**SUPPLEMENTARY INFORMATION:** On May 11, 2022, CPSC published a notice in the **Federal Register** announcing the agency's intent to seek an extension for this information collection. 87 FR 28816. *OMB Number:* 3041–0006.

*Type of Review:* Renewal of collection.

*Frequency of Response:* On occasion.

*Affected Public:* Manufacturers, importers, and private labelers of omnidirectional citizens band base station antennas.

*Estimated Number of Respondents:* Approximately 10 firms supply omnidirectional citizen band base station antennas.

*Estimated Time per Response:* Based on the information compiled by manufacturers, importers, and private labelers of antennas to test and maintain records for certificates of compliance, we estimate an average of 220 hours per firm for annual testing and recordkeeping.

*Total Estimated Annual Burden:* 2,200 hours (10 firms × 220 hours).

*General Description of Collection:* The Safety Standard for Omnidirectional Citizens Band Base Station Antennas (16 CFR part 1204) establishes performance requirements for omnidirectional citizens band base station antennas to reduce unreasonable risks of death and injury that may result if an antenna contacts overhead power lines while being erected or removed from its site. The regulations implementing the standard (16 CFR part 1204, subpart B) require manufacturers, importers, and private labelers of antennas subject to the standard to test the antennas for compliance with the standard and to maintain records of that testing. Based on an average hourly wage of \$71.82,<sup>1</sup> the total annual cost to the industry to perform the required testing and maintain the records is

approximately \$158,000 (\$71.82 times 2,200 hours).
