NUCLEAR REGULATORY COMMISSION

[Docket No. 40-8943; NRC-2022-0153]

Crow Butte Resources, Inc.; In Situ Uranium Recovery Facility

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft environmental assessment supplement and finding of no significant impact; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment a draft finding of no significant impact (FONSI) and accompanying draft supplement to the NRC staff's environmental assessment (EA) for the license renewal of the Crow Butte Resources, Inc. (CBR) in situ uranium recovery (ISR) facility located in Dawes County, Nebraska. Based on the analysis in the draft EA Supplement, the NRC staff has preliminarily concluded that there will be no significant impacts to cultural resources from the renewal of CBR's license and, therefore, a finding of no significant impact (FONSI) remains appropriate.

II. Discussion

The NRC is issuing for public comment the draft FONSI and accompanying draft Supplement to the NRC staff’s EA for the license renewal of CBR’s ISR facility. The draft Supplement describes the NRC staff’s efforts to address the deficiencies identified in the Atomic Safety and Licensing Board’s partial initial decision (LBP–16–7), which found that the NRC staff did not meet its identification obligations under the National Historic Preservation Act (NHPA) and was deficient under the National Environmental Policy Act (NEPA) “for failing to take a hard look at potential TCPs [traditional cultural properties] within the Crow Butte license area[.]” Specifically, the Supplement describes the methodology, implementation, and results of the 2021 tribal cultural survey to identify sites of significance to the Oglala Sioux Tribe. It also documents the NRC staff’s evaluation of the identified sites according to the criteria for listing in the National Register of Historic Places (NRHP) and the NRC staff’s assessment of potential impacts of the license renewal on the identified sites under the NHPA (for sites eligible for the NRHP) or NEPA (for other sites of significance to the Tribe). Based on these evaluations in the EA Supplement, the NRC staff preliminarily concludes that there will be no significant impacts to cultural resources identified during the 2021 tribal cultural survey. Accordingly, based on the 2014 EA and the draft EA Supplement, the staff has preliminarily concluded that an environmental impact statement is not necessary and a FONSI remains appropriate.

III. Draft Finding of No Significant Impact

Based on its review of the proposed action, in accordance with the requirements in part 51 of title 10 of the *Code of Federal Regulations* (10 CFR), “Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions,” the NRC staff has preliminarily concluded that the

proposed action, renewal of NRC Source Materials License No. SUA–1534 for CBR’s ISR facility located in Crawford, Nebraska, will not have a significant impact on the cultural resources discussed in the EA Supplement and will not significantly affect the quality of the human environment. Therefore, the NRC staff has preliminarily determined, pursuant to 10 CFR 51.31, that preparation of an environmental impact statement is not required for the proposed action and a FONSI is appropriate.

Dated: August 23, 2022.

For the Nuclear Regulatory Commission.

John M. Moses,

Deputy Director, Division of Rulemaking, Environmental and Financial Support, Office of Nuclear Material Safety, and Safeguards.
