The ACPARS identified navigation safety corridors along the Atlantic Coast based on the predominant two-way vessel traffic and customary routes identified with AIS data for offshore deep draft and coastal seagoing tug/tow vessels. The study recommended developing these corridors into official shipping safety fairways or other appropriate vessel routing measures.

Based on the recommendations provided in the ACPARS, the Coast Guard published an Advance Notice of Proposed Rulemaking (ANPRM) in the **Federal Register** (85 FR 37034) on June 19, 2020. This ANPRM, which is available for viewing and download from the **Federal Register** docket USCG-2019-0279 at www.regulations.gov, sought comments regarding the possible establishment of fairways along the Atlantic Coast of the United States identified in the ACPARS.

Consolidated Port Approaches and International Entry and Departure Transit Areas Port Access Route Studies

Recognizing the ACPARS only analyzed coastal, longshore, and predominantly north/south vessel transit routes along the Atlantic Coast, the Coast Guard announced new studies focused on port approaches and international entry and departure areas along the Atlantic Coast supplemental to the ACPARS, on March 15, 2019. This report summarizes the findings of four regional port access route studies: the Northern New York Bight; Seacoast of New Jersey Including Offshore Approaches to the Delaware Bay, Delaware; Approaches to the Chesapeake Bay, Virginia; and the Seacoast of North Carolina. The CPAPARS has been completed and has been uploaded to the docket and at <https://www.navcen.uscg.gov/port-access-route-study-reports> for public review.

This notice is issued under authority of 46 U.S.C. 70003(c).
