

burdens, we invite the public and other Federal agencies to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are especially interested in public comment addressing the following:

(1) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How the agency might minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: The BLM is required to manage commercial, competitive and organized group recreational uses of the public lands, and individual use of special areas. The BLM must assess, evaluate and authorize (permit) activities proposed to be conducted on public land. The estimated annual burden is estimated to increase by 308 hours (from 5,292 to 5,600). This increase in burden hours results from increasing the number of estimated annual responses from 1,323 to 1,400. The increase in the number of responses is a result of increase demand for recreation permits. This OMB Control Number is currently scheduled to expire on April 30, 2023. The BLM plans to

request that OMB renew this OMB Control Number for an additional three years.

Title of Collection: Permits for Recreation on Public Lands (43 CFR part 2930).

OMB Control Number: 1004–0119.

Form Numbers: 2930–001—Special Recreation Application.

Type of Review: Extension of a currently approved collection.

Respondents/Affected Public: Applicants for recreational use of public lands managed by the BLM.

Total Estimated Number of Annual Respondents: 1,400.

Total Estimated Number of Annual Responses: 1,400.

Estimated Completion Time per Response: 4 hours.

Total Estimated Number of Annual Burden Hours: 5,600.

Respondent's Obligation: Required to obtain or retain a benefit.

Frequency of Collection: On occasion.

Total Estimated Annual Nonhour

Burden Cost: None.

An agency may not conduct or sponsor and, notwithstanding any other provision of law, a person is not required to respond to a collection of information unless it displays a currently valid OMB Control Number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Darrin A. King,

Information Collection Clearance Officer.

BILLING CODE 4310–84–P

DEPARTMENT OF AGRICULTURE

Forest Service

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Request for Information (RFI) on Federal Old-Growth and Mature Forests

AGENCY: Forest Service, Agriculture (USDA); Bureau of Land Management, Interior (DOI).

ACTION: Request for information; Extension of comment period.

SUMMARY: On July 15, 2022, the United States Department of Agriculture (USDA), United States Forest Service (Forest Service), and the United States Department of the Interior (DOI), Bureau of Land Management (BLM), published in the **Federal Register** a document entitled “Request for Information (RFI) on Federal Old-growth and Mature

Forests” and invited public comments to inform the response to Executive Order Strengthening the Nation’s Forests, Communities, and Local Economies which requires USDA and DOI to define old-growth and mature forests on Federal lands; complete an inventory and make it publicly available; coordinate conservation and wildfire risk reduction activities; identify threats to mature and old-growth forests; develop policies to address threats; develop Agency-specific reforestation goals by 2030; develop climate-informed reforestation plans; and develop recommendations for community-led local and regional economic development opportunities. In response to requests by prospective commenters that they would benefit from additional time to adequately consider and respond to the RFI, USDA Forest Service and DOI Bureau of Land Management have determined that an extension of the comment period until August 30, 2022, is appropriate.

DATES: The end of the comment period for the document entitled “Request for Information (RFI) on Federal Old-growth and Mature Forests” published July 15, 2022 (87 FR 42493), is extended from August 15, 2022, until August 30, 2022.

ADDRESSES: A webinar was held on Microsoft Teams web conferencing software on July 21, 2022. The webinar was recorded. Webinar presentation materials and the webinar recording, along with other information about this effort are posted to: <https://www.fs.usda.gov/managing-land/old-growth-forests>. Written comments concerning this notice may be submitted electronically to: <https://cara.fs.usda.gov/Public/CommentInput?project=NP-3239>.

FOR FURTHER INFORMATION CONTACT:

Jamie Barbour, Assistant Director, Ecosystem Management Coordination, (503) 708–9138, roy.barbour@usda.gov. (Please include the words “Old Growth” in the subject line of emails concerning this notice). Individuals who use telecommunication devices for the deaf and hard of hearing (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339, 24 hours a day, every day of the year, including holidays.

SUPPLEMENTARY INFORMATION: The purpose of the July 15, 2022 RFI (87 FR 42493) is to inform the public and gather feedback on potential future implementation efforts associated with provisions of Executive Order (E.O.) 14072: Strengthening the Nation’s Forests, Communities, and Local Economies, issued April 22, 2022. The information received through the RFI

will help to inform the response to E.O. 14072 Section 2(b) specifically, which calls on the Secretaries of Agriculture and the Interior, within one year, to define, identify, and complete an inventory of old-growth and mature forests on Federal lands, accounting for regional and ecological variations, as appropriate, and making the inventory publicly available. The document stated that the comment period would close on August 15, 2022. The USDA Forest Service and DOI Bureau of Land Management have received requests by prospective commenters to extend the comment period. An extension of the comment period will provide additional opportunity for the public to consider the RFI and prepare comments to address the questions posed therein. Therefore, USDA Forest Service and DOI Bureau of Land Management are extending the comment period for the RFI from August 15, 2022, until August 30, 2022.

Christopher French,

Deputy Chief, National Forest System, Forest Service.

Tracy Stone-Manning,

Director, Bureau of Land Management.

DEPARTMENT OF THE INTERIOR

Bureau of Ocean Energy Management

[Docket No. BOEM-2021-0036]

Joint Record of Decision for the Final Environmental Impact Statement for the Vineyard Wind 1 Offshore Wind Energy Project; Notice of Availability of Record of Decision Supplements

AGENCY: Bureau of Ocean Energy Management (BOEM), Interior.

ACTION: Notice of availability; record of decision (ROD) supplements.

SUMMARY: BOEM announces the availability of two supplements to the joint ROD on the final environmental impact statement (FEIS) for the construction and operations plan (COP) submitted by Vineyard Wind 1 LLC (Vineyard Wind 1). The joint ROD included the decisions of the Department of the Interior (DOI), the U.S. Army Corps of Engineers (USACE), and the National Marine Fisheries Service (NMFS) regarding the Vineyard Wind 1 Offshore Wind Energy Project. In the joint ROD, the USACE adopted the FEIS to support its permitting actions under the Rivers and Harbors Act of 1899 (RHA) and Clean Water Act (CWA). The ROD supplements pertain

only to the USACE sections of the joint ROD. They correct clerical errors and clarify a statement. The ROD supplements are available on BOEM's website at <https://www.boem.gov/Vineyard-Wind>.

FOR FURTHER INFORMATION CONTACT:

Jessica Stromberg, Acting Chief, Environment Branch for Renewable Energy, Bureau of Ocean Energy Management, 45600 Woodland Road, VAM-OREP Sterling, Virginia 20166, (703) 787-1730, or jessica.stromberg@boem.gov.

SUPPLEMENTARY INFORMATION: Vineyard Wind 1 plans to construct, operate, maintain, and eventually decommission an 800-megawatt wind energy facility on the Outer Continental Shelf offshore Massachusetts (the Project). The Project and associated export cables would be developed within the range of design parameters outlined in the Vineyard Wind 1 COP, subject to applicable mitigation measures. The Project is located approximately 14 miles southeast of Martha's Vineyard and a similar distance southwest of Nantucket. The approved COP allows the installation of up to 84 wind turbine generators (WTGs) and one or two offshore substations or electrical service platforms. The WTGs would be located in water depths ranging from approximately 37 to 49 meters (121 to 161 feet). The approved COP proposed one export cable landfall near the town of Barnstable, Massachusetts, and onshore construction and staging at the New Bedford Marine Commerce Terminal.

As documented in the joint ROD, after carefully considering the FEIS alternatives, including comments from the public on the draft and supplemental EISs, DOI decided to approve the COP for Vineyard Wind 1, NMFS decided to adopt BOEM's FEIS and issue a final incidental harassment authorization to Vineyard Wind 1, and USACE decided to adopt BOEM's FEIS and issue a Department of the Army (DA) permit pursuant to section 404 of the CWA (33 U.S.C. 1344) and section 10 of the RHA (33 U.S.C. 403). The DA permit authorizes Vineyard Wind 1 to discharge fill below the high tide line of waters of the United States and to perform work and place structures below the mean high-water mark of navigable waters of the United States.

Subsequent to the issuance of the joint ROD and prior to the issuance of the DA permit, USACE issued a ROD supplement correcting several clerical errors regarding the Project's offshore export cable corridor length and the total acreage of transmission-cable scour

protection to be authorized under the DA permit.

Following the issuance of the DA permit, USACE issued a second ROD supplement. That supplement corrected a clerical error that had resulted in a portion of USACE's public interest determination being cut off mid-sentence and clarified an incorrect statement in the "General Public Interest Review" section of the USACE portion of the joint ROD.

The USACE portion of the joint ROD included this incorrect statement: "While Vineyard Wind is not authorized to prevent free access to the entire wind development area, due to the placement of the turbines it is likely that the entire 75,614 acre area will be abandoned by commercial fisheries due to difficulties with navigation." The second ROD supplement clarified that this statement was based solely upon comments of interested parties submitted to BOEM during the public comment period for the draft environmental impact statement as summarized in appendix K to the FEIS. The statement was not based upon any separate or independent USACE or other agency evaluation or study. Accordingly, the statement does not represent the USACE position regarding the accessibility of the wind development area to commercial fisheries due to difficulties of navigation that may or may not result from the placement of the WTGs.

Both ROD supplements are available on BOEM's website at <https://www.boem.gov/Vineyard-Wind>.

Authority: 42 U.S.C. 4321 *et seq.*; 40 CFR parts 1500-1508.

William Yancey Brown,

Chief Environmental Officer, Bureau of Ocean Energy Management.
