

available population abundance is less than 7 percent for all stocks (Table 9). Therefore, NMFS finds that small numbers of marine mammals may be taken relative to the estimated overall population abundances for those stocks.

Based on the analysis contained herein of the activity (including the mitigation and monitoring measures) and the anticipated take of marine mammals, NMFS finds that small numbers of marine mammals will be taken relative to the population size of the affected species or stocks.

Unmitigable Adverse Impact Analysis and Determination

There are no relevant subsistence uses of the affected marine mammal stocks or species implicated by this action. Therefore, NMFS has determined that the total taking of affected species or stocks will not have an unmitigable adverse impact on the availability of such species or stocks for taking for subsistence purposes.

National Environmental Policy Act

To comply with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) and NOAA Administrative Order (NAO) 216-6A, NMFS must evaluate our proposed action (*i.e.*, the issuance of incidental take authorization) and alternatives with respect to potential impacts on the human environment. This action is consistent with categories of activities identified in Categorical Exclusion B4 (IHAs with no anticipated serious injury or mortality) of the Companion Manual for NOAA Administrative Order 216-6A, which do not individually or cumulatively have the potential for significant impacts on the quality of the human environment and for which we have not identified any extraordinary circumstances that would preclude this categorical exclusion. Accordingly, NMFS has determined that the issuance of the IHA qualifies to be categorically excluded from further NEPA review.

Endangered Species Act

Section 7(a)(2) of the ESA; 16 U.S.C. 1531 *et seq.*) requires that each Federal agency insure that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of designated critical habitat. To ensure ESA compliance for the issuance of IHAs, NMFS consults internally whenever we propose to authorize take for endangered or threatened species, in

this case with the Greater Atlantic Regional Fisheries Office.

NMFS OPR is authorizing the incidental take of four species of marine mammals which are listed under the ESA, including the North Atlantic right, fin, sei, and sperm whale, and determined that this activity falls within the scope of activities analyzed in NMFS GARFO's programmatic consultation regarding geophysical surveys along the U.S. Atlantic coast in the three Atlantic Renewable Energy Regions (completed June 29, 2021; revised September 2021). GARFO concluded site assessment surveys are not likely to adversely affect endangered species or adversely modify or destroy critical habitat. NMFS has determined issuance of the IHA is covered under the programmatic consultation; therefore, ESA consultation has been satisfied.

Authorization

As a result of these determinations, NMFS has issued an IHA to Atlantic Shores Bight authorized take, by Level B harassment, incidental to conducting site characterization surveys off New Jersey and New York from August 1, 2022 through July 31, 2023, that includes the previously explained mitigation, monitoring, and reporting requirements.

Dated: August 10, 2022.

Nominations for Advisory Committee and Species Working Group Technical Advisor Appointments to the U.S. Section to the International Commission for the Conservation of Atlantic Tunas

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of request for nominations.

SUMMARY: NMFS is soliciting nominations (which may include self-nominations) to the Advisory Committee to the U.S. Section to the International Commission for the Conservation of Atlantic Tunas (ICCAT) as established by the Atlantic Tunas

Convention Act (ATCA). NMFS is also soliciting nominations for Technical Advisors to the Advisory Committee's species working groups.

DATES: Nominations must be received by September 30, 2022.

ADDRESSES: Nominations, including a letter of interest and a resume or curriculum vitae, should be sent via email to Bryan Keller at bryan.keller@noaa.gov. Include in the subject line whether the nomination is for a position as an Advisory Committee member or as a Technical Advisor to one of the Committee's species working groups.

FOR FURTHER INFORMATION CONTACT: Bryan Keller, Office of International Affairs, Trade, and Commerce; email: bryan.keller@noaa.gov; phone: 301-427-7725.

SUPPLEMENTARY INFORMATION:

The Convention and the Commission

ICCAT was established to provide an effective program of international cooperation in research and conservation in recognition of the unique problems related to the highly migratory nature of tunas and tuna-like species. The International Convention for the Conservation of Atlantic Tunas (Convention), which established the ICCAT Commission (ICCAT), entered into force in 1969 after receiving the required number of ratifications. ICCAT usually holds an Annual Meeting in November of each year, and convenes meetings of its working groups and other subsidiary bodies between annual meetings as needed. Under ATCA (see 16 U.S.C. 971a), the United States is represented at ICCAT by not more than three U.S. Commissioners. Additional information about ICCAT is available at www.iccat.int.

Advisory Committee to the U.S. Section to ICCAT and Its Species Working Groups

ATCA (see 16 U.S.C. 971 *et seq.*) establishes an advisory committee comprised of: (1) Not less than five nor more than 20 individuals appointed by the U.S. Commissioners to ICCAT who shall select such individuals from the various groups concerned with the fisheries covered by the ICCAT Convention; and (2) the chairs (or their designees) of the New England, Mid-Atlantic, South Atlantic, Caribbean, and Gulf of Mexico Fishery Management Councils. Each member of the Advisory Committee shall serve for a term of 2 years and be eligible for reappointment. The Committee meets at least twice a year during which members receive information and provide advice on ICCAT-related matters. All members of

the Advisory Committee are appointed in their individual professional capacity and undergo a background screening. Any individual appointed to the Committee who is unable to attend all or part of an Advisory Committee meeting may not appoint another person to attend such meetings as his or her proxy. Nominees should be able to fulfill the time and travel commitments required to participate in the Committee's annual spring and fall meetings, in addition to ad hoc meetings as necessary throughout the year. The annual spring and fall meetings are normally two days long and are usually held in Silver Spring, Maryland, or Miami, Florida.

Members of the Advisory Committee receive no compensation for their services. The Secretary of Commerce and the Secretary of State may pay the necessary travel expenses of members of the Advisory Committee. The terms of all currently appointed Advisory Committee members expire on December 31, 2022. NMFS is soliciting nominees to serve as members of the Advisory Committee for a term of 2 years that will begin January 1, 2023, and expire December 31, 2024.

ATCA specifies that the U.S. Commissioners may establish species working groups for the purpose of providing advice and recommendations to the U.S. Commissioners and to the Advisory Committee on matters relating to the conservation and management of any highly migratory species covered by the ICCAT Convention (see 16 U.S.C. 971b-1). Any species working group shall consist of no more than seven members of the Advisory Committee and no more than four scientific or technical personnel, as considered necessary by the Commissioners. Currently, there are four species working groups advising the Committee and the U.S. Commissioners: a Bluefin Tuna Working Group, a Swordfish/Sharks Working Group, a Billfish Working Group, and a Bigeye, Albacore, Yellowfin, and Skipjack Tunas Working Group. Scientific or technical personnel (known as Technical Advisors) appointed to species working groups serve at the pleasure of the Commissioners; therefore, the Commissioners can choose to alter these appointments at any time. As with Committee Members, Technical Advisors may not be represented by a proxy during meetings of the Advisory Committee. Nominees should be able to fulfill the time and travel commitments required to participate in the annual spring meeting of the Advisory Committee, when the species working groups are convened, in addition to ad

hoc meetings throughout the year, as appropriate.

Procedure for Submitting Nominations

Nominations to either the Advisory Committee or a species working group should include a letter of interest and a resume or curriculum vitae that describes the individual's knowledge and experience in a field related to the highly migratory species covered by the ICCAT Convention. Self-nominations are acceptable. Letters of recommendation are useful but not required. When making a nomination, please specify which appointment (Advisory Committee member or Technical Advisor to a species working group) is being sought. Nominees are also encouraged to indicate which of the four species working groups is preferred, although placement on the requested group is not guaranteed.

NMFS encourages nominations for women and for individuals from underserved communities that meet the knowledge, experience, and other requirements of the positions described in this notice. See Executive Order (E.O.) 13985 (Advancing Racial Equity and Support for Underserved Communities Through the Federal Government) section 2 (defining "underserved communities" as "populations sharing a particular characteristic, as well as geographic communities, that have been systematically denied a full opportunity to participate in aspects of economic, social, and civic life," "such as Black, Latino, and Indigenous and Native American persons, Asian Americans and Pacific Islanders and other persons of color; members of religious minorities; lesbian, gay, bisexual, transgender, and queer (LGBTQ+) persons; persons with disabilities; persons who live in rural areas; and persons otherwise adversely affected by persistent poverty or inequality.")). E.O. 13985 is available at <https://www.federalregister.gov/documents/2021/01/25/2021-01753/advancing-racial-equity-and-support-for-underserved-communities-through-the-federal-government>.

Dated: August 11, 2022.

[RTID 0648-XC269]

Endangered Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), U. S. Department of Commerce.

ACTION: Notice of receipt; one application for a scientific enhancement permit.

SUMMARY: Notice is hereby given that NMFS received an application from California Department of Fish and Wildlife in Santa Rosa, California for an U.S. Endangered Species Act (ESA) section 10(a)(1)(A) scientific enhancement permit (permit 26568). The purpose of this permit is to enhance the survival of the endangered Central California Coast (CCC) Evolutionary Significant Unit (ESU) of coho salmon (*Oncorhynchus kisutch*), threatened Northern California (NC) Distinct Population Segment (DPS) of steelhead (*O. mykiss*), and threatened CCC DPS of steelhead (*O. mykiss*) in coastal streams of Mendocino, Sonoma, and Marin counties through rescue and relocation of these species from drying streams. The public is hereby notified that the application for Permit 26568 is available for review and comment before NMFS either approves or disapproves the application.

DATES: Written comments on the permit application must be received at the appropriate email address (see **ADDRESSES**) on or before September 15, 2022.

ADDRESSES: Written comments on the permit application should be submitted to Erin Seghesio via email at erin.seghesio@noaa.gov with "permit 26568" referenced in the subject line. The permit application is available for review online at the Authorizations and Permits for Protected Species website: https://apps.nmfs.noaa.gov/preview/preview_open_for_comment.cfm.

FOR FURTHER INFORMATION CONTACT: Erin Seghesio (phone: 707-578-8515 or email: erin.seghesio@noaa.gov).

SUPPLEMENTARY INFORMATION:
