

A Notice of Availability of the Draft SRP was published in the **Federal Register** on July 19, 2022 (87 FR 43049). The public was provided with a period to review and comment on the Draft SRP from July 19, 2022, through August 18, 2022. One public comment, which generally supported selection of the AL TIG's preferred alternative, was received.

Overview of the Alabama TIG Final SRP

The Final SRP is being released in accordance with OPA, including criteria set forth in the associated Natural Resource Damage Assessment regulations found in the Code of Federal Regulations (CFR) at 15 CFR part 990, NEPA and its implementing regulations found at 40 CFR parts 1500–1508, and the Final PDARP/PEIS and Consent Decree. The Final SRP provides supplemental OPA NRDA analysis for two Bon Secour National Wildlife Refuge (BSNWR) recreation enhancement projects considered in the RP III/EA: the Mobile Street Boardwalk and Centennial Trail Boardwalk projects. In the Final SRP the AL TIG selects implementation of its preferred alternative: adding \$2,037,313 in funding to the Mobile Street Boardwalk project. Fully funding this project will continue the process of restoring natural resources and services injured or lost as a result of the *DWH* oil spill.

Abstract: OMB Control Number 1004–0019 authorizes range improvements to improve livestock grazing management, improve watershed conditions, enhance wildlife habitat on BLM lands or serve similar purposes. There are no program changes requested. The BLM is adjusting the burden downward by 580 annual responses and 580 annual burden hours. The downward adjustment results from removing the burden for individuals and households and for State, Local, and Tribal Governments for activities contained in 43 CFR 4120.5–1 and 4120.5–2 and pertaining to opportunities for cooperation. The BLM mistakenly included public burden for these activities when the activity is performed by the BLM and not members of the public. This OMB Control Number is currently scheduled to expire on March

31, 2023. The BLM request that OMB renew this OMB Control Number for an additional three years.

Abstract: State and Tribal reclamation and regulatory authorities are requested to provide specific budget and program information as part of the grant application and reporting processes authorized by the Surface Mining Control and Reclamation Act. States and Tribes use the OSM–51 form to report program narrative information as part of their grant applications and to meet their annual post-award reporting requirement. To ensure that the Bipartisan Infrastructure Law funding is used in accordance with section 40701(f) of the law and to maximize benefits received by the communities impacted by legacy coal mining, OSMRE must collect information from State and Tribal Abandoned Mine Land Programs. OSMRE anticipates using the revised OSM–51 form to collect information that includes, but not limited to: an annual list of projects, a description of how the projects were prioritized and selected, how the State/Tribe obtained and used public input, the estimated benefits of each project, and how the State/Tribe will prioritize projects that employ current and former coal industry employees.
