

considered part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Description of Request:* The California Department of Fish and Wildlife has notified Southern California Edison Company that operation at the Kern River Planting Base (hatchery) has temporarily changed and flow that is diverted at the Fairfield Dam to provide 35 cubic feet per second is not needed until improvements at the hatchery are completed. The licensee is requesting a variance to continue to divert 10 cubic feet per second through the hatchery supply line for fire suppression at the KR3 Powerhouse and to maintain water in the flowline to protect the water conveyance features. If granted, the variance would last until such time that the California Department of Fish and Wildlife completes repairs and requests Southern California Edison Company to provide the full 35 cfs flow to the hatchery.
