, IP network, and LCN, but at varying speeds. The NMS feeds are published first to the NMS network, which then republishes them to the IP network, which then republishes them to the LCN. This means that connectivity to the NMS feeds is fastest over the NMS network and slowest over the LCN. This also means that receiving the NMS feeds from more than one of these networks does not provide redundancy protection to Users; if connectivity to the NMS feeds over the NMS network were to be interrupted, so would connectivity to those feeds over the IP network and LCN, since the three networks publish the NMS feeds to each other in sequence.

Despite the Exchange's introduction of the NMS network in May 2020, some Users have failed to avail themselves of the option to receive the NMS feeds over that faster network at no additional cost. Other Users have opted to receive the NMS feeds over the NMS network, but have not yet formally asked the Exchange to stop also sending them the NMS feeds over the other networks (*i.e.,*

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] The Exchange is an indirect subsidiary of Intercontinental Exchange, Inc. (''ICE''). Each of the Exchange's affiliates New York Stock Exchange, LLC, NYSE Arca, Inc., NYSE Chicago, Inc., and NYSE National, Inc. (together, the ''Affiliate SROs'') has submitted substantially the same proposed rule change to propose the changes described herein. *See* SR–NYSE–2022–27, SR–NYSEArca–2022–39, SR–NYSECHX–2022–15, and SR–NYSENAT–2022–10.

[5] For purposes of the Exchange's colocation services, a ''User'' means any market participant that requests to receive colocation services directly from the Exchange. *See* Securities Exchange Act Release No. 76009 (September 29, 2015), 80 FR 60213 (October 5, 2015) (SR–NYSEMKT–2015–67). As specified in the Price List and Fee Schedule, a User that incurs colocation fees for a particular colocation service pursuant thereto would not be subject to colocation fees for the same colocation service charged by the Affiliate SROs.

[6] *See* Securities Exchange Act Release No. 79728 (January 4, 2017), 82 FR 3035 (January 10, 2017) (SR–NYSEMKT–2016–126).

[7] *See* Securities Exchange Act Release No. 88837 (May 7, 2020), 85 FR 28671 (May 13, 2020) (SR–NYSE–2019–46, SR–NYSEAMER–2019–34, SR–NYSEArca–2019–61, SR–NYSENAT–2019–19). *See also* Securities Exchange Act Release No. 88972 (May 29, 2020), 85 FR 34472 (June 4, 2020) (SR–NYSECHX–2020–18).

IP network or LCN) for which those Users have ports.

At the same time, traffic over the LCN has been increasing. Increases in options trading volume in recent years on the NYSE American Options and NYSE Arca Options exchanges have increased the size of the market data feeds from those markets, thereby increasing the network bandwidth requirements overall for the market data feeds of the Exchange and the Affiliate SROs that are included in the Included Data Products (the ''NYSE Group Market Data'' feeds) over the LCN. As a result, the LCN connections over which some Users continue to receive the NMS feeds are increasingly burdened as the NYSE Group Market Data Feeds continue to grow in size.

To address these issues, the Exchange proposes to remove the NMS feeds from the Included Data Products available on the LCN. Doing so would permit Users to receive connectivity to the NYSE Group Market Data feeds over their LCN connections, while the NMS feeds would remain available to Users at no additional charge over the NMS network, at faster speeds than they were available over the LCN.

To accomplish this change, the Exchange proposes to amend General Note 5 of the Price List and Fee Schedule as follows (proposed addition italicized):

5. When a User purchases a service that includes access to the LCN or IP network it receives connectivity to any of the Included Data Products that it selects, subject to any technical provisioning requirements and authorization from the provider of the data feed. *Connectivity to the NMS feeds is not available over the LCN, but is available over the IP network and the NMS network described below in General Note 6.* Market data fees for the Included Data Products are charged by the provider of the data feed. A User can change the Included Data Products to which it receives connectivity at any time, subject to authorization from the provider of the data feed. The Exchange is not the exclusive method to connect to the Included Data Products.

Application and Impact of the Proposed Changes

Currently, 34 Users receive the NMS feeds over the LCN, but 23 of those 34 Users have access to the NMS network already enabled, such that they also receive the NMS feeds over the NMS network. To implement this proposal with respect to those 23 Users, the Exchange has notified the Users that their connections to the NMS feeds over LCN will be discontinued but that they will continue to receive the NMS feeds over the NMS network.

The other 11 Users that receive the NMS feeds over the LCN do not currently have NMS network access enabled, but are entitled to such access at no additional charge, since their existing LCN service includes a connection of the same size to the NMS network. The Exchange has notified these 11 Users that their connections to the NMS feeds over LCN will be discontinued, and all 11 of them have submitted orders to begin receiving the NMS feeds over an NMS network connection at no additional charge. The Exchange is currently in the process of installing NMS network connections for those 11 Users.[8]

Users would experience no interruption in their ability to connect to the NMS feeds as a result of the proposed change, and would receive the NMS feeds faster as a result of the proposed change. No User would be required to purchase any additional products or services from the Exchange to transition their NMS feed connectivity to the NMS network, or to an IP network connection they have already purchased.

The proposed changes would not apply differently to distinct types or sizes of market participants. Rather, they would apply to all Users equally. The purchase of any colocation service is completely voluntary and the Price List and Fee Schedule is applied uniformly to all Users.

No fees are affected by this proposal.

Implementation Date

The Exchange is in the process of transitioning all remaining Users that receive the NMS feeds over the LCN to begin receiving the feeds over NMS network connections at no additional charge. The Exchange expects this transition process to be completed before October 2022. Once that transition is complete, the Exchange proposes to implement this rule change by Customer Notice, at which point the option of receiving the NMS feeds over the LCN would be removed from the Price List and Fee Schedule.

Competitive Environment

The proposed changes are not otherwise intended to address any other issues relating to colocation services and/or related fees, and the Exchange is not aware of any problems that Users would have in complying with the proposed change.

[8] Seven of these 11 Users also currently have access to the IP network and could have chosen to receive the NMS feeds over their IP network connections at no additional charge, but instead all 11 have opted to receive the NMS feeds over the faster NMS network.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[9] in general, and furthers the objectives of Section 6(b)(5) of the Act,[10] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that discontinuing the availability of the NMS feeds on the LCN would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest. Users that currently receive the NMS feeds on the LCN would receive the same data at a faster speed via the NMS or IP network, with no interruption of their ability to connect to the NMS feeds. Connectivity to the NMS feeds over the NMS network would be available at no additional charge to affected Users, since their existing LCN service includes a connection of the same size to the NMS network. In addition, connectivity to the NMS feeds over the IP network would be at no additional charge to Users that have already purchased access to the IP network. The Exchange believes that providing connectivity to the same feeds at a faster speed at no additional charge would perfect the mechanisms of a free and open market and a national market system.

The Exchange believes that the proposed rule change does not significantly affect the protection of investors or the public interest. The proposed rule change would simply give Users that currently receive the NMS feeds on the LCN the opportunity to receive the same data at a faster speed via the NMS network or the IP network, at no additional charge (if they choose to receive the NMS feeds over the NMS network or an already-established IP network connection), with no interruption of their ability to connect to the NMS feeds.

The Exchange believes that discontinuing the availability of the

[9] 15 U.S.C. 78f(b).

[10] 15 U.S.C. 78f(b)(5).

NMS feeds on the LCN would not permit unfair discrimination between customers, issuers, brokers, or dealers, because the proposed change would apply equally to all Users that currently receive the NMS feeds over the LCN. Nor does the proposed change advantage Users of the LCN over Users of the IP network, since, as indicated in the Price List and Fee Schedule, services that include a 10 Gb or 40 Gb LCN or IP connection also include a connection to the NMS network of the same size, at no additional charge.

The Exchange believes that the proposed change would facilitate transactions in securities, remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors and the public interest because removing the NMS feeds from the LCN would permit Users to receive connectivity to the NYSE Group Market Data feeds over their LCN connections, while the NMS feeds would remain available to Users at no additional charge over the NMS network, at faster speeds than they were available over the LCN. As noted above, increases in options trading volume in recent years on the NYSE American Options and NYSE Arca Options exchanges have increased the size of the market data feeds from those markets, thereby increasing the network bandwidth requirements for the NYSE Group Market Data feeds over the LCN.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[11] the Exchange believes that the proposed rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange believes that the proposed rule change would not place any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any competitive issues, but rather would provide Users that currently receive the NMS feeds on the LCN the same data at a faster speed via the NMS or IP network, at no additional charge (if they choose to receive the NMS feeds over the NMS network or an already-established IP network connection), with no interruption of their ability to connect to the NMS feeds.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[12] and Rule 19b–4(f)(6) thereunder.[13] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[14]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[15] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEAMER–2022–28 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEAMER–2022–28. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEAMER–2022–28 and should be submitted on or before August 16, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[16]

J. Matthew DeLesDernier,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95325; File No. SR–MEMX–2022–18]

Self-Regulatory Organizations; MEMX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Extend the Current Pilot Program Related to Clearly Erroneous Transactions Until October 20, 2022

July 20, 2022.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 19, 2022, MEMX LLC (''MEMX'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Exchange filed the proposal as a ''non-controversial'' proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [3] and Rule 19b–4(f)(6) thereunder.[4] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing with the Commission a proposed rule change to extend the current pilot program related to MEMX Rule 11.15, ''Clearly Erroneous Executions,'' to the close of business on October 20, 2022. The text of the proposed rule change is provided in Exhibit 5.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(iii).

[4] 17 CFR 240.19b–4(f)(6).

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to extend the effectiveness of the Exchange's current rule applicable to Clearly Erroneous Executions to the close of business on October 20, 2022. Portions of Rule 11.15, explained in further detail below, are currently operating as a pilot program which is set to expire on July 20, 2022.[5]

On May 4, 2020, the Commission approved MEMX's Form 1 Application to register as a national securities exchange with rules including, on a pilot basis, MEMX Rule 11.15.[6] Rule 11.15, among other things (i) provides for uniform treatment of clearly erroneous execution reviews in multi-stock events involving twenty or more securities; and (ii) reduces the ability of the Exchange to deviate from objective standards set forth in the rule. The rule further provides that: (i) a series of transactions in a particular security on one or more trading days may be viewed as one event if all such transactions were effected based on the same fundamentally incorrect or grossly misinterpreted issuance information resulting in a severe valuation error for all such transactions; and (ii) in the event of any disruption or malfunction in the operation of the electronic communications and trading facilities of the Exchange, another SRO, or responsible single plan processor in connection with the transmittal or receipt of a trading halt, an Officer of the Exchange or senior level employee designee, acting on his or her own motion, shall nullify any transaction that occurs after a trading halt has been declared by the primary listing market for a security, and before such a trading halt has officially ended according to the primary listing market.[7]

Previously, the clearly erroneous pilot programs adopted by the national securities exchanges and the current Plan to Address Extraordinary Market Volatility Pursuant to Rule 608 of Regulation NMS under the Act (the ''Limit Up-Limit Down Plan'' or the ''LULD Plan'') were a single pilot program. On April 17, 2019, the Commission approved the Eighteenth Amendment to the LULD Plan, allowing the LULD Plan to operate on a permanent, rather than pilot, basis.[8] Accordingly, national securities exchanges filed with the Commission amendments to exchange rules to untie the pilot program's effectiveness from that of the LULD Plan in order to provide such exchanges additional time to consider further amendments, if any, to the clearly erroneous execution rules in light of the proposed Eighteenth Amendment to the LULD Plan.[9]

More recently, the Exchange amended MEMX Rule 11.15 to extend the pilot's effectiveness to the close of business on October 20, 2021.[10] The Exchange subsequently amended MEMX Rule 11.15 to extend the pilot's effectiveness to the close of business on April 20, 2022 [11] and again to extend the pilot's effectiveness to the close of business on July 20, 2022.[12]

On July 8, 2022, Cboe BZX Exchange, Inc. proposed a rule change to make the pilot program permanent with certain amendments.[13] The Exchange now proposes to amend MEMX Rule 11.15 to extend the pilot's effectiveness to the close of business on October 20, 2022, while the Commission considers whether the BZX proposal should be approved or disapproved. MEMX understands that certain other national securities exchanges and the Financial Industry Regulatory Authority (''FINRA'') also intend to file similar proposals to extend their respective clearly erroneous execution pilot programs, the substance of which are identical to MEMX Rule 11.15.

The Exchange does not propose any additional changes to MEMX Rule 11.15. By proposing to extend the pilot, the Exchange will avoid any discrepancy between its clearly erroneous pilot program and the pilot programs of other exchanges and FINRA, as the language of such rules are identical to MEMX Rule 11.15 and, as noted above, other exchanges and FINRA also intend to file proposals to extend their respective clearly erroneous execution pilot programs. The Exchange believes the benefits to market

[12] *See* Securities Exchange Act Release No. 94684 (April 12, 2022), 87 FR 23006 (April 18, 2022) (SR–MEMX–2022–09).

[13] *See* Securities Exchange Act Release No. 95259 (July 12, 2022), 87 FR 42760 (July 18, 2022) (SR-CboeBZX–2022–037).

participants from the more objective clearly erroneous executions rule should continue on a limited three month pilot basis. As the LULD Plan was approved by the Commission to operate on a permanent, rather than pilot, basis the Exchange intends to assess whether additional changes should also be made to the operation of the clearly erroneous execution rules. Extending the effectiveness of MEMX Rule 11.15 for an additional three months should provide the Commission additional time to consider the recent proposal to make the pilot program permanent and any further amendments to the clearly erroneous execution rules.

Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[14] in general, and furthers the objectives of Section 6(b)(5) of the Act,[15] in particular, in that it is designed to prevent fraudulent and manipulative practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange believes that extending the clearly erroneous execution pilot under MEMX Rule 11.15 for an additional three months would help assure that the determination of whether a clearly erroneous trade has occurred will be based on clear and objective criteria, and that the resolution of the incident will occur promptly through a transparent process. The proposed extension would also help assure consistent results in handling erroneous trades across the U.S. equities markets, thus furthering fair and orderly markets, the protection of investors and the public interest. Based on the foregoing, the Exchange believes the clearly erroneous executions rule should continue to be in effect on a pilot basis while the Commission considers the pending proposal to make permanent the rules related to clearly erroneous executions reviews.

[14] 15 U.S.C. 78f(b).

[15] 15 U.S.C. 78f(b)(5).

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes its proposed rule change would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, the Exchange understands that FINRA and certain other national securities exchanges will also file similar proposals to extend their respective clearly erroneous execution pilot programs. Thus, the proposed rule change will help to ensure consistency across market centers without implicating any competitive issues.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [16] and Rule 19b–4(f)(6) thereunder.[17] Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act [18] and subparagraph (f)(6) of Rule 19b–4 thereunder.[19]

A proposed rule change filed under Rule 19b–4(f)(6) [20] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[21] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange asked that the Commission waive the 30 day operative delay so that the proposal may become operative immediately upon filing. Waiver of the 30-day operative delay would extend the protections provided by the current pilot program, without any changes, while a permanent proposal for clearly erroneous execution reviews is being considered.[22] For this reason, the Commission hereby waives the 30-day operative delay and designates the proposed rule change as operative upon filing.[23]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–MEMX–2022–18 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–MEMX–2022–18. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the

[16] 15 U.S.C. 78s(b)(3)(A)(iii).

[17] 17 CFR 240.19b–4(f)(6).

[18] 15 U.S.C. 78s(b)(3)(A)(iii).

[19] 17 CFR 240.19b-4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Commission has waived the five-day prefiling requirement in this case.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95333; File No. SR–NYSENAT–2022–11]

Self-Regulatory Organizations; NYSE National, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Make a Non-Substantive Change to Rule 7.31(a)(2)(B) Regarding Limit Order Price Protection

July 20, 2022.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on July 8, 2022, NYSE National, Inc. (''NYSE National'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to make a non-substantive change to Rule 7.31(a)(2)(B) regarding Limit Order Price Protection. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to make a non-substantive change to Rule 7.31(a)(2)(B) regarding Limit Order Price Protection.

Rule 7.31(a)(2)(B) (''Limit Order Price Protection'') provides that a Limit Order to buy (sell) will be rejected if it is priced at or above (below) the greater of $0.15 or a specified percentage away from the National Best Offer (National Best Bid) (''NBO'' and ''NBB,'' respectively). The rule currently states that the ''specified percentage is equal to the corresponding 'numerical guideline' percentage set forth in paragraph (c)(1) of Rule 7.10 (Clearly Erroneous Executions) for the Core Trading Session.'' Pursuant to Rule 7.10(c)(1), those numerical guidelines are as follows: 10% for securities with a reference price up to and including $25.00, 5% for securities with a reference price greater than $25.00 and up to and including $50.00, and 3% for securities with a reference price greater than $50.00.

The Exchange proposes to amend Rule 7.31(a)(2)(B) to delete the cross-reference to Rule 7.10(c)(1) and instead include the specified percentages from Rule 7.10(c)(1) as a table in the text of Rule 7.31(a)(2)(B) itself, as follows:

Reference price	Specified percentage
Greater than $0.00 up to and including $25.00	10
Greater than $25.00 up to and including $50.00	5
Greater than $50.00	3

The Exchange does not propose any change to the percentages themselves or when they would apply. Accordingly, the proposed change would be non-substantive and would raise no novel issues.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[4] in general, and with Section 6(b)(5),[5] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Exchange believes that the proposed change to Rule 7.31(a)(2)(B) would remove impediments to and perfect the mechanism of a free and open market and a national market system, and in general, protect investors and the public interest because deleting the cross-reference to Rule 7.10(c)(1) and instead including the relevant percentages from Rule 7.10(c)(1) in the text of Rule 7.31(a)(2)(B) itself will enhance the clarity of the rule.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposed rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not intended to address competitive issues but rather would be a non-substantive change to delete the cross-reference to Rule 7.10(c)(1) and instead include the relevant percentages from Rule 7.10(c)(1) in the text of Rule 7.31(a)(2)(B) itself.

[24] 17 CFR 200.30–3(a)(12).

[3] 17 CFR 240.19b–4.

[4] 15 U.S.C. 78f(b).

[5] 15 U.S.C. 78f(b)(5).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and; (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[6] and Rule 19b–4(f)(6)[7] thereunder.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–NYSENAT–2022–11 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSENAT–2022–11. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSENAT–2022–11 and should be submitted on or before August 16, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[8]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95336; File No. SR–NYSECHX–2022–16]

Self-Regulatory Organizations; NYSE Chicago, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Make a Non-Substantive Change to Rule 7.31(a)(2)(B) Regarding Limit Order Price Protection

July 20, 2022.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on July 8, 2022, the NYSE Chicago, Inc. (''NYSE Chicago'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to make a non-substantive change to Rule 7.31(a)(2)(B) regarding Limit Order Price Protection. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to make a non-substantive change to Rule 7.31(a)(2)(B) regarding Limit Order Price Protection.

Rule 7.31(a)(2)(B) (''Limit Order Price Protection'') provides that a Limit Order to buy (sell) will be rejected if it is priced at or above (below) the greater of $0.15 or a specified percentage away from the National Best Offer (National Best Bid) (''NBO'' and ''NBB,'' respectively). The rule currently states that the ''specified percentage is equal to the corresponding 'numerical guideline' percentage set forth in paragraph (c)(1) of Rule 7.10 (Clearly Erroneous Executions) for the Core Trading Session.'' Pursuant to Rule

7.10(c)(1), those numerical guidelines are as follows: 10% for securities with a reference price up to and including $25.00, 5% for securities with a reference price greater than $25.00 and up to and including $50.00, and 3% for securities with a reference price greater than $50.00.

The Exchange proposes to amend Rule 7.31(a)(2)(B) to delete the cross-reference to Rule 7.10(c)(1) and instead include the specified percentages from Rule 7.10(c)(1) as a table in the text of Rule 7.31(a)(2)(B) itself, as follows:

Reference price	Specified percentage
Greater than $0.00 up to and including $25.00	10
Greater than $25.00 up to and including $50.00	5
Greater than $50.00	3

The Exchange does not propose any change to the percentages themselves or when they would apply. Accordingly, the proposed change would be non-substantive and would raise no novel issues.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[4] in general, and with Section 6(b)(5),[5] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Exchange believes that the proposed change to Rule 7.31(a)(2)(B) would remove impediments to and perfect the mechanism of a free and open market and a national market system, and in general, protect investors and the public interest because deleting the cross-reference to Rule 7.10(c)(1) and instead including the relevant percentages from Rule 7.10(c)(1) in the text of Rule 7.31(a)(2)(B) itself will enhance the clarity of the rule.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposed rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not intended to address competitive issues but rather would be a non-substantive change to delete the cross-reference to Rule 7.10(c)(1) and instead include the relevant percentages from Rule 7.10(c)(1) in the text of Rule 7.31(a)(2)(B) itself.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and; (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[6] and Rule 19b–4(f)(6)[7] thereunder.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSECHX–2022–16 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSECHX–2022–16. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSECHX–2022–16 and should be submitted on or before August 16, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[8]

J. Matthew DeLesDernier,

Deputy Secretary.

In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95332; File No. SR–BX–2022–011]

Self-Regulatory Organizations; Nasdaq BX, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Extend the Clearly Erroneous Pilot to October 20, 2022

July 20, 2022.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 19, 2022, Nasdaq BX, Inc. (''BX'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to extend the current pilot program related to BX Equity 11, Rule 11890 (Clearly Erroneous Transactions) to the close of business on October 20, 2022.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/bx/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to extend the current pilot program related to Equity 11, Rule 11890, Clearly Erroneous Transactions, to the close of business on October 20, 2022. The pilot program is currently due to expire on July 20, 2022.

On September 10, 2010, the Commission approved, on a pilot basis, changes to Equity 11, Rule 11890 that, among other things: (i) provided for uniform treatment of clearly erroneous execution reviews in multi-stock events involving twenty or more securities; and (ii) reduced the ability of the Exchange to deviate from the objective standards set forth in the rule.[3] In 2013, the Exchange adopted a provision designed to address the operation of the Plan.[4] Finally, in 2014, the Exchange adopted two additional provisions providing that: (i) a series of transactions in a particular security on one or more trading days may be viewed as one event if all such transactions were effected based on the same fundamentally incorrect or grossly misinterpreted issuance information resulting in a severe valuation error for all such transactions; and (ii) in the event of any disruption or malfunction in the operation of the electronic communications and trading facilities of an Exchange, another SRO, or responsible single plan processor in connection with the transmittal or receipt of a trading halt, an Officer, acting on his or her own motion, shall nullify any transaction that occurs after a trading halt has been declared by the primary listing market for a security and before such trading halt has officially ended according to the primary listing market.[5]

These changes were originally scheduled to operate for a pilot period to coincide with the pilot period for the Plan to Address Extraordinary Market Volatility (the ''Limit Up-Limit Down Plan'' or ''LULD Plan'').[6] In April 2019, the Commission approved an amendment to the LULD Plan for it to operate on a permanent, rather than pilot, basis.[7] In light of that change, the Exchange amended Equity 11, Rule 11890 to untie the pilot program's effectiveness from that of the LULD Plan and to extend the pilot's effectiveness to the close of business on October 18, 2019.[8] Subsequently, the Exchange amended Rule 11890 to extend the pilot's effectiveness to the close of business on July 20, 2022.[9]

The Exchange now proposes to amend Equity 11, Rule 11890 to extend the pilot's effectiveness for a further three months until the close of business on October 20, 2022. If the pilot period is not either extended, replaced or approved as permanent, the prior versions of paragraphs (a)(2)(C), (c)(1), (b)(i), and (b)(ii) shall be in effect, and the provisions of paragraphs (g) through (i) shall be null and void.[10] In such an event, the remaining sections of Rule 11890 would continue to apply to all transactions executed on the Exchange. The Exchange understands that the other national securities exchanges and Financial Industry Regulatory Authority (''FINRA'') will also file similar proposals to extend their respective clearly erroneous execution pilot programs, the substance of which are identical to Rule 11890.

The Exchange does not propose any additional changes to Equity 11, Rule 11890. Extending the effectiveness of Rule 11890 for an additional three months will provide the Exchange and other self-regulatory organizations additional time to consider whether further amendments to the clearly erroneous execution rules are appropriate.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of Section 6(b) of the Act,[11] in general, and Section 6(b)(5) of the Act,[12] in particular, in that it is designed to remove impediments to and perfect the mechanism of a free and open market and a national market system, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest and not to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that the proposed rule change promotes just and equitable principles of trade in that it promotes transparency and uniformity

[12] 15 U.S.C. 78f(b)(5).

across markets concerning review of transactions as clearly erroneous. The Exchange believes that extending the clearly erroneous execution pilot under Equity 11, Rule 11890 for an additional three months would help assure that the determination of whether a clearly erroneous trade has occurred will be based on clear and objective criteria, and that the resolution of the incident will occur promptly through a transparent process. The proposed rule change would also help assure consistent results in handling erroneous trades across the U.S. equities markets, thus furthering fair and orderly markets, the protection of investors and the public interest. Based on the foregoing, the Exchange believes the amended clearly erroneous executions rule should continue to be in effect on a pilot basis while the Exchange and other self-regulatory organizations consider whether further amendments to these rules are appropriate.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposal would ensure the continued, uninterrupted operation of harmonized clearly erroneous execution rules across the U.S. equities markets while the Exchange and other self-regulatory organizations consider whether further amendments to these rules are appropriate. The Exchange understands that the other national securities exchanges and FINRA will also file similar proposals to extend their respective clearly erroneous execution pilot programs. Thus, the proposed rule change will help to ensure consistency across market centers without implicating any competitive issues.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[13] and Rule 19b–4(f)(6) thereunder.[14] Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act[15] and subparagraph (f)(6) of Rule 19b–4 thereunder.[16]

A proposed rule change filed under Rule 19b–4(f)(6)[17] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[18] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange asked that the Commission waive the 30 day operative delay so that the proposal may become operative immediately upon filing. Waiver of the 30-day operative delay would extend the protections provided by the current pilot program, without any changes, while a permanent proposal for clearly erroneous execution reviews is being considered.[19] For this reason, the Commission hereby waives the 30-day operative delay and designates the proposed rule change as operative upon filing.[20]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BX–2022–011 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–BX–2022–011. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BX–2022–011 and should be submitted on or before August 16, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[21]

J. Matthew DeLesDernier,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95339; File No. SR–NYSEArca–2022–39]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the NYSE Arca Equities Fees and Charges and the NYSE Arca Options Fees and Charges Related to Colocation

July 20, 2022.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on July 6, 2022, NYSE Arca, Inc. (''NYSE Arca'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the NYSE Arca Equities Fees and Charges and the NYSE Arca Options Fees and Charges (together, the ''Fee Schedules'') related to colocation to specify that the NMS feeds that are included in the Included Data Products are no longer available over the Liquidity Center Network (''LCN''). The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fee Schedules related to colocation to specify that the NMS feeds that are included in the Included Data Products are no longer available over the Liquidity Center Network (''LCN'').[4]

Background

The LCN and the IP network are the two local area networks in the Mahwah Data Center that are available to Users.[5] General Note 5 of the Fee Schedules explains that when a User purchases a service that includes access to the LCN or IP network, it receives connectivity to any of the ''Included Data Products'' that it selects, subject to any technical provisioning requirements and authorization from the provider of the data feed. The Included Data Products include, among others, the ''NMS feeds,'' which are the Consolidated Tape System and Consolidated Quote System (''CTA'' and ''CQ,'' respectively) data feeds and the Options Price Reporting Authority (''OPRA'') data feed.[6]

Before May 2020, connectivity to the NMS feeds was available on only the LCN and IP networks. In May 2020, the Commission approved the Exchange's proposal to offer Users access to the new ''NMS network,'' an alternate, dedicated network that connects to the NMS feeds faster than the LCN or IP networks.[7] Pursuant to that filing, the Exchange amended the notes regarding the services available in colocation to provide that if a User purchases a service that includes a 10 Gb or 40 Gb LCN or IP network connection, that service would also include a connection to the NMS network of the same size, at no additional charge.

Currently, the NMS feeds are available to Users on all three of the NMS network, IP network, and LCN, but at varying speeds. The NMS feeds are published first to the NMS network, which then republishes them to the IP network, which then republishes them to the LCN. This means that connectivity to the NMS feeds is fastest over the NMS network and slowest over the LCN. This also means that receiving the NMS feeds from more than one of these networks does not provide redundancy protection to Users; if connectivity to the NMS feeds over the NMS network were to be interrupted, so would connectivity to those feeds over the IP network and LCN, since the three networks publish the NMS feeds to each other in sequence.

Despite the Exchange's introduction of the NMS network in May 2020, some Users have failed to avail themselves of the option to receive the NMS feeds over that faster network at no additional cost. Other Users have opted to receive the NMS feeds over the NMS network, but have not yet formally asked the Exchange to stop also sending them the NMS feeds over the other networks (*i.e.,* IP network or LCN) for which those Users have ports.

At the same time, traffic over the LCN has been increasing. Increases in options trading volume in recent years on the NYSE American Options and NYSE Arca Options exchanges have increased the size of the market data feeds from those markets, thereby increasing the network bandwidth requirements overall for the market data feeds of the Exchange and the Affiliate SROs that are included in the Included Data Products (the ''NYSE Group Market Data'' feeds) over the LCN. As a result, the LCN connections over which some Users continue to receive the NMS feeds are increasingly burdened as the NYSE Group Market Data Feeds continue to grow in size.

To address these issues, the Exchange proposes to remove the NMS feeds from the Included Data Products available on the LCN. Doing so would permit Users to receive connectivity to the NYSE Group Market Data feeds over their LCN connections, while the NMS feeds would remain available to Users at no additional charge over the NMS network, at faster speeds than they were available over the LCN.

To accomplish this change, the Exchange proposes to amend General

[4] The Exchange is an indirect subsidiary of Intercontinental Exchange, Inc. (''ICE''). Each of the Exchange's affiliates New York Stock Exchange LLC, NYSE American LLC, NYSE Chicago, Inc., and NYSE National, Inc. (together, the ''Affiliate SROs'') has submitted substantially the same proposed rule change to propose the changes described herein. *See* SR–NYSE–2022–27, SR–NYSEAMER–2022–28, SR–NYSECHX–2022–15, and SR–NYSENAT–2022–10.

[5] For purposes of the Exchange's colocation services, a ''User'' means any market participant that requests to receive colocation services directly from the Exchange. *See* Securities Exchange Act Release No. 76101 (September 29, 2015), 80 FR 60197 (October 5, 2015) (SR–NYSEArca–2015–82). As specified in the Fee Schedules, a User that incurs colocation fees for a particular colocation service pursuant thereto would not be subject to colocation fees for the same colocation service charged by the Affiliate SROs.

[6] *See* Securities Exchange Act Release No. 79729 (January 4, 2017), 82 FR 3061 (January 10, 2017) (SR–NYSEArca–2016–172).

[7] *See* Securities Exchange Act Release No. 88837 (May 7, 2020), 85 FR 28671 (May 13, 2020) (SR–NYSE–2019–46, SR–NYSEAMER–2019–34, SR–NYSEArca–2019–61, SR–NYSENAT–2019–19). *See also* Securities Exchange Act Release No. 88972 (May 29, 2020), 85 FR 34472 (June 4, 2020) (SR–NYSECHX–2020–18).

Note 5 of the Fee Schedules as follows (proposed addition italicized):

5. When a User purchases a service that includes access to the LCN or IP network it receives connectivity to any of the Included Data Products that it selects, subject to any technical provisioning requirements and authorization from the provider of the data feed. *Connectivity to the NMS feeds is not available over the LCN, but is available over the IP network and the NMS network described below in General Note 6.* Market data fees for the Included Data Products are charged by the provider of the data feed. A User can change the Included Data Products to which it receives connectivity at any time, subject to authorization from the provider of the data feed. The Exchange is not the exclusive method to connect to the Included Data Products.

Application and Impact of the Proposed Changes

Currently, 34 Users receive the NMS feeds over the LCN, but 23 of those 34 Users have access to the NMS network already enabled, such that they also receive the NMS feeds over the NMS network. To implement this proposal with respect to those 23 Users, the Exchange has notified the Users that their connections to the NMS feeds over LCN will be discontinued but that they will continue to receive the NMS feeds over the NMS network.

The other 11 Users that receive the NMS feeds over the LCN do not currently have NMS network access enabled, but are entitled to such access at no additional charge, since their existing LCN service includes a connection of the same size to the NMS network. The Exchange has notified these 11 Users that their connections to the NMS feeds over LCN will be discontinued, and all 11 of them have submitted orders to begin receiving the NMS feeds over an NMS network connection at no additional charge. The Exchange is currently in the process of installing NMS network connections for those 11 Users.[8]

Users would experience no interruption in their ability to connect to the NMS feeds as a result of the proposed change, and would receive the NMS feeds faster as a result of the proposed change. No User would be required to purchase any additional products or services from the Exchange to transition their NMS feed connectivity to the NMS network, or to an IP network connection they have already purchased.

The proposed changes would not apply differently to distinct types or sizes of market participants. Rather, they would apply to all Users equally. The purchase of any colocation service is completely voluntary and the Fee Schedules are applied uniformly to all Users.

No fees are affected by this proposal.

Implementation Date

The Exchange is in the process of transitioning all remaining Users that receive the NMS feeds over the LCN to begin receiving the feeds over NMS network connections at no additional charge. The Exchange expects this transition process to be completed before October 2022. Once that transition is complete, the Exchange proposes to implement this rule change by Customer Notice, at which point the option of receiving the NMS feeds over the LCN would be removed from the Fee Schedules.

Competitive Environment

The proposed changes are not otherwise intended to address any other issues relating to colocation services and/or related fees, and the Exchange is not aware of any problems that Users would have in complying with the proposed change.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[9] in general, and furthers the objectives of Section 6(b)(5) of the Act,[10] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that discontinuing the availability of the NMS feeds on the LCN would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest. Users that currently receive the NMS feeds on the LCN would receive the same data at a faster speed via the NMS or IP network, with no interruption of their ability to connect to the NMS feeds. Connectivity to the NMS feeds over the NMS network would be available at no additional charge to affected Users, since their existing LCN service includes a connection of the same size to the NMS network. In addition, connectivity to the NMS feeds over the IP network would be at no additional charge to Users that have already purchased access to the IP network. The Exchange believes that providing connectivity to the same feeds at a faster speed at no additional charge would perfect the mechanisms of a free and open market and a national market system.

The Exchange believes that the proposed rule change does not significantly affect the protection of investors or the public interest. The proposed rule change would simply give Users that currently receive the NMS feeds on the LCN the opportunity to receive the same data at a faster speed via the NMS network or the IP network, at no additional charge (if they choose to receive the NMS feeds over the NMS network or an already-established IP network connection), with no interruption of their ability to connect to the NMS feeds.

The Exchange believes that discontinuing the availability of the NMS feeds on the LCN would not permit unfair discrimination between customers, issuers, brokers, or dealers, because the proposed change would apply equally to all Users that currently receive the NMS feeds over the LCN. Nor does the proposed change advantage Users of the LCN over Users of the IP network, since, as indicated in the Fee Schedules, services that include a 10 Gb or 40 Gb LCN or IP connection also include a connection to the NMS network of the same size, at no additional charge.

The Exchange believes that the proposed change would facilitate transactions in securities, remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors and the public interest because removing the NMS feeds from the LCN would permit Users to receive connectivity to the NYSE Group Market Data feeds over their LCN connections, while the NMS feeds would remain available to Users at no additional charge over the NMS network, at faster speeds than they were available over the LCN. As noted above, increases in options trading volume in recent years on the NYSE American Options and NYSE Arca Options exchanges have increased the size of the

[8] Seven of these 11 Users also currently have access to the IP network and could have chosen to receive the NMS feeds over their IP network connections at no additional charge, but instead all 11 have opted to receive the NMS feeds over the faster NMS network.

[9] 15 U.S.C. 78f(b).

[10] 15 U.S.C. 78f(b)(5).

market data feeds from those markets, thereby increasing the network bandwidth requirements for the NYSE Group Market Data feeds over the LCN.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[11] the Exchange believes that the proposed rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange believes that the proposed rule change would not place any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any competitive issues, but rather would provide Users that currently receive the NMS feeds on the LCN the same data at a faster speed via the NMS or IP network, at no additional charge (if they choose to receive the NMS feeds over the NMS network or an already-established IP network connection), with no interruption of their ability to connect to the NMS feeds.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[12] and Rule 19b–4(f)(6) thereunder.[13] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[14]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[15] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEArca–2022–39 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2022–39. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2022–39 and should be submitted on or before August 16, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[16]

J. Matthew DeLesDernier,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95343; File No. SR–EMERALD–2022–24]

Self-Regulatory Organizations; MIAX Emerald, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 515 To Make Minor, Non-Substantive Edits

July 20, 2022.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 18, 2022, MIAX Emerald, LLC (''MIAX Emerald'' or ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to make a number of minor, non-substantive edits to Exchange Rule 515, Execution of Orders and Quotes.

The text of the proposed rule change is available on the Exchange's website at *https://www.miaxoptions.com/rule-filings/emerald,* at MIAX Emerald's

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Exchange Rule 515 to make minor, non-substantive edits and clarifying changes to provide accuracy, precision, and ease of reference within the rule text.

First, the Exchange proposes to amend current subparagraph (a) to add the word ''the'' at the end of the last sentence in the first paragraph for grammatical correctness and clarity in the Rule text. Accordingly, with the proposed change, the last sentence in the first paragraph of subparagraph (a) will read as follows: ''Orders and quotes that could not be executed because the executions would be at prices inferior to the NBBO will be handled in accordance with the Managed Interest Process for orders described in paragraph (c)(1)(ii) below or in accordance with the process for handling Market Maker orders and quotes described in paragraph (d) below.''

The Exchange also proposes to amend several paragraphs and subsections to make corrective changes to the numerical and alphabetical list item identifiers to properly conform to the hierarchical heading scheme and list item identifiers used throughout the Exchange's rulebook. The Exchange notes that anytime there is block text in a paragraph or subsection that contains a list of numbered clauses or items that are not specifically broken out into their own subsections, the Exchange uses romanettes to identify each clause or item. Accordingly, the Exchange proposes to amend current subparagraph (h)(3) of Exchange Rule 515 that contains independent clauses currently numbered ''(A)'' through ''(D)'' to now be renumbered ''(i)'' through ''(iv)'', respectively. The Exchange also proposes to amend current subparagraph (h)(4) that contains independent clauses currently numbered ''(A)'', ''(B)'', and ''(C)'' to now be renumbered to ''(i)'', ''(ii)'', and ''(iii)'', respectively. The purpose of all these proposed changes is to promote consistency and clarity within the Exchange's Rulebook and conform to the existing identification scheme.

2. Statutory Basis

The Exchange believes that the proposed rule changes are consistent with Section 6(b) of the Act [3] in general, and furthers [sic] the objectives of Section 6(b)(5) of the Act [4] in particular, in that they are designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, remove impediments to and perfect the mechanisms [sic] of a free and open market and a national market system and, in general, protect investors and the public interest.

The Exchange believes the proposed changes to Exchange Rule 515 promote just and equitable principles of trade and remove impediments to and perfect the mechanism of a free and open market and a national market system because the proposed rule changes will provide greater clarity to Members [5] and the public regarding the Exchange's Rules by correcting a grammatical error and conforming the numbering in Exchange Rule 515 to the existing identification scheme in the Exchange's rulebook. It is in the public interest for rules to be accurate and concise so as to eliminate the potential for confusion.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule changes will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. Specifically, the Exchange believes the proposed changes will not impose any burden on intra-market competition as there is no functional change to the Exchange's System [6] and because the rules of the Exchange apply to all MIAX Emerald participants equally. The Exchange believes the proposed rule changes will have [sic] not impose any burden on intra-market competition as the proposed changes are not designed to address any competitive issue but rather are designed to remedy minor non-substantive issues and provide added precision and accuracy to the rule text of Exchange Rule 515. In addition, the Exchange does not believe the proposal will impose any burden on inter-market competition as the proposal does not address any competitive issues and is intended to protect investors by providing further transparency and precision for referencing the Exchange's Rules.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days after the date of the filing, or such shorter time as the Commission may designate, it has become effective pursuant to 19(b)(3)(A) of the Act [7] and Rule 19b–4(f)(6) [8] thereunder.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

[3] 15 U.S.C. 78f(b).

[4] 15 U.S.C. 78f(b)(5).

[5] The term ''Member'' means an individual or organization approved to exercise the trading rights associated with a Trading Permit. Members are deemed ''members'' under the Exchange Act. *See* Exchange Rule 100.

[6] The term ''System'' means the automated trading system used by the Exchange for the trading of securities. *See* Exchange Rule 100.

[7] 15 U.S.C. 78s(b)(3)(A).

[8] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–EMERALD–2022–24.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–EMERALD–2022–24. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–EMERALD–2022–24, and should be submitted on or before August 16, 2022.

[9] 17 CFR 200.30–3(a)(12).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[9]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95327; File No. SR–OCC–2022–803]

Self-Regulatory Organizations; The Options Clearing Corporation; Notice of Filing of Advance Notice Related to an Expansion of The Options Clearing Corporation's Non-Bank Liquidity Facility Program as Part of Its Overall Liquidity Plan

July 20, 2022.

Pursuant to Section 806(e)(1) of Title VIII of the Dodd-Frank Wall Street Reform and Consumer Protection Act, entitled Payment, Clearing and Settlement Supervision Act of 2010 (''Clearing Supervision Act'') [1] and Rule 19b–4(n)(1)(i) [2] under the Securities Exchange Act of 1934 (''Exchange Act'' or ''Act''),[3] notice is hereby given that on July 7, 2022, The Options Clearing Corporation (''OCC'') filed with the Securities and Exchange Commission (''Commission'') an advance notice as described in Items I, II and III below, which Items have been prepared primarily by OCC. The Commission is publishing this notice to solicit comments on the advance notice from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Advance Notice

This advance notice is submitted in connection with a proposed change to its operations to expand capacity under OCC's program for accessing additional committed sources of liquidity that do not increase the concentration of OCC's counterparty exposure (''Non-Bank Liquidity Facility'') as part of OCC's overall liquidity plan. The proposed changes do not require any changes to the text of OCC's By-Laws or Rules. All terms with initial capitalization that are not otherwise defined herein have the same meaning as set forth in the OCC By-Laws and Rules.[4]

[1] 12 U.S.C. 5465(e)(1).

[2] 17 CFR 240.19b–4(n)(1)(i).

[3] 15 U.S.C. 78a *et seq.*

[4] OCC's By-Laws and Rules can be found on OCC's public website: *https://www.theocc.com/Company-Information/Documents-and-Archives/By-Laws-and-Rules.*

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Advance Notice

In its filing with the Commission, OCC included statements concerning the purpose of and basis for the advance notice and discussed any comments it received on the advance notice. The text of these statements may be examined at the places specified in Item IV below. OCC has prepared summaries, set forth in sections (A) and (B) below, of the most significant aspects of these statements.

(A) Clearing Agency's Statement on Comments on the Advance Notice Received From Members, Participants or Others

Written comments were not and are not intended to be solicited with respect to the advance notice and none have been received. OCC will notify the Commission of any written comments received by OCC.

(B) Advance Notices Filed Pursuant to Section 806(e) of the Payment, Clearing, and Settlement Supervision Act

Description of Change

As the sole clearing agency for standardized U.S. securities options listed on national securities exchanges registered with the Commission (''listed options''), OCC is obligated to make certain payments. In the event of a Clearing Member default, OCC would be obligated to make payments, on time, related to that member's clear transactions. To meet such payment obligations, OCC maintains access to cash from a variety of sources, including, a requirement for members to pledge cash collateral to OCC and various agreements with banks and other counterparties (''liquidity facilities'') to provide OCC with cash in exchange for collateral, such as U.S. Government securities. OCC routinely considers potential market stress scenarios that could affect such payment obligations. Based on such considerations, OCC now believes that it should seek to expand its liquidity facility to increase OCC's access to cash to manage a member default.

OCC is proposing to expand the size of its liquidity facilities by increasing the size of one of its liquidity facilities. Specifically, this advance notice concerns a change to OCC's operations to expand capacity under OCC's Non-Bank Liquidity Facility as part of OCC's overall liquidity plan, which includes OCC's arrangements to access cash in exchange for Government securities deposited by Clearing Members in respect of their Clearing Fund

requirements to meet OCC's settlement obligations. OCC is not, as part of this advance notice, proposing to require its members or other market participants provide additional or different collateral to OCC. Rather, the purpose of the proposal is to provide OCC with another vehicle for accessing cash to meet its payment obligations, including in the event that one of its members fails to meet its payment obligations to OCC.[5]

Background

OCC's current liquidity plan provides it with access to a diverse set of funding sources, including banks (*i.e.,* OCC's syndicated credit facility),[6] the Non-Bank Liquidity Facility program,[7] and Clearing Members' Cash Clearing Fund Requirement.[8] The Non-Bank Liquidity Facility program reduces the concentration of OCC's counterparty exposure with respect to its overall liquidity plan by diversifying its base of liquidity providers among banks and non-bank, non-Clearing Member institutional investors, such as pension funds or insurance companies.

The currently approved Non-Bank Liquidity Facility program is comprised of two parts: a Master Repurchase Agreement (''MRA'') and confirmations with one or more institutional investors, which contain certain individualized terms and conditions of transactions executed between OCC, the institutional investors and their agents. The MRA is structured like a typical repurchase arrangement in which the buyer (*i.e.,* the institutional investor) would purchase from OCC, from time to time, Government securities (''Eligible Securities'').[9] OCC, as the seller, would transfer Eligible Securities to the buyer in exchange for a payment by the buyer to OCC in immediately available funds (''Purchase Price''). The buyer would simultaneously agree to transfer the purchased securities back to OCC at a specified later date (''Repurchase Date'') or on OCC's demand against the transfer of funds by OCC to the buyer in an amount equal to the outstanding Purchase Price plus the accrued and unpaid price differential (together, ''Repurchase Price''), which is the interest component of the Repurchase Price.

The confirmations establish tailored provisions of repurchase transactions permitted under the Non-Bank Liquidity Facility that are designed to reduce concentration risk and to promote certainty of funding and operational effectiveness based on the specific needs of a party. For example, OCC would only enter into confirmations with an institutional investor that is not a Clearing Member or affiliated bank, such as pension funds or insurance companies, in order to allow OCC to access stable and reliable sources of funding without increasing the concentration of its exposure to counterparties that are affiliated banks, broker/dealers, or futures commission merchants. In addition, any such institutional investor is obligated to enter repurchase transactions even if OCC experiences a material adverse change,[10] funds must be made available to OCC within 60 minutes of OCC's delivering eligible securities, and the institutional investor is not permitted to rehypothecate purchased securities.[11] Additionally, the confirmations set forth the term and maximum dollar amounts of the transaction permitted under the MRA.

In 2020, OCC set the aggregate amount it may seek through the Non-Bank Liquidity Facility program to an amount up to $1 billion.[12] OCC has since secured from multiple pension funds commitments in an aggregate amount of $1 billion. Since setting and securing commitments up to that aggregate commitment limit, OCC has experienced an increase in its stressed liquidity demands. Under OCC's Liquidity Risk Management Framework (''LRMF''), OCC performs daily liquidity stress testing to assess its Base Liquidity Resources[13] and Available Liquidity Resources[14] against OCC's liquidity risk tolerance (''Adequacy Scenarios''). Based in part on the results of this stress testing, OCC's Rules provide authority for OCC to periodically adjust Clearing Member's Cash Clearing Fund Requirement to ensure that OCC maintains sufficient liquidity resources to cover its liquidity risk exposures at all times. In response to increased stressed liquidity demands in 2021, OCC exercised authority under OCC Rule 1002(a) to increase the Cash Clearing Fund Requirement from $3.5 billion to $4 billion in July 2021, and from $4 billion to $5 billion in October 2021. This advance notice concerns a change to OCC's Non-Bank Liquidity Facility program to give OCC greater capacity to source liquidity from its non-bank liquidity providers as needed. OCC provided a summary of OCC management's recommendation to expand OCC's external liquidity sources as well as a discussion of the analysis underlying that recommendation as presented to the Board in confidential Exhibit 3 to File No. SR–OCC–2022–803.

Proposed Change

In order to give OCC greater capacity to source liquidity from external liquidity providers as needed, OCC would modify the Non-Bank Liquidity Facility program to remove the aggregate commitment limit identified in prior advance notices concerning the program. Instead, OCC's Board of Directors by resolution would set the level of aggregate commitments under the program from time to time to ensure that OCC maintains sufficient liquidity

[5] OCC may use the Clearing Fund to address liquidity shortfalls arising from the failure of any bank, securities or commodities clearing organization, or investment counterparty to perform any obligation to OCC when due. *See* OCC Rule 1006(f)(1)(C); Exchange Act Release No. 94304 (Feb. 24, 2022), 87 FR 11776 (Mar. 2, 2022) (SR–OCC–2021–014).

[6] *See* Exchange Act Release No. 88971 (May 28, 2020), 85 FR 34257 (June 3, 2020) (SR–OCC–2020–804).

[7] *See* Exchange Act Release No. 89039 (June 10, 2020), 85 FR 36444 (June 16, 2020) (SR–OCC–2020–803) (''Notice of No Objection to 2020 Advance Notice''); Exchange Act Release No. 76821 (Jan. 4, 2016), 81 FR 3208 (Jan. 20, 2016) (SR–OCC–2015–805) (''Notice of No Objection to 2015 Advance Notice''); Exchange Act Release No. 73979 (Jan. 2, 2015), 80 FR 1062 (Jan. 8, 2015) (SR–OCC–2014–809) (''Notice of No Objection to 2014 Advance Notice'').

[8] *See* OCC Rule 1002.

[9] OCC would use U.S. government securities that are included in Clearing Fund contributions by Clearing Members and margin deposits of any Clearing Member that has been suspended by OCC for the repurchase arrangements. OCC Rule 1006(f) and OCC Rule 1104(b) authorize OCC to obtain funds from third parties through securities repurchases using these sources. The officers who may exercise this authority include the Executive Chairman, Chief Executive Officer, and Chief Operating Officer.

[10] When included in a contract, a ''material adverse change'' is typically defined as a change that would have a materially adverse effect on the business or financial condition of a company.

[11] *See* Notice of No Objection to 2014 Advance Notice, 80 FR at 1064.

[12] *See* Notice of No Objection to 2020 Advance Notice, 85 FR at 36446. $1 billion is the same as the aggregate value established at the inception of the Non-Bank Liquidity Facility program. *See* Notice of No Objection to 2014 Advance Notice, 80 FR at 1064 & n.11. In 2015, OCC filed an advance notice that set an aggregate value of at least $1 billion and up to $1.5 billion. *See* Notice of No Objection to 2015 Advance Notice, 81 FR at 3208.

[13] The LRMF defines ''Base Liquidity Resources'' to mean the amount of committed liquidity resources maintained at all times by OCC to meet its Cover 1 liquidity resource requirements under the applicable regulations. Base Liquidity Resources are comprised of qualifying liquid resources in the form of Clearing Fund cash deposited in respect of the Cash Clearing Fund Requirement and assets that are readily available and convertible into cash (*i.e.,* Government securities) through prearranged funding arrangements, such as the Non-Bank Liquidity Facility.

[14] The LRMF defines ''Available Liquidity Resources'' to include Base Liquidity Resources plus allowable Clearing Fund cash deposited in excess of the Cash Clearing Fund Requirement. Any Clearing Member request to substitute Government securities for cash deposits in excess of such Clearing Member's propitiate share of the Clearing Fund Cash Requirement is subject to a two-day notice period. *See* OCC Rule 1002(a)(iv).

resources to cover its liquidity risk exposures at all times considering such factors including, but not limited to: (1) the size and make-up of the Clearing Fund; (2) the aggregate amount of OCC's other liquidity sources; and (3) changing market and business conditions. OCC would establish a target across all external liquidity resources of *at least* $3 billion, which is the current aggregate amount of external liquidity. OCC would continue to manage the allocation between external liquidity sources to maintain a diverse set of liquidity providers, including sources like the Non-Bank Liquidity Facility that reduce concentration of OCC's counterparty exposures.

Considering these factors, the Board of Directors has authorized OCC to seek up to an additional $2.5 billion in external liquidity, including through the Non-Bank Liquidity Facility program. Specifically, the Board considered that:

(1) OCC's current total Clearing Fund requirement, as of January 31, 2022, was approximately $15.8 billion, of which Clearing Members had deposited approximately $5.5 billion in Government securities.

(2) OCC's Base Liquidity Resources are currently $8 billion, consisting of $5 billion in cash from the Clearing Fund Cash Requirement, $2 billion from the syndicated credit facility, and $1 billion from OCC's current commitments under the Non-Bank Liquidity Facility.

(3) The agent for the liquidity providers under Non-Bank Liquidity Facility has indicated that several pension funds and other institutional investors have expressed interest in establishing or expanding commitments under the facility.[15]

OCC expects that it will source up to $500 million of this liquidity through an expansion of the syndicated credit facility as part of its annual renewal in June.[16] In addition, OCC concurrently has filed an advance notice to source liquidity through a bank counterparty by executing another master repurchase agreement for up to $1 billion (the ''Bank Repo Facility''), similar to the repurchase agreement OCC executed with a bank counterparty in 2020,[17] this time with a bank counterparty to which OCC has more limited counterparty credit exposure. Accordingly, OCC expects to source approximately $1 billion in additional liquidity under the Non-Bank Liquidity Facility. As such, the proportion of bank versus non-bank sources of liquidity would remain roughly equal to the current proportions, consistent with OCC's objective to maintain access to a diverse set of funding sources. However, to the extent that commitments under the syndicated credit facility or master repurchase agreement with a bank counterparty are less than anticipated, the Board has authorized OCC to seek additional commitments under the Non-Bank Liquidity Facility program to make up any difference. In the unlikely event that OCC is not able to onboard any of the additional bank liquidity and sources the full $2.5 billion under the Non-Bank Liquidity Facility program, OCC believes that the change in proportions between bank and non-bank liquidity would still be consistent with OCC's objective to maintain access to a diverse set of funding sources. Based on current interest received from potential counterparties, OCC believes that the risk that OCC would not be able to obtain $2.5 billion in additional external liquidity through one of more of these sources of liquidity to be low.

Removing the present $1 billion dollar cap to the Non-Bank Liquidity Facility program will also have the effect of removing one of the events in which OCC would file an advance notice for entering into individual commitments that OCC identified in a prior advance notice.[18] Consistent with the proposal to establish a target for external liquidity and drawing from applicable conditions for filing advance notices with respect to renewals of OCC's syndicated credit facility and proposed Bank Repo Facility, OCC would submit another advance notice with respect to the execution of individual commitments under the Non-Bank Liquidity Facility only if: (i) OCC should seek to execute a commitment at a level that would have the effect of reducing external liquidity below the target of $3 billion; (ii) OCC should seek to change the terms and conditions of the MRA or commitments thereunder in a manner that materially affects the nature or level of risk presented by OCC; [19] or (iii) OCC should seek to execute a commitment with a counterparty that has experienced a negative change to its credit profile or a material adverse change since OCC last executed a commitment with that counterparty. Consistent with another prior advance notice, OCC may consider changes to (i) liquidity providers provided that any new counterparty is subject to a credit review under OCC's Third-Party Risk Management Framework [20] and (ii) term lengths consistent with those approved by OCC's Board considering factors including, but not limited to, the initial committed length of the term, market conditions, and OCC's liquidity needs.[21] OCC would not consider additional counterparties or different commitment terms within these specified parameters as materially altering the terms and conditions of MRAs or commitments under the Non-Bank Liquidity Facility program.

Provided that none of the conditions under which OCC would file a subsequent advance notice are present, OCC would consider a new or renewed commitment as being on substantially the same terms and conditions as existing commitments under the Non-Bank Liquidity Facility program such that executing such commitments would not be subject to the requirement to file an advance notice filing pursuant to Section 806(e)(1) of the Clearing Supervision Act.[22] If OCC determines to modify the conditions for a new or renewed commitment under the Non-Bank Liquidity Facility in a subsequent filing, it would include in that filing the proposed conditions to the terms of any subsequent commitments or renewals

[15] *See* Confidential Exhibit 3 to SR–OCC–2022–803 (Confidential data and analysis that informed the Board's decision).

[16] *See* Exchange Act Release No. 88971, 85 FR at 34259 (providing conditions for future renewals of the syndicated credit facility without an additional advance notice, including an increase of up to $500 million in total).

[17] *See* Exchange Act Release No. 88317 (Mar. 4, 2020), 85 FR 13681 (Mar. 9, 2020) (SR–OCC–2020–801) (concerning the establishment of a ''Bank Repo Facility'' with a bank counterparty in an amount of $500 million).

[18] *See* Exchange Act Release No. 76821, 81 FR at 3209 (describing OCC's proposal to submit an advance notice in connection with a renewal of commitments under the Non-Bank Liquidity Facility if: (i) OCC determined that its liquidity needs merited commitments above or below certain levels; (ii) OCC should seek to change the terms and conditions of the Non-Bank Liquidity Facility; and (iii) the commitment counterparty experienced a negative change to its credit profile or a material adverse change since entering the commitment or the latest renewal of the commitment). OCC subsequently submitted an advance notice pursuant to that commitment to support its ability to onboard multiple liquidity providers below the identified commitment levels and with different term lengths to replace expiring commitments. *See* Exchange Act Release No. 89039, 85 FR at 36445–46.

[19] For the purposes of clarity, OCC would not consider changes to pricing or changes in representations, covenants, and terms of events of default, to be changes to a term or condition that would require the filing of a subsequent advance notice provided that pricing is at the then prevailing market rate and changes to such other provisions are immaterial to OCC as the seller and do not impair materially OCC's ability to draw against the facility.

[20] *See* Third-Party Risk Management Framework, *available at* Documents & Archives, *https://www.theocc.com/Company-Information/Documents-and-Archives.* While credit monitoring of insurance companies that may become liquidity providers would necessarily be different than credit monitoring of existing pension fund counterparties, any new liquidity would be subject to the same credit review for counterparties of the same type.

[21] *See* Exchange Act Release No. 89039, 85 FR at 36445–46.

[22] 12 U.S.C. 5465(e)(1).

that could be done without an additional advance notice.

Anticipated Effect On and Management of Risk

Completing timely settlement is a key aspect of OCC's role as the clearing agency performing central counterparty services for all listed options. Expanding the Non-Bank Liquidity Facility program would continue to promote the reduction of risks to OCC, its Clearing Members and the options market in general because it would allow OCC to obtain short-term funds from the Non-Bank Liquidity Facility to address liquidity demands arising out of the default or suspension of a Clearing Member, in anticipation of a potential default or suspension of Clearing Members, the insolvency of a bank, another securities or commodities clearing organization, or a counterparty with which OCC has invested Clearing Member funds, or the failure of such a bank clearing organization, or investment counterparty to meet an obligation to OCC when due.

The Non-Bank Liquidity Facility helps OCC minimize losses in the event of a default, suspension, insolvency, or failure to achieve daily settlement, by allowing it to obtain funds from sources not connected to OCC's Clearing Members on extremely short notice to ensure clearance and settlement of transactions in options and other contracts without interruption. OCC believes that the reduced settlement risk presented by OCC resulting from the proposed change would correspondingly reduce systemic risk and promote the safety and soundness of the clearing system. The ability to borrow funds from the Non-Bank Liquidity Facility would allow OCC to avoid liquidating margin or clearing fund assets in what would likely be volatile market conditions, which would preserve funds available to cover any losses resulting from the failure of a Clearing Member, bank, other clearing organization, or investment counterparty.

The proposed change to the Non-Bank Liquidity Facility program to allow OCC to seek an aggregate commitment amount for up to the amount determined by the Board of the Directors from time to time would help OCC ensure the continued availability of its liquidity resources by providing OCC with the capacity to seek additional funding amounts on substantially the same terms, conditions, operations, and mechanics. In addition, the proposed change to the program would ensure that the approved amount would not be less than the currently approved amount of up to $1 billion. Because the proposed change preserves substantially the same terms and conditions as the MRA and the existing conformations, OCC believes that the proposed change would not otherwise affect or alter the management of risk at OCC.

Consistency With the Payment, Clearing and Settlement Supervision Act

The stated purpose of the Clearing Supervision Act is to mitigate systemic risk in the financial system and promote financial stability by, among other things, promoting uniform risk management standards for systemically important financial market utilities and strengthening the liquidity of systemically important financial market utilities.[23] Section 805(a)(2) of the Clearing Supervision Act [24] also authorizes the Commission to prescribe risk management standards for the payment, clearing and settlement activities of designated clearing entities, like OCC, for which the Commission is the supervisory agency. Section 805(b) of the Clearing Supervision Act [25] states that the objectives and principles for risk management standards prescribed under Section 805(a) shall be to:

- promote robust risk management;
- promote safety and soundness;
- reduce systemic risks; and
- support the stability of the broader financial system.

The Commission has adopted risk management standards under Section 805(a)(2) of the Clearing Supervision Act and the Exchange Act in furtherance of these objectives and principles.[26] Rule 17Ad–22 requires registered clearing agencies, like OCC, to establish, implement, maintain, and enforce written policies and procedures that are reasonably designed to meet certain minimum requirements for their operations and risk management practices on an ongoing basis.[27] Therefore, the Commission has stated [28] that it believes it is appropriate to review changes proposed in advance notices against Rule 17Ad–22 and the objectives and principles of these risk management standards as described in Section 805(b) of the Clearing Supervision Act.[29]

OCC believes that the Non-Bank Liquidity Facility program, as modified, is consistent with Section 805(b)(1) of the Clearing Supervision Act [30] because the proposed confirmations would provide OCC with an additional source of committed liquidity to meet its settlement obligations while at the same time being structured to mitigate certain operational risks, as described above, that arise in connection with this committed liquidity source. In this way, the proposed changes are designed to promote robust risk management; promote safety and soundness; reduce systemic risks; and support the stability of the broader financial system.

OCC believes that the Non-Bank Liquidity Facility program, as modified, is also consistent with the requirements of Rule 17Ad–22(e)(7) under the Exchange Act.[31] Rule 17Ad–22(e)(7) requires OCC to establish, implement, maintain and enforce written policies and procedures reasonably designed to effectively measure, monitor, and manage liquidity risk that arises in or is borne by OCC, including measuring, monitoring, and managing its settlement and funding flows on an ongoing and timely basis, and its use of intraday liquidity, as specified in the rule.[32] In particular, Rule 17Ad–22(e)(7)(i) under the Exchange Act [33] directs that OCC meet this obligation by, among other things, ''[m]aintaining sufficient liquid resources at the minimum in all relevant currencies to effect same-day . . . settlement of payment obligations with a high degree of confidence under a wide range of foreseeable stress scenarios that includes, but is not limited to, the default of the participant family that would generate the largest aggregate payment obligation for [OCC] in extreme but plausible market conditions.''

As described above, the proposed change would allow OCC to seek a readily available liquidity resource that would enable it to, among other things, continue to meet its obligations in a timely fashion and as an alternative to selling Clearing Member collateral under what may be stressed and volatile market conditions. For these reasons, OCC believes that the proposal is consistent with Rule 17Ad–22(e)(7)(i).[34]

Rule 17Ad–22(e)(7)(ii) under the Exchange Act requires OCC to establish,

[23] 12 U.S.C. 5461(b).

[24] 12 U.S.C. 5464(a)(2).

[25] 12 U.S.C. 5464(b).

[33] 17 CFR 240.17Ad–22(e)(7)(i).

[34] *Id.*

implement, maintain and enforce written policies and procedures reasonably designed to hold qualifying liquid resources sufficient to satisfy payment obligations owed to Clearing Members.[35] Rule 17Ad–22(a)(14) of the Exchange Act defines ''qualifying liquid resources'' to include, among other things, lines of credit without material adverse change provisions, that are readily available and convertible into cash.[36] The MRA under the Non-Bank Liquidity Facility would not be subject to any material adverse change provision and would continue to be designed to permit OCC to, among other things, help ensure that OCC has sufficient, readily-available qualifying liquid resources to meet the cash settlement obligations of its largest Clearing Member Group. Therefore, OCC believes that the proposal is consistent with Rule 17Ad–22(e)(7)(ii).[37]

For the foregoing reasons, OCC believes that the proposed changes are consistent with Section 805(b)(1) of the Clearing Supervision Act [38] and Rule 17Ad–22(e)(7) [39] under the Exchange Act.

III. Date of Effectiveness of the Advance Notice and Timing for Commission Action

The proposed change may be implemented if the Commission does not object to the proposed change within 60 days of the later of (i) the date the proposed change was filed with the Commission or (ii) the date any additional information requested by the Commission is received. OCC shall not implement the proposed change if the Commission has any objection to the proposed change.

The Commission may extend the period for review by an additional 60 days if the proposed change raises novel or complex issues, subject to the Commission providing the clearing agency with prompt written notice of the extension. A proposed change may be implemented in less than 60 days from the date the advance notice is filed, or the date further information requested by the Commission is received, if the Commission notifies the clearing agency in writing that it does not object to the proposed change and authorizes the clearing agency to implement the proposed change on an earlier date, subject to any conditions imposed by the Commission.

OCC shall post notice on its website of proposed changes that are implemented. The proposal shall not take effect until all regulatory actions required with respect to the proposal are completed.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the advance notice is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–OCC–2022–803 on the subject line.

Paper Comments

- Send paper comments in triplicate to Vanessa Countryman, Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–OCC–2022–803. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the advance notice that are filed with the Commission, and all written communications relating to the advance notice between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of OCC and on OCC's website at *https://www.theocc.com/Company-Information/Documents-and-Archives/By-Laws-and-Rules.*

All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly.

All submissions should refer to File Number SR–OCC–2022–803 and should be submitted on or before August 16, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[40]

J. Matthew DeLesDernier,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95337; File No. SR–NYSE–2022–27]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Its Price List Related to Colocation

July 20, 2022.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that on July 6, 2022, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its Price List related to colocation to specify that the NMS feeds that are included in the Included Data Products are no longer available over the Liquidity Center Network (''LCN''). The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Price List related to colocation to specify that the NMS feeds that are included in the Included Data Products are no longer available over the Liquidity Center Network (''LCN'').[4]

Background

The LCN and the IP network are the two local area networks in the Mahwah Data Center that are available to Users.[5] General Note 5 of the Price List explains that when a User purchases a service that includes access to the LCN or IP network, it receives connectivity to any of the ''Included Data Products'' that it selects, subject to any technical provisioning requirements and authorization from the provider of the data feed. The Included Data Products include, among others, the ''NMS feeds,'' which are the Consolidated Tape System and Consolidated Quote System (''CTA'' and ''CQ,'' respectively) data feeds and the Options Price Reporting Authority (''OPRA'') data feed.[6]

Before May 2020, connectivity to the NMS feeds was available on only the LCN and IP networks. In May 2020, the Commission approved the Exchange's proposal to offer Users access to the new ''NMS network,'' an alternate, dedicated network that connects to the NMS feeds faster than the LCN or IP networks.[7] Pursuant to that filing, the Exchange amended the notes regarding the services available in colocation to provide that if a User purchases a service that includes a 10 Gb or 40 Gb LCN or IP network connection, that service would also include a connection to the NMS network of the same size, at no additional charge.

Currently, the NMS feeds are available to Users on all three of the NMS network, IP network, and LCN, but at varying speeds. The NMS feeds are published first to the NMS network, which then republishes them to the IP network, which then republishes them to the LCN. This means that connectivity to the NMS feeds is fastest over the NMS network and slowest over the LCN. This also means that receiving the NMS feeds from more than one of these networks does not provide redundancy protection to Users; if connectivity to the NMS feeds over the NMS network were to be interrupted, so would connectivity to those feeds over the IP network and LCN, since the three networks publish the NMS feeds to each other in sequence.

Despite the Exchange's introduction of the NMS network in May 2020, some Users have failed to avail themselves of the option to receive the NMS feeds over that faster network at no additional cost. Other Users have opted to receive the NMS feeds over the NMS network, but have not yet formally asked the Exchange to stop also sending them the NMS feeds over the other networks (*i.e.,* IP network or LCN) for which those Users have ports.

At the same time, traffic over the LCN has been increasing. Increases in options trading volume in recent years on the NYSE American Options and NYSE Arca Options exchanges have increased the size of the market data feeds from those markets, thereby increasing the network bandwidth requirements overall for the market data feeds of the Exchange and the Affiliate SROs that are included in the Included Data Products (the ''NYSE Group Market Data'' feeds) over the LCN. As a result, the LCN connections over which some Users continue to receive the NMS feeds are increasingly burdened as the NYSE Group Market Data Feeds continue to grow in size.

To address these issues, the Exchange proposes to remove the NMS feeds from the Included Data Products available on the LCN. Doing so would permit Users to receive connectivity to the NYSE Group Market Data feeds over their LCN connections, while the NMS feeds would remain available to Users at no additional charge over the NMS network, at faster speeds than they were available over the LCN.

To accomplish this change, the Exchange proposes to amend General Note 5 of the Price List as follows (proposed addition italicized):

5. When a User purchases a service that includes access to the LCN or IP network it receives connectivity to any of the Included Data Products that it selects, subject to any technical provisioning requirements and authorization from the provider of the data feed. *Connectivity to the NMS feeds is not available over the LCN, but is available over the IP network and the NMS network described below in General Note 6.* Market data fees for the Included Data Products are charged by the provider of the data feed. A User can change the Included Data Products to which it receives connectivity at any time, subject to authorization from the provider of the data feed. The Exchange is not the exclusive method to connect to the Included Data Products.

Application and Impact of the Proposed Changes

Currently, 34 Users receive the NMS feeds over the LCN, but 23 of those 34 Users have access to the NMS network already enabled, such that they also receive the NMS feeds over the NMS network. To implement this proposal with respect to those 23 Users, the Exchange has notified the Users that their connections to the NMS feeds over LCN will be discontinued but that they will continue to receive the NMS feeds over the NMS network.

The other 11 Users that receive the NMS feeds over the LCN do not currently have NMS network access enabled, but are entitled to such access at no additional charge, since their existing LCN service includes a connection of the same size to the NMS network. The Exchange has notified these 11 Users that their connections to the NMS feeds over LCN will be discontinued, and all 11 of them have submitted orders to begin receiving the NMS feeds over an NMS network connection at no additional charge. The Exchange is currently in the process of installing NMS network connections for those 11 Users.[8]

[4] The Exchange is an indirect subsidiary of Intercontinental Exchange, Inc. (''ICE''). Each of the Exchange's affiliates NYSE American LLC, NYSE Arca, Inc., NYSE Chicago, Inc., and NYSE National, Inc. (together, the ''Affiliate SROs'') has submitted substantially the same proposed rule change to propose the changes described herein. *See* SR–NYSEAMER–2022–28, SR–NYSEArca–2022–39, SR–NYSECHX–2022–15, and SR–NYSENAT–2022–10.

[5] For purposes of the Exchange's colocation services, a ''User'' means any market participant that requests to receive colocation services directly from the Exchange. *See* Securities Exchange Act Release No. 76008 (September 29, 2015), 80 FR 60190 (October 5, 2015) (SR–NYSE–2015–40). As specified in the Price List, a User that incurs colocation fees for a particular colocation service pursuant thereto would not be subject to colocation fees for the same colocation service charged by the Affiliate SROs.

[6] *See* Securities Exchange Act Release No. 79730 (January 4, 2017), 82 FR 3045 (January 10, 2017) (SR–NYSE–2016–92).

[7] *See* Securities Exchange Act Release No. 88837 (May 7, 2020), 85 FR 28671 (May 13, 2020) (SR–NYSE–2019–46, SR–NYSEAMER–2019–34, SR–NYSEArca–2019–61, SR–NYSENAT–2019–19). *See also* Securities Exchange Act Release No. 88972 (May 29, 2020), 85 FR 34472 (June 4, 2020) (SR–NYSECHX–2020–18).

[8] Seven of these 11 Users also currently have access to the IP network and could have chosen to receive the NMS feeds over their IP network connections at no additional charge, but instead all

Users would experience no interruption in their ability to connect to the NMS feeds as a result of the proposed change, and would receive the NMS feeds faster as a result of the proposed change. No User would be required to purchase any additional products or services from the Exchange to transition their NMS feed connectivity to the NMS network, or to an IP network connection they have already purchased.

The proposed changes would not apply differently to distinct types or sizes of market participants. Rather, they would apply to all Users equally. The purchase of any colocation service is completely voluntary and the Price List is applied uniformly to all Users.

No fees are affected by this proposal.

Implementation Date

The Exchange is in the process of transitioning all remaining Users that receive the NMS feeds over the LCN to begin receiving the feeds over NMS network connections at no additional charge. The Exchange expects this transition process to be completed before October 2022. Once that transition is complete, the Exchange proposes to implement this rule change by Customer Notice, at which point the option of receiving the NMS feeds over the LCN would be removed from the Price List.

Competitive Environment

The proposed changes are not otherwise intended to address any other issues relating to colocation services and/or related fees, and the Exchange is not aware of any problems that Users would have in complying with the proposed change.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[9] in general, and furthers the objectives of Section 6(b)(5) of the Act,[10] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that discontinuing the availability of the NMS feeds on the LCN would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest. Users that currently receive the NMS feeds on the LCN would receive the same data at a faster speed via the NMS or IP network, with no interruption of their ability to connect to the NMS feeds. Connectivity to the NMS feeds over the NMS network would be available at no additional charge to affected Users, since their existing LCN service includes a connection of the same size to the NMS network. In addition, connectivity to the NMS feeds over the IP network would be at no additional charge to Users that have already purchased access to the IP network. The Exchange believes that providing connectivity to the same feeds at a faster speed at no additional charge would perfect the mechanisms of a free and open market and a national market system.

The Exchange believes that the proposed rule change does not significantly affect the protection of investors or the public interest. The proposed rule change would simply give Users that currently receive the NMS feeds on the LCN the opportunity to receive the same data at a faster speed via the NMS network or the IP network, at no additional charge (if they choose to receive the NMS feeds over the NMS network or an already-established IP network connection), with no interruption of their ability to connect to the NMS feeds.

The Exchange believes that discontinuing the availability of the NMS feeds on the LCN would not permit unfair discrimination between customers, issuers, brokers, or dealers, because the proposed change would apply equally to all Users that currently receive the NMS feeds over the LCN. Nor does the proposed change advantage Users of the LCN over Users of the IP network, since, as indicated in the Price List, services that include a 10 Gb or 40 Gb LCN or IP connection also include a connection to the NMS network of the same size, at no additional charge.

The Exchange believes that the proposed change would facilitate transactions in securities, remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors and the public interest because removing the NMS feeds from the LCN would permit Users to receive connectivity to the NYSE Group Market Data feeds over their LCN connections, while the NMS feeds would remain available to Users at no additional charge over the NMS network, at faster speeds than they were available over the LCN. As noted above, increases in options trading volume in recent years on the NYSE American Options and NYSE Arca Options exchanges have increased the size of the market data feeds from those markets, thereby increasing the network bandwidth requirements for the NYSE Group Market Data feeds over the LCN.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[11] the Exchange believes that the proposed rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange believes that the proposed rule change would not place any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any competitive issues, but rather would provide Users that currently receive the NMS feeds on the LCN the same data at a faster speed via the NMS or IP network, at no additional charge (if they choose to receive the NMS feeds over the NMS network or an already-established IP network connection), with no interruption of their ability to connect to the NMS feeds.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[12] and Rule 19b–4(f)(6) thereunder.[13] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii)

11 have opted to receive the NMS feeds over the faster NMS network.

[9] 15 U.S.C. 78f(b).

[10] 15 U.S.C. 78f(b)(5).

[11] 15 U.S.C. 78f(b)(8).

[12] 15 U.S.C. 78s(b)(3)(A)(iii).

[13] 17 CFR 240.19b–4(f)(6).

impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[14]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[15] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSE–2022–27 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSE–2022–27. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSE–2022–27 and should be submitted on or before August 16, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[16]

J. Matthew DeLesDernier,

Deputy Secretary.

Presidential Declaration of a Major Disaster for Public Assistance Only for the State of North Dakota.

AGENCY: Small Business Administration.

ACTION: Notice.

SUMMARY: This is a Notice of the Presidential declaration of a major disaster for Public Assistance Only for the State of North Dakota (FEMA–4660–DR), dated 07/13/2022.

Incident: Severe Winter Storm and Flooding.

Incident Period: 04/22/2022 through 05/25/2022.

DATES: Issued on 07/13/2022.

Physical Loan Application Deadline Date: 09/12/2022.

Economic Injury (EIDL) Loan Application Deadline Date: 04/13/2023.

ADDRESSES: Submit completed loan applications to: U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR FURTHER INFORMATION CONTACT: Alan Escobar, Office of Disaster Assistance, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given that as a result of the President's major disaster declaration on 07/13/2022, Private Non-Profit organizations that provide essential services of a governmental nature may file disaster loan applications at the address listed above or other locally announced locations.

The following areas have been determined to be adversely affected by the disaster:

Primary Counties: Adams, Barnes, Billings, Bottineau, Burke, Cavalier, Dickey, Divide, Dunn, Foster, Golden Valley, Grand Forks, Grant, Griggs, Hettinger, Kidder, LaMoure, Logan, McHenry, McIntosh, McKenzie, McLean, Mountrail, Nelson, Oliver, Pembina, Ramsey, Ransom, Renville, Richland, Rolette, Sargent, Steele, Stutsman, Towner, Traill, Walsh, Ward, Wells, Williams.

The Interest Rates are:

	Percent
For Physical Damage:	
Non-Profit Organizations with Credit Available Elsewhere ...	1.875
Non-Profit Organizations without Credit Available Elsewhere	1.875
For Economic Injury:	
Non-Profit Organizations without Credit Available Elsewhere	1.875

The number assigned to this disaster for physical damage is 17530 B and for economic injury is 17531 0.

(Catalog of Federal Domestic Assistance Number 59008)

Joshua Barnes,

Acting Associate Administrator for Disaster Assistance.

SMALL BUSINESS ADMINISTRATION

Data Collection Available for Public Comments

ACTION: 60 Day notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act, this notice announces the Small Business Administration's intentions to request approval on a new and/or currently approved information collection.

DATES: Submit comments on or before September 26, 2022.

ADDRESSES: Send all comments regarding whether this information collection is necessary for the proper performance of the function of the agency, whether the burden estimates are accurate, and if there are ways to minimize the estimated burden and enhance the quality of the collections, to Michael Donadieu, Senior Examiner, 202–255–1007, *michael.donadieu@sba.gov,* Office of Investment, Small Business Administration, Washington, DC 20416.

FOR FURTHER INFORMATION CONTACT: Michael Donadieu, Senior Examiner, 202–255–1007, *michael.donadieu@sba.gov* Curtis B. Rich, Agency Clearance Officer, 202–205–7030 *curtis.rich@sba.gov.*

SUPPLEMENTARY INFORMATION: SBA Forms 1405 and 1405A are used by Small Business Administration (SBA) examiners as part of their examination of licensed small business investment companies (SBICs). This information is collected from SBIC'S Stockholders and partners and provides independent third-party confirmation of an SBIC's representations concerning its owners. The information helps SBA to evaluate the SBIC'S with applicable laws and regulations concerning capital requirements.

Solicitation of Public Comments

SBA is requesting comments on (a) Whether the collection of information is necessary for the agency to properly perform its functions; (b) whether the burden estimates are accurate; (c) whether there are ways to minimize the burden, including through the use of automated techniques or other forms of information technology; and (d) whether there are ways to enhance the quality, utility, and clarity of the information.

PRA Number: 3245–0172

(1) *Title:* ''Stockholders' Confirmation (Corporation); Ownership Confirmation (Partnership)''.

Description of Respondents: Licensed small business investment companies (SBICs).

Form Number: 1405, 1405A.

Total Estimated Annual Responses: 600.

Total Estimated Annual Hour Burden: 600.

Curtis B. Rich,

Agency Clearance Officer.

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #17528 and #17529; MINNESOTA Disaster Number MN–0009]

Presidential Declaration of a Major Disaster for Public Assistance Only for the State of Minnesota.

AGENCY: Small Business Administration.

ACTION: Notice.

SUMMARY: This is a Notice of the Presidential declaration of a major disaster for Public Assistance Only for the State of Minnesota (FEMA–4659–DR), dated 07/13/2022.

Incident: Severe Storms, Straight-line Winds, and Flooding.

Incident Period: 04/22/2022 through 06/15/2022.

DATES: Issued on 07/13/2022.

Physical Loan Application Deadline Date: 09/12/2022.

Economic Injury (EIDL) Loan Application Deadline Date: 04/13/2023.

ADDRESSES: Submit completed loan applications to: U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR FURTHER INFORMATION CONTACT: A. Escobar, Office of Disaster Assistance, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given that as a result of the President's major disaster declaration on 07/13/2022, Private Non-Profit organizations that provide essential services of a governmental nature may file disaster loan applications at the address listed above or other locally announced locations.

The following areas have been determined to be adversely affected by the disaster:

Primary Counties: Beltrami, Clearwater, Cook, Kittson, Koochiching, Lake, Lake Of The Woods, Mahnomen, Marshall, Norman, Pennington, Polk, Red Lake, Roseau, Saint Louis, Bois Forte Band of Chippewa, Leech Lake Band of Ojibwe, Red Lake Nation, and the White Earth Nation.

The Interest Rates are:

	Percent
For Physical Damage:	
Non-Profit Organizations with Credit Available Elsewhere ...	1.875
Non-Profit Organizations without Credit Available Elsewhere	1.875
For Economic Injury:	
Non-Profit Organizations without Credit Available Elsewhere	1.875

The number assigned to this disaster for physical damage is 17528 B and for economic injury is 17529 0.

BILLING CODE 8026–09–P

SURFACE TRANSPORTATION BOARD

[Docket No. AB 1324X]

Alabama Railroad, LLC—Abandonment Exemption—in Escambia, Conecuh, and Monroe Counties, Ala.

On July 6, 2022, Alabama Railroad, LLC (ARL), filed a petition under 49 U.S.C. 10502 for exemption from the prior approval requirements of 49 U.S.C. 10903 to abandon approximately 47.5 miles of rail line, extending from milepost 607.73 at Flomaton, Ala., to milepost 655.2 near Tunnel Springs, Ala., including all sidings and the MR Junction Spur between valuation stations 0+00 and 90+81 in Escambia, Conecuh, and Monroe Counties, Ala. (the Line). The Line traverses U.S. Postal Service Zip Codes 36426, 36441, 36460, 36471, and 36475.

According to ARL, it purchased the Line from Alabama Railroad Co. (ALAB) in 2020. *See Ala. R.R.—Acquis. & Operation Exemption—Line of Ala. R.R.,* FD 36450 (STB served Nov. 6, 2020). The petition states that prior to ALAB's sale of the Line, ALAB obtained Board authority to abandon the Line but never consummated the abandonment. *See Ala. R.R.—Aban. Exemption—in Escambia, Conecuh, & Monroe Cntys., Ala.,* AB 463 (Sub-No. 2X) (STB served Apr. 18, 2019). ARL states that since it purchased the Line, it has not moved any local traffic over the Line, and, because the Line is stub-ended, there is no overhead traffic. ARL states that it doubts that future demand for service will materialize, particularly at volumes that would warrant restoring operations, and therefore seeks to abandon the Line to facilitate future disposition of the

Line's track assets and underlying right-of-way.

ARL states that, based on the information in its possession, the Line does not contain federally granted rights-of-way and any relevant documentation in ARL's possession related to that statement will be made available promptly to those requesting it.

Citing *Knox & Kane Railroad—Abandonment Exemption—McKean County, Pa.,* AB 551 (Sub-No. 2X) (STB served July 24, 2015), ARL asserts that, because it proposes to abandon its entire railroad system, it is appropriate for the Board to refrain from imposing labor protective conditions because there will be no remaining entity subject to the Board's jurisdiction.

By issuance of this notice, the Board is instituting an exemption proceeding pursuant to 49 U.S.C. 10502(b). A final decision will be issued by October 24, 2022.

Any offer of financial assistance (OFA) under 49 CFR 1152.27(b)(2) will be due no later than 120 days after the filing of the petition for exemption, or 10 days after service of a decision granting the petition for exemption, whichever occurs sooner. Persons interested in submitting an OFA must first file a formal expression of intent to file an offer by August 5, 2022, indicating the type of financial assistance they wish to provide (*i.e.,* subsidy or purchase) and demonstrating that they are preliminarily financially responsible. *See* 49 CFR 1152.27(c)(1)(i).

Following abandonment, the Line may be suitable for other public use, including interim trail use. Any request for a public use condition under 49 CFR 1152.28 or for interim trail use/rail banking under 49 CFR 1152.29 will be due no later than August 15, 2022.[1]

All pleadings, referring to Docket No. AB 1324X, must be filed with the Surface Transportation Board either via e-filing on the Board's website or in writing addressed to 395 E Street SW, Washington, DC 20423–0001. In addition, a copy of each pleading must be served on ARL's representative, Robert A. Wimbish, Fletcher & Sippel LLC, 29 North Wacker Drive, Suite 800, Chicago, IL 60606. Replies to the petition are due on or before August 15, 2022.

Persons seeking further information concerning abandonment procedures may contact the Board's Office of Public Assistance, Governmental Affairs, and Compliance at (202) 245–0238 or refer to the full abandonment and discontinuance regulations at 49 CFR part 1152. Questions concerning environmental issues may be directed to the Board's Office of Environmental Analysis (OEA) at (202) 245–0294. Assistance for the hearing impaired is available through the Federal Relay Service at (800) 877–8339.

A Draft Environmental Assessment (Draft EA) (or Draft Environmental Impact Statement (Draft EIS), if necessary) prepared by OEA will be served upon all parties of record and upon any other agencies or persons who comment during its preparation. Other interested persons may contact OEA to obtain a copy of the Draft EA (or Draft EIS). Draft EAs in abandonment proceedings normally will be made available within 60 days of the filing of the petition. The deadline for submission of comments on the Draft EA generally will be within 30 days of its service.

Board decisions and notices are available at *www.stb.gov.*

Decided: July 21, 2022.

By the Board, Mai T. Dinh, Director, Office of Proceedings.

Eden Besera,

Clearance Clerk.

[FR Doc. 2022–15977 Filed 7–25–22; 8:45 am]

BILLING CODE 4915–01–P

[1] Filing fees for OFAs and trail use requests can be found at 49 CFR 1002.2(f)(25) and (27), respectively.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No. FAA–2021–0466]

Agency Information Collection Activities: Requests for Comments; Clearance of a New Approval of Information Collection: Federal Aviation Administration Unmanned Aircraft Systems Support Center Case Management System

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval for a new information collection. The Federal Aviation Administration (FAA) Unmanned Aircraft Systems (UAS) Support Center Case Management System (CMS) is being created to help streamline how stakeholders' questions are answered in a timely manner. Specifically, the Contact Customer Support form allows the public and other stakeholders to ask the FAA questions, as well as get the appropriate answer or information they need to operate their UAS or drone safely. The UAS Support Center has a publicly available form to submit inquiries. This form would be replacing the current web form to be used within the Salesforce solutions that allows UAS Integration Office additional technology to more efficient and streamline the UAS Support center business process. This form would allow the UAS Integration Office to collect the appropriate information about the stakeholder's name, preferred method of communications email address, phone number, zip code, type of flyer that would allow the Support Center Analysts to answer the customer's specific question more efficiently.

DATES: Written comments should be submitted by August 25, 2022.

ADDRESSES: Please send written comments:

By Electronic Docket: www.regulations.gov (Enter docket number into search field).

By mail: Mark Hyatt, 490 L'Enfant Plaza, Suite 2206, Washington, DC 20024.

By fax: 202–267–8249.

FOR FURTHER INFORMATION CONTACT: Mark Hyatt by email at: *mark.hyatt@faa.gov;* phone: 202–267–3676.

SUPPLEMENTARY INFORMATION:

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

OMB Control Number: 2120–XXXX.

Title: Federal Aviation Administration (FAA) Unmanned Aircraft Systems (UAS) Support Center Case Management System (CMS).

Form Numbers: Customer Inquiry form; Customer Inquiry Status Check Form.

Type of Review: New Information Collection.

Background: The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on June 7, 2021 (Document Citation: 86 FR 30368).

The Federal Aviation Administration (FAA) Unmanned Aircraft Systems

(UAS) Support Center Case Management System (CMS) will streamline how respondents' questions will be answered. Specifically, the UAS Support Center CMS Customer Inquiry form allows the public and other stakeholders to ask the FAA questions, as well as get the appropriate answer/information that is needed to operate their UAS or drone safely.

The UAS Support Center will have a publicly available form to submit inquiries. This form will allow the UAS Support Center to collect the appropriate information about the respondent's name (*i.e.,* first and last), preferred method of communications (*i.e.,* email or phone), email address, phone number, zip code (if needed), self-identification of type of flyer (*i.e.,* recreational, commercial/business, public safety, local government, educational/research, Eyewitness Report, I don't know, and other), the subject of the inquiry, and inquiry/question). This information will allow the UAS Support Center Analysts more information to efficiently answer the respondent's specific question.

The respondents public form process starts with submitting an inquiry by using the public webform, shared email inbox, or by calling the UAS Support Center Analysts. Once the public user submits an inquiry, they will receive an automated system email receipt that includes inquiry reference number, created date, ''tell us about yourself,'' subject, and their inquiry/question. The public users can also use the inquiry status public page to check their inquiry status. For a public user to check the status of an inquiry, the system requires the user to have and enter the reference number and email address that is used to when creating the inquiry. Once the system confirms that the email address and reference number match with the inquiry record that's currently in the system, it will display inquiry status and created date of the inquiry.

The FAA received comments to the 60-day **Federal Register** Notice from the Small UAV Coalition, MAC Law, and one individual.

- The FAA considered all comments equally.
- The FAA agrees with the request for the system to send a confirmation email with the confirmation tracking code to track the status of the inquiry, similar to the *www.regulations.gov* website. This functionality is built into the system and will not allow for members of the public to view the status of another stakeholder's inquiry.
- The Case Management System collects appropriate information about the stakeholder's name, preferred method of communication, phone number, zip code, and type of flyer to facilitate quick resolution of stakeholder inquiries. It will provide a historical record of an individual's inquiries for the UAS Support Center to reference.
- The FAA references the support center on *FAA.gov/uas,* UAS events, community partnerships and social media.
- The FAA provides the opportunity for a stakeholder to contact the FAA UAS Support Center by phone and/or email.The FAA commits to protecting personally identifiable information (PII) in response to a Freedom of Information Act request, under 5 U.S.C. 552(b)(6). In response, a text-based warning to avoid including PII will be included on the inquiry page to prevent unnecessary collection of this information.

Respondents: Anyone may use the publicly available form to submit an inquiry. The respondent may submit any number of inquiries.

Frequency: N/A.

Estimated Average Burden per Response: Less than two minutes for a typical inquiry.

Estimated Total Annual Burden: The majority of respondents submit a one-time inquiry. The annual burden per respondent per inquiry is two minutes. Estimate around 22,000 inquiries per year equating to 44,000 minutes of total burden to the public per year.

Issued in Washington, DC.

Danielle Corbett,

Manager, UAS Integration Office, Program and Data Management, AUS–410.

[FR Doc. 2022–15894 Filed 7–25–22; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

Buy America Waiver Notification

AGENCY: Maritime Administration, U.S. Department of Transportation (DOT).

ACTION: Notice.

SUMMARY: This notice provides information regarding the finding of the Maritime Administration (MARAD), in coordination with the Federal Highway Administration (FHWA), that it is appropriate to grant a Buy America waiver based on nonavailability to the Philadelphia Regional Port Authority (PhilaPort) for procurement of foreign iron and steel components for the Packer Avenue Marine Terminal (PAMT) Capacity and Warehouse Relocation FY2017–2018 Infrastructure for Rebuilding America (INFRA) project. The foreign iron and steel components are part of a Medium Voltage (MV) Cable Reel System, which is necessary for the conversion of two ship-to-shore (STS) cranes' drive power supply from diesel to electric. The non-domestic parts include: (i) Drive Gearbox and Motors; (ii) Electrical and Communications Collector System; (iii) MV cable drum; (iv) MV cable guides and diverter mounted to STS structure/legs; and (v) Gantry level bi-directional multi-roller, curved cable guide.

DATES: The effective date of the waiver is July 27, 2022.

FOR FURTHER INFORMATION CONTACT: For questions about this notice, please contact Robert Bouchard, Director, Office of Port Infrastructure Development, 202–366–5076 or via email at *Robert.Bouchard@dot.gov.* For legal questions, please contact Lauren Gill, MARAD Office of Chief Counsel, 202–366–2150, or via email at *Lauren.Gill@dot.gov.*

SUPPLEMENTARY INFORMATION:

Electronic Access

An electronic copy of this document may be downloaded from the **Federal Register**'s home page at: *www.FederalRegister.gov* and the Government Publishing Office's database at: *www.GovInfo.gov.*

Background

PhilaPort's FY2017–2018 INFRA Project is required to follow the FHWA's Buy America requirements at 23 U.S.C. 313 and implementing regulations at 23 CFR 635.410. FHWA's Buy America regulation in 23 CFR 635.410 requires a domestic manufacturing process for any steel or iron products (including protective coatings) that are permanently incorporated in a Federal-aid construction project. The regulation also provides for a waiver of the Buy America requirements when the application would be inconsistent with the public interest or when satisfactory quality domestic steel and iron products are not produced in the United States in sufficient and reasonably available quantities. This notice provides information regarding MARAD's finding that it is appropriate to grant the PhilaPort a Buy America waiver based on nonavailability for procurement of foreign iron and steel components for the MV Cable Reel System, which is necessary for the conversion of two ship-to-shore (STS) cranes' drive power supply from diesel to electric. The non-domestic parts include: (i) Drive Gearbox and Motors; (ii) Electrical and Communications Collector System; (iii) MV cable drum; (iv) MV cable guides and diverter mounted to STS structure/

legs; and (v) Gantry level bi-directional multi-roller, curved cable guide.

Background on the Project: The DOT awarded PhilaPort [1] a $25.5M FY2017–2018 INFRA grant [2] for its PAMT Capacity and Warehouse Relocation Project, which has a total project cost of roughly $122M.[3] MARAD is designated as the DOT operating agency responsible for administering the Project. The Project includes the electrification of two existing Hyundai STS diesel cranes (referred to as H–6 and H–7) to eliminate air emissions and improve operational reliability. The cranes were installed at PAMT in 2004 and are the most utilized cranes on the terminal for unloading cargo from container vessels. According to PhilaPort, depending on the workload, the cranes can consume between 20 to 100 gallons of diesel fuel per hour.

PhilaPort determined that delivering utility-supplied electric power to the STS cranes required a trailing MV Cable Reel System. The MV Cable Reel System allows the STS cranes to be mobile along the dock by reeling cable in and out from a motorized and synchronized cable drum as the crane moves along the berth. The cable also delivers fiber communications to and from the cranes and the terminal. PhilaPort currently has five other STS cranes that operate alongside the H–6 and H–7 cranes that use a similar MV Cable Reel system. Additionally, the dock where H–6 and H–7 operate has been retrofitted to allow for the electrification of the two cranes via this system.

The crane electrification project will have substantial environmental benefits due to the elimination of harmful air emissions after the transition to electric drives. PhilaPort's PAMT has a planned annual container throughput that is forecasted to require 4,103 hours of operation for both H–6 and H–7. At this level of operation, PhilaPort estimates that converting the cranes to utility-supplied electricity would eliminate 109,896 of diesel crane hours and over 100,000 tons of harmful air emissions over their lifetime. Additionally, the conversion of the cranes from diesel to electric will result in significant cost savings to PhilaPort due to the reduction in fuel usage, energy costs, and improvements in efficiency and reliability of the cranes.

Background on the Waiver Request: PhilaPort began designing the crane electrification project in April 2020, at which point it became apparent that a Buy America-compliant MV Cable Reel System could not be sourced domestically. After further discussions with MARAD, PhilaPort requested that the design engineer perform a market study among potential suppliers. The design engineer contacted three known suppliers in the industry and one potential supplier in a related industry. All four respondents confirmed that they could not supply a fully Buy America-compliant MV Cable Reel System.

After receiving the results of the market study and discussing with MARAD, PhilaPort proceeded to bid the crane electrification project in the hope that bidding contractors could engage resources to identify a fully Buy America-compliant MV Cable Reel System. On June 28, 2021, PhilaPort received bids on the Project from only two contractors, both of whom proposed the same non-compliant supplier for the MV Cable Reel System.

After unsuccessfully identifying domestic manufacturers of the MV Cable Reel System, on September 8, 2021, PhilaPort submitted a Buy America waiver request to MARAD for the procurement of an MV Cable Reel System containing foreign iron and steel components needed to complete the PAMT INFRA Project. The foreign components [4] include: (i) Drive Gearbox and Motors; (ii) Electrical and Communications Collector System; (iii) MV cable drum; (iv) MV cable guides and diverter mounted to STS structure/legs; and (v) Gantry level bi-directional multi-roller, curved cable guide.

The MV Cable Reel System is included under an approximately $5.5 million contract to complete the crane electrification project. PhilaPort estimates that the MV Cable Reel System itself will cost $410,000 out of that total project cost. Of the $410,000, approximately $110,000, or 2% of the total contract cost, is the cost of the foreign steel and iron components contained in the MV Cable Reel System. The remaining $300,000 is non-steel/iron electrical trailing cable. All other costs associated with this contract are expected to comply with Buy America requirements.

In accordance with the statutory requirement at 23 U.S.C. 313(g), MARAD published a notice of intent to issue a waiver on the FHWA website on April 27, 2022, at *https://www.fhwa.dot.gov/construction/contracts/waivers.cfm?id=165.* MARAD received no comments in response to the publication. Additionally, the PhilaPort point of contact similarly did not receive any comments or inquiries. Thus, PhilaPort did not receive any new information indicating that the subject components could be produced by domestic manufacturers.

Although PhilaPort did not identify a Buy America-compliant MV Cable Reel System, it provided information to MARAD supporting its waiver request, including information:

- Supporting the necessity of the MV Cable Reel System for converting the STS cranes from diesel to electric;
- Documenting efforts to locate compliant manufactured products;
- Demonstrating that alternative designs were infeasible; and
- Describing the effects of denying the request.

Although ultimately unsuccessful, PhilaPort made substantial efforts to find a Buy America-compliant MV Cable Reel System.

Timing and Need for a Waiver. According to PhilaPort, the approval of a Buy America waiver for the MV Cable Reel System is critical to maintain the schedule of ongoing construction on the INFRA Project. Currently, the lead time for this major component is between 20 to 30 weeks, so any delay in approving the waiver will result in project delays and additional time the STS cranes will operate under diesel power. Without the waiver for the relevant system, the crane electrification project cannot move forward, and the environmental and operational benefits of the project would be lost.

Executive Order 14005. Executive Order 14005, ''Ensuring the Future is Made in All of America by All of America's Workers,'' provides that agencies should, consistent with applicable law, maximize the use of goods, products, and materials produced in, and services offered in, the U.S. 86 FR 7475 (Jan. 28, 2021). Based on the information contained in the waiver request from PhilaPort and the lack of comments following publication of a notice seeking comment on April 27, 2022, regarding available domestic manufacturers for the subject parts, MARAD concludes that issuing a waiver is consistent with Executive Order 14005.

Finding and Request for Comments

Based on all the information available to the Agency, MARAD concludes that there are no Buy America-compliant

[1] PhilaPort's Unique Entity Identifier (UEI) is J4QYLRK4VSR5.

[2] The INFRA program is described under the assistance listing program title ''Nationally Significant Freight and Highway Projects'' (assistance listing number 20.934).

[3] The Federal Award Identification Number (FAIN) for the INFRA project is 693JF71910026.

[4] Depending on which vendor is selected by PhilaPort, the country of origin for these components will most likely be either Germany or Italy.

relevant components for the MV Cable Reel System needed for the Project, including: (i) Drive Gearbox and Motors; (ii) Electrical and Communications Collector System; (iii) MV cable drum; (iv) MV cable guides and diverter mounted to STS structure/legs; and (v) Gantry level bi-directional multi-roller, curved cable guide. This finding only includes components identified in the waiver request and supporting documents included on FHWA's website.

The PhilaPort and its contractors and subcontractors involved in the procurement of the relevant components are reminded of the need to comply with the Cargo Preference Act in 46 CFR part 381, if applicable.

To avoid the possibility of requiring waivers for these items in the future, MARAD will work with industry to better understand the demand for these components and the potential for domestic production of these items in the future. We will then follow-up with the Office of Management and Budget's Made in America Office and the U.S. Department of Commerce, as appropriate, to assess the potential for domestic production to meet the forecasted demand for these items.

In accordance with the provisions of Section 117 of the SAFETEA–LU Technical Corrections Act of 2008 (Pub. L. 110–244, 122 Stat. 1572), MARAD is providing this notice as its finding that a waiver of Buy America requirements is appropriate. MARAD invites public comment on this finding for an additional 5 days following the effective date of the finding. Comments may be submitted to FHWA's website via the link provided to the waiver page noted above.

(Authority: 23 U.S.C. 117; 23 U.S.C. 313; Pub. L. 110–244; 23 CFR 635.410)

By order of the Maritime Administrator.

T. Mitchell Hudson, Jr.,

Secretary, Maritime Administration.

BILLING CODE 4910–81–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2022–0043]

Agency Information Collection Activities; Notice and Request for Comment; Consolidated Labeling Requirements for Motor Vehicles (Except the VIN)

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Notice and request for comments on a request for extension of a currently-approved information collection.

SUMMARY: The National Highway Traffic Safety Administration (NHTSA) invites public comments about our intention to request the Office of Management and Budget (OMB) approval to renew an information collection. Before a Federal agency can collect certain information from the public, it must receive approval from OMB. Under procedures established by the Paperwork Reduction Act of 1995, before seeking OMB approval, Federal agencies must solicit public comment on proposed collections of information, including extensions and reinstatement of previously approved collections. *This document describes a collection of labeling information on seven Federal Motor Vehicle Safety Standards (FMVSS) for which NHTSA intends to seek OMB approval. The labeling requirements include brake fluid warning, glazing labeling, air bag warning labels, seat belt labeling, compressed natural gas (CNG) vehicle fuel label, and CNG fuel container labels.*

DATES: Comments must be submitted on or before September 26, 2022.

ADDRESSES: You may submit comments, identified by the NHTSA docket number identified above, through any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Fax:* 1–202–493–2251.
- *Mail or Hand Delivery:* Docket Management, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except on Federal holidays.

Instructions: All submissions must include the agency name and docket number for this proposed collection of information. Note that all comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. Please see the Privacy Act heading below.

Privacy Act: Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78) or you may visit *https://www.transportation.gov/privacy.*

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov* or the street address listed above. Follow the online instructions for accessing the dockets via internet.

FOR FURTHER INFORMATION CONTACT: For additional information or access to background documents, contact James Myers, NHTSA, 1200 New Jersey Avenue SE, West Building, Room W43–320, NRM–100, Washington, DC 20590. Mr. Myers' telephone number is 202–366–1810. Please identify the relevant collection of information by referring to its OMB Control Number.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995, before an agency submits a proposed collection of information to OMB for approval, it must first publish a document in the **Federal Register** providing a 60-day comment period and otherwise consult with members of the public and affected agencies concerning each proposed collection of information. The OMB has promulgated regulations describing what must be included in such a document. Under OMB's regulation (at 5 CFR 1320.8(d)), an agency must ask for public comment on the following:

(i) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) how to enhance the quality, utility, and clarity of the information to be collected;

(iv) how to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological

collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses. In compliance with these requirements, NHTSA asks for public comments on the following proposed collection of information for which the agency is seeking approval from OMB.

Title: Consolidated Labeling Requirements for Motor Vehicles (except the VIN).

OMB Control Number: 2127–0512.

Type of Request: Extension of a currently approved collection.

Type of Review Requested: Regular.

Summary of the Collection of Information: 49 U.S.C. 30111 authorizes the issuance of Federal motor vehicle safety standards (FMVSS). The agency, in prescribing a FMVSS, considers available relevant motor vehicle safety data, and consults with other agencies, as it deems appropriate. Further, the statute mandates that in issuing any FMVSS, the agency considers whether the standard is ''reasonable, practicable and appropriate for the particular type of motor vehicle or item of motor vehicle equipment for which it is prescribed,'' and whether such a standard will contribute to carrying out the purpose of the Act.

The Secretary is authorized to invoke such rules, as deemed necessary to carry out these requirements. Using this authority, the agency issued the following FMVSS, specifying labeling requirements to aid the agency in achieving many of its safety goals:

FMVSS No. 105, ''Hydraulic and electric brake systems,''

FMVSS No. 135, ''Light vehicle brake systems,''

FMVSS No. 205, ''Glazing materials,''

FMVSS No. 208, ''Occupant crash protection,''

FMVSS No. 209, ''Seat belt assemblies,''

FMVSS No. 303, ''Fuel system integrity of compressed natural gas vehicles,'' and

FMVSS No. 304, ''Compressed natural gas fuel container integrity.''

This notice requests comments on the labeling requirements of these FMVSS.

FMVSS No. 105 and FMVSS No. 135 require that each vehicle shall have a brake fluid warning statement in letters at least one-eighth of an inch high on the master cylinder reservoirs. The lettering shall be permanently affixed, engraved, or embossed and located so as to be visible by direct view. If not engraved or embossed, it should be a color that contrasts with its background.

Vehicle manufacturers provide warning statements on hydraulic brake reservoirs for an estimated 1,003 vehicle models.[1] Although the required statements have been in use for many years, there is an annual 1 hour burden for manufacturers to have a Mechanical Drafter[2] reverify that their statements still meet the regulatory requirements. The annual burden for this reverification is 1,003 hours (1,003 vehicle model lines * 1 hour per model line) and $40,476 (1,003 vehicle models * 1 hour per label * $28.37 labor rate per hour ÷ 70.3% of labor rate as total wage compensation). Manufacturers will also bear a cost burden of $296,372 (17,961,961 brake reservoir caps/plugs * 1.1 spare parts factor * $0.015 per part) for the required labeling text to be applied to the hydraulic reservoir plugs and caps. The combined total annual burden for vehicle manufacturers to have the specified text on the hydraulic reservoir plugs and caps is 1,003 hours and $296,372. This is an increase in the cost burden of 265,328 due to adjustments in annual vehicles produced and addition of the per part expenses.

FMVSS No. 205, provides labeling requirements for glazing and motor vehicle manufacturers. In accordance with the standard, each new motor vehicle glazing manufacturer must request a unique identifying number. This number is used in their self-certification label, which also identifies the glazing type, and is permanently attached to each piece of motor vehicle glazing. Certain specialty glazing items, such as standee windows in buses, roof openings, and interior partitions made of plastic require that the manufacturer affix an additional, removable label to each item. This removable label specifies cleaning instructions to minimize the loss of transparency. Other information may be provided by the manufacturer.

Glazing manufacturers are required to have a DOT manufacturer's code mark for each of their glazing production facilities. This code mark is part of the manufacturer's certification label applied to glazing covered by FMVSS No. 205. An average of 22 glazing manufacturers annually complete an online request for a new DOT manufacturer's code mark. New code mark applications take an hour for a Project Management or Business Operations Specialist,[3] to complete. This places an annual burden on applicants of 22 hours (22 manufacturers * 1 hour per manufacturer) and $1,268 (22 hours * $40.53 per hour wage ÷ 70.3% of labor rate as total wage compensation) to obtain new DOT manufacturer's code marks. In addition, it is estimated a Mechanical Drafter[4] will require 40.0 hours to develop a certification label template for a new code mark, for an annual burden of 880 hours (22 manufacturers * 40.0 hours per manufacturer) and $35,513 (22 manufacturers * 40 hours per manufacturer * $28.37 per hour wage ÷ 70.3% of labor rate as total wage compensation). All glazing manufacturers will annually require 2.0 hours for a Mechanical Drafter to insert and verify correct information for each certification label for the estimated 9,452[5] glazing model lines produced annually, for a burden of 18,904 hours (2.0 hours per glazing certification label * 9,452 glazing model needing certification label) and $762,883 (9,452 glazing model labels * 2.0 hours per glazing model label * $28.37 per hour wage ÷ 70.3% of labor rate as total wage compensation). Two different labeling methods are used by the industry, ceramic paint (90% of market) and sand blasting (10% of market). Annually, vehicle manufacturers bear a cost burden of $2,825,732 ([142,713,747 vehicle glazing panels[6] * 1.1 spare parts

[1] 1,003 vehicle model lines equals 645 heavy vehicle models with a GVWR of 3,500 kilograms (7,716 pounds) or less and 358 light vehicle models with a GVWR greater than 3,500 kilograms (7,716 pounds).

[2] The Bureau of Labor Statistics (BLS) estimates the mean hourly wage for a Mechanical Drafter, occupational code 17–3013, to be $28.37. Further, the BLS estimates the hourly wage to represent only 70.3% of the total compensation for workers.

[3] The Bureau of Labor Statistics (BLS) estimates the mean hourly wage for a Project Management or Business Operations Specialists, occupational code 13–1198, to be $40.53. Further, the BLS estimates the hourly wage to represent only 70.7% of the total compensation for workers.

[4] The Bureau of Labor Statistics (BLS) estimates the mean hourly wage for a Mechanical Drafter, occupational code 17–3013, to be $28.37. Further, the BLS estimates the hourly wage to represent only 70.3% of the total compensation for workers.

[5] It is estimated that there are 174 passenger vehicle models (per 2020 Wards Intelligence data) requiring 8 glazing model numbers, 184 light truck models requiring 15 glazing model numbers, 51 medium/heavy truck models requiring 9 glazing model numbers, 156 light and medium bus models requiring 8 glazing models, 284 motorcycle models requiring 1 glazing model, 108 slide-in camper models requiring 2 glazing model numbers, 438 camper models requiring 7 glazing model numbers, and 9 pick-up bed covers requiring 3 glazing models. The total estimated number of glazing model numbers is 9,452 [(174 * 8) + (184 * 15) + (51 * 9) + (156 * 8) + (284 * 1) + (108 * 2) + (438 * 7) + (9 * 3)].

[6] It is estimated that there are 4,715,005 passenger cars each with 8 glazing units, 12,237,907 light truck vehicles each with 15 glazing units, 527,092 medium/heavy truck vehicles each with 9 glazing units, 17,200 medium and heavy bus vehicles each with 8 glazing units, 472,000 motorcycles each with 1 glazing unit, 11,000 slide-in campers each with 2 glazing units, 464,757 campers each with 7 glazing units, and 8,000 pick-up bed covers each with 4 glazing units. The total estimated number of

factor * $0.015 per part * 90%] + [142,713,747 vehicle glazing panels * 1.1 spare parts factor * $0.045 per part * 10%]) to apply the required certification label to glazing panels.

Certain types of glazing material, generally used in standee partitions of transit buses, require a cleaning label. Although the required statements have been in use for many years, there is an annual 1 hour burden for manufacturers to have a Mechanical Drafter reverify their statements still meet the regulatory requirements. This adds a burden of 36 hours and $1,453 (36 glazing cleaning labels [7] [8] * 1.0 hours per cleaning label * $28.37 per hour wage ÷ 70.3% of labor rate as total wage compensation). Application of cleaning labels to the those glazing panels adds a cost burden of $12,770 (1 label per applicable glazing panel * 2 applicable panels per bus * 5,300 transit buses [9] * $0.73 per label cost). The total annual burden due to labeling requirements of FMVSS No. 205 is 19,842 hours and $3,639,619.

FMVSS No. 208, specifies requirements for both active and passive occupant crash protection systems for passenger cars, multipurpose passenger vehicles, trucks, and small buses. A label is to be affixed to either side of the sun visor at each front outboard seating position that is equipped with an inflatable restraint. The label warns of dangers a deploying air bag poses to children 12 and under. Each vehicle that is equipped with an inflatable restraint for the passenger position shall have a label attached to a location on the dashboard or steering wheel hub that is clearly visible from all front seating positions. These labels advise occupants to always use seat belts, the back seat is the safest place for children, and to never place a rear-facing child seat in the front. Additionally, if a vehicle manufacturer recommends periodic maintenance or replacement of an inflatable restraint system installed in a vehicle, that vehicle must be labeled with the recommended schedule for maintenance or replacement.

It is estimated that vehicle manufacturers provide air bag warning labels for 565 vehicle models. Text and graphics for the warning labels are supplied in the Regulatory text, and these labels have been in use for many years. A Mechanical Drafter [10] performs the 1 hour of annual work per vehicle model necessary to confirm the label design prior to it being printed onto sun visors. The annual burden to manufacturers for the warning label reviews is 565 hours (565 vehicle model lines * 1 hour per model line) and $11,268 (565 vehicle models [11] * 1 hour per label * $28.35 labor rate per hour ÷ 70.3% of labor rate as total wage compensation). Annually, vehicle manufacturers bear a cost burden of $8,772,284 (34,977,208 sun visors [12] * 1.1 spare parts factor * $0.228 per part cost for label application) to apply the required warning labels to sun visors.

Vehicle manufacturers provide an estimated 565 vehicle models with dashboard warning labels. Text and graphics for the dashboard labels are supplied in the Regulatory text, and these labels have been in use for many years. A Mechanical Drafter performs the 1 hour of annual work per vehicle model necessary to confirm the dashboard label design. The annual burden to manufacturers for the dashboard label reviews is 565 hours (565 vehicle model lines * 1 hour per model line) and $11,268 (565 vehicle models [13] * 1 hour per label * $28.35 labor rate per hour ÷ 70.3% of labor rate as total wage compensation). Annually, vehicle manufacturers bear a cost burden of $9,897,386 (17,497,204 vehicle dashboards [14] * 1.1 spare parts factor * $0.472 per dashboard warning label) to have the required warning labels on dashboards.

No vehicle manufacturers are currently using air bags that require replacement or periodic maintenance. Since no manufacturers equip vehicles with air bags requiring maintenance or replacement, there is no annual administrative burden to include such information on any vehicle label.

The combined total annual burden to vehicle manufacturers from the dashboard and sun visor warning labels is 1,130 hours and $17,879,368. These hour and cost burdens represent a new addition to this information collection request.

FMVSS No. 209 requires safety belts to be labeled with the year of manufacture, the model, and the name or trademark of the manufacturer.[15] Additionally, seat belt assemblies for use only in specifically stated motor vehicles, other than a seat belt assembly installed in a motor vehicle by an automobile manufacturer, shall either be permanently and legibly marked or labeled with the following statement, or the statement shall be in the instruction sheet required for seat belt assemblies not installed in a motor vehicle by an automotive manufacturer:

This seat belt assembly is for use only in [insert specific seating position(s), *e.g.,* ''front right''] in [insert specific vehicle make(s) and model(s)].[16]

It is estimated manufacturers choose to include this statement in installation instruction sheets required for spare parts as a more cost-efficient method compared to labeling all seat belt assemblies for a particular vehicle model.

It is estimated that vehicle manufacturers provide labels on 4,139 [17] different seat belt assembly models. Manufacturers have provided seat belt assemblies with the required labels for many years. It is estimated each manufacturer has a generalized label template which only requires population with the correct model number and manufacturing date. There is an annual 2.0 hour burden for manufacturers to have a Mechanical Drafter put the correct information into a label template to create a model specific label. The annual burden for this label creation is 8,278 hours (4,139 seat belt models * 2 hour per model label) and $334,064 (4,139 seat belt

glazing model numbers is 142,713,747 [(4,715,005 * 8) + (12,237,907 * 8) + (527,092 * 6) + (17,200 * 8) + (472,000 * 1) + (11,000 * 3) + (464,757 * 7) + (8,000 * 4)].

[7] There are 36 manufacturers producing transit buses. Source: David Czerwinski et al., *The US Transit Bus Manufacturing Industry* (Mineta Transportation Institute, 2016), 10.

[8] Each manufacturer can use a common cleaning label for all of their vehicle models.

[9] David Czerwinski et al., *The US Transit Bus Manufacturing Industry* (Mineta Transportation Institute, 2016), 10.

[10] The Bureau of Labor Statistics (BLS) estimates the mean hourly wage for a Mechanical Drafter, occupational code 17–3013, to be $29.09. Further, the BLS estimates the hourly wage to represent only 70% of the total compensation for workers.

[11] NHTSA estimates there are 565 vehicle models requiring sun visor labels annually (174 passenger car, 185 light truck, 51 medium/heavy truck, and 156 large/medium bus models). Vehicle model data from 2020 Wards Intelligence data.

[12] NHTSA estimates there are a total of 38,474,929 sun visors with warning labels produced annually. This total includes 2 warning labels in the 4,715,005 passenger cars: 12,237,907 light truck vehicles, and 527,092 medium and heavy trucks. There is a sun visor with an air bag warning label in each of the 17,200 medium and heavy buses [2* (4,715,005 + 12,237,907 + 527,092) + 1 * (17,200)].

[13] NHTSA estimates there are 565 vehicle models requiring sun visor labels annually (174 passenger car, 185 light truck, 51 medium/heavy truck, and 156 large/medium bus models). Vehicle model data from 2020 Wards Intelligence data.

[14] Only one dashboard warning per vehicle is required. The number of dashboard labels is half the number of sun visor labels. NHTSA estimates there are 14,497,204 dashboard warning labels produced annually.

[15] FMVSS No. 209, S4.1(j).

[16] FMVSS No. 209, S4.1(k).

[17] For the estimated 174 passenger car, 184 light truck, 51 medium/heavy truck, 156 medium/heavy bus, and 438 camper models there are an estimated average of 5, 7, 5, 3, and 2 unique seat belt assemblies, respectively, per vehicle type. Additionally, it is estimated there are approximately 376 non-OEM aftermarket seat belt assembly models sold annually. Each seat belt assembly has 1 label per seat belt assembly model. This equates to a total of 4,376 unique seat belt assembly model labels.

models * 2 hour per model label * $28.37 labor rate per hour ÷ 70.3% of labor rate as total wage compensation). Manufacturers will also bear a cost burden of $4,287,219 (112,970,199 [18] seat belt assemblies * 1.1 spare parts factor * $0.035 per label) for the required labels to be attached to the seat belt assemblies.

The combined total annual burden to vehicle manufacturers from the requirements to have the specified label text on seat belt assemblies is 8,278 hours and $4,621,283. This is an increase in the cost burden of $4,558,103 due to the adjustments in the number of vehicles produced annually and accounting for the per part expense.

FMVSS NO. 303 specifies requirements for the integrity of motor vehicle fuel systems using compressed natural gas (CNG), including the CNG fuel systems of bi-fuel, dedicated, and dual fuel CNG vehicles. Each CNG must have a permanent label which lists the CNG service pressure and a statement directing vehicle users/operators to instructions for inspection and service life of the fuel container.

It is estimated that vehicle manufacturers provide labels on 18 different CNG vehicle models. Manufacturers have provided CNG vehicles with the required labels for many years, it is estimated each manufacturer has a generalized label template which only requires population with the correct model number and manufacturing date. There is an annual 1.0 hour burden for manufacturers to have a Mechanical Drafter put the correct information into a label template to create a model specific label. The annual burden for this label creation is 18 hours (18 CNG vehicle model labels * 1 hour per model label) and $726 (18 CNG vehicle model labels * 1 hour per model label * $28.37 labor rate per hour ÷ 703% of labor rate as total wage compensation). Manufacturers will also bear a cost burden of $3.651 (5,000 CNG vehicles * $0.73 per label) for the required labels to be attached to the CNG vehicles. The combined total annual burden to vehicle manufacturers from the requirements to have the specified label text on CNG vehicles is 18 hours and $4,377. These hour and cost burdens represent a new addition to this information collection request.

FMVSS No. 304 specifies requirements for the integrity of compressed natural gas (CNG), motor vehicle fuel containers. Each CNG fuel container must have a permanent label containing information relating to the proper use, installation, and maintenance of the CNG container.

It is estimated that manufacturers provide labels on 100 different CNG container models. Manufacturers have provided CNG containers with the required labels for many years. It is estimated each manufacturer has a generalized label template which only requires population with the correct model number and manufacturing date. There is an annual 1.0 hour burden for manufacturers to have a Mechanical Drafter put the correct information into a label template to create a model specific label. The annual burden for this label creation is 100 hours (100 CNG container model labels * 1.0 hours per model label) and $4,036 (100 CNG container models labels * 1.0 hours per model label * $28.37 labor rate per hour ÷ 70.3% of labor rate as total wage compensation). Manufacturers will also bear a cost burden of $14,603 (20,000 CNG containers * $0.730 per label) for the required labels to be attached to the CNG vehicles. The combined total annual burden to vehicle manufacturers from the requirements to have the specified label text on CNG containers is 100 hours and $18,639. These hour and cost burdens represent a new addition to this information collection request.

Description of the Need for the Information and Proposed Use of the Information: All labeling included in this collection is placed on motor vehicle equipment at the time it is manufactured. All safety labeling requirements are necessary for vehicle use on the nation's highways. The lack of labeling could allow improper items of motor vehicle equipment to be installed on motor vehicles and could be the subject of failures or inadequate injury mitigations—increasing the risk for vehicle crashes, severe injuries, and even deaths. Lack of airbag warning labels could encourage placement of children in the front passenger seating position, where the child would be less safe in an accident than if placed in a back-row seating position. The lack of CNG container labeling could result in improper use of CNG containers resulting in a fire or explosion.

As for the identification of glazing manufacturers, the collection of information is only required one time. Absence of this DOT code mark would mean the glazing material would be available to the public without manufacturer's proof that the material passed minimum safety standards. Additionally, if the information were not collected, the ability to determine the identification of the glazing manufacturer in crashes involving defects would be placed in jeopardy.

Affected Public: Vehicle manufacturers.

Estimated Number of Respondents: 22.

Frequency: On occasion.

Number of Responses: NHTSA anticipates that approximately 22 new prime glazing manufacturers per year will contact the agency and request a manufacturer identification number. These new glazing manufacturers must submit one application, one time, identifying their company. In turn, the agency responds by assigning them a unique manufacturer number. For other collections in this notice, no response is necessary from manufacturers. These labels are only required to be placed on each master cylinder reservoir, glazing pane, sun visor, and each safety belt intended for retail sale in the United Sates. Therefore, the number of respondents is limited to the glazing manufacturers requesting a manufacturer identification number.

Estimated Total Annual Burden Hours: 30,371.

Estimated Total Annual Burden Cost: $26,334,780.

Public Comments Invited: You are asked to comment on any aspects of this information collection, including (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (b) the accuracy of the Department's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended; 49 CFR 1.49; and DOT Order 1351.29.

Raymond R. Posten,

Associate Administrator for Rulemaking.

[FR Doc. 2022–16021 Filed 7–25–22; 8:45 am]

BILLING CODE 4910–59–P

[18] It is estimated that there are 4,715,005 passenger cars each with 5 unique seat belt assemblies; 12,237,907 light truck vehicles each with 7 unique seat belt assemblies; 527,092 medium/heavy truck vehicles each with 6 glazing units, 17,200 medium and heavy bus vehicles each with 3 unique seat belt assemblies; and 464,757 campers each with 2 unique seat belt assemblies. Additionally, it is estimated that 50,000 non-OEM aftermarket seat belt assemblies are produced each yeat. The total estimated number of seat belt assemblies is 112,920,199 [(4,715,005 * 5) + (12,237,907 * 7) + (527,092 * 5) + (17,200 * 3) + (464,757 * 2) + (50,000)].

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket Number NHTSA–2022–0046]

Agency Information Collection Activities; Notice and Request for Comment; Replaceable Light Source Dimensional Information Collection

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Notice and request for public comments on a request for reinstatement of a previously approved information collection.

SUMMARY: The National Highway Traffic Safety Administration (NHTSA) invites public comments about our intention to request approval from the Office of Management and Budget (OMB) for a reinstatement of a previously approved information collection. Before a Federal agency can collect certain information from the public, it must receive approval from OMB. Under procedures established by the Paperwork Reduction Act of 1995, before seeking OMB approval, Federal agencies must solicit public comment on proposed collections of information, including extensions and reinstatements of previously approved collections. This document describes a collection of information for which NHTSA intends to seek OMB approval on replaceable light source dimensional information.

DATES: Comments must be received on or before September 26, 2022.

ADDRESSES: You may submit comments identified by docket number NHTSA–20##–#### through any of the following methods:

- *Electronic Submissions:* Go to the Federal eRulemaking Portal at *http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Fax:* 1–202–493–2251.
- *Mail:* Docket Management, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Room W12–140, Washington, DC 20590.
- *Hand Delivery:* 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays. To be sure someone is there to help you, please call (202) 366–9322 before coming.

Instructions: All submissions must include the agency name and docket number. Note that all comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. Please see the Privacy Act discussion below.

Privacy Act: Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78) or you may visit *https://www.transportation.gov/privacy.*

Docket: For access to the docket to read comments received, go to *http://www.regulations.gov* at any time or to the street address listed above. Follow the online instructions for accessing the dockets via internet.

FOR FURTHER INFORMATION CONTACT: For additional information or access to background documents, contact Evan Frings, U.S. Department of Transportation, National Highway Traffic Safety Administration, West Building W43–462, 1200 New Jersey Avenue SE, Washington, DC 20590. (202) 366–7021. Please identify the relevant collection of information by referring to its OMB Control Number.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), before an agency submits a proposed collection of information to OMB for approval, it must publish a document in the Federal Register providing a 60-day comment period and otherwise consult with members of the public and affected agencies concerning each proposed collection of information. The OMB has promulgated regulations describing what must be included in such a document. Under OMB's regulations (at 5 CFR 1320.8(d)), an agency must ask for public comment on the following: (i) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (ii) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) how to enhance the quality, utility, and clarity of the information to be collected; and (iv) how to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses. In compliance with these requirements, NHTSA asks for public comment on the following proposed collection of information for which the agency is seeking approval from OMB.

Title: 49 CFR Part 564, Replaceable Light Source Dimensional Information Collection.

OMB Control Number: 2127–0563.

Type of Request: Reinstatement of a previously approved collection.

Type of Review Requested: Regular.

Requested Expiration Date of Approval: 3 years from date of approval.

Summary of the Collection of Information: Pursuant to 49 CFR part 564, ''Replaceable Light Source and Sealed Beam Headlamp Information,'' manufacturers of newly designed or modified replaceable headlamp light sources are required to submit interchangeability and performance specifications to NHTSA not later than 60 days before beginning manufacture of a replaceable light source product. The specific dimensional, electrical specification, and marking/designation information that must be submitted is specified in Appendices A and B of part 564. After a short agency review to assure completeness, the information is placed in a public docket for use by any person who would like to manufacture headlamp light sources for motor vehicles. In Federal motor vehicle safety standard (FMVSS) No. 108, ''Lamps, reflective devices and associated equipment,'' information submitted in accordance with Part 564 is referenced as the source for the performance and interchangeability information for legal headlamp light sources, whether original equipment or replacement equipment. The submitted information about headlamp light sources becomes the basis for certification of compliance with safety standards.

Description of the Need for the Information and Proposed Use of the Information: The purpose of this information collection is to ensure the availability to replacement light source manufacturers of the manufacturing specifications of original equipment lights sources so that replacement light sources are interchangeable with original equipment light sources and provide equivalent performance, and to ensure that redesigned or newly developed light sources are designated as distinct, different, and noninterchangeable with previously existing lights sources.

The information collected is to be placed in a public docket for use by vehicle, headlamp and headlamp light source manufacturers for determining the interchangeability aspects of headlamp light sources for manufacturing purposes. For

replacement light sources to be designated as acceptable replacements, the replacement light sources are required to comply with the dimensional and performance information in the docket for its type. A manufacturer may also request modification of a light source for which information has previously been placed in the public docket. The information helps to standardize headlamp bulbs for performance interchangeability.

Affected Public: This information collection affects manufacturers of a motor vehicles, original equipment headlamps, or original equipment headlamp replaceable light sources, which intend to manufacture a replaceable light source as original equipment or to incorporate a replaceable light source in its headlamps or motor vehicles.

Number of respondents: 1 annually.

Frequency: On Occasion.

Estimated Total Annual Burden Hours: 4 hours.

NHTSA estimates that compiling and submitting the required information will take, on average, 4 hours per submission. NHTSA estimates, based on past submissions, that the agency will receive approximately 1 submission per year. Therefore, NHTSA estimates the total burden associated with this information collection to be 4 hours per year.

NHTSA estimates the labor cost associated with this collection of information by (1) applying the appropriate average hourly labor rate published by the Bureau of Labor Statistics (BLS), (2) dividing by 0.702 [1] (70.2%), for private industry workers to obtain the total cost of compensation, and (3) multiplying by the estimated burden hours for each respondent type. NHTSA estimates the hourly cost associated with compiling and submitting documentation under part 564 to be $60.26 [2] per hour using the mean hourly wage estimate published by BLS for compliance officers in the motor vehicle manufacturing industry (Standard Occupational Classification # 13–1041). Therefore, NHTSA estimates that the total labor cost associated with 564 submissions is $241.04 per submission for a total of $241.04 per year for all submissions. Table 1 below provides a summary of the estimated burden hours and labor costs associated with those submissions.

TABLE 1—BURDEN ESTIMATES

Annual number of respondents	Annual submissions	Estimated burden per submission (hours)	Average hourly labor cost	Labor cost per submission	Total burden hours	Total labor costs
1	1	4	$60.26	$241.04	4	$241.04

Estimated Total Annual Burden Cost: $0.

NHTSA estimates that there are no costs to respondents other than labor costs associated with the burden hours.

Public Comments Invited: You are asked to comment on any aspects of this information collection, including (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (b) the accuracy of the Department's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Authority: The Paperwork Reduction Act of 1995, 44 U.S.C. chapter 35; as amended, 49 CFR 1.95 and DOT Order 1351.29.

Ryan R. Posten,

Associate Administrator, Rulemaking.

[1] *See* Table 1. Employer Costs for Employee Compensation by ownership (Mar. 2020), available at *https://www.bls.gov/news.release/archives/ecec_06182020.pdf* (accessed March 11, 2022).

[2] The hourly wage is estimated to be $42.30 per hour. National Industry-Specific Occupational Employment and Wage Estimates NAICS 336100—Motor Vehicle Manufacturing, May 2020, *https://www.bls.gov/oes/2020/may/naics4_336100.htm,* (accessed August 20, 2021). The Bureau of Labor Statistics estimates that wages represent 70.4 percent of total compensation to private workers, on average. Therefore, NHTSA estimates the total hourly compensation cost to be $60.09.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2022–0042]

Agency Information Collection Activities; Notice and Request for Comment; Consolidated Child Restraint System Registration for Defect Notifications and Labeling

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Notice and request for comments on a request for extension of a currently approved information collection.

SUMMARY: The National Highway Traffic Safety Administration (NHTSA) invites public comments about our intention to request approval from the Office of Management and Budget (OMB) for an extension of a currently approved information collection. Before a Federal agency can collect certain information from the public, it must receive approval from OMB. Under procedures established by the Paperwork Reduction Act of 1995, before seeking OMB approval, Federal agencies must solicit public comment on proposed collections of information, including extensions and reinstatement of previously approved collections. This document describes a collection of information for which NHTSA intends to seek OMB approval and solicits public comments on continuation of the requirements for the collection of information entitled ''Consolidated Child Restraint System Registration for Defect Notifications and Labeling'' (OMB Control Number: 2127–0576) and the accuracy of the agency's revised estimates of the burden of the information collections.

DATES: Comments must be submitted on or before September 26, 2022.

ADDRESSES: You may submit comments identified by the Docket No. NHTSA-–2022–0042 through any of the following methods:

- *Electronic Submissions:* Go to the Federal eRulemaking Portal at *http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Fax:* (202) 493–2251.
- *Mail or Hand Delivery:* Docket Management, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Room W12–140, Washington, DC 20590, between 9

a.m. and 5 p.m., Monday through Friday, except on Federal holidays.

Instructions: All submissions must include the agency name and docket number for this notice. Note that all comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. Please see the Privacy Act heading below.

Privacy Act: Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78) or you may visit *https://www.transportation.gov/privacy.*

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov* or the street address listed above. Follow the online instructions for accessing the dockets via internet.

FOR FURTHER INFORMATION CONTACT: For additional information or access to background documents, contact Cristina Echemendia, U.S. Department of Transportation, NHTSA, 1200 New Jersey Avenue SE, West Building, Room W43–447, NRM–130, Washington, DC 20590. Cristina Echemendia's telephone number is 202–366–6345. Please identify the relevant collection of information by referring to its OMB Control Number (2127–0576).

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), before an agency submits a proposed collection of information to OMB for approval, it must first publish a document in the **Federal Register** providing a 60-day comment period and otherwise consult with members of the public and affected agencies concerning each proposed collection of information. The OMB has promulgated regulations describing what must be included in such a document. Under OMB's regulation (at 5 CFR 1320.8(d)), an agency must ask for public comment on the following: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) how to enhance the quality, utility, and clarity of the information to be collected; and (d) how to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.* permitting electronic submission of responses. In compliance with these requirements, NHTSA asks for public comments on the following proposed collection of information for which the agency is seeking approval from OMB.

Title: ''Consolidated Child Restraint System Registration for Defect Notifications and Labeling.''

OMB Control Number: 2127–0576.

Form Number(s): NHTSA 1053A, NHTSA 1053B.

Type of Request: Extension of a currently approved collection.

Type of Review Requested: Regular.

Requested Expiration Date of Approval: 3 years from date of approval.

Summary of the Collection of Information: This information collection provides that manufacturers of child restraint systems (CRSs): (1) produce registration cards, labels and printed instructions (brochures), (2) collect CRS owner registration information, and (3) create and keep registration records so that, in the event of a safety recall, manufacturers can provide direct notification to owners. Child restraint manufacturers are required to provide an owner's registration card for purchasers of child safety seats in accordance with title 49 of the Code of Federal Regulations (CFR), part 571—section 213, ''Child restraint systems.'' The registration card is perforated into two-parts (see Figures 1 and 2). The top part contains a message and suitable instructions to be retained by the purchaser. The bottom part is to be returned to the manufacturer by the purchaser. The bottom part includes prepaid return postage, the pre-printed name/address of the manufacturer, the pre-printed model and date of manufacture, and spaces for purchasers to fill in their name and address. Optionally, child restraint manufacturers are permitted to add to the registration form: (a) Specified statements informing child restraint system (CRS) owners that they may register online; (b) the internet address for registering with the company; (c) revisions to statements reflecting use of the internet to register; and (d) a space for the consumer's email address. For those CRS owners with access to the internet, online registration may be a preferred method of registering a CRS.

In addition to the registration card supplied by the manufacturer, NHTSA has implemented a CRS registration system to assist those individuals who have either lost the registration card that came with the CRS or purchased a previously owned CRS. Upon the owner's request, NHTSA provides a substitute registration form that can be obtained either by mail or from the internet [1] (see Figure 3). When the completed registration is returned to the agency, it is then submitted to the CRS manufacturer. In the absence of a substitute registration system, many owners of child passenger safety seats, especially any second-hand owners, might not be notified of safety defects and non-compliances, and would not have the defects and non-compliances remedied.

Child seat owner registration information is retained in the event that owners need to be contacted for defect recalls or replacement campaigns. Chapter 301 of title 49 of the United States Code specifies that if either NHTSA or a manufacturer determines that motor vehicles or items of motor vehicle equipment contain a defect that relates to motor vehicle safety or fail to comply with an applicable Federal Motor Vehicle Safety Standard, the manufacturer must notify owners and purchasers of the defect or noncompliance and must provide a remedy without charge. In title 49 of the Code of Federal Regulations (CFR), part 577, defect and noncompliance notification for equipment items, including child restraint systems, must be sent by first class mail to the most recent purchaser known to the manufacturer.

Child restraint manufacturers are also required to provide printed instructions in a brochure containing step-by-step information on how the restraint is to be used. Without proper use, the effectiveness of these systems is greatly diminished. Each child restraint system must also have a permanent label. A permanently attached label gives ''quick look'' information on whether the restraint meets the safety requirements, recommended installation and use, and warnings against misuse. CRSs equipped with internal harnesses to restrain children, and with components to attach to a child restraint anchorage system, are also required to be labeled with a child weight limit for using the lower anchors to attach the child restraint to the vehicle. The child weight limit depends upon the weight of the CRS.

Description of the Need for the Information and Proposed Use of the Information: CRS manufacturers are

[1] *https://www.nhtsa.gov/equipment/car-seats-and-booster-seats#car-seat-registration.*

required to label each CRS and provide brochures with safety information and instructions on the proper use of the restraint. Such information would mitigate the risk of misuse and consequently reduce injuries to and fatalities of children in crashes. This collection supports the Department of Transportation's (DOT) strategic goal for safety, by working towards the elimination of transportation related deaths and injuries involving children.

FMVSS No. 213 requires that each CRS has an owner registration form attached. It permits information regarding online product registration to be included on the owner registration form required under the standard. This enhances the opportunity for restraint owners to register their CRSs online, which may increase registration rates and the effectiveness of recall campaigns. Manufacturers are also permitted to supplement (but not replace) recall notification via first-class mail with email notification, which increases the likelihood that owners learn of a recall. Manufacturers are also required to include a U.S. telephone number on a CRS label for the purpose of enabling consumers to register their products by telephone.

Increasing CRS registrations is an important part to protecting young children and infants. By registering CRSs, product manufacturers will to able to directly contact owners in the event of any safety recalls.

Affected Public: Businesses, Individual Consumers.

Estimated Number of Respondents: 38 Manufacturers, 2,835,200 Consumers.

Frequency: On occasion.

Estimated Total Annual Burden Hours: 109,939 hours.

The total burden hours for this collection consist of: (1) the hours spent by consumers filling out the registration form, (2) the hours spent collecting registration information and (3) the hours spent determining the maximum allowable child weight for lower anchor use and adding the information to the existing label and instruction manual.

(1) *Annual Burden for filling out registration card.* NHTSA estimates that 16,000,000 CRSs are currently sold each year by 38 CRS manufacturers. Of the CRSs sold each year, NHTSA estimates that 2,369,660 are registered using registration cards and 465,540 are registered online. A consumer spends approximately 60 seconds (1 minute) filling out the registration form. The estimated annual number of burden hours for consumers to fill out the registration form is 47,253 hours (= 2,835,200 × (60 seconds/3,600 seconds/hour)).

(2) *Annual Burden for Reporting (collecting registration information).* Manufacturers must spend about 90 seconds (1.5 min) to enter the information from each returned registration card; while, online registrations are considered to have no burden for the manufacturer, as the information is entered by the purchaser. Therefore, the estimated annual number of burden hours for CRS registration information collection is 59,242 hours (= 2,369,660 × (90 seconds/3,600 seconds/hour)).

(3) *Annual Burden for Reporting (determining maximum allowable child weight).* About 12,400,000 of the CRSs sold each year are equipped with internal harnesses. About half of the CRSs equipped with internal harnesses sold annually (6,200,000 = 12,400,000 × 0.5) would require a label with the maximum allowable child weight for using the lower anchors. Manufacturers must spend about 2 seconds to determine the maximum allowable child weight for lower anchor use and to add the information to the existing label and instruction manual. Therefore, the total annual burden hours for the information on the maximum allowable child weight in the existing label and instruction manual is 3,444 hours (= 6,200,000 × (2 seconds/3,600 seconds/hour)).

The estimated total annual number of burden hours is 109,939 (= 47,253 + 59,242 + 3,444) hours. The total estimated hour burden increased from 99,330 hours to 109,939 hours (a 10,609-burden hour increase). The increase in burden is due to an increase in CRS sales. In 2018, NHTSA estimated that approximately 14,500,000 CRSs are sold each year while NHTSA's estimate in 2022 increased to 16,000,000 CRSs.

Estimated Total Annual Burden Cost: $8,000,000.

The total burden cost for this collection consist of printing and material costs of labels and registration cards.

Printing and Material Costs of Labels and Registration Cards

The total annual cost to the respondents is estimated to be $8,000,000. NHTSA estimates that the printing and material cost of $0.20 per CRS labels and $0.30 per CRS registration card. The total annual cost to respondents is calculated by multiplying the printing and material cost ($0.50 = $0.20 + $0.30) by the estimated 16,000,000 responses (CRSs produced) per year ($0.50 × 16,000,000). The total estimated annual burden costs are detailed in the table below:

Number of CRS produced annually	Printing and material cost per CRS—labels	Printing and material cost per CRS—registration card	Annual printing and material cost
16,000,000	$0.20	$0.30	$8,000,000.00

The total estimated burden cost increased from $0 to $8,000,000 (a $8,000,000 burden cost increase). The increase in burden is due to the addition of printing and material costs for labels and registration cards which had not been taken into consideration in the past.

Public Comments Invited: You are asked to comment on any aspects of this information collection, including (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (b) the accuracy of the Department's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

BILLING CODE 4910–59–P

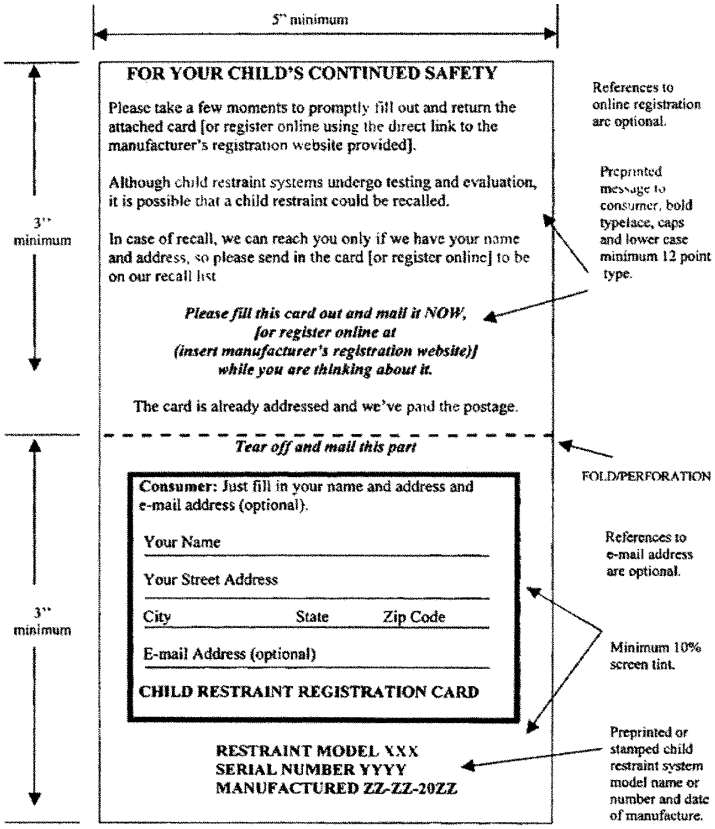

Figure 1 – Registration form for child restraint systems – product identification number and purchaser information side

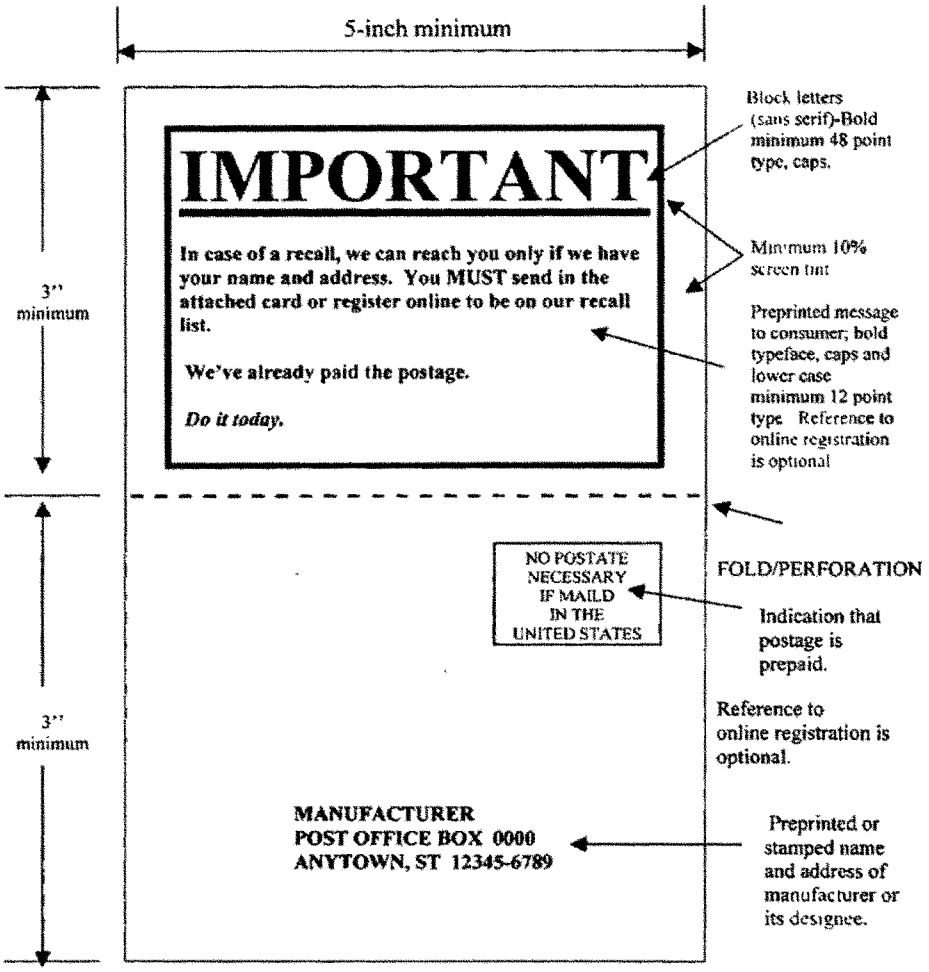

Figure 2 – Registration form for child restraint systems – address side

CHILD SAFETY SEAT REGISTRATION FORM
FOR YOUR CHILD'S CONTINUED SAFETY

Although child safety seats undergo testing and evaluation, it is possible that your child seat could be recalled. In case of a recall it is important that the manufacturer be able to contact you as soon as possible so that your seat can be corrected.

All child safety seats manufactured since March 1993 have a registration form so that owners can provide their names/addresses to the manufacturer. In case of a safety recall, the manufacturer can use that information to send recall letters to owners. Also, child safety seat manufacturers have agreed to maintain owner names/addresses for child safety seats manufactured before March 1993, so they can notify those consumers in the event of a future safety recall. However, in order for the manufacturer to know which child safety seat you own, all of the information on the lower half of this page must be provided.

If you would like the National Highway Traffic Safety Administration (NHTSA) to give your name and address to the manufacturer of your child safety seat, so that you can be notified of any future safety recalls regarding your child safety seat, fill out this form. Please type or print clearly, sign and mail this postage-paid, pre-addressed form.

If you have any questions, or need help with any child safety seat or motor vehicle safety issue, call the U.S. Department of Transportation's toll-free Vehicle Safety Hotline at 1-888-424-9393 (Washington DC AREA RESIDENTS, 202-366-0123).

Your Name:_____ Telephone_____

Your Street Address_____

City:_____, State:_____ Zip Code:_____

IMPORTANT: The following information is essential and can be found on labels on your child seat.

Child Seat
Manufacturer:_____

Child Seat Model
Name & Number:_____

BILLING CODE 4910–59–C

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Gains and Losses From Section 1256 Contracts and Straddles

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Internal Revenue Service, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on continuing information collections, as required by the Paperwork Reduction Act of 1995. The IRS is soliciting comments

concerning gains and losses from section 1256 contracts and straddles.

DATES: Written comments should be received on or before September 26, 2022 to be assured of consideration.

ADDRESSES: Direct all written comments to Andres Garcia, Internal Revenue Service, room 6526, 1111 Constitution Avenue NW, Washington, DC 20224, or by email to *pra.comments@irs.gov*. Include OMB control number 1545–0644 or Gains and Losses From Section 1256 Contracts and Straddles, in the subject line of the message.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form should be directed to Kerry Dennis at (202) 317–5751, or at Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington DC 20224, or through the internet, at *Kerry.L.Dennis@irs.gov*.

SUPPLEMENTARY INFORMATION:

Title: Gains and Losses From Section 1256 Contracts and Straddles.

OMB Number: 1545–0644.

Form Number: 6781.

Abstract: Form 6781 is used by taxpayers in computing their gains and losses on Internal Revenue Code section 1256 contracts under the marked-to-market rules and gains and losses under Code section 1092 from straddle positions. The data is used to verify that the tax reported accurately reflects any such gains and losses.

Current Actions: There is no change to the paperwork burden previously approved by OMB. This form is being submitted for renewal purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Business or other for-profit organizations, and individuals.

Estimated Number of Respondents: 5,684.

Estimated Time Per Respondent: 13.95 hours.

Estimated Total Annual Burden Hours: 79,292 hours.

The following paragraph applies to all the collections of information covered by this notice.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained if their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: July 20, 2022.

Kerry L. Dennis,

Tax Analyst.

BILLING CODE 4830–01–P

DEPARTMENT OF VETERANS AFFAIRS

National Research Advisory Council, Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act, 5 U.S.C. App. 2, that the National Research Advisory Council will hold a meeting on Wednesday, September 7, 2022, by Teams. The teleconference number is 1–872–701–0185, conference ID 723 601 208 # or the meeting link is *https://teams.microsoft./com/l/meetup-join/19%3ameeting_YTM4OWM5O/DItMThkYy00YzBiLThi/YzctZTdiMjll/OTVlNWEz%40thread./v2/0?/context=%7b%22Tid/%22%3/a%22e95f1b23-abaf-45ee-821d-b7ab251/ab3bf%22%2/c%22Oid%22%3/a%22121a3c2b-ae37-46ab-a12a-fa7b555533ae%22%7d*. The meeting will convene at 11:00 a.m. and end at 2:00 p.m. Eastern daylight time. This meeting is open to the public.

The purpose of the National Research Advisory Council is to advise the Secretary on research conducted by the Veterans Health Administration, including policies and programs targeting the high priority of Veterans' health care needs.

On September 7, 2022, the agenda will include follow up discussion of diversity, equity, and inclusion activities; overview of VA Artificial Intelligence Program; discussion of subcommittee activities and updates on the Research Enterprise Initiative. No time will be allocated at this meeting for receiving oral presentations from the public. Members of the public wanting to attend, have questions or presentations to present may contact Rashelle Robinson, Designated Federal Officer, Office of Research and Development (14RD), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420, at 202–443–5768, or *Rashelle.robinson@va.gov no later than close of business on September 2, 2022.* All questions and presentations will be presented during the public comment section of the meeting. Any member of the public seeking additional information should contact Rashelle Robinson at the above phone number or email address noted above.

Dated: July 21, 2022.

BILLING CODE P

FEDERAL REGISTER

Vol. 87 Tuesday,
No. 142 July 26, 2022

Part II

Department of Health and Human Services

Centers for Medicare & Medicaid Services
42 CFR Part 405, 410, 411, et al.
Medicare Program: Hospital Outpatient Prospective Payment and Ambulatory Surgical Center Payment Systems and Quality Reporting Programs; Organ Acquisition; Rural Emergency Hospitals: Payment Policies, Conditions of Participation, Provider Enrollment, Physician Self-Referral; New Service Category for Hospital Outpatient Department Prior Authorization Process; Overall Hospital Quality Star Rating; Proposed Rule

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

42 CFR Parts 405, 410, 411, 412, 413, 416, 419, and 424

[CMS–1772–P]

RIN 0938–AU82

Medicare Program: Hospital Outpatient Prospective Payment and Ambulatory Surgical Center Payment Systems and Quality Reporting Programs; Organ Acquisition; Rural Emergency Hospitals: Payment Policies, Conditions of Participation, Provider Enrollment, Physician Self-Referral; New Service Category for Hospital Outpatient Department Prior Authorization Process; Overall Hospital Quality Star Rating

AGENCY: Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services (HHS).

ACTION: Proposed rule.

SUMMARY: This proposed rule would revise the Medicare hospital outpatient prospective payment system (OPPS) and the Medicare ambulatory surgical center (ASC) payment system for Calendar Year (CY) 2023 based on our continuing experience with these systems. In this proposed rule, we describe the changes to the amounts and factors used to determine the payment rates for Medicare services paid under the OPPS and those paid under the ASC payment system. Also, this proposed rule would update and refine the requirements for the Hospital Outpatient Quality Reporting (OQR) Program, the ASC Quality Reporting (ASCQR) Program, and the Rural Emergency Hospital Quality Reporting (REH) Program. We are also proposing updates to the requirements for Organ Acquisition, Rural Emergency Hospitals, Prior Authorization, and Overall Hospital Quality Star Rating. We are establishing a new provider type for rural emergency hospitals (REHs), and we have proposals regarding payment policy, quality measures, and enrollment policy for REHs. Finally, we are soliciting comments on the use of CMS data to drive competition in healthcare marketplaces, and an alternative methodology for counting organs.

DATES: To be assured consideration, comments must be received at one of the addresses provided below, by September 13, 2022.

ADDRESSES: In commenting, please refer to file code CMS–1772–P.

Comments, including mass comment submissions, must be submitted in one of the following three ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to *http://www.regulations.gov*. Follow the ''Submit a comment'' instructions.

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1772–P, P.O. Box 8010, Baltimore, MD 21244–1810.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1772–P, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following website as soon as possible after they have been received: *http://www.regulations.gov*. Follow the search instructions on that website to view public comments. CMS will not post on *Regulations.gov* public comments that make threats to individuals or institutions or suggest that the individual will take actions to harm the individual. CMS continues to encourage individuals not to submit duplicative comments. We will post acceptable comments from multiple unique commenters even if the content is identical or nearly identical to other comments.

Addenda Available Only Through the Internet on the CMS Website

In the past, a majority of the Addenda referred to in our OPPS/ASC proposed and final rules were published in the **Federal Register** as part of the annual rulemakings. However, beginning with the CY 2012 OPPS/ASC proposed rule, all of the Addenda no longer appear in the **Federal Register** as part of the annual OPPS/ASC proposed and final rules to decrease administrative burden and reduce costs associated with publishing lengthy tables. Instead, these Addenda are published and available only on the CMS website. The Addenda relating to the OPPS are available at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices*.

The Addenda relating to the ASC payment system are available at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/ASCPayment/ASC-Regulations-and-Notices*.

I. Summary and Background

A. Executive Summary of This Document

1. Purpose

In this proposed rule, we propose to update the payment policies and payment rates for services furnished to Medicare beneficiaries in hospital outpatient departments (HOPDs) and ambulatory surgical centers (ASCs), beginning January 1, 2023. Section 1833(t) of the Social Security Act (the Act) requires us to annually review and update the payment rates for services payable under the Hospital Outpatient Prospective Payment System (OPPS). Specifically, section 1833(t)(9)(A) of the Act requires the Secretary of the Department of Health and Human Services (the Secretary) to review certain components of the OPPS not less often than annually, and to revise the groups, the relative payment weights, and the wage and other adjustments that take into account changes in medical practice, changes in technology, and the addition of new services, new cost data, and other relevant information and factors. In addition, under section 1833(i)(D)(v) of the Act, we annually review and update the ASC payment rates. This proposed rule also includes additional policy changes made in accordance with our experience with the OPPS and the ASC payment system and recent changes in our statutory authority. We describe these and various other statutory authorities in the relevant sections of this proposed rule. In addition, this proposed rule would update and refine the requirements for the Hospital Outpatient Quality

Reporting (OQR) Program and the ASC Quality Reporting (ASCQR) Program. We are also proposing updates to the requirements for Organ Acquisition, Prior Authorization, and Overall Hospital Quality Star Rating. We are also proposing new regulatory requirements to codify payment policy, quality measures, and enrollment policy for Rural Emergency Hospitals. Finally, we are soliciting comments on the use of CMS data to drive competition in healthcare marketplaces, and a Request for Information on an alternative methodology for counting organs.

2. Summary of the Major Provisions

• *OPPS Update:* For 2023, we propose to increase the payment rates under the OPPS by an Outpatient Department (OPD) fee schedule increase factor of 2.7 percent. This proposed increase factor is based on the proposed hospital inpatient market basket percentage increase of 3.1 percent for inpatient services paid under the hospital inpatient prospective payment system (IPPS) reduced by a proposed productivity adjustment of 0.4 percentage point. Based on this update, we estimate that total payments to OPPS providers (including beneficiary cost-sharing and estimated changes in enrollment, utilization, and case-mix) for calendar year (CY) 2023 would be approximately $86.2 billion, an increase of approximately $6.2 billion compared to estimated CY 2022 OPPS payments.

We propose to continue to implement the statutory 2.0 percentage point reduction in payments for hospitals that fail to meet the hospital outpatient quality reporting requirements by applying a reporting factor of 0.9805 to the OPPS payments and copayments for all applicable services.

• *Data used in CY 2023 OPPS/ASC Ratesetting:* To set CY 2023 OPPS and ASC payment rates, we would normally use the most updated claims and cost report data available. The best available claims data is the most recent set of data which would be from 2 years prior to the calendar year that is the subject of rulemaking. Therefore, we are proposing to use the CY 2021 claims data to set CY 2023 OPPS and ASC rates. However, cost report data usually lags the claims data by a year and CMS believes that the CY 2020 cost report data are not the best overall approximation of expected outpatient hospital services as the majority of the cost reports we would typically use for CY 2023 rate setting have cost reporting periods that overlap with parts of the CY 2020 Public Health Emergency (PHE). In order to mitigate the impact of some of the temporary changes in hospitals cost report data from CY 2020, we propose to use cost report data from the June 2020 extract from Healthcare Cost Report Information System (HCRIS), which includes cost report data from prior to the PHE. This is the same cost report extract we used to set OPPS rates for CY 2022. We believe using the CY 2021 claims data with cost reports data through CY 2019 (prior to the PHE) for CY 2023 OPPS ratesetting is the best approximation of expected costs for CY 2023 hospital outpatient services for ratesetting purposes. As a result, CMS is proposing to use CY 2021 claims data with cost reports with cost reporting periods prior to the PHE to set CY 2023 OPPS and ASC payment system rates.

• *Partial Hospitalization Update:* For CY 2023, we propose to calculate the CMHC and hospital-based PHP (HB PHP) geometric mean per diem costs consistent with our existing methodology, except that while we propose to use the latest available CY 2021 claims data, we propose to continue to use the cost data that was available for the CY 2021 rulemaking.

• *Changes to the Inpatient Only (IPO) List:* For 2023, we propose to remove ten services from the Inpatient Only list.

• 340B-*Acquired Drugs:* For CY 2023, we formally propose at this time to continue our current policy of paying ASP minus 22.5 percent for 340B-acquired drugs and biologicals, including when furnished in nonexcepted off-campus PBDs paid under the PFS. This proposal is in accordance with the policy choices and calculations that CMS made in the months leading up to publication of this proposed rule before the Supreme Court issued its decision in *American Hospital Association* v. *Becerra* (Docket 20–1114). However, we note that, in light of the Supreme Court's recent decision in *American Hospital Association* v. *Becerra,* we fully anticipate applying a rate of ASP + 6 percent to such drugs and biologicals in the final rule for CY 2023 and making a corresponding decrease to the conversion factor consistent with the OPPS statute and our longstanding policy that this adjustment is made in a budget neutral manner. We are still evaluating how to apply the Supreme Court's recent decision to prior calendar years. In that decision, the Court summarized the parties' arguments regarding budget neutrality and stated that, ''[a]t this stage, we need not address potential remedies.'' We are interested in public comments on the best way to craft any potential remedies affecting cost years 2018–2022 given that the Court did not resolve that issue.

• *Device Pass-Through Payment Applications:* For CY 2023, we received 8 applications for device pass-through payments. We solicit public comment on these applications and will make final determinations on these applications in the CY 2023 OPPS/ASC final rule. Beginning for OPPS device pass-through applications received on or after January 1, 2023, we propose to publicly post online the completed application forms and related materials that we receive from applicants, excluding certain copyrighted or other materials that applicants indicate cannot otherwise be released to the public.

• *Cancer Hospital Payment Adjustment:* For CY 2023, we propose to continue providing additional payments to cancer hospitals so that a cancer hospital's payment-to-cost ratio (PCR) after the additional payments is equal to the weighted average PCR for the other OPPS hospitals using the most recently submitted or settled cost report data. However, section 16002(b) of the 21st Century Cures Act requires that this weighted average PCR be reduced by 1.0 percentage point. Based on the data and the required 1.0 percentage point reduction, we proposed to use a target PCR of 0.89 to determine the CY 2023 cancer hospital payment adjustment to be paid at cost report settlement. That is, the payment adjustments would be the additional payments needed to result in a PCR equal to 0.89 for each cancer hospital.

• *ASC Payment Update:* For CYs 2019 through 2023, we propose to adopt a policy to update the ASC payment system using the hospital market basket update. Using the hospital market basket methodology, for CY 2023, we propose to increase payment rates under the ASC payment system by 2.7 percent for ASCs that meet the quality reporting requirements under the ASCQR Program. This proposed increase is based on a hospital market basket percentage increase of 3.1 percent reduced by a productivity adjustment of 0.4 percentage point. Based on this proposed update, we estimate that total payments to ASCs (including beneficiary cost-sharing and estimated changes in enrollment, utilization, and case-mix) for CY 2023 would be approximately 5.4 billion, an increase of approximately 130 million compared to estimated CY 2022 Medicare payments.

• *Changes to the List of ASC Covered Surgical Procedures:* For CY 2023, we propose to add one procedure, a lymph node biopsy or excision, to the ASC CPL based upon existing criteria at § 416.166.

• *Hospital Outpatient Quality Reporting (OQR) Program:* For the Hospital OQR Program measure set, we are proposing to: (1) add a data validation targeting criterion to our existing four targeting criteria that reads: ''Any hospital with a two-tailed confidence interval that is less than 75 percent, and that had less than four quarters of data due to receiving an ECE for one or more quarters,'' beginning with the CY 2023 reporting period/CY 2025 payment determination; (2) align patient encounter quarters with the calendar year, beginning with the CY 2024 reporting period/CY 2026 payment determination; and (3) change the Cataracts: Improvement in Patient's Visual Function within 90 Days Following Cataract Surgery (OP–31) Measure from Mandatory to Voluntary Beginning with the CY 2027 Payment Determination. We are requesting comment on the future readoption of the Hospital Outpatient Volume on Selected Outpatient Surgical Procedures (OP–26) measure or another volume indicator in the Hospital OQR Program.

• *Ambulatory Surgical Center Quality Reporting (ASCQR) Program:* For the ASCQR Program measure set, we are proposing to change the Cataracts: Improvement in Patient's Visual Function within 90 Days Following Cataract Surgery (ASC–11) Measure from Mandatory to Voluntary Beginning with the CY 2027 Payment Determination. We are also requesting comment on: (1) the potential future implementation of a measures value pathways approach in the ASCQR Program; (2) the status and feasibility of interoperability initiatives in the ASCQR Program; and (3) the potential readoption of the ASC Facility Volume Data on Selected ASC Surgical Procedures (ASC–7) measure or another volume indicator in the ASCQR Program. We are also proposing to suspend mandatory implementation of the ASC–11 measure.

• *Organ acquisition payment policy:* We are issuing a Request for Information on counting Medicare organs for use in calculating Medicare's share of organ acquisition costs, rather than making a proposal, and will use the information to inform potential future rulemaking. Also, we propose to exclude research organs from the calculation of Medicare's share of organ acquisition costs and require a cost offset; these proposals would help ensure that Medicare does not share in the cost of research, and would lower the cost of procuring and providing research organs to the research community. Finally, we propose to cover as organ acquisition costs certain hospital costs typically incurred when donors die from cardiac death, to promote organ procurement and enhance equity.

• *Rural Emergency Hospitals (REH): Provider Enrollment:* We are outlining provider enrollment requirements for REHs. The most important of these is that REHs must comply with all applicable provider enrollment provisions in 42 CFR part 424, subpart P in order to enroll in Medicare.

• *Rural Emergency Hospitals (REH) Physician Self-Referral Law Update:* We propose (1) a new exception for ownership or investment interests in an REH; and (2) revisions to certain existing exceptions to make them applicable to compensation arrangements to which an REH is a party.

• *Rural Emergency Hospital Quality Reporting (REHQR) Program:* For the REHQR Program, we are proposing to require a QualityNet account and Security Official (SO) requirement in line with other quality programs for purposes of data submission and access of facility level reports. We are also requesting information on: (1) measures recommended by the National Advisory Committee on Rural Health and Human Services and additional suggested measures for the REHQR Program, and (2) and comments on rural telehealth, behavioral and mental health, and maternal health services.

• *Overall Hospital Quality Star Ratings:* For the Overall Hospital Quality Star Ratings, we are: (1) providing information on the previously finalized policy for inclusion of quality measure data from Veteran's Health Administration hospitals; (2) proposing to amend § 412.190(c) to state the use of publicly available measure results on Hospital Compare or its successor websites from a quarter within the prior 12 months (instead of the ''prior year''); and (3) conveying that although CMS intends to publish Overall Hospital Quality Star Ratings in 2023, we may apply the suppression policy discussed in the CY 2021 OPPS/ASC proposed rule (85 FR 48996 through 49027) should data analysis demonstrate that the COVID–19 Public Health Emergency (PHE) substantially affects the underlying measure data.

• *REH Payment Policy:* Section 125 of the Consolidated Appropriations Act of 2021 (CAA) established a new provider type called Rural Emergency Hospitals (REHs), effective January 1, 2023.

REHs are facilities that convert from either a critical access hospital (CAH) or a rural hospital (or one treated as such under section 1886(d)(8)(E) of the Social Security Act) with less than 50 beds, and that do not provide acute care inpatient services with the exception of post-hospital extended care services furnished in a unit of the facility that is a distinct part licensed as a skilled nursing facility. By statute, REH services include emergency department services and observation care and, at the election of the REH, other outpatient medical and health services furnished on an outpatient basis, as specified by the Secretary through rulemaking.

By statute, covered outpatient department services provided by REHs will receive an additional 5 percent payment for each service. Beneficiaries will not be charged a copayment on the additional 5 percent payment.

We are proposing to consider all covered outpatient department services, other than inpatient hospital services as described in section 1833(t)(1)(B)(ii), that would otherwise be paid under the OPPS as REH services. REHs would be paid for furnishing REH services at a rate that is equal to the OPPS payment rate for the equivalent covered outpatient department service increased by 5 percent. We are also proposing that REHs may provide outpatient services that are not otherwise paid under the OPPS (such as services paid under the Clinical Lab Fee Schedule) as well as post-hospital extended care services furnished in a unit of the facility that is a distinct part of the facility licensed as a skilled nursing facility; however, these services would not be considered REH services and therefore would be paid under the applicable fee schedule and would not receive the additional 5 percent payment increase that CMS proposes to apply to REH services.

Finally, we are proposing that REHs would also receive a monthly facility payment. After the initial payment is established in CY 2023, the payment amount will increase in subsequent years by the hospital market basket percentage increase.

• *Proposed Addition of a New Service Category for Hospital Outpatient Department Prior Authorization Process:* We propose to add facet joint interventions as a category of services to the prior authorization process for hospital outpatient departments beginning for dates of service on or after March 1, 2023.

• *Mental Health Services Furnished Remotely by Hospital Staff to Beneficiaries in Their Homes:* For CY 2023, CMS is proposing to consider mental health services furnished remotely by hospital staff using communications technology to beneficiaries in their homes as covered outpatient department services payable under the OPPS and would create OPPS-specific coding for these services.

We are proposing to require an in-person service within 6 months prior to the initiation of the remote service and then every 12 months thereafter, that exceptions to the in-person visit requirement may be made based on beneficiary circumstances (with the reason documented in the patient's medical record), and that more frequent visits are also allowed under our policy, as driven by clinical needs on a case-by-case basis. We are also proposing that audio-only interactive telecommunications systems may be used to furnish these services in instances where the beneficiary is not capable of, or does not consent to, the use of two-way, audio/video technology.

• *Supervision by Nonphysician Practitioners of Hospital and CAH Diagnostic Services Furnished to Outpatients:* For CY 2023, to improve clarity, we propose to replace cross-references at § 410.27(a)(1)(iv)(A) and (B) and § 410.28(e) to the definitions of general and personal supervision at § 410.32(b)(3)(i) and (iii) with the text of those definitions. We also propose to revise § 410.28(e) to clarify that certain nonphysician practitioners (nurse practitioners, physician assistants, clinical nurse specialists and certified nurse midwifes) may supervise the performance of diagnostic tests to the extent they are authorized to do so under their scope of practice and applicable State law.

• *Exemption of Rural Sole Community Hospitals (SCH) from the Method to Control Unnecessary Increases in the Volume of Clinic Visit Services Furnished in Excepted Off-Campus Provider-Based Departments (PBDs):* We are proposing to exempt rural Sole Community Hospitals (rural SCHs) from the site-specific Medicare Physician Fee Schedule (PFS)-equivalent payment for the clinic visit service, as described by HCPCS code G0463, when provided at an off-campus PBD excepted from section 1833(t)(21) of the Act (departments that bill the modifier ''PO'' on claim lines).

• *Proposed Payment Adjustments under the IPPS and OPPS for Domestic NIOSH-Approved Surgical N95 Respirators:* As discussed in section X.H of the preamble of this proposed rule, the Biden-Harris Administration has made it a priority to ensure America is prepared to continue to respond to COVID–19, and to combat future pandemics. To improve hospital preparedness and readiness for future threats, we are proposing to provide payment adjustments to hospitals under the IPPS and OPPS for the additional resource costs they incur to acquire domestic NIOSH-approved surgical N95 respirators. These surgical respirators, which faced severe shortage at the onset of the COVID–19 pandemic, are essential for the protection of beneficiaries and hospital personnel that interface with patients. The Department of Health and Human Services (HHS) recognizes that procurement of domestic NIOSH-approved surgical N95 respirators, while critical to pandemic preparedness and protecting health care workers and patients, can result in additional resource costs for hospitals. The proposed payment adjustments would account for these additional resource costs.

We believe the proposed payment adjustments would help achieve a strategic policy goal, namely, sustaining a level of supply resilience for surgical N95 respirators that is critical to protect the health and safety of personnel and patients in a public health emergency. We are proposing that the payment adjustments would commence for cost reporting periods beginning on or after January 1, 2023.

3. Summary of Costs and Benefits

In section XXIII of this proposed rule, we set forth a detailed analysis of the regulatory and federalism impacts that the changes would have on affected entities and beneficiaries. Key estimated impacts are described below.

a. Impacts of All OPPS Changes

Table 84 in section XXIII.C of this proposed rule displays the distributional impact of all the OPPS changes on various groups of hospitals and CMHCs for CY 2023 compared to all estimated OPPS payments in CY 2022. We estimate that the policies in this proposed rule would result in a 2.9 percent overall increase in OPPS payments to providers. We estimate that total OPPS payments for CY 2023, including beneficiary cost-sharing, to the approximately 3,502 facilities paid under the OPPS (including general acute care hospitals, children's hospitals, cancer hospitals, and CMHCs) will increase by approximately $1.8 billion compared to CY 2022 payments, excluding our estimated changes in enrollment, utilization, and case-mix.

We estimated the isolated impact of our OPPS policies on CMHCs because CMHCs are only paid for partial hospitalization services under the OPPS. Continuing the provider-specific structure we adopted beginning in CY 2011, and basing payment fully on the type of provider furnishing the service, we estimate an 8.4 percent decrease in CY 2023 payments to CMHCs relative to their CY 2022 payments.

b. Impacts of the Updated Wage Indexes

We estimate that our update of the wage indexes based on the FY 2023 IPPS proposed rule wage indexes would result in no change for urban hospitals under the OPPS and no change for rural hospitals. These wage indexes include the continued implementation of the OMB labor market area delineations based on 2010 Decennial Census data, with updates, as discussed in section II.C of this proposed rule.

c. Impacts of the Rural Adjustment and the Cancer Hospital Payment Adjustment

There are no significant impacts of our CY 2023 payment policies for hospitals that are eligible for the rural adjustment or for the cancer hospital payment adjustment. We are not making any change in policies for determining the rural hospital payment adjustments. While we are implementing the reduction to the cancer hospital payment adjustment for CY 2023 required by section 1833(t)(18)(C) of the Act, as added by section 16002(b) of the 21st Century Cures Act, the target payment-to-cost ratio (PCR) for CY 2023 is 0.89, equivalent to the 0.89 target PCR for CY 2022, and therefore has no budget neutrality adjustment.

d. Impacts of the OPD Fee Schedule Increase Factor

For the CY 2023 OPPS/ASC, we are establishing an OPD fee schedule increase factor of 2.7 percent and applying that increase factor to the conversion factor for CY 2023. We note that the following estimated changes are based on the formal proposal discussed in V.B of this proposed rule. However, we are making available online alternative impact tables and other supporting data associated with the alternative policy for 340B-acquired drugs.

As a result of the OPD fee schedule increase factor and other budget neutrality adjustments, we estimate that urban hospitals would experience an increase in payments of approximately 3.0 percent and that rural hospitals would experience an increase in payments of 2.6 percent. Classifying hospitals by teaching status, we estimate nonteaching hospitals will experience an increase in payments of 3.2 percent, minor teaching hospitals would experience an increase in payments of 3.0 percent, and major teaching hospitals would experience an increase in payments of 2.6 percent. We also classified hospitals by the type of ownership. We estimate that hospitals with voluntary ownership would

experience an increase of 2.8 percent in payments, while hospitals with government ownership would experience an increase of 2.8 percent in payments. We estimate that hospitals with proprietary ownership would experience an increase of 3.5 percent in payments.

e. Impacts of the Proposed ASC Payment Update

For impact purposes, the surgical procedures on the ASC covered surgical procedure list are aggregated into surgical specialty groups using CPT and HCPCS code range definitions. The percentage change in estimated total payments by specialty groups under the CY 2023 payment rates, compared to estimated CY 2022 payment rates, generally ranges between an increase of 1 and 6 percent, depending on the service, with some exceptions. We estimate the impact of applying the hospital market basket update to ASC payment rates would increase payments by $130 million under the ASC payment system in CY 2023.

B. Legislative and Regulatory Authority for the Hospital OPPS

When Title XVIII of the Act was enacted, Medicare payment for hospital outpatient services was based on hospital-specific costs. In an effort to ensure that Medicare and its beneficiaries pay appropriately for services and to encourage more efficient delivery of care, the Congress mandated replacement of the reasonable cost-based payment methodology with a prospective payment system (PPS). The Balanced Budget Act of 1997 (BBA) (Pub. L. 105–33) added section 1833(t) to the Act, authorizing implementation of a PPS for hospital outpatient services. The OPPS was first implemented for services furnished on or after August 1, 2000. Implementing regulations for the OPPS are located at 42 CFR parts 410 and 419.

The Medicare, Medicaid, and SCHIP Balanced Budget Refinement Act of 1999 (BBRA) (Pub. L. 106–113) made major changes in the hospital OPPS. The following Acts made additional changes to the OPPS: the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (BIPA) (Pub. L. 106–554); the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108–173); the Deficit Reduction Act of 2005 (DRA) (Pub. L. 109–171), enacted on February 8, 2006; the Medicare Improvements and Extension Act under Division B of Title I of the Tax Relief and Health Care Act of 2006 (MIEA–TRHCA) (Pub. L. 109–432), enacted on December 20, 2006; the Medicare, Medicaid, and SCHIP Extension Act of 2007 (MMSEA) (Pub. L. 110–173), enacted on December 29, 2007; the Medicare Improvements for Patients and Providers Act of 2008 (MIPPA) (Pub. L. 110–275), enacted on July 15, 2008; the Patient Protection and Affordable Care Act (Pub. L. 111–148), enacted on March 23, 2010, as amended by the Health Care and Education Reconciliation Act of 2010 (Pub. L. 111–152), enacted on March 30, 2010 (these two public laws are collectively known as the Affordable Care Act); the Medicare and Medicaid Extenders Act of 2010 (MMEA, Pub. L. 111–309); the Temporary Payroll Tax Cut Continuation Act of 2011 (TPTCCA, Pub. L. 112–78), enacted on December 23, 2011; the Middle Class Tax Relief and Job Creation Act of 2012 (MCTRJCA, Pub. L. 112–96), enacted on February 22, 2012; the American Taxpayer Relief Act of 2012 (Pub. L. 112–240), enacted January 2, 2013; the Pathway for SGR Reform Act of 2013 (Pub. L. 113–67) enacted on December 26, 2013; the Protecting Access to Medicare Act of 2014 (PAMA, Pub. L. 113–93), enacted on March 27, 2014; the Medicare Access and CHIP Reauthorization Act (MACRA) of 2015 (Pub. L. 114–10), enacted April 16, 2015; the Bipartisan Budget Act of 2015 (Pub. L. 114–74), enacted November 2, 2015; the Consolidated Appropriations Act, 2016 (Pub. L. 114–113), enacted on December 18, 2015, the 21st Century Cures Act (Pub. L. 114–255), enacted on December 13, 2016; the Consolidated Appropriations Act, 2018 (Pub. L. 115–141), enacted on March 23, 2018; the Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment for Patients and Communities Act (Pub. L. 115–271), enacted on October 24, 2018; the Further Consolidated Appropriations Act, 2020 (Pub. L. 116–94), enacted on December 20, 2019; the Coronavirus Aid, Relief, and Economic Security Act (Pub. L. 116–136), enacted on March 27, 2020; and the Consolidated Appropriations Act, 2021 (Pub. L. 116–260), enacted on December 27, 2020.

Under the OPPS, we generally pay for hospital Part B services on a rate-per-service basis that varies according to the APC group to which the service is assigned. We use the Healthcare Common Procedure Coding System (HCPCS) (which includes certain Current Procedural Terminology (CPT) codes) to identify and group the services within each APC. The OPPS includes payment for most hospital outpatient services, except those identified in section I.C of this proposed rule. Section 1833(t)(1)(B) of the Act provides for payment under the OPPS for hospital outpatient services designated by the Secretary (which includes partial hospitalization services furnished by CMHCs), and certain inpatient hospital services that are paid under Medicare Part B.

The OPPS rate is an unadjusted national payment amount that includes the Medicare payment and the beneficiary copayment. This rate is divided into a labor-related amount and a nonlabor-related amount. The labor-related amount is adjusted for area wage differences using the hospital inpatient wage index value for the locality in which the hospital or CMHC is located.

All services and items within an APC group are comparable clinically and with respect to resource use, as required by section 1833(t)(2)(B) of the Act. In accordance with section 1833(t)(2)(B) of the Act, subject to certain exceptions, items and services within an APC group cannot be considered comparable with respect to the use of resources if the highest median cost (or mean cost, if elected by the Secretary) for an item or service in the APC group is more than 2 times greater than the lowest median cost (or mean cost, if elected by the Secretary) for an item or service within the same APC group (referred to as the ''2 times rule''). In implementing this provision, we generally use the cost of the item or service assigned to an APC group.

For new technology items and services, special payments under the OPPS may be made in one of two ways. Section 1833(t)(6) of the Act provides for temporary additional payments, which we refer to as ''transitional pass-through payments,'' for at least 2 but not more than 3 years for certain drugs, biological agents, brachytherapy devices used for the treatment of cancer, and categories of other medical devices. For new technology services that are not eligible for transitional pass-through payments, and for which we lack sufficient clinical information and cost data to appropriately assign them to a clinical APC group, we have established special APC groups based on costs, which we refer to as New Technology APCs. These New Technology APCs are designated by cost bands which allow us to provide appropriate and consistent payment for designated new procedures that are not yet reflected in our claims data. Similar to pass-through payments, an assignment to a New Technology APC is temporary; that is, we retain a service within a New Technology APC until we acquire sufficient data to assign it to a clinically appropriate APC group.

C. Excluded OPPS Services and Hospitals

Section 1833(t)(1)(B)(i) of the Act authorizes the Secretary to designate the hospital outpatient services that are paid under the OPPS. While most hospital outpatient services are payable under the OPPS, section 1833(t)(1)(B)(iv) of the Act excludes payment for ambulance, physical and occupational therapy, and speech-language pathology services, for which payment is made under a fee schedule. It also excludes screening mammography, diagnostic mammography, and effective January 1, 2011, an annual wellness visit providing personalized prevention plan services. The Secretary exercises the authority granted under the statute to also exclude from the OPPS certain services that are paid under fee schedules or other payment systems. Such excluded services include, for example, the professional services of physicians and nonphysician practitioners paid under the Medicare Physician Fee Schedule (MPFS); certain laboratory services paid under the Clinical Laboratory Fee Schedule (CLFS); services for beneficiaries with end-stage renal disease (ESRD) that are paid under the ESRD prospective payment system; and services and procedures that require an inpatient stay that are paid under the hospital IPPS. In addition, section 1833(t)(1)(B)(v) of the Act does not include applicable items and services (as defined in subparagraph (A) of paragraph (21)) that are furnished on or after January 1, 2017 by an off-campus outpatient department of a provider (as defined in subparagraph (B) of paragraph (21)). We set forth the services that are excluded from payment under the OPPS in regulations at 42 CFR 419.22.

Under § 419.20(b) of the regulations, we specify the types of hospitals that are excluded from payment under the OPPS. These excluded hospitals are:

- Critical access hospitals (CAHs);
- Hospitals located in Maryland and paid under Maryland's All-Payer or Total Cost of Care Model;
- Hospitals located outside of the 50 States, the District of Columbia, and Puerto Rico; and
- Indian Health Service (IHS) hospitals.

D. Prior Rulemaking

On April 7, 2000, we published in the **Federal Register** a final rule with comment period (65 FR 18434) to implement a prospective payment system for hospital outpatient services. The hospital OPPS was first implemented for services furnished on or after August 1, 2000. Section 1833(t)(9)(A) of the Act requires the Secretary to review certain components of the OPPS, not less often than annually, and to revise the groups, the relative payment weights, and the wage and other adjustments to take into account changes in medical practices, changes in technology, the addition of new services, new cost data, and other relevant information and factors.

Since initially implementing the OPPS, we have published final rules in the **Federal Register** annually to implement statutory requirements and changes arising from our continuing experience with this system. These rules can be viewed on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.html*.

E. Advisory Panel on Hospital Outpatient Payment (the HOP Panel or the Panel)

1. Authority of the Panel

Section 1833(t)(9)(A) of the Act, as amended by section 201(h) of Public Law 106–113, and redesignated by section 202(a)(2) of Public Law 106–113, requires that we consult with an expert outside advisory panel composed of an appropriate selection of representatives of providers to annually review (and advise the Secretary concerning) the clinical integrity of the payment groups and their weights under the OPPS. In CY 2000, based on section 1833(t)(9)(A) of the Act, the Secretary established the Advisory Panel on Ambulatory Payment Classification Groups (APC Panel) to fulfill this requirement. In CY 2011, based on section 222 of the Public Health Service Act (the PHS Act), which gives discretionary authority to the Secretary to convene advisory councils and committees, the Secretary expanded the panel's scope to include the supervision of hospital outpatient therapeutic services in addition to the APC groups and weights. To reflect this new role of the panel, the Secretary changed the panel's name to the Advisory Panel on Hospital Outpatient Payment (the HOP Panel or the Panel). The HOP Panel is not restricted to using data compiled by CMS, and in conducting its review, it may use data collected or developed by organizations outside the Department.

2. Establishment of the Panel

On November 21, 2000, the Secretary signed the initial charter establishing the Panel, and, at that time, named the APC Panel. This expert panel is composed of appropriate representatives of providers (currently employed full-time, not as consultants, in their respective areas of expertise) who review clinical data and advise CMS about the clinical integrity of the APC groups and their payment weights. Since CY 2012, the Panel also is charged with advising the Secretary on the appropriate level of supervision for individual hospital outpatient therapeutic services. The Panel is technical in nature, and it is governed by the provisions of the Federal Advisory Committee Act (FACA). The current charter specifies, among other requirements, that the Panel—

- May advise on the clinical integrity of Ambulatory Payment Classification (APC) groups and their associated weights;
- May advise on the appropriate supervision level for hospital outpatient services;
- May advise on OPPS APC rates for ASC covered surgical procedures;
- Continues to be technical in nature;
- Is governed by the provisions of the FACA;
- Has a Designated Federal Official (DFO); and
- Is chaired by a Federal Official designated by the Secretary.

The Panel's charter was amended on November 15, 2011, renaming the Panel and expanding the Panel's authority to include supervision of hospital outpatient therapeutic services and to add critical access hospital (CAH) representation to its membership. The Panel's charter was also amended on November 6, 2014 (80 FR 23009), and the number of members was revised from up to 19 to up to 15 members. The Panel's current charter was approved on November 20, 2020, for a 2-year period.

The current Panel membership and other information pertaining to the Panel, including its charter, **Federal Register** notices, membership, meeting dates, agenda topics, and meeting reports, can be viewed on the CMS website at: *https://www.cms.gov/Regulations-and-Guidance/Guidance/FACA/AdvisorPanelAmbulatoryPaymentClassificationGroups.html.*

3. Panel Meetings and Organizational Structure

The Panel has held many meetings, with the last meeting taking place on August 22, 2021. Prior to each meeting, we publish a notice in the **Federal Register** to announce the meeting, new members, and any other changes of which the public should be aware. Beginning in CY 2017, we have transitioned to one meeting per year (81

FR 31941). In CY 2018, we published a **Federal Register** notice requesting nominations to fill vacancies on the Panel (83 FR 3715). As published in this notice, CMS is accepting nominations on a continuous basis.

In addition, the Panel has established an administrative structure that, in part, currently includes the use of three subcommittee workgroups to provide preparatory meeting and subject support to the larger panel. The three current subcommittees include the following:

- APC Groups and Status Indicator Assignments Subcommittee, which advises and provides recommendations to the Panel on the appropriate status indicators to be assigned to HCPCS codes, including but not limited to whether a HCPCS code or a category of codes should be packaged or separately paid, as well as the appropriate APC assignment of HCPCS codes regarding services for which separate payment is made;
- Data Subcommittee, which is responsible for studying the data issues confronting the Panel and for recommending options for resolving them; and
- Visits and Observation Subcommittee, which reviews and makes recommendations to the Panel on all technical issues pertaining to observation services and hospital outpatient visits paid under the OPPS.

Each of these workgroup subcommittees was established by a majority vote from the full Panel during a scheduled Panel meeting, and the Panel recommended at the August 23, 2021, meeting that the subcommittees continue. We accepted this recommendation.

For discussions of earlier Panel meetings and recommendations, we refer readers to previously published OPPS/ASC proposed and final rules, the CMS website mentioned earlier in this section, and the FACA database at *http://facadatabase.gov*.

F. Public Comments Received on the CY 2022 OPPS/ASC Final Rule With Comment Period

We received approximately 13 timely pieces of correspondence on the CY 2022 OPPS/ASC final rule with comment period that appeared in the **Federal Register** on November 16, 2021 (86 FR 63458)

II. Proposed Updates Affecting OPPS Payments

A. Proposed Recalibration of APC Relative Payment Weights

1. Database Construction

a. Use of CY 2021 Data in the CY 2023 OPPS Ratesetting

We primarily use two data sources in OPPS ratesetting: claims data and cost report data. Our goal is always to use the best available data overall for ratesetting. Ordinarily, the best available full year of claims data would be the data from the year 2 years prior to the calendar year that is the subject of the rulemaking. As discussed in further detail in section X.C of this proposed rule, unlike CY 2020 claims data, we do not believe there are overwhelming concerns with CY 2021 claims data as a result of the COVID–19 PHE. Therefore, as discussed in further detail in section X.C of this proposed rule, we propose to use CY 2021 claims data and the data components related to it in establishing the CY 2023 OPPS.

b. Database Source and Methodology

Section 1833(t)(9)(A) of the Act requires that the Secretary review not less often than annually and revise the relative payment weights for APCs. In the April 7, 2000 OPPS final rule with comment period (65 FR 18482), we explained in detail how we calculated the relative payment weights that were implemented on August 1, 2000 for each APC group.

For the CY 2023 OPPS, we propose to recalibrate the APC relative payment weights for services furnished on or after January 1, 2023, and before January 1, 2024 (CY 2023), using the same basic methodology that we described in the CY 2022 OPPS/ASC final rule with comment period (86 FR 63466), using CY 2021 claims data. That is, we propose to recalibrate the relative payment weights for each APC based on claims and cost report data for hospital outpatient department (HOPD) services to construct a database for calculating APC group weights.

For the purpose of recalibrating the proposed APC relative payment weights for CY 2023, we began with approximately 180 million final action claims (claims for which all disputes and adjustments have been resolved and payment has been made) for HOPD services furnished on or after January 1, 2021, and before January 1, 2022, before applying our exclusionary criteria and other methodological adjustments. After the application of those data processing changes, we used approximately 93 million final action claims to develop the proposed CY 2023 OPPS payment weights. For exact numbers of claims used and additional details on the claims accounting process, we refer readers to the claims accounting narrative under supporting documentation for the CY 2023 OPPS/ASC proposed rule on the CMS website at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html*.

Addendum N to the CY 2023 OPPS/ASC proposed rule (which is available via the internet on the CMS website at: *http://www.cms.gov/Medicare/Medicare-Feefor-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.html*) includes the proposed list of bypass codes for CY 2023. The proposed list of bypass codes contains codes that are reported on claims for services in CY 2021 and, therefore, includes codes that were in effect in CY 2021 and used for billing. We propose to retain deleted bypass codes on the proposed CY 2023 bypass list because these codes existed in CY 2021 and were covered OPD services in that period, and CY 2021 claims data were used to calculate proposed CY 2023 payment rates. Keeping these deleted bypass codes on the bypass list potentially allows us to create more ''pseudo'' single procedure claims for ratesetting purposes. ''Overlap bypass codes'' that are members of the proposed multiple imaging composite APCs are identified by asterisks (*) in the third column of Addendum N to this proposed rule. HCPCS codes that we propose to add for CY 2023 are identified by asterisks (*) in the fourth column of Addendum N.

c. Calculation and Use of Cost-to-Charge Ratios (CCRs)

For CY 2023, we propose to continue to use the hospital-specific overall ancillary and departmental cost-to-charge ratios (CCRs) to convert charges to estimated costs through application of a revenue code-to-cost center crosswalk. However, roughly half of the cost reports we would typically use for CY 2023 ratesetting purposes are from cost reporting periods that overlap with parts of CY 2020. When utilizing this cost report data, more than half of the APC geometric mean costs increased by more than 10 percent relative to estimates based on prior ratesetting cycles. While some of this increase may be attributable to changes that will continue into CY 2023, other aspects of those changes may be more specific to the COVID–19 PHE. In the CY 2022 OPPS/ASC final rule with comment period (86 FR 63751 through 63754), we

described how CY 2020 claims data were too influenced by the COVID–19 PHE to be utilized for setting CY 2022 OPPS payment rates. After reviewing the cost report data from the December 2021 HCRIS data set, we believe cost report data that overlap with CY 2020 are also too influenced by the COVID–19 PHE for purposes of calculating the CY 2023 OPPS payment rates. Therefore, in order to mitigate the impact on our ratesetting process from the COVID–19 PHE effects in the CY 2020 cost report data we would typically use for this CY 2023 OPPS/ASC proposed rule, we propose to use cost report data from the June 2020 HCRIS data set, which only includes cost report data through CY 2019 for CY 2023 OPPS/ASC proposed rule and final rule ratesetting purposes. For additional discussion of the data we propose to use in CY 2023 OPPS ratesetting, please see section X.C of this proposed rule.

To calculate the APC costs on which the CY 2023 APC payment rates are based, we propose to calculate hospital-specific overall ancillary CCRs and hospital-specific departmental CCRs for each hospital for which we had CY 2021 claims data by comparing these claims data to hospital cost reports available for the CY 2022 OPPS/ASC final rule with comment period ratesetting, which, in most cases, are from CY 2019. For the proposed CY 2023 OPPS payment rates, we propose to use CY 2021 claims processed through December 31, 2021. We applied the hospital-specific CCR to the hospital's charges at the most detailed level possible, based on a revenue code-to-cost center crosswalk that contains a hierarchy of CCRs used to estimate costs from charges for each revenue code. To ensure the completeness of the revenue code-to-cost center crosswalk, we reviewed changes to the list of revenue codes for CY 2021 (the year of claims data we used to calculate the proposed CY 2023 OPPS payment rates) and updates to the National Uniform Billing Committee (NUBC) 2020 Data Specifications Manual. That crosswalk is available for review and continuous comment on the CMS website at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html.*

In accordance with our longstanding policy, we propose to calculate CCRs for the standard and nonstandard cost centers accepted by the electronic cost report database. In general, the most detailed level at which we calculate CCRs is the hospital-specific departmental level. Additionally, we have historically not included cost report lines for certain nonstandard cost centers in the OPPS ratesetting database construction when hospitals have reported these nonstandard cost centers on cost report lines that do not correspond to the cost center number. We have determined that hospitals are routinely reporting a number of nonstandard cost centers in this way and that including this additional data could significantly reduce certain APC geometric mean costs. In particular, we estimate that the additional cost data from nonstandard cost centers would decrease the geometric mean cost of APC 8004 (Ultrasound Composite) by 20 percent, APC 5863 (Partial Hospitalizations (3 or more services) for hospital-based PHPs) by 12 percent and APC 5573 (Level 3 Imaging with Contrast) by 11 percent. In other instances, we note that there are also potential increases in the geometric mean costs of certain APCs, such as APC 5741 (Level 1 Electronic Analysis of Devices), which would increase by 4 percent, APC 5723 (Level 3 Diagnostic Tests and Related Services), which would increase by 2.6 percent, and APC 5694 (Level 4 Drug Administration), which would increase by 2.3 percent.

While we generally view the use of additional cost data as improving our OPPS ratesetting process, we have historically not included cost report lines for certain nonstandard cost centers in the OPPS ratesetting database construction when hospitals have reported these nonstandard cost centers on cost report lines that do not correspond to the cost center number. Additionally, we are concerned about the significant changes in APC geometric mean costs that our analysis indicates would occur if we were to include such lines. We believe it is important to further investigate the accuracy of these cost report data before including such data in the ratesetting process. Further, we believe it is appropriate to gather additional information from the public as well before including them in OPPS ratesetting. For CY 2023, we propose not to include the nonstandard cost centers reported in this way in the OPPS ratesetting database construction. We are soliciting comment on whether there exist any specific concerns with regards to the accuracy of the data from these nonstandard cost center lines that we would need to consider before including them in future OPPS ratesetting.

For a discussion of the hospital-specific overall ancillary CCR calculation, we refer readers to the CY 2007 OPPS/ASC final rule with comment period (71 FR 67983 through 67985). The calculation of blood costs is a longstanding exception (since the CY 2005 OPPS) to this general methodology for calculation of CCRs used for converting charges to costs on each claim. This exception is discussed in detail in the CY 2007 OPPS/ASC final rule with comment period and discussed further in section II.A.2.a.(1) of this proposed rule.

2. Proposed Data Development and Calculation of Costs Used for Ratesetting

In this section of this proposed rule, we discuss the use of claims to calculate the OPPS payment rates for CY 2023. The Hospital OPPS page on the CMS website on which the CY 2023 OPPS/ASC proposed rule is posted (*http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html*) provides an accounting of claims used in the development of the proposed payment rates. That accounting provides additional detail regarding the number of claims derived at each stage of the process. In addition, later in this section we discuss the file of claims that comprises the data set that is available upon payment of an administrative fee under a CMS data use agreement. The CMS website, *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html*, includes information about obtaining the ''OPPS Limited Data Set,'' which now includes the additional variables previously available only in the OPPS Identifiable Data Set, including ICD–10–CM diagnosis codes and revenue code payment amounts. This file is derived from the CY 2021 claims that are used to calculate the proposed payment rates for this CY 2023 proposed rule.

Previously, the OPPS established the scaled relative weights on which payments are based using APC median costs, a process described in the CY 2012 OPPS/ASC final rule with comment period (76 FR 74188). However, as discussed in more detail in section II.A.2.f of the CY 2013 OPPS/ASC final rule with comment period (77 FR 68259 through 68271), we finalized the use of geometric mean costs to calculate the relative weights on which the CY 2013 OPPS payment rates were based. While this policy changed the cost metric on which the relative payments are based, the data process in general remained the same under the methodologies that we used to obtain appropriate claims data and accurate cost information in determining estimated service cost.

We used the methodology described in sections II.A.2.a through II.A.2.c of this proposed rule to calculate the costs we used to establish the proposed

relative payment weights used in calculating the OPPS payment rates for CY 2023 shown in Addenda A and B to this proposed rule (which are available via the internet on the CMS website at: *http://www.cms.gov/Medicare/Medicare-Feefor-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.html*). We refer readers to section II.A.4 of this proposed rule for a discussion of the conversion of APC costs to scaled payment weights.

We note that under the OPPS, CY 2019 was the first year in which the claims data used for setting payment rates (CY 2017 data) contained lines with the modifier ''PN'', which indicates nonexcepted items and services furnished and billed by off-campus provider-based departments (PBDs) of hospitals. Because nonexcepted items and services are not paid under the OPPS, in the CY 2019 OPPS/ASC final rule with comment period (83 FR 58832), we finalized a policy to remove those claim lines reported with modifier ''PN'' from the claims data used in ratesetting for the CY 2019 OPPS and subsequent years. For the CY 2023 OPPS, we would continue to remove claim lines with modifier ''PN'' from the ratesetting process.

For details of the claims accounting process used in the CY 2023 OPPS/ASC proposed rule, we refer readers to the claims accounting narrative under supporting documentation for the CY 2023 OPPS/ASC proposed rule on the CMS website at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html*.

a. Calculation of Single Procedure APC Criteria-Based Costs

(1) Blood and Blood Products

Since the implementation of the OPPS in August 2000, we have made separate payments for blood and blood products through APCs rather than packaging payment for them into payments for the procedures with which they are administered. Hospital payments for the costs of blood and blood products, as well as for the costs of collecting, processing, and storing blood and blood products, are made through the OPPS payments for specific blood product APCs.

We propose to continue to establish payment rates for blood and blood products using our blood-specific CCR methodology, which utilizes actual or simulated CCRs from the most recently available hospital cost reports to convert hospital charges for blood and blood products to costs. This methodology has been our standard ratesetting methodology for blood and blood products since CY 2005. It was developed in response to data analysis indicating that there was a significant difference in CCRs for those hospitals with and without blood-specific cost centers, and past public comments indicating that the former OPPS policy of defaulting to the overall hospital CCR for hospitals not reporting a blood-specific cost center often resulted in an underestimation of the true hospital costs for blood and blood products. Specifically, to address the differences in CCRs and to better reflect hospitals' costs, we propose to continue to simulate blood CCRs for each hospital that does not report a blood cost center by calculating the ratio of the blood-specific CCRs to hospitals' overall CCRs for those hospitals that do report costs and charges for blood cost centers. We also propose to apply this mean ratio to the overall CCRs of hospitals not reporting costs and charges for blood cost centers on their cost reports to simulate blood-specific CCRs for those hospitals. We propose to calculate the costs upon which the proposed CY 2023 payment rates for blood and blood products are based using the actual blood-specific CCR for hospitals that reported costs and charges for a blood cost center and a hospital-specific, simulated, blood-specific CCR for hospitals that did not report costs and charges for a blood cost center.

We continue to believe that the hospital-specific, simulated, blood-specific, CCR methodology better responds to the absence of a blood-specific CCR for a hospital than alternative methodologies, such as defaulting to the overall hospital CCR or applying an average blood-specific CCR across hospitals. Because this methodology takes into account the unique charging and cost accounting structure of each hospital, we believe that it yields more accurate estimated costs for these products. We continue to believe that using this methodology in CY 2023 would result in costs for blood and blood products that appropriately reflect the relative estimated costs of these products for hospitals without blood cost centers and, therefore, for these blood products in general.

We note that we defined a comprehensive APC (C–APC) as a classification for the provision of a primary service and all adjunctive services provided to support the delivery of the primary service. Under this policy, we include the costs of blood and blood products when calculating the overall costs of these C–APCs. We propose to continue to apply the blood-specific CCR methodology described in this section when calculating the costs of the blood and blood products that appear on claims with services assigned to the C–APCs. Because the costs of blood and blood products would be reflected in the overall costs of the C–APCs (and, as a result, in the proposed payment rates of the C–APCs), we propose not to make separate payments for blood and blood products when they appear on the same claims as services assigned to the C–APCs (we refer readers to the CY 2015 OPPS/ASC final rule with comment period (79 FR 66795 through 66796) for more information about our policy not to make separate payments for blood and blood products when they appear on the same claims as services assigned to a C–APC).

We refer readers to Addendum B to this proposed rule (which is available via the internet on the CMS website) for the proposed CY 2023 payment rates for blood and blood products (which are generally identified with status indicator ''R''). For a more detailed discussion of the blood-specific CCR methodology, we refer readers to the CY 2005 OPPS proposed rule (69 FR 50524 through 50525). For a full history of OPPS payment for blood and blood products, we refer readers to the CY 2008 OPPS/ASC final rule with comment period (72 FR 66807 through 66810).

For CY 2023, we propose to continue to establish payment rates for blood and blood products using our blood-specific CCR methodology.

(2) Brachytherapy Sources

Section 1833(t)(2)(H) of the Act mandates the creation of additional groups of covered OPD services that classify devices of brachytherapy consisting of a seed or seeds (or radioactive source) (''brachytherapy sources'') separately from other services or groups of services. The statute provides certain criteria for the additional groups. For the history of OPPS payment for brachytherapy sources, we refer readers to prior OPPS final rules, such as the CY 2012 OPPS/ASC final rule with comment period (77 FR 68240 through 68241). As we have stated in prior OPPS updates, we believe that adopting the general OPPS prospective payment methodology for brachytherapy sources is appropriate for a number of reasons (77 FR 68240). The general OPPS methodology uses costs based on claims data to set the relative payment weights for hospital outpatient services. This payment methodology results in more consistent, predictable,

and equitable payment amounts per source across hospitals by averaging the extremely high and low values, in contrast to payment based on hospitals' charges adjusted to costs. We believe that the OPPS methodology, as opposed to payment based on hospitals' charges adjusted to cost, also would provide hospitals with incentives for efficiency in the provision of brachytherapy services to Medicare beneficiaries. Moreover, this approach is consistent with our payment methodology for the vast majority of items and services paid under the OPPS. We refer readers to the CY 2016 OPPS/ASC final rule with comment period (80 FR 70323 through 70325) for further discussion of the history of OPPS payment for brachytherapy sources.

For CY 2023, except where otherwise indicated, we propose to use the costs derived from CY 2021 claims data to set the proposed CY 2023 payment rates for brachytherapy sources because CY 2021 is the year of data we propose to use to set the proposed payment rates for most other items and services that would be paid under the CY 2023 OPPS. With the exception of the proposed payment rate for brachytherapy source C2645 (Brachytherapy planar source, palladium-103, per square millimeter) and the proposed payment rates for low-volume brachytherapy APCs discussed in section III.D of this proposed rule, we propose to base the payment rates for brachytherapy sources on the geometric mean unit costs for each source, consistent with the methodology that we propose for other items and services paid under the OPPS, as discussed in section II.A.2. of this proposed rule. We also propose to continue the other payment policies for brachytherapy sources that we finalized and first implemented in the CY 2010 OPPS/ASC final rule with comment period (74 FR 60537). We propose to pay for the stranded and nonstranded not otherwise specified (NOS) codes, HCPCS codes C2698 (Brachytherapy source, stranded, not otherwise specified, per source) and C2699 (Brachytherapy source, non-stranded, not otherwise specified, per source), at a rate equal to the lowest stranded or nonstranded prospective payment rate for such sources, respectively, on a per-source basis (as opposed to, for example, a per mCi), which is based on the policy we established in the CY 2008 OPPS/ASC final rule with comment period (72 FR 66785). We also propose to continue the policy we first implemented in the CY 2010 OPPS/ASC final rule with comment period (74 FR 60537) regarding payment for new brachytherapy sources for which we have no claims data, based on the same reasons we discussed in the CY 2008 OPPS/ASC final rule with comment period (72 FR 66786; which was delayed until January 1, 2010, by section 142 of Pub. L. 110–275). Specifically, this policy is intended to enable us to assign new HCPCS codes for new brachytherapy sources to their own APCs, with prospective payment rates set based on our consideration of external data and other relevant information regarding the expected costs of the sources to hospitals. The proposed CY 2023 payment rates for brachytherapy sources are included on Addendum B to this proposed rule (which is available via the internet on the CMS website) and identified with status indicator ''U''.

For CY 2018, we assigned status indicator ''U'' (Brachytherapy Sources, Paid under OPPS; separate APC payment) to HCPCS code C2645 (Brachytherapy planar source, palladium-103, per square millimeter) in the absence of claims data and established a payment rate using external data (invoice price) at $4.69 per mm^2. For CY 2019, in the absence of sufficient claims data, we continued to establish a payment rate for C2645 at $4.69 per mm^2. Our CY 2018 claims data available for the CY 2020 OPPS/ASC final rule with comment period included two claims with a geometric mean cost for HCPCS code C2645 of $1.02 per mm^2. In response to comments from stakeholders, we agreed that given the limited claims data available and a new outpatient indication for C2645, a payment rate for HCPCS code C2645 based on the geometric mean cost of $1.02 per mm^2 may not adequately reflect the cost of HCPCS code C2645. In the CY 2020 OPPS/ASC final rule with comment period, we finalized our policy to use our equitable adjustment authority under section 1833(t)(2)(E) of the Act, which states that the Secretary shall establish, in a budget neutral manner, other adjustments as determined to be necessary to ensure equitable payments, to maintain the CY 2019 payment rate of $4.69 per mm^2 for HCPCS code C2645 for CY 2020. Similarly, in the absence of sufficient claims data to establish an APC payment rate, in the CY 2021 and CY 2022 OPPS/ASC final rules (85 FR 85879 through 85880 and 86 FR 63469) with comment period, we finalized our policy to use our equitable adjustment authority under section 1833(t)(2)(E) of the Act to maintain the CY 2019 payment rate of $4.69 per mm^2 for HCPCS code C2645 for CY 2021 and for CY 2022.

We did not receive any CY 2021 claims data for HCPCS code C2645. Therefore, we propose to use our equitable adjustment authority under section 1833(t)(2)(E) of the Act to maintain the CY 2019 payment rate of $4.69 per mm^2 for HCPCS code C2645 for CY 2023.

Additionally, for CY 2022 and subsequent calendar years, we adopted a Universal Low Volume APC policy for clinical and brachytherapy APCs, discussed in further detail in section III.D of this proposed rule. For these Low Volume APCs, which have fewer than 100 CY 2021 single claims used for ratesetting purposes in this CY 2023 OPPS/ASC proposed rule, we use up to 4 years of claims data to establish a payment rate for each item or service as we historically have done for low volume services assigned to New Technology APCs. Further, we calculate the cost for Low Volume APCs based on the greatest of the arithmetic mean cost, median cost, or geometric mean cost using all claims for the APC for up to 4 years. For CY 2023, we propose to designate 4 brachytherapy APCs as Low Volume APCs for CY 2023 as these APCs meet our criteria to be designated as a Low Volume APC. For more information on the brachytherapy APCs we are designating as Low Volume APCs, see section III.D of this proposed rule.

We invite stakeholders to submit recommendations for new codes to describe new brachytherapy sources. Such recommendations should be directed via email to *outpatientpps@cms.hhs.gov* or by mail to the Division of Outpatient Care, Mail Stop C4–01–26, Centers for Medicare and Medicaid Services, 7500 Security Boulevard, Baltimore, MD 21244. We will continue to add new brachytherapy source codes and descriptors to our systems for payment on a quarterly basis.

b. Comprehensive APCs (C–APCs) for CY 2023

(1) Background

In the CY 2014 OPPS/ASC final rule with comment period (78 FR 74861 through 74910), we finalized a comprehensive payment policy that packages payment for adjunctive and secondary items, services, and procedures into the most costly primary procedure under the OPPS at the claim level. The policy was finalized in CY 2014 but the effective date was delayed until January 1, 2015, to allow additional time for further analysis, opportunity for public comment, and

systems preparation. The comprehensive APC (C–APC) policy was implemented effective January 1, 2015, with modifications and clarifications in response to public comments received regarding specific provisions of the C–APC policy (79 FR 66798 through 66810).

A C–APC is defined as a classification for the provision of a primary service and all adjunctive services provided to support the delivery of the primary service. We established C–APCs as a category broadly for OPPS payment and implemented 25 C–APCs beginning in CY 2015 (79 FR 66809 through 66810). We have gradually added new C–APCs since the policy was implemented beginning in CY 2015, with the number of C–APCs now totaling 69 (80 FR 70332; 81 FR 79584 through 79585; 83 FR 58844 through 58846; 84 FR 61158 through 61166; 85 FR 85885; and 86 FR 63474).

Under our C–APC policy, we designate a service described by a HCPCS code assigned to a C–APC as the primary service when the service is identified by OPPS status indicator ''J1''. When such a primary service is reported on a hospital outpatient claim, taking into consideration the few exceptions that are discussed below, we make payment for all other items and services reported on the hospital outpatient claim as being integral, ancillary, supportive, dependent, and adjunctive to the primary service (hereinafter collectively referred to as ''adjunctive services'') and representing components of a complete comprehensive service (78 FR 74865 and 79 FR 66799). Payments for adjunctive services are packaged into the payments for the primary services. This results in a single prospective payment for each of the primary, comprehensive services based on the costs of all reported services at the claim level.

Services excluded from the C–APC policy under the OPPS include services that are not covered OPD services, services that cannot by statute be paid for under the OPPS, and services that are required by statute to be separately paid. This includes certain mammography and ambulance services that are not covered OPD services in accordance with section 1833(t)(1)(B)(iv) of the Act; brachytherapy seeds, which also are required by statute to receive separate payment under section 1833(t)(2)(H) of the Act; pass-through payment drugs and devices, which also require separate payment under section 1833(t)(6) of the Act; self-administered drugs (SADs) that are not otherwise packaged as supplies because they are not covered under Medicare Part B under section 1861(s)(2)(B) of the Act; and certain preventive services (78 FR 74865 and 79 FR 66800 through 66801). A list of services excluded from the C–APC policy is included in Addendum J to this proposed rule (which is available via the internet on the CMS website at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices*). If a service does not appear on this list of excluded services, payment for it will be packaged into the payment for the primary C–APC service when it appears on an outpatient claim with a primary C–APC service.

In the interim final rule with request for comments (IFC) titled, ''Additional Policy and Regulatory Revisions in Response to the COVID–19 Public Health Emergency'', published on November 6, 2020, we stated that, effective for services furnished on or after the effective date of the IFC and until the end of the PHE for COVID–19, there is an exception to the OPPS C–APC policy to ensure separate payment for new COVID–19 treatments that meet certain criteria (85 FR 71158 through 71160). Under this exception, any new COVID–19 treatment that meets the following two criteria will, for the remainder of the PHE for COVID–19, always be separately paid and will not be packaged into a C–APC when it is provided on the same claim as the primary C–APC service. First, the treatment must be a drug or biological product (which could include a blood product) authorized to treat COVID–19, as indicated in section ''I. Criteria for Issuance of Authorization'' of the FDA letter of authorization for the emergency use of the drug or biological product, or the drug or biological product must be approved by FDA for treating COVID–19. Second, the emergency use authorization (EUA) for the drug or biological product (which could include a blood product) must authorize the use of the product in the outpatient setting or not limit its use to the inpatient setting, or the product must be approved by FDA to treat COVID–19 disease and not limit its use to the inpatient setting. For further information regarding the exception to the C–APC policy for COVID–19 treatments, please refer to the November 6, 2020 IFC (85 FR 71158 through 71160).

The C–APC policy payment methodology set forth in the CY 2014 OPPS/ASC final rule with comment period and modified and implemented beginning in CY 2015 is summarized as follows (78 FR 74887 and 79 FR 66800):

Basic Methodology. As stated in the CY 2015 OPPS/ASC final rule with comment period, we define the C–APC payment policy as including all covered OPD services on a hospital outpatient claim reporting a primary service that is assigned to status indicator ''J1'', excluding services that are not covered OPD services or that cannot by statute be paid for under the OPPS. Services and procedures described by HCPCS codes assigned to status indicator ''J1'' are assigned to C–APCs based on our usual APC assignment methodology by evaluating the geometric mean costs of the primary service claims to establish resource similarity and the clinical characteristics of each procedure to establish clinical similarity within each APC.

In the CY 2016 OPPS/ASC final rule with comment period, we expanded the C–APC payment methodology to qualifying extended assessment and management encounters through the ''Comprehensive Observation Services'' C–APC (C–APC 8011). Services within this APC are assigned status indicator ''J2''. Specifically, we make a payment through C–APC 8011 for a claim that:

- Does not contain a procedure described by a HCPCS code to which we have assigned status indicator ''T'';
- Contains 8 or more units of services described by HCPCS code G0378 (Hospital observation services, per hour);
- Contains services provided on the same date of service or one day before the date of service for HCPCS code G0378 that are described by one of the following codes: HCPCS code G0379 (Direct admission of patient for hospital observation care) on the same date of service as HCPCS code G0378; CPT code 99281 (Emergency department visit for the evaluation and management of a patient (Level 1)); CPT code 99282 (Emergency department visit for the evaluation and management of a patient (Level 2)); CPT code 99283 (Emergency department visit for the evaluation and management of a patient (Level 3)); CPT code 99284 (Emergency department visit for the evaluation and management of a patient (Level 4)); CPT code 99285 (Emergency department visit for the evaluation and management of a patient (Level 5)) or HCPCS code G0380 (Type B emergency department visit (Level 1)); HCPCS code G0381 (Type B emergency department visit (Level 2)); HCPCS code G0382 (Type B emergency department visit (Level 3)); HCPCS code G0383 (Type B emergency department visit (Level 4)); HCPCS code G0384 (Type B emergency department visit (Level 5)); CPT code 99291 (Critical care, evaluation and management of the

critically ill or critically injured patient; first 30–74 minutes); or HCPCS code G0463 (Hospital outpatient clinic visit for assessment and management of a patient); and

- Does not contain services described by a HCPCS code to which we have assigned status indicator ''J1''.

The assignment of status indicator ''J2'' to a specific set of services performed in combination with each other allows for all other OPPS payable services and items reported on the claim (excluding services that are not covered OPD services or that cannot by statute be paid for under the OPPS) to be deemed adjunctive services representing components of a comprehensive service and resulting in a single prospective payment for the comprehensive service based on the costs of all reported services on the claim (80 FR 70333 through 70336).

Services included under the C–APC payment packaging policy, that is, services that are typically adjunctive to the primary service and provided during the delivery of the comprehensive service, include diagnostic procedures, laboratory tests, and other diagnostic tests and treatments that assist in the delivery of the primary procedure; visits and evaluations performed in association with the procedure; uncoded services and supplies used during the service; durable medical equipment as well as prosthetic and orthotic items and supplies when provided as part of the outpatient service; and any other components reported by HCPCS codes that represent services that are provided during the complete comprehensive service (78 FR 74865 and 79 FR 66800).

In addition, payment for hospital outpatient department services that are similar to therapy services and delivered either by therapists or nontherapists is included as part of the payment for the packaged complete comprehensive service. These services that are provided during the perioperative period are adjunctive services and are deemed not to be therapy services as described in section 1834(k) of the Act, regardless of whether the services are delivered by therapists or other nontherapist health care workers. We have previously noted that therapy services are those provided by therapists under a plan of care in accordance with section 1835(a)(2)(C) and section 1835(a)(2)(D) of the Act and are paid for under section 1834(k) of the Act, subject to annual therapy caps as applicable (78 FR 74867 and 79 FR 66800). However, certain other services similar to therapy services are considered and paid for as hospital outpatient department services. Payment for these nontherapy outpatient department services that are reported with therapy codes and provided with a comprehensive service is included in the payment for the packaged complete comprehensive service. We note that these services, even though they are reported with therapy codes, are hospital outpatient department services and not therapy services. We refer readers to the July 2016 OPPS Change Request 9658 (Transmittal 3523) for further instructions on reporting these services in the context of a C–APC service.

Items included in the packaged payment provided in conjunction with the primary service also include all drugs, biologicals, and radiopharmaceuticals, regardless of cost, except those drugs with pass-through payment status and SADs, unless they function as packaged supplies (78 FR 74868 through 74869 and 74909 and 79 FR 66800). We refer readers to Section 50.2M, Chapter 15, of the Medicare Benefit Policy Manual for a description of our policy on SADs treated as hospital outpatient supplies, including lists of SADs that function as supplies and those that do not function as supplies.

We define each hospital outpatient claim reporting a single unit of a single primary service assigned to status indicator ''J1'' as a single ''J1'' unit procedure claim (78 FR 74871 and 79 FR 66801). Line item charges for services included on the C–APC claim are converted to line item costs, which are then summed to develop the estimated APC costs. These claims are then assigned one unit of the service with status indicator ''J1'' and later used to develop the geometric mean costs for the C–APC relative payment weights. (We note that we use the term ''comprehensive'' to describe the geometric mean cost of a claim reporting ''J1'' service(s) or the geometric mean cost of a C–APC, inclusive of all of the items and services included in the C–APC service payment bundle.) Charges for services that would otherwise be separately payable are added to the charges for the primary service. This process differs from our traditional cost accounting methodology only in that all such services on the claim are packaged (except certain services as described above). We apply our standard data trims, which exclude claims with extremely high primary units or extreme costs.

The comprehensive geometric mean costs are used to establish resource similarity and, along with clinical similarity, dictate the assignment of the primary services to the C–APCs. We establish a ranking of each primary service (single unit only) to be assigned to status indicator ''J1'' according to its comprehensive geometric mean costs. For the minority of claims reporting more than one primary service assigned to status indicator ''J1'' or units thereof, we identify one ''J1'' service as the primary service for the claim based on our cost-based ranking of primary services. We then assign these multiple ''J1'' procedure claims to the C–APC to which the service designated as the primary service is assigned. If the reported ''J1'' services on a claim map to different C–APCs, we designate the ''J1'' service assigned to the C–APC with the highest comprehensive geometric mean cost as the primary service for that claim. If the reported multiple ''J1'' services on a claim map to the same C–APC, we designate the most costly service (at the HCPCS code level) as the primary service for that claim. This process results in initial assignments of claims for the primary services assigned to status indicator ''J1'' to the most appropriate C–APCs based on both single and multiple procedure claims reporting these services and clinical and resource homogeneity.

Complexity Adjustments. We use complexity adjustments to provide increased payment for certain comprehensive services. We apply a complexity adjustment by promoting qualifying paired ''J1'' service code combinations or paired code combinations of ''J1'' services and certain add-on codes (as described further below) from the originating C–APC (the C–APC to which the designated primary service is first assigned) to the next higher paying C–APC in the same clinical family of C–APCs. We apply this type of complexity adjustment when the paired code combination represents a complex, costly form or version of the primary service according to the following criteria:

- Frequency of 25 or more claims reporting the code combination (frequency threshold); and
- Violation of the 2 times rule, as stated in section 1833(t)(2) of the Act and section III.B.2. of this final rule with comment period, in the originating C–APC (cost threshold).

These criteria identify paired code combinations that occur commonly and exhibit materially greater resource requirements than the primary service. The CY 2017 OPPS/ASC final rule with comment period (81 FR 79582) included a revision to the complexity adjustment eligibility criteria. Specifically, we finalized a policy to discontinue the

requirement that a code combination (that qualifies for a complexity adjustment by satisfying the frequency and cost criteria thresholds described above) also not create a 2 times rule violation in the higher level or receiving APC.

After designating a single primary service for a claim, we evaluate that service in combination with each of the other procedure codes reported on the claim assigned to status indicator ''J1'' (or certain add-on codes) to determine if there are paired code combinations that meet the complexity adjustment criteria. For a new HCPCS code, we determine initial C–APC assignment and qualification for a complexity adjustment using the best available information, crosswalking the new HCPCS code to a predecessor code(s) when appropriate.

Once we have determined that a particular code combination of ''J1'' services (or combinations of ''J1'' services reported in conjunction with certain add-on codes) represents a complex version of the primary service because it is sufficiently costly, frequent, and a subset of the primary comprehensive service overall according to the criteria described above, we promote the claim including the complex version of the primary service as described by the code combination to the next higher cost C–APC within the clinical family, unless the primary service is already assigned to the highest cost APC within the C–APC clinical family or assigned to the only C–APC in a clinical family. We do not create new APCs with a comprehensive geometric mean cost that is higher than the highest geometric mean cost (or only) C–APC in a clinical family just to accommodate potential complexity adjustments. Therefore, the highest payment for any claim including a code combination for services assigned to a C–APC would be the highest paying C–APC in the clinical family (79 FR 66802).

We package payment for all add-on codes into the payment for the C–APC. However, certain primary service add-on combinations may qualify for a complexity adjustment. As noted in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70331), all add-on codes that can be appropriately reported in combination with a base code that describes a primary ''J1'' service are evaluated for a complexity adjustment.

To determine which combinations of primary service codes reported in conjunction with an add-on code may qualify for a complexity adjustment for CY 2023, we propose to apply the frequency and cost criteria thresholds discussed above, testing claims reporting one unit of a single primary service assigned to status indicator ''J1'' and any number of units of a single add-on code for the primary ''J1'' service. If the frequency and cost criteria thresholds for a complexity adjustment are met and reassignment to the next higher cost APC in the clinical family is appropriate (based on meeting the criteria outlined above), we make a complexity adjustment for the code combination; that is, we reassign the primary service code reported in conjunction with the add-on code to the next higher cost C–APC within the same clinical family of C–APCs. As previously stated, we package payment for add-on codes into the C–APC payment rate. If any add-on code reported in conjunction with the ''J1'' primary service code does not qualify for a complexity adjustment, payment for the add-on service continues to be packaged into the payment for the primary service and is not reassigned to the next higher cost C–APC. We list the complexity adjustments for ''J1'' and add-on code combinations for CY 2023, along with all of the other final complexity adjustments, in Addendum J to this proposed rule (which is available via the internet on the CMS website at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices*).

Addendum J to this proposed rule includes the cost statistics for each code combination that would qualify for a complexity adjustment (including primary code and add-on code combinations). Addendum J to this proposed rule also contains summary cost statistics for each of the paired code combinations that describe a complex code combination that would qualify for a complexity adjustment and are proposed to be reassigned to the next higher cost C–APC within the clinical family. The combined statistics for all proposed reassigned complex code combinations are represented by an alphanumeric code with the first four digits of the designated primary service followed by a letter. For example, the proposed geometric mean cost listed in Addendum J for the code combination described by complexity adjustment assignment 3320R, which is assigned to C–APC 5224 (Level 4 Pacemaker and Similar Procedures), includes all paired code combinations that are proposed to be reassigned to C–APC 5224 when CPT code 33208 is the primary code. Providing the information contained in Addendum J to this proposed rule allows stakeholders the opportunity to better assess the impact associated with the proposed assignment of claims with each of the paired code combinations eligible for a complexity adjustment.

(2) Exclusion of Procedures Assigned to New Technology APCs From the C–APC Policy

Services that are assigned to New Technology APCs are typically new procedures that do not have sufficient claims history to establish an accurate payment for them. Beginning in CY 2002, we retain services within New Technology APC groups until we gather sufficient claims data to enable us to assign the service to an appropriate clinical APC. This policy allows us to move a service from a New Technology APC in less than 2 years if sufficient data are available. It also allows us to retain a service in a New Technology APC for more than 2 years if sufficient data upon which to base a decision for reassignment have not been collected (82 FR 59277).

The C–APC payment policy packages payment for adjunctive and secondary items, services, and procedures into the most costly primary procedure under the OPPS at the claim level. Prior to CY 2019, when a procedure assigned to a New Technology APC was included on the claim with a primary procedure, identified by OPPS status indicator ''J1'', payment for the new technology service was typically packaged into the payment for the primary procedure. Because the new technology service was not separately paid in this scenario, the overall number of single claims available to determine an appropriate clinical APC for the new service was reduced. This was contrary to the objective of the New Technology APC payment policy, which is to gather sufficient claims data to enable us to assign the service to an appropriate clinical APC.

To address this issue and ensure that there are sufficient claims data for services assigned to New Technology APCs, in the CY 2019 OPPS/ASC final rule with comment period (83 FR 58847), we finalized excluding payment for any procedure that is assigned to a New Technology APC (APCs 1491 through 1599 and APCs 1901 through 1908) from being packaged when included on a claim with a ''J1'' service assigned to a C–APC. In the CY 2020 OPPS/ASC final rule with comment period, we finalized that beginning in CY 2020, payment for services assigned to a New Technology APC would be excluded from being packaged into the payment for comprehensive observation services assigned status indicator ''J2''

when they are included on a claim with a ''J2'' service (84 FR 61167). We propose to continue to exclude payment for any procedure that is assigned to a New Technology APC (APCs 1491 through 1599 and APCs 1901 through 1908) from being packaged when included on a claim with a ''J1'' or ''J2'' service assigned to a C–APC.

(3) Exclusion of Drugs and Biologicals Described by HCPCS Code C9399 (Unclassified Drugs or Biologicals) From the C–APC Policy

Section 1833(t)(15) of the Act, as added by section 621(a)(1) of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (Pub. L. 108–173), provides for payment under the OPPS for new drugs and biologicals until HCPCS codes are assigned. Under this provision, we are required to make payment for a covered outpatient drug or biological that is furnished as part of covered outpatient department services but for which a HCPCS code has not yet been assigned in an amount equal to 95 percent of average wholesale price (AWP) for the drug or biological.

In the CY 2005 OPPS/ASC final rule with comment period (69 FR 65805), we implemented section 1833(t)(15) of the Act by instructing hospitals to bill for a drug or biological that is newly approved by the FDA and that does not yet have a HCPCS code by reporting the National Drug Code (NDC) for the product along with the newly created HCPCS code C9399 (Unclassified drugs or biologicals). We explained that when HCPCS code C9399 appears on a claim, the Outpatient Code Editor (OCE) suspends the claim for manual pricing by the Medicare Administrative Contractor (MAC). The MAC prices the claim at 95 percent of the drug or biological's AWP, using Red Book or an equivalent recognized compendium, and processes the claim for payment. We emphasized that this approach enables hospitals to bill and receive payment for a new drug or biological concurrent with its approval by the FDA. The hospital does not have to wait for the next quarterly release or for approval of a product-specific HCPCS code to receive payment for a newly approved drug or biological or to resubmit claims for adjustment. We instructed that hospitals would discontinue billing HCPCS code C9399 and the NDC upon implementation of a product specific HCPCS code, status indicator, and appropriate payment amount with the next quarterly update. We also note that HCPCS code C9399 is paid in a similar manner in the ASC setting, as 42 CFR 416.171(b) outlines that certain drugs and biologicals for which separate payment is allowed under the OPPS are considered covered ancillary services for which the OPPS payment rate, which is 95 percent of AWP for HCPCS code C9399, applies. Since the implementation of the C–APC policy in 2015, payment for drugs and biologicals described by HCPCS code C9399 has been included in the C–APC payment when these products appear on a claim with a primary C–APC service. Packaging payment for these drugs and biologicals that appear on a hospital outpatient claim with a primary C–APC service is consistent with our C–APC packaging policy under which we make payment for all items and services, including all non-pass-through drugs, reported on the hospital outpatient claim as being integral, ancillary, supportive, dependent, and adjunctive to the primary service and representing components of a complete comprehensive service, with certain limited exceptions (78 FR 74869). It has been our position that the total payment for the C–APC with which payment for a drug or biological described by HCPCS code C9399 is packaged includes payment for the drug or biological at 95 percent of its AWP.

However, we have determined that in certain instances, drugs and biologicals described by HCPCS code C9399 are not being paid at 95 percent of their AWPs when payment for them is packaged with payment for a primary C–APC service. In order to ensure payment for new drugs, biologicals, and radiopharmaceuticals described by HCPCS code C9399 at 95 percent of their AWP, for CY 2023 and subsequent years, we propose to exclude any drug, biological, or radiopharmaceutical described by HCPCS code C9399 from packaging when the drug, biological, or radiopharmaceutical is included on a claim with a ''J1'' service, which is the status indicator assigned to a C–APC, and a claim with a ''J2'' service, which is the status indicator assigned to comprehensive observation services. Please see OPPS Addendum J for the proposed CY 2023 comprehensive APC payment policy exclusions.

We are also including a corresponding proposal in section XI ''Proposed CY 2023 OPPS Payment Status and Comment Indicators'', to add a new definition to status indicator ''A'' to include unclassified drugs and biologicals that are reportable with HCPCS code C9399. The proposed definition, found in Addendum D1 to this proposed rule, would ensure the MAC prices claims for drugs, biologicals or radiopharmaceuticals billed with HCPCS code C9399 at 95 percent of the drug or biological's AWP and pays separately for the drug, biological, or radiopharmaceutical under the OPPS when it appears on the same claim as a primary C–APC service.

(4) Additional C–APCs for CY 2023

For CY 2023, we propose to continue to apply the C–APC payment policy methodology. We refer readers to the CY 2017 OPPS/ASC final rule with comment period (81 FR 79583) for a discussion of the C–APC payment policy methodology and revisions.

Each year, in accordance with section 1833(t)(9)(A) of the Act, we review and revise the services within each APC group and the APC assignments under the OPPS. As a result of our annual review of the services and the APC assignments under the OPPS, we propose to add one C–APC under the existing C–APC payment policy in CY 2023: Proposed C–APC 5372 (Level 2 Urology and Related Services). This APC was selected to be included in this proposed rule because, similar to other C–APCs, this APC includes primary, comprehensive services, such as major surgical procedures, that are typically reported with other ancillary and adjunctive services. Also, similar to other clinical APCs that have been converted to C–APCs, there are higher APC levels (Levels 3–8 Urology and Related Services) within the clinical family or related clinical family of this APC that have previously been converted to C–APCs.

Table 1 below lists the proposed C–APCs for CY 2023. All C–APCs are displayed in Addendum J to this proposed rule (which is available via the internet on the CMS website). Addendum J to this proposed rule also contains all of the data related to the C–APC payment policy methodology, including the list of complexity adjustments and other information.

C-APC Clinical Family Descriptor Key:

AENDO = Airway Endoscopy
AICDP = Automatic Implantable Cardiac Defibrillators, Pacemakers, and Related Devices.
BREAS = Breast Surgery
COCHL = Cochlear Implant
EBIDX = Excision/ Biopsy/Incision and Drainage
ENTXX = ENT Procedures
EPHYS = Cardiac Electrophysiology
EVASC = Endovascular Procedures
EXEYE = Extraocular Ophthalmic Surgery
GIXXX = Gastrointestinal Procedures
GYNXX = Gynecologic Procedures
INEYE = Intraocular Surgery
LAPXX = Laparoscopic Procedures
NERVE = Nerve Procedures
NSTIM = Neurostimulators
ORTHO = Orthopedic Surgery
PUMPS = Implantable Drug Delivery Systems
RADTX = Radiation Oncology
SCTXX = Stem Cell Transplant
UROXX = Urologic Procedures
VASCX = Vascular Procedures
WPMXX = Wireless PA Pressure Monitor

BILLING CODE 4120–01–C

c. Calculation of Composite APC Criteria-Based Costs

As discussed in the CY 2008 OPPS/ASC final rule with comment period (72 FR 66613), we believe it is important that the OPPS enhance incentives for hospitals to provide necessary, high quality care as efficiently as possible. For CY 2008, we developed composite APCs to provide a single payment for groups of services that are typically performed together during a single clinical encounter and that result in the provision of a complete service. Combining payment for multiple, independent services into a single OPPS payment in this way enables hospitals to manage their resources with maximum flexibility by monitoring and adjusting the volume and efficiency of services themselves. An additional advantage to the composite APC model is that we can use data from correctly coded multiple procedure claims to calculate payment rates for the specified combinations of services, rather than relying upon single procedure claims which may be low in volume and/or incorrectly coded. Under the OPPS, we currently have composite policies for mental health services and multiple imaging services. We refer readers to the CY 2008 OPPS/ASC final rule with comment period (72 FR 66611 through 66614 and 66650 through 66652) for a full discussion of the development of the composite APC methodology, and the CY 2012 OPPS/ASC final rule with comment period (76 FR 74163) and the CY 2018 OPPS/ASC final rule with comment period (82 FR 59241 through 59242 and 59246 through 52950) for more recent background.

(1) Mental Health Services Composite APC

We propose to continue our longstanding policy of limiting the aggregate payment for specified less resource-intensive mental health services furnished on the same date to the payment for a day of partial hospitalization services provided by a hospital, which we consider to be the most resource-intensive of all outpatient mental health services. We refer readers to the April 7, 2000 OPPS final rule with comment period (65 FR 18452 through 18455) for the initial discussion of this longstanding policy and the CY 2012 OPPS/ASC final rule with comment period (76 FR 74168) for more recent background.

In the CY 2018 OPPS/ASC proposed rule and final rule with comment period (82 FR 33580 through 33581 and 59246 through 59247, respectively), we proposed and finalized the policy for CY 2018 and subsequent years that, when the aggregate payment for specified mental health services provided by one hospital to a single beneficiary on a single date of service, based on the payment rates associated with the APCs for the individual services, exceeds the maximum per diem payment rate for partial hospitalization services provided by a hospital, those specified mental health services will be paid through composite APC 8010 (Mental Health Services Composite). In addition, we set the payment rate for composite APC 8010 for CY 2018 at the same payment rate that will be paid for APC 5863, which is the maximum partial hospitalization per diem payment rate for a hospital, and finalized a policy that the hospital will continue to be paid the payment rate for composite APC 8010. Under this policy, the I/OCE will continue to determine whether to pay for these specified mental health services individually, or to make a single payment at the same payment rate established for APC 5863 for all of the specified mental health services furnished by the hospital on that single date of service. We continue to believe that the costs associated with administering a partial hospitalization program at a hospital represent the most resource intensive of all outpatient mental health services. Therefore, we do not believe that we should pay more for mental health services under the OPPS than the highest partial hospitalization per diem payment rate for hospitals.

We propose that when the aggregate payment for specified mental health services provided by one hospital to a single beneficiary on a single date of service, based on the payment rates associated with the APCs for the individual services, exceeds the maximum per diem payment rate for partial hospitalization services provided by a hospital, those specified mental health services would be paid through composite APC 8010 for CY 2023. In addition, we propose to set the payment rate for composite APC 8010 at the same payment rate that we propose for APC 5863, which is the maximum partial hospitalization per diem payment rate for a hospital, and that the hospital continue to be paid the proposed payment rate for composite APC 8010.

(2) Multiple Imaging Composite APCs (APCs 8004, 8005, 8006, 8007, and 8008)

Effective January 1, 2009, we provide a single payment each time a hospital submits a claim for more than one imaging procedure within an imaging family on the same date of service, to reflect and promote the efficiencies hospitals can achieve when performing multiple imaging procedures during a single session (73 FR 41448 through 41450). We utilize three imaging families based on imaging modality for purposes of this methodology: (1) ultrasound; (2) computed tomography (CT) and computed tomographic angiography (CTA); and (3) magnetic resonance imaging (MRI) and magnetic resonance angiography (MRA). The HCPCS codes subject to the multiple imaging composite policy and their respective families are listed in Table 2 below.

While there are three imaging families, there are five multiple imaging composite APCs due to the statutory requirement under section 1833(t)(2)(G) of the Act that we differentiate payment for OPPS imaging services provided with and without contrast. While the ultrasound procedures included under the policy do not involve contrast, both CT/CTA and MRI/MRA scans can be provided either with or without contrast. The five multiple imaging composite APCs established in CY 2009 are:

- APC 8004 (Ultrasound Composite);
- APC 8005 (CT and CTA without Contrast Composite);
- APC 8006 (CT and CTA with Contrast Composite);
- APC 8007 (MRI and MRA without Contrast Composite); and
- APC 8008 (MRI and MRA with Contrast Composite).

We define the single imaging session for the ''with contrast'' composite APCs as having at least one or more imaging procedures from the same family performed with contrast on the same date of service. For example, if the hospital performs an MRI without contrast during the same session as at least one other MRI with contrast, the hospital will receive payment based on the payment rate for APC 8008, the ''with contrast'' composite APC.

We make a single payment for those imaging procedures that qualify for payment based on the composite APC payment rate, which includes any packaged services furnished on the same date of service. The standard (noncomposite) APC assignments continue to apply for single imaging procedures and multiple imaging procedures performed across families. For a full discussion of the development of the multiple imaging composite APC methodology, we refer readers to the CY 2009 OPPS/ASC final rule with comment period (73 FR 68559 through 68569).

For CY 2023, we propose to continue to pay for all multiple imaging

procedures within an imaging family performed on the same date of service using the multiple imaging composite APC payment methodology. We continue to believe that this policy would reflect and promote the efficiencies hospitals can achieve when performing multiple imaging procedures during a single session.

For CY 2023, except where otherwise indicated, we propose to use the costs derived from CY 2021 claims data to set the proposed CY 2023 payment rates. Therefore, for CY 2023, the payment rates for the five multiple imaging composite APCs (APCs 8004, 8005, 8006, 8007, and 8008) are based on proposed geometric mean costs calculated from CY 2021 claims available for this proposed rule that qualify for composite payment under the current policy (that is, those claims reporting more than one procedure within the same family on a single date of service). To calculate the proposed geometric mean costs, we use the same methodology that we use to calculate the geometric mean costs for these composite APCs since CY 2014, as described in the CY 2014 OPPS/ASC final rule with comment period (78 FR 74918). The imaging HCPCS codes referred to as ''overlap bypass codes'' that we removed from the bypass list for purposes of calculating the proposed multiple imaging composite APC geometric mean costs, in accordance with our established methodology as stated in the CY 2014 OPPS/ASC final rule with comment period (78 FR 74918), are identified by asterisks in Addendum N to this proposed rule (which is available via the internet on the CMS website [1]) and are discussed in more detail in section II.A.1.b of this proposed rule,

For CY 2023, we are able to identify approximately 0.95 million ''single session'' claims out of an estimated 2.0 million potential claims for payment through composite APCs from our ratesetting claims data, which represents approximately 47.5 percent of all eligible claims, to calculate the proposed CY 2023 geometric mean costs for the multiple imaging composite APCs. Table 2 of this proposed rule lists the proposed HCPCS codes that would be subject to the multiple imaging composite APC policy and their respective families and approximate composite APC proposed geometric mean costs for CY 2023.

C8936	MRA, w/o&w/dye, upper extr
* If a "without contrast" MRI or MRA procedure is performed during the same session as a "with contrast" MRI or MRA procedure, the I/OCE assigns the procedure to APC 8008 rather than APC 8007.	

BILLING CODE 4120–01–C

3. Changes to Packaged Items and Services

a. Background and Rationale for Packaging in the OPPS

Like other prospective payment systems, the OPPS relies on the concept of averaging to establish a payment rate for services. The payment may be more or less than the estimated cost of providing a specific service or a bundle of specific services for a particular beneficiary. The OPPS packages payments for multiple interrelated items and services into a single payment to create incentives for hospitals to furnish services most efficiently and to manage their resources with maximum flexibility. Our packaging policies support our strategic goal of using larger payment bundles in the OPPS to maximize hospitals' incentives to provide care in the most efficient manner. For example, where there are a variety of devices, drugs, items, and supplies that could be used to furnish a service, some of which are more costly than others, packaging encourages hospitals to use the most cost-efficient item that meets the patient's needs, rather than to routinely use a more expensive item, which may occur if separate payment is provided for the item.

Packaging also encourages hospitals to effectively negotiate with manufacturers and suppliers to reduce the purchase price of items and services or to explore alternative group purchasing arrangements, thereby encouraging the most economical health care delivery. Similarly, packaging encourages hospitals to establish protocols that ensure that necessary services are furnished, while scrutinizing the services ordered by practitioners to maximize the efficient use of hospital resources. Packaging payments into larger payment bundles promotes the predictability and accuracy of payment for services over time. Finally, packaging may reduce the importance of refining service-specific payment because packaged payments include costs associated with higher cost cases requiring many ancillary items and services and lower cost cases requiring fewer ancillary items and services. Because packaging encourages efficiency and is an essential component of a prospective payment system, packaging payments for items and services that are typically integral, ancillary, supportive, dependent, or adjunctive to a primary service has been a fundamental part of the OPPS since its implementation in August 2000. As we continue to develop larger payment groups that more broadly reflect services provided in an encounter or episode of care, we have expanded the OPPS packaging policies. Most, but not necessarily all, categories of items and services currently packaged in the OPPS are listed in 42 CFR 419.2(b). Our overarching goal is to make payments for all services under the OPPS more consistent with those of a prospective payment system and less like those of a per-service fee schedule, which pays separately for each coded item. As a part of this effort, we have continued to examine the payment for items and services provided under the OPPS to determine which OPPS services can be packaged to further achieve the objective of advancing the OPPS toward a more prospective payment system.

b. Proposal and Comment Solicitation on Packaged Items and Services

For CY 2023, we examined the items and services currently provided under the OPPS, reviewing categories of integral, ancillary, supportive, dependent, or adjunctive items and services for which we believe payment would be appropriately packaged into payment for the primary service that they support. Specifically, we examined the HCPCS code definitions (including CPT code descriptors) and hospital outpatient department billing patterns to determine whether there were categories of codes for which packaging would be appropriate according to existing OPPS packaging policies or a logical expansion of those existing OPPS packaging policies.

For CY 2023, we are not proposing any changes to the overall packaging policy previously discussed. We propose to continue to conditionally package the costs of selected newly identified ancillary services into payment for a primary service where we believe that the packaged item or service is integral, ancillary, supportive, dependent, or adjunctive to the provision of care that was reported by the primary service HCPCS code.

While we are not proposing any changes to the overall packaging policy above, we are soliciting comments on potential modifications to our packaging policy, as described in section XIII.E.5 of this proposed rule. Specifically, we are seeking comments and data regarding whether to expand the current ASC payment system policy for non-opioid pain management drugs and biologicals that function as surgical supplies to the HOPD setting. Details on the current ASC policy can be found in XIII.E.

4. Calculation of OPPS Scaled Payment Weights

We established a policy in the CY 2013 OPPS/ASC final rule with comment period (77 FR 68283) of using geometric mean-based APC costs to calculate relative payment weights under the OPPS. In the CY 2022 OPPS/ASC final rule with comment period (85 FR 63497 through 63498), we applied this policy and calculated the relative payment weights for each APC for CY 2022 that were shown in Addenda A and B of the CY 2022 OPPS/ASC final rule with comment period (which were made available via the internet on the CMS website) using the APC costs discussed in sections II.A.1. and II.A.2. of the CY 2022 OPPS/ASC final rule with comment period. For CY 2023, as we did for CY 2022, we propose to continue to apply the policy established in CY 2013 and calculate relative payment weights for each APC for CY 2023 using geometric mean-based APC costs.

For CY 2012 and CY 2013, outpatient clinic visits were assigned to one of five levels of clinic visit APCs, with APC 0606 representing a mid-level clinic visit. In the CY 2014 OPPS/ASC final rule with comment period (78 FR 75036 through 75043), we finalized a policy that created alphanumeric HCPCS code G0463 (Hospital outpatient clinic visit for assessment and management of a patient), representing any and all clinic visits under the OPPS. HCPCS code G0463 was assigned to APC 0634 (Hospital Clinic Visits). We also finalized a policy to use CY 2012 claims data to develop the CY 2014 OPPS payment rates for HCPCS code G0463 based on the total geometric mean cost of the levels one through five CPT E/M codes for clinic visits previously recognized under the OPPS (CPT codes 99201 through 99205 and 99211 through 99215). In addition, we finalized a policy to no longer recognize a distinction between new and established patient clinic visits.

For CY 2016, we deleted APC 0634 and reassigned the outpatient clinic visit HCPCS code G0463 to APC 5012 (Level 2 Examinations and Related Services) (80 FR 70372). For CY 2023, as we did for CY 2022, we proposed to continue to standardize all of the relative payment weights to APC 5012. We believe that standardizing relative payment weights to the geometric mean of the APC to which HCPCS code G0463 is assigned maintains consistency in calculating unscaled weights that represent the cost of some of the most frequently provided OPPS services. For CY 2023, as we did for CY 2022, we

proposed to assign APC 5012 a relative payment weight of 1.00 and to divide the geometric mean cost of each APC by the geometric mean cost for APC 5012 to derive the unscaled relative payment weight for each APC. The choice of the APC on which to standardize the relative payment weights does not affect payments made under the OPPS because we scale the weights for budget neutrality.

We note that in the CY 2019 OPPS/ASC final rule with comment period (83 FR 59004 through 59015) and the CY 2020 OPPS/ASC final rule with comment period (84 FR 61365 through 61369), we discuss our policy, implemented beginning on January 1, 2019, to control for unnecessary increases in the volume of covered outpatient department services by paying for clinic visits furnished at excepted off-campus provider-based departments (PBDs) at a reduced rate. While the volume associated with these visits is included in the impact model, and thus used in calculating the weight scalar, the policy has a negligible effect on the scalar. Specifically, under this policy, there is no change to the relativity of the OPPS payment weights because the adjustment is made at the payment level rather than in the cost modeling. Further, under this policy, the savings that result from the change in payments for these clinic visits are not budget neutral. Therefore, the impact of this policy will generally not be reflected in the budget neutrality adjustments, whether the adjustment is to the OPPS relative weights or to the OPPS conversion factor. For a full discussion of this policy, we refer readers to the CY 2020 OPPS/ASC final rule with comment period (84 FR 61142).

Section 1833(t)(9)(B) of the Act requires that APC reclassification and recalibration changes, wage index changes, and other adjustments be made in a budget neutral manner. Budget neutrality ensures that the estimated aggregate weight under the OPPS for CY 2023 is neither greater than nor less than the estimated aggregate weight that would have been calculated without the changes. To comply with this requirement concerning the APC changes, we propose to compare the estimated aggregate weight using the CY 2022 scaled relative payment weights to the estimated aggregate weight using the proposed CY 2023 unscaled relative payment weights.

For CY 2022, we multiplied the CY 2022 scaled APC relative payment weight applicable to a service paid under the OPPS by the volume of that service from CY 2021 claims to calculate the total relative payment weight for each service. We then added together the total relative payment weight for each of these services in order to calculate an estimated aggregate weight for the year. For CY 2023, we propose to apply the same process using the estimated CY 2023 unscaled relative payment weights rather than scaled relative payment weights. We propose to calculate the weight scalar by dividing the CY 2022 estimated aggregate weight by the unscaled CY 2023 estimated aggregate weight.

For a detailed discussion of the weight scalar calculation, we refer readers to the OPPS claims accounting document available on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html*. Click on the link labeled ''CY 2023 OPPS/ASC Notice of Proposed Rulemaking'', which can be found under the heading ''Hospital Outpatient Prospective Payment System Rulemaking'' and open the claims accounting document link at the bottom of the page, which is labeled ''2023 NPRM OPPS Claims Accounting (PDF)''.

We propose to compare the estimated unscaled relative payment weights in CY 2023 to the estimated total relative payment weights in CY 2022 using CY 2021 claims data, holding all other components of the payment system constant to isolate changes in total weight. Based on this comparison, we propose to adjust the calculated CY 2023 unscaled relative payment weights for purposes of budget neutrality. We propose to adjust the estimated CY 2023 unscaled relative payment weights by multiplying them by a proposed weight scalar of 1.4152 to ensure that the proposed CY 2023 relative payment weights are scaled to be budget neutral. The proposed CY 2023 relative payment weights listed in Addenda A and B to this proposed rule (which are available via the internet on the CMS website) are scaled and incorporate the recalibration adjustments discussed in sections II.A.1 and II.A.2 of this proposed rule.

Section 1833(t)(14) of the Act provides the payment rates for certain specified covered outpatient drugs (SCODs). Section 1833(t)(14)(H) of the Act provides that additional expenditures resulting from this paragraph shall not be taken into account in establishing the conversion factor, weighting, and other adjustment factors for 2004 and 2005 under paragraph (9), but shall be taken into account for subsequent years. Therefore, the cost of those SCODs (as discussed in section V.B.2 of this proposed rule) is included in the budget neutrality calculations for the CY 2023 OPPS.

B. Proposed Conversion Factor Update

Section 1833(t)(3)(C)(ii) of the Act requires the Secretary to update the conversion factor used to determine the payment rates under the OPPS on an annual basis by applying the OPD rate increase factor. For purposes of section 1833(t)(3)(C)(iv) of the Act, subject to sections 1833(t)(17) and 1833(t)(3)(F) of the Act, the OPD rate increase factor is equal to the hospital inpatient market basket percentage increase applicable to hospital discharges under section 1886(b)(3)(B)(iii) of the Act. In the FY 2023 IPPS/LTCH PPS proposed rule (87 FR 28402), consistent with current law, based on IHS Global, Inc.'s fourth quarter 2021 forecast of the FY 2023 market basket increase, the proposed FY 2023 IPPS market basket update was 3.1 percent. We note that under our regular process for the CY 2023 OPPS/ASC final rule, we will use the market basket update for the FY 2023 IPPS/LTCH PPS final rule, which would be based on IHS Global, Inc.'s second quarter 2022 forecast of the FY 2023 market basket increase. If that forecast is higher than the market basket used for this proposed rule, the CY 2023 OPPS/ASC final rule OPD rate increase factor will reflect that higher market basket estimate.

Specifically, section 1833(t)(3)(F)(i) of the Act requires that, for 2012 and subsequent years, the OPD fee schedule increase factor under subparagraph (C)(iv) be reduced by the productivity adjustment described in section 1886(b)(3)(B)(xi)(II) of the Act. Section 1886(b)(3)(B)(xi)(II) of the Act defines the productivity adjustment as equal to the 10-year moving average of changes in annual economy-wide, private nonfarm business multifactor productivity (MFP) (as projected by the Secretary for the 10-year period ending with the applicable fiscal year, year, cost reporting period, or other annual period) (the ''MFP adjustment''). In the FY 2012 IPPS/LTCH PPS final rule (76 FR 51689 through 51692), we finalized our methodology for calculating and applying the MFP adjustment, and then revised this methodology, as discussed in the FY 2016 IPPS/LTCH PPS final rule (80 FR 49509). In the FY 2023 IPPS/LTCH PPS proposed rule (87 FR 28402), the proposed MFP adjustment for FY 2023 was 0.4 percentage point.

Therefore, we propose that the MFP adjustment for the CY 2023 OPPS will be 0.4 percentage point. We also propose that if more recent data become subsequently available after the publication of the CY 2023 OPPS/ASC proposed rule (for example, a more

recent estimate of the market basket increase and/or the MFP adjustment), we would use such updated data, if appropriate, to determine the CY 2023 market basket update and the MFP adjustment, which are components in calculating the OPD fee schedule increase factor under sections 1833(t)(3)(C)(iv) and 1833(t)(3)(F) of the Act, in the CY 2023 OPPS/ASC final rule.

We note that section 1833(t)(3)(F) of the Act provides that application of this subparagraph may result in the OPD fee schedule increase factor under section 1833(t)(3)(C)(iv) of the Act being less than 0.0 percent for a year, and may result in OPPS payment rates being less than rates for the preceding year. As described in further detail below, we propose for CY 2023 an OPD fee schedule increase factor of 2.7 percent for the CY 2023 OPPS (which is the proposed estimate of the hospital inpatient market basket percentage increase of 3.1 percent, less the proposed 0.4 percentage point MFP adjustment).

We propose that hospitals that fail to meet the Hospital OQR Program reporting requirements would be subject to an additional reduction of 2.0 percentage points from the OPD fee schedule increase factor adjustment to the conversion factor that would be used to calculate the OPPS payment rates for their services, as required by section 1833(t)(17) of the Act. For further discussion of the Hospital OQR Program, we refer readers to section XIV of this proposed rule.

To set the OPPS conversion factor for 2023, we propose to increase the CY 2022 conversion factor of $84.177 by 2.7 percent. In accordance with section 1833(t)(9)(B) of the Act, we proposed further to adjust the conversion factor for CY 2023 to ensure that any revisions made to the wage index and rural adjustment are made on a budget neutral basis. We propose to calculate an overall budget neutrality factor of 1.0010 for wage index changes by comparing proposed total estimated payments from our simulation model using the proposed FY 2023 IPPS wage indexes to those payments using the FY 2022 IPPS wage indexes, as adopted on a calendar year basis for the OPPS. We further propose to calculate an additional budget neutrality factor of 0.9995 to account for our proposed policy to cap wage index reductions for hospitals at 5 percent on an annual basis.

For the CY 2023 OPPS, we propose to maintain the current rural adjustment policy, as discussed in section II.E. of this proposed rule. Therefore, the proposed budget neutrality factor for the rural adjustment is 1.0000.

We propose to continue previously established policies for implementing the cancer hospital payment adjustment described in section 1833(t)(18) of the Act, as discussed in section II.F of this proposed rule. We propose to calculate a CY 2023 budget neutrality adjustment factor for the cancer hospital payment adjustment by comparing estimated total CY 2023 payments under section 1833(t) of the Act, including the proposed CY 2023 cancer hospital payment adjustment, to estimated CY 2023 total payments using the CY 2022 final cancer hospital payment adjustment, as required under section 1833(t)(18)(B) of the Act. The proposed CY 2023 estimated payments applying the proposed CY 2023 cancer hospital payment adjustment were the same as estimated payments applying the CY 2022 final cancer hospital payment adjustment. Therefore, we propose to apply a budget neutrality adjustment factor of 1.0000 to the conversion factor for the cancer hospital payment adjustment. In accordance with section 1833(t)(18)(C), as added by section 16002(b) of the 21st Century Cures Act (Pub. L. 114–255), we are applying a budget neutrality factor calculated as if the proposed cancer hospital adjustment target payment-to-cost ratio was 0.90, not the 0.89 target payment-to-cost ratio we applied as stated in section II.F. of this proposed rule.

We estimate that proposed pass-through spending for drugs, biologicals, and devices for CY 2023 would equal approximately $772.0 million, which represents 0.90 percent of total projected CY 2023 OPPS spending. Therefore, the proposed conversion factor would be adjusted by the difference between the 1.24 percent estimate of pass-through spending for CY 2022 and the 0.90 percent estimate of proposed pass-through spending for CY 2023, resulting in a proposed increase to the conversion factor for CY 2023 of 0.34 percent.

Proposed estimated payments for outliers would remain at 1.0 percent of total OPPS payments for CY 2023. We estimate for the proposed rule that outlier payments would be approximately 1.29 percent of total OPPS payments in CY 2022; the 1.00 percent for proposed outlier payments in CY 2023 would constitute a 0.29 percent decrease in payment in CY 2023 relative to CY 2022.

We also propose to make an OPPS budget neutrality adjustment of 0.01 percent of the OPPS for the estimated spending of $8.3 million associated with the proposed payment adjustment under the CY 2023 OPPS for domestic NIOSH-approved surgical N95 respirators, as discussed in section X.H of this proposed rule.

For CY 2023, we also propose that hospitals that fail to meet the reporting requirements of the Hospital OQR Program would continue to be subject to a further reduction of 2.0 percentage points to the OPD fee schedule increase factor. For hospitals that fail to meet the requirements of the Hospital OQR Program, we proposed to make all other adjustments discussed above, but use a reduced OPD fee schedule update factor of 0.7 percent (that is, the proposed OPD fee schedule increase factor of 2.7 percent further reduced by 2.0 percentage points). This would result in a proposed reduced conversion factor for CY 2023 of $85.093 for hospitals that fail to meet the Hospital OQR Program requirements (a difference of −1.692 in the conversion factor relative to hospitals that met the requirements).

In summary, for 2023, we propose to use a reduced conversion factor of $85.093 in the calculation of payments for hospitals that fail to meet the Hospital OQR Program requirements (a difference of −1.692 in the conversion factor relative to hospitals that met the requirements).

For 2023, we propose to use a conversion factor of $86.785 in the calculation of the national unadjusted payment rates for those items and services for which payment rates are calculated using geometric mean costs; that is, the proposed OPD fee schedule increase factor of 2.7 percent for CY 2023, the required proposed wage index budget neutrality adjustment of approximately 1.0010, the proposed 5 percent annual cap for individual hospital wage index reductions adjustment of approximately 0.9995, the proposed cancer hospital payment adjustment of 1.0000, the proposed adjustment to account for the 0.01 percentage point of OPPS spending associated with the payment adjustment for domestic NIOSH-approved surgical N95 respirators, and the proposed adjustment of an increase of 0.34 percentage point of projected OPPS spending for the difference in pass-through spending, which that result in a proposed conversion factor for CY 2023 of $86.785.

C. Proposed Wage Index Changes

Section 1833(t)(2)(D) of the Act requires the Secretary to determine a wage adjustment factor to adjust the portion of payment and coinsurance attributable to labor-related costs for relative differences in labor and labor-related costs across geographic regions

in a budget neutral manner (codified at 42 CFR 419.43(a)). This portion of the OPPS payment rate is called the OPPS labor-related share. Budget neutrality is discussed in section II.B of this proposed rule.

The OPPS labor-related share is 60 percent of the national OPPS payment. This labor-related share is based on a regression analysis that determined that, for all hospitals, approximately 60 percent of the costs of services paid under the OPPS were attributable to wage costs. We confirmed that this labor-related share for outpatient services is appropriate during our regression analysis for the payment adjustment for rural hospitals in the CY 2006 OPPS final rule with comment period (70 FR 68553). We propose to continue this policy for the CY 2023 OPPS. We refer readers to section II.H of this proposed rule for a description and an example of how the wage index for a particular hospital is used to determine payment for the hospital.

As discussed in the claims accounting narrative included with the supporting documentation for this proposed rule (which is available via the internet on the CMS website), for estimating APC costs, we would standardize 60 percent of estimated claims costs for geographic area wage variation using the same FY 2023 pre-reclassified wage index that we use under the IPPS to standardize costs. This standardization process removes the effects of differences in area wage levels from the determination of a national unadjusted OPPS payment rate and copayment amount.

Under 42 CFR 419.41(c)(1) and 419.43(c) (published in the OPPS April 7, 2000 final rule with comment period (65 FR 18495 and 18545)), the OPPS adopted the final fiscal year IPPS post-reclassified wage index as the calendar year wage index for adjusting the OPPS standard payment amounts for labor market differences. Therefore, the wage index that applies to a particular acute care, short-stay hospital under the IPPS also applies to that hospital under the OPPS. As initially explained in the September 8, 1998 OPPS proposed rule (63 FR 47576), we believe that using the IPPS wage index as the source of an adjustment factor for the OPPS is reasonable and logical, given the inseparable, subordinate status of the HOPD within the hospital overall. In accordance with section 1886(d)(3)(E) of the Act, the IPPS wage index is updated annually.

The Affordable Care Act contained several provisions affecting the wage index. These provisions were discussed in the CY 2012 OPPS/ASC final rule with comment period (76 FR 74191). Section 10324 of the Affordable Care Act added section 1886(d)(3)(E)(iii)(II) to the Act, which defines a frontier State and amended section 1833(t) of the Act to add paragraph (19), which requires a frontier State wage index floor of 1.00 in certain cases, and states that the frontier State floor shall not be applied in a budget neutral manner. We codified these requirements at § 419.43(c)(2) and (3) of our regulations. For 2023, we propose to implement this provision in the same manner as we have since CY 2011. Under this policy, the frontier State hospitals would receive a wage index of 1.00 if the otherwise applicable wage index (including reclassification, the rural floor, and rural floor budget neutrality) is less than 1.00. Because the HOPD receives a wage index based on the geographic location of the specific inpatient hospital with which it is associated, the frontier State wage index adjustment applicable for the inpatient hospital also would apply for any associated HOPD. We refer readers to the FY 2011 through FY 2022 IPPS/LTCH PPS final rules for discussions regarding this provision, including our methodology for identifying which areas meet the definition of ''frontier States'' as provided for in section 1886(d)(3)(E)(iii)(II) of the Act: for FY 2011, 75 FR 50160 through 50161; for FY 2012, 76 FR 51793, 51795, and 51825; for FY 2013, 77 FR 53369 through 53370; for FY 2014, 78 FR 50590 through 50591; for FY 2015, 79 FR 49971; for FY 2016, 80 FR 49498; for FY 2017, 81 FR 56922; for FY 2018, 82 FR 38142; for FY 2019, 83 FR 41380; for FY 2020, 84 FR 42312; for FY 2021, 85 FR 58765; and for FY 2022, 86 FR 45178.

In addition to the changes required by the Affordable Care Act, we note that the proposed FY 2023 IPPS wage indexes continue to reflect a number of adjustments implemented in past years, including, but not limited to, reclassification of hospitals to different geographic areas, the rural floor provisions, the imputed floor wage index adjustment in all-urban states, an adjustment for occupational mix, an adjustment to the wage index based on commuting patterns of employees (the out-migration adjustment), and an adjustment to the wage index for certain low wage index hospitals to help address wage index disparities between low and high wage index hospitals. We refer readers to the FY 2023 IPPS/LTCH PPS proposed rule (87 FR 28357 through 28380) for a detailed discussion of all proposed changes to the FY 2023 IPPS wage indexes. We note in particular that in the FY 2023 IPPS/LTCH PPS proposed rule (87 FR 28377 through 28380), we proposed a permanent approach to smooth year-to-year decreases in hospitals' wage indexes. Specifically, for FY 2023 and subsequent years, we proposed to apply a 5-percent cap on any decrease to a hospital's wage index from its wage index in the prior FY, regardless of the circumstances causing the decline. That is, we proposed that a hospital's wage index for FY 2023 would not be less than 95 percent of its final wage index for FY 2022, and that for subsequent years, a hospital's wage index would not be less than 95 percent of its final wage index for the prior FY. We stated that we believe this policy would increase the predictability of IPPS payments for hospitals and mitigate instability and significant negative impacts to hospitals resulting from changes to the wage index. It would also eliminate the need for temporary and potentially uncertain transition adjustments to the wage index in the future due to specific policy changes or circumstances outside hospitals' control.

CBSAs are made up of one or more constituent counties. Each CBSA and constituent county has its own unique identifying codes. The FY 2018 IPPS/LTCH PPS final rule (82 FR 38130) discussed the two different lists of codes to identify counties: Social Security Administration (SSA) codes and Federal Information Processing Standard (FIPS) codes. Historically, CMS listed and used SSA and FIPS county codes to identify and crosswalk counties to CBSA codes for purposes of the IPPS and OPPS wage indexes. However, the SSA county codes are no longer being maintained and updated, although the FIPS codes continue to be maintained by the U.S. Census Bureau. The Census Bureau's most current statistical area information is derived from ongoing census data received since 2010; the most recent data are from 2015. The Census Bureau maintains a complete list of changes to counties or county equivalent entities on the website at: *https://www.census.gov/geo/reference/county-changes.html* (which, as of May 6, 2019, migrated to: *https://www.census.gov/programs-surveys/geography.html*). In the FY 2018 IPPS/LTCH PPS final rule (82 FR 38130), for purposes of crosswalking counties to CBSAs for the IPPS wage index, we finalized our proposal to discontinue the use of the SSA county codes and begin using only the FIPS county codes. Similarly, for the purposes of crosswalking counties to CBSAs for the OPPS wage index, in the CY 2018 OPPS/ASC final rule with comment period (82 FR 59260), we

finalized our proposal to discontinue the use of SSA county codes and begin using only the FIPS county codes. For CY 2023, under the OPPS, we are continuing to use only the FIPS county codes for purposes of crosswalking counties to CBSAs.

We propose to use the FY 2023 IPPS post-reclassified wage index for urban and rural areas as the wage index for the OPPS to determine the wage adjustments for both the OPPS payment rate and the copayment rate for CY 2023. Therefore, any policies and adjustments for the FY 2023 IPPS post-reclassified wage index, including, but not limited to, the 5-percent cap on any decrease to a hospital's wage index from its wage index in the prior FY described above, would be reflected in the final CY 2023 OPPS wage index beginning on January 1, 2023. We refer readers to the FY 2023 IPPS/LTCH PPS proposed rule (87 FR 28357 through 28380) and the proposed FY 2023 hospital wage index files posted on the CMS website at *https://www.cms.gov/medicare/acute-inpatient-pps/fy-2023-ipps-proposed-rule-home-page*. With regard to budget neutrality for the CY 2023 OPPS wage index, we refer readers to section II.B of this proposed rule. We continue to believe that using the IPPS post-reclassified wage index as the source of an adjustment factor for the OPPS is reasonable and logical, given the inseparable, subordinate status of the HOPD within the hospital overall.

Hospitals that are paid under the OPPS, but not under the IPPS, do not have an assigned hospital wage index under the IPPS. Therefore, for non-IPPS hospitals paid under the OPPS, it is our longstanding policy to assign the wage index that would be applicable if the hospital was paid under the IPPS, based on its geographic location and any applicable wage index policies and adjustments. We propose to continue this policy for CY 2023 and are including below a brief summary of the major proposed FY 2023 IPPS wage index policies and adjustments that we propose to apply to these hospitals under the OPPS for CY 2023. We refer readers to the FY 2023 IPPS/LTCH PPS proposed rule (87 FR 28357 through 28380) for a detailed discussion of the proposed changes to the FY 2023 IPPS wage indexes.

It has been our longstanding policy to allow non-IPPS hospitals paid under the OPPS to qualify for the out-migration adjustment if they are located in a section 505 out-migration county (section 505 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA)). Applying this adjustment is consistent with our policy of adopting IPPS wage index policies for hospitals paid under the OPPS. We note that, because non-IPPS hospitals cannot reclassify, they are eligible for the out-migration wage index adjustment if they are located in a section 505 out-migration county. This is the same out-migration adjustment policy that would apply if the hospital were paid under the IPPS. For CY 2023, we propose to continue our policy of allowing non-IPPS hospitals paid under the OPPS to qualify for the outmigration adjustment if they are located in a section 505 out-migration county (section 505 of the MMA). Furthermore, we propose that the wage index that would apply for CY 2023 to non-IPPS hospitals paid under the OPPS would continue to include the rural floor adjustment and any policies and adjustments applied to the IPPS wage index to address wage index disparities. In addition, the wage index that would apply to non-IPPS hospitals paid under the OPPS would include the 5 percent cap on wage index decreases that we may finalize for the FY 2023 IPPS wage index as discussed previously.

For CMHCs, for CY 2023, we propose to continue to calculate the wage index by using the post-reclassification IPPS wage index based on the CBSA where the CMHC is located. Furthermore, we propose that the wage index that would apply to a CMHC for CY 2023 would continue to include the rural floor adjustment and any policies and adjustments applied to the IPPS wage index to address wage index disparities. In addition, the wage index that would apply to CMHCs would include the 5 percent cap on wage index decreases that we may finalize for the FY 2023 IPPS wage index as discussed above. Also, we propose that the wage index that would apply to CMHCs would not include the outmigration adjustment because that adjustment only applies to hospitals.

Table 4A associated with the FY 2023 IPPS/LTCH PPS final rule (available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index*) identifies counties eligible for the out-migration adjustment. Table 2 associated with the FY 2023 IPPS/LTCH PPS final rule (available for download via the website above) identifies IPPS hospitals that receive the out-migration adjustment for FY 2023. We are including the outmigration adjustment information from Table 2 associated with the FY 2023 IPPS/LTCH PPS proposed rule as Addendum L to this proposed rule, with the addition of non-IPPS hospitals that would receive the section 505 outmigration adjustment under this proposed rule. Addendum L is available via the internet on the CMS website. We refer readers to the CMS website for the OPPS at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index*. At this link, readers will find a link to the proposed FY 2023 IPPS wage index tables and Addendum L.

D. Proposed Statewide Average Default Cost-to-Charge Ratios (CCRs)

In addition to using CCRs to estimate costs from charges on claims for ratesetting, we use overall hospital-specific CCRs calculated from the hospital's most recent cost report to determine outlier payments, payments for pass-through devices, and monthly interim transitional outpatient payments (TOPs) under the OPPS during the PPS year. For certain hospitals, under the regulations at 42 CFR 419.43(d)(5)(iii), we use the statewide average default CCRs to determine the payments mentioned earlier if it is not possible to determine an accurate CCR for a hospital in certain circumstances. This includes hospitals that are new, hospitals that have not accepted assignment of an existing hospital's provider agreement, and hospitals that have not yet submitted a cost report. We also use the statewide average default CCRs to determine payments for hospitals whose CCR falls outside the predetermined ceiling threshold for a valid CCR or for hospitals in which the most recent cost report reflects an all-inclusive rate status (Medicare Claims Processing Manual (Pub. 100–04), Chapter 4, Section 10.11).

We discussed our policy for using default CCRs, including setting the ceiling threshold for a valid CCR, in the CY 2009 OPPS/ASC final rule with comment period (73 FR 68594 through 68599) in the context of our adoption of an outlier reconciliation policy for cost reports beginning on or after January 1, 2009. For details on our process for calculating the statewide average CCRs, we refer readers to the CY 2023 OPPS proposed rule Claims Accounting document that is posted on our website. Due to concerns with cost report data as a result of the COVID–19 PHE, we propose to calculate the default ratios for CY 2023 using the June 2020 HCRIS cost reports, consistent with the broader proposal regarding CY 2023 OPPS ratesetting discussed in section X of this proposed rule.

We no longer publish a table in the **Federal Register** containing the statewide average CCRs in the annual OPPS proposed rule and final rule with comment period. These CCRs with the

upper limit will be available for download with each OPPS CY proposed rule and final rule on the CMS website. We refer readers to our website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.html*; click on the link on the left of the page titled ''Hospital Outpatient Regulations and Notices'' and then select the relevant regulation to download the statewide CCRs and upper limit in the Downloads section of the web page.

E. Proposed Adjustment for Rural Sole Community Hospitals (SCHs) and Essential Access Community Hospitals (EACHs) Under Section 1833(t)(13)(B) of the Act for CY 2023

In the CY 2006 OPPS final rule with comment period (70 FR 68556), we finalized a payment increase for rural sole community hospitals (SCHs) of 7.1 percent for all services and procedures paid under the OPPS, excluding drugs, biologicals, brachytherapy sources, and devices paid under the pass-through payment policy, in accordance with section 1833(t)(13)(B) of the Act, as added by section 411 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108–173). Section 1833(t)(13) of the Act provided the Secretary the authority to make an adjustment to OPPS payments for rural hospitals, effective January 1, 2006, if justified by a study of the difference in costs by APC between hospitals in rural areas and hospitals in urban areas. Our analysis showed a difference in costs for rural SCHs. Therefore, for the CY 2006 OPPS, we finalized a payment adjustment for rural SCHs of 7.1 percent for all services and procedures paid under the OPPS, excluding separately payable drugs and biologicals, brachytherapy sources, items paid at charges reduced to costs, and devices paid under the pass-through payment policy, in accordance with section 1833(t)(13)(B) of the Act.

In the CY 2007 OPPS/ASC final rule with comment period (71 FR 68010 and 68227), for purposes of receiving this rural adjustment, we revised our regulations at § 419.43(g) to clarify that essential access community hospitals (EACHs) are also eligible to receive the rural SCH adjustment, assuming these entities otherwise meet the rural adjustment criteria. Currently, two hospitals are classified as EACHs, and as of CY 1998, under section 4201(c) of Public Law 105–33, a hospital can no longer become newly classified as an EACH.

This adjustment for rural SCHs is budget neutral and applied before calculating outlier payments and copayments. We stated in the CY 2006 OPPS final rule with comment period (70 FR 68560) that we would not reestablish the adjustment amount on an annual basis, but we may review the adjustment in the future and, if appropriate, would revise the adjustment. We provided the same 7.1 percent adjustment to rural SCHs, including EACHs, again in CYs 2008 through 2022.

For CY 2023, we propose to continue the current policy of a 7.1 percent payment adjustment for rural SCHs, including EACHs, for all services and procedures paid under the OPPS, excluding separately payable drugs and biologicals, brachytherapy sources, items paid at charges reduced to costs, and devices paid under the pass-through payment policy, applied in a budget neutral manner.

F. Proposed Payment Adjustment for Certain Cancer Hospitals for CY 2023

1. Background

Since the inception of the OPPS, which was authorized by the Balanced Budget Act of 1997 (BBA) (Pub. L. 105–33), Medicare has paid the 11 hospitals that meet the criteria for cancer hospitals identified in section 1886(d)(1)(B)(v) of the Act under the OPPS for covered outpatient hospital services. These cancer hospitals are exempted from payment under the IPPS. With the Medicare, Medicaid and SCHIP Balanced Budget Refinement Act of 1999 (Pub. L. 106–113), the Congress added section 1833(t)(7), ''Transitional Adjustment to Limit Decline in Payment,'' to the Act, which requires the Secretary to determine OPPS payments to cancer and children's hospitals based on their pre-BBA payment amount (these hospitals are often referred to under this policy as ''held harmless'' and their payments are often referred to as ''hold harmless'' payments).

As required under section 1833(t)(7)(D)(ii) of the Act, a cancer hospital receives the full amount of the difference between payments for covered outpatient services under the OPPS and a ''pre-BBA amount.'' That is, cancer hospitals are permanently held harmless to their ''pre-BBA amount,'' and they receive transitional outpatient payments (TOPs) or hold harmless payments to ensure that they do not receive a payment that is lower in amount under the OPPS than the payment amount they would have received before implementation of the OPPS, as set forth in section 1833(t)(7)(F) of the Act. The ''pre-BBA amount'' is the product of the hospital's reasonable costs for covered outpatient services occurring in the current year and the base payment-to-cost ratio (PCR) for the hospital defined in section 1833(t)(7)(F)(ii) of the Act. The ''pre-BBA amount'' and the determination of the base PCR are defined at § 419.70(f). TOPs are calculated on Worksheet E, Part B, of the Hospital Cost Report or the Hospital Health Care Complex Cost Report (Form CMS–2552–96 or Form CMS–2552–10, respectively), as applicable each year. Section 1833(t)(7)(I) of the Act exempts TOPs from budget neutrality calculations.

Section 3138 of the Affordable Care Act amended section 1833(t) of the Act by adding a new paragraph (18), which instructs the Secretary to conduct a study to determine if, under the OPPS, outpatient costs incurred by cancer hospitals described in section 1886(d)(1)(B)(v) of the Act with respect to APC groups exceed outpatient costs incurred by other hospitals furnishing services under section 1833(t) of the Act, as determined appropriate by the Secretary. Section 1833(t)(18)(A) of the Act requires the Secretary to take into consideration the cost of drugs and biologicals incurred by cancer hospitals and other hospitals. Section 1833(t)(18)(B) of the Act provides that, if the Secretary determines that cancer hospitals' costs are higher than those of other hospitals, the Secretary shall provide an appropriate adjustment under section 1833(t)(2)(E) of the Act to reflect these higher costs. In 2011, after conducting the study required by section 1833(t)(18)(A) of the Act, we determined that outpatient costs incurred by the 11 specified cancer hospitals were greater than the costs incurred by other OPPS hospitals. For a complete discussion regarding the cancer hospital cost study, we refer readers to the CY 2012 OPPS/ASC final rule with comment period (76 FR 74200 through 74201).

Based on these findings, we finalized a policy to provide a payment adjustment to the 11 specified cancer hospitals that reflects their higher outpatient costs, as discussed in the CY 2012 OPPS/ASC final rule with comment period (76 FR 74202 through 74206). Specifically, we adopted a policy to provide additional payments to the cancer hospitals so that each cancer hospital's final PCR for services provided in a given calendar year is equal to the weighted average PCR (which we refer to as the ''target PCR'') for other hospitals paid under the OPPS. The target PCR is set in advance of the

calendar year and is calculated using the most recently submitted or settled cost report data that are available at the time of final rulemaking for the calendar year. The amount of the payment adjustment is made on an aggregate basis at cost report settlement. We note that the changes made by section 1833(t)(18) of the Act do not affect the existing statutory provisions that provide for TOPs for cancer hospitals. The TOPs are assessed, as usual, after all payments, including the cancer hospital payment adjustment, have been made for a cost reporting period. Table 3 displays the target PCR for purposes of the cancer hospital adjustment for CY 2012 through CY 2022.

BILLING CODE 4120–01–P

TABLE 3: CANCER HOSPITAL ADJUSTMENT TARGET PAYMENT PAYMENT-TO-COST RATIOS (PCRs), CY 2012 THROUGH CY 2022

Calendar Year	Target PCR
2012	0.91
2013	0.91
2014	0.90
2015	0.90
2016	0.92
2017	0.91
2018	0.88
2019	0.88
2020	0.89
2021	0.89
2022	0.89

2. Proposed Policy for CY 2023

Section 16002(b) of the 21st Century Cures Act (Pub. L. 114–255) amended section 1833(t)(18) of the Act by adding subparagraph (C), which requires that in applying § 419.43(i) (that is, the payment adjustment for certain cancer hospitals) for services furnished on or after January 1, 2018, the target PCR adjustment be reduced by 1.0 percentage point less than what would otherwise apply. Section 16002(b) also provides that, in addition to the percentage reduction, the Secretary may consider making an additional percentage point reduction to the target PCR that takes into account payment rates for applicable items and services described under section 1833(t)(21)(C) of the Act for hospitals that are not cancer hospitals described under section 1886(d)(1)(B)(v) of the Act. Further, in making any budget neutrality adjustment under section 1833(t) of the Act, the Secretary shall not take into account the reduced expenditures that result from application of section 1833(t)(18)(C) of the Act.

We propose to provide additional payments to the 11 specified cancer hospitals so that each cancer hospital's proposed PCR is equal to the weighted average PCR (or ''target PCR'') for the other OPPS hospitals, generally using the most recent submitted or settled cost report data that are available, reduced by 1.0 percentage point, to comply with section 16002(b) of the 21st Century Cures Act. We do not propose an additional reduction beyond the 1.0 percentage point reduction required by section 16002(b) of the 21st Century Cures Act for CY 2023.

Under our established policy, to calculate the proposed CY 2023 target PCR, we would use the same extract of cost report data from HCRIS used to estimate costs for the CY 2023 OPPS which, in most cases, would be the most recently available hospital cost reports. However, as discussed in section II.A.1.c and X.C of this proposed rule, we propose to use cost report data from the June 2020 HCRIS data set, which does not contain cost reports from CY 2020, given our concerns with CY 2020 cost report data as a result of the COVID–19 PHE. We believe a target PCR based on the most recently available cost reports may provide a less accurate estimation of cancer hospital PCRs and non-cancer hospital PCRs than the data used for the CY 2022 rulemaking cycle, which pre-dated the COVID–19 PHE. Therefore, for CY 2023, we propose to continue to use the same target PCR we used for CY 2021 and CY 2022 of 0.89. This proposed CY 2023 target PCR of 0.89 includes the 1.0-percentage point reduction required by section 16002(b) of the 21st Century Cures Act for CY 2023. For a description of the CY 2021 target PCR calculation, on which the proposed CY 2023 target PCR is based, we refer readers to the CY 2021 OPPS/ASC final rule with comment period (84 FR 85912 through 85914).

Table 4 shows the proposed estimated percentage increase in OPPS payments to each cancer hospital for CY 2023, due to the cancer hospital payment adjustment policy. The cost reporting periods for all cancer hospitals in Table 4 overlaps with CY 2020 and the costs and payments associated with each cancer hospital may be impacted by the effects of the COVID–19 PHE. Therefore, the estimates in Table 4 are likely to be less accurate than in other years and may overstate the percentage increase in cancer hospital payments for CY 2023. The actual, final amount of the CY 2023 cancer hospital payment adjustment for each cancer hospital would be determined at cost report settlement and would depend on each hospital's CY 2023 payments and costs from the settled CY 2023 cost report. We note that the requirements contained in section 1833(t)(18) of the Act do not affect the existing statutory provisions that provide for TOPs for cancer hospitals. The TOPs will be assessed, as usual, after all payments, including the cancer hospital payment adjustment, have been made for a cost reporting period.

TABLE 4: Estimated CY 2023 Hospital-Specific Payment Adjustment For Cancer Hospitals To Be Provided At Cost Report Settlement

Provider Number	Hospital Name	Estimated Percentage Increase in OPPS Payments for CY 2023 due to Payment Adjustment
050146	City of Hope Comprehensive Cancer Center	45.5%
050660	USC Norris Cancer Hospital	31.7%
100079	Sylvester Comprehensive Cancer Center	24.1%
100271	H. Lee Moffitt Cancer Center & Research Institute	23.1%
220162	Dana-Farber Cancer Institute	42.7%
330154	Memorial Sloan-Kettering Cancer Center	69.2%
330354	Roswell Park Cancer Institute	15.2%
360242	James Cancer Hospital & Solove Research Institute	12.9%
390196	Fox Chase Cancer Center	23.5%
450076	M.D. Anderson Cancer Center	49.4%
500138	Seattle Cancer Care Alliance	46.1%

BILLING CODE 4120–01–C

G. Proposed Hospital Outpatient Outlier Payments

1. Background

The OPPS provides outlier payments to hospitals to help mitigate the financial risk associated with high-cost and complex procedures, where a very costly service could present a hospital with significant financial loss. As explained in the CY 2015 OPPS/ASC final rule with comment period (79 FR 66832 through 66834), we set our projected target for aggregate outlier payments at 1.0 percent of the estimated aggregate total payments under the OPPS for the prospective year. Outlier payments are provided on a service-by-service basis when the cost of a service exceeds the APC payment amount multiplier threshold (the APC payment amount multiplied by a certain amount) as well as the APC payment amount plus a fixed-dollar amount threshold (the APC payment plus a certain dollar amount). In CY 2022, the outlier threshold was met when the hospital's cost of furnishing a service exceeded 1.75 times (the multiplier threshold) the APC payment amount and exceeded the APC payment amount plus $6,175 (the fixed-dollar amount threshold) (86 FR 63508 through 63510). If the hospital's cost of furnishing a service exceeds both the multiplier threshold and the fixed-dollar threshold, the outlier payment is calculated as 50 percent of the amount by which the hospital's cost of furnishing the service exceeds 1.75 times the APC payment amount. Beginning with CY 2009 payments, outlier payments are subject to a reconciliation process similar to the IPPS outlier reconciliation process for cost reports, as discussed in the CY 2009 OPPS/ASC final rule with comment period (73 FR 68594 through 68599).

It has been our policy to report the actual amount of outlier payments as a percent of total spending in the claims being used to model the OPPS. Our estimate of total outlier payments as a percent of total CY 2021 OPPS payments, using CY 2021 claims available for this CY 2023 OPPS/ASC proposed rule, is approximately 1.0 percent. Therefore, for CY 2021, we estimated that we paid the outlier target of 1.0 percent of total aggregated OPPS payments. Using an updated claims dataset for this proposed rule, we estimate that we paid approximately 1.01 percent of the total aggregate OPPS payments in outliers for CY 2021.

For this proposed rule, using CY 2021 claims data and CY 2022 payment rates, we estimate that the aggregate outlier payments for CY 2022 would be approximately 1.07 percent of the total CY 2022 OPPS payments. We provide estimated CY 2023 outlier payments for hospitals and CMHCs with claims included in the claims data that we used to model impacts in the Hospital-Specific Impacts—Provider-Specific Data file on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html.*

2. Outlier Calculation for CY 2023

For CY 2023, we propose to continue our policy of estimating outlier payments to be 1.0 percent of the estimated aggregate total payments under the OPPS. We propose that a portion of that 1.0 percent, an amount equal to less than 0.01 percent of outlier payments (or 0.0001 percent of total OPPS payments), would be allocated to CMHCs for PHP outlier payments. This is the amount of estimated outlier payments that would result from the proposed CMHC outlier threshold as a proportion of total estimated OPPS outlier payments. We propose to continue our longstanding policy that if a CMHC's cost for partial hospitalization services, paid under APC 5853 (Partial Hospitalization for CMHCs), exceeds

3.40 times the payment rate for proposed APC 5853, the outlier payment would be calculated as 50 percent of the amount by which the cost exceeds 3.40 times the proposed APC 5853 payment rate.

For further discussion of CMHC outlier payments, we refer readers to section VIII.C of this proposed rule.

To ensure that the estimated CY 2023 aggregate outlier payments would equal 1.0 percent of estimated aggregate total payments under the OPPS, we propose that the hospital outlier threshold be set so that outlier payments would be triggered when a hospital's cost of furnishing a service exceeds 1.75 times the APC payment amount and exceeds the APC payment amount plus $8,350.

We calculate the proposed fixed-dollar threshold of $8,350 using the standard methodology most recently used for CY 2022 (86 FR 63508 through 63510). For purposes of estimating outlier payments for CY 2023, we use the hospital-specific overall ancillary CCRs available in the April 2022 update to the Outpatient Provider-Specific File (OPSF). The OPSF contains provider-specific data, such as the most current CCRs, which are maintained by the MACs and used by the OPPS Pricer to pay claims. The claims that we generally use to model each OPPS update lag by 2 years.

In order to estimate the CY 2023 hospital outlier payments, we inflate the charges on the CY 2021 claims using the same proposed charge inflation factor of 1.13218 that we used to estimate the IPPS fixed-loss cost threshold for the FY 2023 IPPS/LTCH PPS proposed rule (87 FR 28667). We used an inflation factor of 1.06404 to estimate CY 2022 charges from the CY 2021 charges reported on CY 2021 claims before applying CY 2022 CCRs to estimate the percent of outliers paid in CY 2022. The proposed methodology for determining these charge inflation factors, as well as the solicitation of comments on an alternative approach, is discussed in the FY 2023 IPPS/LTCH PPS proposed rule (87 FR 28667 through 28678). As we stated in the CY 2005 OPPS final rule with comment period (69 FR 65844 through 65846), we believe that the use of the same charge inflation factors is appropriate for the OPPS because, with the exception of the inpatient routine service cost centers, hospitals use the same ancillary and cost centers to capture costs and charges for inpatient and outpatient services.

As noted in the CY 2007 OPPS/ASC final rule with comment period (71 FR 68011), we are concerned that we could systematically overestimate the OPPS hospital outlier threshold if we did not apply a CCR inflation adjustment factor. Therefore, we propose to apply the same CCR adjustment factor that we proposed to apply for the FY 2023 IPPS outlier calculation to the CCRs used to simulate the proposed CY 2023 OPPS outlier payments to determine the fixed-dollar threshold. Specifically, for CY 2023, we propose to apply an adjustment factor of 0.974495 to the CCRs that were in the April 2022 OPSF to trend them forward from CY 2022 to CY 2023. The methodology for calculating the proposed CCR adjustment factor, as well as the solicitation of comments on an alternative approach, is discussed in the FY 2023 IPPS/LTCH PPS proposed rule (87 FR 28668). We note that we propose to use the April 2022 OPSF for purposes of estimating costs for the OPPS outlier threshold calculation whereas in section X of this proposed rule we discussed using June 2020 HCRIS data extract for modeling hospital outpatient costs in construction of our CY 2023 OPPS relative weights. For modeling estimated outlier payments, since the April 2022 OPSF contains cost data primarily from CY 2021 and CY 2022 and is the basis for current CY 2022 OPPS outlier payments, we believe the April 2022 OPSF provides a more updated and accurate data source for determining the CCRs that will be applied to CY 2023 hospital outpatient claims. Therefore, we believe the April 2022 OPSF is a more accurate data source for determining the fixed-dollar threshold to ensure that the estimated CY 2023 aggregate outlier payments would equal 1.0 percent of estimated aggregate total payments under the OPPS.

To model hospital outlier payments for this CY proposed rule, we apply the overall CCRs from the April 2022 OPSF after adjustment (using the proposed CCR inflation adjustment factor of 0.974495 to approximate CY 2023 CCRs) to charges on CY 2021 claims that were adjusted (using the proposed charge inflation factor of 1.13218 to approximate CY 2023 charges). We simulated aggregated CY 2021 hospital outlier payments using these costs for several different fixed-dollar thresholds, holding the 1.75 multiplier threshold constant and assuming that outlier payments would continue to be made at 50 percent of the amount by which the cost of furnishing the service would exceed 1.75 times the APC payment amount, until the total outlier payments equaled 1.0 percent of aggregated estimated total CY 2023 OPPS payments. We estimated that a proposed fixed-dollar threshold of $8,350, combined with the proposed multiplier threshold of 1.75 times the APC payment rate, would allocate 1.0 percent of aggregated total OPPS payments to outlier payments. For CMHCs, we propose that, if a CMHC's cost for partial hospitalization services, paid under APC 5853, exceeds 3.40 times the payment rate for APC 5853, the outlier payment would be calculated as 50 percent of the amount by which the cost exceeds 3.40 times the APC 5853 payment rate.

Section 1833(t)(17)(A) of the Act, which applies to hospitals, as defined under section 1886(d)(1)(B) of the Act, requires that hospitals that fail to report data required for the quality measures selected by the Secretary, in the form and manner required by the Secretary under section 1833(t)(17)(B) of the Act, incur a 2.0 percentage point reduction to their OPD fee schedule increase factor; that is, the annual payment update factor. The application of a reduced OPD fee schedule increase factor results in reduced national unadjusted payment rates that would apply to certain outpatient items and services furnished by hospitals that are required to report outpatient quality data and that fail to meet the Hospital OQR Program requirements. For hospitals that fail to meet the Hospital OQR Program requirements, we propose to continue the policy that we implemented in CY 2010 that the hospitals' costs would be compared to the reduced payments for purposes of outlier eligibility and payment calculation. For more information on the Hospital OQR Program, we refer readers to section XIV of this proposed rule.

H. Proposed Calculation of an Adjusted Medicare Payment From the National Unadjusted Medicare Payment

The basic methodology for determining prospective payment rates for HOPD services under the OPPS is set forth in existing regulations at 42 CFR part 419, subparts C and D. For this CY 2023 proposed rule, the proposed payment rate for most services and procedures for which payment is made under the OPPS is the product of the conversion factor calculated in accordance with section II.B of this proposed rule and the relative payment weight described in section II.A. of this proposed rule. Therefore, the national unadjusted payment rate for most APCs contained in Addendum A to this proposed rule (which is available via the internet on the CMS website) and for most HCPCS codes to which separate payment under the OPPS has been assigned in Addendum B to this proposed rule (which is available via

the internet on the CMS website) is calculated by multiplying the proposed CY 2023 scaled weight for the APC by the CY 2023 conversion factor.

We note that section 1833(t)(17) of the Act, which applies to hospitals, as defined under section 1886(d)(1)(B) of the Act, requires that hospitals that fail to submit data required to be submitted on quality measures selected by the Secretary, in the form and manner and at a time specified by the Secretary, incur a reduction of 2.0 percentage points to their OPD fee schedule increase factor, that is, the annual payment update factor. The application of a reduced OPD fee schedule increase factor results in reduced national unadjusted payment rates that apply to certain outpatient items and services provided by hospitals that are required to report outpatient quality data and that fail to meet the Hospital OQR Program requirements. For further discussion of the payment reduction for hospitals that fail to meet the requirements of the Hospital OQR Program, we refer readers to section XIV. of this proposed rule.

We demonstrate the steps used to determine the APC payments that will be made in a CY under the OPPS to a hospital that fulfills the Hospital OQR Program requirements and to a hospital that fails to meet the Hospital OQR Program requirements for a service that has any of the following status indicator assignments: ''J1'', ''J2'', ''P'', ''Q1'', ''Q2'', ''Q3'', ''Q4'', ''R'', ''S'', ''T'', ''U'', or ''V'' (as defined in Addendum D1 to this proposed rule, which is available via the internet on the CMS website), in a circumstance in which the multiple procedure discount does not apply, the procedure is not bilateral, and conditionally packaged services (status indicator of ''Q1'' and ''Q2'') qualify for separate payment. We note that, although blood and blood products with status indicator ''R'' and brachytherapy sources with status indicator ''U'' are not subject to wage adjustment, they are subject to reduced payments when a hospital fails to meet the Hospital OQR Program requirements.

Individual providers interested in calculating the payment amount that they will receive for a specific service from the national unadjusted payment rates presented in Addenda A and B to this proposed rule (which are available via the internet on the CMS website) should follow the formulas presented in the following steps. For purposes of the payment calculations below, we refer to the national unadjusted payment rate for hospitals that meet the requirements of the Hospital OQR Program as the ''full'' national unadjusted payment rate. We refer to the national unadjusted payment rate for hospitals that fail to meet the requirements of the Hospital OQR Program as the ''reduced'' national unadjusted payment rate. The reduced national unadjusted payment rate is calculated by multiplying the reporting ratio of 0.9805 times the ''full'' national unadjusted payment rate. The national unadjusted payment rate used in the calculations below is either the full national unadjusted payment rate or the reduced national unadjusted payment rate, depending on whether the hospital met its Hospital OQR Program requirements to receive the full CY 2023 OPPS fee schedule increase factor.

Step 1. Calculate 60 percent (the labor-related portion) of the national unadjusted payment rate. Since the initial implementation of the OPPS, we have used 60 percent to represent our estimate of that portion of costs attributable, on average, to labor. We refer readers to the April 7, 2000 OPPS/ASC final rule with comment period (65 FR 18496 through 18497) for a detailed discussion of how we derived this percentage. During our regression analysis for the payment adjustment for rural hospitals in the CY 2006 OPPS final rule with comment period (70 FR 68553), we confirmed that this labor-related share for hospital outpatient services is appropriate.

The formula below is a mathematical representation of Step 1 and identifies the labor-related portion of a specific payment rate for a specific service.

X is the labor-related portion of the national unadjusted payment rate.

X = .60 * (national unadjusted payment rate).

Step 2. Determine the wage index area in which the hospital is located and identify the wage index level that applies to the specific hospital. The wage index values assigned to each area would reflect the geographic statistical areas (which are based upon OMB standards) to which hospitals are assigned for FY 2023 under the IPPS, reclassifications through the Medicare Geographic Classification Review Board (MGCRB), section 1886(d)(8)(B) ''Lugar'' hospitals, and reclassifications under section 1886(d)(8)(E) of the Act, as implemented in § 412.103 of the regulations. We propose to continue to apply for the CY 2023 OPPS wage index any adjustments for the FY 2023 IPPS post-reclassified wage index, including, but not limited to, the rural floor adjustment, a wage index floor of 1.00 in frontier states, in accordance with section 10324 of the Affordable Care Act of 2010, and an adjustment to the wage index for certain low wage index hospitals. For further discussion of the wage index we are applying for the CY 2023 OPPS, we refer readers to section II.C of this proposed rule.

Step 3. Adjust the wage index of hospitals located in certain qualifying counties that have a relatively high percentage of hospital employees who reside in the county, but who work in a different county with a higher wage index, in accordance with section 505 of Public Law 108–173. Addendum L to this proposed rule (which is available via the internet on the CMS website) contains the qualifying counties and the associated wage index increase developed for the proposed FY 2023 IPPS wage index, which are listed in Table 3 associated with the FY 2023 IPPS proposed rule and available via the internet on the CMS website at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html.* (Click on the link on the left side of the screen titled ''FY 2023 IPPS Proposed Rule Home Page'' and select ''FY 2023 Proposed Rule Tables.'') This step is to be followed only if the hospital is not reclassified or redesignated under section 1886(d)(8) or section 1886(d)(10) of the Act.

Step 4. Multiply the applicable wage index determined under Steps 2 and 3 by the amount determined under Step 1 that represents the labor-related portion of the national unadjusted payment rate.

The formula below is a mathematical representation of Step 4 and adjusts the labor-related portion of the national unadjusted payment rate for the specific service by the wage index.

X_a is the labor-related portion of the national unadjusted payment rate (wage adjusted).

X_a = .60 * (national unadjusted payment rate) * applicable wage index.

Step 5. Calculate 40 percent (the nonlabor-related portion) of the national unadjusted payment rate and add that amount to the resulting product of Step 4. The result is the wage index adjusted payment rate for the relevant wage index area.

The formula below is a mathematical representation of Step 5 and calculates the remaining portion of the national payment rate, the amount not attributable to labor, and the adjusted payment for the specific service.

Y is the nonlabor-related portion of the national unadjusted payment rate.

Y = .40 * (national unadjusted payment rate).

Adjusted Medicare Payment = $Y + X_a$.

Step 6. If a provider is an SCH, as set forth in the regulations at § 412.92, or an EACH, which is considered to be an

SCH under section 1886(d)(5)(D)(iii)(III) of the Act, and located in a rural area, as defined in § 412.64(b), or is treated as being located in a rural area under § 412.103, multiply the wage index adjusted payment rate by 1.071 to calculate the total payment.

The formula below is a mathematical representation of Step 6 and applies the rural adjustment for rural SCHs.

Adjusted Medicare Payment (SCH or EACH) = Adjusted Medicare Payment * 1.071.

We are providing examples below of the calculation of both the full and reduced national unadjusted payment rates that will apply to certain outpatient items and services performed by hospitals that meet and that fail to meet the Hospital OQR Program requirements, using the steps outlined previously. For purposes of this example, we are using a provider that is located in Brooklyn, New York that is assigned to CBSA 35614. This provider bills one service that is assigned to APC 5071 (Level 1 Excision/Biopsy/Incision and Drainage). The CY 2023 full national unadjusted payment rate for APC 5071 is $659.86. The proposed reduced national adjusted payment rate for APC 5071 for a hospital that fails to meet the Hospital OQR Program requirements is $646.99. This proposed reduced rate is calculated by multiplying the reporting ratio of 0.9805 by the full unadjusted payment rate for APC 5071.

The FY 2023 wage index for a provider located in CBSA 35614 in New York, which includes the proposed adoption of IPPS 2023 wage index policies, is 1.3296. The labor-related portion of the proposed full national unadjusted payment is approximately $526.42 (.60 * $659.86 * 1.3296). The labor-related portion of the proposed reduced national adjusted payment is approximately $516.14 (.60 * $646.99 * 1.3296). The nonlabor-related portion of the proposed full national unadjusted payment is approximately $263.94 (.40 * $659.86). The nonlabor-related portion of the proposed reduced national adjusted payment is approximately $258.80 (.40 * $646.99). The sum of the labor-related and nonlabor-related portions of the proposed full national unadjusted payment is approximately $790.36 ($526.42 + $263.94). The sum of the portions of the proposed reduced national adjusted payment is approximately $774.94 ($516.14 + $258.80).

I. Proposed Beneficiary Copayments

1. Background

Section 1833(t)(3)(B) of the Act requires the Secretary to set rules for determining the unadjusted copayment amounts to be paid by beneficiaries for covered OPD services. Section 1833(t)(8)(C)(ii) of the Act specifies that the Secretary must reduce the national unadjusted copayment amount for a covered OPD service (or group of such services) furnished in a year in a manner so that the effective copayment rate (determined on a national unadjusted basis) for that service in the year does not exceed a specified percentage. As specified in section 1833(t)(8)(C)(ii)(V) of the Act, the effective copayment rate for a covered OPD service paid under the OPPS in CY 2006, and in CYs thereafter, shall not exceed 40 percent of the APC payment rate.

Section 1833(t)(3)(B)(ii) of the Act provides that, for a covered OPD service (or group of such services) furnished in a year, the national unadjusted copayment amount cannot be less than 20 percent of the OPD fee schedule amount. However, section 1833(t)(8)(C)(i) of the Act limits the amount of beneficiary copayment that may be collected for a procedure (including items such as drugs and biologicals) performed in a year to the amount of the inpatient hospital deductible for that year.

Section 4104 of the Affordable Care Act eliminated the Medicare Part B coinsurance for preventive services furnished on and after January 1, 2011, that meet certain requirements, including flexible sigmoidoscopies and screening colonoscopies, and waived the Part B deductible for screening colonoscopies that become diagnostic during the procedure. For a discussion of the changes made by the Affordable Care Act with regard to copayments for preventive services furnished on and after January 1, 2011 we refer readers to section XII.B. of the CY 2011 OPPS/ASC final rule with comment period (75 FR 72013).

Section 122 of the Consolidated Appropriations Act (CAA) of 2021 (Pub. L. 116–260), Waiving Medicare Coinsurance for Certain Colorectal Cancer Screening Tests, amends section 1833(a) of the Act to offer a special coinsurance rule for screening flexible sigmoidoscopies and screening colonoscopies, regardless of the code that is billed for the establishment of a diagnosis as a result of the test, or for the removal of tissue or other matter or other procedure, that is furnished in connection with, as a result of, and in the same clinical encounter as the colorectal cancer screening test. We refer readers to section X.B, ''Changes to Beneficiary Coinsurance for Certain Colorectal Cancer Screening Tests'' of the CY 2022 OPPS/ASC final rule with comment period for the full discussion of this policy (86 FR 63740 through 63743). Under the regulation at 42 CFR 410.152(l)(5)(i)(B), the Medicare Part B payment percentage for colorectal cancer screening tests described in the regulation at § 410.37(j) that are furnished in CY 2023 through 2026 (and the corresponding reduction in coinsurance) is 85 percent (with beneficiary coinsurance equal to 15 percent).

2. Proposed OPPS Copayment Policy

For CY 2023, we propose to determine copayment amounts for new and revised APCs using the same methodology that we implemented beginning in CY 2004. (We refer readers to the November 7, 2003 OPPS final rule with comment period (68 FR 63458).) In addition, we propose to use the same standard rounding principles that we have historically used in instances where the application of our standard copayment methodology would result in a copayment amount that is less than 20 percent and cannot be rounded, under standard rounding principles, to 20 percent. (We refer readers to the CY 2008 OPPS/ASC final rule with comment period (72 FR 66687) in which we discuss our rationale for applying these rounding principles.) The proposed national unadjusted copayment amounts for services payable under the OPPS that would be effective January 1, 2023 are included in Addenda A and B to this proposed rule (which are available via the internet on the CMS website).

As discussed in section XIV.E of this proposed rule, for CY 2023, the Medicare beneficiary's minimum unadjusted copayment and national unadjusted copayment for a service to which a reduced national unadjusted payment rate applies will equal the product of the reporting ratio and the national unadjusted copayment, or the product of the reporting ratio and the minimum unadjusted copayment, respectively, for the service.

We note that OPPS copayments may increase or decrease each year based on changes in the calculated APC payment rates, due to updated cost report and claims data, and any changes to the OPPS cost modeling process. However, as described in the CY 2004 OPPS final rule with comment period, the development of the copayment methodology generally moves

beneficiary copayments closer to 20 percent of OPPS APC payments (68 FR 63458 through 63459).

In the CY 2004 OPPS final rule with comment period (68 FR 63459), we adopted a new methodology to calculate unadjusted copayment amounts in situations including reorganizing APCs, and we finalized the following rules to determine copayment amounts in CY 2004 and subsequent years.

- When an APC group consists solely of HCPCS codes that were not paid under the OPPS the prior year because they were packaged or excluded or are new codes, the unadjusted copayment amount would be 20 percent of the APC payment rate.
- If a new APC that did not exist during the prior year is created and consists of HCPCS codes previously assigned to other APCs, the copayment amount is calculated as the product of the APC payment rate and the lowest coinsurance percentage of the codes comprising the new APC.
- If no codes are added to or removed from an APC and, after recalibration of its relative payment weight, the new payment rate is equal to or *greater than* the prior year's rate, the copayment amount remains constant (unless the resulting coinsurance percentage is less than 20 percent).
- If no codes are added to or removed from an APC and, after recalibration of its relative payment weight, the new payment rate is *less than* the prior year's rate, the copayment amount is calculated as the product of the new payment rate and the prior year's coinsurance percentage.
- If HCPCS codes are added to or deleted from an APC and, after recalibrating its relative payment weight, holding its unadjusted copayment amount constant results in a decrease in the coinsurance percentage for the reconfigured APC, the copayment amount would not change (unless retaining the copayment amount would result in a coinsurance rate less than 20 percent).
- If HCPCS codes are added to an APC and, after recalibrating its relative payment weight, holding its unadjusted copayment amount constant results in an increase in the coinsurance percentage for the reconfigured APC, the copayment amount would be calculated as the product of the payment rate of the reconfigured APC and the lowest coinsurance percentage of the codes being added to the reconfigured APC.

We noted in the CY 2004 OPPS final rule with comment period that we would seek to lower the copayment percentage for a service in an APC from the prior year if the copayment percentage was greater than 20 percent. We noted that this principle was consistent with section 1833(t)(8)(C)(ii) of the Act, which accelerates the reduction in the national unadjusted coinsurance rate so that beneficiary liability will eventually equal 20 percent of the OPPS payment rate for all OPPS services to which a copayment applies, and with section 1833(t)(3)(B) of the Act, which achieves a 20-percent copayment percentage when fully phased in and gives the Secretary the authority to set rules for determining copayment amounts for new services. We further noted that the use of this methodology would, in general, reduce the beneficiary coinsurance rate and copayment amount for APCs for which the payment rate changes as the result of the reconfiguration of APCs and/or recalibration of relative payment weights (68 FR 63459).

3. Proposed Calculation of an Adjusted Copayment Amount for an APC Group

Individuals interested in calculating the national copayment liability for a Medicare beneficiary for a given service provided by a hospital that met or failed to meet its Hospital OQR Program requirements should follow the formulas presented in the following steps.

Step 1. Calculate the beneficiary payment percentage for the APC by dividing the APC's national unadjusted copayment by its payment rate. For example, using APC 5071, $131.98 is approximately 20 percent of the full national unadjusted payment rate of $659.86. For APCs with only a minimum unadjusted copayment in Addenda A and B to this proposed rule (which are available via the internet on the CMS website), the beneficiary payment percentage is 20 percent.

The formula below is a mathematical representation of Step 1 and calculates the national copayment as a percentage of national payment for a given service.

B is the beneficiary payment percentage.

B = National unadjusted copayment for APC/national unadjusted payment rate for APC.

Step 2. Calculate the appropriate wage-adjusted payment rate for the APC for the provider in question, as indicated in Steps 2 through 4 under section II.H. of this proposed rule. Calculate the rural adjustment for eligible providers, as indicated in Step 6 under section II.H. of this proposed rule.

Step 3. Multiply the percentage calculated in Step 1 by the payment rate calculated in Step 2. The result is the wage-adjusted copayment amount for the APC.

The formula below is a mathematical representation of Step 3 and applies the beneficiary payment percentage to the adjusted payment rate for a service calculated under section II.H of this proposed rule, with and without the rural adjustment, to calculate the adjusted beneficiary copayment for a given service.

Wage-adjusted copayment amount for the APC = Adjusted Medicare Payment * *B*.

Wage-adjusted copayment amount for the APC (SCH or EACH) = (Adjusted Medicare Payment * 1.071) * *B*.

Step 4. For a hospital that failed to meet its Hospital OQR Program requirements, multiply the copayment calculated in Step 3 by the reporting ratio of 0.9805.

The unadjusted copayments for services payable under the OPPS that would be effective January 1, 2023 are shown in Addenda A and B to this proposed rule (which are available via the internet on the CMS website). We note that the proposed national unadjusted payment rates and copayment rates shown in Addenda A and B to this proposed rule reflect the proposed CY 2023 OPD increase factor discussed in section II.B of this proposed rule.

In addition, as noted earlier, section 1833(t)(8)(C)(i) of the Act limits the amount of beneficiary copayment that may be collected for a procedure performed in a year to the amount of the inpatient hospital deductible for that year.

III. Proposed OPPS Ambulatory Payment Classification (APC) Group Policies

A. Proposed OPPS Treatment of New and Revised HCPCS Codes

Payments for OPPS procedures, services, and items are generally based on medical billing codes, specifically, HCPCS codes, that are reported on HOPD claims. HCPCS codes are used to report surgical procedures, medical services, items, and supplies under the hospital OPPS. The HCPCS is divided into two principal subsystems, referred to as Level I and Level II of the HCPCS. Level I is comprised of CPT (Current Procedural Terminology) codes, a numeric and alphanumeric coding system that is established and maintained by the American Medical Association (AMA), and consists of Category I, II, III, MAAA, and PLAA CPT codes. Level II, which is established and maintained by CMS, is a standardized coding system that is used primarily to identify products,

supplies, and services not included in the CPT codes. Together, Level I and II HCPCS codes are used to report procedures, services, items, and supplies under the OPPS payment system. Specifically, we recognize the following codes on OPPS claims:

- Category I CPT codes, which describe surgical procedures, diagnostic and therapeutic services, and vaccine codes;
- Category III CPT codes, which describe new and emerging technologies, services, and procedures;
- MAAA CPT codes, which describe laboratory multianalyte assays with algorithmic analyses (MAA);
- PLA CPT codes, which describe proprietary laboratory analyses (PLA) services; and
- Level II HCPCS codes (also known as alpha-numeric codes), which are used primarily to identify drugs, devices, supplies, temporary procedures, and services not described by CPT codes.

The codes are updated and changed throughout the year. CPT and Level II HCPCS code changes that affect the OPPS are published through the annual rulemaking cycle and through the OPPS quarterly update Change Requests (CRs). Generally, these code changes are effective January 1, April 1, July 1, or October 1. CPT code changes are released by the AMA (via their website) while Level II HCPCS code changes are released to the public via the CMS HCPCS website. CMS recognizes the release of new CPT and Level II HCPCS codes outside of the formal rulemaking process via OPPS quarterly update CRs. Based on our review, we assign the new codes to interim status indicators (SIs) and APCs. These interim assignments are finalized in the OPPS/ASC final rules. This quarterly process offers hospitals access to codes that more accurately describe the items or services furnished and provides payment for these items or services in a timelier manner than if we waited for the annual rulemaking process. We solicit public comments on the new CPT and Level II HCPCS codes, status indicators, and APC assignments through our annual rulemaking process.

We note that, under the OPPS, the APC assignment determines the payment rate for an item, procedure, or service. The items, procedures, or services not exclusively paid separately under the hospital OPPS are assigned to appropriate status indicators. Certain payment status indicators provide separate payment while other payment status indicators do not. In section XI of this proposed rule, specifically, the ''Proposed CY 2023 Payment Status and Comment Indicators'' section, we discuss the various status indicators used under the OPPS. We also provide a complete list of the proposed status indicators and their definitions in Addendum D1 to this proposed rule.

1. April 2022 HCPCS Codes for Which We Are Soliciting Public Comments in This Proposed Rule

For the April 2022 update, 48 new HCPCS codes were established and made effective on April 1, 2022. Through the April 2022 OPPS quarterly update CR (Transmittal 11305, Change Request 12666, dated March 24, 2022), we recognized several new HCPCS codes for separate payment under the OPPS. In this proposed rule, we are soliciting public comments on the proposed APC and status indicator assignments for the codes listed in Table 5 (New HCPCS Codes Effective April 1, 2022). The proposed status indicator, APC assignment, and payment rate for each HCPCS code can be found in Addendum B to this proposed rule. We note that in prior years we included the proposed OPPS status indicators and APC assignments in the coding preamble tables, however, because the same information can be found in Addendum B, we are no longer including them in Table 5. Therefore, readers are advised to refer to the OPPS Addendum B for the OPPS status indicator, APC assignment, and payment rates for all codes reportable under the hospital OPPS. The new codes effective April 1, 2022 are assigned to comment indicator ''NP'' in Addendum B to this proposed rule to indicate that the codes are assigned to an interim APC assignment and comments will be accepted on their interim APC assignments. The complete list of proposed status indicators and definitions used under the OPPS can be found in Addendum D1 to this proposed rule, while the complete list of proposed comment indicators and definitions can be found in Addendum D2. We note that OPPS Addendum B (OPPS payment file by HCPCS code), Addendum D1 (OPPS Status Indicators), and Addendum D2 (OPPS Comment Indicators) are available via the internet on the CMS website.

BILLING CODE 4120–01–P

TABLE 5: NEW HCPCS CODES EFFECTIVE APRIL 1, 2022

CY 2022 HCPCS Code	CY 2022 Long Descriptor
A2011	Supra sdrm, per square centimeter
A2012	Suprathel, per square centimeter
A2013	Innovamatrix fs, per square centimeter
A4100	Skin substitute, fda cleared as a device, not otherwise specified
A4238	Supply allowance for adjunctive continuous glucose monitor (cgm), includes all supplies and accessories, 1 month supply = 1 unit of service
A9291	Prescription digital behavioral therapy, fda cleared, per course of treatment
C9090	Injection, plasminogen, human-tvmh, 1 mg
C9091	Injection, sirolimus protein-bound particles, 1 mg
C9092	Injection, triamcinolone acetonide, suprachoroidal, 1 mg
C9093	Injection, ranibizumab, via intravitreal implant, 0.1 mg
C9782	Blinded procedure for New York Heart Association (NYHA) Class II or III heart failure, or Canadian Cardiovascular Society (CCS) Class III or IV chronic refractory angina; transcatheter intramyocardial transplantation of autologous bone marrow cells (e.g., mononuclear) or placebo control, autologous bone marrow harvesting and preparation for transplantation, left heart catheterization including ventriculography, all laboratory services, and all imaging with or without guidance (e.g., transthoracic echocardiography, ultrasound, fluoroscopy), all device(s), performed in an approved Investigational Device Exemption (IDE) study
C9783	Blinded procedure for transcatheter implantation of coronary sinus reduction device or placebo control, including vascular access and closure, right heart catherization, venous and coronary sinus angiography, imaging guidance and supervision and interpretation when performed in an approved Investigational Device Exemption (IDE) study
J0219	Injection, avalglucosidase alfa-ngpt, 4 mg
J0491	Injection, anifrolumab-fnia, 1 mg
J0879	Injection, difelikefalin, 0.1 microgram, (for esrd on dialysis)
J9071	Injection, cyclophosphamide, (auromedics), 5 mg
J9273	Injection, tisotumab vedotin-tftv, 1 mg
J9359	Injection, loncastuximab tesirine-lpyl, 0.1 mg
K1028	Power source and control electronics unit for oral device/appliance for neuromuscular electrical stimulation of the tongue muscle for the reduction of snoring and obstructive sleep apnea, controlled by phone application

CY 2022 HCPCS Code	CY 2022 Long Descriptor
K1029	Oral device/appliance for neuromuscular electrical stimulation of the tongue muscle, used in conjunction with the power source and control electronics unit, controlled by phone application, 90-day supply
K1030	External recharging system for battery (internal) for use with implanted cardiac contractility modulation generator, replacement only
K1031	Non-pneumatic compression controller without calibrated gradient pressure
K1032	Non-pneumatic sequential compression garment, full leg
K1033	Non-pneumatic sequential compression garment, half leg
Q4224	Human health factor 10 amniotic patch (hhf10-p), per square centimeter
Q4225	Amniobind, per square centimeter
Q4256	Mlg-complete, per square centimeter
Q4257	Relese, per square centimeter
Q4258	Enverse, per square centimeter
Q5124	Injection, ranibizumab-nuna, biosimilar, (byooviz), 0.1 mg
V2525	Contact lens, hydrophilic, dual focus, per lens
0306U	Oncology (minimal residual disease [mrd]), next-generation targeted sequencing analysis, cell-free dna, initial (baseline) assessment to determine a patient specific panel for future comparisons to evaluate for mrd
0307U	Oncology (minimal residual disease [mrd]), next-generation targeted sequencing analysis of a patient-specific panel, cell-free dna, subsequent assessment with comparison to previously analyzed patient specimens to evaluate for mrd
0308U	Cardiology (coronary artery disease [cad]), analysis of 3 proteins (high sensitivity [hs] troponin, adiponectin, and kidney injury molecule-1 [kim-1]), plasma, algorithm reported as a risk score for obstructive cad
0309U	Cardiology (cardiovascular disease), analysis of 4 proteins (nt-probnp, osteopontin, tissue inhibitor of metalloproteinase-1 [timp-1], and kidney injury molecule-1 [kim-1]), plasma, algorithm reported as a risk score for major adverse cardiac event
0310U	Pediatrics (vasculitis, kawasaki disease [kd]), analysis of 3 biomarkers (nt-probnp, c-reactive protein, and t-uptake), plasma, algorithm reported as a risk score for kd
0311U	Infectious disease (bacterial), quantitative antimicrobial susceptibility reported as phenotypic minimum inhibitory concentration (MIC)–based antimicrobial susceptibility for each organisms identified
0312U	Autoimmune diseases (eg, systemic lupus erythematosus [sle]), analysis of 8 igg autoantibodies and 2 cell-bound complement activation products using enzyme-linked immunosorbent immunoassay (elisa), flow cytometry and indirect immunofluorescence, serum, or plasma and whole blood, individual components reported along with an algorithmic sle-likelihood assessment

CY 2022 HCPCS Code	CY 2022 Long Descriptor
0313U	Oncology (pancreas), dna and mrna next-generation sequencing analysis of 74 genes and analysis of cea (ceacam5) gene expression, pancreatic cyst fluid, algorithm reported as a categorical result (ie, negative, low probability of neoplasia or positive, high probability of neoplasia)
0314U	Oncology (cutaneous melanoma), mrna gene expression profiling by rt-pcr of 35 genes (32 content and 3 housekeeping), utilizing formalin-fixed paraffin-embedded (ffpe) tissue, algorithm reported as a categorical result (ie, benign, intermediate, malignant)
0315U	Oncology (cutaneous squamous cell carcinoma), mrna gene expression profiling by rt-pcr of 40 genes (34 content and 6 housekeeping), utilizing formalin-fixed paraffin-embedded (ffpe) tissue, algorithm reported as a categorical risk result (ie, class 1, class 2a, class 2b)
0316U	Borrelia burgdorferi (Lyme disease), ospa protein evaluation, urine
0317U	Oncology (lung cancer), four-probe fish (3q29, 3p22.1, 10q22.3, 10cen) assay, whole blood, predictive algorithm-generated evaluation reported as decreased or increased risk for lung cancer
0318U	Pediatrics (congenital epigenetic disorders), whole genome methylation analysis by microarray for 50 or more genes, blood
0319U	Nephrology (renal transplant), rna expression by select transcriptome sequencing, using pretransplant peripheral blood, algorithm reported as a risk score for early acute rejection
0320U	Nephrology (renal transplant), rna expression by select transcriptome sequencing, using posttransplant peripheral blood, algorithm reported as a risk score for acute cellular rejection
0321U	Infectious agent detection by nucleic acid (dna or rna), genitourinary pathogens, identification of 20 bacterial and fungal organisms and identification of 16 associated antibiotic-resistance genes, multiplex amplified probe technique
0322U	Neurology (autism spectrum disorder [asd]), quantitative measurements of 14 acyl carnitines and microbiome-derived metabolites, liquid chromatography with tandem mass spectrometry (lc-ms/ms), plasma, results reported as negative or positive for risk of metabolic subtypes associated with asd

2. July 2022 HCPCS Codes for Which We Are Soliciting Public Comments in This Proposed Rule

For the July 2022 update, 63 new codes were established and made effective July 1, 2022. Through the July 2022 OPPS quarterly update CR (Transmittal 11457, Change Request 12761, dated June 15, 2022), we recognized several new codes for separate payment and assigned them to appropriate interim OPPS status indicators and APCs. In this CY 2023 OPPS/ASC proposed rule, we are soliciting public comments on the proposed APC and status indicator assignments for the codes listed in Table 6 (New HCPCS Codes Effective July 1, 2022). The proposed status indicator, APC assignment, and payment rate for each HCPCS code can be found in Addendum B to this proposed rule. We note that in prior years we included the proposed OPPS status indicators and APC assignments in the coding preamble tables, however, because the same information can be found in Addendum B, we are no longer including them in Table 6. Therefore, readers are advised to refer to the OPPS Addendum B for the OPPS status indicator, APC assignment, and payment rates for all codes reportable under the hospital OPPS. The complete list of proposed status indicators and corresponding definitions used under the OPPS can be found in Addendum D1 to this proposed rule. In addition, the new codes are assigned to comment indicator ''NP'' in Addendum B to this proposed rule to indicate that the codes are assigned to an interim APC assignment and comments will be accepted on their interim APC assignments. The complete list of proposed comment indicators and definitions used under the OPPS can be found in Addendum D2 to this proposed rule. We note that OPPS Addendum B (OPPS payment file by HCPCS code), Addendum D1 (OPPS Status Indicators), and Addendum D2 (OPPS Comment Indicators) are available via the internet on the CMS website.

TABLE 6: NEW HCPCS CODES EFFECTIVE JULY 1, 2022

CY 2022 HCPCS Code	CY 2022 Long Descriptor
A9596	Gallium ga-68 gozetotide, diagnostic, (illuccix), 1 millicurie
A9601	Flortaucipir f 18 injection, diagnostic, 1 millicurie
C9094	Inj, sutimlimab-jome, 10 mg
C9095	Inj, tebentafusp-tebn, 1 mcg
C9096	Injection, filgrastim-ayow, biosimilar, (releuko), 1 microgram
C9097	Inj, faricimab-svoa, 0.1 mg
C9098	ciltacabtagene autoleucel, up to 100 million autologous b-cell maturation antigen (bcma) directed car-positive t cells, including leukapheresis and dose preparation procedures, per therapeutic dose
D1708	Pfizer-BioNTech Covid-19 vaccine administration – third dose
D1709	Pfizer-BioNTech Covid-19 vaccine administration – booster dose
D1710	Moderna Covid-19 vaccine administration – third dose
D1711	Moderna Covid-19 vaccine administration – booster dose
D1712	Janssen Covid-19 vaccine administration - booster dose
D1713	Pfizer-BioNTech Covid-19 vaccine administration tris-sucrose pediatric – first dose
D1714	Pfizer-BioNTech Covid-19 vaccine administration tris-sucrose pediatric – second dose
G0308	Creation of subcutaneous pocket with insertion of 180 day implantable interstitial glucose sensor, including system activation and patient training
G0309	Removal of implantable interstitial glucose sensor with creation of subcutaneous pocket at different anatomic site and insertion of new 180 day implantable sensor, including system activation
J0739	Injection, cabotegravir, 1 mg
J1306	Injection, inclisiran, 1 mg
J1551	Injection, immune globulin (cutaquig), 100 mg
J2356	Injection, tezepelumab-ekko, 1 mg
J2779	Injection, ranibizumab, via intravitreal implant (susvimo), 0.1 mg
J2998	Injection, plasminogen, human-tvmh, 1 mg
J3299	Injection, triamcinolone acetonide (xipere), 1 mg
J9331	Injection, sirolimus protein-bound particles, 1 mg

CY 2022 HCPCS Code	CY 2022 Long Descriptor
J9332	Injection, efgartigimod alfa-fcab, 2mg
K1034	Provision of covid-19 test, nonprescription self-administered and self-collected use, fda approved, authorized or cleared, one test count
Q4259	Celera dual layer or celera dual membrane, per square centimeter
Q4260	Signature apatch, per square centimeter
Q4261	Tag, per square centimeter
90584	Dengue vaccine, quadrivalent, live, 2 dose schedule, for subcutaneous use
0714T	Transperineal laser ablation of benign prostatic hyperplasia, including imaging guidance
0715T	Percutaneous transluminal coronary lithotripsy (List separately in addition to code for primary procedure)
0716T	Cardiac acoustic waveform recording with automated analysis and generation of coronary artery disease risk score
0717T	Autologous adipose-derived regenerative cell (ADRC) therapy for partial thickness rotator cuff tear; adipose tissue harvesting, isolation and preparation of harvested cells, including incubation with cell dissociation enzymes, filtration, washing and concentration of ADRCs
0718T	Autologous adipose-derived regenerative cell (ADRC) therapy for partial thickness rotator cuff tear; injection into supraspinatus tendon including ultrasound guidance, unilateral
0719T	Posterior vertebral joint replacement, including bilateral facetectomy, laminectomy, and radical discectomy, including imaging guidance, lumbar spine, single segment
0720T	Percutaneous electrical nerve field stimulation, cranial nerves, without implantation
0721T	Quantitative computed tomography (CT) tissue characterization, including interpretation and report, obtained without concurrent CT examination of any structure contained in previously acquired diagnostic imaging
0722T	Quantitative computed tomography (CT) tissue characterization, including interpretation and report, obtained with concurrent CT examination of any structure contained in the concurrently acquired diagnostic imaging dataset (List separately in addition to code for primary procedure)
0723T	Quantitative magnetic resonance cholangiopancreatography (QMRCP) including data preparation and transmission, interpretation and report, obtained without diagnostic magnetic resonance imaging (MRI) examination of the same anatomy (eg, organ, gland, tissue, target structure) during the same session
0724T	Quantitative magnetic resonance cholangiopancreatography (QMRCP) including data preparation and transmission, interpretation and report, obtained with diagnostic magnetic resonance imaging (MRI) examination of the same anatomy

CY 2022 HCPCS Code	CY 2022 Long Descriptor
	(eg, organ, gland, tissue, target structure) (List separately in addition to code for primary procedure)
0725T	Vestibular device implantation, unilateral
0726T	Removal of implanted vestibular device, unilateral
0727T	Removal and replacement of implanted vestibular device, unilateral
0728T	Diagnostic analysis of vestibular implant, unilateral; with initial programming
0729T	Diagnostic analysis of vestibular implant, unilateral; with subsequent programming
0730T	Trabeculotomy by laser, including optical coherence tomography (OCT) guidance
0731T	Augmentative AI-based facial phenotype analysis with report
0732T	Immunotherapy administration with electroporation, intramuscular
0733T	Remote real-time, motion capture-based neurorehabilitative therapy ordered by a physician or other qualified health care professional; supply and technical support, per 30 days
0734T	Remote body and limb kinematic measurement-based therapy ordered by a physician or other qualified health care professional; treatment management services by a physician or other qualified health care professional, per calendar month
0735T	Preparation of tumor cavity, with placement of a radiation therapy applicator for intraoperative radiation therapy (IORT) concurrent with primary craniotomy (List separately in addition to code for primary procedure)
0736T	Colonic lavage, 35 or more liters of water, gravity-fed, with induced defecation, including insertion of rectal catheter
0737T	Xenograft implantation into the articular surface
0323U	Infectious agent detection by nucleic acid (DNA and RNA), central nervous system pathogen, metagenomic next-generation sequencing, cerebrospinal fluid (CSF), identification of pathogenic bacteria, viruses, parasites, or fungi
0324U	Oncology (ovarian), spheroid cell culture, 4-drug panel (carboplatin, doxorubicin, gemcitabine, paclitaxel), tumor chemotherapy response prediction for each drug
0325U	Oncology (ovarian), spheroid cell culture, poly (ADP-ribose) polymerase (PARP) inhibitors (niraparib, olaparib, rucaparib, velparib), tumor response prediction for each drug
0326U	Targeted genomic sequence analysis panel, solid organ neoplasm, cell-free circulating DNA analysis of 83 or more genes, interrogation for sequence variants, gene copy number amplifications, gene rearrangements, microsatellite instability and tumor mutational burden
0327U	Fetal aneuploidy (trisomy 13, 18, and 21), DNA sequence analysis of selected regions using maternal plasma, algorithm reported as a risk score for each trisomy, includes sex reporting, if performed

CY 2022 HCPCS Code	CY 2022 Long Descriptor
0328U	Drug assay, definitive, 120 or more drugs and metabolites, urine, quantitative liquid chromatography with tandem mass spectrometry (LC-MS/MS), includes specimen validity and algorithmic analysis describing drug or metabolite and presence or absence of risks for a significant patient-adverse event, per date of service
0329U	Oncology (neoplasia), exome and transcriptome sequence analysis for sequence variants, gene copy number amplifications and deletions, gene rearrangements, microsatellite instability and tumor mutational burden utilizing DNA and RNA from tumor with DNA from normal blood or saliva for subtraction, report of clinically significant mutation(s) with therapy associations
0330U	Infectious agent detection by nucleic acid (DNA or RNA), vaginal pathogen panel, identification of 27 organisms, amplified probe technique, vaginal swab
0331U	Oncology (hematolymphoid neoplasia), optical genome mapping for copy number alterations and gene rearrangements utilizing DNA from blood or bone marrow, report of clinically significant alternations

3. October 2022 HCPCS Codes for Which We Will Be Soliciting Public Comments in the CY 2023 OPPS/ASC Final Rule With Comment Period

As has been our practice in the past, we will solicit comments on the new CPT and Level II HCPCS codes that will be effective October 1, 2022, in the CY 2023 OPPS/ASC final rule with comment period, thereby allowing us to finalize the status indicators and APC assignments for the codes in the CY 2024 OPPS/ASC final rule with comment period. The HCPCS codes will be released to the public through the October 2022 OPPS Update CR and the CMS HCPCS website while the CPT codes will be released to the public through the AMA website.

For CY 2023, we propose to continue our established policy of assigning comment indicator ''NI'' in Addendum B to the CY 2023 OPPS/ASC final rule with comment period to those new HCPCS codes that will be effective October 1, 2022, to indicate that we are assigning them an interim status indicator, which is subject to public comment. We will be inviting public comments in the CY 2023 OPPS/ASC final rule with comment period on the status indicator and APC assignments, which would then be finalized in the CY 2024 OPPS/ASC final rule with comment period.

4. January 2023 HCPCS Codes

a. New Level II HCPCS Codes for Which We Will Be Soliciting Public Comments in the CY 2023 OPPS/ASC Final Rule With Comment Period

Consistent with past practice, we will solicit comments on the new Level II HCPCS codes that will be effective January 1, 2023, in the CY 2023 OPPS/ASC final rule with comment period, thereby allowing us to finalize the status indicators and APC assignments for the codes in the CY 2024 OPPS/ASC final rule with comment period. Unlike the CPT codes that are effective January 1 and are included in the OPPS/ASC proposed rules, and except for the proposed new C-codes and G-codes listed in Addendum O of this proposed rule, most Level II HCPCS codes are not released until sometime around November to be effective January 1. Because these codes are not available until November, we are unable to include them in the OPPS/ASC proposed rules. Consequently, for CY 2023, we propose to include in Addendum B to the CY 2023 OPPS/ASC final rule with comment period the new Level II HCPCS codes effective January 1, 2023, that would be incorporated in the January 2023 OPPS quarterly update CR. Specifically, for CY 2023, we propose to continue our established policy of assigning comment indicator ''NI'' in Addendum B to the CY 2023 OPPS/ASC final rule with comment period to the new HCPCS codes that will be effective January 1, 2023, to indicate that we are assigning them an interim status indicator, which is subject to public comment. We will be inviting public comments in the CY 2023 OPPS/ASC final rule with comment period on the status indicator and APC assignments, which would then be finalized in the CY 2024 OPPS/ASC final rule with comment period.

b. CPT Codes for Which We Are Soliciting Public Comments in This Proposed Rule

In the CY 2015 OPPS/ASC final rule with comment period (79 FR 66841 through 66844), we finalized a revised process of assigning APC and status indicators for new and revised Category I and III CPT codes that would be effective January 1. Specifically, for the new/revised CPT codes that we receive in a timely manner from the AMA's CPT Editorial Panel, we finalized our proposal to include the codes that would be effective January 1 in the OPPS/ASC proposed rules, along with proposed APC and status indicator assignments for them, and to finalize the APC and status indicator assignments in the OPPS/ASC final rules beginning with the CY 2016 OPPS update. For those new/revised CPT codes that were received too late for inclusion in the OPPS/ASC proposed rule, we finalized our proposal to establish and use HCPCS G-codes that mirror the predecessor CPT codes and retain the current APC and status indicator assignments for a year until we can propose APC and status indicator assignments in the following year's rulemaking cycle. We note that even if

we find that we need to create HCPCS G-codes in place of certain CPT codes for the PFS proposed rule, we do not anticipate that these HCPCS G-codes will always be necessary for OPPS purposes. We will make every effort to include proposed APC and status indicator assignments for all new and revised CPT codes that the AMA makes publicly available in time for us to include them in the proposed rule, and to avoid resorting to use of HCPCS G-codes and the resulting delay in utilization of the most current CPT codes. Also, we finalized our proposal to make interim APC and status indicator assignments for CPT codes that are not available in time for the proposed rule and that describe wholly new services (such as new technologies or new surgical procedures), to solicit public comments in the final rule, and to finalize the specific APC and status indicator assignments for those codes in the following year's final rule.

For the CY 2023 OPPS update, we received the CPT codes that will be effective January 1, 2023 from the AMA in time to be included in this proposed rule. The new, revised, and deleted CPT codes can be found in Addendum B to this proposed rule (which is available via the internet on the CMS website). We note that the new and revised CPT codes are assigned to comment indicator ''NP'' in Addendum B of this proposed rule to indicate that the code is new for the next calendar year or the code is an existing code with substantial revision to its code descriptor in the next calendar year as compared to the current calendar year with a proposed APC assignment, and that comments will be accepted on the proposed APC assignment and status indicator.

Further, we note that the CPT code descriptors that appear in Addendum B are short descriptors and do not accurately describe the complete procedure, service, or item described by the CPT code. Therefore, we are including the 5-digit placeholder codes and the long descriptors for the new and revised CY 2023 CPT codes in Addendum O to this proposed rule (which is available via the internet on the CMS website) so that the public can adequately comment on our proposed APCs and status indicator assignments. The 5-digit placeholder codes can be found in Addendum O, specifically under the column labeled ''CY 2023 OPPS/ASC Proposed Rule 5-Digit AMA Placeholder Code''. The final CPT code numbers will be included in the CY 2023 OPPS/ASC final rule with comment period.

In summary, we are soliciting public comments on the proposed CY 2023 status indicators and APC assignments for the new and revised CPT codes that will be effective January 1, 2023. Because the CPT codes listed in Addendum B appear with short descriptors only, we list them again in Addendum O to this proposed rule with long descriptors. In addition, we propose to finalize the status indicator and APC assignments for these codes (with their final CPT code numbers) in the CY 2023 OPPS/ASC final rule with comment period. The proposed status indicator and APC assignments for these codes can be found in Addendum B to this proposed rule. In addition, the complete list of proposed comment indicators and definitions used under the OPPS can be found in Addendum D2 to this proposed rule. We note that OPPS Addendum B (OPPS payment file by HCPCS code), Addendum D1 (OPPS Status Indicators), and Addendum D2 (OPPS Comment Indicators) are available via the internet on the CMS website.

Finally, in Table 7 (Comment and Finalization Timeframes for New and Revised OPPS-Related HCPCS Codes) below, we summarize our current process for updating codes through our OPPS quarterly update CRs, seeking public comments, and finalizing the treatment of these codes under the OPPS.

TABLE 7: COMMENT AND FINALIZATION TIMEFRAMES FOR NEW AND REVISED OPPS-RELATED HCPCS CODES

OPPS Quarterly Update CR	Type of Code	Effective Date	Comments Sought	When Finalized
April 2022	HCPCS (CPT and Level II codes)	April 1, 2022	CY 2023 OPPS/ASC proposed rule	CY 2023 OPPS/ASC final rule with comment period
July 2022	HCPCS (CPT and Level II codes)	July 1, 2022	CY 2023 OPPS/ASC proposed rule	CY 2023 OPPS/ASC final rule with comment period
October 2022	HCPCS (CPT and Level II codes)	October 1, 2022	CY 2023 OPPS/ASC final rule with comment period	CY 2024 OPPS/ASC final rule with comment period
January 2023	CPT Codes	January 1, 2023	CY 2023 OPPS/ASC proposed rule	CY 2023 OPPS/ASC final rule with comment period
	Level II HCPCS Codes	January 1, 2023	CY 2023 OPPS/ASC final rule with comment period	CY 2024 OPPS/ASC final rule with comment period

B. Proposed OPPS Changes—Variations Within APCs

1. Background

Section 1833(t)(2)(A) of the Act requires the Secretary to develop a classification system for covered hospital outpatient department services. Section 1833(t)(2)(B) of the Act provides that the Secretary may establish groups of covered OPD services within this classification system, so that services classified within each group are comparable clinically and with respect to the use of resources. In accordance with these provisions, we developed a grouping classification system, referred to as Ambulatory Payment Classifications (APCs), as set forth in regulations at 42 CFR 419.31. We use Level I (also known as CPT codes) and Level II HCPCS codes (also known as alphanumeric codes) to identify and group the services within each APC. The APCs are organized such that each group is homogeneous both clinically and in terms of resource use. Using this classification system, we have established distinct groups of similar services. We also have developed separate APC groups for certain medical devices, drugs, biologicals, therapeutic radiopharmaceuticals, and brachytherapy devices that are not packaged into the payment for the procedure.

We have packaged into the payment for each procedure or service within an APC group the costs associated with those items and services that are typically ancillary and supportive to a primary diagnostic or therapeutic modality and, in those cases, are an integral part of the primary service they support. Therefore, we do not make separate payment for these packaged items or services. In general, packaged items and services include, but are not limited to, the items and services listed in regulations at 42 CFR 419.2(b). A further discussion of packaged services is included in section II.A.3 of this proposed rule.

Under the OPPS, we generally pay for covered hospital outpatient services on a rate-per-service basis, where the service may be reported with one or more HCPCS codes. Payment varies according to the APC group to which the independent service or combination of services is assigned. For CY 2023, we propose that each APC relative payment weight represents the hospital cost of the services included in that APC, relative to the hospital cost of the services included in APC 5012 (Clinic Visits and Related Services). The APC relative payment weights are scaled to APC 5012 because it is the hospital clinic visit APC and clinic visits are among the most frequently furnished services in the hospital outpatient setting.

2. Application of the 2 Times Rule

Section 1833(t)(9)(A) of the Act requires the Secretary to review, not less often than annually, and revise the APC groups, the relative payment weights, and the wage and other adjustments described in paragraph (2) to take into account changes in medical practice, changes in technology, the addition of new services, new cost data, and other relevant information and factors. Section 1833(t)(9)(A) of the Act also requires the Secretary to consult with an expert outside advisory panel composed of an appropriate selection of representatives of providers to review

(and advise the Secretary concerning) the clinical integrity of the APC groups and the relative payment weights. We note that the Advisory Panel on Hospital Outpatient Payment (also known as the HOP Panel or the Panel) recommendations for specific services for the CY 2023 OPPS update will be discussed in the relevant specific sections throughout the CY 2023 OPPS/ASC final rule with comment period.

In addition, section 1833(t)(2) of the Act provides that, subject to certain exceptions, the items and services within an APC group cannot be considered comparable with respect to the use of resources if the highest cost for an item or service in the group is more than 2 times greater than the lowest cost for an item or service within the same group (referred to as the ''2 times rule''). The statute authorizes the Secretary to make exceptions to the 2 times rule in unusual cases, such as for low-volume items and services (but the Secretary may not make such an exception in the case of a drug or biological that has been designated as an orphan drug under section 526 of the Federal Food, Drug, and Cosmetic Act). In determining the APCs with a 2 times rule violation, we consider only those HCPCS codes that are significant based on the number of claims. We note that, for purposes of identifying significant procedure codes for examination under the 2 times rule, we consider procedure codes that have more than 1,000 single major claims or procedure codes that both have more than 99 single major claims and contribute at least 2 percent of the single major claims used to establish the APC cost to be significant (75 FR 71832). This longstanding definition of when a procedure code is significant for purposes of the 2 times rule was selected because we believe that a subset of 1,000 or fewer claims is negligible within the set of approximately 100 million single procedure or single session claims we use for establishing costs. Similarly, a procedure code for which there are fewer than 99 single claims and that comprises less than 2 percent of the single major claims within an APC will have a negligible impact on the APC cost (75 FR 71832). In this section of this proposed rule, for CY 2023, we propose to make exceptions to this limit on the variation of costs within each APC group in unusual cases, such as for certain low-volume items and services.

For the CY 2023 OPPS update, we identified the APCs with violations of the 2 times rule and we propose changes to the procedure codes assigned to these APCs (with the exception of those APCs for which we propose a 2 times rule exception) in Addendum B to this proposed rule. We note that Addendum B does not appear in the printed version of the **Federal Register** as part of this proposed rule. Rather, it is published and made available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html*. To eliminate a violation of the 2 times rule and improve clinical and resource homogeneity in the APCs for which we are not proposing a 2 times rule exception, we propose to reassign these procedure codes to new APCs that contain services that are similar with regard to both their clinical and resource characteristics. In many cases, the proposed procedure code reassignments and associated APC reconfigurations for CY 2023 included in this proposed rule are related to changes in costs of services that were observed in the CY 2021 claims data available for CY 2023 ratesetting. Addendum B to this CY 2023 OPPS/ASC proposed rule identifies with a comment indicator ''CH'' those procedure codes for which we propose a change to the APC assignment or status indicator, or both, that were initially assigned in the July 1, 2022 OPPS Addendum B Update (available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Addendum-A-and-Addendum-B-Updates.html*).

3. Proposed APC Exceptions to the 2 Times Rule

Taking into account the APC changes that we propose to make for CY 2023, we reviewed all of the APCs for which we identified 2 times rule violations to determine whether any of the APCs would qualify for an exception. We used the following criteria to evaluate whether to propose exceptions to the 2 times rule for affected APCs:

- Resource homogeneity;
- Clinical homogeneity;
- Hospital outpatient setting utilization;
- Frequency of service (volume); and
- Opportunity for upcoding and code fragments.

For a detailed discussion of these criteria, we refer readers to the April 7, 2000 final rule (65 FR 18457 through 18458).

Based on the CY 2021 claims data available for this proposed rule, we found 23 APCs with violations of the 2 times rule. We applied the criteria as described above to identify the APCs for which we propose to make exceptions under the 2 times rule for CY 2023 and found that all of the 23 APCs we identified meet the criteria for an exception to the 2 times rule based on the CY 2021 claims data available for this proposed rule. We note that, on an annual basis, based on our analysis of the latest claims data, we identify violations to the 2 times rule and propose changes when appropriate. Those APCs that violate the 2 times rule are identified and appear in Table 8 below. In addition, we did not include in that determination those APCs where a 2 times rule violation was not a relevant concept, such as APC 5401 (Dialysis), which only has two HCPCS codes assigned to it that have similar geometric mean costs and do not create a 2 times rule violation. Therefore, we have only identified those APCs, including those with criteria-based costs, such as device-dependent CPT/HCPCS codes, with violations of the 2 times rule, where a 2 times rule violation is a relevant concept.

Table 8 of this proposed rule lists the 23 APCs for which we propose to make an exception under the 2 times rule for CY 2023 based on the criteria cited above and claims data submitted between January 1, 2021 and December 31, 2021 and processed on or before December 31, 2021, and CCRs, if available. The proposed geometric mean costs for covered hospital outpatient services for these and all other APCs that were used in the development of this proposed rule can be found on the CMS website at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.html*.

TABLE 8: PROPOSED CY 2023 APC EXCEPTIONS TO THE 2 TIMES RULE

Proposed CY 2023 APC	Proposed CY 2023 APC Title
5012	Clinic Visits and Related Services
5071	Level 1 Excision/ Biopsy/ Incision and Drainage
5301	Level 1 Upper GI Procedures
5521	Level 1 Imaging without Contrast
5522	Level 2 Imaging without Contrast
5523	Level 3 Imaging without Contrast
5524	Level 4 Imaging without Contrast

5823	Level 3 Health and Behavior Services

BILLING CODE 4120–01–C

C. Proposed New Technology APCs

1. Background

In the CY 2002 OPPS final rule (66 FR 59903), we finalized changes to the time period in which a service can be eligible for payment under a New Technology APC. Beginning in CY 2002, we retain services within New Technology APC groups until we gather sufficient claims data to enable us to assign the service to an appropriate clinical APC. This policy allows us to move a service from a New Technology APC in less than 2 years if sufficient data are available. It also allows us to retain a service in a New Technology APC for more than 2 years if sufficient data upon which to base a decision for reassignment have not been collected.

We also adopted in the CY 2002 OPPS final rule the following criteria for assigning a complete or comprehensive service to a New Technology APC: 1) the service must be truly new, meaning it cannot be appropriately reported by an existing HCPCS code assigned to a clinical APC and does not appropriately fit within an existing clinical APC; 2) the service is not eligible for transitional pass-through payment (however, a truly new, comprehensive service could qualify for assignment to a new technology APC even if it involves a device or drug that could, on its own, qualify for a pass-through payment); and 3) the service falls within the scope of Medicare benefits under section 1832(a) of the Act and is reasonable and necessary in accordance with section 1862(a)(1)(A) of the Act (66 FR 59898 through 59903). For additional information about our New Technology APC policy, we refer readers to *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/passthrough_payment* on the CMS website and then follow the instructions to access the MEARIS™ system for OPPS New Technology APC applications.

In the CY 2004 OPPS final rule with comment period (68 FR 63416), we restructured the New Technology APCs to make the cost intervals more consistent across payment levels and refined the cost bands for these APCs to retain two parallel sets of New Technology APCs: one set with a status indicator of ''S'' (Significant Procedures, Not Discounted when Multiple. Paid under OPPS; separate APC payment) and the other set with a status indicator of ''T'' (Significant Procedure, Multiple Reduction Applies. Paid under OPPS; separate APC payment). These current New Technology APC configurations allow us to price new technology

services more appropriately and consistently.

For CY 2022, there were 52 New Technology APC levels, ranging from the lowest cost band assigned to APC 1491 (New Technology—Level 1A ($0–$10)) to the highest cost band assigned to APC 1908 (New Technology—Level 52 ($145,001–$160,000)). We note that the cost bands for the New Technology APCs, specifically, APCs 1491 through 1599 and 1901 through 1908, vary with increments ranging from $10 to $14,999. These cost bands identify the APCs to which new technology procedures and services with estimated service costs that fall within those cost bands are assigned under the OPPS. Payment for each APC is made at the mid-point of the APC's assigned cost band. For example, payment for New Technology APC 1507 (New Technology—Level 7 ($501–$600)) is made at $550.50.

Under the OPPS, one of our goals is to make payments that are appropriate for the services that are necessary for the treatment of Medicare beneficiaries. The OPPS, like other Medicare payment systems, is budget neutral and increases are limited to the annual hospital market basket increase reduced by the productivity adjustment. We believe that our payment rates reflect the costs that are associated with providing care to Medicare beneficiaries and are adequate to ensure access to services (80 FR 70374). For many emerging technologies, there is a transitional period during which utilization may be low, often because providers are first learning about the technologies and their clinical utility. Quite often, parties request that Medicare make higher payments under the New Technology APCs for new procedures in that transitional phase. These requests, and their accompanying estimates for expected total patient utilization, often reflect very low rates of patient use of expensive equipment, resulting in high per-use costs for which requesters believe Medicare should make full payment. Medicare does not, and we believe should not, assume responsibility for more than its share of the costs of procedures based on projected utilization for Medicare beneficiaries and does not set its payment rates based on initial projections of low utilization for services that require expensive capital equipment. For the OPPS, we rely on hospitals to make informed business decisions regarding the acquisition of high-cost capital equipment, taking into consideration their knowledge about their entire patient base (Medicare beneficiaries included) and an understanding of Medicare's and other payers' payment policies. We refer readers to the CY 2013 OPPS/ASC final rule with comment period (77 FR 68314) for further discussion regarding this payment policy.

We note that, in a budget-neutral system, payments may not fully cover hospitals' costs in a particular circumstance, including those for the purchase and maintenance of capital equipment. We rely on hospitals to make their decisions regarding the acquisition of high-cost equipment with the understanding that the Medicare program must be careful to establish its initial payment rates, including those made through New Technology APCs, for new services that lack hospital claims data based on realistic utilization projections for all such services delivered in cost-efficient hospital outpatient settings. As the OPPS acquires claims data regarding hospital costs associated with new procedures, we regularly examine the claims data and any available new information regarding the clinical aspects of new procedures to confirm that our OPPS payments remain appropriate for procedures as they transition into mainstream medical practice (77 FR 68314). For CY 2023, we include the proposed payment rates for New Technology APCs 1491 to 1599 and 1901 through 1908 in Addendum A to this proposed rule (which is available via the internet on the CMS website).

2. Establishing Payment Rates for Low-Volume New Technology Services

Services that are assigned to New Technology APCs are typically new services that do not have sufficient claims history to establish an accurate payment for the services. One of the objectives of establishing New Technology APCs is to generate sufficient claims data for a new service so that it can be assigned to an appropriate clinical APC. Some services that are assigned to New Technology APCs have very low annual volume, which we consider to be fewer than 100 claims. We consider services with fewer than 100 claims annually to be low-volume services because there is a higher probability that the payment data for a service may not have a normal statistical distribution, which could affect the quality of our standard cost methodology that is used to assign services to an APC. In addition, services with fewer than 100 claims per year are not generally considered to be significant contributors to the APC ratesetting calculations and, therefore, are not included in the assessment of the 2 times rule. As we explained in the CY 2019 OPPS/ASC final rule with comment period (83 FR 58892), we were concerned that the methodology we use to estimate the cost of a service under the OPPS by calculating the geometric mean for all separately paid claims for a HCPCS service code from the most recent available year of claims data may not generate an accurate estimate of the actual cost of the service for these low-volume services.

In accordance with section 1833(t)(2)(B) of the Act, services classified within each APC must be comparable clinically and with respect to the use of resources. As described earlier, assigning a service to a New Technology APC allows us to gather claims data to price the service and assign it to the APC with services that use similar resources and are clinically comparable. However, where utilization of services assigned to a New Technology APC is low, it can lead to wide variation in payment rates from year to year, resulting in even lower utilization and potential barriers to access to new technologies, which ultimately limits our ability to assign the service to the appropriate clinical APC. To mitigate these issues, we adopted a policy in the CY 2019 OPPS/ASC final rule with comment period to utilize our equitable adjustment authority at section 1833(t)(2)(E) of the Act to adjust how we determine the costs for low-volume services assigned to New Technology APCs (83 FR 58892 through 58893).

For purposes of this adjustment, we stated in the CY 2019 OPPS/ASC final rule with comment period that we believed that it was appropriate to use up to 4 years of claims data in calculating the applicable payment rate for the prospective year, rather than using solely the most recent available year of claims data, when a service assigned to a New Technology APC has an annual claims volume of fewer than 100 claims (83 FR 58893). Using multiple years of claims data will potentially allow for more than 100 claims to be used to set the payment rate, which would, in turn, create a more statistically reliable payment rate.

In addition, to better approximate the cost of a low-volume service within a New Technology APC, we also stated that using the median or arithmetic mean rather than the geometric mean (which ''trims'' the costs of certain claims out) could be more appropriate in some circumstances, given the extremely low volume of claims. Low claim volumes increase the impact of ''outlier'' claims; that is, claims with either a very low or very high payment rate as compared to the average claim, which would have a substantial impact

on any statistical methodology used to estimate the most appropriate payment rate for a service. Also, having the flexibility to utilize an alternative statistical methodology to calculate the payment rate in the case of low-volume new technology services helps to create a more stable payment rate.

In the CY 2019 OPPS/ASC final rule (83 FR 58893), we implemented a policy that we would seek public comments on which statistical methodology should be used to determine the payment rate for each low-volume service assigned to a New Technology APC. In the preamble of each annual rulemaking, we stated that we would present the result of each statistical methodology and solicit public comment on which methodology should be used to establish the payment rate for a low-volume new technology service. In addition, we explained that we would use our assessment of the resources used to perform a service and guidance from the developer or manufacturer of the service, as well as other interested parties, to determine the most appropriate payment rate. Once we identified the most appropriate payment rate for a service, we would assign the service to the New Technology APC with the cost band that includes its payment rate.

In the CY 2022 OPPS/ASC final rule with comment period, we adopted a policy to continue to utilize our equitable adjustment authority under section 1833(t)(2)(E) of the Act to calculate the geometric mean, arithmetic mean, and median using up to four years of claims data to select the appropriate payment rate for purposes of assigning services with fewer than 100 claims per year to a New Technology APC (86 FR 63529). However, we replaced our specific low-volume New Technology APC policy with the universal low volume APC policy that we adopted beginning in CY 2022. Our universal low volume APC policy is similar to our past New Technology APC low volume policy except that the universal low volume APC policy applies to clinical APCs and brachytherapy APCs as well as low volume procedures assigned to New Technology APCs, and uses the highest of the geometric mean, arithmetic mean, or median based on up to 4 years of claims data to assign a procedure with fewer than 100 claims per year to an appropriate New Technology APC. For this proposed rule, we propose to designate three procedures assigned to New Technology APCs as low volume procedures and use the highest of the geometric mean, arithmetic mean, or median based on up to 4 years of claims data to assign such procedures to the appropriate New Technology APCs.

3. Procedures Assigned to New Technology APC Groups for CY 2023

As we described in the CY 2002 OPPS final rule (66 FR 59902), we generally retain a procedure in the New Technology APC to which it is initially assigned until we have obtained sufficient claims data to justify reassignment of the procedure to a clinically appropriate APC. In addition, in cases where we find that our initial New Technology APC assignment was based on inaccurate or inadequate information (although it was the best information available at the time), where we obtain new information that was not available at the time of our initial New Technology APC assignment, or where the New Technology APCs are restructured, we may, based on more recent resource utilization information (including claims data) or the availability of refined New Technology APC cost bands, reassign the procedure or service to a different New Technology APC that more appropriately reflects its cost (66 FR 59903).

Consistent with our current policy, for CY 2023, we propose to retain services within New Technology APC groups until we obtain sufficient claims data to justify reassignment of the service to an appropriate clinical APC. The flexibility associated with this policy allows us to reassign a service from a New Technology APC in less than 2 years if we have obtained sufficient claims data. It also allows us to retain a service in a New Technology APC for more than 2 years if we have not obtained sufficient claims data upon which to base a reassignment decision (66 FR 59902).

a. Retinal Prosthesis Implant Procedure

CPT code 0100T (Placement of a subconjunctival retinal prosthesis receiver and pulse generator, and implantation of intra-ocular retinal electrode array, with vitrectomy) describes the implantation of a retinal prosthesis, specifically, a procedure involving the use of the Argus® II Retinal Prosthesis System. This first retinal prosthesis was approved by FDA in 2013 for adult patients diagnosed with severe to profound retinitis pigmentosa. For information on the utilization and payment history of the Argus® II procedure and the Argus® II device through CY 2022, please refer to the CY 2022 OPPS final rule (86 FR 63529 through 63530).

Early in 2022, we learned that the manufacturer of the Argus® II device discontinued manufacturing the device in 2020. We also contacted the consultant who represented the manufacturer in presentations with CMS, and he confirmed that the Argus® II device is no longer being implanted. A review of OPPS claims data found that there were no claims billed for CPT code 0100T in either CY 2020 or CY 2021. Based on this information, we have determined that the Argus® II device is no longer available in the marketplace and that outpatient hospital providers are no longer performing the Argus® II implantation procedure. Therefore, we propose to make changes to the OPPS status indicators for HCPCS and CPT codes that are related to the Argus® II device and the Argus® II implantation procedure to indicate that Medicare payment is no longer available for the device and the implementation procedure as the Argus® II device is no longer on the market and therefore, is not being implanted. These coding changes would mean that providers could no longer receive payment for performing the Argus® II device or the device implantation procedure. These changes are described in Table 9.

TABLE 9: CY 2023 PROPOSED OPPS STATUS INDICATOR AND APC ASSIGNMENTS FOR THE ARGUS® II DEVICE AND THE ARGUS® II IMPLANTATION PROCEDURE

b. Administration of Subretinal Therapies Requiring Vitrectomy (APC 1562)

Effective January 1, 2021, CMS established HCPCS code C9770 (Vitrectomy, mechanical, pars plana approach, with subretinal injection of pharmacologic/biologic agent) and assigned it to a New Technology APC based on the geometric mean cost of HCPCS code 67036 (*Vitrectomy, mechanical, pars plana approach*) due to similar resource utilization. For CY 2021, HCPCS code C9770 was assigned to APC 1561 (New Technology—Level 24 ($3,001–$3,500)). This code may be used to describe the administration of CPT code J3398 (Injection, voretigene neparvovec-rzyl, 1 billion vector genomes). This procedure was previously discussed in depth in the CY 2021 OPPS/ASC final rule with comment period (85 FR 85939 through 85940). For CY 2022, we maintained the APC assignment of APC 1561 (New Technology—Level 24 ($3,001–$3,500)) for HCPCS code C9770 (86 FR 63531 through 63532).

CPT code J3398 (Injection, voretigene neparvovec-rzyl, 1 billion vector genomes) is for a gene therapy product indicated for a rare mutation-associated retinal dystrophy. Voretigene neparvovec-rzyl (Luxturna®) was approved by FDA in December of 2017 and is an adeno-associated virus vector-based gene therapy indicated for the treatment of patients with confirmed biallelic RPE65 mutation-associated retinal dystrophy.[2] This therapy is administered through a subretinal injection, which interested parties describe as an extremely delicate and sensitive surgical procedure. The FDA package insert describes one of the steps for administering Luxturna as, ''after completing a vitrectomy, identify the intended site of administration. The subretinal injection can be introduced via pars plana.''

Interested parties, including the manufacturer of Luxturna®, recommended HCPCS code 67036 (Vitrectomy, mechanical, pars plana approach) for the administration of the gene therapy.[3] However, the manufacturer previously contended the administration was not accurately described by any existing codes as HCPCS code 67036 (Vitrectomy, mechanical, pars plana approach) does not account for the administration itself.

CMS recognized the need to accurately describe the unique procedure that is required to administer the therapy described by HCPCS code J3398. Therefore, in the CY 2021 OPPS/ASC proposed rule (85 FR 48832), we proposed to establish a new HCPCS code, C97X1 (Vitrectomy, mechanical, pars plana approach, with subretinal injection of pharmacologic/biologic agent) to describe this process. We stated that we believed that this new HCPCS code accurately described the unique service associated with intraocular administration of HCPCS code J3398. We recognized that HCPCS code 67036 represents a clinically similar procedure and process that approximates similar resource utilization to C97X1. However, we also recognized that it is not prudent for the code that describes the administration of this unique gene therapy, C97X1, to be assigned to the same C–APC to which HCPCS code 67036 is assigned, as this would package the primary therapy, HCPCS code J3398, into the code that represents the process to administer the gene therapy.

Therefore, for CY 2021, we proposed to assign the services described by C97X1 to a New Technology APC with a cost band that contains the geometric mean cost for HCPCS code 67036. The placeholder code C97X1 was replaced by C9770. For CY 2021, we finalized our proposal to create C9770 (Vitrectomy, mechanical, pars plana approach, with subretinal injection of pharmacologic/biologic agent), and we assigned this code to APC 1561 (New Technology—Level 24 ($3,001–$3,500)) using the geometric mean cost of HCPCS code 67036. For CY 2022, we continued to assign HCPCS code C9770 to APC 1561 (New Technology—Level 24 ($3,001–$3,500)) using the geometric mean cost of HCPCS code 67036.

For CY 2023, there are 11 single claims available for ratesetting for HCPCS code C9770. Because this is the first year we have claims data for HCPCS code C9770, we propose to base the payment rate of HCPCS code C9770 on claims data for that code rather than on the geometric mean cost of HCPCS code 67036. Given the low number of claims for this procedure, we propose to designate HCPCS C9770 as a low volume procedure under our universal low volume APC policy and use the greater of the geometric mean, arithmetic mean, or median cost calculated based on the available claims data to calculate an appropriate payment rate for purposes of assigning C9770 to a New Technology APC.

Using CY 2021 claims, which are the only claims available in our 4-year look back period, we found the geometric mean cost for the service to be

[2] Luxturna. FDA Package Insert. Available: *https://www.fda.gov/media/109906/download.*

[3] LUXTURNA REIMBURSEMENT GUIDE FOR TREATMENT CENTERS. *https://mysparkgeneration.com/pdf/Reimbursement_Guide_for_Treatment_Centers_Interactive_010418_FINAL.pdf.*

approximately $3,326, the arithmetic mean cost to be approximately $3,466, and the median cost to be approximately $3,775. The median was the statistical methodology that estimated the highest cost for the service. The payment rate calculated using this methodology falls within the cost band for New Technology APC 1562 (New Technology—Level 25 ($3,501–$4,000)). Therefore, we propose to assign HCPCS code C9770 to APC 1562 for CY 2023.

Please refer to Table 10 below for the proposed OPPS New Technology APC and status indicator assignments for HCPCS code C9770 for CY 2023. The proposed CY 2023 payment rates can be found in Addendum B to this proposed rule.

TABLE 10: FINAL CY 2022 & PROPOSED CY 2023 OPPS NEW TECHNOLOGY APC AND STATUS INDICATOR ASSIGNMENTS FOR HCPCS CODE C9770

C9770	Vitrectomy, mechanical, pars plana approach, with subretinal injection of pharmacologic/biologic agent	T	1561	T	1562

c. Bronchoscopy With Transbronchial Ablation of Lesion(s) by Microwave Energy (APC 1562)

Effective January 1, 2019, CMS established HCPCS code C9751 (Bronchoscopy, rigid or flexible, transbronchial ablation of lesion(s) by microwave energy, including fluoroscopic guidance, when performed, with computed tomography acquisition(s) and 3–D rendering, computer-assisted, image-guided navigation, and endobronchial ultrasound (EBUS) guided transtracheal and/or transbronchial sampling (for example, aspiration[s]/biopsy[ies]) and all mediastinal and/or hilar lymph node stations or structures and therapeutic intervention(s)). This microwave ablation procedure utilizes a flexible catheter to access the lung tumor via a working channel and may be used as an alternative procedure to a percutaneous microwave approach. Based on our review of the New Technology APC application for this service and the service's clinical similarity to existing services paid under the OPPS, we estimated the likely cost of the procedure would be between $8,001 and $8,500.

In claims data available for CY 2019 for the CY 2021 OPPS/ASC final rule with comment period, there were four claims reported for bronchoscopy with transbronchial ablation of lesions by microwave energy. Given the low volume of claims for the service, we proposed for CY 2021 to apply the policy we adopted in CY 2019, under which we utilize our equitable adjustment authority under section 1833(t)(2)(E) of the Act to calculate the geometric mean, arithmetic mean, and median costs to calculate an appropriate payment rate for purposes of assigning bronchoscopy with transbronchial ablation of lesions by microwave energy to a New Technology APC. We found the geometric mean cost for the service to be approximately $2,693, the arithmetic mean cost to be approximately $3,086, and the median cost to be approximately $3,708. The median was the statistical methodology that estimated the highest cost for the service. The payment rate calculated using this methodology fell within the cost band for New Technology APC 1562 (New Technology—Level 25 ($3,501–$4,000)). Therefore, we assigned HCPCS code C9751 to APC 1562 for CY 2021.

In CY 2022, we used again the claims data from CY 2019 for HCPCS code C9751. Since the claims data was unchanged from when it was used in CY 2021, the values for the geometric mean cost ($2,693), the arithmetic mean cost ($3,086), and the median cost ($3,708) for the service described by HCPCS code C9751 remained the same. The highest cost metric using these methodologies was again the median and within the cost band for New Technology APC 1562 (New Technology—Level 25 ($3,501–$4,000)). Therefore, we continued to assign HCPCS code C9751 to APC 1562 (New Technology—Level 25 ($3,501– $4,000)), with a payment rate of $3,750.50 for CY 2022.

There were no claims reported in CY 2020 or CY 2021 for HCPCS code C9751. Thus, for CY 2023, the only available claims for HCPCS code C9751 continue to be from CY 2019, and the reported claims are the same claims used to calculate the payment rate for the service in the CY 2021 and CY 2022 OPPS/ASC final rules with comment period. Therefore, given the low number of claims for this procedure, we propose to designate this procedure as low volume under our universal low volume policy and use the highest of the geometric mean cost, arithmetic mean cost, or median cost based on up to 4 years of claims data to assign the procedure to the appropriate New Technology APCs. Because our proposal uses the same claims as we used for CY 2021 and CY 2022, we found the same values for the geometric mean cost, arithmetic mean cost, and the median cost for CY 2023. Once again, the median ($3,708) was the statistical methodology that estimated the highest cost for the service. The payment rate calculated using this methodology continues to fall within the cost band for New Technology APC 1562 (New Technology—Level 25 ($3,501–$4,000)). Therefore, we propose to continue to assign HCPCS code C9751 to APC 1562 (New Technology—Level 25 ($3,501–$4,000)), with a proposed payment rate of $3,750.50 for CY 2023. Details regarding HCPCS code C9751 are included in Table 11.

TABLE 11: FINAL CY 2022 AND PROPOSED CY 2023 OPPS NEW TECHNOLOGY APC AND STATUS INDICATOR ASSIGNMENTS FOR HCPCS CODE C9751

C9751	Bronchoscopy, rigid or flexible, transbronchial ablation of lesion(s) by microwave energy, including fluoroscopic guidance, when performed, with computed tomography acquisition(s) and 3-D rendering, computer-assisted, image-guided navigation, and endobronchial ultrasound (EBUS) guided transtracheal and/or transbronchial sampling (eg, aspiration[s]/biopsy[ies]	T	1562	T	1562

d. Cardiac Positron Emission Tomography (PET)/Computed Tomography (CT) Studies (APCs 1522 and 1523)

Effective January 1, 2020, we assigned three CPT codes (78431, 78432, and 78433) that describe the services associated with cardiac PET/CT studies to New Technology APCs. CPT code 78431 was assigned to APC 1522 (New Technology—Level 22 ($2,001–$2,500)) with a payment rate of $2,250.50. CPT codes 78432 and 78433 were assigned to APC 1523 (New Technology—Level 23 ($2,501–$3,000)) with a payment rate of $2,750.50. We did not receive any claims data for these services for either of the CY 2021 or CY 2022 OPPS proposed or final rules. Therefore, we continued to assign CPT code 78431 to APC 1522 (New Technology—Level 22 ($2,001–$2,500)) with a payment rate of $2,250.50 in CY 2021 and CY 2022. Likewise, we continued to assign CPT codes 78432 and 78433 to APC 1523 (New Technology—Level 23 ($2,501–$3,000)) with a payment rate of $2,750.50.

For CY 2023, we propose to use CY 2021 claims data to determine the payment rates for CPT codes 78431, 78432, and 78433. CPT code 78431 had over 18,000 single frequency claims in CY 2021, which are used to calculate estimated costs for individual services. The geometric mean for CPT code 78431 was approximately $2,509, which is an amount that is above the cost band for APC 1522 (New Technology—Level 22 ($2,001–$2,500)), where the procedure is currently assigned. We propose, for CY 2023, that CPT code 78431 be reassigned to APC 1523 (New Technology—Level 23 ($2,501–$3,000)) with a payment rate of $2,750.50. Please refer to Table 12 for the proposed New Technology APC and status indicator assignments for CPT code 78431.

There were only 5 single frequency claims in CY 2021 for CPT code 78432. As this is below the threshold of 100 claims for a service within a year, we propose to apply our universal low volume APC policy and use the highest of the geometric mean cost, arithmetic mean cost, or median cost based on up to 4 years of claims data to assign CPT code 78432 to the appropriate New Technology APC. Although we use up to four years of claims data to calculate the appropriate New Technology APC assignment for low volume procedures, for CPT code 78432, the only available claims data are from CY 2021. Our analysis of the data found the geometric mean cost of the service is approximately $1,747, the arithmetic mean cost of the service is approximately $1,899, and the median cost of the service is approximately $1,481. The arithmetic mean was the statistical methodology that estimated the highest cost for the service. Therefore, we propose, for CY 2023, to assign CPT code 78432 to APC 1520 (New Technology—Level 20 ($1,801–$1,900)) with a payment rate of $1,850.50. Please refer to Table 12 for the proposed on New Technology APC and status indicator assignments for CPT code 78432.

There were 954 single frequency claims reporting CPT code 78433 in CY 2021. The geometric mean for CPT code 78433 was approximately $1,999, which is an amount that is below the cost band for APC 1523 (New Technology—Level 23 ($2,501–$3,000)), where the procedure is currently assigned. We propose, for CY 2023, that CPT code 78433 be reassigned to APC 1521 (New Technology—Level 21 ($1,901–$2,000)) with a payment rate of $1,950.50. Please refer to Table 12 for the proposed New Technology APC and status indicator assignments for CPT code 78433.

BILLING CODE 4120–01–P

78433	Myocardial imaging, positron emission tomography (PET), combined perfusion with metabolic evaluation study (including ventricular wall motion[s] and/or ejection fraction[s], when performed), dual radiotracer (eg, myocardial viability); with concurrently acquired computed tomography transmission scan	S	1523	S	1521

e. V-Wave Medical Interatrial Shunt Procedure (APC 1590)

A randomized, double-blinded, controlled IDE study is currently in progress for the V-Wave interatrial shunt. The V-Wave interatrial shunt is for patients with severe symptomatic heart failure and is designed to regulate left atrial pressure in the heart. All participants who passed initial screening for the study receive a right heart catheterization procedure described by CPT code 93451 (Right heart catheterization including measurement(s) of oxygen saturation and cardiac output, when performed). Participants assigned to the experimental group also receive the V-Wave interatrial shunt procedure while participants assigned to the control group only receive right heart catheterization. The developer of V-Wave was concerned that the current coding of these services by Medicare would reveal to the study participants whether they had received the interatrial shunt because an additional procedure code, CPT code 93799 (Unlisted cardiovascular service or procedure), would be included on the claims for participants receiving the interatrial shunt. Therefore, for CY 2020, we created a temporary HCPCS code to describe the V-wave interatrial shunt procedure for both the experimental group and the control group in the study. Specifically, we established HCPCS code C9758 (Blinded procedure for NYHA class III/IV heart failure; transcatheter implantation of interatrial shunt or placebo control, including right heart catheterization, trans-esophageal echocardiography (TEE)/intracardiac echocardiography (ICE), and all imaging with or without guidance (for example, ultrasound, fluoroscopy), performed in an approved investigational device exemption (IDE) study) to describe the service, and we assigned the service to New Technology APC 1589 (New Technology—Level 38 ($10,001–$15,000)).

In the CY 2021 OPPS/ASC final rule with comment period (85 FR 85946), we stated that we believe similar resources and device costs are involved with the V-Wave interatrial shunt procedure and the Corvia Medical interatrial shunt procedure (HCPCS code C9760), except that payment for HCPCS codes C9758 and C9760 differs based on how often the interatrial shunt is implanted when

each code is billed. An interatrial shunt is implanted one-half of the time HCPCS code C9758 is billed, whereas an interatrial shunt is implanted every time HCPCS code C9760 is billed. Accordingly, for CY 2021, we reassigned HCPCS code C9758 to New Technology APC 1590, which reflects the cost of having surgery every time and receiving the interatrial shunt one-half of the time the procedure is performed.

For CY 2022, we used the same claims data from CY 2019 that we did for CY 2021 OPPS final rule. Because there were no claims reporting HCPCS code C9758, we continued to assign HCPCS code C9758 to New Technology APC 1590 with a payment rate of $17,500.50 for CY 2022.

For CY 2023, there were no claims from CY 2021 billed with HCPCS code C9758. Because there are no claims reporting HCPCS code C9758, we propose to continue to assign HCPCS code C9758 to New Technology APC 1590 with a payment rate of $17,500.50 for CY 2023. The proposed New Technology APC and status indicator assignments for HCPCS codes C9758 are shown in Table 13.

BILLING CODE 4120–01–P

TABLE 13: FINAL CY 2022 AND PROPOSED CY 2023 OPPS NEW TECHNOLOGY APC AND STATUS INDICATOR ASSIGNMENTS FOR BLINDED INTRATRIAL SHUNT PROCEDURE

HCPCS Code	Long Descriptor	Final CY 2022 OPPS SI	Final CY 2022 OPPS SI	Proposed 2023 OPPS SI	Proposed 2023 OPPS SI
C9758	Blinded procedure for NYHA class III/IV heart failure; transcatheter implantation of interatrial shunt or placebo control, including right heart catheterization, trans-esophageal echocardiography (TEE)/intracardiac echocardiography (ICE), and all imaging with or without guidance (for example, ultrasound, fluoroscopy), performed in an approved investigational device exemption (IDE) study	T	1590	T	1590

f. Corvia Medical Interatrial Shunt Procedure (APC 1592)

Corvia Medical is currently conducting its pivotal trial for its interatrial shunt procedure. The trial started in Quarter 1 of CY 2017 and continued through Quarter 3 of CY 2021.[4] On July 1, 2020, we established HCPCS code C9760 (Non-randomized, non-blinded procedure for nyha class ii, iii, iv heart failure; transcatheter implantation of interatrial shunt or placebo control, including right and left heart catheterization, transeptal puncture, trans-esophageal echocardiography (tee)/intracardiac echocardiography (ice), and all imaging with or without guidance (for example, ultrasound, fluoroscopy), performed in an approved investigational device exemption (ide) study) to facilitate the implantation of the Corvia Medical interatrial shunt.

As we stated in the CY 2021 OPPS final rule with comment period (85 FR 85947), we believe that similar resources and device costs are involved with the Corvia Medical interatrial shunt procedure and the V-Wave interatrial shunt procedure. Unlike the V-Wave interatrial shunt, which is implanted half the time the associated interatrial shunt procedure described by HCPCS code C9758 is billed, the Corvia Medical interatrial shunt is implanted every time the associated interatrial

[4] *https://clinicaltrials.gov/ct2/show/NCT03088033?term=NCT03088033&rank=1.*

shunt procedure (HCPCS code C9760) is billed. Therefore, for CY 2021, we assigned HCPCS code C9760 to New Technology APC 1592 (New Technology—Level 41 ($25,001–$30,000)) with a payment rate of $27,500.50. We also modified the code descriptor for HCPCS code C9760 to remove the phrase ''or placebo control,'' from the descriptor. In CY 2022, we used the same claims data as was used in the CY 2021 OPPS final rule to determine the payment rate for HCPCS code C9760 because there were no claims for this service in CY 2019, the year used for ratesetting for CY 2022. Accordingly, we continued to assign HCPCS code C9760 to New Technology APC 1592 in CY 2022.

For CY 2023, we propose to use the claims data from CY 2021 to establish payment rates for services. However, there are no claims with HCPCS code C9760 in the CY 2021 claims data available for ratesetting. Therefore, we propose to continue to assign HCPCS code C9760 to New Technology APC 1592. The proposed New Technology APC and status indicator assignments for HCPCS code C9760 are shown in Table 14.

TABLE 14: FINAL CY 2022 AND PROPOSED CY 2023 OPPS NEW TECHNOLOGY APC AND STATUS INDICATOR ASSIGNMENTS FOR NON-RANDOMIZED, NON-BLINDED INTERATRIAL SHUNT PROCEDURE

g. Supervised Visits for Esketamine Self-Administration (APCs 1512 and 1516)

On March 5, 2019, FDA approved Spravato™ (esketamine) nasal spray, used in conjunction with an oral antidepressant, for treatment of depression in adults who have tried other antidepressant medicines but have not benefited from them (treatment-resistant depression (TRD)). Because of the risk of serious adverse outcomes resulting from sedation and dissociation caused by Spravato administration, and the potential for misuse of the product, it is only available through a restricted distribution system under a Risk Evaluation and Mitigation Strategy (REMS). A REMS is a drug safety program that FDA can require for certain medications with serious safety concerns to help ensure the benefits of the medication outweigh its risks.

A treatment session of esketamine consists of instructed nasal self-administration by the patient followed by a period of post-administration observation of the patient under direct supervision of a health care professional. Esketamine is a noncompetitive N-methyl D-aspartate (NMDA) receptor antagonist. It is a nasal spray supplied as an aqueous solution of esketamine hydrochloride in a vial with a nasal spray device. This is the first FDA approval of esketamine for any use. Each device delivers two sprays containing a total of 28 mg of esketamine. Patients would require either two devices (for a 56 mg dose) or three devices (for an 84 mg dose) per treatment.

Because of the risk of serious adverse outcomes resulting from sedation and dissociation caused by Spravato administration, and the potential for misuse of the product, Spravato is only available through a restricted distribution system under a REMS, patients must be monitored by a health care provider for at least two hours after receiving their Spravato dose, the prescriber and patient must both sign a Patient Enrollment Form, and the product must only be administered in a certified medical office where the health care provider can monitor the patient. Please refer to the CY 2020 PFS final rule and interim final rule for more information about supervised visits for esketamine self-administration (84 FR 63102 through 63105).

To facilitate prompt beneficiary access to the new, potentially life-saving treatment for TRD using esketamine, we created two new HCPCS G codes, G2082 and G2083, effective January 1, 2020.

HCPCS code G2082 is for an outpatient visit for the evaluation and management of an established patient that requires the supervision of a physician or other qualified health care professional and provision of up to 56 mg of esketamine through nasal self-administration and includes two hours of post-administration observation. HCPCS code G2082 was assigned to New Technology APC 1508 (New Technology—Level 8 ($601–$700)) with a payment rate of $650.50. HCPCS code G2083 describes a similar service to HCPCS code G2082 but involves the administration of more than 56 mg of esketamine. HCPCS code G2083 was assigned to New Technology APC 1511 (New Technology—Level 11 ($901–$1000)) with a payment rate of $950.50.

For CY 2023, we propose to use CY 2021 claims data to determine the payment rates for HCPCS codes G2082 and G2083. Therefore, for CY 2023, we propose to assign these two HCPCS codes to New Technology APCs based on the codes' geometric mean costs. Specifically, we propose to assign HCPCS code G2082 to New Technology APC 1511 (New Technology—Level 11 ($901–$1,000)) based on its geometric mean cost of $995.47. We also propose to assign HCPCS code G2083 to New Technology APC 1516 (New Technology—Level 16 ($1,401–$1,500)) based on its geometric mean cost of $1,489.93.

Details about the proposed New Technology APC and status indicator assignments for these HCPCS codes are shown in Table 15. The proposed CY 2023 payment rates for these HCPCS codes can be found in Addendum B to this proposed rule.

TABLE 15: FINAL CY 2022 & PROPOSED CY 2023 OPPS NEW TECHNOLOGY APC AND STATUS INDICATOR ASSIGNMENTS FOR HCPCS CODES G2082 AND G2083

HCPCS Code	Long Descriptor	Final CY 2022 OPPS SI	Final CY 2022 OPPS APC	Proposed CY 2023 OPPS SI	Proposed CY 2023 OPPS APC
G2082	Office or other outpatient visit for the evaluation and management of an established patient that requires the supervision of a physician or other qualified health care professional and provision of up to 56 mg of esketamine nasal self-administration, includes 2 hours post-administration observation	S	1508	S	1511
G2083	Office or other outpatient visit for the evaluation and management of an established patient that requires the supervision of a physician or other qualified health care professional and provision of greater than 56 mg esketamine nasal self-administration, includes 2 hours post-administration observation	S	1511	S	1516

h. DARI Motion Procedure (APC 1505)

CPT code 0693T (Comprehensive full body computer-based markerless 3D kinematic and kinetic motion analysis and report) was effective January 1, 2022. The technology consists of eight cameras that surround a patient. The cameras send live video to a computer workstation that analyzes the video to create a 3D reconstruction of the patient without the need for special clothing, markers, or devices attached to the patient's clothing or skin. The technology is intended to guide health care providers on pre- and post-operative surgical intervention and on the best course of physical therapy and rehabilitation for patients. In CY 2022, we assigned CPT code 0693T to New Technology APC 1505 (New Technology—Level 5 ($301–$400)), for CY 2022.

This service became effective in the OPPS in CY 2022. Therefore, there are no claims for this service in the CY 2021 OPPS claims data. Accordingly, for CY 2023 we propose to continue assigning CPT code 0693T to New Technology APC 1505. The proposed New Technology APC and status indicator assignments for CPT code 0693T are found in Table 16.

TABLE 16: FINAL CY 2022 AND PROPOSED CY 2023 OPPS NEW TECHNOLOGY APC AND STATUS INDICATOR ASSIGNMENTS FOR THE DARI MOTION PROCEDURE

CPT Code	Long Descriptor	Final CY 2022 OPPS SI	Final CY 2022 OPPS APC	Proposed CY 2023 OPPS SI	Proposed CY 2023 OPPS APC
0693T	Comprehensive full body computer-based markerless 3D kinematic and kinetic motion analysis and report	S	1505	S	1505

i. Histotripsy Service (APC 1575)

CPT code 0686T (Histotripsy (*i.e.,* non-thermal ablation via acoustic energy delivery) of malignant hepatocellular tissue, including image guidance) was effective July 1, 2021. Histotripsy is a non-invasive, non-thermal, mechanical process that uses a focused beam of sonic energy to destroy cancerous liver tumors. We note that the device that is used in the histotripsy procedure is currently under a Category A IDE clinical study (NCT04573881). The clinical trial is a non-randomized, prospective trial to evaluate the efficacy and safety of the device for the treatment of primary or metastatic tumors located in the liver.[5] We note that devices from Category A IDE studies are excluded from Medicare payment. Therefore, payment for CPT code 0686T reflects only the service that is performed each time it is reported on a claim. For CY 2022, we assigned CPT code 0686T to New Technology APC 1575 (New Technology—Level 38 ($10,000–$15,000) with a payment rate of $12,500.

Since the service became effective in the OPPS in July 2021, there are no claims for this service in the CY 2021 OPPS claims data. Therefore, for CY 2023, we propose to continue assigning CPT code 0686T to New Technology APC 1575. The proposed New Technology APC and status indicator assignments for CPT code 0686T are found in Table17.

TABLE 17: FINAL CY 2022 AND PROPOSED CY 2023 OPPS NEW TECHNOLOGY APC AND STATUS INDICATOR ASSIGNMENTS FOR THE HISTOTRIPSY SERVICE

CPT Code	Long Descriptor	Final CY 2022 OPPS SI	Final CY 2022 OPPS APC	Proposed CY 2023 OPPS SI	Proposed CY 2023 OPPS APC
0686T	Histotripsy (ie, non-thermal ablation via acoustic energy delivery) of malignant hepatocellular tissue, including image guidance	S	1575	S	1575

j. Liver Multiscan Service (APC 1511)

CPT code 0648T (Quantitative magnetic resonance for analysis of tissue composition (*e.g.*, fat, iron, water content), including multiparametric data acquisition, data preparation and transmission, interpretation and report, obtained without diagnostic mri examination of the same anatomy (*e.g.*, organ, gland, tissue, target structure) during the same session; single organ) was effective July 1, 2021. LiverMultiScan is a Software as a medical Service (SaaS) that is intended to aid the diagnosis and management of chronic liver disease, the most prevalent of which is Non-Alcoholic Fatty Liver Disease (NAFLD). It provides standardized, quantitative imaging biomarkers for the characterization and assessment of inflammation, hepatocyte ballooning, and fibrosis, as well as steatosis, and iron accumulation. The SaaS receives MR images acquired from

[5] *ClinicalTrials.gov.* ''The HistoSonics System for Treatment of Primary and Metastatic Liver Tumors Using Histotripsy (#HOPE4LIVER) (#HOPE4LIVER).'' Accessed May 10, 2022. *https://clinicaltrials.gov/ct2/show/study/NCT04573881.*

patients' providers and analyzes the images using their proprietary Artificial Intelligence (AI) algorithms. The SaaS then sends the providers a quantitative metric report of the patient's liver fibrosis and inflammation. For CY 2022, we assigned CPT code 0648T to New Technology APC 1511 (New Technology—Level 11 ($901–$1,000) with a payment rate of $950.50.

Since HCPCS code 0648T became effective in the OPPS in July 2021, there has been only one claim from the CY 2021 claims data; but its payment rate appears to be an outlier based on the service invoice we received from the software developer. Accordingly, for CY 2023, we propose to continue assigning CPT code 0648T to New Technology APC 1511. The proposed New Technology APC and status indicator assignment for CPT code 0648T are found in Table 18.

TABLE 18: FINAL CY 2022 AND PROPOSED CY 2023 OPPS NEW TECHNOLOGY APC AND STATUS INDICATOR ASSIGNMENTS FOR THE LIVER MULTISCAN SERVICE

0648T	Quantitative magnetic resonance for analysis of tissue composition (eg, fat, iron, water content), including multiparametric data acquisition, data preparation and transmission, interpretation and report, obtained without diagnostic mri examination of the same anatomy (eg, organ, gland, tissue, target structure) during the same session; single organ	S	1511	S	1511

k. Minimally Invasive Glaucoma Surgery (MIGS) (APC 1526)

Prior to CY 2022, extracapsular cataract removal with insertion of intraocular lens was reported using CPT codes describing cataract removal alongside a CPT code for device insertion. Specifically, the procedure was described using CPT codes 66982 (Extracapsular cataract removal with insertion of intraocular lens prosthesis (1-stage procedure), manual or mechanical technique (for example, irrigation and aspiration or phacoemulsification), complex, requiring devices or techniques not generally used in routine cataract surgery (for example, iris expansion device, suture support for intraocular lens, or primary posterior capsulorrhexis) or performed on patients in the amblyogenic developmental stage; without endoscopic cyclophotocoagulation) or 66984 (Extracapsular cataract removal with insertion of intraocular lens prosthesis (1-stage procedure), manual or mechanical technique (for example, irrigation and aspiration or phacoemulsification); without endoscopic cyclophotocoagulation) and 0191T (Insertion of anterior segment aqueous drainage device, without extraocular reservoir, internal approach, into the trabecular meshwork; initial insertion).

For CY 2022, the AMA's CPT Editorial Panel created two new Category I CPT codes describing extracapsular cataract removal with insertion of intraocular lens prosthesis, specifically, CPT codes 66989 and 66991; deleted a Category III CPT code, specifically, CPT code 0191T, describing insertion of anterior segment aqueous drainage device; and created a new Category III CPT code, specifically, CPT code 0671T, describing interior segment aqueous drainage device without concomitant cataract removal.

For CY 2022, we finalized the assignment of CPT codes 66989 and 66991 to New Technology APC 1526 (New Technology—Level 26 ($4,001–$4,500)). We stated that we believed that

the change in coding for MIGS is significant in that it changes longstanding billing for the service from reporting two separate CPT codes to reporting a single bundled code. Without claims data, and given the magnitude of the coding change, we explained that we did not believe we had the necessary information on the costs associated with CPT codes 66989 and 66991 to assign them to a clinical APC at that time.

We note that for this proposed rule, the proposed payment rates are based on claims data submitted between January 1, 2021, and December 31, 2021, and processed on or before December 31, 2021, and CCRs, if available. Because CPT codes 66989 and 66991 were effective January 1, 2022, and we have no claims data for CY 2022, we propose to continue assigning CPT codes 66989 and 66991 to New Technology APC 1526 for CY 2023. The proposed New Technology APC and status indicator assignments for CPT codes 66989 and 66991 are found in Table 19.

Table 19: CY 2022 FINAL AND CY 2023 PROPOSED OPPS NEW TECHNOLOGY APC AND STATUS INDICATOR ASSIGNMENTS FOR CPT CODES 66989 AND 66991

CPT Code	Long Descriptor	Final CY 2022 OPPS SI	Final CY 2022 OPPS APC	Proposed CY 2023 OPPS SI	Proposed OPPS CY 2023 APC
66989	Extracapsular cataract removal with insertion of intraocular lens prosthesis (1-stage procedure), manual or mechanical technique (eg, irrigation and aspiration or phacoemulsification), complex, requiring devices or techniques not generally used in routine cataract surgery (eg, iris expansion device, suture support for intraocular lens, or primary posterior capsulorrhexis) or performed on patients in the amblyogenic developmental stage; with insertion of intraocular (eg, trabecular meshwork, supraciliary, suprachoroidal) anterior segment aqueous drainage device, without extraocular reservoir, internal approach, one or more	S	1526	S	1526
66991	Extracapsular cataract removal with insertion of intraocular lens prosthesis (1 stage procedure), manual or mechanical technique (eg, irrigation and aspiration or phacoemulsification); with insertion of intraocular (eg, trabecular meshwork, supraciliary, suprachoroidal) anterior segment aqueous drainage device, without extraocular reservoir, internal approach, one or more	S	1526	S	1526

l. Scalp Cooling (APC 1520)

CPT code 0662T (Scalp cooling, mechanical; initial measurement and calibration of cap) became effective on July 1, 2021 to describe initial measurement and calibration of a scalp cooling device for use during chemotherapy administration to prevent hair loss. According to Medicare's National Coverage Determination (NCD) policy, specifically, NCD 110.6 (Scalp Hypothermia During Chemotherapy to Prevent Hair Loss), the scalp cooling cap itself is classified as an incident to supply to a physician service, and would not be paid under the OPPS; however, interested parties have indicated that there are substantial resource costs of around $1,900 to $2,400 associated with calibration and fitting of the cap. CPT guidance states that CPT code 0662T should be billed once per chemotherapy session, which we interpret to mean once per course of chemotherapy. Therefore, if a course of chemotherapy involves 6 or 18 sessions, HOPDs should report CPT 0662T only once for that 6 or 18 therapy sessions. For CY 2022, we assigned CPT code 0662T to APC New Technology 1520 (New Technology—Level 20 ($1801–$1900)) with a payment rate of $1,850.50.

This service became effective in the OPPS in CY 2022. Therefore, there are no claims for this service in the CY 2021 OPPS claims data. Accordingly, for CY 2023, we propose to continue assigning CPT code 0662T to New Technology APC 1520. The proposed New Technology APC and status indicator assignments for CPT code 0662T are found in Table 20.

TABLE 20: FINAL CY 2022 AND PROPOSED CY 2023 NEW TECHNOLOGYAPC AND STATUS INDICATOR ASSIGNMENTS FOR THE SCALP COOLING PROCEDURE

CPT Code	Long Descriptor	Final CY 2022 OPPS SI	Final CY 2022 OPPS APC	Proposed CY 2023 OPPS SI	Proposed CY 2023 OPPS APC
0662T	Scalp cooling, mechanical; initial measurement and calibration of cap	S	1520	S	1520

m. Optellem Lung Cancer Prediction (LCP) (APC 1508)

CPT code 0721T (Quantitative computed tomography (CT) tissue characterization, including interpretation and report, obtained without concurrent CT examination of any structure contained in previously acquired diagnostic imaging) became effective July 1, 2022. The Optellum LCP applies an algorithm to a patient's CT scan to produce a raw risk score for a patient's pulmonary nodule. The risk score is used by the physician to quantify the risk of lung cancer and to help determine whether to refer the patient to a pulmonologist. For CY 2022, we assigned CPT code 0721T to APC New Technology 1508 (New Technology—Level 8 ($601–$700)).

This service became effective in the OPPS in CY 2022. Therefore, there are no claims for this service in the CY 2021 OPPS claims data for use in CY 2023 ratesetting. Accordingly, for CY 2023, we propose to continue to assign CPT code 0721T to New Technology APC 1508 with a status indication of ''S''. The proposed New Technology APC and status indicator assignments for CPT code 0721T are found in Table 21.

TABLE 21: FINAL CY 2022 AND PROPOSED CY 2023 NEW TECHNOLOGY APC AND STATUS INDICATOR ASSIGNMENTS FOR THE OPTELLUM LCP PROCEDURE

0721T	Quantitative computed tomography (CT) tissue characterization, including interpretation and report, obtained without concurrent CT examination of any structure contained in previously acquired diagnostic imaging	S	1508	S	1508

n. Quantitative Magnetic Resonance Cholangiopancreatography (QMRCP) (APC 1511)

CPT code 0723T (Quantitative magnetic resonance cholangiopancreatography (QMRCP) including data preparation and transmission, interpretation and report, obtained without diagnostic magnetic resonance imaging (MRI) examination of the same anatomy (*e.g.,* organ, gland, tissue, target structure) during the same session) became effective July 1, 2022. The QMRCP is a Software as a medical Service (SaaS) that performs quantitative assessment of the biliary tree and gallbladder. It uses a proprietary algorithm that produces a three-dimensional reconstruction of the biliary tree and pancreatic duct and also provides precise quantitative information of biliary tree volume and duct metrics. For CY 2022, we assigned CPT code 0723T to APC New Technology 1511 (New Technology—Level 11($900–$1,000)).

This service became effective in the OPPS in CY 2022. Therefore, there are no claims for this service in the CY 2021 OPPS claims data. Accordingly, for CY 2023, we propose to continue to assign CPT code 0723T to New Technology APC 1511 with a status indicator of ''S''. The proposed New Technology APC and status indicator assignments for CPT code 0723T are found in Table 22.

TABLE 22: FINAL CY 2022 AND PROPOSED CY 2023 OPPS NEW TECHNOLOGY APC AND STATUS INDICATOR ASSIGNMENTS FOR THE QMRCP PROCEDURE

CPT Code	Long Descriptor	Final CY 2022 OPPS SI	Final CY 2022 OPPS APC	Proposed CY 2023 OPPS SI	Proposed CY 2023 OPPS APC
0723T	Quantitative magnetic resonance cholangiopancreatography (QMRCP) including data preparation and transmission, interpretation and report, obtained without diagnostic magnetic resonance imaging (MRI) examination of the same anatomy (eg, organ, gland, tissue, target structure) during the same session	S	1511	S	1511

o. CardiAMP (APC 1574)

The CardiAMP cell therapy IDE studies are two randomized, double-blinded, controlled IDE studies: the CardiAMP Cell Therapy Chronic Myocardial Ischemia Trial [6] and the CardiAMP Cell Therapy Heart Failure Trial.[7] The two trials are designed to investigate the safety and efficacy of autologous bone marrow mononuclear cells treatment for the following: (1) patients with medically refractory and symptomatic ischemic cardiomyopathy; and (2) patients with refractory angina pectoris and chronic myocardial ischemia. On April 1, 2022, we established HCPCS code C9782 to describe the CardiAMP cell therapy IDE studies and assigned HCPCS code C9782 to APC 1574 (New Technology—Level 37 ($9,501–$10,000)) with the status indicator ''T''. We subsequently revised the descriptor for HCPCS code C9782 to: (Blinded procedure for New York Heart Association (NYHA) Class II or III heart failure, or Canadian Cardiovascular Society (CCS) Class III or IV chronic refractory angina; transcatheter intramyocardial transplantation of autologous bone marrow cells (*e.g.,* mononuclear) or placebo control, autologous bone marrow harvesting and preparation for transplantation, left heart catheterization including ventriculography, all laboratory services, and all imaging with or without guidance (*e.g.,* transthoracic echocardiography, ultrasound, fluoroscopy), all device(s), performed in an approved Investigational Device Exemption (IDE) study) to clarify the inclusion of the Helix transendocardial injection catheter device in the descriptor. Additionally, we determined that APC 1590 (New Technology—Level 39 ($15,001–$20,000)) most accurately accounts for the resources associated with furnishing the procedure described by HCPCS code C9782. We note that a transitional device pass-through application was submitted for the Helix transendorcardial injection catheter device for CY 2023. We direct readers to section IV.A of this proposed rule for a more detailed discussion of the transitional device pass-through applications.

This service became effective in the OPPS in CY 2022. Therefore, there are no claims for this service in the CY 2021 OPPS claims data for use in CY 2023 ratesetting. Accordingly, for CY 2023, we propose to assign HCPCS code C9782 to New Technology APC 1590 with a status indication of ''T''. The proposed New Technology APC and status indicator assignments for HCPCS code C9782 are found in Table 23.

BILLING CODE 4120–01–C

D. Universal Low Volume APC Policy for Clinical and Brachytherapy APCs

In the CY 2022 OPPS/ASC final rule with comment period (86 FR 63743 through 63747) we finalized our proposal to designate clinical and brachytherapy APCs as low volume APCs if they have fewer than 100 single claims that can be used for ratesetting purposes in the claims year used for ratesetting for the prospective year. For this proposed rule, CY 2021 claims are generally the claims used for ratesetting and clinical and brachytherapy APCs with fewer than 100 single claims from CY 2021 that can be used for ratesetting would be low volume APCs subject to our universal low volume APC policy. As we stated in the CY 2022 OPPS/ASC final rule with comment period, we adopted this policy to reduce the volatility in the payment rate for those APCs with fewer than 100 single claims. Where a clinical or brachytherapy APC has fewer than 100 single claims that can be used for ratesetting, under our low volume APC payment adjustment policy we determine the APC cost as the greatest of the geometric mean cost, arithmetic mean cost, or median cost based on up to 4 years of claims data. We excluded APC 5853 (Partial Hospitalization for CMHCs) and APC 5863 (Partial Hospitalization for Hospital-based PHPs) from our universal low volume APC policy given the different nature of policies that affect the partial hospitalization program. We also excluded APC 2698 (Brachytx, stranded, nos) and APC 2699 (Brachytx, non-stranded, nos) as our current methodology for determining payment rates for non-specified brachytherapy sources is appropriate.

Based on claims data available for this proposed rule, we propose to designate four brachytherapy APCs and four clinical APCs as low volume APCs under the OPPS. The four brachytherapy APCs and 4 clinical APCs meet our criteria of having fewer than 100 single claims in the claims year used for ratesetting (CY 2021 for this CY 2023 OPPS/ASC proposed rule) and therefore, we propose that they would be subject to our low volume APC policy. These eight APCs were designated as low volume APCs in CY 2022; a ninth APC—APC 2647 (Brachytherapy, non-stranded, Gold-198)—was designated as a low volume APC for CY 2022 but did not meet our claims threshold for this proposed rule.

Table 24 includes the APC geometric mean cost without the low volume APC designation, that is, if we calculated the geometric mean cost based on CY 2021 claims data available for ratesetting; the median, arithmetic mean, and geometric mean cost using up to four years of claims data based on the APCs' designation as a low volume APC; and the statistical methodology we propose to use to determine the APC's cost for ratesetting purposes for CY 2023. As discussed in our CY 2022 OPPS/ASC final rule with comment period (86 FR 63751 through 63754), given our concerns with CY 2020 claims data as a result of the PHE, the 4 years of claims data we proposed to use to calculate the costs for these APCs are CYs 2017, 2018, 2019, and 2021.

TABLE 24: COST STATISTICS FOR PROPOSED LOW VOLUME APCS USING COMPREHENSIVE (OPPS) RATESETTING METHODOLOGY FOR CY 2023

APC	APC Description	CY 2021 Claims Available for Ratesetting	Geometric Mean Cost without Low Volume APC Designation	Proposed Median Cost	Proposed Arithmetic Mean Cost	Proposed Geometric Mean Cost	Proposed CY 2023 APC Cost
2632	Iodine I-125 sodium iodide	9	$141.23	$31.74	$44.35	$37.26	$44.35
2635	Brachytx, non-str, HA, P-103	26	$125.24	$34.04	$51.09	$42.77	$51.09
2636	Brachy linear, non-str, P-103	0	---*	$49.65	$53.38	$38.80	$53.38
2647	Brachytx, NS, Non-HDRIr-192	14	$144.37	$184.49	$377.65	$141.18	$377.65
5244	Level 4 Blood Product Exchanges and Related Services	61	$44,995.52	$40,050.40	$42,322.34	$37,808.63	$42,322.34
5494	Level 4 Intraocular Procedures	52	$10,716.07	$16,498.85	$15,812.91	$12,394.87	$16,498.85
5495	Level 5 Intraocular Procedures	12	$11,280.14	$16,711.80	$15,595.47	$12,577.08	$16,711.80
5881	Ancillary Outpatient Services When Patient Dies	71	$7,882.93	$6,955.70	$12,301.75	$7,217.15	$12,301.75

* For this proposed rule, there are no CY 2021 claims that contain the HCPCS code assigned to APC 2636 (HCPCS code C2636) that are available for CY 2023 OPPS/ASC ratestting.

BILLING CODE 4120–01–C

E. OPPS APC-Specific Policies

1. Fractional Flow Reserve Derived From Computed Tomography (FFRCT) (APC 5724)

Fractional Flow Reserve Derived from Computed Tomography (FFRCT), also known by the trade name HeartFlow, is a noninvasive diagnostic service that allows physicians to measure coronary artery disease in a patient through the use of coronary CT scans. The HeartFlow procedure is intended for clinically stable symptomatic patients with coronary artery disease, and, in many cases, may avoid the need for an invasive coronary angiogram procedure. HeartFlow uses a proprietary data analysis process performed at a central facility to develop a three-dimensional image of a patient's coronary arteries, which allows physicians to identify the fractional flow reserve to assess whether patients should undergo further invasive testing (that is, a coronary angiogram).

For many services paid under the OPPS, payment for analytics that are performed after the main diagnostic/image procedure are packaged into the payment for the primary service. However, in CY 2018, we determined

that we should pay separately for HeartFlow because the service is performed by a separate entity (that is, a HeartFlow technician who conducts computer analysis offsite) rather than the provider performing the CT scan. We assigned CPT code 0503T, which describes the analytics performed, to New Technology APC 1516 (New Technology—Level 16 ($1,401–$1,500)), with a payment rate of $1,450.50 based on pricing information provided by the developer of the procedure that indicated the price of the procedure was approximately $1,500. We did not have Medicare claims data in CY 2019 for CPT code 0503T, and we continued to assign the service to New Technology APC 1516 (New Technology—Level 16 ($1,401–$1,500)), with a payment rate of $1,450.50.

CY 2020 was the first year for which we had Medicare claims data to calculate the cost of HCPCS code 0503T. For the CY 2020 OPPS/ASC final rule with comment period, there were 957 claims with CPT code 0503T, of which 101 were single frequency claims that were used to calculate the geometric mean of the procedure. We planned to use the geometric mean to determine the cost of HeartFlow for purposes of determining the appropriate APC assignment for the procedure. However, the number of single claims for CPT code 0503T was below the New Technology APC low-volume payment policy threshold for the proposed rule, and this number of single claims was only two claims above the threshold for the New Technology APC low-volume policy for the final rule. Therefore, we used our equitable adjustment authority under section 1833(t)(2)(E) of the Act to calculate the geometric mean, arithmetic mean, and median using the CY 2018 claims data to determine an appropriate payment rate for HeartFlow using our New Technology APC low-volume payment policy. While the number of single frequency claims was just above our threshold to use the low-volume payment policy, we still had concerns about the normal cost distribution of the claims used to calculate the payment rate for HeartFlow, and we decided the low-volume payment policy would be the best approach to address those concerns.

Our analysis found that the geometric mean cost for CPT code 0503T was $768.26, the arithmetic mean cost for CPT code 0503T was $960.12, and the median cost for CPT code 0503T was $900.28. Of the three cost methods, the highest amount was for the arithmetic mean, which fell within the cost band for New Technology APC 1511 (New Technology—Level 11 ($901–$1000)) with a payment rate of $950.50. The arithmetic mean also helped to account for some of the higher costs of CPT code 0503T identified by the developer and other stakeholders that may not have been reflected by either the median or the geometric mean.

For CY 2021, we observed a significant increase in the number of claims billed with CPT code 0503T. Specifically, using CY 2019 data, we identified 3,188 claims billed with CPT code 0503T including 465 single frequency claims. These totals were well above the threshold of 100 claims for a procedure to be evaluated using the New Technology APC low-volume policy. Therefore, we used our standard methodology rather than the low-volume methodology we previously used to determine the cost of CPT code 0503T. Our analysis found that the geometric mean for CPT code 0503T was $804.35, and the geometric mean cost for the service fell within the cost band for New Technology APC 1510 (New Technology—Level 10 ($801–$900)). However, providers and other stakeholders noted that the FFRCT service costs $1,100 and that there are additional staff costs related to the submission of coronary CT image data for processing by HeartFlow.

We noted that HeartFlow was one of the first procedures utilizing artificial intelligence to be separately payable in the OPPS, and providers were learning how to accurately report their charges to Medicare when billing for artificial intelligence services (85 FR 85943). This especially appeared to be the case for allocating the cost of staff resources between the HeartFlow procedure and the coronary CT imaging services. Therefore, we decided it would be appropriate to use our equitable adjustment authority under section 1833(t)(2)(E) of the Act to assign CPT code 0503T to the same New Technology APC in CY 2021 as in CY 2020 in order to provide payment stability and equitable payment for providers as they continued to become familiar with the proper cost reporting for HeartFlow and other artificial intelligence services. Accordingly, we assigned CPT code 0503T to New Technology APC 1511 (New Technology—Level 11 ($901–$1000)) with a payment rate of $950.50 for CY 2020, and we continued to assign CPT code 0503T to New Technology APC 1511 for CY 2021.

For CY 2022, we used claims data from CY 2019 to estimate the cost of the HeartFlow service. Because we were using the same claims data as in CY 2021, these data continued to reflect that providers were learning how to accurately report their charges to Medicare when billing for artificial intelligence services. Therefore, we continued to use our equitable adjustment authority under section 1833(t)(2)(E) of the Act to assign CPT code 0503T to the same New Technology APC in CY 2022 as in CY 2020 and CY 2021: New Technology APC 1511 (New Technology—Level 11 ($901–$1000)), with a payment rate of $950.50 for CY 2022, which was the same payment rate for the service as in CY 2020 and CY 2021.

For CY 2023, we have three years of claims data from CY 2018, CY 2019, and CY 2021 for CPT code 0503T to review to determine whether there is an appropriate clinical APC to assign the HeartFlow service. First, we have sufficient single frequency claims from these three years to have a reliable estimate of the cost of the service. There were 101 single frequency claims in CY 2018, 465 single frequency claims in CY 2019, and 1,681 single frequency claims in CY 2021. The estimated cost of 0503T has been reasonably consistent over the same three years as well. The estimated cost of HeartFlow was around $768 in CY 2018, around $808 in CY 2019, and around $827 in CY 2021. Since the cost data have been stable for HeartFlow, we can assign it to a clinical APC using our regular process of using the most recent year of claims data for a procedure. HeartFlow is a diagnostic service, and the OPPS has a clinical APC series for diagnostic tests and related services, with the cost of 0503T based on claims data falling between Level 3, with a payment rate of around $498, and Level 4, with a payment rate of around $961. Since the geometric mean cost of HCPCS code 0503T is $827, and $827 is closer to $961 than $498, the best APC assignment for the HeartFlow procedure appears to be APC 5724 (Level 4 Diagnostic Tests and Related Services).

Therefore, we propose for CY 2023 to assign CPT code 0503T to clinical APC 5724 (Level 4 Diagnostic Tests and Related Services). Table 25 shows the current and proposed status indicator and APC assignment for 0503T. We refer readers to Addendum B of this proposed rule for the payment rates for all codes reportable under the OPPS. Addendum B is available via the internet on the CMS website.

TABLE 25: FINAL CY 2022 AND PROPOSED CY 2023OPPS APC AND STATUS INDICATOR ASSIGNMENTS FOR CPT CODE 0503T

2. Neurostimulator and Related Procedures (APCs 5461 Through 5465)

In the CY 2015 OPPS/ASC final rule with comment period (79 FR 66807 through 66808), we finalized a restructuring of what were previously several neurostimulator procedure-related APCs into a four-level series. Since CY 2015, the four-level APC structure for the series has remained unchanged. In addition to that restructuring, in the CY 2015 OPPS/ASC final rule with comment period, we also made the Levels 2 through 4 APCs comprehensive APCs (79 FR 66807 through 66808). Later, in the CY 2020 OPPS/ASC final rule with comment period, we also made the Level 1 Neurostimulator and Related Procedure APC (APC 5461) a comprehensive APC (84 FR 61162 through 61166).

In reviewing the claims data available for the CY 2021 OPPS/ASC proposed rule, we believed that it was appropriate to create an additional Neurostimulator and Related Procedures level, between what were then the Levels 2 and 3 APCs. Creating this APC allowed for a smoother distribution of the costs between the different levels based on their resource costs and clinical characteristics. Therefore, for the CY 2021 OPPS, we finalized a five-level APC structure for the Neurostimulator and Related Procedures series (85 FR 85968 through 85970). In addition to creating the new level, we also assigned CPT code 0398T (Magnetic resonance image guided high intensity focused ultrasound (mrgfus), stereotactic ablation lesion, intracranial for movement disorder including stereotactic navigation and frame placement when performed) to the new Level 3 APC (85 FR 85970).

Some commenters have requested that we create a Level 6 Neurostimulator and Related Procedures APC, due to their concerns around clinical and resource cost similarity in the Level 5 Neurostimulator and Related Procedures APC. Based on our review of the data available for this CY 2023 OPPS/ASC proposed rule, we believe that the five-level structure for the Neurostimulator and Related Procedures APC series remains appropriate. The proposed geometric mean cost for the Level 5 Neurostimulator and Related Procedures is $30,198.36 with the geometric means of cost significant codes in Level 5 ranging from approximately $28,000 to $36,000, which is well within the range of the 2 times rule. In addition, a review of the clinical characteristics of the services in the APC suggests that the current structure is appropriate. Finally, as discussed in the CY 2021 OPPS/ASC final rule with comment period, we reiterate that the OPPS is a prospective payment system. We group procedures with similar clinical characteristics and resource costs into APCs and establish a payment rate that reflects the geometric mean of all services in the group even though the cost of each service within the APC may be higher or lower than the APC's geometric mean. As a result, in the OPPS any individual procedure may potentially be overpaid or underpaid because the payment rate is based on the geometric mean of the entire group of services in the APC. However, the impact of these payment differences should be mitigated when distributed across a large number of APCs. (85 FR 85968).

While we are not proposing any changes in the CY 2023 OPPS to the 5-level structure of the Neurostimulator and Related Procedures APC series in this proposed rule, we recognize the commenters' concerns regarding the granularity of the current APC levels and their request to create an additional level to address such concerns. Accordingly, we are soliciting comments on the potential creation of a new Level 6 APC from the current Level 5 within the Neurostimulator and Related Procedures APC series, which would include the following codes:

- 0266T: Implantation or replacement of carotid sinus baroreflex activation device; total system (includes generator placement, unilateral or bilateral lead placement, intra-operative interrogation, programming, and repositioning, when performed)
- 0268T: Implantation or replacement of carotid sinus baroreflex activation device; pulse generator only (includes intra-operative interrogation, programming, and repositioning, when performed)
- 0424T: Insertion or replacement of neurostimulator system for treatment of central sleep apnea; complete system

(transvenous placement of right or left stimulation lead, sensing lead, implantable pulse generator)

- 0431T: Removal and replacement of neurostimulator system for treatment of central sleep apnea, pulse generator only
- 64568: Open implantation of cranial nerve (eg, vagus nerve) neurostimulator electrode array and pulse generator

In summary, for the CY 2023, we propose to maintain the current 5-level structure for the Neurostimulator and Related Procedure APC series. However, we are also soliciting comment from stakeholders on the creation of an additional Level 6 APC in the series from the current Level 5 APC. See Table 26 below for the proposed CY 2023 for the Neurostimulator and Related Procedures APCs.

TABLE 26: PROPOSED CY 2023 NEUROSTIMULATOR AND RELATED PROCEDURES APCS

APC	Group Title	SI	Proposed CY 2023 Proposed APC Geometric Mean Cost	6-Level Alternative APC Geometric Mean Cost
5461	Level 1 Neurostimulator and Related Procedures	J1	$3,491.49	$3,491.49
5462	Level 2 Neurostimulator and Related Procedures	J1	$6,808.24	$6,808.24
5463	Level 3 Neurostimulator and Related Procedures	J1	$12,980.43	$12,980.43
5464	Level 4 Neurostimulator and Related Procedures	J1	$22,059.02	$22,059.02
5465	Level 5 Neurostimulator and Related Procedures	J1	$30,198.36	$29,434.26
5466	Level 6 Neurostimulator and Related Procedures	J1	N/A	$33,947.12

3. Urology and Related Services (APCs 5371 Through 5378)

In the CY 2021 OPPS/ASC final rule with comment period (85 FR 85984 through 85986), we finalized a reorganization of the Urology and Related Services APCs from what was previously a seven-level series of related APCs into an eight-level series. In addition to creating the Urology and Related Services APC 5378 (Level 8 Urology and Related Services), and finalizing the reassignment of several urology procedures, we also revised the APC assignment for CPT 53440 (Male sling procedure) and CPT 0548T (Transperineal periurethral balloon continence device; bilateral placement, including cystoscopy and fluoroscopy) from APC 5376 to APC 5377. We believed the CY 2021 reorganization appropriately addressed the resource costs for the procedures whose geometric mean costs were between APC 5376 and APC 5377. Since CY 2021, the eight-level APC structure for the series has remained unchanged.

In our annual review of the CY 2021 claims submitted between January 1, 2021 through December 31, 2021 and processed on or before December 31, 2021, we examined the procedures assigned to the Urology Procedures APCs. In the CY 2022 final rule with comment period (86 FR 63565), we received comments requesting that CPT code 55880 be reassigned from APC 5375 (Level 5 Urology and Related Services) to APC 5376 (Level 6 Urology and Related Services). We remind readers that, for the CY 2022 ratesetting, we used the CY 2019 claims data due to the PHE. For CY 2022, we did not finalize any APC reassignment because our data analysis using the CY 2019 claims did not support the impact on the urology APCs' geometric means. For the CY 2023 ratesetting, we propose to use CY 2021 claims data. Using the CY 2021 claims data, we identified eight procedures (listed below) from APC 5375 whose geometric mean ranged between the geometric means for APC 5375 and APC 5376. The geometric means of these services are closer to the geometric mean of APC 5376, which is $8,788.53, than the geometric mean of APC 5375, which is $4,826.23. This reassignment to APC 5476 improves the resource cost and clinical homogeneity for the procedures within APC 5375 and APC 5376. Below is a list of the procedures and their geometric mean costs that we propose to reassign from APC 5375 to APC 5376 for CY 2023.

- CPT 50576: Renal endoscopy through nephrotomy or pyelotomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service; with fulguration and/or incision, with or without biopsy (Geometric mean cost: $11,137.98)
- HCPCS C9769: Cystourethroscopy, with insertion of temporary prostatic implant/stent with fixation/anchor and incisional struts (Geometric mean cost: $7,742.45)
- CPT 51860: Cystorrhaphy, suture of bladder wound, injury or rupture; simple (Geometric mean cost: $7,548.83)
- CPT 0549T: Transperineal periurethral balloon continence device; unilateral placement, including cystoscopy and fluoroscopy (Geometric mean cost: $7,337.54)
- CPT 53449: Repair of inflatable urethral/bladder neck sphincter, including pump, reservoir, and cuff (Geometric mean cost: $7,109.79)
- CPT 54344: Repair of hypospadias complication(s) (ie, fistula, stricture, diverticula); requiring mobilization of skin flaps and urethroplasty with flap or

patch graft (Geometric mean cost: $7,005.64)

- CPT 54316: Urethroplasty for second stage hypospadias repair (including urinary diversion) with free skin graft obtained from site other than genitalia (Geometric mean cost: $7,069.06)
- CPT 55880: Ablation of malignant prostate tissue, transrectal, with high intensity-focused ultrasound (hifu), including ultrasound guidance (Geometric mean cost: $7,015.62)

In summary, for the CY 2023, we propose to reassign eight procedures from APC 5375 to APC 5376 for the Urology and Related Procedure APC series. Table 27 below shows the proposed geometric mean cost for each APC with reassignment of the eight procedures.

TABLE 27: PROPOSED CY 2023 UROLOGY AND RELATED SERVICES APCs

APC	Group Title	SI	Proposed CY 2023 Proposed APC Geometric Mean Cost With Reassignment
5371	Level 1 Urology and Related Services	J1	$226.14
5372	Level 2 Urology and Related Services	J1	$643.47
5373	Level 3 Urology and Related Services	J1	$1,906.74
5374	Level 4 Urology and Related Services	J1	$3,289.11
5375	Level 5 Urology and Related Services	J1	$4,826.23
5376	Level 6 Urology and Related Services	J1	$8,788.53
5377	Level 7 Urology and Related Services	J1	$12,357.80
5378	Level 8 Urology and Related Services	J1	$19,806.45

4. Unlisted Dental Procedure/Service (APC 5871)

For CY 2022, CPT code 41899 (Unlisted procedure, dentoalveolar structures) is assigned to APC 5161 (Level 1 ENT Procedures). Unlisted codes, like CPT 41899, do not describe any specific procedure or service, so they lack the specificity needed to describe the resources used. As a reminder, the fact that a drug, device, procedure, or service is assigned a HCPCS code and a payment rate under the OPPS does not imply coverage by the Medicare program, but indicates only how the product, procedure, or service may be paid if covered by the program. Medicare Administrative Contractors (MACs) determine whether a drug, device, procedure, or other service meets all program requirements for coverage. For example, MACs determine that the drug, device, procedure, or service is reasonable and necessary to treat the beneficiary's condition and whether it is excluded from payment. Unlisted codes provide a way for providers to report services for which there is no HCPCS code that specifically describes the service furnished. Because of the lack of specificity, unlisted codes are generally assigned to the lowest level APC within the most appropriate clinically related APC group under the OPPS. However, we believe that APC 5161 (Level 1 ENT Procedures) is not the most clinically appropriate APC series for this code. While APC 5161 includes some dental services, we believe that CPT code 41899 is more closely aligned clinically to the dental services in APC 5871 (Dental Procedures), which is the sole APC where dental procedures described by the Current Dental Terminology (CDT) reside. Therefore, for CY 2023, we propose to reassign HCPCS code 41899 to clinical APC 5871, which is the only, and therefore lowest, APC group that specifically describes dental procedures.

While we do not consider costs for services described by unlisted codes for rate setting purposes, based on both our established policy of generally assigning these codes to the lowest level APC within the most appropriate, clinically related APC group, and our inability to determine the specific services the unlisted code describes, we would note that the geometric mean cost for CPT code 41899 is more closely aligned with the geometric mean cost of other dental procedures in APC 5871 than with its current APC assignment. Specifically, in our annual review of the CY 2021 claims submitted between January 1, 2021 through December 31, 2021 and processed on or before December 31, 2021, the geometric mean cost for CPT code 41899 was $2,310.47, while the geometric mean cost of the code's current APC assignment, APC 5161, was $203.64. In contrast, the geometric mean cost of APC 5871 (Dental Procedures) was $1,958.92.

Table 28 below shows the current and proposed status indicator and APC assignment for CPT code 41899. We refer readers to Addendum B of this proposed rule for the payment rates for all codes reportable under the OPPS. Addendum B is available via the internet on the CMS website.

TABLE 28: CY 2023 PROPOSED OPPS APC AND STATUS INDICATOR FOR CPT CODE 41899

CPT Code	Long Descriptor	CY 2022 OPPS SI	CY 2022 OPPS APC	Proposed CY 2023 OPPS SI	Proposed CY 2023 OPPS APC
41899	Unlisted procedure, dentoalveolar structures	T	5161	S	5871

5. COVID–19 and Monoclonal Antibody Administration Services

a. Statutory and Regulatory Background

Section 3713 of the Coronavirus Aid, Relief, and Economic Security Act (CARES Act) (Pub. L 116–136, March 27, 2020) provides for coverage of the COVID–19 vaccine under Part B of the Medicare program without any beneficiary cost sharing. Specifically, section 3713 added the COVID–19 vaccine and its administration to section 1861(s)(10)(A) of the Act in the same subparagraph as the influenza and pneumococcal vaccines and their administration. Additionally, section 3713(e) of the CARES Act authorizes CMS to implement the amendments made by section 3713 ''through program instruction or otherwise.'' The changes to section 1861(s)(10)(A) of the Act were effective on the date of enactment, that is, March 27, 2020, and apply to a COVID–19 vaccine beginning on the date that such vaccine is licensed under section 351 of the PHS Act (42 U.S.C. 262).

We discussed our implementation of section 3713 in the interim final rule with comment period titled, ''Additional Policy and Regulatory Revisions in Response to the COVID–19 Public Health Emergency,'' published in the November 6, 2020 **Federal Register** (85 FR 71145 through 71150). In that rule, we stated that, while section 3713(e) of the CARES Act authorizes us to implement the amendments made by that section through program instruction or otherwise, we believed it was important to clarify our interpretation of section 3713 and announce our plans to ensure timely Medicare Part B coverage and payment for the COVID–19 vaccine and its administration. We anticipated that payment rates for the administration of other Part B preventive vaccines and related services, such as the flu and pneumococcal vaccines, would inform the payment rates for administration of COVID–19 vaccines. In the same interim final rule, we stated that, as soon as practicable after the authorization or licensure of each COVID–19 vaccine product by FDA, we would announce the interim coding and a payment rate for its administration (or, in the case of the OPPS, an APC assignment for each vaccine product's administration code), taking into consideration any product-specific costs or considerations involved in furnishing the service. We further stated that the codes and payment rates would be announced through technical direction to the Medicare Administrative Contractors (MACs) and posted publicly on the CMS website.

In December 2020, we publicly posted the applicable CPT codes for the Pfizer-BioNTech and Moderna COVID–19 vaccines and initial Medicare payment rates for administration of these vaccines upon FDA's authorization of them. We announced an initial Medicare payment rate for COVID–19 vaccine administration of $28.39 to administer single-dose vaccines. For a COVID–19 vaccine requiring a series of two or more doses—for example, for both the Pfizer-BioNTech and Moderna products—we announced a payment rate for administration of the initial dose(s) of $16.94, which was based on the Medicare payment rate for administering the other preventive vaccines under section 1861(s)(10) of the Act. We also announced a payment rate for administering the second dose of $28.39.[8] CMS continues to establish product-specific HCPCS codes for each COVID–19 vaccine product on a rolling basis as they are authorized by the FDA. On March 15, 2021, we announced an increase in the payment rate for administering a COVID–19 vaccine to $40 per dose, effective for doses administered on or after March 15, 2021. For additional information, on timing and payment rates for COVID–19 vaccine administration, please see the CMS website: *https://www.cms.gov/medicare/preventive-services/covid-19-services-billing-coverage/covid-19/medicare-covid-19-vaccine-shot-payment.*

b. Payment for COVID–19 Vaccine Administration Services Under the OPPS

Under the OPPS, separate payment is made for the COVID–19 vaccine product and its administration. Except when the provider receives the COVID–19 vaccine for free (as has been the case to date), providers are paid for COVID–19 vaccine products at reasonable cost, as is the case with influenza and pneumococcal vaccines.[9] The HCPCS codes associated with the vaccine products are assigned OPPS status indicator ''L'' to indicate that they are paid at reasonable cost and are exempt from coinsurance and deductible payments under sections 1833(a)(3) and 1833(b) of the Act.

While COVID–19 and other preventive vaccine products are paid based on reasonable cost under the OPPS, the payment rates for the COVID–19 vaccine administration HCPCS codes are based on the APCs to which the codes are assigned. Because COVID–19 vaccination can involve more than one dose, we established APCs 9397 (COVID–19 Vaccine Admin Dose 1 of 2) and 9398 (COVID–19 Vaccine Admin

[8] Medicare COVID–19 Vaccine Shot Payment. CMS website. *https://www.cms.gov/medicare/preventive-services/covid-19-services-billing-coverage/covid-19/medicare-covid-19-vaccine-shot-payment#:~:text=%2416.94%20for%20the%20initial%20dose,final%20dose%20in%20the%20series.*

[9] COVID–19 Vaccines and Monoclonal Antibodies. CMS website. *https://www.cms.gov/medicare/medicare-part-b-drug-average-sales-price/covid-19-vaccines-and-monoclonal-antibodies.*

Dose 2 of 2, Single Dose Product or Additional Dose) to appropriately identify and pay for the administration of the COVID–19 vaccines. In CY 2021, we announced the establishment of APCs 9397 and 9398 for the COVID–19 vaccine administration codes through the April 2021 OPPS Update CR (Transmittal 10666, Change Request 12175 dated March 8, 2021). Prior to March 15, 2021, APC 9397 for the first dose of the COVID–19 vaccine was assigned a payment rate of $16.94; and APC 9398 for the second dose was assigned a payment rate of $28.39. As described above, we changed the payment rate to $40 per dose for the first, second, and booster dose(s) of the COVID–19 vaccine effective March 15, 2021.

For CYs 2021 and 2022, we maintained the payment rate of $40 for the APCs to which the COVID–19 vaccine administration services are assigned. For further information please see Addendum B on the CY 2021 and 2022 OPPS websites.

As of July 1, 2022, there are approximately 18 COVID–19 vaccine administration HCPCS codes. These codes are listed in Table 29 below. We note that the latest list of HCPCS codes for COVID–19 vaccine products and vaccine administration, along with their effective dates and payment rates, is available on the CMS COVID–19 Vaccines and Monoclonal Antibodies website at *https://www.cms.gov/medicare/medicare-part-b-drug-average-sales-price/covid-19-vaccines-and-monoclonal-antibodies.*

Based on our review of CY 2021 claims data associated with the COVID–19 vaccine administration HCPCS codes, the geometric mean cost for APC 9397 is $25.86 and the geometric mean cost for APC 9398 is $36.80. We note that CY 2021 utilization of the COVID–19 vaccine administration codes in the outpatient hospital setting was very high, with nearly 7 million claims for these codes in that year and may not be reflective of future year utilization. Since we do not know if demand for COVID–19 vaccine administration in the outpatient hospital setting will be significantly different in CY 2023 than CY 2021 because CY 2021 was the first complete year for which we had COVID–19 vaccine administration claims data, and because we do not know if the PHE for COVID–19 will be in effect in CY 2023, we believe that we should maintain the $40 per dose payment rate for the COVID–19 administration HCPCS codes in CY 2023 until we have an additional year of claims data on which to base the payment rate. Therefore, for CY 2023 we propose to use the equitable adjustment authority at 1833(t)(2)(E) to maintain the payment rate of $40 for each of the COVID–19 vaccine administration APCs 9397 and 9398. We believe maintaining the current, site neutral, payment rate is necessary to ensure equitable payments during the continuing PHE and at least through the end of CY 2023. We refer readers to Table 29 below for the proposed payment rates for the COVID–19 vaccine administration HCPCS codes.

We also note that this policy does not pertain to OPPS payment for monoclonal antibody products used for COVID–19 and their administration. The OPPS payment rates for administration of COVID–19 monoclonal antibody products under the Part B preventive vaccine benefit are set at the midpoint of the cost bands for the New Technology APCs to which the monoclonal antibody administration services are assigned under the OPPS. We assigned COVID–19 monoclonal antibody administration services to New Technology APCs based on estimated costs for these services.

c. Use of Alternative Site-Neutral Methodology To Update Payment Rates for COVID–19 Vaccine Administration Services for CY 2023

Under current policy, the payment rates for COVID–19 vaccine administration services are site-neutral across most outpatient and ambulatory settings. We request comment on whether we should continue a site-neutral payment policy for COVID–19 vaccine administration for CY 2023, and what alternative approaches (including under our equitable adjustment authority at 1833(t)(2)(E)) may be appropriate to update the OPPS payment rates for the COVID–19 vaccine administration HCPCS codes (including the in-home add-on HCPCS code M0201) while continuing to ensure site-neutral payment for these services. For example, in the CY 2023 PFS proposed rule that will be included in the July 29, 2022 **Federal Register**, we are proposing to update the payment rate for the administration of preventive vaccines (other than for COVID–19 and other than for services paid under other payment systems such as the OPPS) using the annual increase to the Medicare Economic Index (MEI). We request public comments on whether, as an alternative to our proposal to maintain current OPPS payment rates for COVID–19 vaccine administration using our equitable adjustment authority at section 1833(t)(2)(E), we should instead use the rate finalized through PFS rulemaking that generally applies under the preventive vaccine benefit, or an alternative method commenters suggest, to determine the appropriate payment rates for preventive vaccine administration under the OPPS, which would likely also require use of our equitable adjustment authority.

For more information on the payment rates for the administration of preventive vaccines, including the proposal to update the payment rate by the annual increase to the MEI, we refer readers to the CY 2023 PFS proposed rule that will be included in the July 29, 2022 **Federal Register**.

We are also seeking comment on whether to use the rate finalized through PFS rulemaking generally as it applies under the preventive vaccine benefit, or an alternative method commenters suggest, to set the CY 2023 payment rate for HCPCS code M0201 (*COVID–19 vaccine administration inside a patient's home; reported only once per individual home per date of service when only COVID–19 vaccine administration is performed at the patient's home*).

In summary, for CY 2023, we are proposing to continue to pay $40 per dose for the administration of the COVID–19 vaccines provided in the HOPD setting, and an additional $35.50 for the administration of the COVID–19 vaccines when provided under certain circumstances in the patient's home, in CY 2023. Additionally, we request comments on whether, as an alternative to maintaining the CY 2022 OPPS payment rates for COVID–19 vaccine administration services in CY 2023, we should use a different approach, including relying on our equitable adjustment authority in section 1833(t)(2)(E) to base the payment rate for COVID–19 vaccine administration under the OPPS in CY 2023 on the payment rate for the COVID–19 vaccine administration under the preventive vaccine benefit under Part B as finalized in PFS rulemaking, or employing another alternate methodology to set CY 2023 payment rates for these services.

BILLING CODE 4120–01–C

d. Comment Solicitation on the Appropriate Payment Methodology for Administration of Preventive Vaccines Post PHE

Currently, under the OPPS, the codes describing the administration of the influenza, pneumococcal, and hepatitis b vaccines are assigned to APC 5691 (Level 1 Drug Administration), with a payment rate of about $40. However, given that the statutory benefit for Medicare Part B preventive vaccines and their administration is based on 1861(s)(10) of the Act, we are seeking comments on whether we should adopt a different methodology to make payment when these services are furnished by a HOPD other than the one for covered OPD services under section 1833(t) of the Act. Therefore, in this proposed rule, we are seeking comments on the appropriate payment methodology for the administration of Part B preventive vaccines, including the COVID–19 vaccine post PHE.

e. COVID–19 Monoclonal Antibody Products and Their Administration Services Under OPPS

Subsequent to the November 6, 2020 IFC and as discussed in the CY 2022 PFS final rule (86 FR 65190 through 65194), when monoclonal antibody products for COVID–19 treatment were granted EUAs during the PHE for COVID–19, we made the determination to cover and pay for them under the Part B vaccine benefit in section 1861(s)(10) of the Act

Regarding availability of COVID–19 monoclonal antibody products, there are no monoclonal antibody products approved for the treatment or prevention of COVID–19. There are five authorized monoclonal antibody COVID–19 products; four are authorized for the treatment or post-exposure prophylaxis for prevention of COVID–19 and one is authorized as pre-exposure prophylaxis for prevention of COVID–19.[10] We note that none of the four monoclonal antibody products for treatment or post-exposure prevention of COVID–19 that have been granted an EUA are authorized for use in geographic regions where infection was likely caused by a non-susceptible variant. Due to data indicating decreased activity for three of these treatments against Omicron variants currently in wide circulation, only one of these treatments is currently authorized in any U.S. region until further notice by FDA.

Consistent with how we pay for COVID–19 vaccine products and their administration, under the OPPS, we pay separately for COVID–19 monoclonal antibodies and their administration. Except when the provider receives the COVID–19 monoclonal antibody product for free, providers are paid for these products at reasonable cost.[11] The HCPCS codes associated with the COVID–19 monoclonal antibody products are assigned OPPS status indicator ''L'' to indicate that they are paid at reasonable cost and are exempt from coinsurance and deductible payments under sections 1833(a)(3) and 1833(b) of the Act.

While the COVID–19 monoclonal antibody products are paid based on reasonable cost under the OPPS, the payment rates for the COVID–19 monoclonal antibody product administration depends on the route of administration and whether the product is furnished in a healthcare setting or in the beneficiary's home. As discussed in more detail in the CMS COVID–19 Monoclonal Toolkit,[12] payment for administration of monoclonal antibodies can range from $150.50 to $750.00. The HCPCS codes associated with the COVID–19 monoclonal antibody product administration are assigned to New Technology APCs 1503, 1504, 1505, 1506, 1507, and 1509 with an OPPS status indicator ''S'' (Procedure or Service, Not Discounted When Multiple, separate APC assignment) to indicate that the administration of monoclonal antibodies is paid separately under the OPPS.

For CYs 2021 and 2022, we maintained the payment rates for the COVID–19 monoclonal antibody product administration services by maintaining their New Technology APCs assignments. For further information, please see Addendum B on the CY 2021 and 2022 OPPS websites. For CY 2023, we propose to use the equitable adjustment authority at 1833(t)(2)(E) to maintain the CY 2022 New Technology APC assignments (specifically, New Technology APCs 1503, 1504, 1505, 1506, 1507, or 1509) and corresponding payment rates for each of the COVID–19 monoclonal antibody product administration HCPCS codes for as long as these products are considered to be covered and paid under the Medicare Part B vaccine benefit so that, if the PHE ends, the benefit category and corresponding payment methodology under the OPPS will remain site neutral.

We note that, once these products are no longer considered to be covered and paid under the Medicare Part B vaccine benefit, we would expect the COVID–19 monoclonal antibody product administration services to be paid similar to monoclonal antibody products used in the treatment of other health conditions—to be ''biologicals''. For more background on Medicare Part B payment for COVID–19 monoclonal antibody products and their administration, and for current proposals regarding such payment, we refer readers to the CY 2023 PFS proposed rule that will be included in the July 29, 2022 **Federal Register**. In particular, the CY 2023 PFS proposed rule proposes to clarify that the COVID–19 monoclonal antibody products would be covered and paid for under the Medicare Part B vaccine benefit until the end of the calendar year in which the March 27, 2020 EUA declaration for drugs and biologics is terminated. Additionally, we are proposing to continue the existing policy to pay for monoclonal antibody COVID–19 pre-exposure prophylaxis products and their administration under the Part B vaccine benefit even after the EUA declaration for drugs and biological products is terminated, so long as after the EUA declaration is terminated, such products have market authorization.

IV. Proposed OPPS Payment for Devices

A. Proposed Pass-Through Payment for Devices

1. Beginning Eligibility Date for Device Pass-Through Status and Quarterly Expiration of Device Pass-Through Payments

a. Background

The intent of transitional device pass-through payment, as implemented at § 419.66, is to facilitate access for beneficiaries to the advantages of new and truly innovative devices by allowing for adequate payment for these new devices while the necessary cost data is collected to incorporate the costs for these devices into the procedure APC rate (66 FR 55861). Under section 1833(t)(6)(B)(iii) of the Act, the period for which a device category eligible for transitional pass-through payments under the OPPS can be in effect is at least 2 years but not more than 3 years. Prior to CY 2017, our regulation at § 419.66(g) provided that this pass-

[10] Viewed 5/6/2022. *https://www.fda.gov/emergency-preparedness-and-response/mcm-legal-regulatory-and-policy-framework/emergency-use-authorization.*

[11] COVID–19 Vaccines and Monoclonal Antibodies. CMS Website *http://www.cms.gov/medicare/medicare-part-b-drug-average-sales-price/covid-19-vaccines-and-monoclonal-antibodies.*

[12] *https://www.cms.gov/monoclonal.*

through payment eligibility period began on the date CMS established a particular transitional pass-through category of devices, and we based the pass-through status expiration date for a device category on the date on which pass-through payment was effective for the category. In the CY 2017 OPPS/ASC final rule with comment period (81 FR 79654), in accordance with section 1833(t)(6)(B)(iii)(II) of the Act, we amended § 419.66(g) to provide that the pass-through eligibility period for a device category begins on the first date on which pass-through payment is made under the OPPS for any medical device described by such category.

In addition, prior to CY 2017, our policy was to propose and finalize the dates for expiration of pass-through status for device categories as part of the OPPS annual update. This means that device pass-through status would expire at the end of a calendar year when at least 2 years of pass-through payments had been made, regardless of the quarter in which the device was approved. In the CY 2017 OPPS/ASC final rule with comment period (81 FR 79655), we changed our policy to allow for quarterly expiration of pass-through payment status for devices, beginning with pass-through devices approved in CY 2017 and subsequent calendar years, to afford a pass-through payment period that is as close to a full 3 years as possible for all pass-through payment devices. We also have an established policy to package the costs of the devices that are no longer eligible for pass-through payments into the costs of the procedures with which the devices are reported in the claims data used to set the payment rates (67 FR 66763).

We refer readers to the CY 2017 OPPS/ASC final rule with comment period (81 FR 79648 through 79661) for a full discussion of the current device pass-through payment policy.[13]

b. Expiration of Transitional Pass-Through Payments for Certain Devices

As stated earlier, section 1833(t)(6)(B)(iii) of the Act requires that, under the OPPS, a category of devices be eligible for transitional pass-through payments for at least 2 years, but not more than 3 years. Currently, there are 11 device categories eligible for pass-through payment. These devices are listed in Table 30 where we detail the expiration dates of pass-through payment status for each of the 11 devices currently receiving device pass-through payment.

In the CY 2022 OPPS/ASC final rule with comment period we used CY 2019 claims data, rather than CY 2020 claims data, to inform CY 2022 ratesetting (86 FR 63755). As a result, we utilized our equitable adjustment authority at section 1833(t)(2)(E) of the Act to provide up to four quarters of separate payment for 27 drugs and biologicals and one device category whose pass-through payment status expired between December 31, 2021 and September 30, 2022 to mimic continued pass-through payment, promote adequate access to innovative therapies for Medicare beneficiaries, and gather sufficient data for purposes of assigning these devices to clinical APCs (86 FR 63755). A full discussion of this finalized policy is included in section X.F of the CY 2022 OPPS/ASC final rule with comment (86 FR 63755). In section X.B of this proposed rule, we propose to resume the regular update process of using claims from the year 2 years prior to the year for which we are setting rates, specifically CY 2021 outpatient claims for CY 2023 OPPS ratesetting. Based on CMS's policy proposal in section X.B we are not proposing to provide any additional quarters of separate payments for any device category whose pass-through payment status will expire between December 31, 2022 and September 30, 2023. We seek comment on how the circumstances for CY 2023 are similar to those in CY 2022, when we adopted the equitable adjustment to mimic continued pass-through status for drugs, biologicals, and a device category with pass-through status that expired between December 31, 2021, and September 30, 2023.

We utilized our equitable adjustment authority at section 1833(t)(2)(E) of the Act to provide separate payment for C1823 for four quarters in CY 2022 for C1823, as its pass-through payment status expired on December 31, 2021 (86 FR 63570). Separate payment for HCPCS code C1823 under our equitable adjustment authority will end on December 31, 2022. Table 30 includes this date for the device described by HCPCS code C1823 and includes the specific expiration dates for devices with pass-through status expiring at the end of the fourth quarter of 2022, in 2023, or in 2024.

BILLING CODE 4120–01–P

[13] To apply for OPPS transitional device pass-through status, applicants complete an application that is subject to the Paperwork Reduction Act (PRA). This collection (CMS–10052) has an OMB control number of 0938–0857 and an expiration date of 11/30/2022. The application is currently undergoing the PRA reapproval process, which has notice and comment periods separate from this proposed rule. The 60-day notice was published in the **Federal Register** on April 29, 2022 (87 FR 25488).

TABLE 30: DEVICES WITH PASS-THROUGH STATUS (OR ADJUSTED SEPARATE PAYMENT) EXPIRING AT THE END OF THE FOURTH QUARTER OF 2022, IN 2023, OR IN 2024

HCPCS Code	Long Descriptor	Effective Date	Pass-Through Expiration Date
C1823	Generator, neurostimulator (implantable), nonrechargeable, with transvenous sensing and stimulation leads	1/1/2019	12/31/2022*
C1824	Generator, cardiac contractility modulation (implantable)	1/1/2020	12/31/2022
C1982	Catheter, pressure-generating, one-way valve, intermittently occlusive	1/1/2020	12/31/2022
C1839	Iris prosthesis	1/1/2020	12/31/2022
C1734	Orthopedic/device/drug matrix for opposing bone-to-bone or soft tissue-to bone (implantable)	1/1/2020	12/31/2022
C2596	Probe, image-guided, robotic, waterjet ablation	1/1/2020	12/31/2022
C1748	Endoscope, single-use (that is, disposable), Upper GI, imaging/illumination device (insertable)	7/1/2020	6/30/2023
C1052	Hemostatic agent, gastrointestinal, topical	1/1/2021	12/31/2023
C1062	Intravertebral body fracture augmentation with implant (e.g., metal, polymer)	1/1/2021	12/31/2023
C1825	Generator, neurostimulator (implantable), nonrechargeable with carotid sinus baroreceptor stimulation lead(s)	1/1/2021	12/31/2023
C1761	Catheter, transluminal intravascular lithotripsy, coronary	7/1/2021	6/30/2024

* We utilized our equitable adjustment authority at section 1833(t)(2)(E) of the Act to provide separate payment for C1823 for four quarters of CY 2022 for C1823 whose pass-through payment status expired on December 31, 2021. Adjusted separate payment for HCPCS code C1823 will end on December 31, 2022.

BILLING CODE 4120–01–C

2. New Device Pass-Through Applications for CY 2023

a. Background

Section 1833(t)(6) of the Act provides for pass-through payments for devices, and section 1833(t)(6)(B) of the Act requires CMS to use categories in determining the eligibility of devices for pass-through payments. As part of implementing the statute through regulations, we have continued to believe that it is important for hospitals to receive pass-through payments for devices that offer substantial clinical improvement in the treatment of Medicare beneficiaries to facilitate access by beneficiaries to the advantages of the new technology. Conversely, we have noted that the need for additional payments for devices that offer little or no clinical improvement over previously existing devices is less apparent. In such cases, these devices can still be used by hospitals, and hospitals will be paid for them through appropriate APC payment. Moreover, a goal is to target pass-through payments for those devices where cost considerations are most likely to interfere with patient access (66 FR 55852; 67 FR 66782; and 70 FR 68629).

As specified in regulations at § 419.66(b)(1) through (3), to be eligible for transitional pass-through payment under the OPPS, a device must meet the following criteria:

- If required by FDA, the device must have received FDA marketing authorization (except for a device that has received an FDA investigational device exemption (IDE) and has been classified as a Category B device by FDA), or meet another appropriate FDA exemption; and the pass-through payment application must be submitted within 3 years from the date of the initial FDA marketing authorization, if required, unless there is a documented, verifiable delay in U.S. market availability after FDA marketing authorization is granted, in which case CMS will consider the pass-through

payment application if it is submitted within 3 years from the date of market availability;

- The device is determined to be reasonable and necessary for the diagnosis or treatment of an illness or injury or to improve the functioning of a malformed body part, as required by section 1862(a)(1)(A) of the Act; and
- The device is an integral part of the service furnished, is used for one patient only, comes in contact with human tissue, and is surgically implanted or inserted (either permanently or temporarily), or applied in or on a wound or other skin lesion.

In addition, according to § 419.66(b)(4), a device is not eligible to be considered for device pass-through payment if it is any of the following: (1) equipment, an instrument, apparatus, implement, or item of this type for which depreciation and financing expenses are recovered as depreciation assets as defined in Chapter 1 of the Medicare Provider Reimbursement Manual (CMS Pub. 15–1); or (2) a material or supply furnished incident to a service (for example, a suture, customized surgical kit, or clip, other than a radiological site marker).

Separately, we use the following criteria, as set forth under § 419.66(c), to determine whether a new category of pass-through payment devices should be established. The device to be included in the new category must—

- Not be appropriately described by an existing category or by any category previously in effect established for transitional pass-through payments, and was not being paid for as an outpatient service as of December 31, 1996;
- Have an average cost that is not ''insignificant'' relative to the payment amount for the procedure or service with which the device is associated as determined under § 419.66(d) by demonstrating: (1) the estimated average reasonable cost of devices in the category exceeds 25 percent of the applicable APC payment amount for the service related to the category of devices; (2) the estimated average reasonable cost of the devices in the category exceeds the cost of the device-related portion of the APC payment amount for the related service by at least 25 percent; and (3) the difference between the estimated average reasonable cost of the devices in the category and the portion of the APC payment amount for the device exceeds 10 percent of the APC payment amount for the related service (with the exception of brachytherapy and temperature-monitored cryoablation, which are exempt from the cost requirements as specified at § 419.66(c)(3) and (e)); and
- Demonstrate a substantial clinical improvement, that is, substantially improve the diagnosis or treatment of an illness or injury or improve the functioning of a malformed body part compared to the benefits of a device or devices in a previously established category or other available treatment, or, for devices for which pass-through payment status will begin on or after January 1, 2020, as an alternative pathway to demonstrating substantial clinical improvement, a device is part of the FDA's Breakthrough Devices Program and has received marketing authorization for the indication covered by the Breakthrough Device designation.

Beginning in CY 2016, we changed our device pass-through evaluation and determination process. Device pass-through applications are still submitted to CMS through the quarterly subregulatory process, but the applications will be subject to notice and comment rulemaking in the next applicable OPPS annual rulemaking cycle. Under this process, all applications that are preliminarily approved upon quarterly review will automatically be included in the next applicable OPPS annual rulemaking cycle, while submitters of applications that are not approved upon quarterly review will have the option of being included in the next applicable OPPS annual rulemaking cycle or withdrawing their application from consideration. Under this notice-and-comment process, applicants may submit new evidence, such as clinical trial results published in a peer-reviewed journal or other materials for consideration during the public comment process for the proposed rule. This process allows those applications that we are able to determine meet all of the criteria for device pass-through payment under the quarterly review process to receive timely pass-through payment status, while still allowing for a transparent, public review process for all applications (80 FR 70417 through 70418).

In the CY 2020 annual rulemaking process, we finalized an alternative pathway for devices that are granted a Breakthrough Device designation (84 FR 61295) and receive FDA marketing authorization. Under this alternative pathway, devices that are granted an FDA Breakthrough Device designation are not evaluated in terms of the current substantial clinical improvement criterion at § 419.66(c)(2) for the purposes of determining device pass-through payment status, but do need to meet the other requirements for pass-through payment status in our regulation at § 419.66. Devices that are part of the Breakthrough Devices Program, have received FDA marketing authorization for the indication covered by the Breakthrough Devices designation, and meet the other criteria in the regulation can be approved through the quarterly process and announced through that process (81 FR 79655). Proposals regarding these devices and whether pass-through payment status should continue to apply are included in the next applicable OPPS rulemaking cycle. This process promotes timely pass-through payment status for innovative devices, while also recognizing that such devices may not have a sufficient evidence base to demonstrate substantial clinical improvement at the time of FDA marketing authorization.

More details on the requirements for device pass-through payment applications are included on the CMS website in the application form itself at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/passthrough_payment.html*, in the ''Downloads'' section. In addition, CMS is amenable to meeting with applicants or potential applicants to discuss research trial design in advance of any device pass-through application or to discuss application criteria, including the substantial clinical improvement criterion.

b. Applications Received for Device Pass-Through Status for CY 2023

We received nine complete applications by the March 1, 2022 quarterly deadline, which was the last quarterly deadline for applications to be received in time to be included in the CY 2023 OPPS/ASC proposed rule. We received one of the applications in the second quarter of 2021, one of the applications in the third quarter of 2021, two of the applications in the fourth quarter of 2021, and five of the applications in the first quarter of 2022. One of the applications was approved for device pass-through status during the quarterly review process: the aprevo™ Intervertebral Body Fusion, which received quarterly approval under the alternative pathway effective October 1, 2021. As previously stated, all applications that are preliminarily approved upon quarterly review will automatically be included in the next applicable OPPS annual rulemaking cycle. Therefore, aprevo™ Intervertebral Body Fusion is discussed in section IV.2.b.1 of this proposed rule.

Applications received for the later deadlines for the remaining 2022

quarters (the quarters beginning June 1, September 1, and December 1 of 2022), if any, will be discussed in the CY 2024 OPPS/ASC proposed rule. We note that the quarterly application process and requirements have not changed because of the addition of rulemaking review. Detailed instructions on submission of a quarterly device pass-through payment application are included on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Downloads/catapp.pdf*.

Discussions of the applications we received by the March 1, 2022 deadline are included below.

1. Alternative Pathway Device Pass-Through Applications

We received two device pass-through applications by the March 2022 quarterly application deadline for devices that have received Breakthrough Device designation from FDA and FDA marketing authorization for the indication for which they have a Breakthrough Device designation, and therefore are eligible to apply under the alternative pathway.

(1) Aprevo™ Intervertebral Body Fusion Device

Carlsmed, Inc. submitted an application for a new device category for transitional pass-through payment status for aprevo™ Intervertebral Fusion Device (aprevo™) for CY 2023. Per the applicant, the device is an interbody fusion implant that stabilizes the lumbar spinal column and facilitates fusion during lumbar fusion procedures indicated for the treatment of spinal deformity. The applicant stated that the implant device is custom made for patient-specific features using patient computed tomography (CT) scans to create 3D virtual models of the deformity to be used during anterior lumbar interbody fusion, lateral lumbar interbody fusion, and transforaminal lumbar interbody fusion procedures. The aprevo™ device is additively manufactured and made from Titanium Alloy (Ti-6Al-4V) per ASTM F3001, and has a cavity intended for the packing of bone graft. In addition, the applicant explained that aprevo™ is used with supplemental fixation devices and bone graft packing. Per the applicant, the device was formerly known as ''Corra™.''

According to the applicant, the surgical correction plan for adult patients with spinal deformity is significantly more complex than performing a spine fusion for a degenerative spinal condition. The applicant further described that these deformity correction plans require numerous complex measurements and calculations that consider a multitude of relationships between each area of the spine (cervical, thoracic, lumbar), the 33 individual levels of the spine, the pelvis, hips, and other reference points in relation to normal values based on the patient's age. The applicant stated that achieving the proper balance between these factors has been shown to directly contribute to improved clinical outcomes and increased patient satisfaction. Despite the use of sophisticated planning tools, surgeons are frequently unable to obtain the planned correction, and this is often because stock devices, which are not patient-specific, do not match the specific geometry that is required to realign each level of the individual patient's spine. The applicant claims that aprevo™ devices provide the precise geometry to match the planned surgical correction for a spinal deformity patient, and they maintain this precise position while the bones fuse together in their new alignment.

According to the applicant, aprevo™ devices are surgically placed between two vertebral levels of the spine. The approach may be from the front, side, or back of the patient. The surgeon will gently clear away the disc material (which is often degenerated) before placing the device. Bone graft is placed inside a central opening of the interbody device. This allows the patient's bone to integrate with the graft material and form a bony bridge.

The applicant asserted that there are no other devices in the market like aprevo™. Per the applicant, other stock devices do not match the anatomy of each patient precisely. The applicant stated, in contrast, aprevo™ utilizes 3D generated reconstructions of each level of the patient's lumbar spine that match the anatomy of the patient. Per the applicant, the device's upper and lower surfaces match the topography of the patient's bone as this is important because the surfaces of the vertebral endplates can be extremely bumpy or wavy and sometimes thin and fragile. Per the applicant, by having a fit that matches these contours, the high loads that result from body weight are more evenly distributed across the surface. The applicant stated that this contributes to faster healing of the bone and lessens the risk of having high stress points that could result in a stock interbody device breaking through the thin endplate.

Aprevo™ is indicated for use as an adjunct to fusion at one or more levels of the lumbar spine in patients having an ODI >40 and diagnosed with severe symptomatic adult spinal deformity (ASD) conditions. These patients should have had 6 months of non-operative treatment. The devices are intended to be used with autograft and/or allogenic bone graft comprised of cancellous and/or cortico-cancellous bone graft. These implants may be implanted via a variety of open or minimally invasive approaches. These approaches may include anterior lumbar interbody fusion or lateral lumbar interbody fusion.

With respect to the newness criterion at § 419.66(b)(1), aprevo™ received FDA Breakthrough Device designation under the name ''Corra'' on July 1, 2020 for the Corra Anterior, Corra Transforaminal, and Corra Lateral Lumbar Fusion System interbody device which is intended for use in anterior lumbar interbody fusion, lateral lumbar interbody fusion, and transforaminal lumbar interbody fusion under this designation. The applicant received 510(k) clearance from FDA for the Intervertebral Body Fusion Device (anterior lumbar interbody fusion and aprevo™ lateral lumbar interbody fusion devices) on December 3, 2020. The applicant also received 510(k) clearance from FDA for the Transforaminal Intervertebral Body Fusion (IBF) device on June 30, 2021. We received the application for a new device category for transitional pass-through payment status for aprevo™ on May 27, 2021, which is within 3 years of the date of the initial FDA marketing authorization of both indications. We are inviting public comment on whether aprevo™ meets the newness criterion.

With respect to the eligibility criterion at § 419.66(b)(3), according to the applicant, aprevo™ is integral to the service provided, is used for one patient only, comes in contact with human tissue and is surgically inserted in a patient until the procedure is completed. The applicant also claimed that aprevo™ meets the device eligibility requirements of § 419.66(b)(4) because it is not an instrument, apparatus, implement, or item for which depreciation and financing expenses are recovered, and it is not a supply or material furnished incident to a service. We are inviting public comments on whether aprevo™ meets the eligibility criteria at § 419.66(b).

The criteria for establishing new device categories are specified at § 419.66(c). The first criterion, at § 419.66(c)(1), provides that CMS determines that a device to be included in the category is not appropriately described by any of the existing categories or by any category previously in effect, and was not being paid for as

an outpatient service as of December 31, 1996. The applicant describes aprevo ™ as an interbody fusion implant that stabilizes the lumbar spinal column and facilitates fusion during lumbar fusion procedures indicated for the treatment of spinal deformity. Per the applicant, no previous device categories for pass-through payment have encompassed the device. In addition, per the applicant, the possible existing pass-through codes: C1821 (Interspinous process distraction device (implantable)), C1776 (Joint device (implantable)), C1734 (Orthopedic/device/drug matrix for opposing bone-to-bone or soft tissue-to-bone), and C1062 (Intravertebral body fracture augmentation with implant (*e.g.,* metal, polymer)) do not appropriately describe aprevo™ because none of the existing codes pertain to a patient-specific spinal interbody fusion device and, therefore, do not encompass aprevo™.

We have not identified an existing pass-through payment category that describes aprevo™. We are inviting public comment on whether aprevo ™ meets the device category criterion.

The second criterion for establishing a device category, at § 419.66(c)(2), provides that CMS determines either of the following: (i) That a device to be included in the category has demonstrated that it will substantially improve the diagnosis or treatment of an illness or injury or improve the functioning of a malformed body part compared to the benefits of a device or devices in a previously established category or other available treatment; or (ii) for devices for which pass-through status will begin on or after January 1, 2020, as an alternative to the substantial clinical improvement criterion, the device is part of the FDA's Breakthrough Devices Program and has received FDA marketing authorization. for the indication covered by the Breakthrough Device designation. As previously discussed in section IV.2.a above, we finalized the alternative pathway for devices that are granted a Breakthrough Device designation and receive FDA marketing authorization for the indication covered by the Breakthrough Device designation in the CY 2020 OPPS/ASC final rule with comment period (84 FR 61295). Aprevo ™ has a Breakthrough Device designation and marketing authorization from FDA for the indication covered by the Breakthrough Device designation (as explained in more detail in the discussion of the newness criterion) and therefore is not evaluated for substantial clinical improvement. We note that the applicant was granted new technology add-on payments under the Alternative Pathway for Breakthrough Devices in the FY 2022 IPPS/LTCH PPS final rule (86 FR 45132 through 45133).

The third criterion for establishing a device category, at § 419.66(c)(3), requires us to determine that the cost of the device is not insignificant, as described in § 419.66(d). Section 419.66(d) includes three cost significance criteria that must each be met. The applicant provided the following information in support of the cost significance requirements. The applicant stated that aprevo™ would be reported with HCPCS codes in the following table.

TABLE 31: HCPCS Codes Reported with Aprevo™ Intervertebral Fusion Device

HCPCS Code	Long Descriptor	SI	APC
22853	Insertion of interbody biomechanical device(s) (eg, synthetic cage, mesh) with integral anterior instrumentation for device anchoring (eg, screws, flanges), when performed, to intervertebral disc space in conjunction with interbody arthrodesis, each interspace (List separately in addition to code for primary procedure)	N	N/A
22630	Arthrodesis, posterior interbody technique, including laminectomy and/or discectomy to prepare interspace (other than for decompression), single interspace; lumbar	J1	5116
22633	Arthrodesis, combined posterior or posterolateral technique with posterior interbody technique including laminectomy and/or discectomy sufficient to prepare interspace (other than for decompression), single interspace; lumbar	J1	5115

To meet the cost criterion for device pass-through payment status, a device must pass all three tests of the cost criterion for at least one APC. As we explained in the CY 2005 OPPS final rule with comment period (69 FR 65775), we generally use the lowest APC payment rate applicable for use with the nominated device when we assess whether a device meets the cost significance criterion, thus increasing the probability the device will pass the cost significance test. For our calculations, we used APC 5115, which had a CY 2021 payment rate of $12,314.76 at the time the application was received. Beginning in CY 2017, we calculate the device offset amount at the HCPCS/CPT code level instead of the APC level (81 FR 79657). HCPCS code 22633 had a device offset amount of $6,851.93 at the time the application was received. According to the applicant, the cost of aprevo™ is $26,000.

Section 419.66(d)(1), the first cost significance requirement, provides that the estimated average reasonable cost of devices in the category must exceed 25 percent of the applicable APC payment amount for the service related to the category of devices. The estimated average reasonable cost of $26,000 for aprevo™ is 211.13 percent of the applicable APC payment amount for the service related to the category of devices of $12,314.76 (($26,000/$12,314.76) × 100 = 211.13 percent). Therefore, we believe aprevo™ meets the first cost significance requirement.

The second cost significance requirement, at § 419.66(d)(2), provides that the estimated average reasonable cost of the devices in the category must exceed the cost of the device-related

portion of the APC payment amount for the related service by at least 25 percent, which means that the device cost needs to be at least 125 percent of the offset amount (the device-related portion of the APC found on the offset list). The estimated average reasonable cost of $26,000 for aprevo™ is 379.46 percent of the cost of the device-related portion of the APC payment amount for the related service of $6,851.93 (($26,000/$6,851.93) × 100 = 379.46 percent). Therefore, we believe aprevo™ meets the second cost significance requirement.

The third cost significance requirement, at § 419.66(d)(3), provides that the difference between the estimated average reasonable cost of the devices in the category and the portion of the APC payment amount for the device must exceed 10 percent of the APC payment amount for the related service. The difference between the estimated average reasonable cost of $26,000 for aprevo™ and the portion of the APC payment amount for the device of $6,851.93 is 155.49 percent of the APC payment amount for the related service of $12,314.76 ((($26,000 − $6,851.93)/$12,314.76) × 100 = 155.49 percent). Therefore, we believe that aprevo™ meets the third cost significance requirement.

We are inviting public comment on whether aprevo™ meets the device pass-through payment criteria discussed in this section, including the cost criterion for device pass-through payment status.

(2) MicroTransponder® ViviStim® Paired Vagus Nerve Stimulation (VNS) System (Vivistim® System)

MicroTransponder, Inc. submitted an application for a new device category for transitional pass-through payment status for the ViviStim® Paired VNS System (Vivistim® System) for CY 2023. Per the applicant, the Vivistim® System is intended to be used to stimulate the vagus nerve during rehabilitation therapy in order to reduce upper extremity motor deficits and improve motor function in chronic ischemic stroke patients with moderate to severe arm impairment.

According to the applicant, the Vivistim® System is an active implantable medical device that is comprised of four main components: (1) an Implantable Pulse Generator (IPG), (2) an implantable Lead, (3) Stroke Application & Programming Software (SAPS), and (4) a Wireless Transmitter (WT). The IPG and Lead comprise the implantable components; the SAPS and WT comprise the non-implantable components.

The applicant asserts that the key feature of the biochemical process that underlies neural pathway development is called neuroplasticity. The applicant describes neuroplasticity as a complex biochemical process that is necessary for establishing new synaptic connections. The applicant further states it is widely understood that vagus nerve stimulation triggers the brain to release a burst of neuromodulators, such as acetylcholine and norepinephrine, which are enablers of neuroplasticity. In addition, the applicant further states it is understood that pairing neuromodulator bursts with events increases brain plasticity, which in turn increases the formation of new neural connections.[14] Per the applicant, the use of the external paired stimulation controller to precisely pair VNS with rehabilitation movements is essential to creating neuroplasticity in patients who have upper limb deficits, and this ''event-pairing'' of movement with VNS that generates long-lasting plasticity in the motor and sensory cortex leads to the restored motor function observed in clinical studies.[15]

The applicant specifies the SAPS and WT are non-implantable and are collectively called the External Paired Stimulation Controller. The applicant specifies the IPG and implantable Lead are implantable components. Per the applicant, the External Paired Stimulation Controller allow the implanted components (the IPG and Lead) to stimulate the vagus nerve while rehabilitation movement occurs through the following process: (1) The implantable Lead electrodes are attached to the left vagus nerve in the neck; (2) The implantable Lead is tunneled from the neck to the chest where it is connected to the IPG; (3) The IPG is placed subcutaneously (or sub-muscularly) in the pectoral region; (4) Following implantation of the IPG and stimulation Lead, the External Paired Stimulation Controller enables real-time ''event-pairing'' of vagus nerve stimulation and rehab movements; (5) The IPG and the implantable Lead stimulate the vagus nerve while rehabilitation movements occur; and (6) A therapist initiates the stimulation using a USB push-button or mouse click to synchronize the vagus nerve stimulation with rehabilitation movements to maximize the clinical effect. Patients undergo in-clinic rehabilitation, where vagus nerve stimulation is actively paired with rehabilitation by a therapist. Following in-clinic rehabilitation paired with vagus nerve stimulation, the patient can continue using the device at home. When directed by a physician, the patient can initiate at-home use by swiping a magnet over the IPG implant site which activates the IPG to deliver stimulation while rehabilitation movements are performed

With respect to the newness criterion at § 419.66(b)(1), Vivistim® System was granted FDA Breakthrough Device Designation effective February 10, 2021 for use in stimulating the vagus nerve during rehabilitation therapy in order to reduce upper extremity motor deficits and improve motor function in chronic ischemic stroke patients with moderate to severe arm impairment. The applicant states the Vivistim® System received FDA premarket approval (PMA) on August 27, 2021 as a Class III implantable device for the same indication as the one covered by the Breakthrough Device designation. We received the application for a new device category for transitional pass-through payment status for the Vivistim® System on September 1, 2021, which is within 3 years of the date of the initial FDA marketing authorization. We are inviting public comment on whether the Vivistim® System meets the newness criterion.

With respect to the eligibility criterion at § 419.66(b)(3), according to the applicant, VNS System is integral to the service provided, is used for one patient only, comes in contact with human tissue, and is surgically implanted or inserted (either permanently or temporarily) into the patient. We note that the external components SAPS and WT are not implanted in a patient and do not come in contact with the human tissue as required by § 419.66(b)(3). The applicant also claimed that VNS System meets the device eligibility requirements of § 419.66(b)(4) because it is not an instrument, apparatus, implement, or item for which depreciation and financing expenses are recovered, and it is not a supply or material furnished incident to a service. However, we note that the external non-implantable components SAPS and WT may be an instrument, apparatus, implement, or item for which depreciation and financing expenses are recovered and may be considered depreciable assets as described in § 419.66(b)(4). We are inviting public comments on whether VNS System

[14] Meyers EC, Solorzano BR, James J, Ganzer PD, Lai ES, Rennaker RL 2nd, Kilgard MP, Hays SA. Vagus Nerve Stimulation Enhances Stable Plasticity and Generalization of Stroke Recovery. Stroke. 2018 Mar;49(3):710–717.

[15] Hays SA, Rennaker RL, Kilgard MP. Targeting plasticity with vagus nerve stimulation to treat neurological disease. Prog Brain Res. 2013;207:275–299. doi:10.1016/B978–0–444–63327–9.00010–2.

meets the eligibility criteria at § 419.66(b).

The criteria for establishing new device categories are specified at § 419.66(c). The first criterion, at § 419.66(c)(1), provides that CMS determines that a device to be included in the category is not appropriately described by any of the existing categories or by any category previously in effect, and was not being paid for as an outpatient service as of December 31, 1996.

According to the applicant, there are several device categories that are similar to or related to the proposed device category. The applicant stated that there are five HCPCS device category codes describing neurostimulation devices that are similar to the Vivistim® System, listed in the following table below.

TABLE 32: HCPCS CODES REPORTED WITH THE VIVISTIM® SYSTEM

HCPCS Code	Long Descriptor	Status Indicator	APC
C1767	Generator, neurostimulator (implantable), non-rechargeable	N	N/A
C1820	Generator, neurostimulator (implantable), with rechargeable battery and charging system	N	N/A
C1822	Generator, neurostimulator (implantable), high frequency, with rechargeable battery and charging system	N	N/A
C1823	Generator, neurostimulator (implantable), nonrechargeable, with transvenous sensing and stimulation leads	H	2993
C1825	Generator, neurostimulator (implantable), non-rechargeable with carotid sinus baroreceptor stimulation lead(s)	H	2030

Per the applicant, the codes in the table above do not encompass the Vivistim® System because none of the codes feature an external paired stimulation controller to actively pair stimulation with rehabilitation by a clinician, which is integral to the function and clinical benefit of the device, and the ViviStim® System does not include a rechargeable battery or charging system. The following paragraphs include the applicant's description of each related device category, the distinguishing device features and/or accessories of devices included in each of these categories, and the applicant's rationale for why the Vivistim® System device is not encompassed by these existing device categories.

Per the applicant, the Vivistim® System and similar device category codes that have preceded it (C1820, C1822, C1823, C1825) are distinct from the C1767 device category because of distinguishing device features and/or accessories not currently described by C1767.

The applicant stated that the C1767 was created in 2000 and was the first category for non-rechargeable neurostimulator generators. Per the applicant, the C1767 code currently describes multiple non-rechargeable neurostimulator generator devices that are approved to treat a wide variety of conditions. The applicant stated it is aware of currently marketed implantable, non-rechargeable vagus nerve stimulation devices, such as the VNS Therapy® System (LivaNova, PLC) which are described by C1767. Further, the applicant stated it is aware that CMS does not acknowledge indication for use alone as a reasonable basis to establish a new device category. According to the applicant, the VNS Therapy® System (LivaNova, PLC) has different device components and therapy delivery than the Vivistim® System. Per the applicant, the LivaNova VNS Therapy® System implantable neurostimulators differ from the Vivistim® System in a number of ways. Specifically, according to the applicant, VNS Therapy® System neurostimulators are ''always on'' and send periodic pulses to deliver therapy over the life of the device, whereas the Vivistim® System is actively paired with rehabilitation movements by a clinician to deliver therapy. In addition, the applicant stated the VNS Therapy® System is used to treat neurological disorders such as epilepsy and treatment resistant depression, whereas the Vivistim® System is used to treat upper limb motor deficits in ischemic stroke survivors. The applicant concluded C1767 does not encompass the Vivistim® System.

Per the applicant, C1820 describes an implantable neurostimulator that includes a rechargeable battery and charging system. The applicant stated it is aware of several marketed devices that are described by device category C1820 which was created in CY 2006. The applicant concluded C1820 does not encompass the Vivistim® System. Per the applicant, C1822 describes an implantable neurostimulator, which delivers ''high-frequency'' stimulation (10 kHz) and is provided with a rechargeable battery and charging system. The applicant stated it is aware of only one currently marketed device that is described by this device category, the HF10® Spinal Cord Stimulator (Nevro Corp.). The applicant stated the Vivistim® System is not a ''high-frequency'' stimulator as described by C1822. The applicant stated the paired stimulation using the Vivistim® System is delivered at a maximum of 30 Hz, whereas spinal cord stimulation using the HF10® (Nevro Corp.) is delivered at 10 kHz. The applicant concluded C1822 does not encompass the Vivistim® System.

According to the applicant, C1823 describes an implantable neurostimulator, which is nonrechargeable and includes transvenous sensing and stimulation leads. The applicant stated that it is aware of only one currently marketed device that is described by C1823, the remedē System® Phrenic Nerve Stimulator (Respicardia, Inc.). This device category code does not encompass the Vivistim® System. According to the applicant, the stimulation lead included in the Vivistim® System is placed onto the vagus nerve and is not transvenously placed to stimulate the phrenic nerve. In addition, the applicant asserted the Vivistim® System does not include a sensing lead. The applicant concluded C1823 does not encompass the Vivistim® System.

Per the applicant, C1825 describes an implantable neurostimulator which is nonrechargeable and includes a carotid sinus baroreceptor lead. The applicant stated it is aware of only one currently marketed device that is described by C1825, the BaroStim Neo™ (CVRx, Inc.). According to the applicant, the stimulation lead included in the ViviStim® System is placed onto the vagus nerve and is not placed on the carotid sinus. The applicant concluded C1825 does not encompass the Vivistim® System.

The applicant has asserted that the Vivistim® System is distinct from HCPCS codes C1820, C1822, C1823 and C1825 due to distinguishing features unique to these codes. These unique features include rechargeable batteries, high frequency stimulation, transvenous sensors and stimulators and unique placement of stimulators. With respect to C1767, however, the applicant's argument is that the Vivistim® System is not ''always on'' and is paired to an external stimulation controller to allow for clinician-controlled stimulation during rehabilitation, and therefore is unlike the non-rechargeable implantable neurostimulator of the VNS Therapy® System (LivaNova, PLC), which is described by C1767. It is our understanding, however, that implantable neurostimulators for epilepsy and depression are not ''always on'', but are programmed to turn on and off in specific cycles as determined by a clinician. Furthermore, in the case of treatment for epilepsy, a neurostimulator can be turned on by the patient with a hand held magnet if an impending seizure is sensed, and the neurostimulator can similarly be turned off by the patient during certain activities, such as speaking, exercising, or eating. As per the application, the IPG of the Vivistim® System can also be patient-engaged with a magnetic card, allowing the patient to continue therapy at home. In this context, we believe the Vivistim® System may be similar to the devices currently described by C1767, and therefore the Vivistim® System may also be appropriately described by C1767. We are inviting public comment on whether the Vivistim® System meets the device category criterion.

The second criterion for establishing a device category, at § 419.66(c)(2), provides that CMS determines either of the following: (i) That a device to be included in the category has demonstrated that it will substantially improve the diagnosis or treatment of an illness or injury or improve the functioning of a malformed body part compared to the benefits of a device or devices in a previously established category or other available treatment; or (ii) for devices for which pass-through status will begin on or after January 1, 2020, as an alternative to the substantial clinical improvement criterion, the device is part of the FDA's Breakthrough Devices Program and has received FDA marketing authorization for the indication covered by the Breakthrough Device designation. As previously discussed in section IV.2.a above, we finalized the alternative pathway for devices that are granted a Breakthrough Device designation and receive FDA marketing authorization for the indication covered by the Breakthrough Device designation in the CY 2020 OPPS/ASC final rule with comment period (84 FR 61295). The Vivistim® System has a Breakthrough Device designation and marketing authorization from FDA for the indication covered by the Breakthrough Device designation (as explained in more detail in the discussion of the newness criterion) and therefore is not evaluated for substantial clinical improvement. We note that the applicant has also submitted an application for IPPS New Technology Add-on payments for FY 2023 Payment under the Alternative Pathway for Breakthrough Devices (87 FR 28349 through 28350).

The third criterion for establishing a device category, at § 419.66(c)(3), requires us to determine that the cost of the device is not insignificant, as described in § 419.66(d). Section 419.66(d) includes three cost significance criteria that must each be met. The applicant provided the following information in support of the cost significance requirements. The applicant stated that the insertion procedure for the Vivistim® System implantable pulse generator (IPG) and stimulation lead would be reported with the HCPCS Level I CPT code 64568 (Incision for implantation of cranial nerve (*e.g.,* vagus nerve) neurostimulator electrode array and pulse generator).

To meet the cost criterion for device pass-through payment status, a device must pass all three tests of the cost criterion for at least one APC. As we explained in the CY 2005 OPPS final rule (69 FR 65775), we generally use the lowest APC payment rate applicable for use with the nominated device when we assess whether a device meets the cost significance criterion, thus increasing the probability the device will pass the cost significance test. For our calculations, we used APC 5465 Level 5 Neurostimulator and Related Procedures, which had a CY 2021 payment rate of $29,444.52 at the time the application was received. Beginning in CY 2017, we calculate the device offset amount at the HCPCS/CPT code level instead of the APC level (81 FR 79657). HCPCS code 64568 had a device offset amount of $25,236.9 at the time the application was received. According to the applicant, the cost of the Vivistim® System is $36,000.00.

Section 419.66(d)(1), the first cost significance requirement, provides that the estimated average reasonable cost of devices in the category must exceed 25 percent of the applicable APC payment amount for the service related to the category of devices. The estimated average reasonable cost of $36,000.00 for Vivistim® System is 122.26 percent of the applicable APC payment amount for the service related to the category of devices of $29,444.52 (($36,000.00/$29,444.52) × 100 = 122.26 percent). Therefore, we believe Vivistim® System meets the first cost significance requirement.

The second cost significance requirement, at § 419.66(d)(2), provides that the estimated average reasonable cost of the devices in the category must exceed the cost of the device-related portion of the APC payment amount for the related service by at least 25 percent, which means that the device cost needs to be at least 125 percent of the offset amount (the device-related portion of the APC found on the offset list). The estimated average reasonable cost of $36,000.00 for Vivistim® System is 142.65 percent of the cost of the device-related portion of the APC payment amount for the related service of $25,236.90 (($36,000.00/$25,236.90) × 100 = 142.65 percent). Therefore, we believe that Vivistim® System meets the second cost significance requirement.

The third cost significance requirement, at § 419.66(d)(3), provides that the difference between the

estimated average reasonable cost of the devices in the category and the portion of the APC payment amount for the device must exceed 10 percent of the APC payment amount for the related service. The difference between the estimated average reasonable cost of $36,000.00 for Vivistim® System and the portion of the APC payment amount for the device of $25,236.90 is 36.55 percent of the APC payment amount for the related service of $29,444.52 (($36,000.00 − $25,236.90)/$29,444.52) × 100 = 36.55 percent). Therefore, we believe that Vivistim® System meets the third cost significance requirement.

We are inviting public comment on whether Vivistim® System meets the device pass-through payment criteria discussed in this section, including the cost criterion for device pass-through payment status.

2. Traditional Device Pass-Through Applications

(1) The BrainScope TBI (Model: Ahead 500)

BrainScope Company Inc. submitted an application for a new device category for transitional pass-through payment status for the BrainScope Ahead 500 system (hereinafter referred to as the BrainScope TBI) for CY 2023. The BrainScope TBI is a handheld medical device and decision-support tool that uses artificial intelligence (AI) and machine learning technology to identify objective brain-activity based biomarkers of structural and functional brain injury in patients with suspected mild traumatic brain injury (mTBI). According to the applicant, the BrainScope TBI is an FDA-cleared, portable, non-invasive, point-of-care device and disposable headset intended to provide results and measures to aid in the rapid, objective, and accurate diagnosis of mTBI. Per the applicant, the BrainScope TBI is intended to be used in emergency departments (ED), urgent care centers, clinics, and other environments where used by trained medical professionals under the direction of a physician.

According to the applicant, the BrainScope TBI is comprised of two elements: (1) the Ahead 500, a disposable forehead-only 8-electrode headset temporarily applied to the patient's skin to assess brain injury (the wounded area) which records electroencephalogram (EEG) signals; and (2) a reusable handheld device (hereinafter ''Handheld Device''), which includes a standard commercial off-the-shelf handheld computer connected to a custom manufactured Data Acquisition Board (DAB) via a permanently attached cable. The applicant stated that the BrainScope software (including proprietary BrainScope algorithms) and a kiosk mode application running on Android are loaded onto an off-the-shelf handheld computer configuration. The disposable headset is attached to the DAB, which collects the EEG signal and passes it as a digital signal to the Handheld Device to perform the data processing and analysis.

According to the applicant, the BrainScope TBI device is intended to record, measure, analyze, and display brain electrical activity utilizing the calculation of standard quantitative EEG (qEEG) parameters from frontal locations on a patient's forehead. Patient information is transferred to electronic health records via USB connected to a computer. The BrainScope TBI calculates and displays raw measures for the following standard qEEG measures: Absolute and Relative Power, Asymmetry, Coherence and Fractal Dimension. The applicant asserts that these raw measures are intended to be used for post-hoc analysis of EEG signals for interpretation by a qualified user. Per the applicant, the device can be used as a screening tool and aid in determining the medical necessity of head computerized tomography (CT) scanning.

With respect to the newness criterion at § 419.66(b)(1), on September 11, 2019, the applicant received 510(k) clearance from FDA for the BrainScope TBI as a Class II device for use as an adjunct to standard clinical practice to aid in the evaluation of patients who have sustained a closed head injury, and have a Glasgow Coma Scale (GCS) score of 13–15 (including patients with concussion/mild traumatic brain injury (mTBI)). We received the application for a new device category for transitional pass-through payment status for the BrainScope TBI on February 23, 2022, which is within 3 years of the date of the initial FDA marketing authorization. We are inviting public comments on whether the BrainScope TBI meets the newness criterion.

With respect to the eligibility criterion at § 419.66(b)(3), according to the applicant, the BrainScope TBI is integral to the service provided and is used for one patient only. Per the applicant, the Ahead 500 component records EEG signals via a disposable forehead-only 8-electrode headset and is temporarily applied to the patient's skin to assess brain injury. We note that while the Ahead 500 component is used for one patient only and it is temporarily applied to the patient's skin, the device is not surgically implanted or inserted or applied in or on a wound or other skin lesion, as required by 42 CFR 418.66(b)(3). We further note that the other component of the BrainScope TBI, the Handheld Device, does not come in contact with the patient's tissue, and the device is not surgically implanted or inserted or applied in or on a wound or other skin lesion, as required by § 418.66(b)(3). Per the applicant, the Handheld Device is used by multiple patients. We further question whether this device may be an instrument, apparatus, implement, or item for which depreciation and financing expenses are recovered in accordance with the device eligibility requirements of § 419.66(b)(4). The applicant did not indicate if the BrainScope TBI is a supply or material furnished incident to a service. We are inviting public comments on whether the BrainScope TBI meets the eligibility criteria at § 419.66(b).

The criteria for establishing new device categories are specified at § 419.66(c). The first criterion, at § 419.66(c)(1), provides that CMS determines that a device to be included in the category is not appropriately described by any of the existing categories or by any category previously in effect, and was not being paid for as an outpatient service as of December 31, 1996. The applicant has not identified any existing pass-through payment category that describes the BrainScope TBI. Upon review, it does not appear that there are any existing pass-through payment categories that might apply to the BrainScope TBI. We are inviting public comment on whether the BrainScope TBI meets the device category criterion.

The second criterion for establishing a device category, at § 419.66(c)(2), provides that CMS determines either of the following: (i) that a device to be included in the category has demonstrated that it will substantially improve the diagnosis or treatment of an illness or injury or improve the functioning of a malformed body part compared to the benefits of a device or devices in a previously established category or other available treatment; or (ii) for devices for which pass-through status will begin on or after January 1, 2020, as an alternative to the substantial clinical improvement criterion, the device is part of FDA's Breakthrough Devices Program and has received FDA marketing authorization for the indication covered by the Breakthrough Device designation. The applicant indicated that it is aware of a marketed medical device COGNISION, which fits the proposed additional device category in addition to the BrainScope TBI. According to the applicant, the

COGNISION® System (COGNISION®) is cleared by FDA for use by qualified clinical professionals in private practice offices or small clinical settings for the acquisition, display, analysis, storage, reporting and management of EEG and auditory evoked potentials (AEP) information. The applicant stated that the COGNISION® cloud-powered electrophysiologic testing system evaluates patients with neurological disorders, such as dementia and concussion. According to the applicant, by measuring the electrical activity in the brain that is responsible for information processing, COGNISION® assesses cognitive function. The applicant also pointed out that COGNISION® evaluates working memory, focal attention, executive function, and brain processing speed through Event Related Potential (ERP) and qEEG tests. The applicant acknowledged that COGNISION® also measures hearing deficits which can be co-morbid with cognitive disorders.

The applicant stated that the BrainScope TBI represents a substantial clinical improvement over existing technology. With respect to this criterion, the applicant submitted studies that examined the impact of the BrainScope TBI as a brain injury adjunctive interpretive electroencephalograph assessment aid. Broadly, the applicant outlined the following areas in which it stated the BrainScope TBI would provide a substantial clinical improvement over existing technologies: (1) decreased rate of repeat/subsequent diagnostic or therapeutic interventions, (2) more rapid beneficial resolution of the disease process treated because of the use of the device, and (3) reduced recovery time when used for the treatment mild head injuries (mTBI).

In support of its first claim that the BrainScope TBI decreases the rate of subsequent diagnostic or therapeutic interventions, the applicant provided five articles. The first was a multisite, prospective observational FDA validation trial performed in the U.S.[16] A total of 720 patients (18–85 years) meeting inclusion/exclusion criteria were enrolled at 11 U.S. EDs. Ninety-seven percent of study participants had a Glasgow Coma Scale (GCS) of 15, with the first and third quartiles being 15 (interquartile range = 0) at the time of the evaluation. Standard clinical evaluations were conducted, and 5 to 10 minutes of EEG was acquired from frontal and frontotemporal scalp locations. Using an a priori derived EEG-based classification algorithm developed on an independent population and applied to this validation population prospectively, the likelihood of each subject being CT+ was determined, and performance metrics were computed relative to adjudicated CT findings. The authors stated that by using an EEG-based biomarker, high accuracy of predicting the likelihood of being CT+ was obtained, with high normalized power variance (NPV) and sensitivity to any traumatic bleeding and to hematomas. Per the authors, specificity was significantly higher than standard CT decision rules and the short time to acquire results and the ease of use in the ED environment suggests that EEG-based classifier algorithms have potential to impact triage and clinical management of head-injured patients. Both the applicant and the authors indicated that the BrainScope TBI Structural Injury Classifier (SIC) [17] biomarker demonstrated extremely high sensitivity in this validation study. Sensitivity for those who are CT+ with ≥1mL blood was 98.6 percent (72/73, 95% CI = 92.6%–100.0 percent), with an area under the curve (AUC) of 0.82. It is noted that this study could not be run as a randomized controlled trial (RCT) as the individual site institutional review boards (IRBs) would not allow random assignment to determination to receive a CT, which was entirely at the discretion of the clinician. Results supported the potential to impact triage and clinical management and help in avoidance of unnecessary CT scans. High NPV supports confidence added to decisions not to perform a CT scan. In this validation study, the BrainScope TBI's SIC biomarker reported 2% false negatives (FNs), none of which were considered by clinical sites or FDA to be ''clinically important,'' and all of which were confirmed in follow-up as requiring no further care. In the same large FDA prospective validation study, the BrainScope's SIC biomarker had specificity of 51.60 percent (291/564, 95 percent CI = 48.05 percent–55.13 percent). In the same population, SIC specificity outperformed that of the standard clinical CT decision rules, with the New Orleans Criteria (NOC) = 8.6 percent and Canadian CT Head Rule (CCHR) = 31 percent. Higher specificity relative to standard practice supports reduced CT referrals. In the same large FDA prospective validation study specificity of the BrainScope TBI's SIC biomarker was shown to scale with severity of clinical functional impairment, with specificities of 76.7 percent, 58.8 percent, and 22.2 percent for none, mild, and moderate functional impairment, respectively.

The second article was a retrospective secondary study of the independent prospective FDA validation trial that demonstrated the efficacy of (1) an automatic SIC for the likelihood of injury visible on a CT (CT+) and (2) an EEG-based Brain Function Index (BFI) to assess functional impairment in minimally impaired, head-injured adults presenting within 3 days of injury.[18] In this retrospective analysis, the impact on the biomarker performance in patients who presented with or without drug and alcohol (DA) was studied. DA–ED visits represent an increasing fraction of the head-injured population seen in the ED. Such patients present a challenge to the evaluation of head injury and determination of need for CT scan and further clinical pathways. This effort examined whether an EEG-based biomarker could aid in reducing unnecessary CT scans in the intoxicated ED population. SIC sensitivity was not significantly impacted by the presence of DA. Although specificity decreased, it remained several times higher than obtained using standard CT decision rules. Furthermore, according to the authors, the potential to reduce the number of unnecessary scans by approximately 30% was demonstrated when the BrainScope TBI SIC was integrated into CT clinical triage. According to the authors, the BFI was demonstrated to be independent of the presence of DA.

The third article was a retrospective clinical study conducted in the U.S.[19] Two potential initial evaluation pathways were compared for CT referrals: a. Clinical Site Practice Referral, relying on clinical judgement of the ED physician according to site standard of care; and b. EEG-based

[16] Hanley D, Prichep LS, Bazarian J, Huff JS, Naunheim R, Garrett J, Jones EB, Wright DW, O'Neill J, Badjatia N, Gandhi D. Emergency department triage of traumatic head injury using a brain electrical activity biomarker: a multisite prospective observational validation trial. Academic emergency medicine. 2017 May;24(5):617–27.

[17] The SIC is an electrophysiological based biomarker derived from selected EEG features and a small set of clinical associated symptoms, using machine learning and advanced classification algorithms to identify those features which optimally characterize the pattern of changes in brain function that occur with head injury.

[18] Michelson, E., Huff, J.S., Garrett, J., & Naunheim, R. (2019). Triage of mild head-injured intoxicated patients could be aided by use of an electroencephalogram-based biomarker. Journal of neuroscience nursing, 51(2), 62–66.

[19] Naunheim, R., Koscso, M. K., & Poirier, R. (2019). Reduction in unnecessary CT scans for head-injury in the emergency department using an FDA cleared device. The American journal of emergency medicine, 37(10), 1987–1988.

classification algorithm assessment, relying on the ternary output of the SIC (positive, negative, equivocal) to inform CT referral decision. The SIC is an electrophysiological based biomarker derived from selected EEG features and a small set of clinical associated symptoms, using machine learning and advanced classification algorithms to identify those features which optimally characterize the pattern of changes in brain function that occur with head injury. Of the 91 patients referred to CT, 13 were read as positive and 78 as negative. These 91 CT referrals made using the clinical judgement decision pathway resulted in 78 patients who were found to be CT negative. Using the second pathway with input from the EEG based classification algorithm assessment (SIC) resulted in 63 patients who were positive for CT referral. Thus, the researchers stated that the use of the EEG-based algorithm decision pathway to aid in referral for CT scanning would have resulted in 63 patients being referred for CT scans instead of 91 referrals made following standard clinical site practice. Per the researchers, this represents a reduction of 28 fewer head CT scans, a 30.8 percent (= (91 − 63)/91) reduction. According to the researchers, while still early in the clinical use of this EEG based biomarker, this data demonstrates that the BrainScope TBI medical device can provide objective information to aid in the initial assessment of mTBI patients in the ED. The researchers suggested that integrating this data into the decision-making process for CT referrals would have led to a significant reduction of ~31 percent in CT scanning. The researchers concluded that this decrease in CT use and its associated radiation was achieved without incurring any false negative cases (100 percent sensitivity).

The fourth article was a retrospective clinical study conducted in the U.S.[20] The study authors found that heightened awareness of the potential short and long-term consequences of mild traumatic brain injury (mTBI or concussion) has resulted in an increase in ED visits for traumatic head injury, even as the volume of overall ED visits has remained stable over the same period of time.[21] While the vast majority (~95%) of these head injured patients are mild, >80% receive CT scans of which ~91% are found to be negative.[22] The rising number of negative CT findings, cost, radiation exposure, and ED resource utilization, has led to an increased need for reliable predictors of intracranial injury in the mild head injured population.[23] Based on a retrospective analysis of data collected in the BrainScope's multisite independent FDA validation study, it was found that had the SIC been used in determination as an input for CT scan referral, there would have been a reduction of false positives of 33.3% (408272/408). In addition, according to the study, a significantly lower false discovery rate of 65% (= 272/416) was achieved compared to the clinical site practice (one-sided comparison, p = 0.01).

The fifth article was a retrospective clinical study conducted in the U.S.[24] This study compares the predictive power using that algorithm (which includes loss of consciousness (LOC) and amnesia), to the predictive power of LOC alone or LOC plus traumatic amnesia. Study participants consisted of ED patients 18–85 years who presented within 72 hours of closed head injury, with Glasgow Coma Scale (GCS) between 12–15. 680 patients with known absence or presence of LOC were enrolled (145 CT + and 535 CT − patients). 5–10 min of eyes closed EEG was acquired using the Ahead 300 handheld device, from frontal and frontotemporal regions. The same classification algorithm methodology was used for both the EEG-based and the LOC-based algorithms. Predictive power was evaluated using area under the receiver operator characteristic (ROC) curve (AUC) and odds ratios. The Quantitative EEG-based classification algorithm demonstrated significant improvement in predictive power compared with LOC alone, both in improved AUC (83% improvement) and odds ratio (increase from 4.65 to 16.22). Adding retrograde amnesia (RGA) and/or post-traumatic amnesia (PTA) to LOC was not improved over LOC alone. The AUC for LOC only predictive method was 0.68, and for LOC +RGA/PTA was 0.69. The AUC for the BrainScope structural injury classifier is 0.83, which represents an 83% improvement over the standard clinical predictors (LOC and/or RGA). Rapid triage of TBI relies on strong initial predictors. The authors concluded that the addition of an electrophysiological based marker was shown to outperform report of LOC alone or LOC plus amnesia, in determining risk of an intracranial bleed. In addition, according to the authors, ease of use at point-of-care, non-invasive, and rapid result using such technology suggests significant value added to standard clinical prediction.

With respect to the claim that the BrainScope TBI provides for a more rapid, beneficial resolution of the disease process treated, the applicant provided a consensus modeling retrospective clinical study conducted in the U.S.[25] The study researchers developed a care map that included each step of evaluation of mTBI (Glasgow Coma Scale Score 13–15), from initial presentation to the ED to discharge. Time spent at each step was estimated by study-affiliated emergency physicians and nurses. The study subsequently validated time estimates using retrospectively collected, real-time data at two EDs. Length of stay (LOS) time differences between admission and discharged patients were calculated for patients being evaluated for mTBI. Evaluation of time from ED intake to discharge in a mTBI population was modeled by a medical consensus group and validated in retrospective review of real-time data. Mean time was 6.6 hours. Time related to head CT comprised about one-half of the total LOS. The authors concluded that limiting use of head CT as part of the workup of mTBI to more serious cases may reduce time spent in the ED and potentially improve overall ED throughput.

To support the claim of a decreased rate of subsequent diagnostic or therapeutic interventions and reduced recovery time using the device, the applicant provided a retrospective clinical pilot study conducted in the U.S.[26] that focused on the immediate use and implementation of the BrainScope TBI in the ED environment for the triage of 19 head-injured

[26] Clay, M.S. Clinical Utility of an EEG Based Biomarker for the Triage of Head Injured Patients in the ED: INOVA Pilot Study.

patients: ages 18 to 85, GCS 13–15, within 72 hours of injury, from April 26th to May 1, 2021. According to this study, the results reinforced the clinical utility of the BrainScope technology to be a reliable tool for clinicians to proactively catch injuries that may not have been sent for CT and to reduce unnecessary CT's, thus reducing LOS. The author indicated that the BrainScope TBI was an effective decision-making aide in determining the appropriate use of imaging for closed head injuries. The author stated that within one rapid EEG test at the point of care, the BrainScope provided objective data on both brain bleeds and concussions to assist healthcare providers evaluate head injured patients. According to the author, this study was successful in determining utilization, staff assessment, and patient experience of the BrainScope technology in daily use. The author noted the results of the trial were positive and demonstrated the following: (1) 100 percent patient satisfaction with BrainScope; (2) Improved CT utilization in the mild TBI patient population: 60 percent reduction in head CT. Decreased radiation exposure. One patient was sent for CT after receiving a positive result from BrainScope TBI SIC that was found CT positive and who may not have been sent otherwise; and (3) Decreased LOS for patients who were BrainScope negative for structural injury. An average of 16-minute testing times had a positive impact on LOS for patients who were BrainScope negative.

In support of the claim that the BrainScope TBI reduces recovery time, the applicant submitted four articles. The first was a prospective clinical study conducted in the U.S.[27] The potential clinical utility of a quantitative EEG-based BFI as a measure of the presence and severity of functional brain injury was studied as part of an independent prospective validation trial. The BFI was derived using qEEG features associated with functional brain impairment reflecting current consensus on the physiology of concussive injury. The applicant asserted that the results supported FDA clearance for the BFI as a quantitative marker of brain function impairment. Per the applicant, a multinomial logistic regression analysis demonstrated odds ratios (versus controls) of the mild and moderate functionally impaired groups were significantly different from the odds ratio of the severe group (CT+), (p=0.0009, p=0.0026, respectively). Per the applicant, regression slopes for likelihood of group membership demonstrated that BFI scaled with severity of impairment contributed to earlier identification and intervention of concussion, which is associated with better outcomes.

Another article provided by the applicant to support the claim of reduced recovery time associated with the use of the BrainScope TBI, was a multisite prospective observational validation trial conducted in the U.S.[28] The study was to validate the classification accuracy of a previously derived, machine learning, multimodal, brain electrical activity–based Concussion Index (CI) in an independent cohort of athletes with concussion. This prospective diagnostic cohort study was conducted at 10 clinical sites (*i.e.,* U.S. universities and high schools) between February 4, 2017 and March 20, 2019. A cohort comprised of a consecutive sample of 207 athletes aged 13 to 25 years with concussion and 373 matched athlete controls without concussion were assessed with electroencephalography, cognitive testing, and symptom inventories within 72 hours of injury, at return to play, and 45 days after return to play. Variables from the multimodal assessment were used to generate a Concussion Index at each time point. Athletes with concussion had experienced a witnessed head impact, were removed from play for 5 days or more, and had an initial Glasgow Coma Scale score of 13 to 15. Participants were excluded for known neurologic disease or history within the last year of traumatic brain injury. Athlete controls were matched to athletes with concussion for age, sex, and type of sport played. Classification accuracy of the CI at time of injury using a prespecified cutoff of 70 or less (total range, 0–100, where ≤70 indicates it is likely the individual has a concussion and >70 indicates it is likely the individual does not have a concussion). Results included 580 eligible participants with analyzable data, of whom 207 had concussion (124 male participants [59.9 percent]; mean [standard deviation (SD)] age, 19.4 [2.5] years), and 373 were athlete controls (187 male participants [50.1 percent]; mean [SD] age, 19.6 [2.2] years). The CI had a sensitivity of 86.0 percent (95 percent CI, 80.5 percent–90.4 percent), specificity of 70.8 percent (95 percent CI, 65.9 percent–75.4 percent), negative predictive value of 90.1 percent (95 percent CI, 86.1 percent–93.3 percent), positive predictive value of 62.0 percent (95 percent CI, 56.1 percent–67.7 percent), and area under receiver operator characteristic (ROC) curve of 0.89. At day 0, the mean [SD] CI among athletes with concussion was significantly lower than among athletes without concussion (75.0 [14.0] vs 32.7 [27.2]; P <.001). The researchers noted that among athletes with concussion, there was a significant increase in the CI between day 0 and return to play, with a mean (SD) paired difference between these time points of −41.2 (27.0) (P <.001). The researchers concluded that these results suggest that the multimodal brain activity–based CI has high classification accuracy for identification of the likelihood of concussion at time of injury and may be associated with the return to control values at the time of recovery. According to the researchers, the CI has the potential to aid in the clinical diagnosis of concussion and in the assessment of athletes' readiness to return to play.

The final article provided by the applicant in support of the claim of reduced recovery time was a multisite prospective observational validation trial conducted in the U.S.[29] This study was to derive an objective multimodal CI using EEG at its core, to identify concussion, and to assess change over time throughout recovery. Male and female concussed (n = 232) and control (n = 206) subjects 13–25 years were enrolled at 12 U.S. colleges and high schools. Evaluations occurred within 72 hours of injury, 5 days post-injury, at return-to-play (RTP), 45 days after RTP (RTP + 45); and included EEG, neurocognitive performance, and standard concussion assessments. Concussed subjects had a witnessed head impact, were removed from play for ≥5 days using site guidelines and were divided into those with RTP <14 or ≥14 days. Part 1 of this paper described the derivation and efficacy of the machine learning derived classifier as a marker of concussion. Part 2 of this paper described significance of

[27] Hanley D, Prichep LS, Badjatia N, Bazarian J, Chiacchierini R, Curley KC, Garrett J, Jones E, Naunheim R, O'Neil B, O'Neill J, Wright DW, Huff JS. A Brain Electrical Activity Electroencephalographic-Based Biomarker of Functional Impairment in Traumatic Brain Injury: A Multi-Site Validation Trial. J Neurotrauma. 2018 Jan 1;35(1):41–47. doi: 10.1089/neu.2017.5004. Epub 2017 Sep 21. PMID: 28599608.

[28] Bazarian, J.J., Elbin, R.J., Casa, D.J., Hotz, G.A., Neville, C., Lopez, R.M., . . . & Covassin, T. (2021). Validation of a machine learning brain electrical activity–based index to aid in diagnosing concussion among athletes. JAMA network open, 4(2), e2037349–e2037349.

[29] Jacquin AE, Bazarian JJ, Casa DJ, Elbin RJ, Hotz G, Schnyer DM, Yeargin S, Prichep LS, and Covassin T. Concussion assessment potentially aided by use of an objective multimodal concussion index. Journal of Concussion. January 2021. doi:10.1177/20597002211004333.

differences in CI between groups at each time point and within each group across time points. Per the researchers, the CI was shown to have high accuracy as a marker of likelihood of concussion and stability of CI in controls supports reliable interpretation of CI change in concussed subjects. The researchers concluded that the objective identification of the presence of concussion and assessment of readiness to return to normal activity can be aided by use of the CI, a rapidly obtained, point of care assessment tool. Sensitivity = 84.9 percent, specificity = 76.0 percent, and AUC = 0.89 were obtained on a test Hold-Out group representing 20 percent of the total dataset. Per the study, EEG features reflecting connectivity between brain regions contributed most to the CI. CI was stable over time in controls. According to the researchers, significant differences in CI between controls and concussed subjects were found at time of injury, with no significant differences at RTP and RTP + 45. Within the concussed, the researchers were able to identify differences in rate of recovery.

Based on the evidence submitted with the application, we note the following concerns. We note that most articles and citations provided by BrainScope are prospective observational studies or retrospective review articles, and most findings appear to be suggestive, rather than conclusive, of an association or significant benefit. Within the retrospective and prospective studies lacking a control subset, we note that some level of selection bias may potentially influence outcomes seen in these studies. Further, we note that confounding often occurs in both prospective and retrospective studies, which may result in misinterpretation of the observed relationships between the dependent and independent values. In most of the studies, the authors did not address potential confounding issues, which makes it difficult to determine whether the BrainScope TBI or the control was effective with its results.

We further note that the applicant provided retrospective clinical validation studies,[30] [31] which describe findings for previous BrainScope technology, the BrainScope Ahead 300 handheld device, not the nominated BrainScope Ahead 500 handheld device. Per the applicant, the BrainScope Ahead 500 improves upon the prior versions of BrainScope's own previously FDA-cleared devices. The applicant does not provide comparative outcome data between the current and previous versions. Additional information regarding comparative outcomes data would help inform our assessment of whether the BrainScope TBI Ahead 500 demonstrates a substantial clinical improvement over existing technologies, including the BrainScope Ahead 300. We note concern that even though the applicant states that it is a prospective trial the paper was noted to be a retrospective secondary study of an independent study by FDA.

Lastly, we note that the cited studies have a small sample size. In addition, conclusions in the application regarding the referenced observational and retrospective studies about substantial clinical improvement appear to be overly broad and imply statistical significance, when only a possible association may in fact be supported. We further note that the majority of the studies lacked a comparator to the existing technologies that the applicant identified when assessing the effectiveness of the BrainScope TBI. In addition, the applicant identified the COGNISION® System as an existing device, but we did not receive any citations or supporting references regarding comparability of these technologies. We also note that there are two additional FDA-cleared, potential alternate therapies [32] [33] that could be relevant, but the applicant did not provide citations or supporting references regarding comparability specifically in the application. Additional information regarding comparative outcomes data would help inform our assessment of whether the BrainScope TBI demonstrates a significant clinical improvement over existing technologies.

We are inviting public comments on whether the BrainScope TBI meets the substantial clinical improvement criterion.

The third criterion for establishing a device category, at § 419.66(c)(3), requires us to determine that the cost of the device is not insignificant, as described in § 419.66(d). Section 419.66(d) includes three cost significance criteria that must each be met. The applicant provided the following information in support of the cost significance requirements. The applicant stated that BrainScope TBI would be reported with HCPCS codes listed in the following table:

[30] Hack, D., Huff, J.S., Curley, K., Naunheim, R., Dastidar, S.G., & Prichep, L.S. (2017). Increased prognostic accuracy of TBI when a brain electrical activity biomarker is added to loss of consciousness (LOC). The American Journal of Emergency Medicine, 35(7), 949–952.

[31] Hanley D, Prichep LS, Bazarian J, Huff JS, Naunheim R, Garrett J, Jones EB, Wright DW, O'Neill J, Badjatia N, Gandhi D. Emergency department triage of traumatic head injury using a brain electrical activity biomarker: a multisite prospective observational validation trial. Academic emergency medicine. 2017 May;24(5):617–27.

[33] *https://www.mobihealthnews.com/news/syncthink-scores-fda-clearance-ai-system-aid-concussion-diagnosis.*

TABLE 33: HCPCS CODES REPORTED WITH THE BRAINSCOPE TBI

HCPCS Code	Long Descriptor	Status Indicator	APC
95816	Electroencephalogram (eeg); including recording awake and drowsy	S	5722
96132	Neuropsychological testing evaluation services by physician or other qualified health care professional, including integration of patient data, interpretation of standardized test results and clinical data, clinical decision making, treatment planning and report, and interactive feedback to the patient, family member(s) or caregiver(s), when performed; first hour	Q3	5722
96136	Psychological or neuropsychological test administration and scoring by physician or other qualified health care professional, two or more tests, any method; first 30 minutes	Q3	5734
96138	Psychological or neuropsychological test administration and scoring by technician, two or more tests, any method; first 30 minutes	Q3	5735
96146	Psychological or neuropsychological test administration, with single automated, standardized instrument via electronic platform, with automated result only	Q3	5731

To meet the cost criterion for device pass-through payment status, a device must pass all three tests of the cost criterion for at least one APC. As we explained in the CY 2005 OPPS final rule with comment period (69 FR 65775), we generally use the lowest APC payment rate applicable for use with the nominated device when we assess whether a device meets the cost significance criterion, thus increasing the probability the device will pass the cost significance test. For our calculations, we used APC 5731—Level 1 Minor Procedures, which had a CY 2021 payment rate of $24.67 at the time the application was received. Beginning in CY 2017, we calculate the device offset amount at the HCPCS/CPT code level instead of the APC level (81 FR 79657). However, we note that all the HCPCS codes identified by the applicant had a device offset amount of $0.00 at the time the application was received, including the HCPCS code 96146. Accordingly, we are evaluating the cost significance requirements consistent with how we previously have treated other items with a device offset amount of $0.00 (see 84 FR 61285). According to the applicant, the cost of BrainScope TBI (single use disposable electrode headset) is $225.00.

Section 419.66(d)(1), the first cost significance requirement, provides that the estimated average reasonable cost of devices in the category must exceed 25 percent of the applicable APC payment amount for the service related to the category of devices. The estimated average reasonable cost of $225.00 for BrainScope TBI is 912.04 percent of the applicable APC payment amount for the service related to the category of devices of $24.67 (($225/$24.67) × 100 = 912.04 percent). Therefore, we believe BrainScope TBI meets the first cost significance requirement.

The second cost significance requirement, at § 419.66(d)(2), provides that the estimated average reasonable cost of the devices in the category must exceed the cost of the device-related portion of the APC payment amount for the related service by at least 25 percent, which means that the device cost needs to be at least 125 percent of the offset amount (the device-related portion of the APC found on the offset list). Given that there are no device-related costs in the APC payment amount, and the BrainScope TBI has an estimated average reasonable cost of $225, we believe that the BrainScope TBI meets the second cost significance requirement.

The third cost significance requirement, at § 419.66(d)(3), provides that the difference between the estimated average reasonable cost of the devices in the category and the portion of the APC payment amount for the device must exceed 10 percent of the APC payment amount for the related service. The difference between the estimated average reasonable cost of $225 for BrainScope TBI and the portion of the APC payment amount for the device of $0.00 exceeds the APC payment amount for the related service of $225 by 912.04 percent ((($225 − $0.00)/$24.67) × 100 = 912.04 percent). Therefore, we believe that the BrainScope TBI meets the third cost significance requirement.

We are inviting public comment on whether the BrainScope TBI meets the device pass-through payment criteria discussed in this section, including the cost criterion for device pass-through payment status.

(2) NavSlim™ and NavPencil

Elucent Medical, Inc. submitted an application for a new device category

for transitional pass-through payment status for CY 2023 for the NavSlim™ and NavPencil (referred to collectively as ''the Navigators''). The applicant described the Navigators as single-use (disposable) devices for real-time, stereotactic, 3D navigation for the excision of pre-defined soft tissue specimens.

According to the FDA 510(k) Summary (K183400) provided by the applicant,[34] the Navigators are a component of the applicant's EnVisio™ Navigation System [35] which is intended only for the non-imaging detection and localization (by navigation) of a SmartClip™ Soft Tissue Marker (SmartClip™) that has been implanted in a soft tissue biopsy site or a soft tissue site intended for surgical removal.[36] We note that the applicant submitted a separate application for pass-through payment status for the SmartClip™ for CY 2023, as discussed in a subsequent section. The applicant explained that the sterile, single-use Navigators affix to an electrocautery (surgical cutting) tool and, in combination with the other EnVisio™ Navigation System components and the SmartClip™, provide real-time intraoperative 3D navigation to the tumor and margin. The applicant explained that, at the time of surgical intervention, electromagnetic waves delivered by the EnVisio™ Navigation System activate the implanted SmartClip™ within a 50cm × 50cm × 35cm volume. The applicant further explained that the SmartClip™ contains an application-specific integrated circuit (ASIC) which is activated at a specific frequency and communicates to the EnVisio™ Navigation System the precise, real-time location of both the SmartClip™ and the surgical margin, enabling the surgeon to plan the specimen (tumor and margin) for excision. The applicant asserted that this data is calibrated relative to the tip of the electrocautery device or other operating instrument and is displayed in 3D. According to the applicant, the Navigators enable intraoperative visualization by displaying real-time stereotactic 3D guidance from the tip of the surgical tool enabling minimally invasive removal of pre-defined tissue specimen (tumor and margin). The applicant stated that surgeons are able to visualize the directional distances to make excisional plane of each margin in-situ without using conventional imaging (*e.g.,* ultrasound).

The applicant stated that there are two types of Navigators: (1) the NavSlim™ (which the applicant described as a lightweight model that allows integration with a broader range of electrosurgical tools, with or without smoke evacuation); and (2) the NavPencil (which, according to the applicant, incorporates a small screen in the surgical sightline that mimics the EnVisio™ Navigation System operating room monitor). The applicant also asserted that the integration of the Navigators with the single use, sterile electrocautery tool enables a single, light weight tool that can be utilized in situ for a minimally invasive surgery without infection risk. According to the applicant, the Navigators reduce the risk of tumor microenvironment caused by tissue disruption of non-targeted tissue. The applicant stated that the patient populations that can benefit from this technology are those that have biopsy proven cancers in organs that lack anatomic landmarks like breast, abdomen, and head and neck.

The applicant stated that the Navigators are the first devices to provide precise real-time navigation with a large patient volume of 50cm × 50cm × 35cm (per the applicant, encompassing >99 percent of breast cancer patient habitus and >90 percent of lung cancer patient habitus). In addition, the applicant asserted several other clinically differentiating features from prior products. First, the applicant stated that the Navigators process 240 simultaneous data streams solving for location 16 times per second with millimeter level of accuracy, and display it to the surgeon based upon actual location of the defined lesion as it is manipulated in situ, not based on imaging that occurred days or weeks before. The applicant asserted that as the tissue is moved or manipulated during a surgical intervention, the location is instantaneously updated. According to the applicant, this allows for intelligent, real-time, intraoperative visualization and guidance for the surgeon, enabling precise removal of a defined tissue specimen (including tumor and margin). Furthermore, the applicant asserted that the accurate and real-time wireless location eliminates any potential registration errors that are typically found in devices that use pre-procedure imaging for guidance. The applicant explained that no static pre-procedure imaging is necessary eliminating the potential of mis-registration due to patient or tissue movement. In addition, the applicant stated that the Navigators provide 3D guidance—medial/lateral, inferior/superior and anterior/posterior, as well as the most direct path, and asserted that this is increasingly important in treating lobular and deep tumors. The applicant also claimed that because the guidance is from the tip of the cutting tool, exact measurements can be taken in situ at the exact cutting location. In addition, per the applicant, the Navigators allow for an oncoplastic [37] approach—the applicant stated that because the location is not tethered or constrained in any way, the surgeon can choose the best cutting approach to achieve the optimal oncoplastic outcome. Finally, the applicant added that the Navigators provide the ability to distinctly identify and navigate up to three separate lesions in the same patient.

With respect to the newness criterion at § 419.66(b)(1), on March 22, 2019, the applicant received 510(k) clearance from FDA to market the EnVisio™ Navigation System (which, as explained previously, includes the Navigators) for the non-imaging detection and localization (by navigation) of a SmartClip™ that has been implanted in a soft tissue biopsy site or a soft tissue site intended for surgical removal. The applicant submitted its application for consideration as a new device category for transitional pass-through payment status for the Navigators on February 28, 2022, which is within 3 years of the date of the initial FDA marketing authorization. We are inviting public comments on whether the Navigators meet the newness criterion.

With respect to the eligibility criterion at § 419.66(b)(3), according to the applicant, the Navigators are an integral part of the service furnished and are used for one patient only. However, the applicant did not specifically indicate whether the Navigators come in contact with human tissue, and are surgically implanted or inserted or applied in or on a wound or other skin lesion, as

[34] As explained later in this section, the applicant received FDA 510(k) clearance for the EnVisio™ Navigation System, which includes the Navigators.

[35] The FDA 510(k) Summary for the EnVisio™ Navigation System states that the EnVisio™ Navigation System ''equipment components'' are the Console, Heads Up Display, Patient Pad and Foot Pedal. The Navigator is listed as a separate, sterile, non-patient contacting, single-use system component. The applicant submitted an application for pass-through payment status only for the Navigator component of the EnVisio™ Navigation System.

[36] The SmartClip™ has a separate FDA 510(k) clearance. Based on the FDA 510(k) Summary for the EnVisio™ Navigation System, the SmartClip™ does not appear to be part of the EnVisio™ Navigation System.

[37] According to Columbia University Irving Medical Center, oncoplastic breast surgery combines the techniques of traditional breast cancer surgery with the cosmetic advantages of plastic surgery. *https://columbiasurgery.org/conditions-and-treatments/oncoplastic-breast-surgery.*

required at § 419.66(b)(3).[38] The FDA 510(k) Summary (K183400) states that the Navigator is a sterile, non-patient contacting, single-use device. We would welcome comments on whether the Navigators meet the requirements of § 419.66(b)(3). The applicant also did not indicate whether the Navigators meet the device eligibility requirements at § 419.66(b)(4), which provide that the device may not be any of the following: (1) equipment, an instrument, apparatus, implement, or item of this type for which depreciation and financing expenses are recovered as depreciable assets; or (2) a material or supply furnished incident to a service (for example, a suture, customized surgical kit, or clip, other than radiological site marker). We are inviting public comments on whether the Navigators meet the eligibility criteria at § 419.66(b).

The criteria for establishing new device categories are specified at § 419.66(c). The first criterion, at § 419.66(c)(1), provides that CMS determines that a device to be included in the category is not appropriately described by any of the existing categories or by any category previously in effect, and was not being paid for as an outpatient service as of December 31, 1996. The applicant stated that it was not aware of an existing pass-through payment category that describes the Navigators, and listed an existing device category that it considered for comparison to the Navigators—specifically, HCPCS code C1748 (Endoscope, single-use (*i.e.,* disposable), upper GI, imaging/illumination device (insertable)). The applicant stated that the Navigators are designed to meet the demands within the clinical environment for a single-use (*i.e.,* disposable) device to decrease infection rate, similar to the recent advancements of ''disposable'' endoscopes to address clinical demands for single-use to eliminate risks of cross contamination and improper sterilization. HCPCS code C1748 is a current pass-through payment category, effective beginning July 1, 2020. The applicant did not specifically differentiate the Navigators from devices in HCPCS code C1748. Upon review, it does not appear that there are any existing pass-through payment categories that might apply to the Navigators. We are inviting public comments on whether the Navigators meet the device category criterion.

The second criterion for establishing a device category, at § 419.66(c)(2), provides that CMS determines either of the following: (i) that a device to be included in the category has demonstrated that it will substantially improve the diagnosis or treatment of an illness or injury or improve the functioning of a malformed body part compared to the benefits of a device or devices in a previously established category or other available treatment; or (ii) for devices for which pass-through status will begin on or after January 1, 2020, as an alternative to the substantial clinical improvement criterion, the device is part of the FDA's Breakthrough Devices Program and has received FDA marketing authorization for the indication covered by the Breakthrough Device designation. The applicant claimed that the use of the Navigators results in substantial clinical improvement over existing technologies by (1) reducing positive margin and re-excision rates, thereby decreasing the rate of subsequent therapeutic interventions; (2) reducing the rate of device-related complications, including surgical site infections and wire migration and transection; and (3) improving the surgical approach (surgeons are not tethered to the best radiological approach, and the incision can be placed in the ideal location resulting in better oncoplastic results, less complex path to the lesion, and better visualization during surgery). The applicant provided articles and case reports for the purpose of addressing the substantial clinical improvement criterion.

In support of the claim that use of the Navigators reduces positive margin and re-excision rates, the applicant submitted an abstract of a study performed to assess the impact of electromagnetic seed localization (ESL) using the EnVisio™ Navigation System and SmartClip™ compared to wire localization (WL) on operative times, specimen volumes, margin positivity, and margin re-excision rates.[39] Between August 2020 and August 2021, 97 patients underwent excisional biopsy (n=20), or lumpectomy with (n=53) or without (n=24) sentinel lymph node biopsy (SLNB) using ESL guidance at a single institution by 5 surgeons. The study authors matched these patients, one-to-one, with WL patients undergoing surgery between 2006 and 2021 based on surgeon, procedure type with stratification for those having and not having nodal procedures, and pathologic stage or benign pathology. When greater than one WL match was found, selection was randomized. The authors compared continuous variables (operative times, specimen volumes, excess volume excised) between patients undergoing ESL and WL using Wilcoxon rank sums tests. The authors compared categorical variables (positive margin rates, re-excision rates) using Fisher's exact tests. Median operative time for ESL versus WL for lumpectomy with SLNB was 66 versus 69 minutes (p=0.76) and without SLNB was 40 versus 34.5 minutes (p=0.17). Median specimen volume was 55cm^3 with WL versus 36cm^3 with ESL (p=0.0012). In those with measurable tumor volume, excess tissue excised was larger with WL compared to ESL (median=73.2cm^3 versus 52.5cm^3, p=0.017). Main segment margins were positive in 18 of 97 (19 percent) WL patients compared to 10 of 97 (10 percent) ESL patients (p=0.17). In the WL group, 13 of 97 (13 percent) had margin re-excision at a separate procedure, compared to 6 of 97 (6 percent) in the ESL group, (p=0.15). The authors concluded that ESL is superior to WL because it provided more accurate localization, evidenced by smaller specimen volume with less excess tissue excised, despite similar operative times. In addition, the authors reported that, although not statistically significant, ESL resulted in lower positive margin rates and lower margin re-excision rates compared to WL. The authors further noted that ESL allows for preoperative localization, eliminating same day operative delays, and single tool 3D localization. The authors concluded that further studies comparing ESL to other non-wire localization techniques are required to refine which localization technology is most advantageous in breast conservation surgery.

The applicant provided a second article consisting of a clinical paper from the Moffitt Cancer Center that, per the applicant, is pending publication.[40] The paper presented three cases from the Moffitt Cancer Center, including radiographic and other images, employing three different methods of breast mass localization: (1) SmartClip™, (2) SAVI SCOUT® radar reflector localizer, and (3) traditional wire localizer. The authors stated that the purpose of the paper was to educate

[38] By contrast, the SmartClip™, discussed in the next section of this preamble, is inserted into human tissue.

The Impact of an Electromagnetic Seed Localization Device as Versus Wire Localization on Breast Conserving Surgery: A Matched Pair Analysis. Abstract presented at: 23rd Annual Meeting of The American Society of Breast Surgeons; April 6–10, 2022. *https://www.breastsurgeons.org/meeting/2022/docs/2022_Official_Proceedings_ASBrS.pdf.*

[40] Ibanez J, Wotherspoon T, Mooney B, Advances in Image Guided Breast Mass Localization Techniques (undated). Submitted by the applicant with its application on February 28, 2022.

the audience about the technological advances regarding breast mass localization and to discuss the advantages and disadvantages of SmartClip™ localizers, SAVI SCOUT® localizers, and wire localizers.

The authors first discussed wire localization, stating that wire localization involves image-guided insertion of a guidewire into a targeted mass and that the use of multiple wires allows for bracketing of multiple lesions or a large lesion. The authors asserted that, while effective in localization, this procedure has drawbacks such as wire breakage, patient discomfort, wire migration while moving or transporting the patient, and the need to surgically remove the wire the same day that it is placed due to this risk of migration.

The authors also discussed radar reflector localizers such as SAVI SCOUT®, which are small devices that can be placed into a targeted mass at any time prior to lumpectomy. The authors explained that once a surgeon gains a general idea of the mass' location by looking at the post localizer placement mammogram, this localizer is ''hunted'' for intraoperatively using a special handheld device which provides auditory feedback, but does not provide location details until it is found via the auditory feedback. The authors cited a retrospective study at the Moffitt Cancer Center which, according to the authors, indicated that localization using SAVI SCOUT® was successful for 125 out of 129 patients (97 percent, 95 percent Confidence Interval 92–99 percent) and showed that in comparison to wire localization, SAVI SCOUT® provides improved patient comfort and eliminates the need to perform the surgery on the same day as the localization procedure.[41]

Finally, the authors discussed localization using the SmartClip™. The authors noted that the SmartClip™ is the first device to provide three-plane localization information. The authors stated that a monitor displays the approximate position of the SmartClip™ allowing everyone in the operating room to assist with the localization of the SmartClip™ and provide knowledge of its location prior to and throughout the surgery. They further noted that the SmartClip™ localizer can be visualized on a small screen mounted on the electrocautery tool which, similar to the monitor, depicts the direction and depth to the SmartClip™. According to the authors, this provides real-time visual feedback to surgeons as the electrocautery tool moves and allows them to find the clip without having to look up at the operating room monitor. The authors asserted that the three-axis visualization eliminated the need to search for the clip since the location is always known, and that the availability of the SmartClip™ in three colors with different signals eases differentiation between localizers and allows for bracketing of masses.

The authors concluded that wire localization has drawbacks such as wire breakage, patient discomfort, high chances of migration, and narrow placement timeframes, which have been mitigated over the past decade by various soft tissue localizers such as SAVI SCOUT® (radar reflector localizer). The authors concluded that the SmartClip™, which they refer to as a new localizer, may potentially resolve other difficulties encountered with the soft tissue localizers that they currently use. Finally, the authors noted that a clinical study is currently underway at the Moffitt Cancer Center to evaluate the advantages of using the SmartClip™ in clinical practice.

In addition, the applicant provided two physician case reports, each describing the use of the EnVisio™ Navigation System and SmartClip™ in a single patient (62 and 59-year-old female breast cancer patients). Each case report described the patient's history, diagnostic tools utilized, pre-operative, peri-operative, and/or post-operative course, pathology results, as well as the physician's perceptions of the SmartClip™ or EnVisio™ Navigation System. In the first surgical case report,[42] the surgeon noted that the foot pedal activation of the EnVisio™ Navigation System allowed toggling between two SmartClip™ devices, allowing complete dissection around the periphery of the mass to obtain a precise margin. The surgeon asserted that with one marker, there would have been a higher risk of a positive margin. In the second surgical case report,[43] the surgeon similarly noted that the EnVisio™ Navigation System helped her to map out and be more precise in her incision location and lumpectomy dissection.

The applicant also submitted several articles in general support of its application, which we summarize as follows. An article from the Mayo Clinic concluded that intraoperative pathologic assessment with frozen-section margin evaluation of all neoplastic breast specimens allows for immediate re-excision of positive or close margins during the initial operation and results in an extremely low reoperation rate of <2%.[44] Another article addressed the relationship between post-surgery infection and breast cancer recurrence and concluded that there is association between surgical site infection and adverse cancer outcomes, but the cellular link between them remains elusive.[45] Furthermore, a study from the Mayo Clinic concluded there was no reduction in the surgical site infection rate among patients who received postoperative antibiotic prophylaxis after breast surgery.[46] In addition, a study from Washington University School of Medicine concluded that surgical site infection (SSI) after breast cancer surgical procedures was more common than expected for clean surgery and more common than SSI after non-cancer-related breast surgical procedures.[47] A review article from the Department of Radiation Oncology, Case Western Reserve University and University Hospitals in Cleveland surmised that precision medicine holds the promise of truly personalized treatment which provides every individual breast cancer patient with the most appropriate diagnostics and targeted therapies based on the specific cancer's genetic profile as determined by a panel of gene assays and other

predictive and prognostic tests.[48] An abstract on the subject of prognostic factors for surgical margin status and recurrence in partial nephrectomy concluded that (1) surgical margin positivity after partial nephrectomy is not significantly associated with tumor characteristics and anatomical scoring systems, (2) surgical indication for partial nephrectomy has a direct influence on positive surgical margin rates, and (3) tumor size and stage after partial nephrectomy are valuable parameters in evaluating the recurrence risk.[49] Lastly, a study examining the significance of resection margin in hepatectomy for hepatocellular carcinoma concluded that the width of the resection margin did not influence the postoperative recurrence rates after hepatectomy for hepatocellular carcinoma.[50]

Based on the evidence submitted with the application, we note the following concerns. The first study appears to be unpublished, and it is not clear whether it has been submitted for publication in a peer-reviewed journal. In addition, the study involved a sample of 97 patients from one institution and appears to be written as a feasibility study for a potentially larger randomized control trial. Notably, the authors of this study stated that further studies are required to compare ESL to other non-wire localization techniques to refine which localization technology is most advantageous in breast conservation surgery. Furthermore, the authors did not report the sex or age of the study participants. Additionally, the authors reported that the differences in positive margin and re-excision rates between ESL and WL groups were not statistically significant. We also note a potential concern regarding practice/selection effects bias inherent in the methodology presented.

The second article is an undated,[51] unpublished descriptive clinical paper comparing three different breast mass localization techniques in three cases from one institution. The applicant stated that this paper is pending publication, but provided no further details regarding the status of the paper. The paper did not systematically compare the techniques across any measurable variables, noting that a clinical study was underway at the institution to evaluate the SmartClip™ in clinical practice. Similarly, we note that the physician case reports were solely descriptive in nature—they presented each physician's anecdotal experience using the EnVisio™ Navigation System and SmartClip™. Furthermore, the applicant provided several additional articles that, while informative, did not involve the Navigators and do not appear to directly support the applicant's claim of substantial clinical improvement. We would welcome additional information and evidence from larger, multi-center studies that provide comparative outcomes between the Navigators and existing technologies.

We further note that none of the articles and case reports provided conclusive evidence that the use of the Navigators reduces surgical site infection rates or the risk of tissue marker migration, as claimed by the applicant. In addition, the articles and case reports provided by the applicant described the use of the subject devices only in breast cancer surgery cases. As reported by the applicant, the Navigators can also be used for patients that have biopsy proven cancers in other organs that lack anatomic landmarks like the abdomen and head and neck. We would welcome additional evidence of substantial clinical improvement in cases related to non-breast cancer related procedures.

We are inviting public comments on whether the Navigators meet the substantial clinical improvement criterion.

The third criterion for establishing a device category, at § 419.66(c)(3), requires us to determine that the cost of the device is not insignificant, as described in § 419.66(d). Section 419.66(d) includes three cost significance criteria that must each be met. The applicant provided the following information in support of the cost significance requirements. The applicant stated that the Navigators are used in surgical interventions described by the HCPCS codes listed in Table 34.

[51] Although the applicant reported the date of the study as January 2021, the copy of the study provided by the applicant was not dated.

TABLE 34: HCPCS CODES REPORTED WITH THE NAVIGATORS

HCPCS Code	Long Descriptor	SI	APC
19101	Biopsy of breast; open, incisional	J1	5091
19301	Mastectomy, partial (eg, lumpectomy, tylectomy, quadrantectomy, segmentectomy)	J1	5091
19125	Excision of breast lesion identified by preoperative placement of radiological marker, open; single lesion	J1	5091
21552	Excision, tumor, soft tissue of neck or anterior thorax, subcutaneous; 3 cm or greater	J1	5073
22902	Excision, tumor, soft tissue of abdominal wall, subcutaneous; less than 3 cm	J1	5072
38500	Biopsy or excision of lymph node(s); open, superficial	J1	5091
38210	Transplant preparation of hematopoietic progenitor cells; specific cell depletion within harvest, t-cell depletion	S	5241
38525	Biopsy or excision of lymph node(s); open, deep axillary node(s)	J1	5091
38530	Biopsy or excision of lymph node(s); open, internal mammary node(s)	J1	5091
38740	Axillary lymphadenectomy; superficial	J1	5361

To meet the cost criterion for device pass-through payment status, a device must pass all three tests of the cost criterion for at least one APC. As we explained in the CY 2005 OPPS final rule (69 FR 65775), we generally use the lowest APC payment rate applicable for use with the nominated device when we assess whether a device meets the cost significance criterion, thus increasing the probability the device will pass the cost significance test. For our calculations, we used APC 5072—Level 2 Excision/Biopsy/Incision and Drainage, which had a CY 2021 payment rate of $1,407 at the time the application was received. Beginning in CY 2017, we calculate the device offset amount at the HCPCS/CPT code level instead of the APC level (81 FR 79657). HCPCS code 22902 had a device offset amount of $1.13 at the time the application was received. According to the applicant, the cost of the Navigators is $499.

Section 419.66(d)(1), the first cost significance requirement, provides that the estimated average reasonable cost of devices in the category must exceed 25 percent of the applicable APC payment amount for the service related to the category of devices. The estimated average reasonable cost of $499 for the Navigators is 35.5 percent of the applicable APC payment amount for the service related to the category of devices of $1,407 (($499/$1,407) × 100 = 35.5 percent). Therefore, we believe the Navigators meet the first cost significance requirement.

The second cost significance requirement, at § 419.66(d)(2), provides that the estimated average reasonable cost of the devices in the category must exceed the cost of the device-related portion of the APC payment amount for the related service by at least 25 percent, which means that the device cost needs to be at least 125 percent of the offset amount (the device-related portion of the APC found on the offset list). The estimated average reasonable cost of $499 for the Navigators is 44,159.3 percent of the cost of the device-related portion of the APC payment amount for the related service of $1.13 (($499/$1.13) × 100 = 44,159.3 percent). Therefore, we believe that the Navigators meet the second cost significance requirement.
