Total Annual Burden: 77,916 hours.

Total Annual Cost: No cost.

Needs and Uses: The notification and request for comments sought to establish a new information collection as it pertains to the *Advanced Methods to Target and Eliminate Unlawful Robocalls Sixth Report and Order and Call Authentication Trust Anchor Fifth Report and Order* (“*Gateway Provider Report and Order*”) (87 FR 42916, July 18, 2022). Unwanted and illegal robocalls have long been the Federal Communication Commission’s (“Commission”) top source of consumer complaints and one of the Commission’s top consumer protection priorities. Foreign-originated robocalls represent a significant portion of illegal robocalls, and gateway providers serve as a critical choke-point for reducing the number of illegal robocalls received by American consumers. In the *Gateway Provider Report and Order*, the Commission took steps to prevent these foreign-originated illegal robocalls from reaching consumers and to help track these calls back to the source. Along with further extension of the Commission’s caller ID authentication requirements and Robocall Mitigation Database filing requirements, the Commission adopted several robocall mitigation requirements, including a requirement for gateway providers to respond to traceback within 24 hours, mandatory blocking requirements, a “know your upstream provider” requirement, and a general mitigation requirement.

Gateway Provider Report and Order, FCC 22–37, paras. 87–91, 47 CFR 64.1200(o).

A provider that serves as a gateway provider for particular calls must, with respect to those calls, block any calls purporting to originate from a number on a reasonable do-not-originate list. A list so limited in scope that it leaves out obvious numbers that could be included with little effort may be deemed unreasonable. The do-not-originate list may include only:

- Numbers for which the subscriber to which the number is assigned has requested that calls purporting to originate from that number be blocked

because the number is used for inbound calls only;

- North American Numbering Plan numbers that are not valid;
- Valid North American Numbering Plan Numbers that are not allocated to a provider by the North American Numbering Plan Administrator; and
- Valid North American Numbering Plan numbers that are allocated to a provider by the North American Numbering Plan Administrator, but are unused, so long as the provider blocking the calls is the allocatee of the number and confirms that the number is unused or has obtained verification from the allocatee that the number is unused at the time of blocking.

This document also removes § 64.1200(p) of the Commission’s rules, which advised that compliance was not required until OMB approval was obtained.
