Vol. 87

Friday

No. 222

November 18, 2022

Book 1 of 2 Books

Pages 69155–69935

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see [www.federalregister.gov](http://www.federalregister.gov).

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at [www.govinfo.gov](http://www.govinfo.gov), a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, [gpocusthelp.com](mailto:gpocusthelp.com).

The annual subscription price for the **Federal Register** paper edition is \$860 plus postage, or \$929, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see [bookstore.gpo.gov](http://bookstore.gpo.gov).

There are no restrictions on the republication of material appearing in the **Federal Register**.

**How To Cite This Publication:** Use the volume number and the page number. Example: 87 FR 12345.

**Postmaster:** Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

# Rules and Regulations

Federal Register

Vol. 87, No. 222

Friday, November 18, 2022

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 39

[Docket No. FAA-2022-0807; Project Identifier AD-2022-00214-R; Amendment 39-22188; AD 2022-20-04]

RIN 2120-AA64

#### Airworthiness Directives; Bell Textron Canada Limited Helicopters

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** The FAA is superseding airworthiness directive (AD) 2021-26-08, which applied to certain Bell Textron Canada Limited Model 206, 206A, 206A-1, 206B, 206B-1, 206L, 206L-1, 206L-3, and 206L-4 helicopters. AD 2021-26-08 required removing certain nuts from service; installing newly designed nuts; applying a specific torque, and a torque stripe to each newly installed nut; after the installation of each newly designed nut, inspecting the torque; and depending on the inspection results, either applying a torque stripe, or performing further inspections and removing certain parts from service. AD 2021-26-08 also prohibited installing any affected nut on any tail rotor drive shaft (TRDS) disc pack (Thomas) coupling. Since the FAA issued AD 2021-26-08, the FAA determined certain torque values and part numbers (P/Ns) need to be revised. This AD was prompted by reports of cracked or missing nuts installed on the TRDS Thomas couplings and the need to revise certain torque values and P/Ns in AD 2021-26-08. This AD requires removing certain nuts from service; installing newly designed nuts; applying torque and a torque stripe; and additional corrective actions if necessary. This AD also prohibits installing any affected nut on any TRDS Thomas coupling, as specified in a

Transport Canada AD, which is incorporated by reference. The FAA is issuing this AD to address the unsafe condition on these products.

**DATES:** This AD is effective December 23, 2022.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of December 23, 2022.

**ADDRESSES:** For Transport Canada material incorporated by reference (IBR) in this final rule, contact Transport Canada, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario, K1A 0N5, CANADA; telephone 888-663-3639; email [TC.AirworthinessDirectives-Consignesdenavigabilite.TC@tc.gc.ca](mailto:TC.AirworthinessDirectives-Consignesdenavigabilite.TC@tc.gc.ca); internet [tc.canada.ca/en/aviation](http://tc.canada.ca/en/aviation). You may find the Transport Canada material on the Transport Canada website at [tc.canada.ca/en/aviation](http://tc.canada.ca/en/aviation). For Air Comm Corporation service information identified in this final rule, contact Air Comm Corporation, 1575 West 124th Ave. #210, Westminster, CO 80234; telephone (303) 440-4075; email [service@aircommcorp.com](mailto:service@aircommcorp.com); or at [aircommcorp.com](http://aircommcorp.com). For Bell service information identified in this final rule, contact Bell Textron Canada Limited, 12,800 Rue de l'Avenir, Mirabel, Quebec J7J 1R4, Canada; telephone 1-450-437-2862 or 1-800-363-8023; fax 1-450-433-0272; email [productsupport@bellflight.com](mailto:productsupport@bellflight.com); or at [bellflight.com/support/contact-support](http://bellflight.com/support/contact-support). You may view this material at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N-321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222-5110. Service information that is IBRed is also available in the AD docket at [regulations.gov](http://regulations.gov) by searching for and locating Docket No. FAA-2022-0807.

#### Examining the AD Docket

You may examine the AD docket at [regulations.gov](http://regulations.gov) by searching for and locating Docket No. FAA-2022-0807; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the Transport Canada AD, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M-30, West Building

Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

**FOR FURTHER INFORMATION CONTACT:** Matt Fuller, AD Program Manager, General Aviation & Rotorcraft Unit, Airworthiness Products Section, Operational Safety Branch, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone (817) 222-5110; email [matthew.fuller@faa.gov](mailto:matthew.fuller@faa.gov).

#### SUPPLEMENTARY INFORMATION:

##### Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2021-26-08, Amendment 39-21867 (86 FR 72833, December 23, 2021) (AD 2021-26-08). AD 2021-26-08 applied to Bell Textron Canada Limited Model 206, 206A, 206A-1, 206B, 206B-1, 206L, 206L-1, 206L-3, and 206L-4 helicopters, with nut P/N MS21042L4 or P/N MS21042L5 installed on the TRDS Thomas couplings. AD 2021-26-08 required removing certain nuts from service, installing newly designed nuts, and applying a specific torque and a torque stripe to each newly installed nut. AD 2021-26-08 also required, after the installation of each newly designed nut, inspecting the torque and, depending on the inspection results, either applying a torque stripe or performing further inspections and removing certain parts from service. Finally, AD 2021-26-08 prohibited installing any affected nut on any TRDS Thomas coupling. The FAA issued AD 2021-26-08 to prevent failure or loss of a nut on any TRDS Thomas coupling.

AD 2021-26-08 was prompted by Transport Canada AD CF-2020-15, dated May 13, 2020 (Transport Canada AD CF-2020-15). Transport Canada, which is the aviation authority for Canada, issued Transport Canada AD CF-2020-15 to correct an unsafe condition for Bell Textron Canada Limited Model 206, 206A, 206A-1, 206B, 206B-1, 206L, 206L-1, 206L-3, and 206L-4 helicopters, all serial numbers. Transport Canada AD CF-2020-15 specifies for certain model helicopters, newly designed nuts cannot be installed because Supplemental Type Certificate (STC) SH2750NM and Transport Canada STC SH99-202 install a pulley at the Thomas coupling location causing insufficient clearance. Transport Canada advises, for certain

model helicopters with STC SH2750NM or Transport Canada STC SH99–202 installed, different part-numbered nuts may be installed and are now required to be replaced with a new part-numbered nut that is not vulnerable to the unsafe condition.

The NPRM published in the **Federal Register** on June 30, 2022 (87 FR 39015). The NPRM was prompted by reports of cracked or missing nuts installed on the TRDS Thomas couplings. The NPRM was also prompted by the determination that certain P/Ns and certain torque values in paragraph (g) of AD 2021–26–08 need to be revised. Furthermore, the FAA advises that the 50–70 in lb torque values are only applicable to certain bolts and nuts, and a 150–180 in lb torque value is required for other bolts and nuts that are required to be installed by this AD. The FAA also advises that certain part-numbered nuts that are required to be installed according to AD 2021–26–08 need to be removed from service and replaced due to a certain pulley configuration. The NPRM proposed to require removing certain nuts from service; installing newly designed nuts; applying torque and a torque stripe; and additional corrective actions if necessary. The NPRM also proposed to prohibit installing any affected nut on any TRDS Thomas coupling, as specified in Transport Canada AD CF–2020–15.

The FAA is issuing this AD to prevent failure or loss of a nut on the TRDS Thomas couplings, which if not addressed could result in loss of the tail rotor and subsequent loss of control of the helicopter. See Transport Canada AD CF–2020–15 for additional background information.

## Discussion of Final Airworthiness Directive

### Comments

The FAA received no comments on the NPRM or on the determination of the costs.

### Conclusion

These helicopters have been approved by the aviation authority of Canada and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with Canada, Transport Canada, its technical representative, has notified the FAA of the unsafe condition described in its AD. The FAA reviewed the relevant data, considered the comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these helicopters. This AD is adopted as proposed in the NPRM,

except the FAA has removed the note to the applicability paragraph and updated the identification of Model 206A–1 helicopters in the applicability paragraph to Model 206A–1 (OH–58A) helicopters to match the FAA type certificate data sheet. None of these changes will increase the economic burden on any operator.

### Related Service Information Under 1 CFR Part 51

Transport Canada AD CF–2020–15 requires the replacement of certain part-numbered nuts with newly designed nuts at each TRDS Thomas coupling and prohibits installing any affected nut on any TRDS Thomas coupling. The replacement includes applying torque, and a torque stripe.

The FAA reviewed Air Comm Corporation Service Bulletin SB 206EC–092619, Revision NC, dated September 26, 2019, which also specifies procedures for replacing the affected nuts with the newly designed corrosion-resistant nuts, but explains that affected helicopters equipped with Air Comm Corporation air conditioning systems installed under STC SH2750NM use the affected nut to attach a pulley onto the TRDS, which causes clearance issues for the nuts to be installed at the coupling. Therefore, this service bulletin specifies replacing the nut with a lower profile nut.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

### Other Related Service Information

The FAA also reviewed Bell Alert Service Bulletin (ASB) 206–19–136, dated August 27, 2019, for FAA-certificated Model 206, 206A-series, and 206B-series helicopters, and non FAA-certificated Model TH–67 helicopters; and Bell ASB 206L–19–181, dated August 27, 2019, and Revision A, dated August 29, 2019, for Model 206L, 206L–1, 206L–3, and 206L–4 helicopters. This service information specifies procedures for replacing the affected nuts with the newly designed corrosion-resistant nuts. Revision A of Bell ASB 206L–19–181 corrects a typographical error.

Additionally, the FAA reviewed Bell Service Instruction BHT–206–SI–2052, Revision 1, dated October 14, 2010. This service information specifies procedures to upgrade Model 206L–1 and 206L–3 helicopters to allow operations at an increased internal gross weight.

### Differences Between This AD and Transport Canada AD CF–2020–15

Transport Canada AD CF–2020–15 requires compliance with certain actions within 600 hours air time or within the next 24 months, whichever occurs first, whereas this AD requires compliance within 600 hours time-in-service only. Service information referenced in Transport Canada AD CF–2020–15 specifies if any P/N MS21042L4 nuts are found loose or damaged, reporting the location and providing the information to Bell, whereas this AD requires if any P/N MS21042L4 nuts are found loose or damaged, inspecting each TRDS Thomas coupling, including each bolt, nut, and washer, for any elongated holes, fretting on the fasteners, and damaged fasteners, and depending on the results of the inspection, removing from service each affected part and replacing it with an airworthy part.

### Costs of Compliance

The FAA estimates that this AD affects 1,359 helicopters of U.S. Registry. Labor rates are estimated at \$85 per work-hour. Based on these numbers, the FAA estimates the following costs to comply with this AD.

Replacing each affected nut with the newly designed nut and applying torque and a torque stripe takes about 4 work-hours, and parts cost about \$75 for an estimated cost of \$415 per nut replacement and \$563,985 per nut replacement for the U.S. fleet.

In addition, the costs of the actions that are part of the required replacement are as follows:

If required, due to loose or damaged nuts found, inspecting each TRDS Thomas coupling, and each bolt, nut, and washer for elongated holes and fretting on the fasteners takes about 0.5 work-hour for an estimated cost of \$43 per inspection.

If required, replacing each TRDS Thomas coupling takes about 4 work-hours, and parts cost about \$4,000 for an estimated cost of \$4,340 per TRDS Thomas coupling replacement.

If required, replacing a bolt or washer takes a minimal amount of time and parts cost a nominal amount.

### Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in

Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

### Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Will not affect intrastate aviation in Alaska, and
- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

### List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

### The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

## PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

### § 39.13 [Amended]

- 2. The FAA amends § 39.13 by:
- a. Removing Airworthiness Directive (AD) 2021–26–08, Amendment 39–21867 (86 FR 72833, December 23, 2021); and
  - b. Adding the following new AD:

**2022–20–04 Bell Textron Canada Limited:**  
Amendment 39–22188; Docket No. FAA–2022–0807; Project Identifier AD–2022–00214–R.

#### (a) Effective Date

This airworthiness directive (AD) is effective December 23, 2022.

#### (b) Affected ADs

This AD replaces AD 2021–26–08, Amendment 39–21867 (86 FR 72833, December 23, 2021) (AD 2021–26–08).

#### (c) Applicability

This AD applies to Bell Textron Canada Limited Model 206, 206A, 206A–1 (OH–58A), 206B, 206B–1, 206L, 206L–1, 206L–3, and 206L–4 helicopters, all serial numbers, certificated in any category.

#### (d) Subject

Joint Aircraft Service Component (JASC) Code: 6510, Tail Rotor Drive Shaft.

#### (e) Unsafe Condition

This AD was prompted by reports of cracked or missing nuts installed on the tail rotor drive shaft (TRDS) disc pack (Thomas) couplings. The FAA is issuing this AD to prevent failure or loss of a nut on the TRDS Thomas couplings. The unsafe condition, if not addressed, could result in loss of the tail rotor and subsequent loss of control of the helicopter.

#### (f) Compliance

Comply with this AD within the compliance times specified, unless already done.

#### (g) Requirements

Except as specified in paragraphs (h) and (i) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, Transport Canada AD CF–2020–15, dated May 13, 2020 (Transport Canada AD CF–2020–15).

#### (h) Exceptions to Transport Canada AD CF–2020–15

(1) Where Transport Canada AD CF–2020–15 requires compliance in terms of air time, this AD requires using hours time-in-service (TIS).

(2) Where Transport Canada AD CF–2020–15 refers to the effective dates specified in paragraphs (h)(2)(i) and (ii) of this AD, this AD requires using the effective date of this AD.

(i) October 9, 2019 (the effective date of Transport Canada AD CF–2019–34, dated September 25, 2019).

(ii) The effective date of Transport Canada AD CF–2020–15.

(3) Where Transport Canada AD CF–2020–15 defines Group 1 helicopters as those models “that have not been modified by installing STC SH2750NM or STC SH99–202,” replace “that have not been modified by installing STC SH2750NM or STC SH99–202” with “that have not been modified by installing STC SH2750NM.”

(4) Where Transport Canada AD CF–2020–15 defines Group 4 helicopters as those models “that have been modified by installing STC SH2750NM or STC SH99–202,” replace “that have been modified by installing STC SH2750NM or STC SH99–202” with “that have been modified by installing STC SH2750NM.”

(5) Where Transport Canada AD CF–2020–15 requires compliance within 600 hours air time or 24 months, whichever occurs first, this AD requires compliance within 600

hours TIS only and does not allow a compliance time of 24 months.

(6) Where any paragraph of Transport Canada AD CF–2020–15 specifies to replace part number (P/N) MS21042 nuts with P/N NAS9926 nuts, this AD requires removing P/N MS21042 nuts from service and replacing with P/N NAS9926 nuts.

(7) Where any paragraph of any service information referenced in Transport Canada AD CF–2020–15 specifies to replace P/N MS21042L4 nuts with P/N 90–132L4 nuts, this AD requires removing P/N MS21042L4 nuts from service and replacing with P/N 90–132L4 nuts, in accordance with Air Comm Corporation Service Bulletin SB 206EC–092619, Revision NC, dated September 26, 2019 (SB 206EC–092619 Rev NC).

(8) Where any paragraph of any service information referenced in Transport Canada AD CF–2020–15 specifies to replace P/N MS21042L5 nuts with P/N 90–132L5 nuts, this AD requires removing P/N MS21042L5 nuts from service and replacing with P/N 90–132L5 nuts, in accordance with SB 206EC–092619 Rev NC.

(9) Where any paragraph of any service information referenced in Transport Canada AD CF–2020–15 specifies if any P/N MS21042L4 nuts are found loose or damaged, report at which location and provide the information to Product Support Engineering at [productsupport@bellflight.com](mailto:productsupport@bellflight.com), this AD requires if any P/N MS21042L4 nuts are found loose or damaged, before further flight, inspecting each TRDS Thomas coupling, including each bolt, nut, and washer, for any elongated holes, fretting on the fasteners, and damaged fasteners. If there is any elongated hole, fretting on the fasteners, or damaged fasteners, this AD requires before further flight, removing from service each affected part and replacing it with an airworthy part.

#### (i) No Reporting Requirement

Although the service information referenced in Transport Canada AD CF–2020–15 specifies to submit certain information to the manufacturer, this AD does not include that requirement.

#### (j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person identified in paragraph (k) of this AD. Information may be emailed to: [9-AVS-AIR-730-AMOC@faa.gov](mailto:9-AVS-AIR-730-AMOC@faa.gov).

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

#### (k) Related Information

For more information about this AD, contact Matt Fuller, AD Program Manager, General Aviation & Rotorcraft Unit, Airworthiness Products Section, Operational

Safety Branch, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone (817) 222-5110; email [matthew.fuller@faa.gov](mailto:matthew.fuller@faa.gov).

#### (I) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Air Comm Corporation Service Bulletin SB 206EC-092619, Revision NC, dated September 26, 2019.

(ii) Transport Canada AD CF-2020-15, dated May 13, 2020.

(3) For Air Comm Corporation service information identified in this AD, contact Air Comm Corporation, 1575 West 124th Ave. #210, Westminster, CO 80234; telephone (303) 440-4075; email [service@aircommcorp.com](mailto:service@aircommcorp.com); or at [aircommcorp.com](mailto:aircommcorp.com). For Transport Canada AD CF-2020-15, contact Transport Canada, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario, K1A 0N5, CANADA; telephone 888-663-3639; email [TC.AirworthinessDirectives-Consignesdenavigabilite.TC@tc.gc.ca](mailto:TC.AirworthinessDirectives-Consignesdenavigabilite.TC@tc.gc.ca); internet [tc.canada.ca/en/aviation](http://tc.canada.ca/en/aviation). You may find the Transport Canada material on the Transport Canada website at [tc.canada.ca/en/aviation](http://tc.canada.ca/en/aviation).

(4) You may view this service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N-321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222-5110. This material may be found in the AD docket at [regulations.gov](http://regulations.gov) by searching for and locating Docket No. FAA-2022-0807.

(5) You may view this material that is incorporated by reference at the National Archives and Records Administration (NARA). **BILLING CODE 4910-13-P**

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 39

[Docket No. FAA-2022-0599; Project Identifier MCAI-2021-00456-A; Amendment 39-22222; AD 2022-22-07]

RIN 2120-AA64

#### **Airworthiness Directives; Piaggio Aviation S.p.A. (Type Certificate Previously Held by Piaggio Aero Industries S.p.A.) Airplanes**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** The FAA is adopting a new airworthiness directive (AD) for certain Piaggio Aviation S.p.A. (type certificate previously held by Piaggio Aero Industries S.p.A.) (Piaggio) Model P-180 airplanes. This AD was prompted by mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI identifies the unsafe condition as corrosion in the bottom fuselage area of the cabin compartment due to inner and outer sides of fuselage skin panels of certain airplanes treated with the less effective primer. This AD requires repetitively inspecting the fuselage skin panels, visually inspecting the entire fuselage inner side skin if necessary, and taking any necessary corrective actions. The FAA is issuing this AD to address the unsafe condition on these products.

**DATES:** This AD is effective December 23, 2022.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of December 23, 2022.

#### **ADDRESSES:**

**AD Docket:** You may examine the AD docket at [regulations.gov](http://regulations.gov) under Docket No. FAA-2022-0599; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the MCAI, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

#### **Material Incorporated by Reference:**

• For service information identified in this final rule, contact Piaggio Aviation S.p.A., P180 Customer

Support, via Pionieri e Aviatori d'Italia, snc—16154 Genoa, Italy; phone: +39 331 679 74 93; email: [technicalsupport@piaggioaerospace.it](mailto:technicalsupport@piaggioaerospace.it).

• You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 901 Locust, Kansas City, MO 64106. For information on the availability of this material at the FAA, call (817) 222-5110. It is also available at [regulations.gov](http://regulations.gov) under Docket No. FAA-2022-0599.

#### **FOR FURTHER INFORMATION CONTACT:**

Mike Kiesov, Aviation Safety Engineer, FAA, General Aviation & Rotorcraft Section, International Validation Branch, 901 Locust, Room 301, Kansas City, MO 64106; phone: (816) 329-4144; email: [mike.kiesov@faa.gov](mailto:mike.kiesov@faa.gov).

#### **SUPPLEMENTARY INFORMATION:**

#### **Background**

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain serial-numbered Piaggio Model P-180 airplanes. The NPRM published in the **Federal Register** on June 17, 2022 (87 FR 36415). The NPRM was prompted by MCAI originated by the European Union Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union. EASA issued EASA AD 2021-0104, dated April 15, 2021 (referred to after this as “the MCAI”), to address the unsafe condition on certain serial-numbered Piaggio Model P.180 airplanes. The MCAI states:

Occurrences were reported where, during routine inspections, diffused corrosion was detected on the fuselage inner side skin in the area of the passenger cabin. Evidence indicates that the presence of undetected (infiltrated or condensed) water, trapped in between the inner surface of fuselage skin panels and the thermo-acoustic insulation panels, could have started a galvanic corrosion phenomenon, mainly in the bottom fuselage area of the cabin compartment. Fuselage skin panels of certain aeroplanes, delivered from 2009 to 2013, were treated with the first type of “chromate-free” primer, chemically not as effective against corrosion when compared to those containing chrome. The phenomenon has been observed on aeroplanes subjected to prolonged inactivity and not stored in a hangar, or those operating in an environment with high humidity and/or frequent heavy precipitation, combined with a possible deterioration of window sealing due to normal aging, wear and tear.

This condition, if not corrected, could affect the structural integrity of the fuselage.

To address this potential unsafe condition, Piaggio published the [Piaggio Service Bulletin (SB) 80-0405, Revision 0, dated March 15, 2021] SB to provide inspection instructions.

For the reason described above, this [EASA] AD requires repetitive inspections of

each affected area and, if necessary, an additional visual inspection of the entire fuselage inner side skin and, depending on findings, accomplishment of applicable repair. This [EASA] AD also requires reporting the inspection results to Piaggio.

You may examine the MCAI in the AD docket at regulations.gov under Docket No. FAA–2022–0599.

In the NPRM, the FAA proposed to require repetitively inspecting the fuselage skin panels, visually inspecting the entire fuselage inner side skin if necessary, and taking any necessary corrective actions. The FAA is issuing this AD to prevent degradation of the structural integrity of the fuselage. The unsafe condition, if not addressed, could lead to loss of control of the airplane.

### Discussion of Final Airworthiness Directive

#### Comments

The FAA received a comment from one individual commenter. The following presents the comment received on the NPRM and the FAA's response to the comment.

#### Request Not To Require Repetitive 26-Month Inspection

An individual commenter requested the FAA not require a 26-month repetitive inspection as proposed in the NPRM. The commenter stated that all U.S. operators follow the Piaggio P.180 Avanti II Maintenance Manual (MM) inspection program in which these areas are already being inspected every 5 years and 3,600 flight hours. The commenter also asserted that there could be patch repairs for previously inspected and repaired areas, and that, if patch repairs are found with no corrosion in previously inspected areas, no further action should be required. Therefore, the commenter believes implementing the 26-month repetitive inspection is excessive.

The FAA partially agrees. The FAA does not agree that all U.S.-registered airplanes are required to comply with Chapter 5 of the MM, which is where the inspections referenced by the commenter are located. Owners and operators must only comply with the Airworthiness Limitations section of the MM (located in Chapter 4 of this MM), as well as 14 CFR part 43, unless the

airplane is operated under 14 CFR part 135 and its operating specifications require it. In addition, if the fuselage panels affected by this AD are replaced as part of the corrective actions required by paragraph (g)(1) of this AD, the repetitive inspections in paragraph (g)(2)(ii) of this AD are not required. Corrosion found outside of the affected fuselage areas of this AD should be repaired; however, these repairs are not mandated by this AD. Only the fuselage areas defined in the referenced service bulletin are affected by this AD. If corrosion is found as a result of the inspections required by this AD, this would show that the primer coating is inadequate to protect the material from corrosion; therefore, the repetitive inspections in this AD are necessary. The EASA, as the state of design, determined that a repetitive inspection interval of not to exceed 660 hours time-in-service (TIS) or 26 months, whichever occurs first, is appropriate. The FAA has no data to dispute this specified criteria concerning the time-in-service or calendar-month inspection interval determination. The FAA does agree that if repairs were previously accomplished on the areas required to be inspected by this AD and no corrosion was found during the inspections required by paragraph (g)(1) of this AD, the repetitive inspections in paragraph (g)(2)(ii) of this AD are not required. The FAA has not changed this final rule as a result of this comment.

#### Conclusion

This product has been approved by the aviation authority of another country and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data, considered the comment received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on this product. Except for updating this AD to reflect that the type certificate holder changed from Piaggio Aero Industries S.p.A. to Piaggio Aviation S.p.A and changing the term "fuselage wing skin panel" used in

paragraph (g)(1) of the NPRM to "fuselage skin panel," this AD is adopted as proposed in the NPRM. None of the changes increase the economic burden on any operator.

#### Related Service Information Under 1 CFR Part 51

The FAA reviewed Piaggio SB 80–0405, Revision 0, dated March 15, 2021. This service information specifies procedures for inspecting the fuselage skin panels and inspecting the full inner fuselage skin. It also specifies repairing or replacing any parts where corrosion is found.

The FAA also reviewed Piaggio SB 80–0405, Revision 0, Errata Corrige No. 1, dated March 24, 2021, which addresses discrepancies identified in Piaggio SB 80–0405, Revision 0, dated March 15, 2021.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section.

#### Differences Between This AD and the MCAI, Service Information, or NPRM

The MCAI allows credit for the fuselage inner skin inspection if previously done using Piaggio Aviation S.p.A. Temporary Revision No. 332 to Chapter 53–00–00 of Piaggio P.180 Avanti II MM, and this AD does not. The FAA will consider requests for an alternative method of compliance for this under paragraph (h) of this AD.

The MCAI specifies compliance times of 8 months and 12 months depending on when the P.180 Avanti II MM 3,600-flight-hour or 5-year inspection was accomplished. This AD has a 12-month compliance time for all airplanes because the 3,600-flight-hour and 5-year MM inspections are not required for all U.S. operators by FAA regulation.

The service information specifies contacting Piaggio for certain repair instructions, while this AD requires repair using a method approved by the FAA or EASA.

#### Costs of Compliance

The FAA estimates that this AD affects 14 airplanes of U.S. registry.

The FAA estimates the following costs to comply with this AD:

#### ESTIMATED COSTS

| Action            | Labor cost                                       | Parts cost | Cost per airplane    | Cost on U.S. operators |
|-------------------|--|------------|----------------------|------------------------|
| Inspections ..... | Up to 150 work-hours × \$85 per hour = \$12,750. | \$2,360    | Up to \$15,110 ..... | Up to \$211,540.       |

The FAA estimates the following costs to do any necessary actions that

may be required based on the results of the required inspections. The FAA has

no way of estimating the number of airplanes that might need these actions:

#### ON-CONDITION COSTS

| Action                             | Labor cost                                       | Parts cost           | Cost per airplane |
|------------------------------------|--|----------------------|-------------------|
| Repair .....                       | Up to 80 work-hours × \$85 per hour = \$6,800.   | \$1,220 .....        | Up to \$8,020.    |
| Replace skin panel .....           | Up to 250 work-hours × \$85 per hour = \$21,250. | Up to \$12,200 ..... | Up to \$33,450.   |
| Reporting inspection results ..... | 1 work-hour × \$85 per hour = \$85               | Not Applicable ..... | \$1,190.          |

### Paperwork Reduction Act

A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB Control Number. The OMB Control Number for this information collection is 2120–0056. Public reporting for this collection of information is estimated to be approximately 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. All responses to this collection of information are mandatory. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: Information Collection Clearance Officer, Federal Aviation Administration, 10101 Hillwood Parkway, Fort Worth, TX 76177–1524.

### Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or

develop on products identified in this rulemaking action.

### Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Will not affect intrastate aviation in Alaska, and
- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

### List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

### The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

### PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

#### § 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

**2022–22–07 Piaggio Aviation S.p.A. (type certificate previously held by Piaggio Aero Industries S.p.A.):** Amendment 39–2222; Docket No. FAA–2022–0599; Project Identifier MCAI–2021–00456–A.

#### (a) Effective Date

This airworthiness directive (AD) is effective December 23, 2022.

#### (b) Affected ADs

None.

#### (c) Applicability

This AD applies to Piaggio Aviation S.p.A. (type certificate previously held by Piaggio Aero Industries S.p.A.) (Piaggio) Model P–180 airplanes, serial number (S/N) 1174 through 1214 inclusive and S/N 1218 through 1230 inclusive, certificated in any category.

#### (d) Subject

Joint Aircraft System Component (JASC) Code 5330, Fuselage Main, Plate/Skin.

#### (e) Unsafe Condition

This AD was prompted by mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI identifies the unsafe condition as corrosion in the bottom fuselage area of the cabin compartment due to inner and outer sides of fuselage skin panels treated with less effective primer. The FAA is issuing this AD to prevent degradation of the structural integrity of the fuselage. This condition, if not addressed, could lead to loss of control of the airplane.

#### (f) Compliance

Comply with this AD within the compliance times specified, unless already done.

#### (g) Required Actions

(1) Within 12 months after the effective date of this AD, do the applicable inspections and corrective actions on each fuselage skin panel in accordance with the Accomplishment Instructions, Part A, paragraphs (1) through (15) and (17) through (20), or Part A (Alternate Procedure), paragraphs (31) through (37), (41) through (43), (50) through (55), and (57) through (60), in Piaggio Service Bulletin 80–0405, Revision 0, dated March 15, 2021, as corrected by Piaggio Service Bulletin 80–0405, Revision 0, Errata Corrigé No. 1, dated March 24, 2021 (Piaggio SB 80–0405), except for the following:

(i) You are not required to contact the manufacturer. Instead, for any repairs, use a method approved by the FAA or the European Union Aviation Safety Agency (EASA).

(ii) Where the steps in Part A or Part A (Alternate Procedure) reference Part B, you must follow the Accomplishment

Instructions, Part B, paragraphs (82) through (86), (88), and (104) of Piaggio SB 80-0405.

(2) If, as part of the corrective actions required by paragraph (g)(1) of this AD, you repaired areas of the fuselage skin but did not replace the panels, do the following:

(i) Within 60 days after completing the actions required by paragraph (g)(1) of this AD, report the inspection results, including the information specified in the Confirmation Slip attached to Piaggio SB 80-0405, to Piaggio at [technicalsupport@piaggioaerospace.it](mailto:technicalsupport@piaggioaerospace.it); and

(ii) Repeat the requirements of paragraph (g)(1) of this AD at intervals not to exceed 660 hours time-in-service (TIS) or 26 months, whichever occurs first.

(3) If, as part of the corrective actions required by paragraph (g)(1) of this AD, you replaced the panels, within 60 days after completing the actions required by paragraph (g)(1) of this AD, report the inspection results, including the information specified in the Confirmation Slip attached to Piaggio SB 80-0405, to Piaggio at [technicalsupport@piaggioaerospace.it](mailto:technicalsupport@piaggioaerospace.it).

(4) If, during all of the inspections required by paragraph (g)(1) of this AD, there is no corrosion and no primer inconsistencies, no further action is required by this AD.

#### (h) Alternative Methods of Compliance (AMOCs)

(1) The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Validation Branch, mail it to the address identified in paragraph (i)(1) of this AD or email to: [9-AVS-AIR-730-AMOC@faa.gov](mailto:9-AVS-AIR-730-AMOC@faa.gov). If mailing information, also submit information by email.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

#### (i) Related Information

(1) For more information about this AD, contact Mike Kiesov, Aviation Safety Engineer, FAA, General Aviation & Rotorcraft Section, International Validation Branch, 901 Locust, Room 301, Kansas City, MO 64106; phone: (816) 329-4144; email: [mike.kiesov@faa.gov](mailto:mike.kiesov@faa.gov).

(2) Refer to EASA AD 2021-0104, dated April 15, 2021, for more information. This EASA AD may be found in the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA-2022-0599.

#### (j) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Piaggio Service Bulletin 80-0405, Revision 0, dated March 15, 2021.

(ii) Piaggio Service Bulletin 80-0405, Revision 0, Errata Corrige No. 1, dated March 24, 2021.

(3) For service information identified in this AD, contact Piaggio Aviation S.p.A., P180 Customer Support, via Pionieri e Aviatori d'Italia, snc—16154 Genoa, Italy; phone: +39 331 679 74 93; email: [technicalsupport@piaggioaerospace.it](mailto:technicalsupport@piaggioaerospace.it).

(4) You may view this service information at FAA, Airworthiness Products Section, Operational Safety Branch, 901 Locust, Kansas City, MO 64106. For information on the availability of this material at the FAA, call (817) 222-5110.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email: [fr.inspection@nara.gov](mailto:fr.inspection@nara.gov), or go to: [www.archives.gov/federal-register/cfr/ibr-locations.html](http://www.archives.gov/federal-register/cfr/ibr-locations.html).

Issued on October 20, 2022.

**Christina Underwood,**

*Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.*

[FR Doc. 2022-25029 Filed 11-17-22; 8:45 am]

**BILLING CODE 4910-13-P**

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 39

[Docket No. FAA-2022-0286; Project Identifier AD-2021-01081-R; Amendment 39-22223; AD 2022-22-08]

**RIN 2120-AA64**

#### **Airworthiness Directives; Bell Textron Canada Limited (Type Certificate Previously Held by Bell Helicopter Textron Canada Limited) Helicopters**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** The FAA is adopting a new airworthiness directive (AD) for Bell Textron Canada Limited (type certificate previously held by Bell Helicopter Textron Canada Limited) Model 206L, 206L-1, 206L-3, and 206L-4 helicopters with a certain part-numbered main rotor (M/R) blade installed under Supplemental Type Certificate (STC) SR02684LA. This AD was prompted by delamination of M/R blades. This AD requires a repetitive inspection for delamination, and depending on the results, removing the M/R blade from service and reporting certain information. The FAA is issuing this AD to address the unsafe condition on these products.

**DATES:** This AD is effective December 23, 2022.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of December 23, 2022.

**ADDRESSES:** For service information identified in this final rule, contact Dean Rosenlof, Van Horn Aviation, LLC, 1510 West Drake Drive, Tempe, AZ, 85283, United States; phone: (480) 483-4202; email: [dean@vanhornaviation.com](mailto:dean@vanhornaviation.com). You may view this service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N-321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222-5110. It is also available at [regulations.gov](https://www.regulations.gov) by searching for and locating Docket No. FAA-2022-0286.

#### Examining the AD Docket

You may examine the AD docket at [regulations.gov](https://www.regulations.gov) by searching for and locating Docket No. FAA-2022-0286; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

#### FOR FURTHER INFORMATION CONTACT:

Payman Soltani, Aerospace Engineer, Airframe Section, Los Angeles ACO Branch, Compliance & Airworthiness Division, FAA, 3960 Paramount Blvd., Lakewood, CA 90712; telephone (562) 627-5313; email [payman.soltani@faa.gov](mailto:payman.soltani@faa.gov).

#### SUPPLEMENTARY INFORMATION:

##### Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to Bell Textron Canada Limited Model 206L, 206L-1, 206L-3, and 206L-4 helicopters with a certain part-numbered M/R blade installed under STC SR02684LA. The NPRM published in the **Federal Register** on March 24, 2022 (87 FR 16652). The NPRM was prompted by testing by Van Horn Aviation, LLC (Van Horn), which revealed the potential for delamination in M/R blade part number (P/N) 20633000-101. Delaminations were then confirmed by inspection of in-service M/R blades. Testing by Van Horn confirmed that the 90° plies fail in spanwise tension (normal to the fiber

direction) at the inboard end of the weight receptacle near M/R blade station 186.0. Delamination then propagates outboard from M/R blade station 186.0 at the interface between the 0° and 90° plies. According to Van Horn, fatigue testing has shown that the delamination initiates almost immediately and progresses slowly in a stable, predictable manner. The delamination has been found to develop first on the lower surface and grow outboard from the inboard end of the weight receptacle and forward of the balance weight pocket. After approximately 4 to 6 inches growth of the delamination on the lower surface, a similar delamination becomes detectable on the M/R blade upper surface. Should the delaminations continue to grow to the point of static overload, the receptacle could depart the M/R blade. In the NPRM, the FAA proposed to require, at specified intervals, removing the affected M/R blade, drawing rectangular inspection areas “Zone 1” and “Zone 2” with a permanent marker, tap inspecting the inspection areas for delamination, marking and measuring the length of any delamination, and depending on the results, removing the M/R blade from service. The NPRM also proposed to require reporting certain information to Van Horn. The FAA is issuing this AD to address the unsafe condition on these products.

#### **Discussion of Final Airworthiness Directive**

##### **Comments**

The FAA received comments from one commenter, Van Horn. The following presents the comments received on the NPRM and the FAA’s response to each comment.

##### **Request for Changes to the Measurements of Inspection Areas**

Van Horn stated that the M/R blade stations indicated for inspections are incorrect in the proposed AD and requested the FAA revise the required actions to change the M/R blade stations for “Zone 1” and “Zone 2.” However, the measurements Van Horn included in the comment in the AD docket to correct the M/R blade stations for “Zone 1” and “Zone 2” were also incorrect. Van Horn then contacted the FAA to correct these measurements; a record of this ex parte contact is included in the AD docket. For information on locating the docket, see “Examining the AD Docket.” According to Van Horn’s revised comments, “Zone 1” described in the NPRM as M/R blade stations 186.0 and 191.0, beginning 1.1 inches from the

leading edge of the M/R blade to 4.9 inches from the leading edge of the M/R blade should be revised to M/R blade stations 185.75 and 192.75, or measured from the tip end of the M/R blade between 36.25 inches and 29.25 inches beginning 1.2 inches from the leading edge of the M/R blade to 5.0 inches from the leading edge of the M/R blade. “Zone 2” described in the NPRM as M/R blade stations 186.0 and 191.0 should be revised to M/R blade stations 185.9 and 192.9, or measured from the tip end of the M/R blade between 36.1 inches and 29.1 inches.

The FAA agrees and has revised this AD accordingly.

##### **Request for a Change to the Service Bulletin Cited in Note 1**

Van Horn proposed that Note 1 to paragraph (g)(2)(i) cite Van Horn Service Bulletin Notice No. 33000–4R4, dated March 31, 2022 (SB33000–4R4) rather than Van Horn Service Bulletin Notice No. 33000–4R3, dated November 8, 2021 (SB 33000–4R3).

The FAA partially agrees. The FAA appreciates that the latest revision of that service bulletin is SB33000–4R4; however, the portions of that service bulletin that are specified in the proposed AD are identical in SB33000–4R3 and SB33000–4R4. Accordingly, the FAA has made updates throughout the Required Actions paragraph to allow both SB33000–4R3 and SB33000–4R4 in this final rule.

##### **Request for a Reference to Additional Service Information in Note 1**

Van Horn proposed edits in Note 1 to paragraph (g)(2)(i) to refer to the Van Horn Instructions for Continued Airworthiness, ICA Manual No. VMM–MR–206L–501, Revision N/C, dated May 24, 2018, for a blade configuration drawing.

The FAA disagrees because it does not provide information that could be helpful for operators to comply with this AD.

##### **Request for Additional Tap Hammer Tool**

Van Horn also requested the FAA revise the list of tap hammers in paragraph (g)(2)(iii) of the proposed AD to add Van Horn Aviation Tap Hammer P/N VHACS0003 to the list of tap hammers.

The FAA agrees and has revised this AD as requested.

##### **Conclusion**

The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD as proposed.

Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. Except for minor editorial changes, and any other changes described previously, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

##### **Related Service Information Under 1 CFR Part 51**

The FAA reviewed SB 33000–4R3 and SB 33000–4R4. This service information specifies procedures to identify “Zone 1” and “Zone 2” inspection areas, accomplish repetitive visual and tap inspections of the zones to detect and monitor the growth of any delamination, and depending on the results, remove the M/R blade from service and contact Van Horn. SB 33000–4R3 applies to M/R blade P/N 20633000–101 serial numbers A012 through A104. SB 33000–4R4 expanded the applicability to include M/R blade P/N 20633000–101 with serial numbers A007, A008, and A009; these serial-numbered parts were included in the NPRM’s applicability.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section.

##### **Differences Between This AD and the Service Information**

This AD requires using certain part-numbered composite tap hammers, whereas SB 33000–4R3 and SB 33000–4R4 do not. SB 33000–4R3 and SB 33000–4R4 specify procedures to visually inspect the M/R blade, whereas this AD does not. If there is any delamination in the upper surface inspection zone (“Zone 1”), this AD requires removing the M/R blade from service, whereas SB 33000–4R3 and SB 33000–4R4 do not specify procedures for this condition.

##### **Interim Action**

The FAA considers this AD to be an interim action. The inspection reports that are required by this AD will enable the FAA to obtain better insight into the unsafe condition. If final action is later identified, the FAA might consider further rulemaking.

##### **Costs of Compliance**

The FAA estimates that this AD will affect 23 helicopters of U.S. registry. Labor rates are estimated at \$85 per work-hour. Based on these numbers, the FAA estimates the following costs to comply with this AD.

Removing, tap inspecting, and re-installing an M/R blade will take about

4.5 work-hours for an estimated cost of \$383 per M/R blade, per inspection cycle and up to \$8,809 for the U.S. fleet per M/R blade, per inspection cycle. Replacing an M/R blade will take about 4 work-hours and parts will cost about \$71,500 per M/R blade for a total of \$71,840 per M/R blade. Reporting information to Van Horn will take about 1 work-hour for an estimated cost of \$85 per report.

#### Paperwork Reduction Act

A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB Control Number. The OMB Control Number for this information collection is 2120-0056. Public reporting for this collection of information is estimated to take approximately 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. All responses to this collection of information are mandatory. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Information Collection Clearance Officer, Federal Aviation Administration, 10101 Hillwood Parkway, Fort Worth, TX 76177-1524.

#### Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

#### Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Will not affect intrastate aviation in Alaska, and
- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

#### List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

#### The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

#### PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

##### § 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

**2022-22-08 Bell Textron Canada Limited (Type Certificate Previously Held by Bell Helicopter Textron Canada Limited):** Amendment 39-22223; Docket No. FAA-2022-0286; Project Identifier AD-2021-01081-R.

##### (a) Effective Date

This airworthiness directive (AD) is effective December 23, 2022.

##### (b) Affected ADs

None.

##### (c) Applicability

This AD applies to Bell Textron Canada Limited (type certificate previously held by Bell Helicopter Textron Canada Limited) Model 206L, 206L-1, 206L-3, and 206L-4 helicopters, certificated in any category, with main rotor (M/R) blade part number (P/N) 20633000-101 with serial number A007, A008, A009, or A012 through A104 inclusive, installed under Supplemental Type Certificate SR02684LA.

##### (d) Subject

Joint Aircraft System Component (JASC) Code: 6210, Main Rotor Blades.

##### (e) Unsafe Condition

This AD was prompted by reports of delamination of M/R blades. The FAA is issuing this AD to address delamination of an M/R blade initiating in the 90° plies at the lower inboard end of the weight pocket receptacle. The unsafe condition, if not addressed, could result in reduced structural integrity of the M/R blade, excessive vibration, and subsequent loss of control of the helicopter.

##### (f) Compliance

Comply with this AD within the compliance times specified, unless already done.

##### (g) Required Actions

(1) Accomplish the actions required by paragraph (g)(2) of this AD at the following compliance time, whichever occurs later:

- (i) Before the M/R blade accumulates 400 total hours time-in-service (TIS) or 2,400 engine starts since initial installation on any helicopter, whichever occurs first; or
- (ii) Within 100 hours TIS after the effective date of this AD.

(2) Remove each M/R blade from the helicopter, place it on a flat, stable surface, and accomplish the following:

- (i) Use a permanent marker to draw rectangular inspection "Zone 1" on the upper surface of the M/R blade at M/R blade stations 185.75 and 192.75, or measured from the tip end of the M/R blade between 36.25 inches and 29.25 inches, beginning 1.2 inches from the leading edge of the M/R blade to 5.0 inches from the leading edge of the M/R blade. Draw lines from the inboard end to the outboard end to connect each end at 1.2 inches and 5.0 inches. Draw parallel lines from the inboard end of the inspection zone to the outboard end of the inspection zone, with the lines spaced 0.50 inch apart.

**Note 1 to paragraph (g)(2)(i):** This note applies to paragraphs (g)(2)(i) and (ii) of this AD. Figure 4 of Van Horn Aviation, LLC, Service Bulletin Notice No. 33000-4R3, dated November 8, 2021 (SB 33000-4R3), and Van Horn Aviation, LLC, Service Bulletin Notice No. 33000-4R4, dated March 31, 2022 (SB 33000-4R4) depict "Zone 1" and "Zone 2."

- (ii) Use a permanent marker to draw rectangular inspection "Zone 2" on the lower surface of the M/R blade at M/R blade stations 185.9 and 192.9, or measured from the tip end of the M/R blade between 36.1 inches and 29.1 inches, beginning from the forward edge of the weight receptacle pocket and extending 1 inch in the direction towards the leading edge of the M/R blade. Draw lines from the inboard end to the outboard end to connect each end at the weight receptacle pocket and 1 inch forward of the weight receptacle pocket. Draw parallel lines from the inboard end of the inspection zone to the outboard end of the inspection zone, with the lines spaced 0.50 inch apart.

(iii) Using composite tap hammer Abaris Training Tap Hammer P/N ABATH, HeatCon

Tap Hammer P/N HCS1104-01, Brown Tool Composite Tap Hammer P/N BAT-CTH8, MATCO Tools Composite Tap Hammer P/N T4BAT-CTH8, or Van Horn Aviation Tap Hammer P/N VHACS0003, tap inspect the areas within "Zone 1" and "Zone 2" for any delamination by following Tap Inspect Balance Receptacle, paragraph A.(4) of SB 33000-4R3 or SB 33000-4R4. Where SB 33000-4R3 and SB 33000-4R4 specify to mark the location where the delamination starts, use a permanent marker.

(iv) If there are any marks where the delamination starts, connect the marks indicating the delamination location and measure the length at the farthest point from the inboard end of the inspection area.

(v) If there is any delamination in the lower surface inspection zone ("Zone 2") that is 6.0 or more inches in length or if there is any delamination in the upper surface inspection zone ("Zone 1"), before further flight, remove the M/R blade from service.

(3) Thereafter repeat the actions required by paragraph (g)(2) of this AD at intervals not to exceed 400 hours TIS or 2,400 engine starts, whichever occurs first.

(4) If there is any delamination, within 30 days after accomplishing the actions required by paragraphs (g)(1) or (3) of this AD, report each delamination size and location, and the total hours TIS and total engine starts since initial installation of the M/R blade, to Mr. Dean Rosenlof, Van Horn Aviation, LLC, 1510 West Drake Drive, Tempe, AZ 85283, or by email to [info@vanhornaviation.com](mailto:info@vanhornaviation.com).

#### (h) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Los Angeles ACO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (i) of this AD. Information may be emailed to: [9-ANM-LAACO-AMOC-REQUESTS@faa.gov](mailto:9-ANM-LAACO-AMOC-REQUESTS@faa.gov).

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

#### (i) Related Information

For more information about this AD, contact Payman Soltani, Aerospace Engineer, Airframe Section, Los Angeles ACO Branch, Compliance & Airworthiness Division, FAA, 3960 Paramount Blvd., Lakewood, CA 90712; telephone (562) 627-5313; email [payman.soltani@faa.gov](mailto:payman.soltani@faa.gov).

#### (j) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Van Horn Aviation, LLC, Service Bulletin Notice No. 33000-4R3, dated November 8, 2021.

(ii) Van Horn Aviation, LLC, Service Bulletin Notice No. 33000-4R4, dated March 31, 2022.

(3) For Van Horn Aviation, LLC, service information identified in this AD, contact Dean Rosenlof, Van Horn Aviation, LLC, 1510 West Drake Drive, Tempe, AZ, 85283, United States; phone: (480) 483-4202; email: [dean@vanhornaviation.com](mailto:dean@vanhornaviation.com).

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 71

[Docket No. FAA-2022-0711; Airspace Docket No. 21-ANM-64]

RIN 2120-AA66

#### Amendment of Class E Airspace; Colorado Plains Regional Airport, CO.

**AGENCY:** Federal Aviation Administration (FAA), Department of Transportation (DOT).

**ACTION:** Final rule.

**SUMMARY:** This action modifies the Class E airspace designated as a surface area, modifies the Class E airspace extending upward from 700 feet above the surface, and removes the Class E airspace extending upward from 1,200 feet above the surface at Colorado Plains Regional Airport, CO. Additionally, this action makes several administrative modifications to update the airport's existing Class E airspace legal descriptions. These actions will support the safety and management of instrument flight rule (IFR) operations at the airport.

**DATES:** Effective 0901 UTC, February 23, 2023. The Director of the Federal Register approves this incorporation by reference under Title 1 CFR part 51,

subject to the annual revision of FAA Order JO 7400.11, Airspace Designations and Reporting Points, and publication of conforming amendments.

**ADDRESSES:** FAA Order JO 7400.11G, and subsequent amendments can be viewed online at [www.faa.gov/air\\_traffic/publications/](http://www.faa.gov/air_traffic/publications/). For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267-8783.

**FOR FURTHER INFORMATION CONTACT:** Nathan A Chaffman, Federal Aviation Administration, Western Service Center, Operations Support Group, 2200 S 216th Street, Des Moines, WA 98198; telephone (206) 231-3460.

#### SUPPLEMENTARY INFORMATION:

##### Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority, as it would modify the Class E airspace at Colorado Plains Regional Airport, CO, to support IFR operations at the airport.

##### History

The FAA published a notice of proposed rulemaking (NPRM) in the **Federal Register** for FAA-2022-0711 (87 FR 45723; July 29, 2022) to modify the Class E airspace designated as a surface area, modify the Class E airspace extending upward from 700 feet above the surface, remove the Class E airspace extending upward from 1,200 feet above the surface, and make administrative changes to the Class E legal descriptions. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Subsequent to publication of the NPRM in the **Federal Register**, the FAA identified a discrepancy with the proposed Class E2 legal description. The airport name is removed from the description, as it is in the second line of the header and duplication is not necessary.

### Availability and Summary of Documents for Incorporation by Reference

This document amends FAA Order JO 7400.11G, Airspace Designations and Reporting Points, dated August 19, 2022, and effective September 15, 2022. FAA Order JO 7400.11G is publicly available as listed in the “ADDRESSES” section of this document. FAA Order JO 7400.11G lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

### The Rule

The FAA is amending 14 CFR part 71 by modifying the Class E airspace designated as a surface area, modifying the Class E airspace extending upward from 700 feet above the surface, and removing the Class E airspace extending upward from 1,200 feet above the surface at Colorado Plains Regional Airport, CO.

The Class E airspace designated as a surface area is expanded to a 4.6-mile radius around the airport to more appropriately contain circling maneuvers.

Additionally, the Class E airspace extending upward from 700 feet above the surface is expanded to the southeast to contain aircraft conducting procedure turns for the VOR RWY 29 approach, as terrain exists within 1,500 feet of the minimum procedure turn altitude.

This action also removes the Class E airspace extending upward from 1,200 feet above the surface at the airport. This area is already contained within the Denver en route domestic airspace area and duplication is not necessary.

Finally, this action makes several administrative modifications to the airport's legal descriptions. The airport name in the text header was incorrect in the existing Class E2 and E5 legal descriptions. They now read “Colorado Plains Regional Airport, CO.” The geographic coordinates for the airport are updated to match the FAA's database. Lastly, the navigational aid (NAVAID) used in the existing Class E2 legal description is removed. The NAVAID has been reclassified and is not needed to describe the airspace. Its removal simplifies the airspace description.

Class E2 and E5 airspace designations are published in paragraphs 6002 and 6005, respectively, of FAA Order JO 7400.11G, dated August 19, 2022, and became effective September 15, 2022, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in FAA Order JO 7400.11.

FAA Order JO 7400.11 is published annually and becomes effective on September 15.

### Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial, and unlikely to result in adverse or negative comments. It therefore: (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT regulatory policies and procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

### Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, Environmental Impacts: Policies and Procedures, paragraph 5–6.5a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant the preparation of an environmental assessment.

### List of Subjects in 14 CFR Part 71

Airspace, incorporation by reference, navigation (air).

### Adoption of the Amendment

In consideration of the foregoing, the FAA amends 14 CFR part 71 as follows:

### PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

- 1. The authority citation for 14 CFR part 71 continues to read as follows:

**Authority:** 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

#### § 71.1 [Amended]

- 2. The incorporation by reference in 14 CFR part 71.1 of FAA Order JO 7400.11G, Airspace Designations and Reporting Points, dated August 19, 2022, and effective September 15, 2022, is amended as follows:

*Paragraph 6002 Class E Airspace Areas Designated as a Surface Area.*

\* \* \* \* \*

#### ANM CO E2 Akron, CO [Amended]

Colorado Plains Regional Airport, CO  
(Lat. 40°10'32" N, long. 103°13'19" W)

That airspace extending upward from the surface within a 4.6-mile radius of the airport.

*Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.*

\* \* \* \* \*

#### ANM CO E5 Akron, CO [Amended]

Colorado Plains Regional Airport, CO  
(Lat. 40°10'32" N, long. 103°13'19" W)

That airspace extending upward from 700 feet above the surface within 6.6 miles of the airport, and that airspace between 4 miles southwest and 8 miles northeast of the 123° bearing from the airport, extending from the 6.6-mile radius to 18.3 miles southeast of the airport.

Issued in Des Moines, Washington, on November 14, 2022.

**B.G. Chew,**

*Group Manager, Operations Support Group, Western Service Center.*

## FEDERAL MEDIATION AND CONCILIATION SERVICE

### 29 CFR Part 1404

#### RIN 3076-AA23

### Rescission of the Arbitration Policy; Schedule of Fees

**AGENCY:** Federal Mediation and Conciliation Service.

**ACTION:** Final rule; rescission of regulation.

**SUMMARY:** On April 18, 2019, the Federal Mediation and Conciliation Service (FMCS) published a final rule amending the “Arbitration Policy; Schedule of Fees” to implement an increase in user fees. After careful review, FMCS finds that this rule is no longer suitable for publication. Therefore, this final rule rescinds the appendix regarding the Arbitration Policy; Schedule of Fees.

**DATES:** This final rule is effective November 18, 2022.

**FOR FURTHER INFORMATION CONTACT:** Anna Davis, Deputy General Counsel, Office of General Counsel, Federal Mediation and Conciliation Service, 250 E St. SW, Washington, DC 20427; Office/Fax/Mobile 202–606–3737; [adavis@fmcs.gov](mailto:adavis@fmcs.gov).

**SUPPLEMENTARY INFORMATION:**

## I. Discussion

On April 18, 2019, at 84 FR 16205, the Federal Mediation and Conciliation Service (FMCS) published a final rule amending the “Appendix to Part 1404—Arbitration Policy; Schedule of Fees,” which implemented a modest increase in user fees that had remained unchanged for more than eight years. FMCS increased fees to more accurately reflect FMCS’ costs of maintaining the Arbitration Roster and the technology to support it, as well as responding to requests for arbitrator panels and biographical data.

After consideration and review, FMCS has concluded that the rule addressing fees is duplicative and currently incorporated in subparts of the rule. Therefore, FMCS is issuing this final rule, which rescinds the rule on the Appendix to Part 1404—Arbitration Policy; Schedule of Fees.

## II. Final Rule

FMCS has determined that this rule is suitable for final rulemaking. The revisions to FMCS’ policies and requirements surrounding arbitrators are purely internal matters of agency management, as well as the agency’s procedure, and practice. Accordingly, FMCS is not required to engage in a notice and comment process to issue this rule under the Administrative Procedures Act, See U.S.C. 553(a)(2), 553(b)(A). Furthermore, because this rule is procedural rather than substantive, the normal requirement of 5 U.S.C. 553(d) that a rule not be effective until at least 30 days after publication in the **Federal Register** is inapplicable. FMCS also finds good cause to provide an immediate effective date for this rule because it imposes no obligations on parties outside the federal government and therefore no advance notice is required to enable employers or other private parties to come into compliance.

### List of Subjects in 29 CFR Part 1404

Administrative practice and procedure, Labor management relations.

For the reasons discussed in the preamble, and under the authority of 29 U.S.C. 172 and the Taft-Hartley Act of 1947, FMCS amends 29 CFR part 1404 as follows:

### PART 1404—ARBITRATION SERVICES

- 1. The authority citation for part 1404 continues to read as follows:

**Authority:** 29 U.S.C. 172 and 29 U.S.C. 173 *et seq.*

#### Appendix to Part 1404 [Removed]

- 2. Remove the appendix to part 1404.

Dated: November 15, 2022.

**Anna Davis,**

*Deputy General Counsel.*

[FR Doc. 2022–25141 Filed 11–17–22; 8:45 am]

**BILLING CODE 6732–01–P**

## DEPARTMENT OF HOMELAND SECURITY

### Coast Guard

#### 33 CFR Part 165

[Docket Number USCG–2022–0930]

**RIN 1625–AA00**

#### Safety Zone; Brakes Bayou, Beaumont, TX

**AGENCY:** Coast Guard, DHS.

**ACTION:** Temporary final rule.

**SUMMARY:** The Coast Guard is establishing a temporary safety zone for navigable waters within 200-feet of an unnamed railroad bridge that crosses Brakes Bayou in approximate position 30°05′22.3″ N 094°05′53.5″ W. The safety zone is needed to protect personnel, vessels and the marine environment from potential hazards created by demolition of the bridge. Entry of vessels or persons into this zone is prohibited unless specifically authorized by the Captain of the Port Port Arthur.

**DATES:** This rule is effective without actual notice from November 18, 2022 through December 9, 2022. For the purposes of enforcement, actual notice will be used from November 9, 2022 until November 18, 2022.

**ADDRESSES:** To view documents mentioned in this preamble as being available in the docket, go to <https://www.regulations.gov>, type USCG–2022–0930 in the search box and click “Search.” Next, in the Document Type column, select “Supporting & Related Material.”

**FOR FURTHER INFORMATION CONTACT:** If you have questions on this rule, call or email Mr. Scott Whalen, Marine Safety Unit Port Arthur, TX, U.S. Coast Guard; telephone 409–719–5086, email [scott.k.whelen@uscg.mil](mailto:scott.k.whelen@uscg.mil).

#### SUPPLEMENTARY INFORMATION:

##### I. Table of Abbreviations

CFR Code of Federal Regulations  
COTP Captain of the Port, Marine Safety Unit Port Arthur  
DHS Department of Homeland Security  
FR Federal Register  
NPRM Notice of proposed rulemaking  
§ Section  
U.S.C. United States Code

## II. Background Information and Regulatory History

The Coast Guard is issuing this temporary rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are “impracticable, unnecessary, or contrary to the public interest.” Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with because it is impracticable to publish a Notice of Proposed Rulemaking because the Coast Guard must establish this safety zone by November 9, 2022, and lacks sufficient time to provide a reasonable comment period and to consider those comments before issuing the rule.

Under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Delaying the effective date of this rule would be impracticable because immediate action is needed to protect personnel, vessels, and the marine environment from the potential safety hazards created by the demolition of the railroad bridge.

## III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 46 U.S.C. 70034 (previously 33 U.S.C. 1231). The Captain of the Port Port Arthur (COTP) has determined that potential hazards associated with demolition of the railroad bridge that crosses Brakes Bayou will be a safety concern for anyone within 200-feet of bridge located in approximate position 30°05′22.3″ N 094°05′53.5″ W (NAD83). For this reason, this rule is needed to protect personnel, vessels, and the marine environment in the navigable waters within the safety zone while the bridge is being demolished.

## IV. Discussion of the Rule

This rule establishes a safety zone from November 9, 2022 through December 9, 2022. The safety zone will cover all navigable waters within 200-feet of vessels and machinery being used by personnel to demolish the railroad bridge that crossed Brakes Bayou in Beaumont, TX. The duration of the zone is intended to protect personnel, vessels, and the marine environment in these navigable waters while the bridge is being demolished.

No vessel or person will be permitted to enter the safety zone without obtaining permission from the COTP or a designated representative.

## V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

### A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This rule has not been designated a “significant regulatory action,” under Executive Order 12866. Accordingly, this rule has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is based on the limited size and location of the safety zone. This safety zone will impact a small bayou tributary to the Neches River in Beaumont, TX. The bayou above the railroad bridge is approximately 2.2 NM, possess no residences, boat houses or public boat ramps and no commercial docks.

### B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for

compliance, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency’s responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

### C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

### D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

### E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

### F. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves safety zone lasting 30 days that will prohibit entry within 200-feet the abandoned railroad bridge that crossed Brakes Bayou in approximate position 30°05′22.3″ N 094°05′53.5″ W (NAD83) during demolition operations. It is categorically excluded from further review under paragraph L60(d) of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A Record of Environmental Consideration supporting this determination is available in the docket. For instructions on locating the docket, see the **ADDRESSES** section of this preamble.

### G. Protest Activities

The Coast Guard respects the First Amendment rights of protestors. Protesters are asked to call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

### List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

## PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

**Authority:** 46 U.S.C. 70034, 70051; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.2.

■ 2. Add § 165.T08–0930 to read as follows:

### § 165.T08–0930 Safety Zone; Brakes Bayou, Beaumont, TX.

(a) *Location.* The following area is a safety zone: all navigable waters of Brakes Bayou, shoreline-to-shoreline, extending 200-feet on either side of the

abandoned railroad bridge that crosses Brakes Bayou in approximate position 30°05'22.3" N 094°05'53.5" W. The duration of the safety zone is intended to protect personnel, vessels and the marine environment from potential hazards created by bridge demolition operations.

(b) *Effective period.* This section is effective from November 9, 2022 through December 9, 2022.

(c) *Regulations.* In accordance with the general regulations in § 165.23 of this part, entry of vessels or persons into the safety zone described in paragraph (a) of this section is prohibited unless authorized by the Captain of the Port Marine Safety Unit Port Arthur (COTP) or a designated representative. They may be contacted on VHF-FM channel 13 or 16, or by phone at by telephone at 409-719-5070.

(d) *Informational broadcasts.* The COTP or a designated representative will inform the public of the effective period for the safety zone as well as any changes in the dates and times of enforcement through Local Notice to Mariners (LNMs).

Dated: November 8, 2022

**Molly A. Wike,**

*Captain, U.S. Coast Guard, Captain of the Port, Marine Safety Zone Port Arthur.*

## ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

### 36 CFR 1151

[Docket No. ATCB-2022-0005]

RIN 3014-AA49

### Bylaws

**AGENCY:** Architectural and Transportation Barriers Compliance Board.

**ACTION:** Direct final rule.

**SUMMARY:** The Architectural and Transportation Barriers Compliance Board (hereafter, "Access Board," or "Board") has amended its bylaws. These amendments update agency procedures and enhance efficiency of operations.

**DATES:** This final rule is effective November 18, 2022.

**FOR FURTHER INFORMATION CONTACT:** Christopher Kuczynski, General Counsel, U.S. Access Board, (202) 272-0042, [kuczynski@access-board.gov](mailto:kuczynski@access-board.gov).

**SUPPLEMENTARY INFORMATION:**

### I. Background

At its November 9, 2022 meeting, the Access Board approved a number of changes to its bylaws, published at 36 CFR 1151. Specifically:

- A new section (to be codified at 36 CFR 1151.3) sets out requirements for Board membership, consistent with section 502 of the Rehabilitation Act (29 U.S.C. 792), and prescribes rules for the designation in writing of federal members and federal liaisons to the Board. Federal members are heads of agencies listed in paragraph (b) of § 1151.3, or their designees, who must be at Level IV of the Executive Schedule or higher. Federal members may include individuals serving in positions on a temporary or acting basis, in accordance with federal law and with agency rules, policies, and practices (paragraph (c)(2)). Federal members and federal liaisons to the Board must be designated in writing (paragraphs (c)(1) and (3)), (which may include designation by electronic mail from a verifiable account), by someone who has authority to make the designation (paragraph (c)(4)). Written designations for members may identify the particular position within the agency, an individual, or both. Previously, the Board bylaws had no requirements concerning designation in writing of federal members or liaisons.

- The language in what was, prior to amendment of the bylaws, § 1151.3(a) (concerning officers), which says that the Board is the governing body of the agency, is now the first sentence in § 1151.2. Additionally, former paragraph (b) (Chair and Vice Chair) and former paragraph (c) (Elections), have been combined and redesignated as paragraphs (a)(1) and (2), former paragraph (d) (Executive Director) is now paragraph (b), and former paragraph (e) (General Counsel) is now paragraph (c).

- Section 1151.5 (previously § 1151.4), entitled "Delegations," has been revised slightly. The title of paragraph (a) is now "Delegations to the Executive Committee," since that is more consistent with the overall title of the section and better describes the contents of the paragraph, which describe delegations to, not by, the Executive Committee. A cross-reference to § 1151.7(a), which establishes the Executive Committee is also provided here, since this is the first reference to the Executive Committee in the bylaws.

- Section 1151.6 (previously § 1151.5) makes several changes with respect to Board meetings.

- Paragraph (a) reduces the number of meetings from six annually to four.

One of the meetings may be a public event outside of the Washington, DC area. Such a public event is not, as it previously had been, required each year, but may instead be a regular meeting of the Board.

- Paragraph (b) says that meetings ordinarily will occur in January, April, July, and October, but does not specify a particular day or week during each month that the meeting must occur. Previously, the bylaws said that regular meetings of the Board would occur on the Wednesday following the second Tuesday of the month. The Chair may reschedule a meeting to the month before or after the month specified in the bylaws.

- Paragraph (c) which is new, specifies that two meetings will be in-person, with an option for participation remotely, and two meetings may be entirely remote. This paragraph also states that the Board will comply with all applicable laws in the manner in which it conducts meetings, including the obligation to provide reasonable accommodations for Board members, employees, members of the public, and other participants (who might include, for example, individuals making presentations to the Board or a committee). Because of the addition of this paragraph, the lettering of subsequent paragraphs has been adjusted.

- Paragraph (d) alters the requirement, in former paragraph (c), that the Chair establish the agenda for Board meetings to say that the Chair may consult with the Executive Director as necessary and appropriate. This merely clarifies existing practice.

- Paragraph (e) provides for notice to the Board and to the public of the dates for each year's Board meetings at least 30 days prior to the January meeting. Notice may be provided on the Access Board's website and/or through any other means by which the public is likely to access it. Notice to members of the public will include language indicating that reasonable accommodation will be provided to enable participation in the meeting by individuals with disabilities, absent undue burden. Although the Board has historically provided reasonable accommodations for Board members, staff, and members of the public, inclusion of this language in the notice promotes the broadest level of participation possible by informing individuals with disabilities who may not be aware of the right to reasonable accommodation, and is consistent with the Board's mission of promoting accessibility and inclusion for people with disabilities.

○ Paragraph (f) says that the Chair will give notice of a meeting's cancellation at least 10 days prior to the meeting where practical, and if the meeting is a public meeting, will give notice to the public of the cancellation at the same time.

○ Paragraph (g) requires reasonable advance notice of a special meeting, as well as the time place and purpose of the meeting. This is consistent with the current bylaws. However, anticipating the possibility that a special meeting could be a public meeting, the amendment provides for notice to the public of the meeting, including language indicating that the Board will provide reasonable accommodation to enable participation, absent undue burden.

○ Paragraph (k)(5) provides five business days for a notational vote. The Chair has discretion to extend the period of time if, at the end of the voting period, there are an insufficient number of votes for the Board to take action. An amendment specifying that notational voting may occur through electronic mail reflects current practice. The bylaws previously provided for notational voting for actions taken between meetings of the Board, but did not describe the manner or form in which it would occur.

○ Paragraph (l), which says that Board members shall be considered present at any meeting in which they participate by teleconference or other equipment that allows all participants to communicate with each other is unchanged from former paragraph (k). Its labeling simply changed when a new paragraph (c) was inserted.

Section 1151.7 (previously 1151.6) makes some changes to requirements related to committees.

○ Paragraph (a)(1) has been revised to make certain duties of the Executive Committee discretionary rather than mandatory. For example, the Executive Committee now may, but is not required to, review and recommend changes to the bylaws prior to submission of proposed amendments to the Board.

○ Paragraph (b)(2) has been revised to require the Board to vote only for the Chair of a subject matter committee. Previously, paragraph (b)(2) said that the Board elects both the Chair and Vice Chair of a subject matter committee; however, this contradicted the language in paragraph (b)(3) immediately following, which said that the Chair of the Board appoints members of standing committees other than the Chair, who is elected by the Board. The revised bylaws resolve the contradiction in favor of the Board voting on the Chair only, since this would simplify the

voting process and have no impact on the operation of committees.

○ Paragraph (b)(3) reduces the number of members on a subject matter committee from seven to nine to five to seven). Currently, the Board has four subject matter committees and three special committees, as well as an Executive Committee. The amendment to the bylaws reducing the number of committee members will actually facilitate committee work while limiting the number of committees to which specific Board members need to be assigned.

## II. Regulatory Process Matters

### *Administrative Procedure Act*

This final rule implements amendments to the Access Board's bylaws and solely addresses internal matters related to agency management and practices. As such, this rule is exempt from the notice-and-comment process pursuant to the Administrative Procedures Act. See 5 U.S.C. 553(a)(2), 553(b)(3)(A).

### *Executive Order 12866*

This final rule establishes internal rules of agency procedure only. OMB has determined that the rule is not a significant regulatory action within the meaning of Executive Order 12866.

### *Congressional Review Act*

This final rule is not a major rule within the meaning of the Congressional Review Act. See 5 U.S.C. 801 *et seq.*

### *Regulatory Flexibility Act*

The Regulatory Flexibility Act (RFA) requires Federal agencies to analyze regulatory options that may assist in minimizing any significant impact of a rule on small businesses and small governmental jurisdictions. See 5 U.S.C. 604, 605(b). Because this final rule relates solely to agency internal procedures and, moreover, is not subject to notice-and-comment rulemaking, the RFA is inapplicable.

### *Federalism (Executive Order 13132)*

The Access Board has analyzed this final rule in accordance with the principles and criteria set forth in Executive Order 13132. The Board has determined that this action will not have a substantial direct effect on the States, the relationship between the Federal Government and the States, or on the distribution of power and responsibilities among the various levels of government, and, therefore, does not have Federalism implications.

### *Paperwork Reduction Act*

This final rule does not specify any new collections of information or recordkeeping requirements that require OMB approval under the Paperwork Reduction Act. See 44 U.S.C. 3501 *et seq.*

### *Unfunded Mandates Reform Act*

The Unfunded Mandates Reform Act of 1995 (codified at 2 U.S.C. 1531 *et seq.*) ("UMRA") generally requires that Federal agencies assess the effects of their discretionary regulatory actions that may result in the expenditure of \$100 million (adjusted for inflation) or more in any one year by the private sector, or by State, local, and tribal governments in the aggregate. Because this final rule is not subject to notice-and-comment rulemaking, UMRA's analytical requirements do not apply. See 2 U.S.C. 1532(a).

For the reasons set forth in the preamble, the Access Board amends 36 CFR part 1151 as follows:

## PART 1151—BYLAWS

■ 1. The authority citation for part 1151 continues to read as follows:

**Authority:** 29 U.S.C. 792

■ 2. Amend § 1151.2 by adding a new first sentence:

### **§ 1151.2 Authority**

The Board is the governing body of the agency. \* \* \*

### **§§ 1151.3 through 1151.7 [Redesignated]**

■ 3. Redesignate §§ 1151.3 through 1151.7 as §§ 1151.4 through 1151.8.

■ 4. Add a new § 1151.3 to read as follows:

### **§ 1151.3 Membership**

(a) *Public Members.* (1) The Board shall have thirteen members appointed by the President from among members of the general public, at least a majority of whom shall have disabilities.

(2) Members shall be appointed for a term of four years, may be reappointed to one successive term, and thereafter may not be reappointed unless they have not served on the Access board for at least two years prior to their reappointment. Each year, the terms of at least three members of the Board shall expire. A public member may continue to serve following expiration of the member's term if a successor has not been appointed.

(b) *Federal Members.* The remaining members of the Board shall be the heads of the following agencies or their designees whose positions are Executive Level IV or higher:

(1) The Department of health and Human Services;  
 (2) The Department of Transportation;  
 (3) The Department of Housing and Urban Development;  
 (4) The Department of Labor;  
 (5) The Department of the Interior;  
 (6) The Department of Defense;  
 (7) The Department of Justice;  
 (8) The General Services Administration;  
 (9) The Department of Veterans Affairs;  
 (10) The United States Postal Service;  
 (11) The Department of Education;  
 and  
 (12) The Department of Commerce.

(c) *Designation of Federal Board Members and Liaisons.* (1) Designation of a Federal Board member other than an agency head shall be made in writing by the agency head or by anyone authorized to provide such designation on behalf of the agency head. The designation may either be of a particular position, an individual, or both. If only a specific person is designated and not the position, a new designation will be required where appointment of another person to fill the position is subsequently made. The designation shall remain in effect for as long as provided for under applicable agency rules, regulations, or policies.

(2) An individual serving in an acting capacity, or who is otherwise temporarily serving, in a position at Executive Level IV or higher may be designated to serve on the Board, subject to any time limitations under applicable law, or under agency rules, regulations, or policies.

(3) Any newly-appointed Federal Board member shall designate in writing a liaison to the Board. A newly appointed Federal Board member may allow an individual previously serving as a liaison to the Board to continue to do so, but must provide a new designation in writing.

(4) Written designation of a Federal Board member or liaison may be in any form (including from a verifiable email address) indicating the identity of the person making the designation and that the person is authorized to do so.

■ 5. Revise newly redesignated § 1151.4 to read as follows:

#### § 1151.4 Officers

(a) *Chair; Vice Chair.* (1) The head of the agency is the Chair of the Board and, in his or her absence or disqualification, the Vice-Chair of the Board. As head of the agency, the Chair represents the Board whenever an applicable Federal statute or regulation imposes a duty or grants a right or authority to the head of the agency and has the authority to act

in all matters relating to the operation of the Board. The Chair may delegate any such duties and responsibilities by written delegation of authority. The Chair supervises the Executive Director and evaluates his or her performance and approves performance evaluations of employees who report directly to the Executive Director. The authority to supervise, evaluate, and approve performance evaluations of the Executive Director and those employees who report directly to the Executive Director may only be delegated to the Vice-Chair of the Board.

(2) The Chair and the Vice-Chair of the Board shall be elected by a majority of the membership of the Board (as fixed by statute) and serve for terms of one year. Elections shall be held as soon as possible upon completion of the one year term of the Chair and Vice-Chair, ordinarily at the April meeting of the Board. If no new Chair or Vice-Chair has been elected at the end of the one-year term, the incumbents shall continue to serve in that capacity until a successor Chair or Vice-Chair has been elected. When the Chair is a public member, the Vice-Chair shall be a Federal member; and when the Chair is a Federal member, the Vice-Chair shall be a public member. Upon the expiration of the term as Chair of a Federal member, the subsequent Chair shall be a public member; and vice versa.

(b) *Executive Director.* The Executive Director is nominated by the Chair and confirmed by the Board. The Executive Director provides administrative leadership and supervision and management of staff activities in carrying out the policies and decisions of the Board under the direction and supervision of the Chair. The Executive Director has the authority to execute contracts, agreements, and other documents necessary for the operation of the Board; hire, fire and promote staff (including temporary or intermittent experts and consultants); procure space, equipment, and supplies; and obtain interagency and commercial support services. The Executive Director directs compliance and enforcement activities in accordance with the procedures set forth in 36 CFR part 1150, including issuing citations and determinations not to proceed, conducting negotiations for compliance, entering into agreements for voluntary compliance, and performing all other actions authorized by law pertaining to compliance and enforcement not otherwise reserved to the Board.

(c) *General Counsel.* The General Counsel is nominated by the Chair and confirmed by the Board. The General Counsel is responsible to the Board

under the supervision of the Executive Director.

■ 6. In newly redesignated § 1151.5, revise the section heading and the first sentence of paragraph (a) as follows:

#### § 1151.5 Delegations

(a) *Delegations to the Executive Committee.* The Board may delegate to the Executive Committee (provided for in § 1151.7(a)) authority to implement its decisions by a majority vote of the members present at a meeting and any proxies. \* \* \*

\* \* \* \* \*

■ 7. Revise newly redesignated § 1151.6 to read as follows:

#### § 1151.6 Board meetings.

(a) *Number.* The Chair shall schedule four meetings of the Board each year starting January 2023, one of which may be a Board sponsored public event outside the Washington, DC area.

(b) *Timing.* Regular meetings of the Board shall ordinarily be held in January, April, July, and October of each calendar year. The Chair may reschedule a regular meeting of the Board to another date during the month preceding or following the month in which the regularly scheduled meeting was to occur.

(c) *Manner of conducting meetings.* Two regular Board meetings will be in person, but allow for participation by the Board, liaisons, and members of the public remotely, and two meetings may be entirely remote. The Board shall comply with all legal requirements concerning the manner of conducting meetings, including the requirement to provide reasonable accommodations for Board members, employees, members of the public, and other participants.

(d) *Agenda.* The Chair establishes the agenda for the meetings, in consultation with the Executive Director as necessary and appropriate. Members or committees may forward submissions for agenda items to the Chair and/or to the Executive Director. Except for items concerning the adoption, amendment, or rescission of the bylaws in this part, an item may be placed before the Board for consideration without the approval of the Chair upon a two-thirds vote of the members present at a Board meeting and any proxies to suspend the rules of order. Items concerning the adoption, amendment, or rescission of the bylaws in this part may be placed on a future Board agenda without the approval of the Chair upon a vote of two-thirds of the membership of the Board (as fixed by statute).

(e) *Notice.* (1) The Chair shall provide a schedule in writing of Board meetings

for the upcoming year at least thirty (30) days prior to the January Board meeting and shall provide to each Board member the agenda and supporting materials for each meeting at least ten (10) work days prior to each meeting. The ten (10) days notice requirement may be waived upon a two-thirds vote by the members present at the Board meeting and any proxies to suspend the rules of order.

(2) The public shall receive notice of the dates of meetings for the upcoming year at least thirty (30) days prior to the January Board meeting. Notice may be by publication of the schedule of meetings on the agency's website and/or through any other means by which interested members of the public are likely to access it. The notice shall include a statement that the Board will provide reasonable accommodations, absent an undue burden, that will enable members of the public to participate in meetings.

(f) *Cancellation.* The Chair may cancel a regular meeting of the Board by giving written notice of the cancellation at least ten (10) work days prior to the meeting where practical. If the canceled meeting is a public meeting, members of the public will be given notice of its cancellation at the same time as Board members.

(g) *Special meetings.* The Chair may call special meetings of the Board to deal with important matters arising between regular meetings which require action by the Board prior to the next regular meeting. Voting and discussion shall be limited to the subject matter which necessitated the call of the special meeting. All Board members shall receive reasonable advance notice of the time, place, and purpose of the special meeting. If the special meeting is also a public meeting, members of the public shall be given notice of its occurrence at the same time as Board members, and such notice shall indicate that the Board will provide reasonable accommodations for members of the public to participate in the meeting, absent undue burden.

(h) *Record.* The Executive Director shall maintain a permanent record of the minutes of all meetings and attendance. The Board shall approve the final minutes after all corrections and additions have been incorporated.

(i) *Rules for Board meetings.* Meetings of the Board shall be held in accordance with Robert's Rules of Order, except as otherwise prescribed in the bylaws in this part.

(j) *Quorum.* (1) A quorum shall be the majority of the membership of the Board (as fixed by statute). A majority of the members required for a quorum shall be public members.

(2) Proxies shall not be counted for purposes of establishing a quorum.

(3) If a quorum is not present, a meeting shall be held only for the purpose of discussion and no vote may be taken.

(k) *Voting.* (1) Only Board members may vote.

(2) Except as otherwise prescribed in the bylaws in this part, a majority vote of the members present and any proxies is necessary for action by the Board.

(3) The presiding officer shall have the same right to vote as any other member.

(4) Any member may give his or her directed or undirected proxy to any other Board member present at the meeting. Proxies shall be given in writing and submitted to the Chair prior to or at the meeting. A directed proxy shall be voided as to a specific issue if the question on which the vote is eventually taken differs from the question to which the proxy is directed.

(5) The Board may act on items of business between meetings by notational voting. At the request of the Chair, the Executive Director shall send a written ballot (which may be in the form of electronic mail) to each Board member describing each item submitted for notational voting. If any Board member requests discussion on an item, the ballots shall not be counted and the Chair shall place the item on the next Board meeting agenda for discussion and voting. Notational votes shall ordinarily occur over a period of five (5) business days, but may be extended, at the Chair's discretion, if, at the conclusion of the voting period, an insufficient number of votes have been cast to approve or disapprove an action.

(l) *Telecommunications.* A member of the Board shall be considered present at a meeting when he or she participates in person or by conference telephone or similar communication equipment that enables all persons participating in the meeting to communicate with each other.

■ 8. In newly redesignated § 1151.7, revise paragraphs (a)(1) and (b)(2) and (3) to read as follows:

#### § 1151.7 Committees.

(a) \* \* \* (1) *Establishment.* The Board shall have an Executive Committee to serve as a leadership and coordinating committee. The Executive Committee acts on behalf of the Board in between regularly scheduled Board meetings as necessary and as authorized by delegation of the Board. In addition, the Executive Committee may perform one or more of the following duties:

(i) Review and consider recommendations and proposals from the various subject matter committees;

(ii) Review and make recommendations to the Board to amend or approve the Board's bylaws; and

(iii) Request and review all committee charters.

\* \* \* \* \*

(b) \* \* \*

(2) *Chair.* The Chair of a subject matter committee shall be elected by the Board after the election of the Chair and Vice-Chair of the Board. The Chair of a subject matter committee shall serve as a member of the Board's Executive Committee.

(3) *Membership.* Each subject matter committee shall be comprised of a minimum of five (5), and a maximum of seven (7), members. Except for the Chair of the committee who is elected by the Board, the members of the committee shall be appointed by the Chair of the Board. Members shall serve a term of one year corresponding to that of the Chair of the Board, and continue their duties until their successors have been appointed.

\* \* \* \* \*

Christopher Kuczynski,

General Counsel.

## POSTAL SERVICE

### 39 CFR Part 111

#### Domestic Competitive Products Pricing and Mailing Standards

**AGENCY:** Postal Service™.

**ACTION:** Final rule.

**SUMMARY:** The Postal Service is amending *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM®), to reflect changes to prices and mailing standards for competitive products.

**DATES:** Effective January 22, 2023.

#### FOR FURTHER INFORMATION CONTACT:

Karen F. Key at (202) 268-7492, Margaret Pepe (202) 268-3078, or Garry Rodriguez at (202) 268-7281.

**SUPPLEMENTARY INFORMATION:** This final rule describes new prices and product features for competitive products, by class of mail, established by the Governors of the United States Postal Service®. New prices are available under Docket Number CP2023-42 on the Postal Regulatory Commission PRC website at <http://www.prc.gov>, and on the Postal Explorer® website at <http://pe.usps.com>.

The Postal Service will revise *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM), to reflect changes to prices and mailing standards for the following competitive products:

- Priority Mail Express®.
- Priority Mail®.
- First-Class Package Service®.
- Parcel Select®.
- USPS Retail Ground®.
- Extra Services.
- Return Services.
- Mailer Services.
- Recipient Services.
- Other.

Competitive product prices and changes are identified by product as follows:

### **Priority Mail Express**

#### *Prices*

Overall, Priority Mail Express prices will increase 6.6 percent. Priority Mail Express will continue to offer zoned and Flat Rate, Retail and Commercial pricing.

Retail prices will increase an average of 6.7 percent. The Flat Rate Envelope price will increase to \$28.75, the Legal Flat Rate Envelope will increase to \$28.95, and the Padded Flat Rate Envelope will increase to \$29.45.

Commercial prices will increase an average of 6.0 percent.

#### *Priority Mail Express Commercial Base and Plus Pricing Consolidated*

The Postal Service is consolidating Priority Mail Express “Commercial Base” and “Commercial Plus” into one “Commercial” price category. Consolidating the “Commercial Base” and “Commercial Plus” price categories will simplify the Priority Mail Express pricing structure. The eligibility standards for Priority Mail Express Commercial will mirror the current “Commercial Base” price category.

### **Priority Mail**

#### *Prices*

Overall, Priority Mail prices will increase 5.5 percent. Priority Mail will continue to offer zoned and Flat Rate, Retail and Commercial pricing.

Retail prices will increase an average of 6.8 percent. The Flat Rate Envelope price will increase to \$9.65, the Legal Flat Rate Envelope will increase to \$9.95, and the Padded Flat Rate Envelope will increase to \$10.40. The Small Flat Rate Box price will increase to \$10.20, and the Medium Flat Rate Boxes will increase to \$17.10. The Large Flat Rate Box will increase to \$22.80 and the APO/FPO/DPO Large Flat Rate Box will increase to \$21.20.

Commercial prices will increase an average of 3.6 percent.

#### *Priority Mail Commercial Base and Plus Pricing Consolidated*

The Postal Service is consolidating the Priority Mail “Commercial Base” and “Commercial Plus” price categories into one “Commercial price category. Consolidating the “Commercial Base” and “Commercial Plus” price categories will simplify the Priority Mail pricing structure. The eligibility standards for Priority Mail Commercial will mirror the current “Commercial Base” price category.

#### *Priority Mail Regional Rate Boxes Discontinued*

The Postal Service is discontinuing the Priority Mail Regional Rate product offering. The decision to discontinue Regional Rate Boxes will simplify the Priority Mail offering.

### **First-Class Package Service**

#### *Prices*

Overall, First-Class Package Service prices will increase 7.8 percent.

First-Class Package Service—Retail prices will increase 6.9 percent.

First-Class Package Service—Commercial prices will increase 8.0 percent.

### **Parcel Select**

#### *Prices*

The prices for Parcel Select Destination Entry will increase an average of 5.1 percent. Parcel Select Ground will have a 0.0 percent price change, but prices will be updated in zones 1 and 2. The prices for Parcel Select Lightweight® will increase an average of 6.1 percent. The prices for USPS Connect® Local will remain the same.

### **USPS Retail Ground**

Overall, USPS Retail Ground prices will increase an average of 6.4 percent.

### **Extra Services**

#### *Adult Signature Service*

Adult Signature Required and Adult Signature Restricted Delivery service prices are increasing 6.5 and 6.8 percent respectively. The price for Adult Signature Required will increase to \$9.05 and Adult Signature Restricted Delivery will increase to \$9.35.

### **Return Services**

#### *Parcel Return Service*

The Postal Service is revising the standards for Parcel Return Service (PRS) to be a competitive product only

available through a Negotiated Service Agreement (NSA). As a nonpublished offering, the standards will be removed from the DMM and the prices will be removed from the Price List, Notice 123.

### **USPS Returns**

The Postal Service is discontinuing the Certificate of Mailing and Signature Confirmation extra service options for USPS Returns products.

In an effort to provide product simplification, the Postal Service believes it is in the best interest to no longer offer Certificate of Mailing or Signature Confirmation services for USPS Returns products.

### **Mailer Services**

#### *Pickup on Demand Service*

The Pickup on Demand® service fee will increase 6.0 percent to \$26.50.

#### *USPS Tracking Plus Service*

The USPS Premium Tracking Service™ prices will remain the same.

#### *USPS Label Delivery Service*

The Postal Service is implementing USPS Label Delivery Service™ to provide customers with an option to have their domestic outbound and return mailing labels printed and delivered for a fee per label at a Post Office where available. USPS Label Delivery Service is not available for APO/FPO/DPO addresses. Customers requesting USPS Label Delivery Service will be provided the tracking information for tracking purposes. A customer may request USPS Label Delivery Service at [www.usps.com](http://www.usps.com).

USPS Label Delivery Service is available for Retail and Commercial Priority Mail Express and Priority Mail, First-Class Package Service—Retail, First Class Package Service—Commercial, USPS Retail Ground, Parcel Select Ground, Priority Mail Return service, and First-Class Package Return service.

There are no extra services available with labels requested through USPS Label Delivery Service.

For USPS Label Delivery Service, the Postal Service will refund the postage and USPS Label Delivery Service fee if the label is not delivered. The Postal Service will refund the postage only if the label is delivered and not used.

### **Recipient Services**

#### *Post Office Box Service*

The competitive Post Office Box™ service prices will increase an average of 6.5 percent within the updated price ranges.

**Premium Forwarding Service**

Premium Forwarding Service® (PFS®) prices will increase between 6.5 and 6.6 percent depending on the specific price element. The enrollment fee paid at the retail counter for PFS-Residential will increase to \$25.45 and the PFS-Residential, PFS-Commercial, and PFS-Local enrollment fee paid online will increase to \$23.40 per application. The price of the weekly shipment charge for PFS-Residential and per container charge for PFS-Local will increase to \$25.45.

**USPS Package Intercept**

The USPS Package Intercept® fee will increase 6.6 percent to \$17.00.

**Other****Address Enhancement Service**

Address Enhancement Service competitive product prices will remain the same.

**Small Parcel Forwarding Fee**

The small parcel forwarding fee will remain the same at \$5.25.

**Zone Modification**

The Postal Service is modifying zone price categories for all applicable Competitive products. This zone modification will redefine the local zone and remove it as a zone price category. The Postal Service will also split zones 1 and 2 into separate price categories. This will result in nine individual zone price categories.

Additionally, the Postal Service is clarifying that the zone 1 price applies to pieces mailed within the same 3 Digit O/D Pairs and pieces mailed with different 3 Digit O/D Pairs whose centroids are up to 50 miles in distance.

**Resources**

The Postal Service provides additional resources to assist customers with this price change for competitive products. These tools include price lists, downloadable price files, and **Federal Register** Notices, which may be found on the Postal Explorer® website at <http://pe.usps.com>.

We will publish an appropriate amendment to 39 CFR part 111 to reflect these changes.

The Postal Service adopts the following changes to *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM), incorporated by reference in the *Code of Federal Regulations*. See 39 CFR 111.1.

**List of Subjects in 39 CFR Part 111**

Administrative practice and procedure, Postal Service.

Accordingly, 39 CFR part 111 is amended as follows:

**PART 111—[AMENDED]**

■ 1. The authority citation for 39 CFR part 111 continues to read as follows:

**Authority:** 5 U.S.C. 552(a); 13 U.S.C. 301–307; 18 U.S.C. 1692–1737; 39 U.S.C. 101, 401–404, 414, 416, 3001–3018, 3201–3220, 3401–3406, 3621, 3622, 3626, 3629, 3631–3633, 3641, 3681–3685, and 5001.

■ 2. Revise *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM) as follows:

**Mailing Standards of the United States Postal Service, Domestic Mail Manual (DMM)**

\* \* \* \* \*

**100 Retail Mail Letters, Flats, and Parcels**

\* \* \* \* \*

**120 Retail Mail Priority Mail****123 Prices and Eligibility****1.0 Prices and Fees**

\* \* \* \* \*

*[Delete 1.5, Regional Rate Boxes, and renumber 1.6 and 1.7 as 1.5 and 1.6.]*

\* \* \* \* \*

**1.6 Nonstandard Fees**

*[Revise the introductory text of renumbered 1.6 to read as follows:]*

Except for Flat Rate packaging, a Priority Mail piece is subject to a nonstandard fee (see Notice 123—Price List) as follows:

\* \* \* \* \*

**125 Mail Preparation****1.0 Preparation**

\* \* \* \* \*

*[Revise the heading of 1.2 to read as follows:]*

**1.2 Sealing Flat Rate Packaging**

*[Revise the first sentence of 1.2 to read as follows:]*

When sealing a Flat Rate Envelope or Flat Rate Box, the container flaps must be able to close within the normal folds.

\* \* \* \* \*

**200 Commercial Mail, Letters, Flats, and Parcels****201 Physical Standards**

\* \* \* \* \*

**7.0 Physical Standards for Parcels**

\* \* \* \* \*

**7.3 Maximum Weight and Size**

*[Revise the second sentence of 7.3 to read as follows:]*

\* \* \* Lower weight limits apply to parcels mailed at Priority Mail Cubic, First-Class Package Service—Commercial, USPS Marketing Mail, and Bound Printed Matter prices. \* \* \*

\* \* \* \* \*

**8.0 Additional Physical Standards by Class of Mail**

\* \* \* \* \*

**8.2 Priority Mail**

*[Revise the first sentence of 8.2 to read as follows:]*

The maximum weight is 70 pounds, except for cubic (20 pounds) parcels.

\* \* \*

\* \* \* \* \*

**202 Elements on the Face of a Mailpiece**

\* \* \* \* \*

**3.0 Placement and Content of Mail Markings**

\* \* \* \* \*

**3.3 Priority Mail Express and Priority Mail Markings**

\* \* \* \* \*

**3.3.3 Additional Markings for Priority Mail Express and Priority Mail**

*[Revise the text of 3.3.3 to read as follows:]*

In addition to the basic price marking in 3.3.1 and 3.3.2, except for pieces paid using a USPS Returns service or permit imprint, Priority Mail Express and Priority Mail pieces claimed at Commercial prices also must bear the “Commercial” price marking, printed on the piece or produced as part of the meter imprint or PC Postage indicia. Place the “Commercial” price marking directly above, directly below, or to the left of the postage.

\* \* \* \* \*

**3.4 Priority Mail Cubic Markings**

\* \* \* \* \*

**3.4.2 Price Marking—Permit Imprint**

*[Revise the first sentence of 3.4.2 to read as follows:]*

Priority Mail permit imprint pieces claiming the cubic price must be marked “Priority Mail” and bear the “cubic” marking (see 3.4.3 for soft pack and padded envelopes), printed on the piece or produced as part of the permit imprint indicia. \* \* \*

\* \* \* \* \*

**204 Barcode Standards**

\* \* \* \* \*

**2.0 Standards for Package and Extra Service Barcodes****2.1 Intelligent Mail Package Barcode****2.1.1 Definition**

*[Revise the last sentence of 2.1.1 to read as follows:]*

\* \* \* A ZIP + 4 is required to be encoded into the barcode for all returns products.

\* \* \* \* \*

**2.2 Other Package Barcodes**

\* \* \* \* \*

**2.2.11 Service Banner Text**

*[Revise the text of 2.2.11 to read as follows:]*

Except with Certified Mail, Registered Mail, Adult Signature, and Priority Mail Express or Priority Mail Open and Distribute services, mailers preparing extra service barcodes under 2.2 must use a “USPS TRACKING #” human-readable service banner text above the barcode on packages not requiring a signature at delivery, or a “USPS SIGNATURE TRACKING #” service banner text above the barcode on packages where a signature is required at delivery.

\* \* \* \* \*

**210 Commercial Mail Priority Mail Express****213 Prices and Eligibility****1.0 Prices and Fees**

\* \* \* \* \*

*[Revise the heading and introductory text of 1.3 to read as follows:]*

**1.3 Commercial Prices**

Priority Mail Express commercial prices are less than Priority Mail Express retail prices (see Notice 123—Price List). These prices are available to:

\* \* \* \* \*

*[Delete 1.4, Commercial Plus Prices, in its entirety and renumber 1.5 through 1.10 as 1.4 through 1.9.]*

\* \* \* \* \*

**214 Postage Payment and Documentation****1.0 Basic Standards for Postage Payment Options**

*[Renumber 1.1 and 1.2 as 1.2 and 1.3. Revise 1.0 by renumbering the current text as 1.1 to read as follows:]*

**1.1 General**

Federal agency and USPS official Priority Mail Express may use the appropriate indicia, subject to 703.7.0. The mailer is responsible for proper payment of postage.

\* \* \* \* \*

*[Revise the heading and introductory text of renumbered 1.2 to read as follows:]*

**1.2 Commercial Pricing**

Commercial Priority Mail Express postage may be paid with:

\* \* \* \* \*

*[Delete renumbered 1.3, Commercial Plus Pricing, in its entirety.]*

\* \* \* \* \*

**220 Commercial Mail Priority Mail****223 Prices and Eligibility****1.0 Prices and Fees****1.1 Price Application**

The following price applications apply:

*[Revise the first sentence of item a to read as follows:]*

a. Except for cubic items (see 1.1c), customers mailing Priority Mail mailpieces are charged per pound of the mailpiece; any fraction of a pound is rounded up to the next whole pound.

\* \* \*

\* \* \* \* \*

*[Delete item c in its entirety and renumber items d through g as items c through f.]*

*[Delete renumbered item d in its entirety and renumber items e and f as items d and e.]*

*[Revise renumbered item d to read as follows:]*

d. Priority Mail Open and Distribute tray boxes mailed at commercial prices are not based on weight but are charged based on the tray box and zone to which it is sent.

\* \* \* \* \*

*[Revise the heading and introductory text of 1.2 to read as follows:]*

**1.2 Commercial Prices**

For prices, see Notice 123—Price List. Commercial prices are available for:

*[Delete item a and renumber items b through f as items a through e.]*

\* \* \* \* \*

*[Delete the last sentence of renumbered item c referencing Regional Rate Boxes.]*

\* \* \* \* \*

*[Delete 1.3 in its entirety and renumber 1.4 through 1.13 as 1.3 through 1.12.]*

\* \* \* \* \*

*[Delete renumbered 1.6, Regional Rate Box Prices, in its entirety and renumber 1.7 through 1.12 as 1.6 through 1.11.]*

\* \* \* \* \*

**1.10 Nonstandard Fees**

*[Revise the introductory text of renumbered 1.10 to read as follows:]*

Except for Flat Rate packaging and Priority Mail Return service packages, a Priority Mail piece is subject to a nonstandard fee (see Notice 123—Price List) as follows:

\* \* \* \* \*

**3.0 Basic Eligibility Standards for Priority Mail****3.1 Description of Service**

*[Revise the last sentence of 3.1 to read as follows:]*

\* \* \* Lower weight limits apply to cubic pieces (see 1.4); APO/FPO mail subject to 703.2.0 and 703.4.0 and Department of State mail subject to 703.3.0.

\* \* \* \* \*

**224 Postage Payment and Documentation****1.0 Basic Standards for Postage Payment****1.1 Postage Payment Options**

*[Revise the heading and introductory text of 1.1.1 to read as follows:]*

**1.1.1 Commercial Pricing**

Priority Mail commercial postage may be paid with:

*[Delete item a in its entirety and renumber items b through e as items a through d.]*

\* \* \* \* \*

*[Delete 1.1.2, Commercial Plus Pricing, in its entirety and renumber 1.1.3 as 1.1.2.]*

\* \* \* \* \*

**225 Mail Preparation****1.0 General Information for Mail Preparation**

\* \* \* \* \*

*[Revise the heading of 1.2 to read as follows:]*

**1.2 Sealing Flat Rate Packaging**

*[Revise the first sentence of 1.2 to read as follows:]*

When sealing a Flat Rate Envelope or Flat Rate Box, the container flaps must be able to close within the normal folds.

\*\*\*

\* \* \* \* \*

**500 Additional Mailing Services****503 Extra Services****1.0 Basic Standards for All Extra Services**

\* \* \* \* \*

**1.4 Eligibility for Extra Services**

\* \* \* \* \*

**1.4.3 Eligibility—Domestic Returns**

\* \* \* \* \*

**Exhibit 1.4.3 Eligibility—Domestic Returns**

*[Delete the “Signature Confirmation” option from both the “Paid by EPS Account or by Permit Holder” and the “Paid by Sender” sections of the table. Delete the “Certificate of Mailing” option from the “Paid by Sender” section of the table.]*

*[Delete the “Parcel Return Service” line item from Exhibit 1.4.3.]*

\* \* \* \* \*

**503 Extra Services**

\* \* \* \* \*

**4.0 Insured Mail**

\* \* \* \* \*

**4.2 Insurance Coverage—Priority Mail**

Priority Mail pieces, including Priority Mail Return service, are insured against loss, damage, or missing contents, up to a maximum of \$100.00, subject to the following:

\* \* \* \* \*

*[Revise the text of item b to read as follows:]*

b. Insurance coverage is provided against loss, damage, or missing contents and limited to a maximum liability of \$50.00 when the Priority Mail pieces bear an IMpb or USPS retail tracking barcode, and the mailer pays retail or commercial prices.

\* \* \* \* \*

**4.3 Basic Standards****4.3.1 Description**

\* \* \* The following additional standards apply to insured mail:

*[Revise the third sentence of item a to read as follows:]*

a. \* \* \* For customer-generated integrated barcodes used for USPS Returns service, the returns account holder must provide USPS with electronic data in a shipping services file, version 1.6 or higher, that identifies the USPS Tracking number of the insured return package, total postage paid, insurance fee paid, declared value, mailing date, origin ZIP Code, and delivery ZIP Code, along with the recipient's name and address information. \* \* \*

\* \* \* \* \*

**505 Return Services**

\* \* \* \* \*

**3.0 USPS Returns Service****3.1 Basic Standards**

\* \* \* \* \*

**3.1.3 Postage and Prices**

Postage and prices are subject to the following:

\* \* \* \* \*

b. Prices for Priority Mail Return Service, First-Class Package Return Service, and Ground Return Service (Parcel Select Ground) packages are charged as follows:

*[Revise the text of item b1 to read as follows:]*

1. Priority Mail commercial prices are available for account holders using Priority Mail Return Service, when all applicable requirements are met.

*[Delete item b2 and renumber items b3 and b4 as items b2 and b3.]*

\* \* \* \* \*

c. The account holder or mailer may obtain extra and additional services as follows:

\* \* \* \* \*

*[Delete items c2 and c3 in their entirety and renumber item c4 as item c2.]*

\* \* \* \* \*

**3.1.4 Labels**

Distribution and preparation of labels are subject to the following:

a. *Distribution of Labels.* USPS Returns service labels may be distributed to customers via the following:

*[Add new item a6 to read as follows:]*

6. Through USPS Label Delivery Service under 507.12.0.

\* \* \* \* \*

**3.2 Additional Standards**

Additional mailing standards applicable to each service option are as follows:

*[Revise the last sentence of item a to read as follows:]*

a. \* \* \* Commercial prices are the same as for outbound Priority Mail in Notice 123—Price List.

\* \* \* \* \*

**4.0 Parcel Return Service**

*[Delete the text under 4.0 in its entirety (4.1 through 4.3) and add new text under 4.0 to read as follows:]*

Parcel Return Service (PRS) applies to parcels that are picked up in bulk by authorized permit holders or their agents. Parcel Return Service is only available through a Negotiated Service Agreement (NSA) (709.1.0). Please contact a USPS Sales Representative for additional details.

\* \* \* \* \*

**507 Mailer Services**

\* \* \* \* \*

**5.0 Package Intercept**

\* \* \* \* \*

**5.2 Postage and Fees**

*[Revise the third sentence in the introductory text of 5.2 to read as follows:]*

\* \* \* The new Priority Mail piece is charged Priority Mail commercial prices from the location where intercepted to the new destination based on the dimensions, weight, and zone of the piece or the flat rate price, if applicable, along with any applicable extra services fees. \* \* \*

\* \* \* \* \*

**7.0 Pickup on Demand Service****7.1 Postage and Fees****7.1.1 Postage**

*[Revise the text of 7.1.1 to read as follows:]*

The correct amount of postage must be affixed to each piece except for a Priority Mail Express label paid with a corporate account, packages with a USPS Returns label affixed (under 505.3.0), and manifest mailings paid by permit imprint indicia approved by Business Mailer Support (BMS).

\* \* \* \* \*

**7.2 Basic Standards****7.2.1 Availability**

\* \* \* Incidental amounts of other postage-affixed, full-price mail also may be collected when Pickup on Demand service is provided for:

\* \* \* \* \*

*[Delete item i, Parcel Return Service, and renumber items j through n as items i through m.]*

\* \* \* \* \*

*[Add new 12.0 to read as follows:]*

**12.0 USPS Label Delivery Service****12.1 Description**

USPS Label Delivery Service provides customers with an option to have the Postal Service print and deliver their domestic outbound and return mailing labels for a fee per label at a Post Office where available. USPS Label Delivery Service is not available for APO/FPO/DPO addresses. Customers requesting USPS Label Delivery Service will be provided the tracking information for tracking purposes.

**12.2 Eligibility**

USPS Label Delivery Service is available as follows:

a. Retail and Commercial Priority Mail Express and Priority Mail.

b. First-Class Package Service—Retail.

c. First Class Package Service—Commercial.

- d. USPS Retail Ground.
- e. Parcel Select Ground.
- f. USPS Returns Service.

### 12.3 Extra Services

There are no extra services available with labels requested through USPS Label Delivery Service.

### 12.4 Requesting USPS Label Delivery Service

A customer may request USPS Label Delivery Service at *www.usps.com*.

### 12.5 Fee

The USPS Label Delivery Service fee is listed in Notice 123—Price List.

## 600 Basic Standards for All Mailing Services

### 602 Addressing

#### 1.0 Elements of Addressing

#### 1.5.3 Required Use of Return Addresses

The sender's domestic return address must appear legibly on:

*[Revise the text of item q to read as follows:]*

- q. USPS Returns service.

### 604 Postage Payment Methods and Refunds

#### 9.0 Exchanges and Refunds

#### 9.2 Postage and Fee Refunds

##### 9.2.3 Full Refund

A full refund (100 percent) may be made when:

*[Add new item "o" to read as follows:]*

o. For USPS Label Delivery Service the Postal Service will refund the postage and USPS Label Delivery Service fee when the label was not delivered. The Postal Service will refund the postage only if the label is delivered and not used.

### 608 Postal Information and Resources

### 608 Postal Information and Resources

## 7.0 Trademarks and Copyrights of the USPS

### 7.1 USPS Trademarks

\* \* \* Information on USPS trademarks can be found on *USPS.com* or by contacting General Counsel, USPS Headquarters (see 8.1 for address).

*[Delete "Commercial Base" and Commercial Plus" from the list of trademarks under 7.1.]*

### 9.0 Postal Zones

#### 9.2 Application

Zones are used to compute postage on zoned mail sent between 3-digit ZIP Code areas, including Military Post Offices (MPOs), as follows:

*[Revise the text of item c to read as follows:]*

c. The postage price for zoned mail mailed at or addressed to an MPO and transported directly to or from MPOs at Department of Defense expense, without transiting any of the 48 contiguous states (including the District of Columbia), is the applicable zone 1 price. If such mail transits any area served by the USPS at USPS expense and the distance from the place of mailing to the embarkation point or from the debarkation point to the place of delivery is more than zone 1 for such mail, postage is assessed by the distance from the place of mailing to the embarkation point or from the debarkation point to the place of delivery of such mail, as the case may be.

*[Revise the headings of 9.4 and 9.4.1 to read as follows:]*

#### 9.4 Definition

##### 9.4.1 Local

Local applies to USPS Connect Local and USPS Connect Local Mail pieces deposited at any Post Office for delivery to addresses within the delivery area of that Post Office. For various types of Post Offices, local applies to all mail that both originates and destines within:

*[Revise the heading and introductory text of 9.4.2 to read as follows:]*

##### 9.4.2 Zones

Zones are defined as follows:  
*[Revise the text of item a to read as follows:]*

a. The zone 1 price applies to pieces mailed within the same 3 Digit O/D

Pairs. The zone 1 price also includes pieces mailed with different 3 Digit O/D Pairs, whose centroids are up to 50 miles in distance.

### 10.0 Forms of Identification

### 10.2 Products and Services Requiring Acceptable Identification

#### Exhibit 10.2 Products and Services Requiring Acceptable Identification

*[Revise Exhibit 10.2 by deleting the "Parcel Return Service" line item.]*

### 10.3 Acceptable Primary Forms of Photo Identification

#### Exhibit 10.3 Acceptable Primary Forms of Photo Identification per Product and Service

*[Revise Exhibit 10.3 by deleting the "Parcel Return Service" line item.]*

### 700 Special Standards

### 705 Advanced Preparation and Special Postage Payment Systems

### 18.0 Priority Mail Express Open and Distribute and Priority Mail Open and Distribute

#### 18.1 Prices and Fees

##### 18.1.1 Basis of Price

The basis of price for Priority Mail Express and Priority Mail Open and Distribute is as follows:

*[Revise the text of item b to read as follows:]*

b. Priority Mail commercial tray box postage is based on the tray box and zone. The maximum weight for each container is 70 pounds.

### Index

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 52

[EPA–R01–OAR–2016–0166; FRL–10414–01–R1]

#### Air Plan Approval; Connecticut; Plan Submittals for the 2008 Ozone National Ambient Air Quality Standard; Correction

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule; correction.

**SUMMARY:** The Environmental Protection Agency (EPA) is correcting a final rule that was published in the **Federal Register** on October 1, 2018, which became effective on October 31, 2018. The final rule approved State Implementation Plan (SIP) revisions submitted by the State of Connecticut to address SIP revisions submitted to meet moderate area nonattainment requirements for the 2008 ozone standard. The SIP revisions are for the Greater Connecticut and the Connecticut portion of the New York-Northern New Jersey-Long Island, NY–NJ–CT moderate ozone nonattainment areas, and include these areas 2011 base year emissions inventories, an

emissions statement certification, reasonable further progress (RFP) demonstrations, reasonably available control measures (RACM) analyses, motor vehicle emissions budgets, and contingency measures. This correction does not change any final action taken by EPA on October 1, 2018; today’s action merely corrects the Clean Air Act (CAA) citation for moderate area contingency measures. We have determined that there is good cause for making today’s rule final without prior proposal and opportunity for comment because we are merely correcting an incorrect citation in a previous action. Thus, notice and public procedure are unnecessary.

**DATES:** This rule became effective on October 31, 2018.

**ADDRESSES:** EPA has established a docket for this action under Docket Identification No. EPA–R01–OAR–2016–0166. All documents in the docket are listed on the <https://www.regulations.gov> website. Although listed in the index, some information is not publicly available, *i.e.*, CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available at <https://www.regulations.gov> or at the U.S. Environmental Protection Agency, EPA Region 1 Regional Office, Air and Radiation Division, 5 Post Office Square—Suite 100, Boston, MA. EPA requests that if at all possible, you contact the contact listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office’s official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m., excluding legal holidays and facility closures due to COVID–19.

**FOR FURTHER INFORMATION CONTACT:** Bob McConnell, Environmental Engineer, Air Quality Planning Unit, Air Programs Branch (Mail Code OEP05–02), U.S. Environmental Protection Agency, Region 1, 5 Post Office Square, Suite 100, Boston, Massachusetts, 02109–3912; (617) 918–1046; [mcconnell.robert@epa.gov](mailto:mcconnell.robert@epa.gov).

**SUPPLEMENTARY INFORMATION:** We find that this constitutes good cause under 5 U.S.C. 553(b)(B).

In FR doc. 2018–21150 appearing on page 49297 at 83 FR 49297 in the **Federal Register** of October 1, 2018, the following correction to the regulatory text is made:

#### § 52.377 [Corrected]

On page 49298, in the second column, in § 52.377, in amendment 2, correct paragraph (t) *Approval*, to read as follows:

(t) *Approval*. Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on January 17, 2017, September 5, 2017, and August 8, 2017, to meet, in part, requirements of the 2008 ozone NAAQS. These revisions satisfy the rate of progress requirement of section 182(b) through 2017, the contingency measure requirements of section 172(c)(9), the emission statement requirements of section 182(a)(3)(B), and the reasonably available control measure requirement of section 172(c)(1) for the Connecticut portion of the New York-Northern New Jersey-Long Island, NY–NJ–CT area, and the Greater Connecticut moderate ozone nonattainment areas. The January 17, 2017 revision establishes motor vehicle emissions budgets for 2017 of 15.9 tons per day of VOC and 22.2 tons per day of NO<sub>x</sub> to be used in transportation conformity in the Greater Connecticut moderate ozone nonattainment area. The August 8, 2017 revision establishes motor vehicle emissions budgets for 2017 of 17.6 tons per day of VOC and 24.6 tons per day of NO<sub>x</sub> to be used in transportation conformity in the Connecticut portion of the New York-Northern New Jersey-Long Island, NY–NJ–CT moderate ozone nonattainment area.

Dated: November 4, 2022.

David Cash,

Regional Administrator, EPA Region 1.

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 52

[EPA–R04–OAR–2022–0219; FRL–9911–02–R4]

#### Air Plan Approval; Mississippi; Revision of Excess Emissions Provisions

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** The Environmental Protection Agency (EPA) is approving a State Implementation Plan (SIP) revision submitted by the Mississippi Department of Environmental Quality (MDEQ) on November 17, 2016, on

behalf of the State of Mississippi. The revision was submitted in response to EPA's SIP Call published on June 12, 2015, concerning excess emissions during startup, shutdown, and malfunction (SSM) events. EPA is approving the SIP revision and finds that such SIP revision corrects the deficiencies identified in the June 12, 2015, SIP Call.

**DATES:** This rule is effective December 19, 2022.

**ADDRESSES:** EPA has established a docket for this action under Docket Identification No. EPA-R04-OAR-2022-0219. All documents in the docket are listed on the [www.regulations.gov](http://www.regulations.gov) website. Although listed in the index, some information may not be publicly available, *i.e.*, Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through [www.regulations.gov](http://www.regulations.gov) or in hard copy at the Air Regulatory Management Section, Air Planning and Implementation Branch, Air and Radiation Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW, Atlanta, Georgia 30303-8960. EPA requests that if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday 8:30 a.m. to 4:30 p.m., excluding Federal holidays.

**FOR FURTHER INFORMATION CONTACT:** D. Brad Akers, Air Regulatory Management Section, Air Planning and Implementation Branch, Air and Radiation Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW, Atlanta, Georgia 30303-8960. Mr. Akers can be reached via electronic mail at [akers.brad@epa.gov](mailto:akers.brad@epa.gov) or via telephone at (404) 562-9089.

**SUPPLEMENTARY INFORMATION:**

**I. Background**

On June 7, 2022, EPA proposed to approve MDEQ's November 17, 2016, SIP revision. *See* 87 FR 34609. In that notice of proposed rulemaking (NPRM), EPA also proposed to determine that the SIP revision corrects the deficiency with respect to Mississippi that the Agency identified in the June 12, 2015, action titled "State Implementation Plans: Response to Petition for Rulemaking; Restatement and Update of EPA's SSM Policy Applicable to SIPs; Findings of Substantial Inadequacy; and SIP Calls to

Amend Provisions Applying to Excess Emissions During Periods of Startup, Shutdown, and Malfunction" ("2015 SSM SIP Action"). *See* 80 FR 33839 (June 12, 2015). The reasons for the proposed approval and determination are stated in the proposed action (87 FR 34609, June 7, 2022) and will not be restated here. The public comment period for EPA's proposed approval and determination ended on July 7, 2022. EPA received one set of comments in a joint letter submitted by the Sierra Club and the Environmental Integrity Project (hereinafter collectively referred to as the commenter) on this date. The comments are available in the docket for this action.

**II. Response to Comments**

EPA will not address the comments that express support for the proposed action. Instead, this section of the rulemaking will focus on the portions of the July 7, 2022, letter which did not support the proposed action or which called on EPA to provide advice to the State.

*a. Rule 1.10.B(1) Is Not Approvable*

*Comment 1:* The commenter asserts that Rule 1.10.B(1) is not fully approvable as included in the November 17, 2016, submittal. Specifically, the commenter states that as a standalone provision, paragraph B(1) could be read to impermissibly exempt sources from otherwise applicable SIP emission limits. Paragraph B(1) states, "Startups and shutdowns are part of normal source operation. Emission limitations apply during startups and shutdowns unless source-specific emission limitations or work practice standards for startups and shutdowns are defined by an applicable rule, regulation, or permit." The commenter goes on to note EPA's past comments on the proposed changes to Rule 1.10.B in 2016 during prehearing review, which stated that EPA was "concerned that this provision appears to provide that an 'applicable rule, regulation, or permit' that is not approved into the SIP might contain limitations that apply during startups and shutdowns *in lieu of an applicable SIP limit*" (emphasis in original).

The commenter points to EPA's analysis in the June 7, 2022, NPRM which states that Rule 1.10.B(1) and B(2) "taken together" sufficiently address the finding of substantial inadequacy in the final 2015 SSM SIP Action, and argues that to ensure Rule 1.10.B(1) is administered correctly, EPA should conditionally approve the SIP revision pursuant to Clean Air Act (CAA) section 110(k)(4), requiring Mississippi to submit, within one year

of the effective date of the final conditional approval, a corrective SIP revision. According to the commenter, the corrective revision should either remove Rule 1.10.B(1) or replace the phrase "defined by an applicable rule, regulation, or permit" with "defined by an applicable SIP provision or permit as provided in section 1.10.B(2)(d) below."

*Response 1:* EPA disagrees that Rule 1.10.B(1) is not approvable as transmitted in the November 17, 2016, SIP submittal. As MDEQ notes in its SIP revision responding to EPA's September 16, 2016, comment letter, the regulatory language must be read in conjunction with other air program regulations.<sup>1</sup> Specifically, the language at Rule 1.10.B(1) correctly acknowledges that "source specific emission limitations or work practice standards for startups and shutdowns" may be established in applicable rules, regulations, or permits. First, MDEQ has the ability to establish emission limitations via new or revised regulatory requirements at 11 MAC, Part 2, Chapter 1, *Air Emission Regulations for the Prevention, Abatement, and Control of Air Contaminants*, or Chapter 11, *Regulations for Ambient Air Quality Nonattainment Areas*, where MDEQ could consider whether any specific alternative emission limitations (AELs) would be justifiable for startups and/or shutdowns.

Next, MDEQ has the ability to establish emission limits in permits pursuant to its program at 11 MAC, Part 2, Chapter 2, *Permit Regulations for the Construction and/or Operation of Air Emissions Equipment*, where MDEQ could consider establishing specific AELs for startups and/or shutdowns. Pursuant to Rule 1.10.B(2), alternatives to existing SIP emission limits in any such permits are not effective until MDEQ adopts the alternatives into Rule 1.10.B, MDEQ submits them to EPA for approval and inclusion in the SIP, and EPA approves them into the SIP.

Other possible sources of an "applicable rule [or] regulation" are the New Source Performance Standards (NSPS) at 40 CFR part 60 and the National Emissions Standards for Hazardous Air Pollutants (NESHAP) at 40 CFR part 63,<sup>2</sup> which MDEQ incorporates by reference at 11 MAC, Part 2, Chapter 1, Rule 1.6, *New Sources*, at 1.6.C and Rule 1.8, *Provisions for Hazardous Air Pollutants*,

<sup>1</sup> MDEQ's response to EPA's September 16, 2016, comment letter on the prehearing version of the regulatory changes is part of the November 17, 2016, SIP submittal available in the docket for this action.

<sup>2</sup> The NESHAP are found at 40 CFR parts 61 and 63, with NESHAP promulgated after 1990 found at part 63.

at 1.8.A, respectively. Several of the NSPS and NESHAP include AELs that “impose different numerical levels during different modes of source operation or impose emission limitations that are composed of a combination of a numerical limitation during some modes of operation and a specific technological control requirement or work practice requirement during other modes of operation” such as startup and shutdown. *See* 80 FR 33839, 33889 (June 12, 2015). Rule 1.10.B(1) accurately acknowledges that as to applicable emission limits in general, the limits will apply during startup and shutdown periods unless some applicable rule, regulation or permit specifies different requirements for those periods. EPA interprets this to mean that those other limits cannot replace or relax the SIP emission limit without EPA approval via a SIP revision that meets CAA requirements.

Our interpretation stems from MDEQ’s assertion in its SIP revision that the ability to establish AELs during startups and shutdowns does not mean that alternatives to any SIP emission limits can be established via the rules, regulations, or permit requirements without a SIP revision. In response to EPA’s comment letter, MDEQ revised its Rule 1.10.B(2) to provide greater clarity that any specific AELs established by rules, regulations, or permits not yet incorporated into the SIP and applicable to startups and/or shutdowns would not replace any existing SIP emission limit for those periods of operation unless and until the AELs were approved into the SIP. Specifically, Rule 1.10.B(2)(d) provides, “Following permit issuance, the emission limitations or work practice standards are considered State-only requirements until they have been adopted into [Rule 1.10] and approved by the EPA into the SIP.” In this way, Rule 1.10.B(2) operates in conjunction with B(1) to explain what must happen in the context of providing alternatives to existing SIP emission limits.

*b. Rule 1.10.B(2) Should Not Only Consider a Source’s Existing Control Strategy*

*Comment 2:* Among factors MDEQ will consider in possibly establishing AELs for periods of startups and/or shutdowns, Rule 1.10.B(2)(a) provides, “The source must demonstrate that it is technically infeasible, considering its specific control strategy, to comply with existing SIP emission limitations during startups and shutdowns.” The commenter argues that the phrase “considering its specific control strategy” creates an “illogical loophole

that would allow sources with pollution controls that are outdated, undersized, not well maintained, not operated properly, or otherwise inadequate to claim technical infeasibility based on their controls, even though those sources, if properly designed, operated, and/or maintained, could comply with applicable SIP emission limits.”

The commenter points to EPA’s statement in the 2015 SSM SIP Action that “alternative requirements applicable to the source during startup and shutdown should . . . take into account considerations such as . . . the control technology that is feasible during startup and shutdown.” *See* 80 FR 33839, 33980 (June 12, 2015). The commenter states that EPA should conditionally approve the SIP revision pursuant to CAA section 110(k)(4), requiring Mississippi to submit, within one year of the effective date of the final conditional approval, a corrective SIP submission to remove the phrase “considering its specific control strategy.”

*Response 2:* EPA disagrees that Rule 1.10.B(2)(a) is not approvable as transmitted in the November 17, 2016, SIP submittal. Consideration of a specific control strategy is consistent with EPA guidance in the 2015 SSM SIP Action. Mississippi’s SIP requires that any potential AELs “be narrowly tailored and take into account considerations such as the technological limitations of the specific source category and the control technology that is feasible during startup and shutdown” as recommended by EPA. *See* 80 FR 33839, 33980. EPA’s restatement of the 1999 SSM Guidance in the 2015 SSM SIP Action includes the following two (of seven total) criteria recommended for developing a SIP revision with potential AELs: “(1) The revision is limited to specific, narrowly defined source categories using specific control strategies (*e.g.*, cogeneration facilities burning natural gas and using selective catalytic reduction); (2) Use of the control strategy for this source category is technically infeasible during startup or shutdown periods.” *Id.* Mississippi Rule 1.10.B(2) is consistent with these criteria, requiring at B(2)(c) that the AELs must be specific to the source and its particular control strategy, which EPA interprets as the control strategy that corresponds to the relevant narrowly defined source category (*e.g.*, cogeneration facilities burning natural gas and using selective catalytic reduction), and requiring at B(2)(a) a demonstration that the control strategy is technically infeasible during startup and shutdown periods.

Additionally, EPA does not agree that the language at Rule 1.10.B(2)(a), or EPA’s language in the 2015 SSM Action or the 1999 SSM Guidance, would necessarily limit such a demonstration to considering existing controls only. Rule 1.10.B(2)(a) makes no reference to actual installed equipment. This rule requires the source to demonstrate that its strategy for emissions control is not capable of achieving compliance during startup and shutdown, and such demonstration should be made based on an assumption of properly designed and maintained equipment as well as the control strategy’s suitability for the narrowly defined source category.

Moreover, EPA and the public will have an opportunity to evaluate any specific AELs, as they will be submitted as source-specific SIP revisions to act as alternatives to SIP emission limits. The record supporting any such AELs would show how the criteria at Rule 1.10.B(2) were satisfied.

*c. Numerical Emission Limits vs. Work Practice Standards*

*Comment 3:* The commenter states that EPA should clarify in its rulemaking record that “even for those sources (if any) that truly cannot meet normal limits during startup and shutdown, Rule 1.10.B(2) should in most cases establish alternative numerical limits, rather than allow for work practices.” The commenter references the 2015 SSM Action, 80 FR 33839, 33980, where EPA states: “In cases in which measurement of emissions during startup and/or shutdown is not reasonably feasible, it may be appropriate for an emission limitation to include as a component a control for startup and/or shutdown periods other than a numerically expressed emission limitation.” The commenter asserts that under EPA’s guidance, work practice standards are only appropriate during those periods where emissions cannot be measured. The commenter also states that EPA’s approval should include the guidance that numerical limits are preferable to work practice standards because they are the “most legally and practicably enforceable SIP requirements,” and cites to the 2015 SSM SIP Action, 80 FR 33839, 33974–75. The commenter goes on to state that for situations in which a work practice is appropriate, EPA should advise that pollution control equipment should be operated while fuel-burning equipment are burning primary fuels or when power plants are generating electricity, and that the SIP should require clean fuels to be burned until the point at which the pollution controls are engaged.

*Response 3:* EPA does not believe clarification is necessary regarding a preference for numerical emission limits versus work practice standards. In this action, EPA is evaluating the November 17, 2016, SIP revision in light of the 2015 SSM SIP Action. Rule 1.10.B(2) states that, where a source is unable to comply with an existing SIP emission limit, MDEQ will consider establishing “source specific emission limitations or work practice standards for startups and shutdowns” as alternatives to those SIP limits. As outlined in the June 7, 2022, NPRM, Rule 1.10.B(2) goes on to specify criteria that EPA believes to be appropriate in considering establishing either a numerical emission limit or a work practice standard to apply as an AEL. Provisions 1.10.B(2)(a)–(d) are consistent with the guidance criteria EPA has established for setting AELs, as discussed in the same section of the 2015 SSM SIP Action cited by the commenter.<sup>3,4</sup>

As EPA notes in the 2015 SSM SIP Action, SIP emission limitations “(i) do not need to be numerical in format; (ii) do not have to apply the same limitation (e.g., numerical level) at all times; and (iii) may be composed of a combination of numerical limitations, specific technological control requirements and/or work practice requirements, with each component of the emission limitation applicable during a defined mode of source operation.” See 80 FR 33839, 33889. Therefore, if MDEQ establishes AELs comprised of work practice standards in some part, pursuant to Rule 1.10.B(2), the emission limit overall “must be continuous, must meet applicable CAA stringency requirements, and must be legally and practically enforceable.” *Id.* Moreover, EPA and the public will have an opportunity to evaluate any specific AELs, as they will be submitted as source-specific SIP revisions to act as alternatives to SIP emission limits. At that time, EPA can evaluate the AELs in consideration of the criteria established in the SIP and the guidance referenced above.

Next, in the 2015 SSM SIP Action, EPA noted that “there *may be* sources for which a numerically expressed emission limitation is the most legally and practically enforceable,” (emphasis added) and that “there are many sources for which a numerically expressed

emission limitation will be the most appropriate and will result in the most legally and practically enforceable SIP requirements. However, . . . for some source categories, under some circumstances, it may be appropriate for the SIP emission limitation to include a specific technological control requirement or specific work practice requirement that applies during specified modes of source operation such as startup and shutdown.” See *id.* at 33974–75. Therefore, EPA disagrees that the approval of the November 17, 2016, SIP revision must include any additional guidance regarding a preference for numerical emission limits versus work practice standards.

Additionally, EPA does not agree with the commenter’s conclusion that the 2015 SSM SIP Action and EPA guidance would only find work practice standards appropriate when emissions measurements cannot be made during startup and/or shutdown. While the language referenced by the commenter suggests that work practice standards may be appropriate in cases in which measurement of emissions during startup or shutdown is not reasonably feasible, EPA does not assert that this is the only circumstance in which work practice standards may be utilized as part of a continuous emission limitation. Thus, EPA believes that a work practice standard could be a sufficient AEL in various other circumstances. The 2015 SSM SIP Action notes, for example, regarding sources of sulfur dioxide (SO<sub>2</sub>), “if the otherwise applicable numerical SO<sub>2</sub> emission limitation in the SIP is not achievable, and the otherwise required SO<sub>2</sub> control measure is not effective during startup and shutdown and/or measurement of emissions during startup and shutdown is not reasonably feasible, then it may be appropriate for that emission limitation to impose a different control measure, such as use of low sulfur coal, applicable during defined periods of startup and shutdown in lieu of a numerically expressed emission limitation.” See 80 FR 33839, 33975.

The 2015 SSM SIP Action goes on to discuss instances of where the Agency has established work practice standards as components of emission limits that are consistent with the definition of “emission limitation” or “emission standard” at CAA section 302(k), such as 40 CFR part 63, subpart UUUUU, *National Emission Standards for Hazardous Air Pollutants: Coal- and Oil-Fired Electric Utility Steam Generating Units*, and 40 CFR part 60, subpart Da, *Standards of Performance for Electric Utility Steam Generating*

*Units*. See *id.* at 33891. These examples are rules which require use of continuous emission monitoring systems, so measurement during periods of startup and/or shutdown would not necessarily be infeasible, and yet EPA chose to establish work practice standards as components of the emission limits applicable to these sources. For the reasons stated above, EPA believes that Mississippi’s November 17, 2016, SIP revision adequately addresses situations for which AELs may need to be established and appropriately notes that the AELs can take the form of a numerical emission limit or some work practice standard.

Finally, regarding potential work practice standards for fuel-burning equipment, EPA does not find it appropriate to speculate on any specific work practice requirements in absence of specific information on the source or source category. However, EPA notes that the Agency indicated regulations and technical materials supporting the NSPS and NESHAP could be helpful in developing emission limits or AELs and that definitions of startup and shutdown and work practices for those periods could be appropriate for incorporation into a SIP. See 80 FR 33839, 33980. Several of the suggestions for fuel-burning equipment made by the commenter are included in the NSPS and NESHAP, indicating that these could be appropriate components of work practice standards.<sup>5</sup> So, although some of the suggestions made by the commenter could be reasonable depending on the specific circumstances, they are not relevant to this action; EPA will address the contents of any proposed work practice standards in the source-specific SIP revisions that Mississippi submits to EPA for approval and incorporation into the SIP.

#### *d. Reporting of Compliance With Work Practice Standards*

*Comment 4:* The commenter states that Rule 1.10.B(2)(c)(iv) requires sources “only to document startup and shutdown events in contemporaneous logs and does not require sources to report to the MDEQ any information to assure that sources are complying with the requirements of the rule.” The commenter asserts that, as written, any work practice standards would not be practically enforceable by MDEQ, EPA, or citizens, and therefore, would not comply with CAA section 110(a)(2)(A). The commenter goes on to recommend

<sup>3</sup> See Memorandum to EPA Regional Administrators, Regions I–X from Steven A. Herman and Robert Perciasepe, USEPA, “State Implementation Plans: Policy Regarding Excess Emissions During Malfunctions, Startup, and Shutdown” (September 20, 1999). This is referred to as the 1999 SSM Guidance.

<sup>4</sup> See 80 FR 33839, 33980 (June 12, 2015).

<sup>5</sup> See, e.g., 40 CFR 60.42Da(e)(1)(ii), 40 CFR 63.7500, 40 CFR 63.9991(a)(1).

that EPA advise Mississippi that if work practices are selected for any sources, that MDEQ should “require the work-practice compliance information from the proposed rule to be reported by sources through, at the least, their quarterly Title V compliance reports.”<sup>6</sup>

*Response 4:* EPA disagrees that it is necessary to advise Mississippi regarding the reporting of work practice compliance information. CAA section 110(a)(2)(C) provides that the SIP shall include a program to provide for the enforcement of the measures described in section 110(a)(2)(A), including a permit program to regulate the construction and modification of stationary sources. Therefore, the permitting process can establish the means by which an emission limitation is enforceable, including recordkeeping and reporting requirements, particularly in the case of source-specific emission limits submitted for inclusion in the SIP. Generally, Rule 1.10.B(2)(d) provides that any source-specific emission limitations or work practice standards intended as an alternative to existing SIP emission limits must be established in a permit issued pursuant to 11 MAC Part 2, Chapter 2, and then submitted to EPA for incorporation into the SIP. MDEQ’s Rule 2.2, *General Standards Applicable to All Permits*, and Rule 2.9, *Recordkeeping and Reporting*, provide that the permit board in Mississippi has the authority to establish requirements for determining compliance with applicable requirements, including recordkeeping and reporting of necessary monitoring. EPA will review these permit conditions as part of any source-specific SIP revision and evaluate the adequacy of the AELs (including the practicable enforceability of any applicable work practice standards) pursuant to the CAA and EPA guidance.

Additionally, for any major sources, facilities will also be subject to semiannual reporting, which would outline any deviations from permit requirements, and annual certification, pursuant to EPA’s title V regulations at 40 CFR part 70 and Mississippi’s federally approved title V program at 11 MAC Part 2, Chapter 6, *Air Emissions Operating Permit Regulations for Purposes of Title V of the Federal Clean Air Act*.<sup>7</sup> These reporting requirements

would include the information needed for determining compliance with any applicable source-specific work practices standards, including those that may be approved into the SIP. For example, 11 MAC Part 2, Chapter 2, Rule 6.3(C)(5) provides requirements for a “compliance certification with terms and conditions contained in the permit, including emission limitations, standards, or work practices,” consistent with 40 CFR 70.6(c)(5).

Furthermore, as stated in the NPRM, EPA considers the requirements of Rule 1.10.B(2) to be consistent with the seven criteria EPA has recommended for the development of AELs and that this provision is sufficient to guide the development of specific AELs. In the 2015 SSM SIP Action, EPA recommended that “to be approvable (*i.e.*, meet CAA requirements)” an AEL should be developed with seven specific criteria, including that it “requires that the owner or operator’s actions during startup and shutdown periods are documented by properly signed, contemporaneous operating logs or other relevant evidence.”<sup>8</sup> Mississippi’s Rule 1.10.B(2)(c)(iv) fulfills that recommendation by providing that “the source must document all startups and shutdowns using properly signed contemporaneous logs or other relevant evidence.”

#### *e. Definitions of Startup and Shutdown*

*Comment 5:* The commenter states that EPA should require Mississippi to more narrowly define “startup” and “shutdown” in Rule 1.2, *Definitions*. The commenter asserts that these definitions are vague and would allow for unlimited periods of startup or shutdown. As an example, the commenter claims that the term “operation,” as used in the definitions of these two terms, is ambiguous. The commenter states that the terms must be specific and narrowly tailored, citing to a section of EPA’s 2015 SSM SIP Action that addresses the seven criteria EPA developed in the 1999 SSM Guidance and clarified in the 2015 SSM SIP Action, for approval of alternative emissions limits. The commenter then claims that it is preferable that “startup” be defined as beginning when primary fuel-burning sources start burning their primary fuel, and “shutdown” be defined as beginning when fuel-burning sources stop burning their primary fuel. The commenter closes by stating that CAA section 110(a)(2) would be violated if these definitions are not properly bounded.

*Response 5:* EPA disagrees that the Agency should require Mississippi to more narrowly define the terms “startup” and “shutdown” in its general definitions rule as part of this rulemaking. First, Rule 1.2, *Definitions*, is not part of the SIP call in EPA’s 2015 SSM Action and is not part of the SIP revision before EPA for consideration in this rulemaking.

Second, Mississippi’s definitions of startup and shutdown are consistent with the definitions used in the 2015 SSM SIP Action and are not inconsistent with 40 CFR part 51, which does not define these terms.<sup>9 10</sup> Mississippi’s definitions and those used in the 2015 SSM SIP Action are designed to generally convey what these modes of operation consist of and when they begin. As noted in the 2015 SSM Action, it may be appropriate in individual SIP provisions to include a specifically tailored definition to address a particular source category for a particular purpose. However, EPA does not believe that Mississippi’s definitions need to be further tailored because emission limits now apply during startup and shutdown periods, and sources must comply with those limits during startup and shutdown periods unless an AEL is approved. Presently, there are no specific AELs approved for periods of startup or shutdown in the SIP, and therefore, there are no current concerns about unlimited periods of startups or shutdowns.

Third, any future AELs will need to adequately define the modes of operation during which the AELs apply. The requirements of Rule 1.10.B(2) are consistent with the seven criteria EPA has recommended for the development of AELs—including the third criteria regarding minimizing the frequency and duration of startup and shutdown

<sup>9</sup> Mississippi defines “startup” at Rule 1.2.HH as, “[t]he bringing into operation from a non-operative condition. Relative to fuel-burning equipment, a startup shall be construed to occur only when a unit is taken from a non-fired to a fired state.” The 2015 SSM SIP Action defines “startup” as “generally, the setting in operation of a source for any reason. In this document, the EPA uses this term in the generic sense. In an individual SIP provision it may be appropriate to include a specifically tailored definition of this term to address a particular source category for a particular purpose.”

<sup>10</sup> Mississippi defines “shutdown” at Rule 1.2.CC as, “[t]he termination of operation of equipment. Relative to fuel-burning equipment, a shutdown shall be construed to occur only when a unit is taken from a fired to a non-fired state.” The 2015 SSM SIP Action defines “shutdown” as “generally, the cessation of operation of a source for any reason. In this document, the EPA uses this term in the generic sense. In individual SIP provisions it may be appropriate to include a specifically tailored definition of this term to address a particular source category for a particular purpose.”

<sup>6</sup> The commenter refers to quarterly title V compliance reports. EPA believes the commenter is referring to the requirement at 40 CFR 70.6(a)(3)(iii)(A) requiring the submittal of reports of any required monitoring at least every 6 months, *i.e.*, semiannually.

<sup>7</sup> See, *e.g.*, 40 CFR 70.6(a)(3)(iii)(A) and (c)(5), 11 MAC Part 2, Chapter 6, Rule 6.3(A)(3)(c)(1), and 11 MAC Part 2, Chapter 6, Rule 6.3(C)(5).

<sup>8</sup> See also the 1999 SSM Guidance.

modes<sup>11</sup>—and this rule is sufficient to guide the development of specific AELs. Specifically, Rule 1.10.B(2)(c)(i) states: “the source must limit the frequency and duration of startups and shutdowns to the greatest extent practicable.” Thus, MDEQ will establish the necessary requirements specific to the source in the permit or rule, including the boundaries of the startup and shutdown periods during which the AELs will apply. Subsequently, those conditions will be reviewed by EPA and the public through EPA’s proposed action to approve or disapprove the source-specific AELs replacing any applicable SIP emission limits for startups and/or shutdowns. EPA will review the contents of any source-specific SIP revision and evaluate the adequacy of the AELs (including the startup and shutdown parameters) pursuant to the CAA and EPA guidance.

Therefore, EPA disagrees that Mississippi must revise its current SIP-approved definitions of “startup” and “shutdown” included in Rule 1.2 and that these definitions are inconsistent with the CAA.

#### *f. Clarification of State-Only Versus SIP-Approved Requirements*

*Comment 6:* Regarding MDEQ’s revised rules at Rule 1.10.B generally, the commenter states that “EPA should advise Mississippi that it should help provide clarity for the public and regulated entities by including notes or parenthetical information in its published regulations about which requirements are state-only and which are SIP-approved.”

*Response 6:* EPA notes that this action clearly delineates which portions of Rule 1.10 are not approved into the SIP, including notation at 40 CFR 52.1270(c), and will ultimately also be reflected in the compilation of approved Mississippi rules available at EPA’s website.<sup>12</sup> Regarding any further notation that MDEQ may elect to include in the portions of the rules which are state-only, EPA has no authority to prescribe such alterations of the text. Therefore,

this comment is outside the scope of this action.

### III. Final Action

EPA is approving Mississippi’s November 17, 2016, SIP submission revising Rule 1.10.B, *Startups and Shutdowns*, and requesting removal of Rule 1.10.A, *Upsets*, Rule 1.10.B(3), and Rule 1.10.C, *Maintenance*, from the Mississippi SIP-approved version of Rule 1.10, *Provisions for Upsets, Startups, and Shutdowns*. EPA has also determined that this SIP revision corrects the deficiency identified in the 2015 SSM SIP Action. Mississippi is retaining Rules 1.10.A and Rule 1.10.B(3) for state law purposes only, with changes to clarify that the upset provisions of Rule 1.10.A apply to enforcement actions by the State (specifically, the Mississippi Commission on Environmental Quality) only and “are not intended to prohibit EPA or third-party enforcement actions.”<sup>13</sup> See 87 FR 34609.

### IV. Incorporation by Reference

In this document, EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, as discussed in Sections I and II of this preamble, EPA is finalizing the incorporation by reference of 11 Mississippi Administrative Code, Part 2, Chapter 1, Rule 1.10, *Provisions for Upsets, Startups, and Shutdowns*, state effective December 10, 2016, except for Rule 1.10.A and 1.10.B(3), which MDEQ is not requesting EPA to incorporate into the SIP. EPA has made, and will continue to make, these materials generally available through [www.regulations.gov](http://www.regulations.gov) and at the EPA Region 4 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information). Therefore, these materials have been approved by EPA for inclusion in the SIP, have been incorporated by reference by EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of EPA’s approval, and will be incorporated by reference in the next update to the SIP compilation.<sup>14</sup>

### V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. See 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA’s role is to approve state choices, provided that they meet the criteria of the CAA. This action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9,

<sup>11</sup> The third criteria states, “[t]he alternative emission limitation requires that the frequency and duration of operation in startup or shutdown mode are minimized to the greatest extent practicable.” See 80 FR 33839, 33980.

<sup>12</sup> This website is located at <https://www.epa.gov/sips-ms/epa-approved-statutes-and-regulations-mississippi-sip>. It is a sub-site of the website titled “Approved Air Quality Implementation Plans in Mississippi,” located at <https://www.epa.gov/sips-ms>, which is a sub-site of the website titled “Approved Air Quality Implementation Plans in Region 4,” located at <https://www.epa.gov/air-quality-implementation-plans/approved-air-quality-implementation-plans-region-4>.

<sup>13</sup> Additionally, the existing Rule 1.10.B(3) is being removed from the SIP as requested, and the revised Rule 1.10.B(3) is not being requested for SIP approval, as the revised provision simply provides that “upset” provisions at Rule 1.10.A apply if an upset occurs during periods of startup and shutdown.

<sup>14</sup> See 62 FR 27968 (May 22, 1997).

2000), nor will it impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 17, 2023. Filing a

petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. *See* section 307(b)(2).

#### List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: November 10, 2022.

**Daniel Blackman,**  
*Regional Administrator, Region 4.*

For the reasons stated in the preamble, the EPA amends 40 CFR part 52 as follows:

## PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

**Authority:** 42 U.S.C. 7401 *et seq.*

### Subpart Z—Mississippi

■ 2. In § 52.1270(c), amend the table by revising the entry for “Rule 1.10,” under the center heading “11 MAC Part 2—Chapter 1 Air Emission Regulations for the Prevention, Abatement, and Control of Air Contaminants,” to read as follows:

#### § 52.1270 Identification of plan.

\* \* \* \* \*

(c) \* \* \*

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 131

[EPA–HQ–OW–2015–0174; FRL–7253.1–02–OW]

**RIN 2040–AG21**

### Restoring Protective Human Health Criteria in Washington

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** On April 1, 2022, the Environmental Protection Agency (EPA) determined that Washington’s human

health criteria (HHC) for certain pollutants were not protective of Washington’s designated uses and were not based on sound scientific rationale and, accordingly, proposed to restore protective HHC for those pollutants in Washington’s waters. EPA is finalizing protective and science-based Federal HHC in this final rule to protect Washington’s waters, including waters where tribes hold treaty-reserved rights to fish.

**DATES:** This final rule is effective on December 19, 2022.

**ADDRESSES:** EPA has established a docket for this action under Docket ID No. EPA–HQ–OW–2015–0174. All documents in the docket are listed on the <https://www.regulations.gov> website. Although listed in the index, some information is not publicly available, *e.g.*, Confidential Business

Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available electronically through <https://www.regulations.gov>.

#### FOR FURTHER INFORMATION CONTACT:

Erica Fleisig, Office of Water, Standards and Health Protection Division (4305T), Environmental Protection Agency, 1200 Pennsylvania Avenue NW, Washington, DC 20460; telephone number: (202) 566–1057; email address: [fleisig.eric@epa.gov](mailto:fleisig.eric@epa.gov).

**SUPPLEMENTARY INFORMATION:** This final rule is organized as follows:

#### I. General Information

- Does this action apply to me?
- How did EPA develop this final rule?

- II. Background

A. Statutory and Regulatory Background

B. EPA’s General Approach for Deriving Human Health Criteria

C. Prior EPA Actions Related to Washington’s Human Health Criteria

III. Derivation of Human Health Criteria for Washington

A. Scope of EPA’s Final Rule

B. Washington-Specific Human Health Criteria Inputs

C. Final Human Health Criteria for Washington

D. Applicability

E. Alternative Regulatory Approaches and Implementation Mechanisms

IV. Economic Analysis

A. Identifying Affected Entities

B. Method for Estimating Costs

C. Results

V. Statutory and Executive Order Reviews

A. Executive Order 12866: Regulatory Planning and Review and Executive
- Order 13563: Improving Regulation and Regulatory Review

B. Paperwork Reduction Act (PRA)

C. Regulatory Flexibility Act (RFA)

D. Unfunded Mandates Reform Act

E. Executive Order 13132: Federalism

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

H. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution, or Use

I. National Technology Transfer and Advancement Act of 1995

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

K. Congressional Review Act (CRA)

I. General Information

A. Does this action apply to me?

Entities that are subject to Clean Water Act (CWA) regulatory programs such as industrial facilities, stormwater management districts, or publicly owned treatment works (POTWs) that discharge pollutants to surface waters of the United States under the State of Washington’s jurisdiction could be affected by this rulemaking because the Federal water quality standards (WQS) promulgated by EPA are applicable WQS for surface waters in Washington for CWA purposes. Categories and entities that could potentially be affected by this rulemaking include the following:

| Category                         | Examples of potentially affected entities   |
|----------------------------------|---|
| Industry .....                   | Industrial point sources discharging pollutants to waters of the United States in Washington.                             |
| Municipalities .....             | Publicly owned treatment works or similar facilities discharging pollutants to waters of the United States in Washington. |
| Stormwater Management Districts. | Entities responsible for managing stormwater in the State of Washington.  |

This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities that could be indirectly affected by this action. If you have questions regarding the applicability of this action to a particular entity, consult the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

B. How did EPA develop this final rule?

In developing this final rule, EPA carefully considered the public comments and feedback received from interested parties. EPA provided a 60-day public comment period after publishing the proposed rulemaking in the **Federal Register** on April 1, 2022.<sup>1</sup> In addition, EPA held two online public hearings on May 24 and 25, 2022, to discuss the contents of the proposed rulemaking and accept verbal public comments.

Over 20 organizations and individuals submitted comments on a range of issues. EPA also received over 300 letters from individuals associated with a mass letter writing campaign. Some comments addressed issues beyond the scope of the rulemaking, and thus EPA did not consider them in finalizing this rule. In this preamble, EPA provides summaries of certain comments received on aspects of the proposal that generated the most commenter interest.

<sup>1</sup> See *Restoring Protective Human Health Criteria in Washington: Proposed Rule*, 87 FR 19046, April 1, 2022.

For a complete summary of all comments received and EPA’s responses, see EPA’s Response to Comments document in the official public docket.

II. Background

A. Statutory and Regulatory Background

CWA section 101(a)(2) establishes as a national goal “water quality which provides for the protection and propagation of fish, shellfish, and wildlife, and recreation in and on the water, wherever attainable.” EPA interprets these CWA section 101(a)(2) goals to include, at a minimum, designated uses providing for the protection of aquatic communities and human health related to consumption of fish and shellfish.<sup>2</sup>

Consistent with the CWA, EPA’s WQS program assigns to states and authorized tribes the primary authority for adopting WQS.<sup>3</sup> CWA section 303(c)(2)(A) and EPA’s implementing regulations at 40 CFR part 131 require, among other things, that a state’s WQS specify appropriate designated uses of the waters, and water quality criteria that protect those uses. EPA’s regulations at 40 CFR 131.11(a)(1) provide that “[s]uch criteria must be based on sound

<sup>2</sup> USEPA. 2000. Memorandum 1BWQSP–00–03. U.S. Environmental Protection Agency, Office of Water, Washington, DC, <https://www.epa.gov/sites/production/files/2015-01/documents/standards-shellfish.pdf>.

<sup>3</sup> 33 U.S.C. 1313(a), (c).

scientific rationale and must contain sufficient parameters or constituents to protect the designated use. For waters with multiple use designations, the criteria shall support the most sensitive designated use.”

Under CWA section 304(a), EPA periodically publishes criteria (including HHC) recommendations for states to consider when adopting water quality criteria for particular pollutants to protect CWA section 101(a) goal uses. Where EPA has published recommended criteria, states should establish numeric water quality criteria based on EPA’s CWA section 304(a) criteria recommendations, CWA section 304(a) criteria recommendations modified to reflect site-specific conditions, or other scientifically defensible methods (40 CFR 131.11(b)(1)).

After a state adopts a new or revised WQS, the state must submit it to EPA for review and action in accordance with CWA section 303(c).<sup>4</sup> If EPA determines that a state’s new or revised WQS is not consistent with the requirements of the Act, the state has 90 days to submit a modified standard. If the state fails to adopt a revised WQS that EPA approves, CWA section 303(c)(4)(A) requires EPA to propose and promulgate a revised or new standard for the waters involved. In addition, CWA section 303(c)(4)(B) grants the EPA Administrator discretion

<sup>4</sup> 33 U.S.C. 1313(c)(2)(A), (c)(3).

to determine “that a revised or new standard is necessary to meet the requirements of [the Act].”<sup>5</sup> After making such a determination, known as an Administrator’s Determination,<sup>6</sup> the agency must “promptly” propose an appropriate WQS and finalize it within ninety days unless the state adopts an acceptable standard in the interim.<sup>7</sup>

#### B. EPA’s General Approach for Deriving Human Health Criteria

EPA’s 2000 *Methodology for Deriving Ambient Water Quality Criteria for the Protection of Human Health*<sup>8</sup> (2000 Methodology) describes the methods EPA uses when developing national CWA section 304(a) recommended HHC and when promulgating Federal HHC. The 2000 Methodology also serves as guidance to states and authorized tribes for developing their own HHC. EPA’s guidance informs, but does not dictate, EPA’s implementation of the applicable statutory and regulatory requirements noted above. EPA’s 2000 Methodology recommends that HHC be designed to reduce the risk of adverse cancer and non-cancer effects occurring from lifetime exposure to pollutants through the ingestion of drinking water and consumption of fish/shellfish obtained from inland and nearshore waters. Consistent with the 2000 Methodology, EPA’s practice is to establish a criterion for both drinking water ingestion and consumption of fish/shellfish from inland and nearshore waters combined and a separate criterion based on ingestion of fish/shellfish from inland and nearshore waters alone. This latter criterion applies in cases where the designated uses of a waterbody include supporting fish/shellfish for human consumption but not drinking water supply sources (e.g., non-potable estuarine waters).

Consistent with EPA’s 2000 Methodology, EPA establishes HHC based on two types of toxicological endpoints: (1) carcinogenicity; and (2) noncancer toxicity (i.e., all adverse effects other than cancer). Where sufficient data are available, EPA derives criteria using both carcinogenic and non-carcinogenic toxicity endpoints and uses the lower (i.e., more health-protective) value. EPA calculates HHC for carcinogenic effects using the

following input parameters: cancer slope factor (CSF), cancer risk level (CRL), body weight, drinking water intake rate, fish consumption rate (FCR), and a bioaccumulation factor(s). EPA calculates HHC for both non-cancer and nonlinear carcinogenic effects using a reference dose (RfD) and relative source contribution (RSC) in place of a CSF and CRL (the remaining inputs are the same for both toxicology endpoints). The RSC is applied to apportion the RfD among the media and exposure routes of concern for a particular chemical to ensure that an individual’s total exposure from all exposure sources does not exceed the RfD. Each of these inputs is discussed in more detail in sections II.B.a through II.B.d of this preamble and in EPA’s 2000 Methodology.<sup>9</sup>

#### a. Cancer Risk Level

Consistent with the 2000 Methodology, EPA generally assumes, in the absence of data to indicate otherwise, that carcinogens exhibit linear “non-threshold” dose-responses which means that there are no “safe” or “no-effect” levels. Therefore, EPA calculates HHC for carcinogenic effects as pollutant concentrations corresponding to lifetime increases in the risk of developing cancer. EPA calculates HHC values at a  $10^{-6}$  (one in one million) CRL and recommends that states and authorized tribes use CRLs of  $10^{-6}$  or  $10^{-5}$  (one in one hundred thousand) when deriving HHC for the general population.<sup>10</sup> EPA notes that states and authorized tribes can also choose a more health protective risk level, such as  $10^{-7}$  (one in ten million), when deriving HHC.

#### b. Cancer Slope Factor and Reference Dose

A dose-response assessment is required to understand the quantitative relationships between exposure to a pollutant and adverse health effects. EPA evaluates dose-response relationships based on the available data from animal toxicity and human epidemiological studies to derive dose-response metrics. For carcinogenic effects, EPA uses an oral CSF to derive the HHC. The oral CSF is an upper bound, approximating a 95 percent confidence limit, on the increased cancer risk from a lifetime oral exposure to a pollutant. For non-carcinogenic effects, EPA uses the reference dose

(RfD) to calculate the HHC. A RfD is an estimate of a daily oral exposure of an individual to a substance that is likely to be without an appreciable risk of deleterious effects during a lifetime. A RfD is often derived from a laboratory animal toxicity multi-dose study from which a no-observed-adverse-effect level (NOAEL), lowest-observed-adverse-effect level (LOAEL), or benchmark dose level can be identified. However, human epidemiology studies can also be used to derive a RfD. Uncertainty factors are applied to account for gaps or deficiencies in the available data (e.g., differences in response among humans) for a chemical. For the majority of EPA’s latest (2015) updated national CWA section 304(a) recommended HHC, EPA’s Integrated Risk Information System (IRIS)<sup>11</sup> was the source of both cancer and noncancer toxicity values (i.e., RfD and CSF).<sup>12</sup> For some pollutants, EPA selected risk assessments produced by other EPA program offices (e.g., Office of Pesticide Programs, Office of Water, Office of Land and Emergency Management), other national and international programs, and state programs.

#### c. Exposure Assumptions

EPA’s exposure assumptions provide an overall level of protection targeted at the high end of the general population, as stated in the 2000 Methodology. EPA selects a combination of high-end and central tendency inputs to the criteria derivation equation and avoids “double counting” of exposures and combining unlikely co-occurrences. Consistent with the 2015 national CWA section 304(a) recommended HHC, EPA uses a default drinking water intake rate of 2.4 liters per day (L/day) and default rate of 22 grams per day (g/day) for consumption of fish and shellfish from inland and nearshore waters, multiplied by pollutant-specific bioaccumulation factors (BAFs) to account for the amount of the pollutant in the edible portions of the ingested species.

EPA’s national default drinking water intake rate of 2.4 L/day represents the per capita estimate of combined direct and indirect community water ingestion at the 90th percentile for adults ages 21

<sup>5</sup> *Id.* at (c)(4)(B).

<sup>9</sup> *Id.*

<sup>10</sup> EPA’s 2000 Methodology also states: “Criteria based on a  $10^{-5}$  risk level are acceptable for the general population as long as states and authorized tribes ensure that the risk to more highly exposed subgroups (sport fishers or subsistence fishers) does not exceed the  $10^{-4}$  level.”

<sup>11</sup> USEPA. Integrated Risk Information System (IRIS). U.S. Environmental Protection Agency, Office of Research and Development, Washington, DC [www.epa.gov/iris](http://www.epa.gov/iris).

<sup>12</sup> Final Updated Ambient Water Quality Criteria for the Protection of Human Health (80 FR 36986, June 29, 2015). See also: USEPA. 2015. Final 2015 Updated National Recommended Human Health Criteria. U.S. Environmental Protection Agency, Office of Water, Washington, DC, <https://www.epa.gov/wqc/human-health-water-quality-criteria>.

and older.<sup>13</sup> EPA's national FCR of 22 g/day represents the 90th percentile consumption rate of fish and shellfish from inland and nearshore waters for the U.S. adult population 21 years of age and older, based on National Health and Nutrient Examination Survey (NHANES) data from 2003 to 2010.<sup>14</sup> EPA calculates HHC using a default body weight of 80 kilograms (kg), the average weight of a U.S. adult age 21 and older, based on NHANES data from 1999 to 2006.

Prior to publication of the 2000 Methodology, in which EPA began recommending the use of BAFs to reflect the uptake of a contaminant from all sources by fish and shellfish,<sup>16</sup> EPA relied on bioconcentration factors (BCFs) to estimate chemical accumulation of waterborne chemicals by aquatic organisms. However, BCFs only account for chemical accumulation in aquatic organisms through exposure to chemicals in the water column. In 2000, EPA noted that "there has been a growing body of scientific knowledge that clearly supports the observation that bioaccumulation and biomagnification occur and are important exposure issues to consider for many highly hydrophobic organic compounds and certain organometallics." For that reason, the 2000 Methodology observed that "[f]or highly persistent and bioaccumulative chemicals that are not easily metabolized, BCFs do not reflect what the science indicates."<sup>17</sup> Therefore, consistent with the 2000 Methodology EPA uses, when data are available,

measured or estimated BAFs, which account for chemical accumulation in aquatic organisms from all potential exposure routes, including, but not limited to, food, sediment, and water.<sup>18</sup> EPA uses separate BAFs for each trophic level to account for potential biomagnification of chemicals in aquatic food webs, as well as physiological differences among organisms that may affect bioaccumulation.<sup>19</sup>

EPA derives national default BAFs, in part, as a resource for states and authorized tribes with limited resources for deriving site-specific BAFs.<sup>20</sup> EPA's approach for developing national BAFs represents the long-term average bioaccumulation potential of a pollutant in aquatic organisms that are commonly consumed by humans across the United States. In the 2015 national CWA section 304(a) recommended HHC update, EPA relied on field-measured BAFs and laboratory-measured BCFs available from peer-reviewed, publicly available databases to develop national BAFs for three trophic levels of fish.<sup>21</sup> If this information was not available, EPA selected octanol-water partition coefficients ( $K_{ow}$  values) from publicly available, published peer-reviewed sources for use in calculating national BAFs. As an additional line of evidence, EPA reported model-estimated BAFs for every chemical based on the Estimation Program Interface (EPI) Suite to support the field-measured or predicted BAFs.<sup>22</sup>

Although EPA uses national default exposure-related input values to calculate national CWA section 304(a) recommended criteria, EPA's methodology notes a preference for the use of local data, when available, to calculate HHC (e.g., locally derived FCRs, drinking water intake rates and body weights, and waterbody-specific

bioaccumulation rates) over national default values. Using local data helps ensure that HHC represent local conditions.<sup>23</sup> EPA also recommends, where sufficient data are available, selecting an FCR that reflects consumption that is not suppressed by fish availability or concerns about the safety of available fish.<sup>24</sup> Deriving criteria using an unsuppressed FCR furthers the restoration goals of the CWA and ensures protection of human health as pollutant levels decrease, fish habitats are restored, and fish availability increases. Moreover, as explained further below, selecting an FCR that reflects unsuppressed fish consumption could be necessary where tribal treaty or other reserved fishing rights apply. In such circumstances, if sufficient data regarding unsuppressed fish consumption levels are unavailable or inconclusive, states should consult with tribes when deciding which fish consumption data should be used in selecting an FCR.

#### d. Relative Source Contribution

The inclusion of an RSC factor<sup>25</sup> is important for protecting public health. When deriving HHC for non-carcinogens and nonlinear carcinogens, EPA includes an RSC factor to account for sources of exposure other than drinking water and consumption of fish and shellfish from inland and nearshore

<sup>13</sup> USEPA. 2011. EPA Exposure Factors Handbook. 2011 edition (EPA 600/R-090/052F). <https://cfpub.epa.gov/ncea/risk/recordisplay.cfm?deid=236252>.

<sup>15</sup> EPA's national FCR is based on the total rate of consumption of fish and shellfish from inland and nearshore waters (including fish and shellfish from local, commercial, aquaculture, interstate, and international sources). This is consistent with a principle that each state does its share to protect people who consume fish and shellfish that originate from multiple jurisdictions.

<sup>24</sup> As noted by the National Environmental Justice Advisory Council in the 2002 publication *Fish Consumption and Environmental Justice*, "a suppression effect may arise when fish upon which humans rely are no longer available in historical quantities (and kinds), such that humans are unable to catch and consume as much fish as they had or would. Such depleted fisheries may result from a variety of affronts, including an aquatic environment that is contaminated, altered (due, among other things, to the presence of dams), overdrawn, and/or overfished. Were the fish not depleted, these people would consume fish at more robust baseline levels. . . . In the Pacific Northwest, for example, compromised aquatic ecosystems mean that fish are no longer available for tribal members to take, as they are entitled to do in exercise of their treaty rights." National Environmental Justice Advisory Council, *Fish Consumption and Environmental Justice*, p.44, 46 (2002) (NEJAC Fish Consumption Report), available at [https://www.epa.gov/sites/default/files/2015-02/documents/fish-consump-report\\_1102.pdf](https://www.epa.gov/sites/default/files/2015-02/documents/fish-consump-report_1102.pdf).

<sup>25</sup> "[RSC] defines the portion of the total exposure that comes from ingestion of water and fish from the ambient water body of interest. Other exposure information such as that from dietary, inhalation, and dermal routes should be considered and accounted for as part of the RSC human exposure analysis." <https://www.epa.gov/wqs-tech/supplemental-module-human-health-ambient-water-quality-criteria>.

waters. These other sources of exposure include but are not limited to ocean fish consumption (which is not included in EPA's default national FCR), non-fish food consumption (e.g., fruits, vegetables, grains, meats, poultry), dermal exposure, and inhalation exposure. Using an RSC ensures that the level of a chemical allowed by a water quality criterion, when combined with other exposure sources, will not result in exposures that exceed the RfD, thus helping to prevent adverse health effects from aggregate exposure to a given chemical over a person's lifetime. EPA's guidance<sup>26</sup> includes an approach for determining an appropriate RSC for a given pollutant ranging in value from 0.2 to 0.8 to ensure that drinking water and fish consumption alone are not apportioned the entirety of the RfD. This approach, known as the Exposure Decision Tree, considers the adequacy of available exposure data, levels of exposure, relevant sources/media of exposure, and regulatory agendas. As explained below in section III.B.d of this preamble, EPA made science-based adjustments to the application of the RSC in this rulemaking to avoid "double counting" exposures.

### C. Prior EPA Actions Related to Washington's Human Health Criteria

In 1992, EPA promulgated the National Toxics Rule (NTR) at 40 CFR 131.36, establishing chemical-specific numeric criteria for 85 priority toxic pollutants for 14 states and territories (states), including Washington, that were not in compliance with the requirements of CWA section 303(c)(2)(B). Subsequently, when states covered by the NTR adopted their own criteria for toxic pollutants that were consistent with the CWA and EPA's implementing regulations, EPA amended the NTR to remove those chemical-specific criteria for those states. In 2015, Washington was one of the states that remained covered by the NTR.

On September 14, 2015, the EPA Administrator determined that updated HHC for Washington were "necessary" pursuant to CWA section 303(c)(4)(B). EPA proposed HHC to protect the health of Washington residents, including tribes with treaty-reserved rights to fish.<sup>27</sup> In that proposal, EPA explained that the majority of waters under Washington's jurisdiction are subject to tribal treaty-reserved fishing rights.<sup>28</sup> To give effect to such rights in establishing revised WQS for Washington waters,

EPA determined that tribal treaty fishing rights "appropriately must be considered when determining which criteria are necessary to adequately protect Washington's fish and shellfish harvesting designated uses."<sup>29</sup> Specifically, EPA proposed to consider the tribal populations exercising their legal right to harvest and consume fish and shellfish as the general population for purposes of deriving protective HHC. To this end, EPA proposed HHC based on an FCR of 175 g/day and CRL of  $10^{-6}$  to reflect consideration of tribal treaty-reserved rights, as informed by consultation with the tribes and fish consumption surveys of tribal members.<sup>30</sup> In addition to an FCR and CRL calculated to ensure protection of applicable tribal treaty-reserved rights, EPA also utilized other inputs to derive the proposed HHC based on the agency's latest scientific knowledge. Specifically, EPA calculated the proposed HHC using the national trophic level four BAFs and updated chemical-specific RSC values from its June 2015 CWA section 304(a) recommended criteria updates.<sup>31</sup>

Before EPA finalized the proposed Federal criteria, the State of Washington adopted HHC following an extensive public process and submitted the updated HHC to EPA for review on August 1, 2016. The updated HHC incorporated some of the new data and information from EPA's June 2015 CWA section 304(a) criteria updates. Washington's HHC were based on the same 175 g/day FCR and  $10^{-6}$  CRL that EPA used to derive the proposed Federal HHC, with the exception of the CRL for polychlorinated biphenyls (PCBs).<sup>32</sup> Although Washington used the same FCR and CRL as EPA, Washington used BCFs instead of BAFs and used an RSC of 1. The scientific inputs of BCFs and an RSC of 1 do not reflect the latest scientific knowledge.

On November 15, 2016, EPA partially approved and partially disapproved Washington's HHC.<sup>33</sup> For the criteria that were disapproved, EPA concurrently signed a final rule promulgating the Federal criteria it had proposed in 2015.<sup>34</sup> Like EPA's 2015

proposal, the 2016 final rule articulated EPA's conclusion that it is necessary and appropriate to consider tribal treaty-reserved rights within the framework of the CWA and provided a discussion of the tribal treaties relevant to the State of Washington and applicable case law.<sup>35</sup> The 2016 final rule was informed by public comment that addressed both the proposed criteria and EPA's consideration of tribal treaties, as well as consultation with a number of federally recognized tribes.

EPA's disapproval of Washington's HHC in 2016 was largely predicated on Washington's use of input values that were not reflective of sound scientific rationale. In its letter to the State, EPA explained that the agency "evaluated Washington's criteria values against criteria that EPA determined would be protective of the State's designated uses and scientifically defensible (e.g., based on appropriate bioaccumulation factors (BAFs) and protective relative source contribution (RSC) values of less than 1)." <sup>36</sup> EPA found that Washington had not demonstrated that the majority of its criteria were based on sound scientific rationale as required by the CWA and EPA's implementing regulations.<sup>37</sup> Specifically for PCBs, EPA found that Washington had not provided adequate support or analysis to justify its use of a chemical-specific CRL ( $2.3 \times 10^{-5}$ ) that was less stringent than the CRL used for all other pollutants, and did not explain how the use of this CRL was protective of the State's designated uses.<sup>38</sup>

With respect to the criteria that EPA approved, the agency also explained that "while the EPA carefully considers the scientific defensibility and protectiveness of both the inputs used to derive criteria and the resulting criteria values, it is ultimately on the criteria values that the EPA takes approval or disapproval action under CWA section 303(c)." <sup>39</sup> After evaluating Washington's criteria against criteria using appropriate scientific inputs, EPA determined that certain of Washington's criteria were as or more stringent than

<sup>28</sup> *Id.* at 55067.

scientifically defensible criteria that the EPA determined would be protective of Washington's designated uses.<sup>40</sup> Accordingly, EPA approved those criteria.<sup>41</sup>

In a petition dated February 21, 2017, several regulated entities requested that EPA reconsider its November 15, 2016, partial disapproval and repeal its concurrent promulgated Federal criteria.<sup>42</sup> Following the 2017 petition, Washington and several federally recognized tribes with treaty-reserved fishing rights sent letters urging EPA to deny the petition and to leave the federally promulgated HHC in place.<sup>43</sup>

Despite objections from the State and several tribes, on May 10, 2019, EPA granted the 2017 industry petition by reversing the agency's prior partial disapproval to an approval of certain HHC ('2019 Reconsidered HHC') and subsequently issuing a final rule withdrawing the federally promulgated criteria.<sup>44</sup> EPA's May 10, 2019 approval concluded that the State's reliance on scientific inputs that were not reflective of the latest science was an appropriate risk-management decision.<sup>45</sup> The withdrawal of the Federal criteria went into effect on June 12, 2020, and as of that date, the HHC submitted by Washington on August 1, 2016 and approved by EPA on May 10, 2019 were in effect for CWA purposes.

On June 6, 2019, the State of Washington filed a complaint challenging the legality of EPA's May 2019 decision to reverse its November 2016 partial disapproval.<sup>46</sup> The Sauk-Suiattle Indian Tribe and Quinault Indian Nation subsequently joined Washington's lawsuit as plaintiff-

intervenor. On June 6, 2020, following EPA's withdrawal of the promulgated Federal HHC, another lawsuit was filed by the Makah Indian Tribe, the Pacific Coast Federation of Fishermen's Associations, and environmental groups challenging both EPA's withdrawal of the federally promulgated HHC and its May 10, 2019 decision to reverse the November 2016 partial disapproval.<sup>47</sup> In September 2020, the Plaintiffs in the case filed by the State of Washington amended their complaints to also challenge EPA's rule withdrawing the Federal HHC.

Consistent with Executive Order 13990,<sup>48</sup> in February 2021, EPA sought and was granted an abeyance in both cases to conduct an initial review to determine whether it intended to reconsider the challenged actions. During this initial three-month abeyance, EPA decided to reconsider the challenged actions. Based on its initial review of the agency's prior actions, EPA sought a longer abeyance from the court, expressing substantial concern that Washington's HHC may not be adequately protective and may not be based on sound scientific rationale. On July 6, 2021, the Court granted EPA an abeyance to reconsider its prior actions and to propose protective HHC for Washington and take final action on the proposal within 18 months. EPA proposed protective HHC for Washington on April 1, 2022,<sup>49</sup> and is now finalizing protective HHC for Washington in this final rule.

### III. Derivation of Human Health Criteria for Washington

#### A. Scope of EPA's Final Rule

After consideration of all comments received on EPA's proposed rulemaking, EPA is finalizing Federal criteria that supersede the 2019 Reconsidered HHC for CWA purposes.<sup>50</sup> EPA's final rule does not change or supersede the Federal HHC that EPA promulgated for arsenic,<sup>51</sup> methylmercury, or bis (2-chloro-1-methylethyl) ether in 2016 and that remain in place for CWA purposes, nor Washington's HHC that EPA approved in 2016 and have remained in effect since that time. EPA's final rule also does not change or supersede Washington's HHC for dioxin and

thallium that EPA approved in 2019. EPA had previously taken no action on these two pollutants in 2016.

Some commenters asked EPA to quickly take separate prompt action to strengthen dioxin criteria and establish criteria for per- and polyfluoroalkyl substances (PFAS) unless Washington addresses those pollutants itself in a future State rulemaking. As noted in EPA's Response to Comment document in the docket for this rule, such comments are beyond the scope of this rulemaking.

Finally, certain commenters referred to EPA's prior actions related to HHC for arsenic and mercury in Washington. EPA's proposed rulemaking did not address those prior actions, which were based on the administrative record before the agency at that time, nor did EPA solicit comment on those actions. Therefore, such comments are also beyond the scope of this rule.

The HHC in this final rule apply to surface waters under the State of Washington's jurisdiction, and not to waters within Indian country,<sup>52</sup> unless otherwise specified in Federal law.

#### B. Washington-Specific Human Health Criteria Inputs

##### a. Fish Consumption Rate, Body Weight, Drinking Water Intake

EPA is finalizing HHC for Washington using the same FCR of 175 g/day, body weight of 80 kg and drinking water intake rate of 2.4 L/day that the agency proposed in its April 1, 2022, proposed rulemaking,<sup>53</sup> which are the same values Washington used in 2016<sup>54</sup> and that EPA used in its 2016 Federal rule.<sup>55</sup> The comments addressing these input values are briefly summarized below.

With respect to the FCR, some commenters asserted that protective HHC should accurately account for the amount of fish people are eating, and that EPA was right to propose HHC using an FCR of 175 g/day. However, the same commenters state that 175 g/day is a compromise rate and is therefore, not conservative because many communities in Washington eat more than 175 g/day, even with suppressed fish stocks. Those

<sup>55</sup> *Revision of Certain Water Quality Standards Applicable to Washington*, 81 FR 85417 (November 28, 2016).

commenters assert that 175 g/day is only acceptable if that rate is paired with a CRL of one in one million ( $10^{-6}$ ) and the most recent science for the other inputs.

Other commenters asserted that 175 g/day is an inappropriate FCR to use to derive HHC in Washington, and/or that it should not be paired with a  $10^{-6}$  CRL. These commenters state that lower FCRs, or greater CRLs of one in one hundred thousand ( $10^{-5}$ ) or one in ten thousand ( $10^{-4}$ ), would be protective of all consumers in Washington, including tribes. Some commenters characterized 175 g/day as a high-biased estimate of fish consumption that is based on an outdated survey method. Additionally, commenters assert that 175 g/day is too high to use to derive HHC for Washington because it includes consumption of fish that predominantly accumulate pollutants in waters outside of Washington's jurisdiction (*i.e.*, the open ocean). Commenters state that EPA relies in part on an argument that fish consumption in Washington is suppressed but assert that EPA has not provided scientific evidence of such suppression or guidance on how to account for suppression. These commenters state that there is no evidence of lower fish stocks limiting consumption, and that fish availability should not be a factor in setting HHC since those criteria do not impact fish availability.

EPA reiterates its explanation in the proposed rulemaking that it does not have new data or information suggesting a need to revisit the inputs utilized in the 2016 rule.<sup>56</sup> Thus, EPA is applying the same rationale here as the agency articulated to support its use of those inputs in the 2016 Federal rule. The agency has concluded that it is important to keep these values consistent between the HHC in this rule and the other HHC that this rule will not impact (*i.e.*, the HHC that Washington adopted and EPA approved in 2016, and the Federal HHC that remain in place for arsenic, methylmercury, or bis (2-chloro-1-methylethyl) ether), because these values are associated with the population that the criteria are intended to protect and are not pollutant-specific. For detailed responses to all comments received, see EPA's Response to Comment document in the docket for this rule.

#### b. Pollutant-Specific Reference Doses and Cancer Slope Factors

EPA is finalizing HHC for Washington using the same reference doses and cancer slope factors that the agency

proposed in its April 1, 2022, proposed rulemaking,<sup>57</sup> which are the same values Washington used in 2016<sup>58</sup> and that EPA used in its 2016 Federal rule.<sup>59</sup> These are the same toxicity values that EPA uses in its national CWA section 304(a) recommended HHC. While there may be new toxicity information available for certain pollutants that is not yet reflected in EPA's CWA section 304(a) national recommended HHC, such information has not yet been reviewed through EPA's comprehensive CWA section 304(a) criteria development process and therefore is not incorporated into this final rule.<sup>60</sup> See Table 1, columns B1 and B3 of this preamble for a list of EPA's toxicity factors by pollutant.

EPA only received comments on reference doses and cancer slope factors in the context of specific pollutants, namely PCBs and mercury. As noted above, comments on mercury are beyond the scope of this rulemaking. For comments on PCBs, see below and EPA's Response to Comment document in the docket for this rule.

#### c. Cancer Risk Level

EPA is finalizing HHC for Washington using the same CRL of  $10^{-6}$  that the agency proposed in its April 1, 2022, proposed rulemaking for all pollutants, including PCBs.<sup>61</sup> This is the same CRL Washington used in 2016 for all pollutants except for PCBs<sup>62</sup> and that EPA used in its 2016 Federal rule for all pollutants.<sup>63</sup>

<sup>57</sup> See *Restoring Protective Human Health Criteria in Washington: Proposed Rule*, 87 FR 19046, April 1, 2022.

<sup>58</sup> Department of Ecology. *Washington State Water Quality Standards: Human health criteria and implementation tools, Overview of key decisions in rule amendment*. August 2016. Ecology Publication no. 16–10–025.

<sup>59</sup> *Revision of Certain Water Quality Standards Applicable to Washington*, 81 FR 85417 (November 28, 2016).

<sup>60</sup> For example, there are 7 polycyclic aromatic hydrocarbons for which there is new toxicity information available since the promulgation of the 2016 Federal rule. Because the CWA section 304(a) criteria development process can take several years, EPA is not able to review this information and complete this rulemaking by the end of the 18-month abeyance. Once EPA has developed updated CWA section 304(a) criteria for these pollutants, the State may evaluate its HHC for these pollutants (*e.g.*, during a triennial review), adopt new HHC based on the CWA section 304(a) updates, and submit these HHC to EPA for review.

<sup>61</sup> See *Restoring Protective Human Health Criteria in Washington: Proposed Rule*, 87 FR 19046, April 1, 2022.

<sup>62</sup> Department of Ecology. *Washington State Water Quality Standards: Human health criteria and implementation tools, Overview of key decisions in rule amendment*. August 2016. Ecology Publication no. 16–10–025.

<sup>63</sup> *Revision of Certain Water Quality Standards Applicable to Washington*, 81 FR 85417 (November 28, 2016).

EPA's selection of a  $10^{-6}$  CRL is consistent with EPA's 2000 Methodology, which states that EPA intends to use the  $10^{-6}$  level, which reflects an appropriate risk for the general population, when promulgating water quality criteria for states and tribes.<sup>64</sup> Additionally, many of Washington's rivers are in the Columbia River basin, upstream of Oregon's portion of the Columbia River. Oregon's criteria for PCBs and other pollutants are based on an FCR of 175 g/day and a CRL of  $10^{-6}$ . EPA's final Federal HHC for Washington using a CRL of  $10^{-6}$  along with an FCR of 175 g/day helps ensure that Washington's criteria will provide for the attainment and maintenance of Oregon's downstream WQS as required by 40 CFR 131.10(b).

As noted in EPA's 2016 final rule for Washington,<sup>65</sup> several tribes in Washington have treaty-reserved rights to fish on waters throughout the State. Consistent with those rights, tribal members catch and consume fish for their subsistence. EPA determined that a  $10^{-6}$  CRL was appropriate independent of treaty rights, for the reasons explained in this section and EPA's Response to Comment document in the docket for this rule. Nonetheless, EPA's selection of a  $10^{-6}$  CRL is protective of tribal members exercising their legal right to harvest and consume fish and shellfish at subsistence levels.<sup>66</sup>

Some commenters asserted that EPA's use of a CRL of  $10^{-6}$  is consistent with EPA's guidance and national precedent. These commenters agreed with EPA's proposal of HHC for PCBs based on a CRL of  $10^{-6}$  paired with an FCR of 175 g/day and asserted that it violates the CWA and civil rights to expose high fish consumers to a higher cancer risk due to PCBs. Commenters stated that EPA did not show why Washington's criteria that it previously disapproved in 2016 were protective in 2019. Finally, commenters asserted that upstream pollution impacts the Spokane Tribe's ability to safely exercise their treaty reserved fishing rights and EPA's proposed PCB criteria are closer to the Tribe's criteria and therefore more likely to provide for downstream protection. Commenters also state that use of a CRL

<sup>64</sup> EPA 2000 Methodology, p. 2–6. The Methodology recommends that states set human health criteria CRLs for the target general population at either  $10^{-5}$  or  $10^{-6}$  (p. 2–6) and also notes that states and authorized tribes can always choose a more stringent risk level, such as  $10^{-7}$  (p. 1–12).

<sup>65</sup> 81 FR 85422–26 (November 28, 2016).

<sup>66</sup> In 2016, tribes in Washington State generally viewed 175 g/day as a compromise minimum consumption rate so long as it is coupled with a CRL of  $10^{-6}$ . 2016 Partial Approval/Disapproval p. 15.

<sup>56</sup> *Id.* at 85420; 85426–428.

of  $10^{-6}$  to derive HHC for Washington addresses the potential for synergistic toxicity from exposure to multiple toxins.

Other commenters asserted that EPA's use of a  $10^{-6}$  CRL is inconsistent with EPA's guidance and longstanding policy on acceptable risk levels. These commenters stated that EPA accepts CRLs of  $10^{-6}$  or  $10^{-5}$ , provided the median FCR for highly exposed populations is protected to a  $10^{-4}$  risk level, and pointed to prior EPA actions, including EPA's 2019 approval of HHC in Idaho, 2011 HHC approval in Oregon, and EPA's Clean Water Act national recommended 304(a) criteria that pair a  $10^{-6}$  cancer risk level with a general population fish consumption rate rather than an FCR associated with high fish consumers. Some commenters characterized a CRL of  $10^{-4}$  as effectively zero risk to a small population such as the tribal population in Washington. Other commenters argued that the CRL is a choice for states to make and that EPA was right to accept Washington's choice of a PCB-specific CRL in 2019 because Washington's 2016 PCB criteria strike a more appropriate balance between cost and human health protection, and EPA's proposed PCB criteria are not scientifically defensible or attainable with currently available technology. Some commenters raised concerns that EPA's proposed criteria are below analytical method quantitation limits and therefore it is not clear how dischargers can comply with the criteria and this could be misleading to the public. Some commenters criticized EPA's cost estimates for the proposed rule, stating that testing methodology may improve, such that dischargers will then be out of compliance with permit limits, and stating that Washington is unlikely to adopt WQS variances to provide dischargers with relief. These commenters asserted that certain dischargers are already being pushed by EPA to use an unapproved PCB test method as the basis to design and install new treatment systems, and that EPA was wrong to assume that PCBs are not likely to be found in the effluent from minor facilities. Some commenters raised concerns that EPA and Washington State allow for the continued release of PCBs into the environment under the Toxic Substances Control Act, tribal and Federal hatchery operations in Washington, and Washington's Model Toxics Control Act, which in turn puts an unfair burden on dischargers in Washington to meet the proposed HHC for PCBs. Commenters also raised

concerns that EPA has not shared the latest science evaluating the toxicity of inadvertently generated PCBs and there is ongoing scientific uncertainty with EPA's proposed PCB criteria that EPA has not sufficiently explained.

As noted above, in this final rule EPA is maintaining its proposed CRL of  $10^{-6}$ , which Washington used in 2016 and EPA used in its 2016 Federal rule for all pollutants. With respect to the comments regarding utilizing that same CRL for PCBs, for the reasons that EPA further explained in the proposed rulemaking, the agency has concluded that Washington's PCB HHC are not protective of Washington's designated uses because of Washington's selected chemical-specific CRL, which is not based on a sound scientific rationale. For detailed responses to all comments received, including those which reiterate prior comments that EPA received on its 2015 proposed rulemaking for Washington and previously responded to, such as comments about the intersection of the CWA and the Toxic Substances Control Act with respect to PCBs, see EPA's Response to Comment document in the docket for this rule.

#### d. Relative Source Contribution

EPA recommends using an RSC for non-carcinogens and nonlinear carcinogens to account for sources of exposure other than drinking water and consumption of inland and nearshore fish and shellfish (see section II.B.d of this preamble). In its 2015 304(a) criteria recommendations, after evaluating information on chemical uses, properties, occurrences, releases to the environment and regulatory restrictions, EPA developed chemical-specific RSCs for non-carcinogens and nonlinear carcinogens ranging from 0.2 (20 percent) to 0.8 (80 percent) following the Exposure Decision Tree approach described in EPA's 2000 Human Health Methodology.<sup>67 68</sup>

When EPA promulgated HHC for Washington in 2016, EPA adjusted RSC values using a ratio of the national dataset characterizing all FCRs versus inland and nearshore-only FCRs derived

from the NHANES dataset. EPA then applied this ratio to the proportion of the RfD reserved for inland and nearshore fish consumption in the RSC, and used this adjustment to account for double-counted potential exposure to certain chemicals in certain anadromous fish species (e.g., salmon). This approach involves the following assumptions:

- The pollutant concentrations in anadromous fish are the same as those in inland and nearshore fish; and
- The ratio of all fish to inland and nearshore fish from NHANES data approximates the ratio of inland, nearshore, and anadromous fish to just inland and nearshore fish from Columbia River Inter-Tribal Fish Commission (CRITFC)<sup>69</sup> data (since CRITFC data were used to derive the 175 g/day FCR).

At the 90th percentile rate of consumption, the national adult consumption rate from NHANES data for all fish is 53 g/day and 22 g/day for inland and nearshore-only fish, or a ratio of 2.4. Applying this to an RSC of 0.2 yields 0.48, or 0.5 rounding to a single decimal place. Because the 175 g/day FCR includes some but not all marine species, EPA decided to use this approach to adjust the RSC values. However, EPA only adjusted RSC values to 0.5 for criteria calculations previously using an RSC between 0.2 and 0.5. Criteria derived using an RSC greater than 0.5 remained unchanged. EPA is using these same 2016 RSCs to derive HHC for Washington in this final rule, having no new data or information to support revising RSCs. The inclusion of protective RSCs in the development of HHC is a science-based decision that protects human health by ensuring that a person's exposure to multiple sources of a chemical is accounted for. See Table 1, column B2 of this preamble for a list of EPA's RSCs by pollutant.

Some commenters asserted that use of an RSC of 1 is scientifically indefensible and that returning to EPA's 2016 approach of using an RSC equal to or less than 0.8 will ensure that the HHC consider other potential exposures. Commenters stated that tribes are regularly exposed to toxins through other routes of exposure in addition to fish consumption, such as dermal exposure. Commenters agreed with EPA's statement in the proposed rule that the choice of cancer risk level (CRL) is irrelevant to the choice of RSC since these inputs are for mutually exclusive

<sup>67</sup> USEPA. 2000. Methodology for Deriving Ambient Water Quality Criteria for the Protection of Human Health. U.S. Environmental Protection Agency, Office of Water, Washington, DC EPA-822-B-00-004. <https://www.epa.gov/sites/default/files/2018-10/documents/methodology-wqc-protection-hh-2000.pdf>.

<sup>68</sup> Final Updated Ambient Water Quality Criteria for the Protection of Human Health. (80 FR 36986, June 29, 2015). See also: USEPA. 2015. Final 2015 Updated National Recommended Human Health Criteria. U.S. Environmental Protection Agency, Office of Water, Washington, DC <https://www.epa.gov/wqc/human-health-water-quality-criteria>.

<sup>69</sup> Fish Consumption Survey of the Umatilla, Nez Perce, Yakama, and Warm Springs Tribes of the Columbia River Basin (CRITFC 1994).

categories of pollutants (carcinogens vs. non-carcinogens).

Other commenters asserted that the RSC value is a discretionary risk management decision and there is no regulatory requirement to examine multiple exposure routes when developing HHC. Commenters also stated that the criteria are only intended to protect for risks related to surface water exposure, *i.e.*, fish and water. Some commenters asserted that it is arbitrary for EPA to use an RSC less than 1 when the FCR includes all fish. Other commenters pointed to prior EPA actions, including EPA's 2011 HHC approval in Oregon, and EPA's 2013 approval of HHC for the Spokane Tribe, to assert that EPA has approved HHC that rely on an RSC of 1. Finally, some commenters state that EPA's use of RSCs in the drinking water program under the Safe Drinking Water Act (SDWA) is different than using them for WQS since SDWA allows for consideration of cost in setting the final regulatory limits.

As explained in the proposed rulemaking, EPA determined that Washington's use of an RSC value of 1 to derive HHC is not based on sound scientific rationale as it apportioned the entire "safe" dose of certain chemicals to drinking water and fish consumption, ignoring other sources of those chemicals. While EPA acknowledges the comments indicating that it has previously approved WQS where states and authorized tribes utilized an RSC of 1 to develop certain HHC, in those prior actions, EPA only approved HHC that used an RSC of 1 if EPA had not yet updated its own corresponding national recommended 304(a) criteria to reflect chemical-specific RSC values following the Exposure Decision Tree approach described in the 2000 Methodology. Without updated national recommended 304(a) criteria, states and tribes did not yet have the benefit of EPA's thorough review of exposure information that now exists since EPA updated its national HHC recommendations in 2015. Since the 2015 recommended HHC updates, EPA has encouraged all states to consider the latest science reflected in EPA's 2015 HHC recommendations during the triennial review of state WQS and update their HHC to incorporate appropriate RSCs. For detailed responses to all comments received, see

EPA's Response to Comment document in the docket for this rule.

#### e. Pollutant-Specific Bioaccumulation Factors

Where data are available, EPA uses BAFs to account for the uptake and retention of waterborne chemicals by aquatic organisms from all surrounding media and to ensure that resulting criteria are science-based and protect designated uses for human health. Consistent with the 2016 Federal rule for Washington,<sup>70</sup> EPA is finalizing HHC for Washington by applying the trophic level four BAF from the 2015 CWA section 304(a) recommended HHC updates in conjunction with the 175 g/day FCR.<sup>71</sup>

Some commenters asserted that the choice of BCFs versus BAFs is a science-based rather than risk management decision, and that EPA is appropriately following the science in applying BAFs in this rule. These commenters asserted that BCFs undercount the amount of chemicals in fish, and EPA disregarded science and its own guidance when it approved BCF-based HHC in 2019.

Other commenters asserted that Washington's choice to use BCFs rather than BAFs was a sound science policy choice. These commenters asserted that BCFs are based on sound scientific principles and state that EPA has previously approved HHC that rely on BCFs. Commenters asserted that EPA's national recommended BAFs are just guidance, that they overestimate bioaccumulation and therefore lead to overly stringent HHC, and that they are insufficiently explained such that it is not possible to determine if they are appropriate for Washington. Some commenters asserted that both BAFs and BCFs are influenced by the local environment (*e.g.*, food web structure, water temperature, dissolved carbon) and therefore cannot be based on a single set of assumptions for all waters.

Regarding the comments supporting the use of BCFs, as explained in the

proposed rule, the use of BCFs rather than BAFs, where BAF data are available, to calculate the HHC is inconsistent with sound scientific rationale on the bioaccumulation of pollutants. EPA has considered the comments received on its selected BAFs and reiterates its explanation in the proposed rule that it does not have new data or information to support an alternative to its 2016 decision to use the trophic level four BAFs, given that the species commonly consumed in Washington are trophic level four fish (*e.g.*, salmon). For certain pollutants for which science-based BAFs are not currently available, EPA is finalizing HHC using the BCFs from its updated CWA section 304(a) recommended HHC for those pollutants as the best available scientific information. See Table 1, columns B4 and B5 of this preamble for a list of EPA's bioaccumulation factors by pollutant. For detailed responses to all comments received, see EPA's Response to Comment document in the docket for this rule.

#### C. Final Human Health Criteria for Washington

EPA is finalizing 141 HHC for 72 different pollutants (70 organism-only criteria and 71 water-plus-organism criteria) to protect the applicable designated uses of Washington's waters (see Table 1 of this preamble). The final HHC are the same criteria that EPA promulgated in 2016. The water-plus-organism criteria in column C1 of Table 1 of this preamble, are the applicable criteria for any waters that include the Domestic Water use (domestic water supply) defined in Washington's WQS (WAC 173–201A–600). The organism-only criteria in column C2 of Table 1 of this preamble, are the applicable criteria for any waters that do not include the Domestic Water use (domestic water supply) and that Washington defines at WAC 173–201A–600 and 173–201A–610 as the following:

- Fresh waters—Harvesting (fish harvesting), and Recreational Uses;
- Marine waters—Shellfish Harvesting (shellfish—clam, oyster, and mussel—harvesting), Harvesting (salmonid and other fish harvesting, and crustacean and other shellfish—crabs, shrimp, scallops, etc.—harvesting), and Recreational Uses.

BILLING CODE 6560–50–P

<sup>70</sup> *Revision of Certain Water Quality Standards Applicable to Washington*, 81 FR 85417 (November 28, 2016).

<sup>71</sup> Because the surveyed population upon which the 175 g/day FCR is based consumed almost exclusively trophic level four fish (*i.e.*, predator fish species), EPA used the trophic level four BAF from the 2015 CWA section 304(a) HHC updates in conjunction with the 175 g/day FCR, in order to derive protective criteria. See *Fish Consumption Survey of the Umatilla, Nez Perce, Yakama, and Warm Springs Tribes of the Columbia River Basin* (CRITFC 1994).

<sup>a</sup> This criterion applies to total PCBs (e.g., the sum of all congener or isomer or homolog or Aroclor analyses).

#### BILLING CODE 6560-50-C

#### D. Applicability

Under the CWA, Congress gave states primary responsibility for developing and adopting WQS for their navigable waters (CWA section 303(a)-(c)). Although EPA is finalizing revised HHC for Washington, Washington continues to have the option to adopt and submit to EPA newly revised HHC for the State's waters consistent with CWA section 303(c) and EPA's implementing regulations at 40 CFR part 131. If, subsequent to this final rule, Washington adopts and submits revised

HHC, EPA's federally promulgated criteria will remain applicable for purposes of the CWA until EPA withdraws the federally promulgated criteria (40 CFR 131.21(c)). EPA would undertake such a rulemaking to withdraw the Federal criteria if and when Washington adopts and EPA approves corresponding State criteria that meet the requirements of section 303(c) of the CWA and EPA's implementing regulations at 40 CFR part 131.

#### E. Alternative Regulatory Approaches and Implementation Mechanisms

The Federal WQS regulation at 40 CFR part 131 provides several tools that Washington has available to use at its discretion when implementing or deciding how to implement these HHC. Among other things, EPA's WQS regulation: (1) specifies how states and authorized tribes establish, modify, or remove designated uses (40 CFR 131.10); (2) specifies the requirements for establishing criteria to protect designated uses, including criteria modified to reflect site-specific

conditions (40 CFR 131.11); (3) authorizes and provides a regulatory framework for states and authorized tribes to adopt WQS variances where it is not feasible to attain the applicable WQS at that time (40 CFR 131.14); and (4) allows states and authorized tribes to authorize the use of compliance schedules in National Pollutant Discharge Elimination System (NPDES) permits to meet water quality-based effluent limits (WQBELs) derived from the applicable WQS (40 CFR 131.15). Each of these approaches is discussed in more detail in the next sections. Whichever approach a state pursues, however, all NPDES permits would need to comply with EPA's regulations at 40 CFR 122.44(d)(1)(i).

#### a. Designated Uses

EPA's HHC apply to waters that Washington has designated for the following:

- Fresh waters—Harvesting (fish harvesting), Domestic Water (domestic water supply), and Recreational Uses;
- Marine waters—Shellfish Harvesting (shellfish—clam, oyster, and mussel—harvesting), Harvesting (salmonid and other fish harvesting, and crustacean and other shellfish—crabs, shrimp, scallops, etc.—harvesting), and Recreational Uses (see WAC 173–201A–600 and WAC 173–201A–610).

The Federal regulation at 40 CFR 131.10(g) provides requirements for establishing, modifying, and removing designated uses when attaining the use is not feasible based on one of the six factors specified in the regulation. If Washington removes a use and adopts the highest attainable use,<sup>72</sup> the State must also adopt criteria to protect the newly designated highest attainable use consistent with 40 CFR 131.11. It is possible that criteria other than the federally promulgated criteria would protect the highest attainable use. If EPA found removal or modification of the designated use and the adoption of the highest attainable use and criteria to protect that use to be consistent with CWA section 303(c) and the implementing regulation at 40 CFR part 131, the agency would approve the

revised WQS. EPA would then undertake a rulemaking to withdraw the corresponding Federal WQS for the relevant water(s).

#### b. WQS Variances

Washington's WQS provide authority to apply WQS variances when implementing federally promulgated HHC, as long as such WQS variances are adopted consistent with 40 CFR 131.14 and submitted to EPA for review under CWA section 303(c). The Federal regulation at 40 CFR 131.3(o) defines a WQS variance as a time-limited designated use and criterion, for a specific pollutant or water quality parameter, that reflects the highest attainable condition during the term of the WQS variance. A WQS variance may be appropriate if attaining the use and criterion would not be feasible during the term of the WQS variance because of one of the seven factors specified in 40 CFR 131.14(b)(2)(i)(A). These factors include a situation where NPDES permit limits more stringent than technology-based controls would result in substantial and widespread economic and social impact. WQS variances adopted in accordance with 40 CFR 131.14 (including a public hearing consistent with 40 CFR 25.5) provide a flexible but defined pathway for states and authorized tribes to issue NPDES permits with limits that are based on the highest attainable condition during the term of the WQS variance. This allows dischargers to make water quality improvements when the WQS is not immediately attainable but may be in the future. When adopting a WQS variance, states and authorized tribes specify the interim requirements of the WQS variance by identifying a quantitative expression that reflects the highest attainable condition (HAC) during the term of the WQS variance, establishing the term of the WQS variance, and describing the pollutant control activities expected to occur over the specified term of the WQS variance. WQS variances provide a legal avenue by which NPDES permit limits can be written to comply with the WQS variance rather than the underlying WQS for the term of the WQS variance. If dischargers are still unable to meet the WQBELs derived from the applicable WQS once a WQS variance term is complete, the regulation allows the State to adopt a subsequent WQS variance if it is adopted consistent with 40 CFR 131.14. EPA is finalizing HHC that apply to use designations that Washington has already established. Washington's WQS regulations currently include provisions to use WQS variances when implementing

criteria (see WA 173–210A–420), as long as such WQS variances are adopted consistent with 40 CFR 131.14 and approved by EPA. Washington may use the State's EPA-approved WQS variance procedures when adopting such WQS variances.

#### c. NPDES Permit Compliance Schedules

EPA's regulations at 40 CFR 122.47 and 131.15 address how permitting authorities can use schedules for compliance with a limit in the NPDES permit if the discharger needs additional time to undertake actions like facility upgrades or operation changes to meet a WQBEL based on the applicable WQS. EPA's regulation at 40 CFR 122.47 allows a permitting authority to include a compliance schedule in the NPDES permit, when appropriate and where authorized by the state, to provide a discharger with additional time to meet a WQBEL implementing applicable WQS. EPA's regulation at 40 CFR 131.15 requires that a state that intends to allow the use of NPDES permit compliance schedules adopt specific provisions authorizing their use and obtain EPA approval under CWA section 303(c) to ensure that a decision to allow a permit compliance schedule is transparent and allows for public input.<sup>73</sup> EPA has approved Washington's State law provision authorizing the use of permit compliance schedules (see WAC–173–201A–510(4)), consistent with 40 CFR 131.15. Washington's compliance schedule authorizing provision is not affected by this rule. Washington is authorized to grant permit compliance schedules, as appropriate, based on the Federal HHC in Washington, if such permit compliance schedules are consistent with EPA's permitting regulation at 40 CFR 122.47.

### IV. Economic Analysis

EPA focused its economic analysis on the potential cost impacts to current holders of individual NPDES permits (point sources) and the costs the State of Washington may bear to develop Total Maximum Daily Loads (TMDLs) for waters newly identified as impaired under CWA section 303(d) using the revised WQS. Costs might also arise to holders of general permits<sup>74</sup> should the State modify those permits in some manner as a result of the revised WQS. Costs might also arise to sectors whose operations are nonpoint sources of pollutants through implementation of TMDLs or through other voluntary,

<sup>72</sup> If a state or authorized tribe adopts a new or revised WQS based on a required use attainability analysis, then it must also adopt the highest attainable use (40 CFR 131.10(g)). The highest attainable use is the modified aquatic life, wildlife, or recreation use that is both closest to the uses specified in section 101(a)(2) of the CWA and attainable, based on the evaluation of the factor(s) in 40 CFR 131.10(g) that preclude(s) attainment of the use and any other information or analyses that were used to evaluate attainability. There is no required highest attainable use where the state demonstrates the relevant use specified in section 101(a)(2) of the Act and sub-categories of such a use are not attainable (see 40 CFR 131.3(m)).

<sup>73</sup> 80 FR 51022 (August 21, 2015).

<sup>74</sup> General permits typically focus on best management practices.

incentivized, or State-imposed controls. This rule does not directly regulate nonpoint sources and under the CWA states are responsible for the regulation of nonpoint sources. EPA recognizes that controls for nonpoint sources may be part of future TMDLs, but any such future decisions will be made by the State. Nonpoint sources are intermittent, variable, and occur under hydrologic or climatic conditions associated with precipitation events. Data to model and evaluate the potential cost impacts associated with nonpoint sources were not available and any estimate would be too uncertain to be informative. EPA also did not estimate potential sediment remediation costs for this analysis.

These WQS may serve as a basis for development of NPDES permit limits. Washington has NPDES permitting authority and retains considerable

discretion in implementing standards. EPA evaluated the potential costs to NPDES dischargers associated with State implementation of EPA's criteria. This analysis is documented in "Economic Analysis for Restoring Protective Human Health Criteria in Washington," which can be found in the record for this rule. Any NPDES-permitted facility that discharges pollutants for which the revised HHC are more stringent than the applicable aquatic life criteria (or for which HHC are the only applicable criteria) could potentially incur compliance costs. The types of affected facilities could include industrial facilities and POTWs discharging wastewater to surface waters (*i.e.*, point sources).

#### A. Identifying Affected Entities

EPA identified 406 point source facilities that could ultimately be

affected by this rule. Of these potentially affected facilities, 73 are major dischargers and 333 are minor dischargers. EPA did not include general permit facilities in its analysis because data for such facilities are limited and requirements typically focus on best management practices. Of the potentially affected facilities, EPA evaluated a sample of 18 major facilities. Minor facilities are less likely to incur costs as a result of implementation of the rule because of the reduced potential for significant presence of toxic pollutants in their effluent. EPA did not have effluent data on toxic pollutants to evaluate minor facilities for this analysis. Table 2 summarizes these potentially affected facilities by type and category.

TABLE 2—POTENTIALLY AFFECTED FACILITIES

| Category         | Minor | Major | All |
|------------------|-------|-------|-----|
| Municipal .....  | 169   | 44    | 213 |
| Industrial ..... | 164   | 29    | 193 |
| Total .....      | 333   | 73    | 406 |

#### B. Method for Estimating Costs

EPA evaluated the two major municipal facilities with design flows greater than 100 mgd and the largest industrial facility, to attempt to capture the facilities with the potential for the largest costs. For the remaining major facilities, EPA evaluated a random sample of facilities to represent discharger type and category. For all sample facilities, EPA evaluated existing baseline permit conditions, reasonable potential to exceed HHC based on the rulemaking, and potential to exceed projected effluent limitations based on the last three years of effluent monitoring data (if available). Only compliance actions and costs that would be needed above the baseline level of controls are attributable to the rulemaking.

EPA assumes that dischargers would pursue the least cost means of compliance with WQBELs. Compliance actions attributable to the rulemaking may include pollution prevention, end-of-pipe treatment, and alternative compliance mechanisms (*e.g.*, WQS variances). EPA annualizes capital costs, including study (*e.g.*, WQS variance) and program (*e.g.*, pollution prevention) costs, over 20 years using discount rates of 3 percent and 7 percent to obtain total annual costs per facility. To obtain an estimate of total costs to point sources,

EPA extrapolates the annualized costs for the random sample based on the flow volume for the sample facilities and the flow volume for all facilities.

#### C. Results

Based on the results for 18 sample facilities across 10 industrial and municipal categories,<sup>75</sup> EPA did not identify any incremental costs to any major point source discharges of process wastewater from POTWs or industrial facilities attributable to EPA's criteria revisions. This does not mean that EPA anticipates there would be no costs to point sources over time to implement controls or modify processes to meet future permit limits, only that available data do not indicate the immediate need for the facilities evaluated. It would be highly speculative to attempt to estimate potential costs either based on the possibility of measuring pollutant levels at lower levels as a result of future requirements or future technology, or based on changes to facility operations or practices. Should the need to consider advanced treatment or other substantial costs arise in the future,

<sup>75</sup> Ten industrial categories (coal mining, food and kindred products, paper and allied products, chemicals and allied products, petroleum refining and related industries, primary metal industries, fabricated metal products, electric, gas and sanitary services, and national security and international affairs) and municipal POTWs.

there are mechanisms such as WQS variances in place which may consider cost and feasibility in the application of protective criteria, and alternative permit limits may be derived to avoid excessive costs. EPA will work with the State of Washington and with stakeholders on a continuing basis to assess the possibility of economically significant future costs of compliance. If such costs arise, EPA will provide guidance for applying alternative compliance mechanisms to minimize costs.

One important contributing factor to examining point source costs is the limitations of required analytical methods to measure chemical concentrations in effluents. Nearly half of pollutant parameters addressed in this rule have analytical quantitation limits that are above both the criteria currently in place and EPA's criteria. PCBs are a good example. The current criterion in place is 170 picograms per liter (pg/L) and EPA's criterion is 7 pg/L. However, the State identifies the analytical detection limit for effluent measurement as 65,000 pg/L as the means to evaluate compliance. EPA has completed a multi-laboratory validation of a new analytical method for PCBs (method 1628) that has an average analytical quantitation limit for each PCB congener of approximately 2,000

pg/L, which is a substantial improvement over the current regulatory method, but still well above either the criterion currently in place or EPA's criterion. As a general matter, analytical methods and quantitation limits are subject to change over time. As such, it is important that WQS reflect the necessary level of protection regardless of contemporary limitations of analytical methods.

EPA also evaluated potential administrative costs to the State for developing additional TMDLs under CWA section 303(d) for any waters that are newly identified as impaired as a result of EPA's criteria. Using available ambient monitoring data, EPA compared pollutant concentrations to the baseline and revised criteria, identifying waterbodies that may be incrementally impaired (*i.e.*, impaired under EPA's criteria but not under the baseline). EPA identified 32 impairments under the baseline criteria and 61 under the revised criteria, resulting in 29 potential incremental impairments. The estimated total annual costs for TMDL development range from \$100,000 to \$182,000, at a 3 percent discount rate, based on single-cause single-waterbody TMDL development costs. Actual costs may be reduced if the State develops multi-cause or multi-waterbody TMDLs.

## V. Statutory and Executive Order Reviews

Additional information about these statutes and Executive orders can be found at <https://www.epa.gov/laws-regulations/laws-and-executive-orders>.

### A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action and was therefore not submitted to the Office of Management and Budget (OMB) for review.

### B. Paperwork Reduction Act (PRA)

This action does not impose any new information collection burden under the PRA. While actions to implement these WQS could entail additional paperwork burden, this action does not directly contain any information collection, reporting, or record-keeping requirements. OMB has previously approved the information collection activities contained in the existing regulation at 40 CFR part 131 and has assigned OMB control number 2040-0049.

### C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action will not impose any requirements on small entities. Small entities, such as small businesses or small governmental jurisdictions, are not directly regulated by this rule. EPA-promulgated WQS are implemented through various water quality control programs including the NPDES program, which limits discharges to navigable waters except in compliance with a NPDES permit. CWA section 301(b)(1)(C) and EPA's implementing regulations at 40 CFR 122.44(d)(1) introductory text and (d)(1)(i) provide that all NPDES permits shall include any limits on discharges that are necessary to meet applicable WQS. Thus, under the CWA, EPA's promulgation of WQS establishes standards that the State implements through the NPDES permit process. While the State has discretion in developing discharge limits, as needed to meet the WQS, those limits, per regulations at 40 CFR 122.44(d)(1)(i), "must control all pollutants or pollutant parameters (either conventional, nonconventional, or toxic pollutants) which the Director determines are or may be discharged at a level that will cause, have the reasonable potential to cause, or contribute to an excursion above any [s]tate water quality standard, including [s]tate narrative criteria for water quality." As a result of this action, the State of Washington will need to ensure that permits it issues include any limitations on discharges necessary to comply with the WQS established in this final rule. In doing so, the State will have a number of choices associated with permit writing. While Washington's implementation of the rule may ultimately result in new or revised permit conditions for some dischargers, including small entities, EPA's action, by itself, does not impose any of these requirements on small entities; that is, these requirements are not self-implementing.

### D. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531-1538, and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any state, local, or tribal governments or the private sector.

### E. Executive Order 13132: Federalism

Under the technical requirements of Executive Order 13132, the EPA has

determined that this rule may not have federalism implications but believes that the consultation requirements of the Executive order have been satisfied in any event. This rule does not alter Washington's considerable discretion in implementing these WQS, nor does it preclude Washington from adopting WQS that EPA concludes meet the requirements of the CWA after promulgation of this final rule.

### F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action has tribal implications. However, it will neither impose substantial direct compliance costs on federally recognized tribal governments, nor preempt tribal law. This rule could affect federally recognized Indian tribes in Washington because the numeric criteria for Washington will apply to waters adjacent to (or upstream or downstream of) the tribal waters. Additionally, there are six federally recognized Indian tribes in the Columbia River Basin located in the States of Oregon and Idaho that this rule could affect because their waters could affect or be affected by the water quality of Washington's downstream or upstream waters.

EPA consulted with tribal governments under the EPA Policy on Consultation and Coordination with Indian Tribes early in the process of developing this regulation to ensure meaningful and timely input into its development. In August 2021, EPA held coordination and consultation sessions with tribal environmental staff and leadership to share information, hear their views and answer questions on the rulemaking. Representatives from 17 tribes and two tribal consortia participated in two leadership meetings with EPA held in August 2021. Additionally, EPA conducted tribal consultation and coordination activities on the proposed rulemaking from March 29, 2022, through June 3, 2022. During these meetings, the tribes repeatedly asked EPA to reinstate the 2016 Federal HHC for Washington, which EPA is doing in this final rule.

A *Summary of EPA's Consultation, Coordination, and Outreach with Federally Recognized Tribes on the Restoration of Protective Human Health Criteria for Washington* is available in the docket for this final rule.

### G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

This action is not subject to Executive Order 13045 because it is not economically significant as defined in

Executive Order 12866, and because the EPA does not believe the environmental health or safety risks addressed by this action present a disproportionate risk to children. This action's health and risk assessments are contained in section II.B of this preamble, in which EPA recommends that HHC be designed to reduce the risk of adverse cancer and non-cancer effects occurring from lifetime exposure to pollutants through the ingestion of drinking water and consumption of fish/shellfish obtained from inland and nearshore waters. EPA's HHC for Washington are similarly based on reducing the chronic health effects occurring from lifetime exposure and therefore are expected to be protective of a person's exposure during both childhood and adult years.

#### *H. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution, or Use*

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866. This action establishes CWA HHC for waters under the State of Washington's jurisdiction.

#### *I. National Technology Transfer and Advancement Act of 1995*

This rule does not involve technical standards.

#### *J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations*

EPA believes that this action does not have disproportionately high and adverse human health or environmental effects on minority populations, low-income populations and/or Indigenous peoples, as specified in Executive Order 12898 (59 FR 7629, February 16, 1994). The documentation for this decision is contained below.

##### **1. Introduction**

EPA defines Environmental Justice (EJ) as the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation and enforcement of environmental laws, regulations and policies.<sup>76</sup> Three Executive orders (E.O.

12898,<sup>77</sup> 13985,<sup>78</sup> and 14008<sup>79</sup>) advance EJ by calling on Federal agencies to identify and address disproportionate impacts on historically underserved, marginalized, and economically disadvantaged people. Additionally, EPA has expressed a commitment to conducting EJ analyses for rulemakings as described in the April 30, 2021, revisions to the Cross-State Air Pollution Rule (CSAPR).<sup>80</sup>

EPA believes that this rule is not expected to have disproportionately high and adverse human health or environmental effects on low-income populations, people of color, or tribal populations, as specified in Executive Order 12898 (59 FR 7629, February 16, 1994). In its economic impact analysis, EPA only estimates administrative costs to the State of Washington to develop TMDLs and no incremental costs to point source discharges based on available data, as explained above in section IV of this preamble. Therefore, EPA does not anticipate that this rule will impose any additional costs or other negative impacts on tribes or other low income or disadvantaged communities.

public's contribution can influence [the EPA's rulemaking] decision; (3) the concerns of all participants involved will be considered in the decision-making process; and (4) [the EPA will] seek out and facilitate the involvement of those potentially affected." A potential EJ concern is defined as "the actual or potential lack of fair treatment or meaningful involvement of minority populations, low-income populations, tribes, and tribal peoples in the development, implementation and enforcement of environmental laws, regulations and policies." See "Guidance on Considering Environmental Justice During the Development of an Action," Environmental Protection Agency, [www.epa.gov/environmentaljustice/guidanceconsidering-environmental-justice-duringdevelopment-action](http://www.epa.gov/environmentaljustice/guidanceconsidering-environmental-justice-duringdevelopment-action). See also [https://www.epa.gov/environmentaljustice](http://www.epa.gov/environmentaljustice).

<sup>77</sup> Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations. Available at <https://www.epa.gov/environmentaljustice/federal-actions-address-environmental-justice-minority-populations-and-low>, accessed October 6, 2021.

<sup>78</sup> Advancing Racial Equity and Support for Underserved Communities Through the Federal Government (86 FR 7009, January 25, 2021). Available at <https://www.federalregister.gov/documents/2021/01/25/2021-01753/advancing-racial-equity-and-support-for-underserved-communities-through-the-federal-government>, accessed October 6, 2021.

<sup>79</sup> Tackling the Climate Crisis at Home and Abroad (86 FR 7619, February 1, 2021). Available at <https://www.federalregister.gov/documents/2021/02/01/2021-02177/tackling-the-climate-crisis-at-home-and-abroad>, accessed October 6, 2021.

<sup>80</sup> 86 FR 23054, 23162 (April 30, 2021) ("Going forward, EPA is committed to conducting environmental justice analysis for rulemakings based on a framework similar to what is outlined here, in addition to investigating ways to further weave environmental justice into the fabric of the rulemaking process including through enhanced meaningful engagement with environmental justice communities.").

Instead, this action identifies and ameliorates disproportionately high and adverse human health effects on tribal communities, people of color and low-income populations in Washington by restoring HHC in Washington that are based on sound scientific rationale and protect high fish consumers.

Many groups in Washington, such as Asian, Pacific Islanders, and subsistence and recreational tribal and non-tribal fishers consume large amounts of fish and shellfish as part of traditionally influenced diets.<sup>81</sup> The 2019 Reconsidered HHC currently expose these high fish consumers to greater risk from toxic pollutants because the criteria do not accurately account for pollutant bioaccumulation into fish and expose fish consumers to a greater risk of cancer from PCB exposure.

Environmental impacts to tribes may be considered under the category of EJ in recognition that tribes may at times be among the disadvantaged communities disproportionately impacted by environmental degradation. Where tribal communities are part of a larger non-tribal community, many of the EJ considerations are very similar to those of other disadvantaged groups. However, there is a very unique set of EJ considerations for tribes, particularly in this context where tribes are exercising their cultural practices and treaty-reserved rights outside of their reservations on state waters.

While the overall impacts to communities with EJ concerns are improved as a result of this rule, by relying on the fish consumption rates based on tribal data, this rule helps ensure that tribal members, in particular, and their treaty-protected activities and resources are protected.<sup>82</sup> Specifically, this rule establishes HHC based on an FCR of 175 g/day reflective of regional tribal FCR survey data<sup>83</sup> to represent and protect higher fish consumers. In conjunction with the FCR, the rule uses a CRL of 10<sup>-6</sup> to

<sup>81</sup> Department of Ecology. *Fish Consumption Rates: Technical Support Document, A Review of Data and Information about Fish Consumption in Washington, Version 2.0 Final*. January 2013. Ecology Publication No. 12-09-058, p.18. <https://apps.ecology.wa.gov/publications/documents/1209058.pdf>.

<sup>82</sup> 80 FR 55063 (September 14, 2015) ("In Washington, many tribes hold reserved rights to take fish for subsistence, ceremonial, religious, and commercial purposes, including treaty-reserved rights to fish at all usual and accustomed fishing grounds and stations in waters under state jurisdiction, which cover the majority of waters in the state. Such rights include not only a right to take those fish, but necessarily include an attendant right to not be exposed to unacceptable health risks by consuming those fish.").

<sup>83</sup> *Fish Consumption Survey of the Umatilla, Nez Perce, Yakama, and Warm Springs Tribes of the Columbia River Basin* (CRITFC 1994).

<sup>76</sup> Fair treatment means that "no group of people should bear a disproportionate burden of environmental harms and risks, including those resulting from the negative environmental consequences of industrial, governmental and commercial operations or programs and policies." Meaningful involvement occurs when "(1) potentially affected populations have an appropriate opportunity to participate in decisions about a proposed activity [e.g., rulemaking] that will affect their environment and/or health; (2) the

derive HHC for all cancer-causing pollutants, including PCBs, a rate which is protective of tribal members exercising their legal right to harvest and consume fish and shellfish at the 175 g/day level.

Central to working with tribes on their environmental issues and opportunities is government to government consultation, which is consistent with Executive Order 13175 (65 FR 67249, November 6, 2000). To ensure that this rule considers the interests and perspective of tribes, EPA engaged with tribes that may be affected by this action to receive meaningful and timely input from tribal officials. See section V.F of this preamble for a summary of tribal consultation.

In addition to Executive Orders 12898 and 13175, and in accordance with Title VI of the Civil Rights Act of 1964, each Federal agency shall ensure that all programs or activities receiving Federal financial assistance that affect human health or the environment do not directly, or through contractual or other arrangements, use criteria, methods, or practices that discriminate on the basis of race, color, or national origin. With that directive in mind, in August 2011

the Environmental Justice Interagency Working Group established a Title VI Committee to address the intersection of agencies' environmental justice efforts with their Title VI enforcement and compliance responsibilities. If Washington receives Federal funds for CWA implementation, they are legally prohibited from discriminating on the basis of race, color or national origin under Title VI when engaging in CWA implementation activities. Additionally, and in compliance with Executive Order 12898, EPA expects that Washington will consider disproportionately high adverse human health and environmental effects on minority and low-income populations when implementing this rule under the CWA.

#### *K. Congressional Review Act (CRA)*

This action is subject to the CRA, and EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

#### **List of Subjects in 40 CFR Part 131**

Environmental protection, Indians-lands, Intergovernmental relations,

Reporting and recordkeeping requirements, Water pollution control.

**Michael S. Regan,**  
*Administrator.*

For the reasons set forth in the preamble, EPA amends 40 CFR part 131 as follows:

### **PART 131—WATER QUALITY STANDARDS**

- 1. The authority citation for part 131 continues to read as follows:

*Authority:* 33 U.S.C. 1251 *et seq.*

#### **Subpart D—Federally Promulgated Water Quality Standards**

- 2. Amend § 131.45 by revising paragraph (b) to read as follows:

#### **§ 131.45 Revision of certain Federal water quality criteria applicable to Washington.**

\* \* \* \* \*

(b) *Criteria for priority toxic pollutants in Washington.* The applicable human health criteria are shown in table 1 to this paragraph (b).

BILLING CODE 6560–50–P

Table 1 to Paragraph (b)—Human Health Criteria for Washington

[FR Doc. 2022-25150 Filed 11-17-22; 8:45 am]

BILLING CODE 6560-50-C

**ENVIRONMENTAL PROTECTION AGENCY****40 CFR Part 180****[EPA-HQ-OPP-2021-0387; FRL-10030-01-OCSPP]****Cyclaniliprole; Pesticide Tolerances****AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Final rule.

**SUMMARY:** This regulation establishes tolerances for residues of cyclaniliprole in or on multiple crops that are identified and discussed later in this document. Interregional Research Project Number 4 (IR-4) requested these tolerances under the Federal Food, Drug, and Cosmetic Act (FFDCA).

**DATES:** This regulation is effective November 18, 2022. Objections and requests for hearings must be received on or before January 17, 2023, and must be filed in accordance with the instructions provided in 40 CFR part

178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

**ADDRESSES:** The docket for this action, identified by docket identification (ID) number EPA-HQ-OPP-2021-0387, is available at <https://www.regulations.gov> or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW, Washington, DC 20460-0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room and the OPP Docket is (202) 566-1744. For the latest status information on EPA/DC services, docket access, visit <https://www.epa.gov/dockets>.

**FOR FURTHER INFORMATION CONTACT:** Daniel Rosenblatt, Acting Director, Registration Division (7505T), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460-0001; main telephone number: (202) 566-1030; email address: [RDfRNotices@epa.gov](mailto:RDfRNotices@epa.gov).

**SUPPLEMENTARY INFORMATION:****I. General Information***A. Does this action apply to me?*

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

*B. How can I get electronic access to other related information?*

You may access a frequently updated electronic version of EPA's tolerance regulations at 40 CFR part 180 through the Office of the Federal Register's e-CFR site at <https://www.ecfr.gov/current/title-40>.

### C. How can I file an objection or hearing request?

Under FFDCA section 408(g), 21 U.S.C. 346a(g), any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA-HQ-OPP-2021-0387 in the subject line on the first page of your submission. All objections and requests for a hearing must be in writing and must be received by the Hearing Clerk on or before January 17, 2023. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA-HQ-OPP-2021-0387, by one of the following methods:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.

- **Mail:** OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW, Washington, DC 20460-0001.

- **Hand Delivery:** To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at <https://www.epa.gov/dockets/where-send-comments-epa-dockets>.

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at <https://www.epa.gov/dockets>.

## II. Summary of Petitioned-For Tolerance

In the **Federal Register** of October 21, 2021 (86 FR 58239) (FRL-8792-04-OCSPP) and April 28, 2022 (87 FR 25178) (FRL-9410-12-OCSPP), EPA issued documents pursuant to FFDCA section 408(d)(3), 21 U.S.C. 346a(d)(3), announcing the filing of a pesticide petition (PP 1E8904) by IR-4, North

Carolina State University, 1730 Varsity Drive, Venture IV, Suite 210, Raleigh, NC 27606. The petition requested to establish tolerances for residues of the insecticide cyclaniliprole, 3-bromo-N-[2-bromo-4-chloro-6-[[[(1-cyclopropylethyl)amino]carbonyl]phenyl]-1-(3-chloro-2-pyridinyl)-1H-pyrazole-5-carboxamide, including its metabolites and degradates, in or on the raw agricultural commodities: Artichoke, globe at 1.5 parts per million (ppm); Pepper/eggplant subgroup 8-10B at 1.5 ppm; Sunflower subgroup 20B at 0.4 ppm; Tomato subgroup 8-10A at 0.6 ppm; Hog, meat at 0.01 ppm; Hog, fat at 0.015 ppm; Hog, meat byproducts at 0.015 ppm; Egg at 0.01 ppm; Poultry, meat at 0.01 ppm; Poultry, fat at 0.015 ppm; and Poultry, meat byproducts at 0.015 ppm. Upon the establishment of the tolerances specified above, IR-4 requested to remove the established tolerance for Vegetable, fruiting, group 8-10 at 0.20 ppm. The documents referenced a summary of the petition, which is available in the docket, <https://www.regulations.gov>. There were no substantive comments received in response to the notices of filing.

Based upon review of the data supporting the petition and in accordance with its authority under FFDCA section 408(d)(4)(A)(i), EPA is modifying the commodities for which tolerances are being set.

## III. Aggregate Risk Assessment and Determination of Safety

Section 408(b)(2)(A)(i) of FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is “safe.” Section 408(b)(2)(A)(ii) of FFDCA defines “safe” to mean that “there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information.” This includes exposure through drinking water and in residential settings but does not include occupational exposure. Section 408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to “ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue. . . .”

Consistent with FFDCA section 408(b)(2)(D), and the factors specified therein, EPA has reviewed the available scientific data and other relevant

information in support of this action. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure for cyclaniliprole including exposure resulting from the tolerances established by this action. EPA’s assessment of exposures and risks associated with cyclaniliprole follows.

No single or repeated dose study performed by any route of exposure produced an adverse effect following cyclaniliprole exposure at dose levels below, at, or above the limit dose (1,000 milligrams/kilogram/day (mg/kg/day)). Although the oral toxicity studies in dogs were conducted at approximately a third of the limit dose, no adverse effects were seen. While adaptive liver effects were seen in these studies, it is unlikely that cyclaniliprole would produce adverse liver effects if tested at higher doses in dogs as a structurally related chemical, chlorantraniliprole, was tested up to the limit dose in dogs and did not demonstrate adverse liver effects. There is no evidence that cyclaniliprole produces increased susceptibility with prenatal or postnatal exposures. Cyclaniliprole is considered not likely to be carcinogenic based on no increase in treatment-related tumor incidence in carcinogenicity studies in rats and mice and no genotoxicity.

Specific information on the studies received for cyclaniliprole as well as the no-observed-adverse-effect-level (NOAEL) from the toxicity studies can be found at <https://www.regulations.gov> in document, “Cyclaniliprole: Human Health Risk Assessment for the Proposed New Uses on Globe Artichoke and Sunflower Subgroup 20B and for new Greenhouse Uses (with Amended Tolerances) on Tomato Subgroup 8-10A and Pepper/Eggplant Subgroup 8-10B”, in docket ID number EPA-HQ-OPP-2021-0387.

Based on the review of the available cyclaniliprole toxicological studies, no toxicity endpoints or points of departure were selected for risk assessment. Based on the toxicological profile of cyclaniliprole, EPA has concluded that the FFDCA requirements to retain an additional safety factor for protection of infants and children and to consider cumulative effects do not apply. Section 408(b)(2)(C) requires an additional tenfold margin of safety in the case of threshold risks, which cyclaniliprole does not present. Section 408(b)(2)(D)(v) requires consideration of information concerning cumulative effects of substances that have a common mechanism of toxicity. Unlike other pesticides for which EPA has followed a cumulative risk approach based on a common mechanism of toxicity, EPA has not made a common mechanism of

toxicity finding as to cyclaniliprole and any other substances, and cyclaniliprole does not appear to produce a toxic metabolite produced by other substances. For the purposes of this action, therefore, EPA has not assumed that cyclaniliprole has a common mechanism of toxicity with other substances.

Cyclaniliprole has been grouped with the pyridyl pyrazoles. As part of the ongoing process to review registered pesticides, the Agency intends to apply this framework to determine if the available toxicological data for cyclaniliprole suggests a candidate common mechanism group (CMG) may be established with other pesticides. If a CMG is established, a screening-level toxicology and exposure analysis may be conducted to provide an initial screen for multiple pesticide exposure.

There is a potential for exposure to cyclaniliprole residues via food and drinking water based on existing uses and the proposed uses for cyclaniliprole application directly to growing crops. These applications can also result in cyclaniliprole reaching surface and ground water, both of which can serve as sources of drinking water. There are no existing or proposed uses in residential settings and therefore no anticipated residential exposures, although exposures resulting from spray drift from agricultural applications onto residential areas may occur. However, no quantitative risk assessment was conducted because no toxicity endpoints or points of departure were selected for risk assessment.

**Determination of safety.** Based on the available data indicating a lack of adverse effects from exposure to cyclaniliprole, EPA concludes that there is a reasonable certainty that no harm will result to the general population, or to infants and children, from aggregate exposure to cyclaniliprole residues.

#### IV. Other Considerations

##### A. Analytical Enforcement Methodology

Adequate enforcement methodology (liquid chromatography with tandem mass spectrometry (LC-MS/MS)) is available to enforce the tolerance expression for plants and livestock commodities. The method may be requested from: Chief, Analytical Chemistry Branch, Environmental Science Center, 701 Mapes Rd., Ft. Meade, MD 20755-5350; telephone number: (410) 305-2905; email address: [residuemethods@epa.gov](mailto:residuemethods@epa.gov).

##### B. International Residue Limits

In making its tolerance decisions, EPA seeks to harmonize U.S. tolerances with

international standards whenever possible, consistent with U.S. food safety standards and agricultural practices. EPA considers the international maximum residue limits (MRLs) established by the Codex Alimentarius Commission (Codex), as required by FFDCA section 408(b)(4).

The Codex has established MRLs for cyclaniliprole. The tolerance definitions are harmonized between the U.S. and Codex for plant and livestock commodities. There are Codex MRLs established on tomato subgroup 8-10A at 0.08 ppm for most commodities and at 0.1 ppm for tomato and on pepper/eggplant subgroup 8-10B at 0.15 ppm. For peppers (bell/non-bell) and tomatoes, the Agency is not harmonizing with the Codex MRLs because the Codex MRLs are much lower than the U.S. tolerances (0.15 vs 1.5 ppm for pepper subgroup and 0.1 vs 0.7 ppm for tomato subgroup). Harmonization could potentially result in tolerance exceedances in the U.S. and is therefore not possible.

##### C. Revisions to Petitioned-For Tolerances

The Agency has revised the tolerance value for tomato subgroup 8-10A from 0.6 ppm to 0.7 ppm because EPA used different residue data to calculate the tolerance. The proposed preharvest interval (PHI) for tomato is 1 day and the petitioner used residue data from a 1-day PHI. The decline trial indicated that residues increased at higher PHIs, so EPA included the highest cyclaniliprole residue at a PHI of 7 days in the tolerance calculation to be conservative.

EPA has determined that tolerances for Hog, meat; Hog, fat; Hog, meat byproducts; Egg; Poultry, meat; Poultry, fat; and Poultry, meat byproducts are not necessary because the calculated dietary burdens for swine and poultry are very low such that there is no reasonable expectation of finite residues in these commodities as a result of eating treated feedstuff (40 CFR 180.6(a)(3)).

#### V. Conclusion

Although the lack of toxicity supports a safety finding for an exemption from the requirement of tolerance for all crops, EPA is establishing tolerances for residues resulting from direct applications to certain commodities because the petitioner requested them for international trade purposes. Therefore, tolerances are established for residues of cyclaniliprole in or on Artichoke, globe at 1.5 ppm; Pepper/eggplant subgroup 8-10B at 1.5 ppm; Sunflower subgroup 20B at 0.4 ppm;

and Tomato subgroup 10A at 0.7 ppm. Additionally, the tolerance for Vegetable, fruiting, group 8-10 is removed as unnecessary.

#### VI. Statutory and Executive Order Reviews

This action establishes tolerances under FFDCA section 408(d) in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled "Regulatory Planning and Review" (58 FR 51735, October 4, 1993). Because this action has been exempted from review under Executive Order 12866, this action is not subject to Executive Order 13211, entitled "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001), or to Executive Order 13045, entitled "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997). This action does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), nor does it require any special considerations under Executive Order 12898, entitled "Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations" (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the tolerances in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), do not apply.

This action directly regulates growers, food processors, food handlers, and food retailers, not States or Tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or Tribal Governments, on the relationship between the National Government and the States or Tribal Governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian Tribes. Thus, the Agency has determined that Executive Order 13132, entitled "Federalism" (64 FR 43255, August 10, 1999) and Executive Order 13175, entitled "Consultation and Coordination with Indian Tribal

Governments” (65 FR 67249, November 9, 2000) do not apply to this action. In addition, this action does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act (UMRA) (2 U.S.C. 1501 *et seq.*).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note).

## VII. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

### List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides, and pests, Reporting and recordkeeping requirements.

Dated: November 15, 2022.

**Daniel Rosenblatt,**

*Acting Director, Registration Division, Office of Pesticide Programs.*

Therefore, for the reasons stated in the preamble, EPA is amending 40 CFR chapter 1 as follows:

### PART 180—TOLERANCES AND EXEMPTIONS FOR PESTICIDE CHEMICAL RESIDUES IN FOOD

■ 1. The authority citation for part 180 continues to read as follows:

**Authority:** 21 U.S.C. 321(q), 346a and 371.

■ 2. In § 180.694, amend the table in paragraph (a) by:

■ a. Adding a heading;

■ b. Adding in alphabetical order the entries “Artichoke, globe”, “Pepper/eggplant subgroup 8–10B”, “Sunflower subgroup 20B”, and “Tomato subgroup 8–10A”; and

■ c. Removing the entry for “Vegetable, fruiting, group 8–10”.

The additions read as follows:

#### § 180.694 Cyclaniliprole; tolerances for residues.

\* \* \* \* \*

TABLE 1 TO PARAGRAPH (a)

| Commodity                            | Parts per million |
|--------------------------------------|-------------------|
| * * * *                              | *                 |
| Artichoke, globe .....               | 1.5               |
| * * * *                              | *                 |
| Pepper/eggplant subgroup 8–10B ..... | 1.5               |
| * * * *                              | *                 |
| Sunflower subgroup 20B .....         | 0.4               |
| * * * *                              | *                 |
| Tomato subgroup 8–10A .....          | 0.7               |
| * * * *                              | *                 |

[FR Doc. 2022–25185 Filed 11–17–22; 8:45 am]  
BILLING CODE 6560–50–P

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

#### 43 CFR Part 8360

[LLORN03000.L63000000.HD0000.  
22X.241A.HAG 22–0018]

#### Final Supplementary Rule for Public Lands in the Lower Lake Creek Falls Special Recreation Management Area, Lane County, OR

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Final supplementary rule.

**SUMMARY:** The Bureau of Land Management (BLM) Oregon/Washington State Director is finalizing a supplementary rule prohibiting the use and possession of alcoholic beverages in the Lower Lake Creek Falls Special Recreation Management Area (SRMA).

**DATES:** This final supplementary rule is effective on December 19, 2022.

**ADDRESSES:** Inquiries may be directed to the BLM Northwest Oregon, Siuslaw Field Office at (541) 683–6600 or 3106 Pierce Pkwy., E Springfield, OR 97477. The final supplementary rule and accompanying environmental documents are available for inspection at the BLM Northwest Oregon, Siuslaw Field Office and on the ePlanning website at: <https://eplanning.blm.gov/eplanning-ui/project/67998/510>.

#### FOR FURTHER INFORMATION CONTACT:

Morgan Schneider, Team Lead, Telephone: (541) 683–6407, email: [BLM\\_OR\\_NO\\_SIU\\_NEPA@blm.gov](mailto:BLM_OR_NO_SIU_NEPA@blm.gov). Individuals in the United States who are deaf, deafblind, hard of hearing, or have

a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

#### SUPPLEMENTARY INFORMATION:

##### I. Background

The BLM Northwest Oregon District, Siuslaw Field Office manages the Lower Lake Creek SRMA. This popular recreation site contains unique waterfalls and natural water slide features that draw visitors from throughout the region. Visitors hike along a short trail to Lake Creek and enjoy swimming in natural pools and other in-water recreational activities. The consumption of alcoholic beverages in the SRMA has resulted in increased occurrences of unsafe behavior by visitors, such as wading in fast-moving and shallow sheet water flowing over natural rock formations. This final supplementary rule will ban the possession and consumption of alcoholic beverages in the area and, as a result, return the area to a safer and more family-friendly outdoor recreation opportunity for all members of the public to enjoy.

BLM law enforcement, recreation personnel, local law enforcement, and local search and rescue professionals agree that some visitors’ consumption of alcohol has been a major factor in contributing to increased public safety risks at the recreation site. Such public safety issues include an increase in fatal traffic accidents involving travelers driving to and from the recreation area, as well as increased problems associated with litter, sanitation, and noise. This final supplementary rule is needed to ensure a safe recreational setting for all visitors and the local communities of Triangle Lake and Blachly, Oregon.

This final supplementary rule is established under the authority of 43 CFR 8365.1–6, which allows BLM State Directors to establish supplementary rules for “the protection of persons, property, and public lands and resources.” This final supplementary rule prohibits visitors of all ages from consuming, possessing, or furnishing any beverage defined as an alcoholic beverage by Oregon State Law within the boundaries of the Lower Lake Creek SRMA, including, but not limited to, the parking lot, day-use area and surrounding hillside, Lower Lake Creek Falls swimming area, and pathways leading to the swimming area and waterfalls site. Prohibited acts under this provision include the consumption,

possession, and furnishing of any alcoholic beverage within motor vehicles, tents, or other structures in the area described herein.

## II. Discussion of Public Comments

On August 9, 2012, the BLM published a proposed supplementary rule (77 FR 47662) to replace an existing supplementary rule on alcohol use within the Lower Lake Creek SRMA. The existing supplementary rule, adopted in 1997, prohibits “consumption, possession, or furnishing of any alcoholic beverage in violation of Oregon State law.” Because of the way it is written, the existing supplementary rule does not actually ban the consumption, possession, or furnishing of alcohol in the SRMA.

The substance of the “Prohibited Act” in this final supplementary rule, which is the same as the substance of the proposed supplementary rule (*i.e.*, alcoholic beverages), would prohibit consumption, possession, or furnishing of “any beverage defined as an alcoholic beverage by Oregon State law while on public lands” within the boundaries of the Lower Lake Creek SRMA. In the proposed supplementary rule, the BLM explained that the existing supplementary rule is insufficient to control an increasing population of visitors who consume, possess, or furnish alcohol, and the proposed supplementary rule would put in place an enforceable ban on alcoholic beverages for all visitors, regardless of age.

The BLM received no comments on the proposed supplementary rule. The BLM signed a decision record on the *Proposed Rules for public land within the Lower Lake Creek SRMA Environmental Assessment* (DOI-BLM-ORWA-E050-2012-0002-EA), which was posted on the BLM’s ePlanning website on October 11, 2016. The BLM received two comments during the environmental assessment’s (EA) 30-day comment period. These commenters thanked the BLM for moving forward with a ban on alcoholic beverages at the Lower Lake Creek Falls SRMA.

## III. Procedural Matters

### *Executive Order (E.O.) 12866, Regulatory Planning and Review*

This supplementary rule is not a significant regulatory action and is not subject to review by the Office of Management and Budget under E.O. 12866. This supplementary rule would not have an annual effect of \$100 million or more on the economy. It is not intended to affect commercial activity but imposes a rule of conduct

on recreational visitors for public safety in a limited area of public lands. This supplementary rule would not adversely affect, in a material way, the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or Tribal Governments or communities. This supplementary rule would not create a serious inconsistency or otherwise interfere with an action taken or planned by another agency. This supplementary rule does not materially alter the budgetary effects of entitlements, grants, user fees, or loan programs or the right or obligations of their recipients, nor does it raise novel legal or policy issues; it merely strives to protect public safety.

### *National Environmental Policy Act*

A ban on alcoholic beverages was analyzed in the EA titled “Proposed Rules for Public Land Within the Lower Lake Creek SRMA” (DOI-BLM-ORWA-E050-2012-0002-EA). This document was subject to a 30-day public comment period. On July 23, 2012, BLM determined that this supplementary rule did not constitute a major Federal action significantly affecting the quality of the human environment under section 102(2)(C) of the National Environmental Policy Act (NEPA) of 1969, 42 U.S.C. On October 11, 2016, BLM signed a decision record based on the EA, which analyzed a permanent restriction on consuming alcohol. This supplementary rule merely regulates conduct on the BLM lands administered by the Siuslaw Field Office within the boundaries of the Lower Lake Creek Falls SRMA in order to protect public safety. A detailed environmental impact statement under NEPA is not required.

The BLM reviewed and signed a Determination of NEPA Adequacy (DNA) in 2018 (DOI-BLM-ORWA-N030-2017-0005-DNA) after confirming that the EA’s analysis is still valid. Circumstances in the SRMA have not changed since then.

The BLM has placed the EA, the decision record, the finding of no significant impact, and the DNA on file in the BLM administrative record at the address specified in the **ADDRESSES** section.

### *Regulatory Flexibility Act*

This final supplementary rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (RFA) of 1980, 5 U.S.C. 601, *et seq.* Congress enacted the RFA to ensure that Government regulations do not unnecessarily or disproportionately burden small entities. The RFA requires a regulatory flexibility analysis if a rule

would have a significant economic impact, either detrimental or beneficial, on a substantial number of small entities. The supplementary rule does not pertain specifically to commercial, not-for-profit, or governmental entities of any size, but to public consumption of alcoholic beverages on specific public lands.

### *Small Business Regulatory Enforcement Fairness Act*

This rule is not a major rule under 5 U.S.C. 804(2), the Small Business Regulatory Enforcement Fairness Act. This rule:

(a) Does not have an annual effect on the economy of \$100 million or more;

(b) Will not cause a major increase in costs or prices for consumers; individual industries; Federal, State, or local Government agencies; or geographic regions; and

(c) Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises.

### *Unfunded Mandates Reform Act*

This supplementary rule does not impose an unfunded mandate on State, local, or Tribal Governments of more than \$100 million per year; nor does it have a significant or unique effect on State, local, or Tribal Governments or the private sector. This supplementary rule does not impose requirements on State, local, or Tribal Governments. A statement containing the information required by the Unfunded Mandates Reform Act, 2 U.S.C. 1531 *et seq.*, is not required.

### *Paperwork Reduction Act*

This supplementary rule does not contain information collection requirements that the Office of Management and Budget must approve under the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.*

### *Executive Order 12630, Governmental Actions and Interference With Constitutionally Protected Property Rights (Takings)*

This rule does not affect a taking of private property or otherwise have takings implications under E.O. 12630. This supplementary rule is not a Government action capable of interfering with constitutionally protected property rights. This supplementary rule does not address property rights in any form and does not cause the impairment of any private property rights. A takings implication assessment is not required.

*Executive Order 13132, Federalism*

Under the criteria in section 1 of E.O. 13132, this rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement. This supplementary rule will not have a substantial direct effect on the States, on the relationship between the Federal Government and the States, or on the distribution of power and responsibilities among the various levels of Government. A federalism summary impact statement is not required.

*Executive Order 12988, Civil Justice Reform*

This rule complies with the requirements of E.O. 12988.

Specifically, the following rule:

(a) Meets the criteria of section 3(a) requiring that all regulations be reviewed to eliminate errors and ambiguity and be written to minimize litigation; and

(b) Meets the criteria of section 3(b)(2) requiring that all regulations be written in clear language and contain clear legal standards.

*Executive Order 13175, Consultation and Coordination With Indian Tribal Governments*

The Department of the Interior strives to strengthen its Government-to-Government relationship with Indian Tribes through a commitment to consultation with Indian Tribes and recognition of their right to self-governance and Tribal sovereignty. We have evaluated this rule under the Department's consultation policy and under the criteria in E.O. 13175 and have determined that it has no substantial direct effects on federally recognized Indian Tribes and that consultation under the Department's Tribal consultation policy is not required.

*Effects on the Energy Supply (E.O. 13211)*

This rule is not a significant energy action under the definition in E.O. 13211. A Statement of Energy Effects is not required.

**IV. Final Supplementary Rule***Author*

The principal author of this supplementary rule is Cheryl Adcock, Field Manager for the Siuslaw Field Office, Oregon/Washington.

For the reasons stated in the preamble, and under authority for supplementary rules at 43 U.S.C. 1740 and 43 CFR 8365.1–6, the BLM Oregon/Washington State Director establishes a

supplementary rule for public lands administered by the BLM in Oregon/Washington, to read as follows:

**Final Supplementary Rule for Public Lands in the Lower Lake Creek Falls Special Recreation Management Area, Lane County, OR****Definitions**

*Alcoholic beverage* uses the definition set forth in 2017 ORS 471.001(1).

**Prohibited Acts**

No person may consume, possess, or furnish alcoholic beverages within the boundaries of the Lower Lake Creek Falls SRMA, including, but not limited to, the parking lot, day-use area and surrounding hillside, Lower Lake Creek Falls swimming area, and pathways leading to the swimming area and falls site. Prohibited acts under this provision also include the consumption, possession, and furnishing of any alcoholic beverage within motor vehicles, tents, or other structures.

**Exemptions**

No persons, agencies, municipalities, or companies are exempt from the supplementary rule unless specifically authorized in writing by the BLM.

**Penalties**

Any person who violates this supplementary rule may be tried before a United States magistrate and fined in accordance with 18 U.S.C. 3571, imprisoned no more than 12 months under 43 U.S.C. 1733(a) and 43 CFR 8360.0–7, or both. In accordance with 43 CFR 8365.1–7, State or local officials also impose penalties for violations of Oregon law.

**Barry R. Bushue,**

*Bureau of Land Management, State Director, Oregon/Washington.*

[FR Doc. 2022–25015 Filed 11–17–22; 8:45 am]

**BILLING CODE 4310–33–P**

**FEDERAL COMMUNICATIONS COMMISSION****47 CFR Part 64**

[CG Docket No. 17–59, WC Docket 17–97, FCC 22–37; FR ID 113860]

**Advanced Methods To Target and Eliminate Unlawful Robocalls; Call Authentication Trust Anchor**

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rule; announcement of compliance date.

**SUMMARY:** In this document, the Federal Communications Commission

(Commission or FCC) announces that the Office of Management and Budget (OMB) has approved the public information collection associated with a rule that requires gateway providers to block calls based on a “reasonable Do Not Originate (DNO) list,” and that compliance with the rule will be required. This document is consistent with the *Sixth Report and Order* in CG Docket No. 17–59, *Fifth Report and Order* in WC Docket No. 17–97, and *Gateway Provider Report and Order*, FCC 22–37 adopted on May 19, 2022 and released on May 20, 2022, which states the Commission will publish a document in the **Federal Register** announcing a compliance date for the rule section and revise the rules accordingly.

**DATES:**

*Effective date:* The amendment is effective December 19, 2022.

*Compliance date:* Compliance with 47 CFR 64.1200(o), published at 87 FR 42916, July 18, 2022, is required on December 19, 2022.

**FOR FURTHER INFORMATION CONTACT:**

Jerusha Burnett, Consumer Policy Division, Consumer and Governmental Affairs Bureau, at (202) 418–0526, or email: [Jerusha.Burnett@fcc.gov](mailto:Jerusha.Burnett@fcc.gov).

**SUPPLEMENTARY INFORMATION:** This document announces that OMB approved the information collection requirement in § 64.1200(o) on November 3, 2022.

The Commission publishes this document as an announcement of the compliance date of the rule.

If you have any comments on the burden estimates listed below, or how the Commission can improve the collections and reduce any burdens caused thereby, please contact Cathy Williams, Federal Communications Commission, Room 3.317, 45 L Street NE, Washington, DC 20554. Please include the OMB Control Number, 3060–1303, in your correspondence. The Commission will also accept your comments via email at [PRA@fcc.gov](mailto:PRA@fcc.gov).

To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an email to [fcc504@fcc.gov](mailto:fcc504@fcc.gov) or call the Consumer and Governmental Affairs Bureau at (202) 418–0530 (voice), (202) 418–0432 (TTY).

This document also removes § 64.1200(p) of the Commission's rules, which advised that compliance was not required until OMB approval was obtained.

To request materials in accessible formats for people with disabilities (Braille, large print, electronic files,

audio format), send an email to [fcc504@fcc.gov](mailto:fcc504@fcc.gov) or call the Consumer and Governmental Affairs Bureau at (202) 418–0530 (voice).

### Synopsis

As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), the FCC is notifying the public that it received final OMB approval on July 20, 2022, for the information collection requirement contained in the modification to 47 CFR 64.1200(o).

Under 5 CFR 1320.5(b), an agency may not conduct or sponsor a collection of information unless it displays a current, valid OMB Control Number.

No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a current, valid OMB Control Number. The OMB Control Number for the information collection requirement in 47 CFR 64.1200(o) is 3060–1306.

The foregoing notice is required by the Paperwork Reduction Act of 1995, Public Law 104–13, October 1, 1995, and 44 U.S.C. 3507.

The total annual reporting burdens and costs for the respondents are as follows:

*OMB Control Number:* 3060–1306.

*OMB Approval Date:* November 3, 2022.

*OMB Expiration Date:* November 30, 2025.

*Form Number:* N/A.

*Respondents:* Business or other for-profit entities.

*Number of Respondents:* 6,493 respondents; 77,916 responses.

*Estimated Time per Response:* 1 hour.

*Frequency of Response:* On-occasion reporting requirement.

*Obligation to Respond:* Required to obtain or retain benefits. Statutory authority for these collections are contained in sections 4(i), 4(j), 201, 202, 217, 227, 227b, 251(e), 303(r), and 403 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 201, 202, 217, 227, 227b, 251(e), 303(r), 403.

*Total Annual Burden:* 77,916 hours.

*Total Annual Cost:* No cost.

*Needs and Uses:* The notification and request for comments sought to establish a new information collection as it pertains to the *Advanced Methods to Target and Eliminate Unlawful Robocalls Sixth Report and Order and Call Authentication Trust Anchor Fifth Report and Order* (“*Gateway Provider Report and Order*”) (87 FR 42916, July 18, 2022). Unwanted and illegal robocalls have long been the Federal Communication Commission’s (“Commission”) top source of consumer complaints and one of the Commission’s top consumer protection priorities. Foreign-originated robocalls represent a significant portion of illegal robocalls, and gateway providers serve as a critical choke-point for reducing the number of illegal robocalls received by American consumers. In the *Gateway Provider Report and Order*, the Commission took steps to prevent these foreign-originated illegal robocalls from reaching consumers and to help track these calls back to the source. Along with further extension of the Commission’s caller ID authentication requirements and Robocall Mitigation Database filing requirements, the Commission adopted several robocall mitigation requirements, including a requirement for gateway providers to respond to traceback within 24 hours, mandatory blocking requirements, a “know your upstream provider” requirement, and a general mitigation requirement.

*Gateway Provider Report and Order*, FCC 22–37, paras. 87–91, 47 CFR 64.1200(o).

A provider that serves as a gateway provider for particular calls must, with respect to those calls, block any calls purporting to originate from a number on a reasonable do-not-originate list. A list so limited in scope that it leaves out obvious numbers that could be included with little effort may be deemed unreasonable. The do-not-originate list may include only:

- Numbers for which the subscriber to which the number is assigned has requested that calls purporting to originate from that number be blocked

because the number is used for inbound calls only;

- North American Numbering Plan numbers that are not valid;
- Valid North American Numbering Plan Numbers that are not allocated to a provider by the North American Numbering Plan Administrator; and
- Valid North American Numbering Plan numbers that are allocated to a provider by the North American Numbering Plan Administrator, but are unused, so long as the provider blocking the calls is the allocatee of the number and confirms that the number is unused or has obtained verification from the allocatee that the number is unused at the time of blocking.

This document also removes § 64.1200(p) of the Commission’s rules, which advised that compliance was not required until OMB approval was obtained.

### List of Subjects in 47 CFR Part 64

Carrier equipment, Communications common carriers, Reporting and recordkeeping requirements, Telecommunications, Telephone.

Federal Communications Commission.

**Marlene Dortch,**

*Secretary, Office of the Secretary.*

The Federal Communications Commission amends part 64 of title 47 of the Code of Federal Regulations as follows:

### PART 64—MISCELLANEOUS RULES RELATING TO COMMON CARRIERS

■ 1. The authority citation for part 64 continues to read as follows:

**Authority:** 47 U.S.C. 151, 152, 154, 201, 202, 217, 218, 220, 222, 225, 226, 227, 227b, 228, 251(a), 251(e), 254(k), 255, 262, 276, 403(b)(2)(B), (c), 616, 620, 716, 1401–1473, unless otherwise noted; Pub. L. 115–141, Div. P, sec. 503, 132 Stat. 348, 1091.

#### § 64.1200 [Amended]

■ 2. Amend § 64.1200 by removing paragraph (p).

# Proposed Rules

Federal Register

Vol. 87, No. 222

Friday, November 18, 2022

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

#### 7 CFR Part 906

[Doc. No. AMS–SC–22–0048]

#### Decrease of Assessment Rate for Texas Oranges and Grapefruit

**AGENCY:** Agricultural Marketing Service, Department of Agriculture (USDA).

**ACTION:** Proposed rule.

**SUMMARY:** This proposed rule would implement a recommendation from the Texas Valley Citrus Committee to decrease the assessment rate established for the 2022–23 and subsequent fiscal periods. The proposed assessment rate would remain in effect indefinitely unless modified, suspended, or terminated.

**DATES:** Comments must be received by December 19, 2022.

**ADDRESSES:** Interested persons are invited to submit written comments concerning this proposed rule. Comments can be sent to the Docket Clerk, Market Development Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW, Stop 0237, Washington, DC 20250–0237. Comments can also be sent to the Docket Clerk electronically by Email: [MarketingOrderComment@usda.gov](mailto:MarketingOrderComment@usda.gov) or internet: <https://www.regulations.gov>. Comments should reference the document number and the date and page number of this issue of the **Federal Register** and can be viewed at: <https://www.regulations.gov>. All comments submitted in response to this proposed rule will be included in the record and will be made available to the public. Please be advised that the identity of the individuals or entities submitting the comments will be made public on the internet at the address provided above.

#### FOR FURTHER INFORMATION CONTACT:

Delaney Fuhrmeister, Marketing Specialist, or Christian D. Nissen, Regional Director, Southeast Region Branch, Market Development Division,

Specialty Crops Program, AMS, USDA; Telephone: (863) 324–3375, Fax: (863) 291–8614, or Email:

[Delaney.Fuhrmeister@usda.gov](mailto:Delaney.Fuhrmeister@usda.gov) or [Christian.Nissen@usda.gov](mailto:Christian.Nissen@usda.gov).

Small businesses may request information on complying with this regulation by contacting Richard Lower, Market Development Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW, STOP 0237, Washington, DC 20250–0237; Telephone: (202) 720–2491, Fax: (202) 720–8938, or Email: [Richard.Lower@usda.gov](mailto:Richard.Lower@usda.gov).

**SUPPLEMENTARY INFORMATION:** This action, pursuant to 5 U.S.C. 553, proposes to amend regulations issued to carry out a marketing order as defined in 7 CFR 900.2(j). This proposed rule is issued under Marketing Order No. 906 as amended (7 CFR part 906), regulating the handling of oranges and grapefruit grown in the Lower Rio Grande Valley in Texas. Part 906 (referred to as “the Order”) is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the “Act.” The Texas Valley Citrus Committee (Committee) locally administers the Order and is comprised of producers and handlers of oranges and grapefruit operating within the area of production.

The Agricultural Marketing Service (AMS) is issuing this proposed rule in conformance with Executive Orders 12866 and 13563. Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. This action falls within a category of regulatory actions that the Office of Management and Budget (OMB) exempted from Executive Order 12866 review.

This proposed rule has been reviewed under Executive Order 13175—Consultation and Coordination with Indian Tribal Governments, which requires agencies to consider whether their rulemaking actions would have tribal implications. AMS has

determined that this proposed rule is unlikely to have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. Under the Order now in effect, Texas citrus handlers are subject to assessments. Funds to administer the Order are derived from such assessments. It is intended that the assessment rate as proposed herein would be applicable to all assessable oranges and grapefruit for the 2022–23 fiscal period, and continue until amended, suspended, or terminated.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Department of Agriculture (USDA) a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing, USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review USDA’s ruling on the petition, provided an action is filed no later than 20 days after the date of the entry of the ruling.

This proposed rule would decrease the assessment rate for the 2022–23 and subsequent fiscal periods from \$0.05 to \$0.03 per 7/10-bushel carton or equivalent of oranges and grapefruit.

The Order authorizes the Committee, with the approval of AMS, to formulate an annual budget of expenses and collect assessments from handlers to administer the program. The members of the Committee are familiar with the Committee’s needs and with the costs for goods and services in their local area and are able to formulate an appropriate budget and assessment rate. The assessment rate is formulated and discussed in a public meeting, and all directly affected persons have an

opportunity to participate and provide input.

For the 2021–22 and subsequent fiscal periods, the Committee recommended, and AMS approved, an assessment rate that would continue in effect from fiscal period to fiscal period unless modified, suspended, or terminated by AMS upon recommendation and information submitted by the Committee or other available information.

Although this assessment rate would be in effect for an indefinite period, the Committee would continue to meet prior to or during each fiscal period to recommend a budget of expenses and consider recommendations for modification of the assessment rate. Dates and times of Committee meetings are available from the Committee or AMS. Committee meetings are open to the public and interested persons may express their views at these meetings. AMS evaluates Committee recommendations and other available information to determine whether modification of the assessment rate is needed, and further rulemaking would be undertaken as necessary. The Committee's 2022–23 budget and those for subsequent fiscal periods would be reviewed and, as appropriate, approved by AMS.

The Committee met on May 24, 2022, and recommended 2022–23 expenditures of \$134,970 and an assessment rate of \$0.03 per 7/10-bushel carton or equivalent. In comparison, last year's budgeted expenditures were \$43,900. The assessment rate of \$0.03 is \$0.02 lower than the rate currently in effect. The Committee voted to decrease the assessment rate due to an increase in production. The Committee estimates production for 2022–23 fiscal period to be approximately 4 million 7/10-bushel cartons or equivalent, an increase from the 1 million cartons estimated to be produced the previous year. At the current assessment rate, assessment income would equal \$200,000, exceeding the Committee's anticipated expenditures of \$134,970. By decreasing the assessment rate by \$0.02, assessment income would be \$120,000. This amount, along with reserve funds and interest income, should provide sufficient funds to meet 2022–23 anticipated expenses.

Major expenditures recommended by the Committee for the 2022–23 year include \$66,220 for management expenses, \$50,000 for compliance, and \$18,750 for administrative expenses. Budgeted expenses for these items in 2021–22 were \$20,000, \$10,000, and \$13,900, respectively.

The assessment rate recommended by the Committee was derived by reviewing anticipated expenses, expected shipments of Texas oranges and grapefruit, and the level of funds in reserve. Orange and grapefruit shipments for the 2022–23 year are estimated at 4,000,000 7/10-bushel cartons or equivalent, which should provide \$120,000 in assessment income (4,000,000 cartons multiplied by \$0.03). Income derived from handler assessments at the proposed rate, along with reserve funds and interest income, would be adequate to cover budgeted expenses. Funds in the reserve (currently about \$89,126) are expected to be kept within the maximum permitted by the Order (approximately

one fiscal period's expenses as authorized in § 906.35).

The proposed assessment rate would continue in effect indefinitely unless modified, suspended, or terminated by AMS upon recommendation and information submitted by the Committee or other available information.

After consideration of all relevant material presented, including the information and recommendations submitted by the Committee and other available information, AMS has determined that this proposed rule is consistent with and will effectuate the purposes of the Act.

**Initial Regulatory Flexibility Analysis**

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA) (5 U.S.C. 601–612), AMS has considered the economic impact of this proposed rule on small entities. Accordingly, AMS has prepared this initial regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of businesses subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and the rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf.

There are approximately 120 producers of oranges and grapefruit in the production area and 14 handlers subject to regulation under the marketing order. Small agricultural producers are defined by the Small Business Administration (SBA) as those having annual receipts of \$3,500,000 or less, and small agricultural service firms are defined as those whose annual

receipts are \$30,000,000 or less (13 CFR 121.201).

According to data from the National Agricultural Statistics Service (NASS), the weighted average free-on-board price for Texas citrus for the 2019–20 season was approximately \$16.20 per 7/10-bushel carton or equivalent with total shipments of around 8.2 million cartons. Based on the number of handlers and the NASS data, handlers have average annual receipts of well below \$30 million (\$16.20 multiplied by 8.2 million cartons equals \$132,840,000, divided by 14 equals \$9.5 million).

In addition, based on NASS and Committee data the reported weighted average producer price for the 2020–21 season was around \$9.82 per 7/10-bushel carton of Texas citrus with total shipments of around 4.45 million cartons. Based on producer price, shipment data, and the total number of Texas citrus producers, the average annual producer revenue is significantly below \$3,500,000 (\$9.82 multiplied by 4.45 million cartons equals \$43,699,000 divided by 119 producers equals \$367,218). Thus, the majority of Texas citrus handlers and growers may be classified as small entities.

This proposal would decrease the assessment rate established for the Committee and collected from handlers for the 2022–23 and subsequent fiscal periods from \$0.05 to \$0.03 per 7/10-bushel carton or equivalent of oranges and grapefruit grown in the Lower Rio Grande Valley in Texas. The Committee recommended 2022–23 expenditures of \$134,970 and an assessment rate of \$0.03 per 7/10-bushel carton. The proposed assessment rate of \$0.03 is \$0.02 less than the previous rate. The quantity of assessable Texas Citrus for the 2022–23 season is estimated at 4 million 7/10-bushel cartons. Thus, the \$0.03 rate should provide \$120,000 in assessment income. Income derived from handler assessments along with interest income and funds from the Committee's authorized reserve would be adequate to cover budgeted expenses.

Major expenditures recommended by the Committee for the 2022–23 fiscal period include \$66,220 for management expenses, \$50,000 for compliance, and \$18,750 for administrative expenses. Budgeted expenses for these items in 2021–22 were \$20,000, \$10,000, and \$13,900, respectively.

The Committee recommended decreasing the assessment rate based on the 2022–23 estimate of 4 million 7/10-bushel carton or equivalent, 3 million more than estimated for the previous year. At the current assessment rate of \$0.05 and with the 2022–23 crop estimated to be 4 million 7/10-bushel

cartons, assessment income would equal \$200,000 (\$0.05 multiplied by 4 million cartons), an amount exceeding the Committee's anticipated expenditures of \$134,970. By decreasing the assessment rate by \$0.02, assessment income would be approximately \$120,000 (\$0.03 multiplied by 4 million cartons). This amount, along with interest income, and funds from the authorized reserve, should provide sufficient funds to meet 2022–23 anticipated expenses.

Prior to arriving at this budget and assessment rate, the Committee considered maintaining the current assessment rate of \$0.05. However, leaving the assessment unchanged would generate excess revenue over the Committee's budgeted expenses for the 2022–23 and potentially cause reserve amounts to surpass the limits specified by the Order. Consequently, the Committee determined the assessment rate should be decreased to \$0.03 per 7/10-bushel carton and the alternative rejected.

A review of historical information and preliminary information pertaining to the upcoming season indicates that the producer price for the 2022–23 season should be approximately \$12.85 per 7/10-bushel carton or equivalent of oranges and grapefruit. The proposed assessment rate of \$0.03 per 7/10-bushel carton or equivalent of oranges and grapefruit represents 0.23 percent of the \$12.85 revenue for the 2022–23 fiscal period as a percentage of total producer revenue (\$0.03 divided by \$12.85 multiplied by 100).

This proposed rule would decrease the assessment obligation imposed on handlers. Assessments are applied uniformly on all handlers, and some of the costs may be passed on to producers. However, decreasing the assessment rate reduces the burden on handlers and may also reduce the burden on producers.

The Committee's meeting was widely publicized throughout the Texas citrus industry and all interested persons were invited to attend the meeting and participate in Committee deliberations on all issues. Like all Committee meetings, the May 24, 2022, meeting was a public meeting and all entities, both large and small, were able to express views on this issue. Finally, interested persons are invited to submit comments on this proposed rule, including the regulatory and informational impacts of this action on small businesses.

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the Order's information collection requirements have been previously approved by OMB and

assigned OMB No. 0581–0189 Fruit Crops. No changes in those requirements would be necessary as a result of this proposed rule. Should any changes become necessary, they would be submitted to OMB for approval.

This proposed rule would not impose any additional reporting or recordkeeping requirements on either small or large Texas oranges and grapefruit handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies.

AMS is committed to complying with the E-Government Act, to promote the use of the internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

AMS has not identified any relevant Federal rules that duplicate, overlap, or conflict with this proposed rule.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: <https://www.ams.usda.gov/rules-regulations/moa/small-businesses>. Any questions about the compliance guide should be sent to Richard Lower at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

A 30-day comment period is provided to allow interested persons to comment on this proposed rule. All written comments timely received will be considered before a final determination is made on this matter.

#### List of Subjects in 7 CFR Part 906

Grapefruit, Marketing agreements, Oranges, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, the Agricultural Marketing Service is proposing to amend 7 CFR part 906 as follows:

#### **PART 906—ORANGES AND GRAPEFRUIT GROWN IN LOWER RIO GRANDE VALLEY IN TEXAS**

- 1. The authority citation for 7 CFR part 906 continues to read as follows:

Authority: 7 U.S.C. 601–674.

- 2. Section 906.235 is revised to read as follows:

##### **§ 906.235 Assessment rate.**

On and after August 1, 2022, an assessment rate of \$0.03 per 7/10-bushel carton or equivalent is established for

oranges and grapefruit grown in the Lower Rio Grande Valley in Texas.

**Erin Morris,**

*Associate Administrator, Agricultural Marketing Service.*

## **DEPARTMENT OF TRANSPORTATION**

### **Federal Aviation Administration**

#### **14 CFR Part 39**

[Docket No. FAA–2022–1474; Project Identifier MCAI–2022–00888–T]

**RIN 2120–AA64**

#### **Airworthiness Directives; MHI RJ Aviation ULC (Type Certificate Previously Held by Bombardier, Inc.) Airplanes**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking (NPRM).

**SUMMARY:** The FAA proposes to adopt a new airworthiness directive (AD) for certain MHI RJ Aviation ULC Model CL–600–2B19 (Regional Jet Series 100 & 440), CL–600–2C10 (Regional Jet Series 700, 701 & 702), CL–600–2C11 (Regional Jet Series 550), CL–600–2D15 (Regional Jet Series 705), CL–600–2D24 (Regional Jet Series 900), and CL–600–2E25 (Regional Jet Series 1000) airplanes. This proposed AD was prompted by reports from the supplier that sensing elements of the bleed air leak detection system were manufactured with insufficient salt fill, which can result in an inability to detect hot bleed air leaks. This proposed AD would require testing of all affected overheat detection sensing elements of the bleed air leak detection system, and replacement if necessary. This proposed AD would also prohibit the installation of affected parts. The FAA is proposing this AD to address the unsafe condition on these products.

**DATES:** The FAA must receive comments on this proposed AD by January 3, 2023.

**ADDRESSES:** You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to [regulations.gov](https://www.regulations.gov). Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- **Hand Delivery:** Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

**AD Docket:** You may examine the AD docket at *regulations.gov* under Docket No. FAA–2022–1474; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

**Material Incorporated by Reference:**

- For service information identified in this NPRM, contact MHI RJ Aviation Group, Customer Response Center, 3655 Ave. des Grandes-Tourelles, Suite 110, Boisbriand, Québec J7H 0E2 Canada; North America toll-free telephone 833–990–7272 or direct-dial telephone 450–990–7272; fax 514–855–8501; email [thd.crj@mhirj.com](mailto:thd.crj@mhirj.com); website [mhirj.com](http://mhirj.com).
- You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

**FOR FURTHER INFORMATION CONTACT:**

Thomas Niczky, Aerospace Engineer, Avionics & Electrical Systems Section, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7347; email [9-avs-nyaco-cos@faa.gov](mailto:9-avs-nyaco-cos@faa.gov).

**SUPPLEMENTARY INFORMATION:**

**Comments Invited**

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include “Docket No. FAA–2022–1474; Project Identifier MCAI–2022–00888–T” at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend the proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov*, including any personal information you provide. The agency will also post a report summarizing each

substantive verbal contact received about this NPRM.

**Confidential Business Information**

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as “PROPIN.” The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Thomas Niczky, Aerospace Engineer, Avionics & Electrical Systems Section, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7347; email [9-avs-nyaco-cos@faa.gov](mailto:9-avs-nyaco-cos@faa.gov).

Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

**Background**

Transport Canada Civil Aviation (TCCA), which is the aviation authority for Canada, has issued TCCA AD CF–2022–16R1, dated July 5, 2022 (TCCA AD CF–2022–16R1) (also referred to after this as the MCAI), to correct an unsafe condition on Model CL–600–2B19 (Regional Jet Series 100 & 440), CL–600–2C10 (Regional Jet Series 700, 701 & 702), CL–600–2C11 (Regional Jet Series 550), CL–600–2D15 (Regional Jet Series 705), CL–600–2D24 (Regional Jet Series 900), and CL–600–2E25 (Regional Jet Series 1000) airplanes. The MCAI states that MHI RJ Aviation ULC received reports from the supplier of the overheat detection sensing elements of a manufacturing quality escape. Some of the sensing elements of the bleed air leak detection system were manufactured with insufficient salt fill, which can result in an inability to detect hot bleed air leaks and cause damage to surrounding structures and systems that can prevent continued safe flight and landing.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2022–1474.

**Related Service Information Under 1 CFR Part 51**

The FAA reviewed MHI RJ Service Bulletin 601R–36–021, Revision D, dated May 25, 2022; including Appendix A, Revision B, dated March 14, 2022; and MHI RJ Service Bulletin 670BA–36–025, Revision C, dated May 25, 2022; including Appendix A, Revision B, dated Mar 14, 2022; Appendix B, dated October 21, 2021; and Appendix C, dated March 14, 2022. This service information specifies procedures for testing affected bleed air leak detection system sensing elements (*i.e.*, those marked with a date code before “A2105” (which corresponds to January 31, 2021), with a part number defined in this service information) to determine if they are serviceable, and replacing failed sensing elements with serviceable ones. This service information also allows deferring the replacement of an affected part under certain conditions and allows operating the airplane with certain deactivated defective sensing elements. These documents are distinct since they apply to different airplane models. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

**FAA’s Determination**

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to the FAA’s bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI and service information described above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

**Proposed AD Requirements in This NPRM**

This proposed AD would require accomplishing the actions specified in the service information already described. This proposed AD would also prohibit the installation of affected parts.

**Costs of Compliance**

The FAA estimates that this AD, if adopted as proposed, would affect 1,126 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

## ESTIMATED COSTS FOR REQUIRED ACTIONS

| Model  | Labor cost                               | Parts cost | Cost per product | Cost on U.S. operators |
|--|--|------------|------------------|------------------------|
| Model CL-600-2B19 (526 airplanes) .....  | 29 work hours × \$85 per hour = \$2,465. | \$0        | \$2,465          | \$1,296,590            |
| Model CL-600-2C10 and CL-600-2C11, CL-600-2D15 and CL-600-2D24, and CL-600-2E25 (600 airplanes). | 82 work hours × \$85 per hour = \$6,970. | 0          | 6,970            | 4,182,000              |

The FAA estimates the following costs to do any necessary on-condition actions that would be required based on

the results of any required actions. The FAA has no way of determining the

number of aircraft that might need these on-condition actions:

## ESTIMATED COSTS OF ON-CONDITION ACTIONS

| Model/serial No. (S/Ns)                        | Labor cost  | Parts cost           | Cost per product |
|--|---|----------------------|------------------|
| CL-600-2B19, S/Ns 7002-7323 .....              | Up to 26 work-hours × \$85 per hour = \$2,210 ..... | Up to \$113,200 .... | Up to \$115,410. |
| CL-600-2B19, S/Ns 7324-8113 .....              | Up to 24 work-hours × \$85 per hour = \$2,040 ..... | Up to \$100,598 .... | Up to \$102,638. |
| CL-600-2C10 and CL-600-2C11, S/Ns 10002-10347. | Up to 54 work-hours × \$85 per hour = \$4,590 ..... | Up to \$70,758 ..... | Up to \$75,348.  |
| CL-600-2D15 and CL-600-2D24, S/Ns 15001-15494. | Up to 58 work-hours × \$85 per hour = \$4,930 ..... | Up to \$74,598 ..... | Up to \$79,528.  |
| CL-600-2E25, S/Ns 19001-19064 .....            | Up to 62 work-hours × \$85 per hour = \$5,270 ..... | Up to \$81,478 ..... | Up to \$86,748.  |

The FAA has included all known costs in its cost estimate. According to the manufacturer, however, some or all of the costs of this proposed AD may be covered under warranty, thereby reducing the cost impact on affected operators.

**Authority for This Rulemaking**

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

**Regulatory Findings**

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or

on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Would not affect intrastate aviation in Alaska, and
- (3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 39**

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

**The Proposed Amendment**

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

**PART 39—AIRWORTHINESS DIRECTIVES**

- 1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

**§ 39.13 [Amended]**

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

**MHI RJ Aviation ULC (Type Certificate Previously Held by Bombardier, Inc.):**  
Docket No. FAA-2022-1474; Project Identifier MCAI-2022-00888-T.

**(a) Comments Due Date**

The FAA must receive comments on this airworthiness directive (AD) by January 3, 2023.

**(b) Affected ADs**

None.

**(c) Applicability**

This AD applies to MHI RJ Aviation ULC airplanes, certificated in any category, and identified in paragraphs (c)(1) through (4) of this AD.

(1) Model CL-600-2B19 (Regional Jet Series 100 & 440) airplanes, serial numbers 7002 through 7990 inclusive, and 8000 through 8113 inclusive.

(2) Model CL-600-2C10 (Regional Jet Series 700, 701 & 702) and CL-600-2C11 (Regional Jet Series 550) airplanes, serial numbers 10002 through 10347 inclusive.

(3) Model CL-600-2D15 (Regional Jet Series 705) and Model CL-600-2D24 (Regional Jet Series 900) airplanes, serial numbers 15001 through 15494 inclusive.

(4) Model CL-600-2E25 (Regional Jet Series 1000), serial numbers 19001 through 19064 inclusive.

**(d) Subject**

Air Transport Association (ATA) of America Code 36, Pneumatic.

**(e) Unsafe Condition**

This AD was prompted by reports that sensing elements of the bleed air leak detection system were manufactured with insufficient salt fill. The FAA is issuing this AD to address insufficient salt fill, which can result in an inability to detect hot bleed air leaks, which can cause damage to surrounding structures and systems that can prevent continued safe flight and landing.

**(f) Compliance**

Comply with this AD within the compliance times specified, unless already done.

**(g) Definitions**

For the purposes of this AD, the definitions specified in paragraphs (g)(1) through (4) apply.

(1) *Group 1 airplanes*: The airplanes identified in paragraph (c)(1) of this AD.

(2) *Group 2 airplanes*: The airplanes identified in paragraphs (c)(2) through (4) of this AD.

(3) *Affected part*: A sensing element marked with a date code before A2105 and having a part number as defined in Section 1, Paragraph G(1), of MHI RJ Service Bulletin 601R-36-021, Revision D, dated May 25,

2022, for Group 1 airplanes, and in Appendix B, dated October 21, 2021, of MHI RJ Service Bulletin 670BA-36-025, Revision C, dated May 25, 2022, for Group 2 airplanes, unless the sensing element has been tested and found to be serviceable in accordance with paragraphs (g)(3)(i) and (ii) or paragraph (h) of this AD.

(i) Has been tested in accordance with Section 3 of the Accomplishment Instructions of Kidde Aerospace and Defense Service Bulletin CFD-26-5 and found to be serviceable; and

(ii) Has been marked on one face of its connector hex nut and is packaged in accordance with Section 3.C. of the Accomplishment Instructions—Identification Procedure of the Kidde Aerospace and Defense Service Bulletin CFD-26-5.

(4) *Serviceable part*: A sensing element that is not an affected part.

**(h) Testing**

Perform a test of the bleed air leak detection system sensing elements to determine if they are serviceable, in accordance with Section 2, Part A through Part F, of the Accomplishment Instructions of MHI RJ Service Bulletin 601R-36-021, Revision D, dated May 25, 2022, for Group 1 airplanes; and Section 2, Part A through Part M, of the Accomplishment Instructions of MHI RJ Service Bulletin 670BA-36-025, Revision C, dated May 25, 2022, for Group 2 airplanes; within the applicable compliance time indicated in figure 1 to paragraph (h) of this AD.

Figure 1 to Paragraph (h)—Compliance Time

| Airplanes | Applicable Service Bulletin Accomplishment Instructions  | Compliance Time  |
|-----------|--|--|
| Group 1   | MHI RJ Service Bulletin 601R-36-021, Revision D, dated May 25, 2022, Part D  | Within 4,400 flight hours or 24 months, whichever occurs first, after the effective date of this AD. |
|           | MHI RJ Service Bulletin 601R-36-021, Revision D, dated May 25, 2022, Part A, Part B, Part C, Part E, and Part F  | Within 6,600 flight hours or 36 months, whichever occurs first, after the effective date of this AD. |
| Group 2   | MHI RJ Service Bulletin 670BA-36-025, Revision C, dated May 25, 2022, Part K   | Within 8,400 flight hours or 48 months, whichever occurs first, after the effective date of this AD. |
|           | MHI RJ Service Bulletin 670BA-36-025, Revision C, dated May 25, 2022, Part A, Part B, Part C, Part D, Part E, Part F, Part G, Part H, Part I, Part J, Part L, and Part M | Within 2,200 flight hours or 18 months, whichever occurs first, after the effective date of this AD. |

**(i) Replacement**

(1) For Group 1 airplanes: If any sensing element is found not serviceable during the tests required by paragraph (h) of this AD, before further flight, replace the sensing element with a serviceable part in accordance with Section 2, Part A through Part F, as applicable, of the Accomplishment Instructions of MHI RJ Service Bulletin 601R-36-021, Revision D, dated May 25, 2022.

(2) For Group 2 airplanes: If any sensing element is found not serviceable during the tests required by paragraph (j) of this AD, before further flight, unless deferred in accordance with paragraph (j) of this AD, replace the sensing element with a serviceable part in accordance with Section 2, Part A through Part M, as applicable, of the Accomplishment Instructions of MHI RJ

Service Bulletin 670BA-36-025, Revision C, dated May 25, 2022.

**(j) Deferred Replacement for Group 2 Airplanes**

The replacement of an affected part with a serviceable part for Group 2 airplanes, as required by paragraph (i)(2) of this AD, may be deferred up to a maximum of 10 days under the conditions specified in paragraphs (j)(1) or (2) of this AD.

(1) A single bleed air leak detection loop (loop A or loop B) sensing element for a given Part (Part A through Part M of MHI RJ Service Bulletin 670BA-36-025, Revision C, dated May 25, 2022) is found not serviceable, provided that the conditions specified in paragraphs (j)(1)(i) through (iv) of this AD have been satisfied.

(i) The remaining operative bleed air leak detection loop (loop A or loop B) sensing

elements have been tested and found to be serviceable in accordance with paragraph (h) of this AD.

(ii) The applicable maintenance procedures of Appendix C, dated March 14, 2022, of MHI RJ Service Bulletin 670BA-36-025, Revision C, dated May 25, 2022, to deactivate the defective sensing element are accomplished prior to operation of the airplane with the defective sensing element inoperative.

(iii) A placard has been installed on the BLEED AIR control panel in accordance with Section 2, Part A through Part M, as applicable, of the Accomplishment Instructions of MHI RJ Service Bulletin 670BA-36-025, Revision C, dated May 25, 2022.

(iv) All flightcrew have been advised that the airplane is dispatched with one out of two bleed air leak detection loops inoperative.

(2) Both bleed air leak detection loop A and loop B sensing elements for a given part (Part A through Part M of MHI RJ Service Bulletin 670BA-36-025, Revision C, dated May 25, 2022) are found not serviceable, provided that the conditions specified in paragraphs (j)(2)(i) through (iv) of this AD have been satisfied.

(i) The applicable maintenance procedures of Appendix C, dated March 14, 2022, of MHI RJ Service Bulletin 670BA-36-025, Revision C, dated May 25, 2022, to deactivate the defective sensing elements are accomplished prior to operation of the airplane with the defective sensing elements inoperative.

(ii) The applicable instructions and limitations of the operator's existing FAA-approved Minimum Equipment List (MEL) item 36-21-06, sub-item 1, 2, or 3, as applicable, in accordance with Section 2, Part A through Part M, of the Accomplishment Instructions of MHI RJ Service Bulletin 670BA-36-025, Revision C, dated May 25, 2022, are accomplished prior to operation of the airplane with the defective sensing elements inoperative.

(iii) A placard has been installed on the BLEED AIR control panel in accordance with Section 2, Part A through Part M, as applicable, of the Accomplishment Instructions of MHI RJ Service Bulletin 670BA-36-025, Revision C, dated May 25, 2022.

(iv) All flightcrew have been advised that the airplane is dispatched with both bleed air leak detection loops inoperative.

#### (k) Parts Installation Prohibition

As of the effective date of this AD, no person may install an affected part on any airplane.

#### (l) Credit for Previous Actions

This paragraph provides credit for actions required by paragraphs (h), (i), and (j) of this AD, if those actions were performed before the effective date of this AD using the service information specified in paragraphs (l)(1) and (2) of this AD. For performing the actions specified in the service information for the Group 1 airplanes: If the sensing element was found not serviceable, replacement is required before further flight; deferred replacement of an affected part is prohibited. For performing the actions specified in the service information for the Group 2 airplanes: If the sensing element was found not serviceable, deferred replacement of the affected part is acceptable, as specified in paragraph (j) of this AD.

(1) For Group 1 airplanes:

(i) MHI RJ Service Bulletin 601R-36-021, dated July 5, 2021.

(ii) MHI RJ Service Bulletin 601R-36-021, Revision A, dated October 21, 2021.

(iii) MHI RJ Service Bulletin 601R-36-021, Revision B, dated December 2, 2021.

(iv) MHI RJ Service Bulletin 601R-36-021, Revision C, dated March 14, 2022.

(2) For Group 2 airplanes:

(i) MHI RJ Service Bulletin 670BA-36-025, dated July 5, 2021.

(ii) MHI RJ Service Bulletin 670BA-36-025, Revision A, dated October 21, 2021.

(iii) MHI RJ Service Bulletin 670BA-36-025, Revision B, dated March 14, 2022.

#### (m) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, New York ACO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the New York ACO Branch, mail it to ATTN: Program Manager, Continuing Operational Safety, at the address identified in paragraph (n)(2) of this AD or email to: [9-avs-nyaco-cos@faa.gov](mailto:9-avs-nyaco-cos@faa.gov). If mailing information, also submit information by email. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer*: For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, New York ACO Branch, FAA; or Transport Canada Civil Aviation (TCCA); or MHI RJ Aviation ULC's TCCA Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.

#### (n) Additional Information

(1) Refer to Transport Canada Civil Aviation (TCCA) AD CF-2022-16R1, dated July 5, 2022, for related information. This TCCA AD may be found in the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA-2022-1474.

(2) For more information about this AD, contact Thomas Niczky, Aerospace Engineer, Avionics & Electrical Systems Section, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516-228-7347; email [9-avs-nyaco-cos@faa.gov](mailto:9-avs-nyaco-cos@faa.gov).

#### (o) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) MHI RJ Service Bulletin 601R-36-021, Revision D, dated May 25, 2022.

(ii) MHI RJ Service Bulletin 670BA-36-025, Revision C, dated May 25, 2022.

(3) For service information identified in this AD, contact MHI RJ Aviation Group, Customer Response Center, 3655 Ave. des Grandes-Tourelles, Suite 110, Boisbriand, Québec J7H 0E2 Canada; North America toll-free telephone 833-990-7272 or direct-dial telephone 450-990-7272; fax 514-855-8501; email [thd.crj@mhirj.com](mailto:thd.crj@mhirj.com); website [mhirj.com](http://mhirj.com).

(4) You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206-231-3195.

(5) You may view this service information that is incorporated by reference at the

National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email [fr.inspection@nara.gov](mailto:fr.inspection@nara.gov), or go to: [www.archives.gov/federal-register/cfr/ibr-locations.html](http://www.archives.gov/federal-register/cfr/ibr-locations.html).

Issued on November 9, 2022.

**Christina Underwood,**

*Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.*

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 39

[Docket No. FAA-2022-1473; Project Identifier MCAI-2022-00902-T]

**RIN 2120-AA64**

### Airworthiness Directives; Dassault Aviation Airplanes

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking (NPRM).

**SUMMARY:** The FAA proposes to supersede Airworthiness Directive (AD) 2020-21-20, which applies to certain Dassault Aviation Model FALCON 900EX airplanes. AD 2020-21-20 requires revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive maintenance requirements and/or airworthiness limitations. Since the FAA issued AD 2020-21-20, the FAA has determined that new or more restrictive airworthiness limitations are necessary. This proposed AD would continue to require the actions in AD 2020-21-20 and would require revising the existing maintenance or inspection program, as applicable, to incorporate additional new or more restrictive airworthiness limitations, as specified in a European Union Aviation Safety Agency (EASA) AD, which is proposed for incorporation by reference (IBR). The FAA is proposing this AD to address the unsafe condition on these products.

**DATES:** The FAA must receive comments on this proposed AD by January 3, 2023.

**ADDRESSES:** You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to [regulations.gov](https://www.regulations.gov). Follow the instructions for submitting comments.
- *Fax:* 202-493-2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M-

30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- **Hand Delivery:** Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

**AD Docket:** You may examine the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA-2022-1473; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

**Material Incorporated by Reference:**

- For material that is proposed for IBR in this NPRM, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email [ADs@easa.europa.eu](mailto:ADs@easa.europa.eu); website [easa.europa.eu](https://easa.europa.eu). You may find this material on the EASA website at [ad.easa.europa.eu](https://ad.easa.europa.eu). It is also available at [regulations.gov](https://www.regulations.gov) under Docket No. FAA-2022-1473.

- You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206-231-3195.

**FOR FURTHER INFORMATION CONTACT:** Tom Rodriguez, Aerospace Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone 206-231-3226; email [tom.rodriguez@faa.gov](mailto:tom.rodriguez@faa.gov).

**SUPPLEMENTARY INFORMATION:**

**Comments Invited**

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include “Docket No. FAA-2022-1473; Project Identifier MCAI-2022-00902-T” at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to [regulations.gov](https://www.regulations.gov), including any personal

information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

**Confidential Business Information**

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as “PROPIN.” The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Tom Rodriguez, Aerospace Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone 206-231-3226; email [tom.rodriguez@faa.gov](mailto:tom.rodriguez@faa.gov). Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

**Background**

The FAA issued AD 2020-21-20, Amendment 39-21293 (85 FR 69144, November 2, 2020) (AD 2020-21-20), for certain Dassault Aviation Model FALCON 900EX airplanes. AD 2020-21-20 was prompted by MCAI originated by EASA, which is the Technical Agent for the Member States of the European Union. EASA issued AD 2020-0117, dated May 20, 2020 (EASA AD 2020-0117) (which corresponds to FAA AD 2020-21-20), to correct an unsafe condition.

AD 2020-21-20 requires revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive maintenance requirements and/or airworthiness limitations. The FAA issued AD 2020-21-20 to address among other things, fatigue cracking and damage in principal structural elements; such fatigue cracking and damage could result in reduced structural integrity of the airplane. AD 2020-21-20 specifies that accomplishing the actions required by paragraph (g) or (i) of that AD terminates the requirements of paragraph (g)(1) of AD 2010-26-05, Amendment 39-16544 (75 FR 79952, December 21, 2010) for Dassault

Aviation Model FALCON 900EX airplanes, serial number (S/N) 97 and S/Ns 120 and higher. This proposed AD would therefore continue to allow that terminating action.

**Actions Since AD 2020-21-20 Was Issued**

Since the FAA issued AD 2020-21-20, EASA superseded EASA AD 2020-0117 and issued EASA AD 2022-0141, dated July 7, 2022 (EASA AD 2022-0141) (referred to after this as the MCAI), for certain Dassault Aviation Model FALCON 900EX airplanes. The MCAI states that new or more restrictive airworthiness limitations have been developed.

Airplanes with an original airworthiness certificate or original export certificate of airworthiness issued after November 15, 2021 must comply with the airworthiness limitations specified as part of the approved type design and referenced on the type certificate data sheet; this proposed AD therefore does not include those airplanes in the applicability.

The FAA is proposing this AD to address, among other things, fatigue cracking and damage in principal structural elements. The unsafe condition, if not addressed, could result in reduced structural integrity of the airplane. You may examine the MCAI in the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA-2022-1473.

**Related Service Information Under 1 CFR Part 51**

The FAA reviewed EASA AD 2022-0141. This service information specifies new or more restrictive airworthiness limitations for airplane structures and safe life limits.

This proposed AD would also require EASA AD 2020-0117, dated May 20, 2020, which the Director of the Federal Register approved for incorporation by reference as of December 7, 2020 (85 FR 69144, November 2, 2020).

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in **ADDRESSES**.

**FAA's Determination**

This product has been approved by the aviation authority of another country and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with the State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI described above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop

in other products of the same type design.

### **Proposed AD Requirements in This NPRM**

This proposed AD would retain all requirements of AD 2020–21–20. This proposed AD would also require revising the existing maintenance or inspection program, as applicable, to incorporate additional new or more restrictive airworthiness limitations, which are specified in EASA AD 2022–0141 already described, as proposed for incorporation by reference. Any differences with EASA AD 2022–0141 are identified as exceptions in the regulatory text of this AD.

This proposed AD would require revisions to certain operator maintenance documents to include new actions (e.g., inspections). Compliance with these actions is required by 14 CFR 91.403(c). For airplanes that have been previously modified, altered, or repaired in the areas addressed by this proposed AD, the operator may not be able to accomplish the actions described in the revisions. In this situation, to comply with 14 CFR 91.403(c), the operator must request approval for an alternative method of compliance (AMOC) according to paragraph (n)(1) of this proposed AD.

### **Explanation of Required Compliance Information**

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to retain the IBR of EASA AD 2020–0117 and incorporate EASA AD 2022–0141 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with EASA AD 2022–0141 and EASA AD 2020–0117 through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular section in EASA AD 2022–0141 or EASA AD 2020–0117 does not mean that operators need comply only with that section. For example, where the AD requirement refers to "all required actions and compliance times," compliance with this AD requirement is not limited to the section titled "Required Action(s) and Compliance Time(s)" in EASA AD 2022–0141 or EASA AD 2020–0117. Service information required by EASA

AD 2022–0141 and EASA AD 2020–0117 for compliance will be available at regulations.gov by searching for and locating Docket No. FAA–2022–1473 after the FAA final rule is published.

### **Airworthiness Limitation ADs Using the New Process**

The FAA's process of incorporating by reference MCAI ADs as the primary source of information for compliance with corresponding FAA ADs has been limited to certain MCAI ADs (primarily those with service bulletins as the primary source of information for accomplishing the actions required by the FAA AD). However, the FAA is now expanding the process to include MCAI ADs that require a change to airworthiness limitation documents, such as airworthiness limitation sections.

For these ADs that incorporate by reference an MCAI AD that changes airworthiness limitations, the FAA requirements are unchanged. Operators must revise the existing maintenance or inspection program, as applicable, to incorporate the information specified in the new airworthiness limitation document. The airworthiness limitations must be followed according to 14 CFR 91.403(c) and 91.409(e).

The previous format of the airworthiness limitation ADs included a paragraph that specified that no alternative actions (e.g., inspections) or intervals may be used unless the actions and intervals are approved as an AMOC in accordance with the procedures specified in the AMOCs paragraph under "Additional AD Provisions." This new format includes a "New Provisions for Alternative Actions and Intervals" paragraph that does not specifically refer to AMOCs, but operators may still request an AMOC to use an alternative action or interval.

### **Costs of Compliance**

The FAA estimates that this AD, if adopted as proposed, would affect 191 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

The FAA estimates the total cost per operator for the retained actions from AD 2020–21–20 to be \$7,650 (90 work-hours × \$85 per work-hour).

The FAA has determined that revising the existing maintenance or inspection program takes an average of 90 work-hours per operator, although the agency recognizes that this number may vary from operator to operator. Since operators incorporate maintenance or inspection program changes for their affected fleet(s), the FAA has determined that a per-operator estimate

is more accurate than a per-airplane estimate.

The FAA estimates the total cost per operator for the new proposed actions to be \$7,650 (90 work-hours × \$85 per work-hour).

### **Authority for This Rulemaking**

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

### **Regulatory Findings**

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Would not affect intrastate aviation in Alaska, and
- (3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

### **List of Subjects in 14 CFR Part 39**

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

### **The Proposed Amendment**

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

## PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

### § 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

- a. Removing Airworthiness Directive (AD) 2020–21–20, Amendment 39–21293 (85 FR 69144, November 2, 2020); and
- b. Adding the following new AD:

**Dassault Aviation:** Docket No. FAA–2022–1473; Project Identifier MCAI–2022–00902–T.

#### (a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by January 3, 2023.

#### (b) Affected ADs

(1) This AD replaces AD 2020–21–20, Amendment 39–21293 (85 FR 69144, November 2, 2020) (AD 2020–21–20).

(2) This AD affects AD 2010–26–05, Amendment 39–16544 (75 FR 79952, December 21, 2010) (AD 2010–26–05).

#### (c) Applicability

This AD applies to Dassault Aviation Model FALCON 900EX airplanes, serial number (S/N) 97 and S/Ns 120 and higher, certificated in any category, with an original airworthiness certificate or original export certificate of airworthiness issued on or before November 15, 2021.

#### (d) Subject

Air Transport Association (ATA) of America Code 05, Time Limits/Maintenance Checks.

#### (e) Unsafe Condition

This AD was prompted by a determination that new or more restrictive airworthiness limitations are necessary. The FAA is issuing this AD to address, among other things, fatigue cracking and damage in principal structural elements. The unsafe condition, if not addressed, could result in reduced structural integrity of the airplane.

#### (f) Compliance

Comply with this AD within the compliance times specified, unless already done.

#### (g) Retained Revision of the Existing Maintenance or Inspection Program, With a New Terminating Action

This paragraph restates the requirements of paragraph (i) of AD 2020–21–20, with a new terminating action. For airplanes with an original airworthiness certificate or original export certificate of airworthiness issued on or before October 2, 2019: Except as specified in paragraph (h) of this AD, comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2020–0117, dated May 20, 2020 (EASA AD 2020–0117). Accomplishing the

revision of the existing maintenance or inspection program required by paragraph (j) of this AD terminates the requirements of this paragraph.

#### (h) Retained Exceptions to EASA AD 2020–0117 With No Changes

This paragraph restates the exceptions specified in paragraph (j) of AD 2020–21–20, with no changes.

(1) The requirements specified in paragraphs (1) and (2) of EASA AD 2020–0117 do not apply to this AD.

(2) Paragraph (3) of EASA AD 2020–0117 specifies revising “the approved AMP” within 12 months after its effective date, but this AD requires revising the existing maintenance or inspection program, as applicable, to incorporate the “limitations, tasks and associated thresholds and intervals” specified in paragraph (3) of EASA AD 2020–0117 within 90 days after December 7, 2020 (the effective date of AD 2020–21–20).

(3) The initial compliance time for doing the tasks specified in paragraph (3) of EASA AD 2020–0117 is at the applicable “associated thresholds” specified in paragraph (3) of EASA AD 2020–0117, or within 90 days after December 7, 2020 (the effective date of AD 2020–21–20), whichever occurs later.

(4) The provisions specified in paragraphs (4) and (5) of EASA AD 2020–0117 do not apply to this AD.

(5) The “Remarks” section of EASA AD 2020–0117 does not apply to this AD.

#### (i) Retained Restrictions on Alternative Actions and Intervals, With a New Exception

This paragraph restates the requirements of paragraph (k) of AD 2020–21–20, with a new exception. Except as required by paragraph (j) of this AD, after the maintenance or inspection program has been revised as required by paragraph (g) of this AD, no alternative actions (e.g., inspections) and intervals are allowed unless they are approved as specified in the provisions of the “Ref. Publications” section of EASA AD 2020–0117.

#### (j) New Revision of the Existing Maintenance or Inspection Program

Except as specified in paragraph (k) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, EASA AD 2022–0141, dated July 7, 2022. Accomplishing the revision of the existing maintenance or inspection program required by this paragraph terminates the requirements of paragraph (g) of this AD.

#### (k) Exceptions to EASA AD 2022–0141

(1) The requirements specified in paragraphs (1) and (2) of EASA AD 2022–0141 do not apply to this AD.

(2) Paragraph (3) of EASA AD 2022–0141 specifies revising “the approved AMP” within 12 months after its effective date, but this AD requires revising the existing maintenance or inspection program, as applicable, within 90 days after the effective date of this AD.

(3) The initial compliance time for doing the tasks specified in paragraph (3) of EASA

2022–0141 is at the applicable “limitations” and “associated thresholds” as incorporated by the requirements of paragraph (3) of EASA AD 2022–0141, or within 90 days after the effective date of this AD, whichever occurs later.

(4) The provisions specified in paragraphs (4) and (5) of EASA AD 2022–0141 do not apply to this AD.

(5) The “Remarks” section of EASA AD 2022–0141 does not apply to this AD.

#### (l) New Provisions for Alternative Actions and Intervals

After the existing maintenance or inspection program has been revised as required by paragraph (j) of this AD, no alternative actions (e.g., inspections) and intervals are allowed unless they are approved as specified in the provisions of the “Ref. Publications” section of EASA AD 2022–0141.

#### (m) Terminating Action for Certain Actions in AD 2010–26–05

Accomplishing the actions required by paragraph (g) or (j) of this AD terminates the requirements of paragraph (g)(1) of AD 2010–26–05, for Dassault Aviation Model FALCON 900EX airplanes, S/N 97 and S/Ns 120 and higher only.

#### (n) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the International Validation Branch, send it to the attention of the person identified in paragraph (o) of this AD. Information may be emailed to: [9-AVS-AIR-730-AMOC@faa.gov](mailto:9-AVS-AIR-730-AMOC@faa.gov). Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or EASA; or Dassault Aviation's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

#### (o) Additional Information

For more information about this AD, contact Tom Rodriguez, Aerospace Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone 206–231–3226; email [tom.rodriguez@faa.gov](mailto:tom.rodriguez@faa.gov).

#### (p) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following service information was approved for IBR on [DATE 35 DAYS AFTER DATE OF PUBLICATION OF THE FINAL RULE].

(i) European Union Aviation Safety Agency (EASA) AD 2022-0141, dated July 7, 2022.

(ii) [Reserved]

(4) The following service information was approved for IBR on December 7, 2020 (85 FR 69144, November 2, 2020).

(i) European Union Aviation Safety Agency (EASA) AD 2020-0117, dated May 20, 2020.

(ii) [Reserved]

(5) For EASA ADs 2020-0117 and 2022-0141, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email [ADs@easa.europa.eu](mailto:ADs@easa.europa.eu); website [easa.europa.eu](http://easa.europa.eu). You may find these EASA ADs on the EASA website at [ad.easa.europa.eu](http://ad.easa.europa.eu).

(6) You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206-231-3195.

(7) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email [fr.inspection@nara.gov](mailto:fr.inspection@nara.gov), or go to: [www.archives.gov/federal-register/cfr/ibr-locations.html](http://www.archives.gov/federal-register/cfr/ibr-locations.html).

Issued on November 9, 2022.

**Christina Underwood,**

*Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.*

**BILLING CODE 4910-13-P**

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 39

[Docket No. FAA-2022-1477; Project Identifier MCAI-2022-00632-E]

RIN 2120-AA64

#### Airworthiness Directives; Pratt & Whitney Canada Corp. Turboprop Engines

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking (NPRM).

**SUMMARY:** The FAA proposes to adopt a new airworthiness directive (AD) for certain Pratt & Whitney Canada Corp. (P&WC) PT6E-67XP model turboprop engines with serial number HP0194 and earlier. This proposed AD was prompted by multiple reports of engines failing to achieve required power (torque) during high power applications

due to internal leaks in the bleed-off valves (BOVs). This proposed AD would require replacement of the compressor BOV assembly, replacement of the BOV orifice feed air tube assembly, and installation of a redesigned P3 probe snorkel, as specified in a Transport Canada AD, which is proposed for incorporation by reference (IBR). The FAA is proposing this AD to address the unsafe condition on these products.

**DATES:** The FAA must receive comments on this NPRM by January 3, 2023.

**ADDRESSES:** You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- **Federal eRulemaking Portal:** Go to [regulations.gov](http://regulations.gov). Follow the instructions for submitting comments.

- **Fax:** (202) 493-2251.

- **Mail:** U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- **Hand Delivery:** Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

**AD Docket:** You may examine the AD docket at [regulations.gov](http://regulations.gov) under Docket No. FAA-2022-1477; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

**Material Incorporated by Reference:**

- For material that is proposed for IBR in this AD, contact Transport Canada, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario K1A 0N5, Canada; phone: (888) 663-3639; email: [AD-CN@tc.gc.ca](mailto:AD-CN@tc.gc.ca). You may find this material on the Transport Canada website at [tc.canada.ca/en/aviation](http://tc.canada.ca/en/aviation).

- You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 1200 District Avenue, Burlington, MA, 01803. For information on the availability of this material at the FAA, call (817) 222-5110.

**FOR FURTHER INFORMATION CONTACT:** Barbara Caufield, Aviation Safety Engineer, ECO Branch, FAA, 1200 District Avenue, Burlington, MA 01803; phone: (781) 238-7146; email: [barbara.caufield@faa.gov](mailto:barbara.caufield@faa.gov).

**SUPPLEMENTARY INFORMATION:**

**Comments Invited**

The FAA invites you to send any written relevant data, views, or

arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include “Docket No. FAA-2022-1477; Project Identifier MCAI-2022-00632-E” at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to [regulations.gov](http://regulations.gov), including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

#### Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as “PROPIN.” The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Barbara Caufield, Aviation Safety Engineer, ECO Branch, FAA, 1200 District Avenue, Burlington, MA 01803. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

#### Background

Transport Canada, which is the aviation authority for Canada, has issued Transport Canada AD CF-2022-26, dated May 26, 2022 (Transport Canada AD CF-2022-26) (referred to after this as “the MCAI”), to address an unsafe condition for P&WC PT6E-67XP model turboprop engines with serial number HP0194 and earlier. The MCAI states that there have been reports of multiple incidents in which engines were unable to achieve the required power (torque) during high power applications. A manufacturer

investigation found that contamination from the glass beads used in the manufacturing process during the gas generator casing (GGC) production caused internal leaks in the BOVs, preventing the BOVs from fully closing at high power settings. The FAA is issuing this AD to prevent internal leaks in the BOVs, and to prevent the failure of the engine to achieve the required power (torque) during high power applications.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA-2022-1477.

#### Related Service Information Under 14 CFR Part 51

The FAA reviewed Transport Canada AD CF-2022-26, which specifies procedures for the replacement of the compressor BOV assembly, replacement of the BOV orifice feed air tube assembly, and installation of a redesigned P3 probe snorkel.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in **ADDRESSES**.

#### FAA's Determination

These products have been approved by the aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition

described in the Transport Canada AD above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop in other products of the same type design.

#### Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions specified in Transport Canada AD CF-2022-26, described previously, except for any differences identified as exceptions in the regulatory text of this proposed AD and except as discussed under "Differences Between This Proposed AD and the MCAI."

#### Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has since coordinated with other manufacturers and CAAs to use this process. As a result, the FAA proposes to incorporate by reference Transport Canada AD CF-2022-26 in the FAA final rule. This proposed AD would, therefore, require compliance with Transport Canada AD CF-2022-26 in its entirety through that incorporation, except for any differences

identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular section in the Transport Canada AD does not mean that operators need comply only with that section. For example, where the AD requirement refers to "Compliance," compliance with this AD requirement is not limited to the section titled "Corrective Actions" in Transport Canada AD CF-2022-26. Service information required by the Transport Canada AD for compliance will be available at *regulations.gov* by searching for and locating Docket No. FAA-2022-1477 after the FAA final rule is published.

#### Differences Between This Proposed AD and the Transport Canada AD

Where Transport Canada AD CF-2022-26 refers to hours air time, this proposed AD requires using flight hours.

Where Transport Canada AD CF-2022-26 specifies compliance from its effective date, this proposed AD would require using the effective date of this proposed AD.

#### Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 100 engines installed on airplanes of U.S. registry.

The FAA estimates the following costs to comply with this proposed AD:

#### ESTIMATED COSTS

| Action   | Labor cost                                 | Parts cost | Cost per product | Cost on U.S. operators |
|--|--|------------|------------------|------------------------|
| Replace compressor BOV assembly .....  | 5 work-hours × \$85 per hour = \$425 ..... | \$13,102   | \$13,527         | \$1,352,700            |
| Replace BOV orifice feed air tube assembly with P3 probe snorkel and BOV orifice feed air tube assembly. | 6 work-hours × \$85 per hour = \$510 ..... | 22,000     | 22,510           | 2,251,000              |

#### Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds

necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

#### Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a "significant regulatory action" under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

#### List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

## The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

### PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

#### § 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

**Pratt & Whitney Canada Corp.:** Docket No. FAA–2022–1477; Project Identifier MCAI–2022–00632–E.

#### (a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by January 3, 2023.

#### (b) Affected ADs

None.

#### (c) Applicability

This AD applies to Pratt & Whitney Canada Corp. (P&WC) PT6E–67XP model turboprop engines with serial number HP0194 and earlier, as identified in Transport Canada AD CF–2022–26, dated May 26, 2022 (Transport Canada AD CF–2022–26).

#### (d) Subject

Joint Aircraft Service Component (JASC) Code 7230, Turbine Engine Compressor Section.

#### (e) Unsafe Condition

This AD was prompted by reports of multiple incidents in which engines were unable to achieve the required power (torque) during high power applications due to internal leaks in the bleed-off valves (BOVs) caused by glass bead contamination. The FAA is issuing this AD to prevent internal leaks in the BOVs, and to prevent the failure of the engine to achieve the required power (torque) during high power applications. The unsafe condition, if not addressed, could result in loss of thrust control and loss of the airplane.

#### (f) Compliance

Comply with this AD within the compliance times specified, unless already done.

#### (g) Required Actions

Except as specified in paragraphs (h) and (i) of this AD: Perform all required actions within the compliance times specified in, and in accordance with, Transport Canada AD CF–2022–26.

#### (h) Exceptions to Transport Canada AD CF–2022–26

(1) Where Transport Canada AD CF–2022–26 refers to hours air time, this AD requires using flight hours.

(2) Where Transport Canada AD CF–2022–26 specifies compliance from its effective date, this AD requires using the effective date of this AD.

#### (i) No Reporting Requirement

Although the service information referenced in Transport Canada AD CF–2022–26 specifies to submit certain information to the manufacturer, this AD does not include that requirement.

#### (j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, ECO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in § 39.19. In accordance with § 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (k) of this AD or email to: [ANE-AD-AMOC@faa.gov](mailto:ANE-AD-AMOC@faa.gov).

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

#### (k) Additional Information

For more information about this AD, contact Barbara Caufield, Aviation Safety Engineer, ECO Branch, FAA, 1200 District Avenue, Burlington, MA 01803; phone: (781) 238–7146; email: [barbara.caufield@faa.gov](mailto:barbara.caufield@faa.gov).

#### (l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Transport Canada AD CF–2022–26, dated May 26, 2022.

(ii) [Reserved]

(3) For Transport Canada AD CF–2022–26, contact Transport Canada, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario K1A 0N5, Canada; phone: (888) 663–3639; email: [AD-CN@tc.gc.ca](mailto:AD-CN@tc.gc.ca); website: [tc.canada.ca/en/aviation](http://tc.canada.ca/en/aviation).

(4) You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call (817) 222–5110.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email: [fr.inspection@nara.gov](mailto:fr.inspection@nara.gov), or go to: [www.archives.gov/federal-register/cfr/ibr-locations.html](http://www.archives.gov/federal-register/cfr/ibr-locations.html).

Issued on November 10, 2022.

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 39

[Docket No. FAA–2022–1421; Project Identifier MCAI–2022–01088–G]

RIN 2120–AA64

#### Airworthiness Directives; Stemme AG Gliders

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking (NPRM).

**SUMMARY:** The FAA proposes to supersede Airworthiness Directive (AD) 2022–01–09, which applies to certain Stemme AG Model Stemme S 10–VT and Model Stemme S 12 gliders. AD 2022–01–09 requires removing the affected freewheel clutch from service and prohibits the installation of affected parts. Since the FAA issued AD 2022–01–09, the European Union Aviation Safety Agency (EASA) superseded its mandatory continuing airworthiness information (MCAI) to amend the definition of an affected part. This proposed AD would retain the requirements of AD 2022–01–09 for removing the affected freewheel clutch from service and continue to prohibit the installation of an affected part, and would amend the definition of an affected part and clarify the part installation prohibition. The FAA is proposing this AD to address the unsafe condition on these products.

**DATES:** The FAA must receive comments on this NPRM by January 3, 2023.

**ADDRESSES:** You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- **Federal eRulemaking Portal:** Go to [regulations.gov](http://regulations.gov). Follow the instructions for submitting comments.

- **Fax:** (202) 493–2251.

- **Mail:** U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- **Hand Delivery:** Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

**AD Docket:** You may examine the AD docket at [regulations.gov](http://regulations.gov) under Docket No. FAA–2022–1421; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the MCAI, any comments received, and other

information. The street address for Docket Operations is listed above.

**FOR FURTHER INFORMATION CONTACT:** Jim Rutherford, Aviation Safety Engineer, General Aviation & Rotorcraft Section, International Validation Branch, FAA, 901 Locust, Room 301, Kansas City, MO 64106; phone: (816) 329-4165; email: [jim.rutherford@faa.gov](mailto:jim.rutherford@faa.gov).

**SUPPLEMENTARY INFORMATION:**

**Comments Invited**

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include “Docket No. FAA-2022-1421; Project Identifier MCAI-2022-01088-G” at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend the proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov*, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

**Confidential Business Information**

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as

private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as “PROPIN.” The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Jim Rutherford, Aviation Safety Engineer, General Aviation & Rotorcraft Section, International Validation Branch, FAA, 901 Locust, Room 301, Kansas City, MO 64106. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

**Background**

The FAA issued AD 2022-01-09, Amendment 39-21897 (87 FR 1666, January 12, 2022) (AD 2022-01-09), for all Stemme AG Model Stemme S 10-VT and Model Stemme S 12 gliders with a freewheel clutch part number (P/N) 12AK with a serial number starting with “12-” installed. AD 2022-01-09 was prompted by MCAI originated by EASA, which is the Technical Agent for the Member States of the European Union. EASA issued EASA Emergency AD 2021-0278-E, dated December 15, 2021 (EASA AD 2021-0278-E), to correct an unsafe condition identified as unintended slipping of the freewheel clutch with overheating (burnishing) of the friction pads inside of the clutch.

AD 2022-01-09 requires removing the affected freewheel clutch from service and prohibits installing an affected part on any glider. The FAA issued AD 2022-01-09 to address unintended slipping of the freewheel clutch with overheating (burnishing) of the friction pads inside of the clutch, which if not addressed, could result in a loss of thrust and consequent loss of glider control.

**Actions Since AD 2022-01-09 Was Issued**

Since the FAA issued AD 2022-01-09, EASA superseded EASA AD 2021-0278-E and issued EASA AD 2021-0278R1, dated August 11, 2022 (referred to after this as “the MCAI”), to correct an unsafe condition on all Stemme AG Model Stemme S 10-VT and Stemme S 12 gliders. The MCAI states that the definition of affected part was amended to exclude certain modified and re-identified freewheel clutches.

You may examine the MCAI in the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA-2022-1421.

**FAA’s Determination**

These products have been approved by the aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA’s bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI and service information described above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of these same type designs.

**Proposed AD Requirements in this NPRM**

This proposed AD would retain the requirements of AD 2022-01-09 for removing the affected freewheel clutch from service and continue to prohibit the installation of an affected part, and would amend the definition of an affected part and clarify the part installation prohibition.

**Costs of Compliance**

The FAA estimates that this AD, if adopted as proposed, would affect 63 gliders of U.S. registry.

The FAA estimates the following costs to comply with this proposed AD:

**ESTIMATED COSTS**

| Action                                     | Labor cost                                 | Parts cost | Cost per product | Cost on U.S. operators |
|--|--|------------|------------------|------------------------|
| Remove freewheel clutch from service ..... | 4 work-hours × \$85 per hour = \$340 ..... | \$500      | \$840            | \$52,920               |

The new requirements of this proposed AD add no additional economic burden over that already required by AD 2022-01-09.

**Authority for This Rulemaking**

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I,

section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency’s authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under

that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or

develop on products identified in this rulemaking action.

### Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Would not affect intrastate aviation in Alaska, and
- (3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

### List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

### The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

### PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

#### § 39.13 [Amended]

- 2. The FAA amends § 39.13 by:
- a. Removing Airworthiness Directive 2022–01–09, Amendment 39–21897 (87 FR 1666, January 12, 2022); and
  - b. Adding the following new airworthiness directive:

**Stemme AG:** Docket No. FAA–2022–1421; Project Identifier MCAI–2022–01088–G.

#### (a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by January 3, 2023.

#### (b) Affected ADs

This AD replaces AD 2022–01–09, Amendment 39–21897 (87 FR 1666, January 12, 2022).

#### (c) Applicability

This AD applies to Stemme AG Model Stemme S 10–VT and Model Stemme S 12 gliders, all serial numbers, certificated in any category, with a freewheel clutch having part number 12AK with a serial number starting with "12-" installed, except those which

have been modified by following the instructions of Stemme Service Bulletin Doc. No. P062–980058, Revision 02, dated April 19, 2022, and have been re-identified with "M" at the end of the serial number.

#### (d) Subject

Joint Aircraft System Component (JASC) Code 7100, Powerplant System.

#### (e) Unsafe Condition

This AD was prompted by mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI identifies the unsafe condition as unintended slipping of the freewheel clutch with overheating (burnishing) of the friction pads inside of the clutch. The FAA is issuing this AD to ensure removal of the affected freewheel clutch from service. The unsafe condition, if not addressed, could result in a loss of thrust and consequent loss of glider control.

#### (f) Compliance

Comply with this AD within the compliance times specified, unless already done.

#### (g) Required Action and Compliance

(1) Before further flight after the effective date of this AD, remove the freewheel clutch from service.

(2) As of the effective date of this AD, do not install a freewheel clutch part number 12AK with a serial number starting with 201F;12-" on any glider, unless it has been modified by following the instructions of Stemme Service Bulletin Doc. No. P062–980058, Revision 02, dated April 19, 2022, and has been re-identified with "M" at the end of the serial number.

#### (h) Alternative Methods of Compliance (AMOCs)

The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in § 39.19. In accordance with § 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Validation Branch, mail it to the address identified in paragraph (i)(2) of this AD or email to: 9-AVS-AIR-730-AMOC@faa.gov. If mailing information, also submit information by email. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. AMOCs approved for AD 2022–01–09 are approved as AMOCs for the corresponding provisions of this AD.

#### (i) Additional Information

(1) Refer to European Union Aviation Safety Agency (EASA) AD 2021–0278R1, dated August 11, 2022, for related information. This EASA AD may be found in the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2022–1421.

(2) For more information about this AD, contact Jim Rutherford, Aviation Safety

Engineer, General Aviation & Rotorcraft Section, International Validation Branch, FAA, 901 Locust, Room 301, Kansas City, MO 64106; phone: (816) 329–4165; email: [jim.rutherford@faa.gov](mailto:jim.rutherford@faa.gov).

(3) For service information identified in this AD that is not incorporated by reference, contact Stemme AG, Flugplatzstrasse F2, Nr. 6–7, D–15344 Strausberg, Germany; phone: +49 (0) 3341 3612–0; fax: +49 (0) 3341 3612–30; email: [airworthiness@stemme.de](mailto:airworthiness@stemme.de); website: [stemme.com](https://www.stemme.com). You may view this referenced service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 901 Locust, Kansas City, MO 64106. For information on the availability of this material at the FAA, call (817) 222–5110.

#### (j) Material Incorporated by Reference

None.

Issued on November 9, 2022.

**Christina Underwood,**

*Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.*

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 39

[Docket No. FAA–2022–1412; Project Identifier MCAI–2022–00805–T]

RIN 2120–AA64

### Airworthiness Directives; Airbus SAS Airplanes

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking (NPRM).

**SUMMARY:** The FAA proposes to adopt a new airworthiness directive (AD) for all Airbus SAS Model A300 B2K–3C, B2–203, B4–2C, and B4–203 airplanes. This proposed AD was prompted by a determination that internal system pollution can occur, most likely due to corroded unions in the pressurization lines, with an associated risk of contamination of the check valves. This proposed AD would require repetitive inspections (functional checks) of the pressurization of the hydraulic system reservoirs, and corrective actions if necessary, as specified in a European Union Aviation Safety Agency (EASA) AD, which is proposed for incorporation by reference. The FAA is proposing this AD to address the unsafe condition on these products.

**DATES:** The FAA must receive comments on this proposed AD by January 3, 2023.

**ADDRESSES:** You may send comments, using the procedures found in 14 CFR

11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal*: Go to [regulations.gov](https://www.regulations.gov). Follow the instructions for submitting comments.

- *Fax*: 202–493–2251.

- *Mail*: U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- *Hand Delivery*: Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

*AD Docket*: You may examine the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2022–1412; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

*Material Incorporated by Reference*:

- For material that will be incorporated by reference (IBR) in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email [ADs@easa.europa.eu](mailto:ADs@easa.europa.eu); website [easa.europa.eu](https://easa.europa.eu). You may find this material on the EASA website [atad.easa.europa.eu](https://atad.easa.europa.eu).

- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available in the AD docket at [regulations.gov](https://www.regulations.gov) by searching for and locating Docket No. FAA–2022–1412.

**FOR FURTHER INFORMATION CONTACT:** Dan Rodina, Aerospace Engineer, Large Aircraft Section, FAA, International Validation Branch, 2200 South 216th St., Des Moines, WA 98198; telephone 206–231–3225; email [dan.rodina@faa.gov](mailto:dan.rodina@faa.gov).

#### SUPPLEMENTARY INFORMATION:

##### Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include “Docket No. FAA–2022–1412; Project Identifier MCAI–2022–00805–T” at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing

date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to [regulations.gov](https://www.regulations.gov), including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

##### Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as “PROPIN.” The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Dan Rodina, Aerospace Engineer, Large Aircraft Section, FAA, International Validation Branch, 2200 South 216th St., Des Moines, WA 98198; telephone 206–231–3225; email [dan.rodina@faa.gov](mailto:dan.rodina@faa.gov). Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

##### Background

EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2022–0116, dated June 21, 2022 (EASA AD 2022–0116) (also referred to as the MCAI), to correct an unsafe condition for all Airbus SAS Model A300 B2–203, A300 B2K–3C, A300 B4–203, A300 B4–2C, A300C4–203, and A300F4–203 airplanes. Model A300C4–203 and A300F4–203 airplanes are not certificated by the FAA and are not included on the U.S. type certificate data sheet; this proposed AD therefore does not include those airplanes in the applicability.

The MCAI states that internal system pollution can occur, most likely due to corroded unions at the pressurization lines, with an associated risk of contamination of the check valves. The three hydraulic system reservoirs are

pressurized by air coming from the engine or the auxiliary power unit bleed air duct or from the ground connection. Air tightness of the pressurization system of the reservoirs is achieved by check valves that are located on the respective pressurization lines and on top of each hydraulic reservoir. The FAA is proposing this AD to address check valve contamination, which could lead to hydraulic reservoir pressurization issues and, if combined with an air pressurization line rupture, could lead to loss of hydraulic systems and possibly result in loss of control of the airplane. See the MCAI for additional background information.

##### Related Service Information Under 1 CFR Part 51

EASA AD 2022–0116 specifies procedures for repetitive detailed inspections by performing functional checks for air leakage of the hydraulic system reservoirs and corrective actions. Corrective actions include a fault isolation to identify the source of depressurization and replacement of the check valves. EASA AD 2022–0116 also specifies procedures for reporting the inspection findings.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

##### FAA’s Determination

These products have been approved by the aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA’s bilateral agreement with the State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop in other products of these same type designs.

##### Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions specified in EASA AD 2022–0116 described previously, except for any differences identified as exceptions in the regulatory text of this proposed AD.

##### Explanation of Required Compliance Information

In the FAA’s ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with

requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to incorporate EASA AD 2022–0116 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with EASA AD 2022–0116 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD.

Using common terms that are the same as the heading of a particular section in EASA AD 2022–0116 does not mean that operators need comply only with that section. For example, where the AD requirement refers to “all required actions and compliance times,” compliance with this AD requirement is not limited to the section titled “Required Action(s) and Compliance Time(s)” in EASA AD 2022–0116. Service information required by EASA

AD 2022–0116 for compliance will be available at *regulations.gov* by searching for and locating Docket No. FAA–2022–1412 after the FAA final rule is published.

#### Costs of Compliance

The FAA estimates that this proposed AD would affect 2 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

#### ESTIMATED COSTS FOR REQUIRED ACTIONS

| Labor cost   | Parts cost | Cost per product | Cost on U.S. operators |
|--|------------|------------------|------------------------|
| 4 work-hours × \$85 per hour = \$340 .....           | \$0        | \$340            | \$680                  |
| 1 work-hour × \$85 per hour = \$85 (reporting) ..... | 0          | 85               | 170                    |

The FAA has received no definitive data on which to base the cost estimates for the corrective actions specified in this proposed AD.

#### Paperwork Reduction Act

A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2120–0056. Public reporting for this collection of information is estimated to take approximately 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. All responses to this collection of information are mandatory. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: Information Collection Clearance Officer, Federal Aviation Administration, 10101 Hillwood Parkway, Fort Worth, TX 76177–1524.

#### Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency’s authority.

The FAA is issuing this rulemaking under the authority described in

Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

#### Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Would not affect intrastate aviation in Alaska, and
- (3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

#### List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

#### The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

#### PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

#### § 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

**Airbus SAS:** Docket No. FAA–2022–1412; Project Identifier MCAI–2022–00805–T.

#### (a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by January 3, 2023.

#### (b) Affected ADs

None.

#### (c) Applicability

This AD applies to all Airbus SAS Model A300 B2K–3C, B2–203, B4–2C, and B4–203 airplanes, certificated in any category.

#### (d) Subject

Air Transport Association (ATA) of America Code 29, Hydraulic power.

#### (e) Unsafe Condition

This AD was prompted by a determination that internal system pollution can occur, most likely due to corroded unions at pressurization lines level, with an associated risk of contamination of the check valves. The FAA is issuing this AD to address check valve contamination, which could lead to hydraulic reservoir pressurization issues and, if combined with an air pressurization line rupture, could lead to loss of hydraulic systems and possibly result in loss of control of the airplane.

#### (f) Compliance

Comply with this AD within the compliance times specified, unless already done.

**(g) Requirements**

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2022–0116, dated June 21, 2022 (EASA AD 2022–0116).

**(h) Exceptions to EASA AD 2022–0116**

(1) Where EASA AD 2022–0116 refers to its effective date, this AD requires using the effective date of this AD.

(2) Paragraph (3) of EASA AD 2022–0116 specifies to report the first functional check (test) results to Airbus within a certain compliance time. For this AD, report the first functional check (test) results at the applicable time specified in paragraph (h)(2)(i) or (ii) of this AD.

(i) If the inspection was done on or after the effective date of this AD: Submit the report within 30 days after the inspection.

(ii) If the inspection was done before the effective date of this AD: Submit the report within 30 days after the effective date of this AD.

(3) The “Remarks” section of EASA AD 2022–0116 does not apply to this AD.

**(i) Additional AD Provisions**

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, Large Aircraft Section, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the Large Aircraft Section, International Validation Branch, send it to the attention of the person identified in paragraph (j)(2) of this AD. Information may be emailed to: [9-AVS-AIR-730-AMOC@faa.gov](mailto:9-AVS-AIR-730-AMOC@faa.gov). Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer*: For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, Large Aircraft Section, International Validation Branch, FAA; or EASA; or Airbus SAS’s EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Required for Compliance (RC)*: Except as required by paragraph (i)(2) of this AD, if any service information contains procedures or tests that are identified as RC, those procedures and tests must be done to comply with this AD; any procedures or tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator’s maintenance or inspection program without obtaining approval of an AMOC, provided the procedures and tests identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or

changes to procedures or tests identified as RC require approval of an AMOC.

**(j) Related Information**

(1) For EASA AD 2022–0116, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email [ADs@easa.europa.eu](mailto:ADs@easa.europa.eu); website [easa.europa.eu](http://easa.europa.eu). You may find this EASA AD on the EASA website [atad.easa.europa.eu](http://atad.easa.europa.eu). You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. This material may be found in the AD docket at [regulations.gov](http://regulations.gov) by searching for and locating Docket No. FAA–2022–1412.

(2) For more information about this AD, contact Dan Rodina, Aerospace Engineer, Large Aircraft Section, FAA, International Validation Branch, 2200 South 216th St., Des Moines, WA 98198; telephone 206–231–3225; email [dan.rodina@faa.gov](mailto:dan.rodina@faa.gov).

Issued on November 2, 2022.

**Christina Underwood,**

*Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.*

[FR Doc. 2022–24987 Filed 11–17–22; 8:45 am]

**BILLING CODE 4910–13–P**

**DEPARTMENT OF TRANSPORTATION****Federal Aviation Administration****14 CFR Part 39**

**[Docket No. FAA–2022–1480; Project Identifier MCAI–2022–00548–T]**

**RIN 2120–AA64**

**Airworthiness Directives; Bombardier, Inc., Airplanes**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking (NPRM).

**SUMMARY:** The FAA proposes to adopt a new airworthiness directive (AD) for certain Bombardier, Inc., Model BD–100–1A10 airplanes. This proposed AD was prompted by reports of cracks found in the tailcone upper firewall where the auxiliary power unit (APU) muffler electrical bonding strap is attached. This proposed AD would require a detailed visual inspection of the tailcone upper firewall for defects, rework by replacement of the APU electrical bonding strap, and repair if necessary. The FAA is proposing this AD to address the unsafe condition on these products.

**DATES:** The FAA must receive comments on this proposed AD by January 3, 2023.

**ADDRESSES:** You may send comments, using the procedures found in 14 CFR

11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal*: Go to [regulations.gov](http://regulations.gov). Follow the instructions for submitting comments.

- *Fax*: 202–493–2251.

- *Mail*: U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- *Hand Delivery*: Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

**AD Docket:** You may examine the AD docket at [regulations.gov](http://regulations.gov) under Docket No. FAA–2022–1480; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

**Material Incorporated by Reference:**

- For service information identified in this NPRM, contact Bombardier Business Aircraft Customer Response Center, 400 Côte-Vertu Road West, Dorval, Québec H4S 1Y9, Canada; telephone 514–855–2999; email [ac.yul@aero.bombardier.com](mailto:ac.yul@aero.bombardier.com); website [bombardier.com](http://bombardier.com).

- You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

**FOR FURTHER INFORMATION CONTACT:**

Yaser Osman, Aerospace Engineer, Airframe and Propulsion Section, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; email [9-avs-nyaco-cos@faa.gov](mailto:9-avs-nyaco-cos@faa.gov).

**SUPPLEMENTARY INFORMATION:****Comments Invited**

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include “Docket No. FAA–2022–1480; Project Identifier MCAI–2022–00548–T” at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend the proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the

following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to [regulations.gov](https://www.regulations.gov), including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as “PROPIN.” The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Yaser Osman, Aerospace Engineer, Airframe and Propulsion Section, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; email [9-avs-nyaco-cos@faa.gov](mailto:9-avs-nyaco-cos@faa.gov). Any commentary that the FAA receives which is not specifically designated as CBI will be

placed in the public docket for this rulemaking.

Background

Transport Canada Civil Aviation (TCCA), which is the aviation authority for Canada, has issued TCCA AD CF–2022–19, dated April 19, 2022 (TCCA AD CF–2022–19) (also referred to after this as the MCAI), to correct an unsafe condition on certain Bombardier, Inc., Model BD–100–1A10 airplanes. The MCAI states that cracks were found in the tailcone upper firewall where the APU muffler electrical bonding strap is attached. Crack initiation is related to the rigid electrical bonding strap. A crack in this area, if not addressed, could result in a breach of the firewall, which could allow a fire to propagate; reduced lightning strike protection, which could affect the airplane’s grounding and potentially cause a fire; and increased radio interference during flight, which could reduce the ability of the flightcrew to maintain the safe flight and landing of the airplane.

You may examine the MCAI in the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2022–1480.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Bombardier Service Bulletin 100–53–35, dated December 6, 2021; and Service Bulletin 350–53–004, dated December 6, 2021. This service information specifies procedures for doing a detailed visual inspection of the tailcone upper firewall for defects including cracking, reworking the APU electrical bonding

strap by replacing it with a new flexible APU muffler jumper cable assembly, and repairing the tailcone upper firewall. These documents are distinct since they apply to different airplane configurations.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section.

FAA’s Determination

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to the FAA’s bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI and service information described above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions specified in the service information already described.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 691 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

| Labor cost                               | Parts cost | Cost per product | Cost on U.S. operators |
|--|------------|------------------|------------------------|
| 1 work-hour × \$85 per hour = \$85 ..... | \$36       | \$121            | \$83,611               |

The FAA estimates the following costs to do any necessary on-condition actions that would be required based on

the results of any required action. The FAA has no way of determining the

number of aircraft that might need these on-condition actions:

ESTIMATED COSTS OF ON-CONDITION ACTIONS

| Labor cost                                    | Parts cost | Cost per product |
|---|------------|------------------|
| 24 work-hours × \$85 per hour = \$2,040 ..... | * \$0      | \$2,040          |

\* The FAA has received no definitive data on which to base the cost estimates for the parts specified in this proposed AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of

the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency’s authority.

The FAA is issuing this rulemaking under the authority described in

Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and

procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

### Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a “significant regulatory action” under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

### List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

### The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

### PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

#### § 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

**Bombardier, Inc.:** Docket No. FAA–2022–1480; Project Identifier MCAI–2022–00548–T.

#### (a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by January 3, 2023.

#### (b) Affected ADs

None.

#### (c) Applicability

This AD applies to Bombardier, Inc., Model BD–100–1A10 airplanes, certificated in any category, serial numbers 20003 through 20500 inclusive and 20501 through 20916 inclusive.

#### (d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

### (e) Unsafe Condition

This AD was prompted by reports of cracks found in the tailcone upper firewall where the auxiliary power unit (APU) muffler electrical bonding strap is attached. The FAA is issuing this AD to address cracking in the tailcone upper firewall. The unsafe condition, if not addressed, could result in a breach of the firewall, which could allow a fire to propagate; reduced lightning strike protection, which could affect the airplane's grounding and potentially cause a fire; and increased radio interference during flight, which could reduce the ability of the flightcrew to maintain the safe flight and landing of the airplane.

### (f) Compliance

Comply with this AD within the compliance times specified, unless already done.

### (g) Inspection, Replacement, and Corrective Actions

Within 48 months after the effective date of this AD: Do a detailed visual inspection of the tailcone upper firewall for defects including cracking, rework the APU electrical bonding strap by replacing with a new flexible APU muffler jumper cable assembly, and repair the tail cone upper firewall, as applicable, in accordance with paragraphs 2.B., 2.C., and 2.D., of the Accomplishment Instructions of the applicable service information specified in figure 1 to paragraph (g) of this AD. Do all applicable repairs before further flight.

**Figure 1 to paragraph (g) – Service Information**

| Airplane Serial Number–       | Bombardier Service Bulletin–       |
|-------------------------------|------------------------------------|
| 20003 through 20500 inclusive | 100-53-35, dated December 6, 2021  |
| 20501 through 20916 inclusive | 350-53-004, dated December 6, 2021 |

### (h) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, New York ACO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the New York ACO Branch, mail it to ATTN: Program Manager, Continuing Operational Safety, at the address identified in paragraph (i)(2) of this AD or email to: [9-avs-nyaco-cos@faa.gov](mailto:9-avs-nyaco-cos@faa.gov). If mailing information, also submit information by email. Before using any approved AMOC, notify your appropriate principal inspector,

or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, New York ACO Branch, FAA; or Transport Canada Civil Aviation (TCCA); or Bombardier, Inc.'s TCCA Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.

### (i) Additional Information

(1) Refer to TCCA AD CF–2022–19, dated April 19, 2022, for related information. This TCCA AD may be found in the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2022–1480.

(2) For more information about this AD, contact Yaser Osman, Aerospace Engineer, Airframe and Propulsion Section, FAA, New

York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; email [9-avs-nyaco-cos@faa.gov](mailto:9-avs-nyaco-cos@faa.gov).

(3) For service information identified in this AD that is not incorporated by reference, contact Bombardier Business Aircraft Customer Response Center, 400 Côte-Vertu Road West, Dorval, Québec H4S 1Y9, Canada; telephone 514–855–2999; email [ac.yul@aero.bombardier.com](mailto:ac.yul@aero.bombardier.com); website [bombardier.com](https://www.bombardier.com). You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

### (j) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this

paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Bombardier Service Bulletin 100–53–35, dated December 6, 2021.

(ii) Bombardier Service Bulletin 350–53–004, dated December 6, 2021.

(3) For service information identified in this AD, contact Bombardier Business Aircraft Customer Response Center, 400 Côte-Vertu Road West, Dorval, Québec H4S 1Y9, Canada; telephone 514–855–2999; email [ac.yul@aero.bombardier.com](mailto:ac.yul@aero.bombardier.com); website [bombardier.com](http://bombardier.com).

(4) You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email [fr.inspection@nara.gov](mailto:fr.inspection@nara.gov), or go to: [www.archives.gov/federal-register/cfr/ibr-locations.html](http://www.archives.gov/federal-register/cfr/ibr-locations.html).

Issued on November 10, 2022.

**Christina Underwood,**

*Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.*

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 39

[Docket No. FAA–2022–1475; Project Identifier MCAI–2022–00823–T]

RIN 2120–AA64

#### Airworthiness Directives; Airbus SAS Airplanes

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking (NPRM).

**SUMMARY:** The FAA proposes to supersede Airworthiness Directive (AD) 2022–06–02, which applies to all Airbus SAS Model A318–111, and –112 airplanes; Model A319–111, –112, –113, –114, –115, –131, –132, and –133 airplanes; Model A320–211, –212, –214, –216, –231, –232, and –233 airplanes; and Model A321–111, –112, –131, –211, –212, –213, –231, and –232 airplanes. AD 2022–06–02 requires new repetitive inspections of the 80 view unit (80VU) rack lower lateral fittings, lower central support, upper fittings, central post, and shelves attachments for discrepancies, and corrective actions if necessary. This

AD was prompted by a determination that the compliances times must be revised to address the unsafe condition. This proposed AD would continue to require the actions in AD 2022–06–02 with revised compliance times, as specified in a European Union Aviation Safety Agency (EASA) AD, which is proposed for incorporation by reference (IBR). The FAA is proposing this AD to address the unsafe condition on these products.

**DATES:** The FAA must receive comments on this proposed AD by January 3, 2023.

**ADDRESSES:** You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to [regulations.gov](http://regulations.gov). Follow the instructions for submitting comments.

- *Fax:* 202–493–2251.

- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

**AD Docket:** You may examine the AD docket at [regulations.gov](http://regulations.gov) under Docket No. FAA–2022–1475; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

**Material Incorporated by Reference:**

- For material that is proposed for IBR in this NPRM, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email [ADs@easa.europa.eu](mailto:ADs@easa.europa.eu); website [easa.europa.eu](http://easa.europa.eu). You may find this material on the EASA website at [easa.europa.eu](http://easa.europa.eu). It is also available at [regulations.gov](http://regulations.gov) under Docket No. FAA–2022–1475.

- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

**FOR FURTHER INFORMATION CONTACT:** Dan Rodina, Aerospace Engineer, Large Aircraft Section, FAA, International Validation Branch, 2200 South 216th St., Des Moines, WA 98198; telephone 206–231–3225; email [dan.rodina@faa.gov](mailto:dan.rodina@faa.gov).

**SUPPLEMENTARY INFORMATION:**

### Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include “Docket No. FAA–2022–1475; Project Identifier MCAI–2022–00823–T” at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to [regulations.gov](http://regulations.gov), including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

### Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as “PROPIN.” The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Dan Rodina, Aerospace Engineer, Large Aircraft Section, FAA, International Validation Branch, 2200 South 216th St., Des Moines, WA 98198; telephone 206–231–3225; email [dan.rodina@faa.gov](mailto:dan.rodina@faa.gov). Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

### Background

The FAA issued AD 2022–06–02, Amendment 39–21968 (87 FR 16094, March 22, 2022) (AD 2022–06–02), for all Airbus SAS Model A318–111, and –112 airplanes; Model A319–111, –112, –113, –114, –115, –131, –132, and –133 airplanes; Model A320–211, –212, –214,

–216, –231, –232, and –233 airplanes; and Model A321–111, –112, –131, –211, –212, –213, –231, and –232 airplanes. AD 2022–06–02 requires new repetitive inspections of the 80VU rack lower lateral fittings, lower central support, upper fittings, central post, and shelves attachments for discrepancies, and corrective actions if necessary. The FAA issued AD 2022–06–02 to address damage or cracking of the 80VU fittings and supports, which could lead to possible disconnection of the cable harnesses to one or more computers, and if occurring during a critical phase of flight, could result in reduced control of the airplane.

#### Actions Since AD 2022–06–02 Was Issued

Since the FAA issued AD 2022–06–02, it's been determined that the compliance times must be revised to address the unsafe condition.

EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2022–0120R1, dated June 30, 2022 (EASA AD 2022–0120R1) (also referred to as the MCAI), to correct an unsafe condition for all Airbus SAS Model A318–111, A318–112, A319–111, A319–112, A319–113, A319–114, A319–115, A319–131, A319–132, A319–133, A320–211, A320–212, A320–214, A320–215, A320–216, A320–231, A320–232, A320–233, A321–111, A321–112, A321–131, A321–211, A321–212, A321–213, A321–231, and A321–232 airplanes. Model A320–215 airplanes are not certificated by the FAA and are not included on the U.S. type certificate data sheet; this proposed AD therefore does not include those airplanes in the applicability.

This proposed AD was prompted by reports of damaged lower lateral fittings of the 80VU rack and a determination that the compliance times must be revised. The FAA is proposing this AD to address damage or cracking of the 80VU fittings and supports, which could lead to possible disconnection of the cable harnesses to one or more computers, and if occurring during a critical phase of flight, could result in reduced control of the airplane. See the

MCAI for additional background information.

#### Explanation of Retained Requirements

Although this proposed AD does not explicitly restate the requirements of AD 2022–06–02, this proposed AD would retain all of the requirements of AD 2022–06–02. Those requirements are referenced in EASA AD 2022–0120R1, which, in turn, is referenced in paragraph (g) of this proposed AD.

#### Related Service Information Under 1 CFR Part 51

EASA AD 2022–0120R1 specifies procedures for repetitive special detailed inspections of the 80VU rack lower lateral fittings, lower central support, upper fittings, central post, and shelves attachments for discrepancies (referred to as damaged, or parts not found in good condition in the service information) (including broken fittings, missing bolts, an electronics rack FIN 80VU that is in contact with structure, any bush that has migrated, burred material, and cracks), and corrective action if necessary. Corrective actions include modification, repair, and replacement. EASA AD 2022–0120R1 also describes procedures for reporting inspection results to Airbus.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section.

#### FAA's Determination

These products have been approved by the aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with the State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop in other products of these same type designs.

#### Proposed AD Requirements in This NPRM

This proposed AD would retain all of the requirements of AD 2022–06–02.

This proposed AD would require accomplishing the actions specified in EASA AD 2022–0120R1 described previously, except for any differences identified as exceptions in the regulatory text of this proposed AD. This proposed AD would also revise the compliance times.

#### Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to incorporate EASA AD 2022–0120R1 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with EASA AD 2022–0120R1 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular section in EASA AD 2022–0120R1 does not mean that operators need comply only with that section. For example, where the AD requirement refers to "all required actions and compliance times," compliance with this AD requirement is not limited to the section titled "Required Action(s) and Compliance Time(s)" in EASA AD 2022–0120R1. Service information required by EASA AD 2022–0120R1 for compliance will be available at [regulations.gov](https://www.faa.gov/regulations) by searching for and locating Docket No. FAA–2022–1475 after the FAA final rule is published.

#### Costs of Compliance

The FAA estimates that this proposed AD affects 1,528 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

#### ESTIMATED COSTS FOR REQUIRED ACTIONS

| Action                                   | Labor cost  | Parts cost | Cost per product  | Cost on U.S. operators |
|--|---|------------|-------------------|------------------------|
| Retained actions from AD 2022-06-02 .... | Up to 8 work-hours × \$85 per hour = Up to \$680. | \$0        | Up to \$680 ..... | Up to \$1,039,040.     |

\* Table does not include estimated costs for reporting.

The FAA estimates that it would take about 1 work-hour per product to comply with the reporting requirement in this proposed AD. The average labor rate is \$85 per hour. Based on these

figures, the FAA estimates the cost of reporting the inspection results on U.S. operators to be \$129,880, or \$85 per product.

The FAA estimates the following costs to do any necessary on-condition

actions that would be required based on the results of any required actions. The FAA has no way of determining the number of aircraft that might need these on-condition actions:

#### ESTIMATED COSTS OF ON-CONDITION ACTIONS

| Action             | Labor cost  | Parts cost          | Cost per product |
|--------------------|---|---------------------|------------------|
| Repair .....       | 122 work-hours × \$85 per hour = \$10,370 .....             | \$4,150 .....       | \$14,520.        |
| Replacement .....  | Up to 189 work-hours × \$85 per hour = Up to \$16,065 ..... | Up to \$6,928 ..... | Up to \$22,993.  |
| Modification ..... | 189 work-hours × \$85 per hour = \$16,065 .....             | \$7,407 .....       | \$23,472.        |

#### Paperwork Reduction Act

A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2120-0056. Public reporting for this collection of information is estimated to take approximately 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. All responses to this collection of information are mandatory. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: Information Collection Clearance Officer, Federal Aviation Administration, 10101 Hillwood Parkway, Fort Worth, TX 76177-1524.

#### Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or

develop on products identified in this rulemaking action.

#### Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Would not affect intrastate aviation in Alaska, and
- (3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

#### List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

#### The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

#### PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

##### § 39.13 [Amended]

- 2. The FAA amends § 39.13 by:
- a. Removing Airworthiness Directive (AD) 2022-06-02, Amendment 39-21968 (87 FR 16094, March 22, 2022); and
  - b. Adding the following new AD:

**Airbus SAS:** Docket No. FAA-2022-1475; Project Identifier MCAI-2022-00823-T.

#### (a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by January 3, 2023.

#### (b) Affected ADs

This AD replaces AD 2022-06-02, Amendment 39-21968 (87 FR 16094, March 22, 2022) (AD 2022-06-02).

#### (c) Applicability

This AD applies to all Airbus SAS airplanes, certificated in any category, identified in paragraphs (c)(1) through (4) of this AD.

- (1) Model A318-111 and -112 airplanes.
- (2) Model A319-111, -112, -113, -114, -115, -131, -132, and -133 airplanes.
- (3) Model A320-211, -212, -214, -216, -231, -232, and -233 airplanes.
- (4) Model A321-111, -112, -131, -211, -212, -213, -231, and -232 airplanes.

#### (d) Subject

Air Transport Association (ATA) of America Code 25, Equipment/furnishings.

#### (e) Unsafe Condition

This AD was prompted by reports of damaged lower lateral fittings of the 80VU rack and a determination that the compliance times must be revised. The FAA is issuing this AD to address damage or cracking of the 80VU fittings and supports, which could lead to possible disconnection of the cable harnesses to one or more computers, and if occurring during a critical phase of flight, could result in reduced control of the airplane.

#### (f) Compliance

Comply with this AD within the compliance times specified, unless already done.

#### (g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2022-0120R1, dated June 30, 2022 (EASA AD 2022-0120R1).

#### (h) Exceptions to EASA AD 2022-0120R1

- (1) Where EASA AD 2022-0120R1 refers to its effective date, this AD requires using the effective date of this AD.
- (2) Where EASA AD 2022-0120R1 refers to the effective date of EASA AD 2021-0172,

this AD requires using April 26, 2022 (the effective date of AD 2022–06–02).

(3) Where paragraph (2) of EASA AD 2022–0120R1 specifies “any discrepancy,” for this AD “any discrepancy” includes broken fittings, missing bolts, an electronics rack FIN 80VU that is in contact with structure, any bush that has migrated, burred material, and cracks.

(4) Where the service information referenced in EASA AD 2022–0120R1 specifies to “replace the damaged parts with new parts,” this AD allows replacing damaged parts with new or serviceable parts.

(5) The “Remarks” section of EASA AD 2022–0120R1 does not apply to this AD.

#### (i) Credit for Previous Actions

This paragraph provides credit for the inspections and corrective actions required by paragraph (g) of this AD if those actions were accomplished prior to the effective date of this AD using Airbus Service Bulletin A320–25–1BKJ, Revision 02, dated April 9, 2020, with corrections referenced in the Airbus Technical Adaptation 80827186/024/2020, Issue 1, dated September 18, 2020.

#### (j) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the International Validation Branch, send it to the attention of the person identified in paragraph (k)(1) of this AD. Information may be emailed to: [9-AVS-AIR-730-AMOC@faa.gov](mailto:9-AVS-AIR-730-AMOC@faa.gov). Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer*: For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or EASA; or Airbus SAS’s EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Required for Compliance (RC)*: Except as required by paragraph (j)(2) of this AD, if any service information contains procedures or tests that are identified as RC, those procedures and tests must be done to comply with this AD; any procedures or tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator’s maintenance or inspection program without obtaining approval of an AMOC, provided the procedures and tests identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to procedures or tests identified as RC require approval of an AMOC.

#### (k) Additional Information

(1) For more information about this AD, contact Dan Rodina, Aerospace Engineer, Large Aircraft Section, FAA, International Validation Branch, 2200 South 216th St., Des Moines, WA 98198; telephone 206–231–3225; email [dan.rodina@faa.gov](mailto:dan.rodina@faa.gov).

(2) For Airbus service information identified in this AD that is not incorporated by reference, contact Airbus SAS, Airworthiness Office—EIAS, Rond-Point Emile Dewoitine No: 2, 31700 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email [account.airworth-eas@airbus.com](mailto:account.airworth-eas@airbus.com); website [airbus.com](http://airbus.com). You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

#### (l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2022–0120R1, dated June 30, 2022.

(ii) [Reserved]

(3) For EASA AD 2022–0120R1, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email [ADs@easa.europa.eu](mailto:ADs@easa.europa.eu); website [easa.europa.eu](http://easa.europa.eu). You may find this EASA AD on the EASA website at [ad.easa.europa.eu](http://ad.easa.europa.eu).

(4) You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email [fr.inspection@nara.gov](mailto:fr.inspection@nara.gov), or go to: [www.archives.gov/federal-register/cfr/ibr-locations.html](http://www.archives.gov/federal-register/cfr/ibr-locations.html).

Issued on November 9, 2022.

**Christina Underwood,**

*Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.*

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 39

[Docket No. FAA–2022–1478; Project Identifier MCAI–2022–00668–E]

RIN 2120–AA64

### Airworthiness Directives; Pratt & Whitney Canada Corp. Turbofan Engines

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking (NPRM).

**SUMMARY:** The FAA proposes to supersede Airworthiness Directive (AD) 2004–04–09, which applies to certain Pratt & Whitney Canada Corp. (P&WC) JT15D–1, JT15D–1A, and JT15D–1B model turbofan engines. AD 2004–04–09 requires a one-time borescope inspection (BSI) of the rear face of certain impellers for evidence of a machined groove or step, and repair or replacement of the impeller if a groove or step is found. Since the FAA issued AD 2004–04–09, the FAA was notified of an uncontained failure of an impeller installed on a P&WC JT15D–1A engine during takeoff and subsequent investigation by the manufacturer that discovered machining marks on the impeller. This proposed AD would require borescope fluorescent penetrant inspection (FPI) of the rear face of certain impellers for evidence of machining witness lines and, depending on the results of the inspection, replacement of the impeller, as specified in a Transport Canada AD, which is proposed for incorporation by reference (IBR). The FAA is proposing this AD to address the unsafe condition on these products.

**DATES:** The FAA must receive comments on this NPRM by January 3, 2023.

**ADDRESSES:** You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to [regulations.gov](http://regulations.gov). Follow the instructions for submitting comments.

- *Fax:* (202) 493–2251.

- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

**AD Docket:** You may examine the AD docket at *regulations.gov* under Docket No. FAA–2022–1478 or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

**Material Incorporated by Reference:**

- For material that is proposed for IBR in this AD, contact Transport Canada, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario K1A 0N5, Canada; phone: (888) 663–3639; email: *AD-CN@tc.gc.ca*. You may find this material on the Transport Canada website at *tc.canada.ca/en/aviation*.
- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call (817) 222–5110.

**FOR FURTHER INFORMATION CONTACT:**

Barbara Caufield, Aviation Safety Engineer, ECO Branch, FAA, 1200 District Avenue, Burlington, MA 01803; phone: (781) 238–7146; email: *barbara.caufield@faa.gov*.

**SUPPLEMENTARY INFORMATION:**

**Comments Invited**

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include “Docket No. FAA–2022–1478; Project Identifier MCAI–2022–00668–E” at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend the proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov*, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

**Confidential Business Information**

CBI is commercial or financial information that is both customarily and actually treated as private by its owner.

Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as “PROPIN.” The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Barbara Caufield, Aviation Safety Engineer, ECO Branch, FAA, 1200 District Avenue, Burlington, MA 01803. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

**Background**

The FAA issued AD 2004–04–09, Amendment 39–13490 (69 FR 9520, March 1, 2004) (AD 2004–04–09), for certain P&WC JT15D–1, JT15D–1A, and JT15D–1B model turbofan engines. AD 2004–04–09 was prompted by three reports of uncontained failure of the impeller. AD 2004–04–09 requires a one-time borescope inspection of the rear face of certain impellers for evidence of a machined groove or step, and repair or replacement of the impeller if a groove or step is found. The FAA issued AD 2004–04–09 to prevent uncontained failure of the impeller and possible damage to the airplane.

**Actions Since AD 2004–04–09 Was Issued**

Since the FAA issued AD 2004–04–09, Transport Canada, which is the aviation authority for Canada, has issued Transport Canada AD CF–2022–27, dated June 2, 2022 (Transport Canada AD CF–2022–27), to address an unsafe condition for P&WC JT15D–1, JT15D–1A, and JT15D–1B model turbofan engines. The MCAI states that there has been one recent in-service event of a JT15D–1A engine uncontained failure during a takeoff roll of the airplane. An investigation by P&WC has determined that a crack originated from machining marks on the back face of the impeller and subsequently propagated until the impeller fractured. There is evidence that the event engine had been previously inspected in accordance with P&WC Service Bulletin (SB) No. JT15D–72–7590, dated May 23, 2003 (mandated by Transport Canada AD CF–2003–17,

dated June 23, 2003), but it appears that the machining marks were not detected. P&WC, therefore, published P&WC SB JT15D–72–7655, Original Issue, dated April 14, 2022, to inspect the rear face of the impeller using a new borescope FPI procedure. As a result, Transport Canada issued AD CF–2022–27 to require accomplishment of the borescope FPI at the next hot section inspection until the impeller, part number (P/N) 3020365, is replaced at the next scheduled engine overhaul.

This proposed AD was prompted by three prior reports of uncontained failure of the impeller, and one additional recent report of an in-service uncontained failure event. The FAA is proposing this AD to address uncontained failure of the impeller. This condition, if not addressed, could result in fracture of the impeller, subsequent uncontained failure of the engine, and damage to the airplane. See Transport Canada AD CF–2022–27 for additional background information.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2022–1478.

**FAA’s Determination**

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to the FAA’s bilateral agreement with the State of Design Authority, the FAA has been notified of the unsafe condition described in the Transport Canada AD. The FAA is issuing this AD after determining that the unsafe condition described previously is likely to exist or develop in other products of the same type design.

**Related Service Information Under 1 CFR Part 51**

The FAA reviewed Transport Canada AD CF–2022–27. Transport Canada AD CF–2022–27 specifies instructions for performing a one-time inspection of the rear face of the impeller and replacing the impeller if unacceptable machining witness lines or crack indications are found. Transport Canada AD CF–2022–27 also specifies instructions for replacing the impeller at the next scheduled engine overhaul.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in **ADDRESSES**.

**Proposed AD Requirements in This NPRM**

This proposed AD would retain none of the requirements of AD 2004–04–09. This proposed AD would require

accomplishing the actions specified in Transport Canada AD CF–2022–27, described previously.

### Explanation of Required Compliance Information

In the FAA’s ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has since coordinated with other manufacturers and CAAs to use this process. As a result, the FAA

proposes to incorporate by reference Transport Canada AD CF–2022–27 in the FAA final rule. This proposed AD would, therefore, require compliance with Transport Canada AD CF–2022–27 in its entirety through that incorporation. Using common terms that are the same as the heading of a particular section in the Transport Canada AD does not mean that operators need comply only with that section. For example, where the AD requirement refers to “Compliance,” compliance with this AD requirement is not limited to the section titled “Corrective Actions” in Transport

Canada AD CF–2022–27. Service information required by the Transport Canada AD for compliance will be available at [regulations.gov](https://www.regulations.gov) by searching for and locating Docket No. FAA–2022–1478 after the FAA final rule is published.

### Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 100 engines installed on airplanes of U.S. Registry.

The FAA estimates the following costs to comply with this proposed AD:

### ESTIMATED COSTS

| Action                 | Labor cost                                    | Parts cost | Cost per product | Cost on U.S. operators |
|------------------------|---|------------|------------------|------------------------|
| Inspect impeller ..... | 6 work-hours × \$85 per hour = \$510 .....    | \$0        | \$510            | \$51,000               |
| Replace impeller ..... | 30 work-hours × \$85 per hour = \$2,550 ..... | 75,000     | 77,550           | 7,755,000              |

### Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency’s authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

### Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

### List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

### The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

### PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

#### § 39.13 [Amended]

- 2. The FAA amends § 39.13 by:
- a. Removing Airworthiness Directive 2004–04–09, Amendment 39–13490 (69 FR 9520, March 1, 2004); and
  - b. Adding the following new airworthiness directive:

**Pratt & Whitney Canada Corp.:** Docket No. FAA–2022–1478; Project Identifier MCAI–2022–00668–E.

#### (a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) action by January 3, 2023.

#### (b) Affected ADs

This AD replaces AD 2004–04–09, Amendment 39–13490 (69 FR 9520, March 1, 2004) (AD 2004–04–09).

### (c) Applicability

This AD applies to Pratt & Whitney Canada Corp. JT15D–1, JT15D–1A, and JT15D–1B model turbofan engines as identified in Transport Canada AD CF–2022–27, dated June 2, 2022 (Transport Canada AD CF–2022–27).

### (d) Subject

Joint Aircraft Service Component (JASC) Code 7230, Turbine Engine Compressor Section.

### (e) Unsafe Condition

This AD was prompted by three prior reports of uncontained failure of the impeller, and one additional recent report of an in-service uncontained failure event. The FAA is issuing this AD to prevent uncontained failure of the impeller. The unsafe condition, if not addressed, could result in fracture of the impeller, subsequent uncontained failure of the engine, and damage to the airplane.

### (f) Compliance

Comply with this AD within the compliance times specified, unless already done.

### (g) Required Actions

Except as specified in paragraph (h) of this AD: Perform all required actions within the compliance times specified in, and in accordance with, Transport Canada AD CF–2022–27.

### (h) No Reporting Requirement

Although the service information referenced in Transport Canada AD CF–2022–27 specifies to submit certain information to the manufacturer, this AD does not include that requirement.

### (i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, ECO Branch, FAA, has the authority to approve AMOCs for this AD,

if requested using the procedures found in § 39.19. In accordance with § 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (j) of this AD and email it to: [ANE-AD-AMOC@faa.gov](mailto:ANE-AD-AMOC@faa.gov).

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

#### (j) Additional Information

For more information about this AD, contact Barbara Caufield, Aviation Safety Engineer, ECO Branch, FAA, 1200 District Avenue, Burlington, MA 01803; phone: (781) 238-7146; email: [barbara.caufield@faa.gov](mailto:barbara.caufield@faa.gov).

#### (k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Transport Canada AD CF-2022-27, dated June 2, 2022.

(ii) [Reserved]

(3) For Transport Canada AD CF-2022-27, contact Transport Canada, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario K1A 0N5, Canada; phone: (888) 663-3639; email: [AD-CN@tc.gc.ca](mailto:AD-CN@tc.gc.ca); website: [tc.canada.ca/en/aviation](https://tc.canada.ca/en/aviation).

(4) You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call (817) 222-5110.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email: [fr.inspection@nara.gov](mailto:fr.inspection@nara.gov), or go to: [www.archives.gov/federal-register/cfr/ibr-locations.html](https://www.archives.gov/federal-register/cfr/ibr-locations.html).

Issued on November 10, 2022.

**Christina Underwood,**

## DEPARTMENT OF COMMERCE

### International Trade Administration

#### 19 CFR Part 351

[Docket No. 221115-0239]

RIN 0625-AB23

#### Determining the Existence of a Particular Market Situation That Distorts Costs of Production

**AGENCY:** Enforcement and Compliance, International Trade Administration, Department of Commerce.

**ACTION:** Advanced notice of proposed rulemaking.

**SUMMARY:** Enforcement and Compliance (E&C), of the Department of Commerce (Commerce), administers the antidumping duty (AD) and countervailing duty (CVD) AD/CVD trade remedy laws of the Tariff Act of 1930, as amended (the Act). Section 773(e) of the Act provides for Commerce to address, in its antidumping calculations, the existence of a particular market situation (PMS), such that the cost of materials and fabrication do not accurately reflect the cost of production in the ordinary course of trade. Commerce seeks public comments as it considers revisiting its PMS methodology and issuing a new regulation that would identify information that Commerce should take into consideration and should not take into consideration in determining whether a PMS exists that distorts the cost of production. Commerce also seeks comments as it considers adjustments to calculations when the amount of distortion in the cost of production caused by a PMS cannot be quantified based on the record before it.

**DATES:** Comments must be received no later than December 18, 2022.

**ADDRESSES:** Submit electronic comments only through the Federal eRulemaking Portal at <https://www.Regulations.gov>, Docket No. ITA-2022-0012. Comments may also be submitted by mail or hand delivery/courier, addressed to Lisa W. Wang, Assistant Secretary for Enforcement and Compliance, Room 18022, Department of Commerce, 1401 Constitution Ave. NW, Washington, DC 20230. An appointment must be made in advance with the APO/Dockets Unit at (202) 482-4920 to submit comments in person by hand delivery or courier. All comments submitted during the comment period permitted by this document will be a matter of public record and will generally be available on the Federal eRulemaking Portal at

<https://www.Regulations.gov>. Commerce will not accept comments accompanied by a request that part or all of the material be treated confidentially because of its business proprietary nature or for any other reason. Therefore, do not submit confidential business information or otherwise sensitive or protected information.

Any questions concerning the process for submitting comments should be submitted to Enforcement & Compliance Communications office at (202) 482-0063 or [ECCcommunications@trade.gov](mailto:ECCcommunications@trade.gov).

**FOR FURTHER INFORMATION CONTACT:** Scott McBride at (202) 482-6292 and Hendricks Valenzuela at (202) 482-4750.

#### SUPPLEMENTARY INFORMATION:

##### Background on Particular Market Situation

In 2015, pursuant to the Trade Preferences Extension Act (TPEA), section 771(15) of the Act was amended to provide that Commerce consider sales to be outside the “ordinary course of trade” when there are situations in which Commerce “determines that the particular market situation prevents a proper comparison with the export price or constructed export price.” Further, section 773(e) of the Act was amended to provide that in determining the “costs of material and fabrication or other processing of any kind employed in producing the merchandise, during a period which would ordinarily permit the production of the merchandise in the ordinary course of trade,” for determining constructed value, “if a particular market situation exists such that the cost of materials and fabrication or other processing of any kind does not accurately reflect the cost of production in the ordinary course of trade,” Commerce “may use another calculation methodology under this subtitle or any other calculation methodology.” The Act does not (1) define a particular market situation (“PMS”), (2) identify the information which Commerce should consider in determining the existence of a PMS that “does not accurately reflect the costs of production in the ordinary course of trade,” or (3) provide Commerce with guidance as to the information which Commerce should consider in determining if a market situation is, or is not, “particular.”

The legislative history of the cost-based particular market situation reflects that Congress intended for Commerce to not only identify such situations, but to also effectively address them in its calculations. For example, in advocating for the TPEA language, one

member of the House of Representatives argued that the legislation would “empower” Commerce “to be able to disregard prices or costs of inputs that foreign producers purchase if the Department of Commerce” determined that those input values were “subsidized” or otherwise outside the ordinary course of trade.<sup>1</sup> Likewise, on the United States Senate floor, a Senator explained that the proposed legislation would “guarantee that Americans can find a more level playing field as we compete in the world economy. . . .”<sup>2</sup> The Senator emphasized that this legislation would help stop United States workers and manufacturers from “being cheated” by foreign industries that were not playing fair and “illegally subsidizing” the production of certain products.<sup>3</sup>

Since the Act was amended, Commerce has in certain instances identified a PMS and adjusted its calculations in response, which has been challenged before both the U.S. Court of International Trade and the U.S. Court of Appeals for the Federal Circuit (CAFC). One matter which has been at issue before the courts is the information Commerce should consider in determining the existence of a PMS. That matter came before the CAFC this past year in *Nexteel v. United States*, in which the CAFC held that Commerce’s finding that a PMS existed in Korea during the period of review was unsupported by substantial evidence.<sup>4</sup> In analyzing Commerce’s PMS determination, the CAFC appeared to reach at least four conclusions. First, a PMS which distorts costs, as referenced in the Act, must cause costs to deviate from what they would have otherwise been in the ordinary course of trade.<sup>5</sup> Second, a PMS must be particular to certain producers or exporters, inputs, or the market where the inputs are manufactured.<sup>6</sup> Third, if there is a claim of a subsidy or government interference, there should be evidence that the producer or seller of the input at issue received, or should have received, that subsidy or government assistance, and that there is some form of impact on the price of the input as a result of that subsidy or government interference.<sup>7</sup> Finally, Commerce is not required to quantify a distortion in costs by the

PMS to find the existence of a PMS, but if Commerce is able to quantify the distortion, such a quantification may help support a finding of the existence of a PMS.<sup>8</sup>

In light of the CAFC’s holding and analysis in *Nexteel*, as well as our experience in administering the PMS provision over the past several years, we have determined it is appropriate to revisit Commerce’s approach in certain instances to analyzing and determining the existence of a PMS that distorts costs of production. In revisiting Commerce’s approach, we have considered that the public and Commerce may benefit from the issuance of a regulation that addresses the information which Commerce should consider, or need not consider, in determining if a PMS exists that distorts costs of production. We also believe that a regulation that addresses the adjustments Commerce may make to its calculations if it determines the existence of a PMS that distorts costs of production might prove beneficial. We are therefore soliciting public comments on certain aspects of our PMS analysis pursuant to that exercise.

#### Request for Comments

We are issuing this advanced notice of proposed rulemaking to inform the public that Commerce is considering issuing a PMS regulation and to invite comments on that new regulation. Specifically, Commerce is inviting parties to provide comments on three issues: (1) identify information which they believe Commerce should consider in determining if a PMS exists which distorts the costs of production if that information is reasonably available and relevant to the PMS allegation; (2) identify information which they believe Commerce should not be required to consider when determining if a PMS exists, regardless of the PMS allegation; and (3) provide comments on adjustments which Commerce may make to its calculations when it determines the existence of a PMS, but the record before it does not allow for the quantification of cost distortions.

Dated: November 15, 2022.

**Lisa W. Wang,**

*Assistant Secretary for Enforcement and Compliance.*

### Patent and Trademark Office

#### 37 CFR Part 1

[Docket No.: PTO–P–2022–0008]

RIN 0651–AD60

#### Standardization of the Patent Term Adjustment Statement Regarding Information Disclosure Statements

**AGENCY:** United States Patent and Trademark Office, Department of Commerce.

**ACTION:** Notice of proposed rulemaking; reopening of comment period.

**SUMMARY:** The United States Patent and Trademark Office (USPTO) is reopening the comment period for the proposed rule titled “Standardization of the Patent Term Adjustment Statement Regarding Information Disclosure Statements” that was published in the *Federal Register* on July 12, 2022. The proposed rule’s comment period, which ended on September 12, 2022, is extended until December 2, 2022. In addition, the USPTO will treat as timely any comment that was received between September 12, 2022, and November 18, 2022.

**DATES:** The USPTO is reopening the comment period for the proposed rule that published at 87 FR 41267 on July 12, 2022, and that requested comments by July 12, 2022. Comments on this proposed rule must be received on or before December 2, 2022. The USPTO will also treat as timely any comments received between September 12, 2022, and November 18, 2022.

**ADDRESSES:** For reasons of government efficiency, comments must be submitted through the Federal eRulemaking Portal at [www.regulations.gov](http://www.regulations.gov). To submit comments via the portal, enter docket number PTO–P–2022–0008 on the homepage and click “Search.” The site will provide a search results page listing all documents associated with this docket. Find a reference to this document and click on the “Comment” icon, complete the required fields, and enter or attach your comments. Attachments to electronic comments will be accepted as various file types, including Adobe® portable document format (PDF) and Microsoft Word® format. Because comments will be made available for public inspection, information the submitter does not desire to make public, such as an address or phone number, should not be included in the comments.

Visit the Federal eRulemaking Portal for additional instructions on providing

## POSTAL REGULATORY COMMISSION

### 39 CFR Part 3030

[Docket No. RM2020-5; Order No. 6325]

RIN 3211-AA27

### Market Dominant Postal Products

**AGENCY:** Postal Regulatory Commission.

**ACTION:** Proposed rule.

**SUMMARY:** The Commission proposes amendments to its regulations concerning rate incentives for Market Dominant products and republishes additional rules. The Commission invites public comment.

**DATES:** *Comments are due:* December 19, 2022.

**ADDRESSES:** Submit comments electronically via the Commission’s

Filing Online system at <https://www.prc.gov>. Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

**FOR FURTHER INFORMATION CONTACT:** David A. Trissell, General Counsel, at 202-789-6820.

### SUPPLEMENTARY INFORMATION:

#### Table of Contents

- I. Background
- II. Basis for Proposed Rule Change
- III. Proposed Rule

#### I. Background

In its general Market Dominant rate adjustment filings, the Postal Service routinely proposes to offer rate incentives in the form of promotions that reduce rates by providing discounts, rebates, or credits to participating mailers of certain types of mailpieces. Typically, such promotions are offered for several months during a particular calendar year for certain mailpieces in the First-Class Mail and USPS Marketing Mail classes. If the Commission approves, then the promotion may be offered again, with or without modifications, in the next calendar year. Each rate incentive offered by the Postal Service is either a rate of general applicability or a rate not of general applicability. A rate incentive of general applicability may be eligible for inclusion in the percentage change in rates calculation (provided that it satisfies all the applicable criteria under the Commission rules), which will allow for the Postal Service to generate price cap authority for the applicable class of mail. By contrast, a rate incentive not of general applicability is ineligible for inclusion in the percentage change in rates calculation; it may not be used to generate price cap authority for the applicable class of mail.

The Commission previously adopted regulations concerning rate incentives for Market Dominant products.<sup>1</sup> However, in connection with an appeal, the Commission stated that it would reconsider Order No. 5510 and that it “does not intend to enforce Order No. 5510 during the reconsideration period.”<sup>2</sup> Having reconsidered, the Commission proposes modifying certain of those rules as well as republishing

and enforcing certain other of those rules.

#### II. Basis for Proposed Rule Change

The Commission proposes to clarify its rules by making one revision and by beginning to enforce two revisions that it made in Order No. 5510. First, the Commission proposes to amend § 3030.101(j) to clarify that to qualify as a rate of general applicability, a rate incentive cannot be based on historical mail volumes or prior participation in a rate incentive or promotion. Second, the Commission proposes to begin enforcing the changes that it made to § 3030.128(f)(2) in Order No. 5510 (including the additional criterion that a rate incentive must be made available to all mailers equally on the same terms and conditions to be eligible for inclusion in the percentage change in rates calculation). Third, the Commission proposes to begin enforcing the changes that it made to § 3030.123(j), including additional requirements intended to ensure that the Postal Service provides sufficient information at the outset of a Market Dominant rate adjustment proceeding.

The proposed revision of the definition of “rate of general applicability” in § 3030.101(j) is designed to clarify what rate incentives may qualify for inclusion in the percentage change in rates calculation as rates of general applicability. Under the Commission’s existing rules “[a] rate is not a rate of general applicability if eligibility for the rate is dependent on factors other than the characteristics of the mail to which the rate applies[.]” 39 CFR 3030.101(j). A characteristic of the mail is a feature of the mail sent, not of the mailer sending the mail. Thus, the proposed rule adds an additional sentence to clarify that a rate incentive is not a rate of general applicability if eligibility for the rate is dependent in whole or in part on the volume of mail sent by a mailer in a past year or years or on the participation by a mailer in a rate incentive or promotion in a past year or years. Revising the Commission’s definition of “rate of general applicability” will provide other benefits. These other benefits include promoting fairness, avoiding unharmonious situations in the application of the Commission’s rules, limiting situations in which the Postal Service could obtain undue rate authority, and maintaining streamlined calculations.

The Commission also proposes republishing and beginning to enforce the requirement of § 3030.128(f)(2)(iv) that rate incentives included in the percentage change in rates calculation

<sup>1</sup> Docket No. RM2020-5, Order Adopting Final Rules Regarding Rate Incentives for Market Dominant Products, May 15, 2022 (Order No. 5510).

<sup>2</sup> Docket No. RM2020-5, Notice of Intent to Reconsider, August 26, 2020, at 2 (Order No. 5655); see *U.S. Postal Serv. v. Postal Reg. Comm’n*, Joint Motion for Voluntary Dismissal and Vacatur, No. 20-1208 (D.C. Cir. Sept. 11, 2020).

be “available to all mailers equally on the same terms and conditions.” Enforcing this provision will enhance fairness. The Postal Service has the pricing flexibility generally to set individual Market Dominant rate cells as it chooses, subject to the class-level application of the price cap. When a rate incentive is not made available to all mailers equally on the same terms and conditions, the discounts received by eligible mailers could be offset in part by higher rates paid by non-eligible mailers. This situation could lead to the non-eligible mailers effectively paying higher rates as a result of the rate incentive without having an opportunity to receive its benefits. Enforcing the requirement of § 3030.128(f)(2)(iv) that rate incentives included in the percentage change in rates calculation be “available to all mailers equally on the same terms and conditions” will prevent such situations from arising.

To clarify the specific information necessary to determine whether rate incentives should be included in the percentage change in rates calculation, the Commission proposes republishing and beginning to enforce the requirements for the contents of the Postal Service’s notice of rate adjustment related to Market Dominant rate incentives. These more detailed initial filing requirements will require the Postal Service to provide sufficient information at the outset of a Market Dominant rate adjustment proceeding to ensure that any rate incentive included in a percentage change in rates calculation meets the criteria of § 3030.128(f)(2).

### III. Proposed Rule

*Proposed § 3030.101(j).* Proposed § 3030.101(j) is revised to state clearly that the definition of “rate of general applicability” within the context of a Market Dominant rate adjustment proceeding does not include a rate incentive that is dependent on the volume of mail sent by a mailer in a past year or years or the participation by a mailer in a rate incentive or promotion in a past year or years.

*Current § 3030.123(j).* Current § 3030.123(j) is republished to identify clearly what information the Postal Service must file to support its claim that a rate incentive meets the necessary criteria to be included in a percentage change in rates calculation. Current

§ 3030.123(j) will be enforced in its entirety.

*Current § 3030.128(f)(2)(iv).* Current § 3030.128(f)(2)(iv) is republished to include a criterion for a Market Dominant rate incentive to be included in a percentage change in rates calculation that the incentive be available to all mailers equally on the same terms and conditions. Current § 3030.128(f)(2)(iv) will be enforced in its entirety.

### List of Subjects in 39 CFR Part 3030

Administrative practice and procedure, Postal Service.

For the reasons stated in the preamble, the Commission proposes to amend chapter III of title 39 of the Code of the Federal Regulations as follows:

### PART 3030—REGULATION OF RATES FOR MARKET DOMINANT PRODUCTS

■ 1. The authority citation for part 3030 continues to read as follows:

**Authority:** 39 U.S.C. 503; 3622.

■ 2. Amend § 3030.101 by revising paragraph (j) to read as follows:

#### § 3030.101 Definitions.

(j) *Rate of general applicability* means a rate applicable to all mail meeting standards established by the Mail Classification Schedule, the Domestic Mail Manual, and the International Mail Manual. A rate is not a rate of general applicability if eligibility for the rate is dependent on factors other than the characteristics of the mail to which the rate applies. A rate incentive is not a rate of general applicability if eligibility for the rate is wholly or partially dependent on the volume of mail sent by a mailer in a past year or years or on the participation by a mailer in a rate incentive or promotion in a past year or years. A rate is not a rate of general applicability if it benefits a single mailer. A rate that is only available upon the written agreement of both the Postal Service and a mailer, a group of mailers, or a foreign postal operator is not a rate of general applicability.

■ 3. Republish § 3030.123 paragraph (j) to read as follows:

#### § 3030.123 Supporting technical documentation.

(j) Whenever the Postal Service includes a rate incentive with its

planned rate adjustment, it must include with its filing:

(1) Whether the rate incentive is being treated under § 3030.128(f)(2) or under § 3030.128(f)(1) and (g);

(2) If the Postal Service seeks to include the rate incentive in the calculation of the percentage change in rates under § 3030.128(f)(2), whether the rate incentive is available to all mailers equally on the same terms and conditions; and

(3) If the Postal Service seeks to include the rate incentive in the calculation of the percentage change in rates under § 3030.128(f)(2), sufficient information to demonstrate that the rate incentive is a rate of general applicability, which at a minimum includes: The terms and conditions of the rate incentive; the factors that determine eligibility for the rate incentive; a statement that affirms that the rate incentive will not benefit a single mailer; and a statement that affirms that the rate incentive is not only available upon the written agreement of both the Postal Service and a mailer, or group of mailers, or a foreign postal operator.

■ 4. Republish § 3030.128 paragraph (f)(2) to read as follows:

#### § 3030.128 Calculation of percentage change in rates.

(f) \* \* \*

(2) A rate incentive may be included in a percentage change in rates calculation if it meets the following criteria:

(i) The rate incentive is in the form of a discount or can be easily translated into a discount;

(ii) Sufficient billing determinants are available for the rate incentive to be included in the percentage change in rate calculation for the class, which may be adjusted based on known mail characteristics or historical volume data (as opposed to forecasts of mailer behavior);

(iii) The rate incentive is a rate of general applicability; and

(iv) The rate incentive is made available to all mailers equally on the same terms and conditions.

By the Commission.

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

[Docket No. AMS–FTPP–22–0077]

#### Information Collection Renewal for Country of Origin Labeling

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Notice and request for comments.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995, this notice announces the Agricultural Marketing Service's (AMS) intention to request approval, from the Office of Management and Budget, for an extension of and revision to the currently approved information collection for Country of Origin Labeling.

**DATES:** Comments on this notice must be received by January 17, 2023.

**ADDRESSES:** Interested persons are invited to submit comments concerning this notice by using the electronic process available at <https://www.regulations.gov>. Comments may also be filed with the Docket Clerk, 1400 Independence Ave. SW, Room 2069-South, Washington, DC 20250; Fax: (202) 260–8369. All comments should reference the docket number AMS–FTPP–22–0077, the date, and the page number of this issue of the **Federal Register**. All comments submitted in response to this notice will be posted without change, including any personal information provided, at <https://www.regulations.gov> and will be included in the record and made available to the public.

**FOR FURTHER INFORMATION CONTACT:** Kenneth Becker, Branch Chief of Research and Rulemaking, Food Disclosure and Labeling Division, Agricultural Marketing Service, U.S. Department of Agriculture; Telephone

(202) 720–4486, Email: [kenneth.becker@usda.gov](mailto:kenneth.becker@usda.gov).

#### SUPPLEMENTARY INFORMATION:

*Title:* Information Collection Renewal for Country of Origin Labeling.

*OMB Number:* 0581–0250.

*Expiration Date of Approval:* March 31, 2023.

*Type of Request:* Extension and revision of a currently approved information collection.

*Abstract:* The 2002 (Pub. L. 107–171) and 2008 (Pub. L. 110–234), Farm Bills and the Consolidated Appropriations Act, 2016 (Pub. L. 114–113) amended the Agricultural Marketing Act of 1946 to require retailers to notify their customers of the country of origin of muscle cuts and ground lamb, chicken, and goat meat; wild and farm-raised fish and shellfish; perishable agricultural commodities; peanuts, pecans, and macadamia nuts; and ginseng. An interim final rule for mandatory Country of Origin Labeling (COOL) for fish and shellfish became effective on April 4, 2005. An interim final rule for the remaining covered commodities became effective on September 30, 2008. On January 15, 2009, a final rule was published for all covered commodities which became effective March 16, 2009. On May 23, 2013, a final rule was published to amend the definition of retailer and labeling requirements for meat muscle cut commodities derived from animals slaughtered in the United States. With the Consolidated Appropriations Act, 2016, Congress amended the Agricultural Marketing Act of 1946 to remove muscle cut beef and pork, and ground beef and pork commodities from COOL requirements. On March 2, 2016, AMS issued a final rule to remove mandatory COOL requirements for beef, pork, ground beef and ground pork to conform with the statute. Mandatory COOL requirements remain in full force and effect for all remaining covered commodities. Enforcement activities have been conducted since 2006 utilizing cooperative agreements established with State agencies as authorized by the statute. The previously approved information collection request expires on March 31, 2023.

*Estimate of Burden:* Public reporting burden for recordkeeping storage and maintenance is estimated to average 56.9 hours per response.

*Recordkeepers:* Importers, food manufacturers, and food retailers.

*Estimated Number of Recordkeepers:* 349,598.

*Estimated Total Annual Responses:* 349,598.

*Estimated Number of Responses per Recordkeeper:* 1.

*Estimated Total Annual Burden on Respondents:* 19,879,947.

*Comments are invited on:* (1) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. Comments may be submitted using the electronic process available at <https://www.regulations.gov>. All comments received will be available for public inspection during regular business hours at the same address.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record.

### Agricultural Marketing Service

[Doc. No. AMS–SC–22–0047]

#### Pecans Grown in Multiple States; Request for Extension and Revision of a Currently Approved Information Collection

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Notice and request for comments.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995, this

notice announces the Agricultural Marketing Service's (AMS) intention to request an extension for and revision to a currently approved information collection for Pecans Grown in the States of Alabama, Arkansas, Arizona, California, Florida, Georgia, Kansas, Louisiana, Missouri, Mississippi, North Carolina, New Mexico, Oklahoma, South Carolina, and Texas, Marketing Order No. 986.

**DATES:** Comments on this notice must be received by January 17, 2023.

**ADDRESSES:** Interested persons are invited to submit written comments concerning this notice. Comments must be sent to the Docket Clerk, Market Development Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW, STOP 0237, Washington, DC 20250-0237; Fax: (202) 720-8938; or internet: <https://www.regulations.gov>. Comments should reference the docket number and the date and page number of this issue of the **Federal Register** and will be available for public inspection in the Office of the Docket Clerk during regular business hours, or can be viewed at: <https://www.regulations.gov>. All comments submitted in response to this notice will be included in the record and will be made available to the public. Please be advised that the identity of the individuals or entities submitting the comments will be made available to the public on the internet at the address provided above.

**FOR FURTHER INFORMATION CONTACT:**

Pushpa Kathir, Market Development Division, Specialty Crop Program, AMS, USDA, 1400 Independence Avenue SW, STOP 0237, Room 1406-S, Washington, DC 20250-0237; Telephone:(202) 720-2491 Fax:(202) 720-8938, or Email: [Pushpa.Kathir@usda.gov](mailto:Pushpa.Kathir@usda.gov).

Small businesses may request information on this notice by contacting Richard Lower, Assistant to the Director, Market Development Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW, STOP 0237, Room 1406-S, Washington, DC, 20250-0237; Telephone (202) 720-2491; Fax: (202) 720-8938; or Email: [Richard.Lower@usda.gov](mailto:Richard.Lower@usda.gov).

**SUPPLEMENTARY INFORMATION:**

*Title:* Pecans Grown in Multiple States, Marketing Order No. 986.  
*OMB Number:* 0581-0291.

*Expiration Date of Approval:* December 31, 2022

*Type of Request:* Extension and revision of a currently approved information collection.

*Abstract:* Marketing order programs provide an opportunity for producers of fresh fruits, vegetables, and specialty

crops, in a specified production area, to work together to solve marketing problems that cannot be solved individually. Marketing order regulations help ensure adequate supplies of high-quality product and adequate returns to producers. Marketing orders are authorized by the Agricultural Marketing Agreement Act of 1937 (Act), as amended (7 U.S.C. 601-674). The Secretary of Agriculture oversees these operations and issues regulations recommended by a committee of representatives from the respective commodity industry.

The purpose of this notice is to solicit public comments on the 14 forms in this OMB package which are described below. Two ballot forms for committee nominations (SC-307 and SC-308), two grower and sheller nomination forms (SC-309 and SC-310) as well as two background and acceptance statements forms for growers and shellers and public members (SC-8 and SC-9) and a grower referendum ballot (SC-313). Two Marketing Agreements (SC-242 and SC-242A) are also included. In addition, this package includes five reporting forms the American Pecan Council uses to track shipments and inventory. The Summary Report/U.S. Pecans Received for Your Account (Form 1); Pecans Purchased Outside of the United States (Form 2); Exports by Country of Destination (Form 3); Annual Agreement of Inter-Handler Transfer (Form 4); and Year-End Inventory Report (Form 5). The number of producers has changed from 2,500 to 4,380 since the last renewal. Now that the marketing order has been in place for a few years, the industry has a better understanding of the actual numbers of producers in the industry.

*Estimate of Burden:* Public reporting burden for this collection of information is estimated to average 0.3 hours per response (rounded).

*Respondents:* Pecan producers, handlers, shellers and public members.

*Estimated Number of Respondents:* 4,512.

*Estimated Total Annual of Responses:* 5,225.

*Estimated Number of Responses per Respondent:* 1.2 (rounded).

*Estimated Total Annual Burden on Respondents:* 1,587 (rounded).

*Comments are invited on:* (1) Whether the proposed collection of the information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used;

(3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

**Erin Morris,**

*Associate Administrator, Agricultural Marketing Service.*

**BILLING CODE 3410-02-P**

## DEPARTMENT OF AGRICULTURE

### Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104-13. Comments are requested regarding; whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by December 19, 2022 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website [www.reginfo.gov/public/do/PRAMain](http://www.reginfo.gov/public/do/PRAMain). Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to

the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

#### Food and Nutrition Service

*Title:* Supplemental Nutrition Assistance Program Employment and Training Program Performance Measurement, Monitoring and Reporting Requirements.

*OMB Control Number:* 0584–0614.

*Summary of Collection:* This is an extension, without change, of a currently approved collection. In accordance with Section 16(h)(5) of the Food and Nutrition Act (FNA), as amended by section 4022 of the Agriculture Act of 2014, and 7 CFR 273.7(c)(17) the Department requires that State agencies report outcome data for the Supplemental Nutrition Employment Program (SNAP) Employment and Training (E&T) programs. In order for FNS to monitor the effectiveness of E&T programs State agencies are required to report outcome data on five separate reporting measures: (1) the number and percentage of E&T participants who retain employment 2 quarters and 4 quarters after completing E&T; (2) the median wages for participants with earnings 2 quarters after completion of E&T; (3) the number and percentage of participants that completed a training, education, work experience or on-the-job training component; (4) certain unique characteristics of SNAP E&T participants; and (5) additional reporting requirements for State agencies that pledge to serve all at-risk Able-bodied Adults without Dependents (ABAWDs). State agencies are also required to identify appropriate reporting measures for each proposed component that serves a threshold number of participants of at least 100 a year. State agencies identify the reporting measures for these components in State agencies' E&T plans and report the outcome data to the Food and Nutrition Service (FNS) through State agencies' annual reports. State agencies are required to report outcome data annually.

*Need and Use of the Information:* With this information, FNS is able to identify more, and less, successful E&T practices and provide technical assistance to State agencies to improve their E&T programs.

*Description of Respondents:* State, Local, or Tribal Governments.

*Number of Respondents:* 53.

*Frequency of Responses:* Reporting; annually.

*Total Burden Hours:* 9,459.

**Ruth Brown,**

#### DEPARTMENT OF AGRICULTURE

##### Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are required regarding: whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by December 19, 2022 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website [www.reginfo.gov/public/do/PRAMain](http://www.reginfo.gov/public/do/PRAMain). Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

##### Farm Service Agency

*Title:* Emergency Relief Program (ERP) Phase 1.

*OMB Control Number:* 0560–0309.

*Summary of Collection:* The Extending Government Funding and Delivering Emergency Assistance Act,

(Division B, Title I, Pub. L. 117–43) provided \$10,000,000,000 for necessary expenses related to losses of crops (including milk, on-farm stored commodities, crops prevented from planting in 2020 and 2021, and harvested adulterated wine grapes), trees, bushes, and vines, as a consequence of droughts, wildfires, hurricanes, floods, derechos, excessive heat, winter storms, freeze, including a polar vortex, smoke exposure, quality losses of crops, and excessive moisture occurring in calendar years 2020 and 2021. USDA has directed FSA to use part of this funding to provide assistance to producers of eligible crop, tree, bush, and vine losses through ERP.

ERP Phase 1 will use a streamlined application process for losses for which data is already on file with FSA and RMA. Producers will certify on the application that the loss was due, in whole or in part, to a qualifying disaster event and indicate that they agree to obtain crop insurance or NAP coverage for the next two available crop years, which is a statutory requirement for payment eligibility.

*Need and Use of the Information:* The information submitted by respondents will be used by FSA to determine eligibility and issue payments to eligible applicants under ERP.

Applicants complete the following forms to apply for ERP payments:

FSA–520, Emergency Relief Program (ERP) Phase 1 Application;

AD–2047, Customer Data Worksheet;

CCC–901, Member Information for Legal Entities;

CCC–902, Farm Operating Plan;

AD–1026 Highly Erodible Land Conservation (HELC) and Wetland Conservation (WC) Certification PRA for any FSA programs but is included in the burden hours for information;

Form CCC–860, Socially Disadvantaged, Limited Resource, Beginning and Veteran Farmer or Rancher Certification; and

Form FSA–510, Request for an Exception to the \$125,000 Payment Limitation for Certain Programs.

Failure to solicit applications will result in failure to provide payments to eligible applicants as intended by the Extending Government Funding and Delivering Emergency Assistance Act.

*Description of Respondents:* Farms.

*Number of Respondents:* 305,000.

*Frequency of Responses:* Reporting; On Occasion.

*Total Burden Hours:* 92,310.

##### Farm Service Agency

*Title:* Commodity Container Assistance Program (CCAP).

*OMB Control Number:* 0560–0310.

**Summary of Collection:** Applicants will receive payments under section 5(e) of the CCC Charter Act (15 U.S.C. 714c(e)) to assist owners of U.S. agricultural products with ongoing market disruptions and facilitate the recovery of shipping and other logistical services required to bring domestically produced agricultural products to their markets.

The CCAP payments continues to be issued after an applicant certifies, as applicable, the number of containers picked up or stored each month or group of months at the designated port. The applicant must certify to the total number of containers picked up or stored by January 31, 2023. If any supporting documentation is requested, the documentation must be submitted to FSA within 30 days from the request.

**Need and Use of the Information:** To determine whether an applicant is eligible for a CAWA payment, an applicant is required to submit:

- FSA-862, Commodity Container Assistance Program Application that includes applicant information, SAM UEL, and number of containers by port, type, and month.
- If requested by FSA, the applicant must provide supporting documentation to verify the accuracy of information provided on the application, including to substantiate the number and type of shipping containers, ownership of the commodities, or authority to act as a designated marketing agent.

If the eligible participants fail to apply, FSA will result in failure to provide payments to eligible applicants as intended.

**Description of Respondents:** Farms.  
**Number of Respondents:** 200.

**Frequency of Responses:** Reporting; On Occasion.

**Total Burden Hours:** 528.

#### **Farm Service Agency**

**Title:** Food Safety Certification for Specialty Crops Program (FSCSC).

**OMB Control Number:** 0560-0311.

**Summary of Collection:** The Farm Service Agency (FSA) is issuing payments under the Coronavirus Aid, Relief, and Economic Stability (CARES) Act of up to \$200 million to assist eligible specialty crop operations with on-farm food safety certification and related expenses. The development, implementation, and maintenance of on-farm food safety programs resulted in unforeseen costs for many specialty crop operations who sought alternate markets for their products during the pandemic, as demand from traditional markets such as restaurants and food service diminished or disappeared.

**Need and Use of the Information:** In order to determine whether a producer is eligible for FSCSC and to calculate a payment, an applicant is required to submit form FSA-888, Food Safety Certification for Specialty Crops Program (FSCSC). Applicants must also have the following forms on file with FSA: AD-2047, Customer Data Worksheet, and SF-3881, ACH Vendor/Miscellaneous Payment Enrollment Form.

The information submitted by respondents are used by FSA to determine eligibility and issue payments to eligible applicants under FSCSC.

Failure to solicit applications will result in failure to provide payments to eligible applicants as intended by the CARES Act.

**Description of Respondents:** Farms.  
**Number of Respondents:** 22,000.

**Frequency of Responses:** Reporting; On Occasion.

**Total Burden Hours:** 25,652.

**Ruth Brown,**

*Departmental Information Collection Clearance Officer.*

[FR Doc. 2022-25143 Filed 11-17-22; 8:45 am]

## **DEPARTMENT OF AGRICULTURE**

### **Submission for OMB Review; Comment Request**

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104-13. Comments are requested regarding whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by December 19, 2022 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the

following website [www.reginfo.gov/public/do/PRAMain](http://www.reginfo.gov/public/do/PRAMain). Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

### **Food Safety and Inspection Service**

**Title:** Electronic Import Inspection.

**OMB Control Number:** 0583-0159.

**Summary of Collection:** The Food Safety and Inspection Service (FSIS) has been delegated the authority to exercise the functions of the Secretary as provided in the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601 et. seq.), the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451, et. seq.), and the Egg Products Inspection Act (EPIA) (21 U.S.C. 1031). These statutes mandate that FSIS protect the public by verifying that meat and poultry products are safe, wholesome, and properly labeled and packaged.

**Need and Use of the Information:** FSIS requires foreign governments to submit additional information when submitting both the foreign establishment certificate and the foreign inspection certificate to FSIS for foreign establishments to be permitted to import product to the United States. The information that is required with the Foreign Establishment Certificate includes: the type of operation(s) conducted at the establishment (e.g., slaughter, processing, storage, exporting warehouse); the establishment's eligibility status (e.g., new or relisted (if previously delisted)); and, slaughter and processing establishment certifications that address the species and type of product(s) produced at the establishment and the process category.

Additional information that is required with the Foreign Inspection Certificate includes: the species used to produce the product and the source country and foreign establishment number; whether the source materials originate from a country other than the exporting country; the product's description, including the process category, the product category, and the product group; the address of the consignor; the address of the consignee; the name and address of the exporter; the name and address of the importer;

and, any additional information the Administrator requests to determine whether the product is eligible to be imported into the U.S.

To conduct the information collections less frequently would inhibit the ability of FSIS to ensure that imported product is safe, wholesome, and not adulterated.

*Description of Respondents:* Business or other for-profit.

*Number of Respondents:* 939.

*Frequency of Responses:* Recordkeeping; Reporting: On occasion; Annually.

*Total Burden Hours:* 49,385.

**Ruth Brown,**

*Departmental Information Collection Clearance Officer.*

## DEPARTMENT OF AGRICULTURE

### Farm Service Agency

[Docket ID FSA-2022-0015]

#### Information Collection Request; Organic Certification Cost Share Program

**AGENCY:** Farm Service Agency, USDA.

**ACTION:** Notice; request for comment.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995, the Farm Service Agency (FSA) is requesting comments from all interested individuals and organizations on an extension of a current information collection request associated with the Organic Certification Cost Share Program (OCCSP). OCCSP provides cost share assistance to producers and handlers of agricultural products who are obtaining or renewing their certification under the National Organic Program (NOP). Certified operations may receive up to 50 percent of their certification costs paid, up to a maximum of \$500 for each of the following scopes: crops, wild crops, livestock, processing/handling, and State organic program fees. Certain State agencies also submit applications to FSA to administer OCCSP in their States.

**DATES:** We will consider comments that we receive by January 17, 2023.

**ADDRESSES:** We invite you to submit comments on the notice. You may submit comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to <http://regulations.gov> and search for docket ID FSA-2022-0015. Follow the

online instructions for submitting comments.

- *Mail:* Farm Service Agency, USDA, Chris Vazquez, 1400 Independence Avenue, Mail Stop 0517, SW, Washington, DC 20250-0517.

Comments will be available for inspection online at <http://www.regulations.gov>. Copies of the information collection may be requested by contacting Chris Vazquez (see **FOR FURTHER INFORMATION CONTACT** below). You may also send comments to the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

#### FOR FURTHER INFORMATION CONTACT:

Chris Vazquez, (202) 690-0013; email: [christopher.vazquez@usda.gov](mailto:christopher.vazquez@usda.gov). Persons with disabilities who require alternative means for communication should contact the USDA Target Center at (202) 720-2600 (voice).

#### SUPPLEMENTARY INFORMATION:

##### Description of Information Collection Request

*Title:* Organic Certification Cost Share Program.

*OMB Number:* 0560-0289.

*Expiration Date of Approval:* 04/30/2023.

*Type of Request:* Extension.

*Abstract:* FSA is requesting comments from all interested individuals and organizations on an extension of a currently approved information collection request associated with OCCSP. Producers and handlers will apply for cost share payments, and State Agencies will establish agreements to get funds and to disburse payments to qualified producers or handlers.

There are no changes to the burden hours since the last OMB approval. For the following estimated total annual burden on respondents, the formula used to calculate the total burden hour is the estimated average time per responses hours multiplied by the estimated total annual responses.

*Estimate of Annual Burden:* Public reporting burden for this collection of information is estimated to average 1.0015 hours per response.

*Type of Respondents:* Individuals, and State.

*Estimated Number of Respondents:* 15,565.

*Estimated Annual Number of Responses per Respondent:* 5.0455.

*Estimated Total Annual of Responses:* 78,533.

*Estimated Average Time per Responses:* 1.0015 hours.

*Estimated Total Annual Burden on Respondents:* 78,650 hours.

We are requesting comments on all aspects of this information collection to help us to:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of FSA, including whether the information will have practical utility;

(2) Evaluate the accuracy of FSA's estimate of burden including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected;

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All responses to this notice, including names and addresses when provided, will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

**William Marlow,**

*Acting Administrator, Farm Service Agency.*

## DEPARTMENT OF AGRICULTURE

### Food Safety and Inspection Service

[Docket No. FSIS-2010-0023]

#### Expansion of FSIS Shiga Toxin-Producing *Escherichia coli* (STEC) Testing to Additional Raw Beef Products

**AGENCY:** Food Safety and Inspection Service, USDA.

**ACTION:** Notice.

**SUMMARY:** The Food Safety and Inspection Service (FSIS) is announcing that on February 1, 2023, the Agency will expand its routine verification testing for six Shiga toxin-producing *Escherichia coli* that are adulterants (non-O157 STEC; O26, O45, O103, O111, O121, or O145), in addition to the adulterant *Escherichia coli* (*E. coli*) O157:H7, to ground beef, bench trim, and other raw ground beef components in addition to raw beef manufacturing trimmings in official establishments. The raw ground beef components to be tested for these six non-O157 STEC, hereafter "other raw ground beef components," are: head meat, cheek meat, weasand (esophagus) meat, product from advanced meat recovery (AMR) systems, partially defatted

chopped beef and partially defatted beef fatty tissue, low temperature rendered lean finely textured beef, and heart meat. Currently, FSIS tests only its beef manufacturing trimmings samples for these six non-O157 STEC and *E. coli* O157:H7. Otherwise, all other raw beef products are tested only for *E. coli* O157:H7 and *Salmonella*. FSIS also will begin testing for these non-O157 STEC in ground beef samples that it collects at retail stores and in applicable samples it collects of imported raw beef products. Additionally, FSIS is responding to comments regarding the STEC testing expansion and the costs and benefits analysis (CBA), as well as its updated STEC laboratory testing criteria for determining whether a result is positive.

**DATES:** Beginning February 1, 2023, FSIS will implement routine verification testing for the six additional STECs discussed in this document (O26, O45, O103, O111, O121, and O145) in raw ground beef, bench trim, and other raw ground beef components. At this time, FSIS also will implement testing for these non-O157 STEC in ground beef samples that it collects at retail stores and in applicable samples it collects of imported raw beef products.

**FOR FURTHER INFORMATION CONTACT:** Rachel Edelstein, Assistant Administrator, Office of Policy and Program Development by telephone at (202) 205-0495.

**SUPPLEMENTARY INFORMATION:**

**Background**

On June 4, 2020, FSIS announced in the **Federal Register** its plans to expand its routine verification testing for six non-O157 STEC (O26, O45, O103, O111, O121, or O145) that are adulterants in applicable raw beef products, in addition to the adulterant *E. coli* O157:H7, to ground beef, bench trim, and other raw ground beef components for samples collected at official establishments (85 FR 34397). FSIS also announced that it would test for these non-O157 STEC in ground beef samples that it collects at retail stores and in applicable samples it collects of imported raw beef products. FSIS stated that it would announce the date for implementation of the new testing in a subsequent **Federal Register** notice. Additionally, FSIS responded to comments on the November 19, 2014, **Federal Register** notice titled, “Shiga Toxin-Producing *Escherichia coli* (STEC) in Certain Raw Beef Products (79 FR 68843).” FSIS also made available its updated CBA on the implementation of its non-O157 STEC testing on raw beef manufacturing trimmings and the costs

and benefits associated with the expansion of its non-O157 STEC testing to ground beef, bench trim, and other raw ground beef components.<sup>1</sup>

**Recent Changes to FSIS’ Laboratory Testing Criteria for Determining Positives**

On April 16, 2021, FSIS announced in the *Constituent Update* changes to the laboratory testing criteria for *E. coli* O157:H7.<sup>2</sup> FSIS explained that it had fully aligned the testing criteria for *E. coli* O157:H7 with that for non-O157 STEC. FSIS also explained that identifying specific bacterial genes associated with human illness is important for detecting STECs in food. Under the updated method, consistent with laboratory testing for non-O157 STEC, an *E. coli* O157:H7 isolate is confirmed positive if it has a *stx* gene, an *eae* gene, and is identified by the laboratory as O157. Further, under the new method, FSIS no longer performs H7 gene testing for certain O157:H7 isolates. Harmonizing STEC laboratory testing creates a more efficient FSIS laboratory workflow where all regulated STECs are treated the same from initial laboratory screening to full isolate characterization. This update did not affect current FSIS laboratory protocols leading to the reporting of potential and presumptive positive results. To implement this change, FSIS updated the Microbiology Laboratory Guidebook (MLG) Chapter 5C, “*Detection, Isolation, and Identification of Top Seven Shiga Toxin-Producing Escherichia coli (STECs) from Meat Products and Carcass and Environmental Sponges*,”<sup>3</sup> and began using the updated STEC method on samples received on or after May 17, 2021.

Aligning the criteria for identifying positives for the top seven STECs of public health interest does not affect FSIS’ public health priorities, will not require establishments, or public health partners, or equivalent countries that ship beef to the United States to change their existing STEC laboratory methods that met the previous two separate STEC definitions, and may facilitate commercial test kit technology development.

**Implementation**

Currently, the only raw beef products FSIS routinely tests for non-O157 STEC

are beef manufacturing trimmings. On February 1, 2023, FSIS plans to implement its expansion of its routine verification testing for the six non-O157 STEC that are adulterants to ground beef, bench trim, and other raw ground beef components for samples collected at official establishments. Once FSIS expands its non-O157 sampling to all raw beef products, for any positive results during routine verification testing, FSIS will conduct follow-up testing. FSIS will analyze all follow-up samples for all seven adulterant STEC and *Salmonella*.

**Responses to Comments**

In response to a request from multiple industry associations for more time to submit comments on the June 4, 2020 **Federal Register** notice, FSIS extended the comment period by an additional 30 days to September 3, 2020.<sup>4</sup> FSIS received 10 comments. Specifically, FSIS received comments from a small establishment owner and an industry organization opposed to the expanded testing; while a food industry group, a consumer group coalition, and a college organization supported the expansion of testing. A foreign country and a laboratory testing representative also commented on the proposal. Two comments were outside the scope of this document.

In response to comments, FSIS added clarification on the new laboratory method, and a new table showing the additional cost of the expansion; but made no fundamental changes to the CBA. The Agency still plans to expand STEC testing to ground beef, bench trim, and other raw ground beef components. A summary of the issues raised by commenters and the Agency’s responses follows.

**Cost and Benefits Analysis**

*Comment:* An industry organization stated that the Agency did not adequately explain how it calculated an annual savings of \$51.6 million from reduced non-O157 STEC outbreak-related recalls. Also, the commenter stated that the Agency did not provide data to support that the proposal will prevent two outbreak-related recalls per year because, according to the commenter, there were only a few non-O157 STEC outbreak-related recalls before 2012 and they are still rare.

The industry organization argued that FSIS’ contention in the CBA that detection can prevent recalls does not include supporting data. According to the commenter, the Agency started

<sup>1</sup> The CBA is available at: [https://www.fsis.usda.gov/sites/default/files/media\\_file/2020-07/FSIS-Non-0157-STEC-Testing-CBA-June-2020.pdf](https://www.fsis.usda.gov/sites/default/files/media_file/2020-07/FSIS-Non-0157-STEC-Testing-CBA-June-2020.pdf).

<sup>2</sup> <https://www.fsis.usda.gov/news-events/news-press-releases/constituent-update-april-16-2021>.

<sup>3</sup> [https://www.fsis.usda.gov/sites/default/files/media\\_file/2021-04/MLG-5C.01.pdf](https://www.fsis.usda.gov/sites/default/files/media_file/2021-04/MLG-5C.01.pdf).

<sup>4</sup> <https://www.fsis.usda.gov/news-events/news-press-releases/constituent-update-june-19-2020>.

testing beef manufacturing trimmings for non-O157 STECs in 2012; therefore, FSIS should compare the number of non-O157 STEC outbreak related recalls before and after implementing this testing program to determine whether the theory has merit.

*Response:* In the 2020 CBA, FSIS explained how it determined that the proposed policy was likely to prevent, on average, two recalls per year at an estimated cost of \$25.6 million per recall. It described the reasoning in detail in section 3.b “Benefits from reduced outbreak-related recalls” and section 4 “Net benefit” (pp. 19–23). FSIS clarified that the estimate was based on Public Health Information System (PHIS) data related to non-O157 STEC contamination and prevalence (*i.e.*, Agency sampling data), not solely on the historical number of non-O157 STEC outbreak-related recalls.

Before 2012, FSIS did not routinely test raw beef products for non-O157 STEC, so it is not possible to make the proposed comparison between the number of recalls associated with beef products contaminated with non-O157 STEC versus recalls caused by *E. coli* O157:H7. The first non-O157 STEC investigation that led to a recall of ground beef product in the U.S. occurred in 2010. Once the Agency began testing for non-O157 STEC in raw beef manufacturing trimmings, the Agency prevented contaminated raw beef products from entering commerce. Beginning February 8, 2013, FSIS began to withhold its determination as to whether meat and poultry products are not adulterated, and thus eligible to enter commerce, until all test results that bear on the determination have been received (77 FR 73401). A substantial number of recalls (93 recalls) of raw beef products adulterated with STEC occurred between August 2012 and December 2020. Of these recalls approximately 20.0 percent (19 recalls) were caused by non-O157 STEC. Six of the 19 recalls were a result of outbreak investigations and seven were from routine FSIS verification testing. The remaining six recalls were results of: establishment-product testing (four), Agricultural Marketing Service (AMS) testing (one), and a notification from U.S. Food and Drug Administration (FDA) about contaminated flour used to produce a USDA regulated product (one).

As is stated above, currently, the only raw beef products FSIS routinely tests for non-O157 STEC are beef manufacturing trimmings. However, of the 19 non-O157 STEC recalls, 15 of them involved raw non-intact and ground beef products containing non-

O157 STEC. Five of the 15 beef products recalled occurred as a result of FSIS routine and follow-up sampling of beef manufacturing trimmings and follow-up sampling verification programs. FSIS may have detected the other ten if FSIS had sampled the product through a routine verification sampling project. Analysis of the Agency’s historical testing data indicates that the number of beef manufacturing trimming samples positive for non-O157 STEC (0.71 percent) exceeded samples positive for *E. coli* O157:H7 (0.23 percent). Therefore, other beef samples subject to FSIS testing for *E. coli* O157:H7 may contain non-O157 STEC. As such, we believe it is reasonable to derive the estimate of prevented outbreak-related recalls from the detected prevalence of the pathogen.

*Comment:* An industry organization commented that the proposed expansion would not contribute to overall lower numbers of positive non-O157 test results. The commenter stated that there have been only two outbreaks of non-O157 STEC attributed to raw beef products since 2006 that resulted in recalls. In the same timeframe, the commenter stated that there have been eight *E. coli* O157:H7 outbreaks. In addition, the commenter stated that from 2006 to present, there have been 129 recalls for O157, compared to 20 for non-O157 STEC. Finally, the commenter stated that the vast majority of recalls for STEC are not associated with illnesses, because the presence of the pathogen is only part of the equation. Virulence, consumer health, handling, and preparation all play a part.

*Response:* The STEC pathogen must be present for an individual to show symptoms of the disease caused by that pathogen. FSIS has previously determined that raw, non-intact beef products or raw, intact beef products that are intended for use in raw, non-intact product, that are contaminated with STEC are adulterated within the meaning of 21 U.S.C. 601(m)(1) (76 FR 58157; Sep. 20, 2011). Virulence, consumer health, handling, and preparation may play a part in causing illness, but the key point is that the pathogen must be present.

Between August 2012 and December 2020 approximately 45 million pounds of contaminated raw beef products were prevented from entering commerce by FSIS because of STEC adulteration. Over this timeframe, FSIS tested a total of 167,073 raw beef samples for *E. coli* O157:H7 and 220 (0.13 percent) of these samples were positive. Analysis of the data tested for O157:H7 and non-O157 STEC by FSIS between August 2012 and December 2020 showed that non-O157

STEC were more frequently recovered from verification beef manufacturing trimming samples.

Specifically, FSIS tested 44,457 samples over the same timeframe as above. See table 1 below for the percent of positive samples for the different STEC.

TABLE 1—PERCENT OF POSITIVE SAMPLES IN VARIOUS SEROGROUPS

| Serogroup      | Percent of positive samples |
|----------------|-----------------------------|
| Non-O157 ..... | .71                         |
| O103 .....     | .42                         |
| O157:H7 .....  | .23                         |
| O26 .....      | .15                         |
| O111 .....     | .11                         |
| O145 .....     | .022                        |
| O45 .....      | .020                        |
| O121 .....     | .016                        |

FSIS raw beef verification testing has been effective in helping to protect the public by detecting *E. coli* O157:H7 and non-O157 STEC adulterants and preventing these products from entering commerce.

As mentioned, in response to a previous comment, between August 2012 and December 2020, there were 19 recalls of FSIS regulated products that were caused by adulteration of product by non-O157 STEC serogroups. These recalls show that non-O157 STEC can be present in products intended for commerce and represents a threat to public health.

According to the CDC, the number of culture-confirmed illnesses caused by non-O157 STEC have increased, and outpaced illnesses caused by O157:H7 STEC.<sup>5</sup> Surveillance data presented by the CDC revealed that the percentage change in incidence of STEC infections in 2019 compared with the annual average incidence from 2016 to 2018 showed that O157:H7 decreased by 20 percent and non-O157 STEC increased by 35 percent.

*Comment:* An industry organization commented that the CBA relies on the outdated 2013 *Pathogen Controls in Beef Operations Survey* to evaluate the potential costs from expanded industry sampling in response to the proposal. According to the commenter, this survey may not accurately represent industry sampling practices, and, therefore, costs to industry may be underestimated due to outdated data. The commenter stated that the Agency should conduct an updated survey, with specific questions related to the proposal, and update the CBA before

<sup>5</sup> Ibid.

finalizing any changes to its STEC sampling program.

**Response:** FSIS does not require industry testing for STEC. Under the Hazard Analysis and Critical Control Point (HACCP) regulations, the establishment is required to identify the intended use of the product (9 CFR 417.2(a)(2)), conduct the hazard analysis (9 CFR 417.2(a)), determine the hazard(s) reasonably likely to occur (9 CFR 417.2(a)(1)), and support the decision(s) made (9 CFR 417.5(a)(1)). Also, all establishments are required to conduct on-going verification activities to ensure that their HACCP plans are effectively implemented (9 CFR 417.4(a)(2)). Establishments are required to conduct ongoing verification activities to ensure that any critical control point (CCP) is adequately addressing STEC, or that purchase specifications continue to prevent the pathogen from entering the facility. FSIS recommends that establishments' verification activities include testing for STEC (67 FR 62325, 62331).

Lastly, the HACCP regulations in 9 CFR part 417 require that establishments validate the HACCP plan's adequacy to control the food safety hazards identified by the hazard analysis (9 CFR 417.4(a)). These regulations prescribe requirements for the initial validation of an establishment's HACCP plan and require that establishments "conduct activities designed to determine that the HACCP plan is functioning as intended." Validation under 9 CFR 417.4(a)(1) requires that establishments assemble two types of data: (1) The scientific or technical support for the judgments made in designing the HACCP system, and (2) evidence derived from the HACCP plan in operation to demonstrate that the establishment is able to implement the critical operational parameters necessary to achieve the results documented in the scientific or technical support. Thus, validation of the HACCP system involves validation of the critical control points in the HACCP plan, as well as of any interventions or processes used to support decisions in the hazard analysis (80 FR 27557).

In 2012, FSIS explained in a **Federal Register** notice (77 FR 31979) how *E. coli* O157:H7 results can be used for non-O157 STEC HACCP decision-making. FSIS considers controls for *E. coli* O157:H7 to be effective against non-O157 STEC when implemented appropriately (85 FR 34397). How each establishment designs and supports their unique HACCP system can vary,

and in-plant testing may or may not be conducted. When employed, testing can be conducted for different reasons, including to establish microbiological independence between lots, fulfill customer purchase specifications for specific products, validate HACCP controls, verify the HACCP system is functioning as intended, or other reasons. The frequency of sampling, products sampled, lot size, sampling method used, and laboratory testing methodology can vary from establishment to establishment based on the purpose sampling serves in each establishment's HACCP system.

In 2013, FSIS conducted a survey of industry practices of STEC controls to evaluate the potential costs to industry of expanding sampling in response to the 2012 change. Since that survey in 2013, the above HACCP requirements have not changed, the Agency's method of verification has not changed, and the Agency's policy regarding the use of *E. coli* O157:H7 as an indicator for STEC has not changed. Though an establishment may conduct STEC testing for a variety of reasons as noted above, FSIS does not have reason to believe the data obtained in the 2013 survey is no longer reliable nor indicative (on the aggregate) of industry practices. Further, innovations in testing methodology have since occurred that can reduce the costs of STEC analysis (see Section of Recent Changes to FSIS' Laboratory Method (85 FR 34397, 34399)). If FSIS assumes establishments do not adopt these cost-saving innovations, the results of the 2013 survey remain valid for cost estimations.

In response to the comments regarding the use of *E. coli* O157:H7 testing results for non-O157 STEC decision-making, under HACCP, establishments may be able to support using a single STEC serogroup (e.g., *E. coli* O157:H7) as an "indicator" of all STEC as one component for demonstrating overall process control over STEC. If this approach is used, the decision-making for how *E. coli* O157:H7 results indicate control over non-O157 STEC is to be included in the hazard analysis and appropriately supported. Testing for *E. coli* O157:H7 as an indicator of STEC control may be acceptable for validation, verification, and process control because often the same controls address all STEC.

However, as explained in the **Federal Register** notice referenced above, both *E. coli* O157:H7 and non-O157 STECs occur in raw beef at low levels and at low prevalence, and positive tests for these pathogens are not likely to be highly correlated. For this reason,

testing for a single STEC serogroup alone cannot serve as an "index" organism for any other STEC, meaning an *E. coli* O157:H7 result alone does not provide direct evidence about the actual presence or absence of any other STEC serogroups in a specific lot. If an establishment produces 2 lots of product from the same source material and if one lot is positive for a non-O157 STEC serogroup, then an *E. coli* O157:H7 negative test in the second lot of product would not be sufficient to show microbiological independence even with additional process control information. Such microbiological independence determination would include consideration of numerous other factors, including commonalities in the source materials used, sanitation practices employed, antimicrobial interventions applied, any process control information, other sample results, and illness reports. *E. coli* O157:H7 testing results alone are not sufficient evidence for microbiological independence following a non-O157 positive.

In addressing corrective actions after a positive STEC result, FSIS personnel are to consider the impact one or more non-O157 STEC positives may have on the adequacy of the HACCP system to control STEC but should not automatically expect establishments to begin non-O157 STEC testing. When a product tests positive for non-O157 STEC, it is important for the establishment to recognize that even though the *E. coli* O157:H7 results and other processing CCP records may indicate process control was maintained, identification of non-O157 STEC contamination in the production process questions whether design or implementation of the establishment's unique food safety system is sufficient to control STEC. In response to one or more non-O157 STEC positives, establishments must ensure any additional testing conducted includes non-O157 as part of the validation, verification, and reassessment requirements of 9 CFR 417.4 and supporting documentation requirements of 9 CFR 417.5(a)(1), until the establishment is able to demonstrate control over STEC in their unique HACCP system, or the HACCP system may be deemed inadequate (9 CFR 417.6). For example, it is particularly important in veal establishments to demonstrate control over STEC because FSIS data and other peer-reviewed research shows a higher incidence of

non-O157 STEC as compared to *E. coli* O157:H7.<sup>6</sup>

*Comment:* An industry organization stated that after FSIS starts testing for non-O157 STEC in additional raw beef products, AMS will likely similarly expand its purchase program requirements as it has done in the past in response to FSIS sampling programs, which could increase industry costs.

*Response:* AMS has a Federal Purchase Program and vendors that choose to participate in that program must comply with AMS's requirements, including any testing requirements. The requirements of AMS's Federal Purchase Program are outside the scope of this **Federal Register** notice about FSIS' non-O157 STEC testing program.

### Response to Positive Test Result

*Comment:* An industry organization commented that the proposal should not affect practices that have proven successful in the industry's continued improvement on STEC control. These practices have predominantly applied to beef manufacturing trimmings but should be accepted for any additional products that FSIS samples and tests when it implements expanded testing.

*Response:* If an establishment uses the same controls for STEC on beef manufacturing trimmings as it does on its other raw beef products, even if the other raw beef products were not slaughtered on-site, it should be able to support the decisions made in the use of such controls. How each establishment designs and supports their HACCP system may vary depending on the establishment and its hazard analysis, HACCP plan and the decisions made to support them.

*Comment:* A consumer group and a college organization commented that they did not support the use of *E. coli* O157:H7 testing results for non-O157 STEC decision-making and encouraged FSIS to amend its instructions to inspection personnel to require establishment non-O157 STEC testing to the same degree as *E. coli* O157:H7 testing. However, an industry organization's comments did support using *E. coli* O157:H7 testing results for non-O157 STEC process control decision-making.

Additionally, an industry organization commented that the Agency and industry must appropriately understand and respond to positive STEC results, regardless of the serovar.

*Response:* FSIS does not require industry testing for STEC. Under the

Hazard Analysis and Critical Control Point (HACCP) regulations, the establishment is required to identify the intended use (9 CFR 417.2(a)(2)), conduct the hazard analysis (9 CFR 417.2(a)), determine the hazard(s) reasonably likely to occur (9 CFR 417.2(a)(1)), and support the decision(s)-made (9 CFR 417.5(a)(1)). To be clear: this notice announces the expansion of non-O157 STEC testing by FSIS when it conducts routine verification testing. It does not impose testing requirements on industry.

As is stated above, FSIS considers controls for *E. coli* O157:H7 to be effective against non-O157 STEC when implemented appropriately (85 FR 34397). As mentioned above, in 2012, FSIS explained in a **Federal Register** notice (77 FR 31979) how *E. coli* O157:H7 results can be used for non-O157 STEC HACCP decision-making.

### International

*Comment:* A foreign government questioned whether FSIS would provide a reasonable interval between the publication of the final **Federal Register** notice and when foreign countries would be required to implement new testing for non-O157 STEC.

*Response:* After FSIS expands its non-O157 STEC verification sampling and testing, FSIS will require foreign countries that ship beef product to the United States to implement equivalent government verification testing for non-O157 STEC in the same products included in FSIS' new expanded verification testing program. FSIS acknowledges that foreign countries will need additional time to implement changes to their testing requirements and to provide applicable supporting documentation. FSIS will continue to use the existing equivalence process<sup>7</sup> to ensure that foreign countries implement a government microbiological sampling and testing program equivalent to FSIS' verification testing program for raw beef products within a reasonable time period. In addition, FSIS will begin testing imported ground beef, bench trim, and other raw ground beef components for non-O157 STEC at the same time as FSIS implements its domestic non-O157 STEC testing program (*i.e.*, on this notice's effective date).

### Test Only for Other Raw Ground Beef Components at Slaughter

*Comment:* Two industry organizations commented that FSIS should only expand testing to other raw ground beef

components produced in slaughter establishments because STEC are introduced, and therefore most effectively controlled, at slaughter. Also, conducting the testing at slaughter establishments allows establishments to identify positive product before it enters commerce. The commenters argued that testing other raw ground beef components for non-O157 STEC at slaughter would prevent recalls and allow establishments to address the underlying cause at the source.

The commenters also stated that sampling and testing at further processing establishments makes it more difficult to identify the cause of the positive result and may increase the amount of product implicated in a recall. Also, according to the commenters, sampling ground beef does not provide feedback to either the processing establishments or slaughter establishments on process control. The commenters stated that the Agency should not include ground beef in the Agency's expanded non-O157 STEC testing.

Also, one commenter disagreed with the Agency's argument that by sampling bench trim, the Agency is verifying the product is not adulterated before it is ground. The commenter argued that instead of sampling for non-O157 STEC, FSIS should consider verification tasks at grinding establishments to ensure they maintain effective programs, such as purchase specifications or validated antimicrobial interventions.

*Response:* FSIS agrees that slaughter establishments are in the best position to prevent non-O157 STEC contamination because the introduction of the contaminant to the exterior surface of beef products can occur during the slaughter and dressing operation. However, processing establishments that receive product for grinding also have an important role in addressing non-O157 STEC. As explained above, the HACCP regulations require establishments to conduct a hazard analysis to determine the food safety hazards that are reasonably likely to occur in their processes and to identify the preventive measures they can apply to control those hazards in the production of particular products (see 9 CFR 417.2(a)). Consistent with the HACCP regulations, processing establishments can control or reduce non-O157 STEC to below detectable levels by using preventive measures, including validated antimicrobial interventions. Processing establishments can also establish as a preventive measure a purchase specification that requires suppliers to provide source materials with no detectable STEC.

<sup>6</sup> <https://ask.usda.gov/s/article/When-an-establishment-only-conducts-product-testing-for-E-coli-what-factors-does-the-establishment-consider>.

<sup>7</sup> <https://www.fsis.usda.gov/inspection/import-export/equivalence>.

Processing establishments can then verify that these control measures are working as intended through their own product testing (*see* 67 FR 62325).

As stated earlier in the document, currently, the only raw beef products routinely tested for non-O157 STEC by the Agency are beef manufacturing trimmings, and beef manufacturing trimmings are produced at the slaughter establishment. However, of the 19 non-O157 STEC recalls, 15 of them were a result of raw non-intact and ground beef products containing non-O157 STEC. These 15 recalls support that expansion of routine non-O157 testing to other raw beef products, such as ground beef and other raw ground beef components, is necessary so that adulterated products do not reach the consumer.

### Testing Based on Production Volume

*Comment:* An industry organization commented that FSIS should conduct sampling and testing for non-O157 STEC in applicable product in all establishments, regardless of production volume, for at least one year, and then FSIS should evaluate the data to determine whether continued sampling is warranted. This approach would allow additional components to be tested for non-O157 STECs at all establishment sizes for all products used as components for ground beef.

*Response:* Currently, per FSIS Directive 10,010.1, all establishments that produce raw beef products are subject to FSIS sampling and testing for STEC and *Salmonella*, regardless of establishment size. Consistent with the sampling frequency set in the directive, FSIS will sample each establishment that produces raw ground beef products at least three times per year. FSIS also samples establishments that produce bench trim, other raw ground beef components, or beef manufacturing trimmings at least once per year for each product. FSIS will continue to assess results and make necessary changes to its sampling and testing program. However, FSIS anticipates that it will continue this sampling and testing on an ongoing basis beyond one year of sampling and testing.

### Testing Methods

*Comment:* One individual commented that STEC testing is much more sensitive than *E. coli* O157:H7 testing. The commenter stated that the STEC test is a presence or absence test that will show positive results with just a couple of cells. The commenter also stated that test results showing low numbers for Aerobic Plate Count (APC) and generic *E. coli* would also test positive for STEC.

*Response:* As discussed earlier in the document, FSIS updated its laboratory method in 2019 to use a single, combined workflow to screen samples for the presence of *E. coli* O157:H7 and the six non-O157 STEC that FSIS considers adulterants (O26, O45, O103, O111, O121, or O145). The technology used for screening samples allows all seven STEC serogroups to be screened identically. FSIS utilizes the following performance criteria and definitions when evaluating the suitability of an alternative laboratory method for a given analyte and sampling matrix pair:<sup>8</sup>

- Sensitivity of 90 percent or greater,
  - Specificity of 90 percent or greater,
  - Accuracy of 90 percent or greater,
  - Positive Predictive Value of 90 percent or greater, and
  - Negative Predictive Value of 90 percent or greater.
- FSIS' internal verification work during the selection of new technologies in 2018 found a sensitivity of 92 percent in STEC samples inoculated with approximately 1 CFU in a 325g sample for that technology.<sup>9</sup> The manufacturer determined the average limit of detection (LOD<sub>50</sub>) of the iQ-Check STEC V1rX and SerO II method was 0.7 (range: 0.4–1.2) CFU/sample for O157 and other adulterant STEC.<sup>10</sup> There is no difference in sensitivity for *E. coli* O157 and other non-O157 adulterant STEC serogroups. Additional information for using this method may be found in Chapter 5C of the MLG and associated appendices.<sup>11</sup>

### Testing Results

*Comment:* An industry organization commented that follow-up sampling conducted by the Agency in response to an *E. coli* O157:H7 positive in products only subject to *E. coli* O157:H7 testing should continue to be tested for all STEC, but the results should not be included in baseline and routine verification data (prevalence). According to the commenter, the Agency also incorrectly included follow-up sampling as part of the aggregated prevalence data in the proposed expansion of products tested for STEC. The commenter noted that FSIS previously reported follow-up sampling independently from routine sampling data and, according to the

commenter, should consistently do so moving forward. According to the commenter, follow-up samples should never be included in overall prevalence calculations of O157 or non-O157 STEC. According to the commenter, follow-up sampling is conducted in response to a positive sampling result, which may indicate issues with process control at that establishment and can therefore skew the data.

*Response:* FSIS collects follow-up samples as a result of a positive from a routine verification sample. The purpose of scheduling these follow-up samples is to determine whether the establishment effectively addresses STEC. As mentioned above, once FSIS expands its non-O157 sampling to all raw beef products, FSIS will analyze all follow-up samples for all 7 adulterant STEC and *Salmonella*. FSIS posts the follow-up sampling results separately on its website.

When calculating prevalence, FSIS does not use follow-up sampling in its prevalence calculations. Also, FSIS does not typically use follow-up samples in its baseline studies.

### Reallocating Resources

*Comment:* Two organizations commented that the Agency should explain its reasoning for changing its allocation of resources for sampling STECs. According to the commenters, the Agency intends to sample once per week in higher volume establishments, a slight increase from four samples per month, by reallocating resources from lower-volume establishments. The commenters argued that the slight increase will likely not cause significant issues in high volume establishments, but there is not enough information about the reallocation to understand the potential impact of decreased sampling at lower volume establishments. The commenters argued that the shift in sampling may represent a significant reduction or elimination of sampling in lower volume establishments. According to the commenters, the data should be analyzed by volume to determine whether a decrease in sampling frequency at lower volume establishments will inhibit the Agency from identifying establishments that may have issues with STEC control.

A college organization noted that diverting current testing resources from lower-volume establishments will result in extending the time required for determining establishment performance, potentially increasing the risk of contaminated products entering the marketplace. According to the commenter, until FSIS has demonstrated that reallocating samples

<sup>8</sup> MLG 1.01- [https://www.fsis.usda.gov/sites/default/files/media\\_file/2021-03/MLG-1.01\\_0.pdf](https://www.fsis.usda.gov/sites/default/files/media_file/2021-03/MLG-1.01_0.pdf).

<sup>9</sup> [https://www.fsis.usda.gov/sites/default/files/media\\_file/2021-09/Molecular-Screen-Evaluation-2018-White-Paper.pdf](https://www.fsis.usda.gov/sites/default/files/media_file/2021-09/Molecular-Screen-Evaluation-2018-White-Paper.pdf).

<sup>10</sup> [https://www.bio-rad.com/sites/default/files/2021-08/Bulletin\\_3213.pdf](https://www.bio-rad.com/sites/default/files/2021-08/Bulletin_3213.pdf).

<sup>11</sup> [https://www.fsis.usda.gov/sites/default/files/media\\_file/2021-04/MLG-5C.01.pdf](https://www.fsis.usda.gov/sites/default/files/media_file/2021-04/MLG-5C.01.pdf).

among beef processors will not negatively impact public health, the Agency should focus on requesting additional resources from Congress for sampling and laboratory testing. The commenter encouraged FSIS to consider how microbial distribution within a product and/or false-positive test results may affect Agency verification results.

**Response:** FSIS may address allocating resources for sampling in a future **Federal Register** document, but FSIS believes the Agency has sufficient resources to conduct sampling and testing for STEC, ensuring that the nation's commercial supply of raw beef products, whether domestic or imported, is safe, wholesome and unadulterated.

After implementation, the Agency may adjust the numbers of samples collected and tested +/- by approximately 10 percent. FSIS has a set minimum sampling frequency for each establishment. FSIS will sample each establishment that produces raw ground beef products at least three times per year. FSIS also samples establishments that produce bench trim, other raw ground beef components, or beef manufacturing trimmings at least once per year for each product.

### Sampling Methodology

**Comment:** An industry organization noted that FSIS is evaluating alternatives to its sampling procedures (e.g., assessing sampling using a surface swabbing with a cloth vs. N60 incision sampling). According to the commenter, methodology often has a significant impact on baseline results, which are used to inform the public health decisions of local, state, and federal bodies and other private entities, and support Agency decisions. The commenter argued that the Agency should conduct a short-term, targeted baseline sampling program after a change in methodology and make the new information public with explanations. According to the commenter, this approach will help provide context to preclude public uncertainty if prevalence seemingly increases because the new methodology increases sensitivity and detectability.

Additionally, the same commenter argued that potential changes to sampling methodology for pathogen sampling should be available for public comment. According to the commenter, the industry and other interested parties need time to consider impacts of the new methodology and provide information to the Agency to inform its decision-making. Also, an industry association and an individual commented that FSIS should continue

to explore rapid and accurate methods to test for all pathogens of concern. One commenter encouraged FSIS to continue to work with industry and academia to develop rapid tests using the latest technology available to identify STEC and other pathogens in FSIS regulated products.

**Response:** FSIS continues to update its laboratory criteria and posts changes to its laboratory method in the MLG Chapter 5C titled "*Detection, Isolation, and Identification of Top Seven Shiga Toxin-Producing Escherichia coli (STECs) from Meat Products and Carcass and Environmental.*" FSIS also usually announces these changes in the *Constituent Update*.

FSIS recognizes the importance of keeping abreast of the latest scientific endeavors as well as its role in promoting research in areas important to the FSIS mission. FSIS food safety research priorities<sup>12</sup> are presented as suggestions for researchers interested in pursuing food safety objectives that are relevant to FSIS regulated products. This list of research areas of interest may be useful to researchers who are preparing grants for submission to agencies that fund food safety research (e.g., USDA National Institute of Food and Agriculture (<https://www.nifa.usda.gov>), National Institutes of Health (<https://www.nih.gov/>), Grants.gov (<https://www.grants.gov>), or researchers with resources to conduct such research. In 2021 FSIS added a study titled, "Develop a method to detect Shiga toxin-producing *Escherichia coli* (STEC) based on virulence factors," to the Food Safety Research Priority list.

As mentioned in its June 4, 2020 **Federal Register** notice (85 FR 34397), FSIS is conducting an in-field surface sampling study to determine the feasibility of a non-destructive surface sample collection method to collect raw beef manufacturing trimmings verification samples. FSIS will announce any changes to the sample collection method for the beef manufacturing trimmings project in a future **Federal Register** notice.

### Data for Agency Policy

**Comment:** An industry organization commented that FSIS should use relevant scientific data for Agency policy. Specifically, the aggregated data by calendar year publicly available on FSIS' website incorrectly includes sample results from multiple slaughter classes of cattle, different sampling categories, and is not appropriately

stratified. In the aggregated data, the commenter stated that the Agency does not separate samples attributed to different slaughter classes of cattle, such as veal. The commenter stated that different slaughter classes of cattle have varying risks of O157 and non-O157 STEC contamination, and FSIS should evaluate the risk of these different slaughter classes separately.

**Response:** In the discussion regarding aggregated data, FSIS stated the sampling results from FSIS verification testing programs includes data from veal establishments and follow-up sampling results.<sup>13</sup> Using aggregated sampling results is appropriate because FSIS is not proposing any changes to sampling allocations by slaughter class as part of the lab testing change. Therefore, the portion of samples collected from each slaughter class and the overall aggregate sampling is expected to remain consistent. The information showed that FSIS was finding non-O157 positive results in its verification sampling programs across all slaughter classes.

### USDA's Non-Discrimination Statement

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, USDA, its Mission Areas, agencies, staff offices, employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Program information may be made available in languages other than English. Persons with disabilities who require alternative means of communication to obtain program information (e.g., Braille, large print, audiotape, American Sign Language) should contact the responsible Mission Area, agency, or staff office; the USDA TARGET Center at (202) 720-2600 (voice and TTY); or the Federal Relay Service at (800) 877-8339.

To file a program discrimination complaint, a complainant should complete a Form AD-3027, *USDA*

<sup>12</sup> <https://www.fsis.usda.gov/science-data/research-priorities>.

<sup>13</sup> <https://www.fsis.usda.gov/science-data/data-sets-visualizations/microbiology/microbiological-testing-program-escherichia-coli>.

*Program Discrimination Complaint Form*, which can be obtained online at <https://www.ocio.usda.gov/document/ad-3027>, from any USDA office, by calling (866) 632-9992, or by writing a letter addressed to USDA. The letter must contain the complainant's name, address, telephone number, and a written description of the alleged discriminatory action in sufficient detail to inform the Assistant Secretary for Civil Rights (ASCR) about the nature and date of an alleged civil rights violation. The completed AD-3027 form or letter must be submitted to USDA by:

(1) *Mail*: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250-9410; or

(2) *Fax*: (833) 256-1665 or (202) 690-7442; or

(3) *Email*: [program.intake@usda.gov](mailto:program.intake@usda.gov).

USDA is an equal opportunity provider, employer, and lender.

#### Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, FSIS will announce this **Federal Register** publication on-line through the FSIS web page located at: <https://www.fsis.usda.gov/federal-register>.

FSIS will also announce and provide a link to it through the *FSIS Constituent Update*, which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, and other types of information that could affect or would be of interest to our constituents and stakeholders. The *Constituent Update* is available on the FSIS web page. Through the web page, FSIS is able to provide information to a much broader, more diverse audience. In addition, FSIS offers an email subscription service which provides automatic and customized access to selected food safety news and information. This service is available at: <https://www.fsis.usda.gov/subscribe>. Options range from recalls to export information, regulations, directives, and notices. Customers can add or delete subscriptions themselves and have the option to password protect their accounts.

Done at Washington, DC.

## DEPARTMENT OF AGRICULTURE

### Forest Service

#### The Northwest Forest Plan Area Advisory Committee

**AGENCY:** Forest Service, Agriculture (USDA).

**ACTION:** Notice of intent to establish an advisory committee and call for nominations.

**SUMMARY:** The Forest Service intends to establish the Northwest Forest Plan Area Advisory Committee (the Committee), subject to the Secretary of Agriculture's approval. In accordance with provisions of the Federal Advisory Committee Act (FACA), the Committee is being established to provide advice and recommendations on landscape management approaches that promote sustainability, climate change adaptations, and wildfire resilience while providing for increasing use of and demands from National Forest System lands in the Northwest Forest Plan area. The Committee is necessary and in the public interest. Therefore, the Secretary of Agriculture is also seeking nominations for individuals to be considered as committee members. **DATES:** Written nominations must be submitted electronically or post-marked by January 17, 2023. Nominations must contain a completed application packet that includes the cover letter, resume, references, and completed form AD-755 (Advisory Committee Membership Background Information). The form AD-755 may be obtained from the Forest Service contact person or from the following website: <https://www.usda.gov/sites/default/files/documents/ad-755.pdf>. The package must be sent to either the email address or mailing address listed in the ADRESSESS. Electronic submission is preferred.

**ADDRESSES:** Please submit nominations and applications to Glenn Casamassa, Regional Forester, Pacific Northwest Region at [sm.fs.NWFP\\_FACA@usda.gov](mailto:sm.fs.NWFP_FACA@usda.gov) and include the phrase 'FACA Nomination' in the subject line. If sending by express mail, overnight courier service, or the U.S. Postal Service, use the following address: Regional Forester Glenn Casamassa, c/o NWFP FACA Team, 1220 SW 3rd Avenue, Portland, OR 97204.

**FOR FURTHER INFORMATION CONTACT:** Mark Brown, U.S. Department of Agriculture, Forest Service at 971-712-4369; Nick Goldstein, Forest Service at 503-347-1765; or email the NWFP FACA team at [sm.fs.NWFP\\_FACA@usda.gov](mailto:sm.fs.NWFP_FACA@usda.gov). Individuals who use

telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 800 877-8339, 24 hours a day, every day of the year, including holidays.

**SUPPLEMENTARY INFORMATION:** In accordance with the provisions of the Federal Advisory Committee Act (FACA), as amended (5 U.S.C. app. 2), with the concurrence of the General Services Administration (GSA), and subject to the approval of the Secretary of Agriculture, the Forest service intends to establish the Federal Advisory Committee for sustainable, climate-adapted, wildfire-resilient landscapes across the Northwest Forest Plan Area. The Committee will be a discretionary advisory committee and will operate under the provisions of the FACA and report to the Secretary of Agriculture through the Chief of the Forest Service.

The purpose of the Committee is to provide advice and recommendations on landscape management approaches that promote sustainability, climate change adaptations, and wildfire resilience while providing for increasing use of and demands from National Forest System lands in the Northwest Forest Plan area. Accordingly, the Committee will be asked to perform the following duties or fulfill other requests made by the Secretary of Agriculture or the Chief of the Forest Service by offering recommendations on:

1. Planning options that complement the national Wildfire Crisis Strategy to assist the U.S. Forest Service transition to greater proactive wildfire risk reduction and related vegetation management.

2. Approaches to address the dynamic nature of ecosystems, utilize adaptive management, monitoring, and integration of future uncertainty into land management planning.

3. Application of the best available science regarding the following primary issues: (a) the ecological importance of mature and old growth forests; (b) climate change, fire, and associated disturbance processes; (c) terrestrial and aquatic reserved land use allocations and the relationship between the two; (d) the climatic diversity of forests encompassed by the NWFP area; and, (e) habitat connectivity at multiple scales in light of changed conditions.

4. Incorporation of traditional ecological knowledge and indigenous perspectives and values into federal forest planning and management.

5. Communication tools and strategies to: (a) help provide greater understanding of landscape or programmatic level planning options

and requirements and (b) enhance outreach efforts, public engagement, meaningful Tribal consultation and participation, targeted outreach to underserved communities, and stakeholder collaboration within the scope of the Committee.

6. Issue preliminary discrete recommendations in sequence with Forest Service NWFP planning timelines.

The Committee is expected to need two years to carry out its objectives. All deliverables will be submitted to the Designated Federal Official (DFO) according to planning schedule needs. The Committee will meet approximately 4 to 6 times annually or as often as necessary and at such times as designated by the DFO. Subcommittees may meet more frequently. Attendance may be in-person, by telephone, or by other electronic means. Meetings of the Committee whether in person, by telephone or electronic means shall be announced 15 calendar days in advance in the **Federal Register** as required by the FACA.

The Committee will hold open meetings unless the Secretary determines that a meeting or a portion of a meeting should be closed to the public in accordance with subsection C of section 522(b) of title 5, United States Code. All proceedings and relevant documents will be posted and made accessible to the public. No individual who is currently registered as a federal lobbyist is eligible to serve as a member of the Committee.

### Overview and Memberships

The committee will be comprised of 20 members approved by the Secretary of Agriculture with each member serving a two-year term. The Committee membership will be balanced in terms of the points of view represented and functions to be performed. Members of the Committee will serve without compensation but may be reimbursed for travel expenses while performing duties on behalf of the Committee, subject to approval by the DFO and the Department. The Committee should represent to the extent possible, a balance across the three states covered by the NWFP (Oregon, Washington, California) and reflect the demographic diversity of the NWFP area. The Committee shall include representation from experts in the following interest areas:

(1) Science: Up to 9 members who represent the scientific community, and have an understanding in the following disciplines and how they relate to the NWFP area:

(a) Forest ecology

(b) Vegetation management  
(c) Fire ecology  
(d) Terrestrial wildlife ecology  
(e) Aquatic and riparian ecosystems and species

(f) Climate change

(e) Social science

(g) Adaptive management and planning

(h) Indigenous traditional ecological knowledge (ITEK) practitioners.

(2) Organizations: Up to 7 members who represent a broad array of organizations with an interest in NWFP forests:

(a) National, regional, or local conservation organizations with staff and active programs in the Pacific Northwest

(b) Forest products industry

(c) Recreation organization

(d) Organization involved in outreach with underserved communities

(e) Forest collaborative groups

(f) Wildlife organization

(g) Watershed organization.

(3) Government and public: Up to 4 members who represent governmental entities or the public at-large:

(a) Member of the affected public at large

(b) Represent state governments

(c) Represent counties

(d) Represent American Indian Tribes.

### Nomination and Application Information

The appointment of members to the Committee will be made by the Secretary of Agriculture. Any individual or organization may nominate one or more qualified persons to serve on the Federal Advisory Committee for sustainable, climate-adapted, wildfire-resilient landscapes across the Northwest Forest Plan Area. Individuals may also nominate themselves. To be considered for membership, nominees must submit a:

1. Cover letter identifying what interest area group(s) listed above the nominee would represent, how they are qualified to represent that interest group, and why they want to serve on the Committee.

2. Three references that may be contacted about the nominee's application.

3. A resume describing in detail the nominee's qualifications for membership to the Committee.

4. A completed form AD-755, Advisory Committee Membership Background Information. The form AD-755 may be obtained from the Forest Service contact person or from the following website: <https://www.usda.gov/sites/default/files/documents/ad-755.pdf>.

5. Letters of recommendation are welcome. All nominations will be vetted by the Agency and the Secretary of Agriculture will appoint committee members from the list of qualified applicants. Members serve at the pleasure of the Secretary.

Submit nominations and applications to the addressee listed in this notice.

USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Equal opportunity practices in accordance with USDA policies shall be followed in all membership appointments to the Committee. To ensure that the recommendations of the Committee have taken into account the needs of the diverse groups served by USDA, membership shall, to the extent practicable, include individuals with demonstrated ability to represent all racial and ethnic groups, gender diversity, and persons with disabilities.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English. USDA is an equal opportunity provider, employer, and lender.

Dated: November 15, 2022.

## COMMISSION ON CIVIL RIGHTS

### Sunshine Act Meeting Notice

**AGENCY:** United States Commission on Civil Rights.

**ACTION:** Notice of Commission public business meeting.

**DATES:** Friday, November 18, 2022, 10 a.m. EST.

**ADDRESSES:** Meeting to take place telephonically and is open to the public via the Commission's YouTube page at: [www.youtube.com/usccr](http://www.youtube.com/usccr).

**FOR FURTHER INFORMATION CONTACT:** Angelia Rorison: 202-376-8371; [publicaffairs@usccr.gov](mailto:publicaffairs@usccr.gov).

**SUPPLEMENTARY INFORMATION:** In accordance with the Government in Sunshine Act (5 U.S.C. 552b), the Commission on Civil Rights is holding a meeting to discuss the Commission's business for the month. This business meeting is open to the public. Computer assisted real-time transcription (CART) will be provided. The web link to access CART (in English) on Friday, November 18, 2022, is <https://www.streamtext.net/player?event=USCCR>. Please note that CART is text-only translation that occurs in real time during the meeting and is not an exact transcript.

### Meeting Agenda

- I. Approval of Agenda
- II. Business Meeting
  - A. Presentations by State Advisory Committee Chairs on Released Reports and Memorandums
  - B. Discussion and Vote on Advisory Committee Appointments
  - C. Discussion and Vote on Advisory Committee (SAC) Report
  - D. Discussion and Vote on FY 2023 Crime Victims Report Timeline and Discovery Materials
  - E. Management and Operations
    - Staff Director's Report

### Adjourn Meeting

Dated: November 16, 2022.

## DEPARTMENT OF COMMERCE

### Foreign-Trade Zones Board

[B-50-2022]

#### Foreign-Trade Zone (FTZ) 196—Fort Worth, Texas; Notification of Proposed Production Activity; Prairie Industries Holdings, Inc. DBA Truvant (Construction Toy Sets); Haslet, Texas

Prairie Industries Holdings, Inc. DBA Truvant submitted a notification of proposed production activity to the FTZ Board (the Board) for its facility in Haslet, Texas within FTZ 196. The notification conforming to the requirements of the Board's regulations (15 CFR 400.22) was received on November 10, 2022.

Pursuant to 15 CFR 400.14(b), FTZ production activity would be limited to the specific foreign-status material(s)/ component(s) and specific finished product(s) described in the submitted notification (summarized below) and subsequently authorized by the Board. The benefits that may stem from conducting production activity under FTZ procedures are explained in the background section of the Board's website—accessible via [www.trade.gov/ftz](http://www.trade.gov/ftz).

The proposed finished products are LEGO® construction toy sets (duty rate is duty-free).

The proposed foreign-status materials and components include: packaging components (decorative plastic ribbons; laminated packaging sheeting; paper liners; tissue wrapping paper; corrugated and non-corrugated folding cartons; rigid paperboard boxes; printed labels; molded paper pulp containers; paper pulp trays; printed gift cards); toy set components (auto-adhesive stickers; electric motors; alkaline batteries; radio remote controls; motion sensor switches); packaging insert components (building instructions; advertising material catalogs); and, plastic, molded, interlocking bricks of various colors (duty rate ranges from duty-free to 6.7%). The request indicates that certain materials/components are subject to duties under Section 301 of the Trade Act of 1974 (Section 301), depending on the country of origin. The applicable Section 301 decisions require subject merchandise to be admitted to FTZs in privileged foreign status (19 CFR 146.41).

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary and sent to: [ftz@trade.gov](mailto:ftz@trade.gov). The closing period for their receipt is December 28, 2022.

A copy of the notification will be available for public inspection in the "Online FTZ Information System" section of the Board's website.

For further information, contact Juanita Chen at [juanita.chen@trade.gov](mailto:juanita.chen@trade.gov).

Dated: November 14, 2022.

**Andrew McGilvray,**  
*Executive Secretary.*

**BILLING CODE 3510-DS-P**

## DEPARTMENT OF COMMERCE

### Bureau of Industry and Security

#### Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Voluntary Self-Disclosure of Violations of the EAR

**AGENCY:** Bureau of Industry and Security, Commerce.

**ACTION:** Notice of information collection, request for comment.

**SUMMARY:** The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

**DATES:** To ensure consideration, comments regarding this proposed information collection must be received on or before January 17, 2023.

**ADDRESSES:** Interested persons are invited to submit comments by email to Mark Grace, IC Liaison, Bureau of Industry and Security, at [mark.grace@bis.doc.gov](mailto:mark.grace@bis.doc.gov) or to [PRAComments@doc.gov](mailto:PRAComments@doc.gov). Please reference OMB Control Number 0694-0058 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

**FOR FURTHER INFORMATION CONTACT:** Requests for additional information or specific questions related to collection activities should be directed to Mark Grace, IC Liaison, Bureau of Industry and Security, phone 202-482-8093 or by email at [mark.grace@bis.doc.gov](mailto:mark.grace@bis.doc.gov).

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

This collection of information is needed to detect violations of the Export Administration Act and Regulations and determine if an investigation or prosecution is necessary and to reach a settlement with violators. Voluntary self-disclosure of EAR violations strengthens BIS's enforcement efforts by allowing BIS to conduct investigations of the disclosed incidents faster than would be the case if BIS had to detect the violations without such disclosures. BIS evaluates the seriousness of the violation and either (1) Informs the person making the disclosure that no

action is warranted; (2) issues a warning letter; (3) issues a proposed charging letter and attempts to settle the matter; (4) issues a charging letter if settlement is not reached; and/or (5) refers the matter to the U.S. Department of Justice for criminal prosecution.

## II. Method of Collection

Electronic.

## III. Data

OMB Control Number: 0694-0058.

Form Number(s): None.

Type of Review: Regular submission, extension of a current information collection.

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 488.

Estimated Time per Response: 10 hours.

Estimated Total Annual Burden Hours: 4,880.

Estimated Total Annual Cost to Public: 0.

Respondent's Obligation: Voluntary.

Legal Authority: EAR Sections 764.5, and 764.7.

## IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we

cannot guarantee that we will be able to do so.

**Sheleen Dumas,**

*Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.*

BILLING CODE 3510-33-P

## DEPARTMENT OF COMMERCE

### International Trade Administration

[A-523-813]

#### **Polyethylene Terephthalate Sheet From the Sultanate of Oman: Notice of Initiation of Changed Circumstances Review and Consideration of Revocation of the Antidumping Duty Order**

**AGENCY:** Enforcement and Compliance, International Trade Administration, Department of Commerce.

**SUMMARY:** Based on a request from Advanced Extrusion, Inc., Good Natured Products, IL dba Ex-Tech Inc., and Multi-Plastics Extrusions, Inc. (collectively, the petitioners), the U.S. Department of Commerce (Commerce) is initiating a changed circumstances review (CCR) to consider the possible revocation of the antidumping duty (AD) order on polyethylene terephthalate (PET) sheet from the Sultanate of Oman (Oman).

**DATES:** Applicable November 18, 2022.

**FOR FURTHER INFORMATION CONTACT:** Brittany Bauer, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-3860.

#### **SUPPLEMENTARY INFORMATION:**

##### **Background**

On September 10, 2020, Commerce published an AD order on PET sheet from Oman.<sup>1</sup> On October 26, 2022, the petitioners (*i.e.*, domestic producers of subject merchandise) requested, through a CCR, the revocation of the *Order* pursuant to section 751(b)(1)(A) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.222(g)(1).<sup>2</sup>

##### **Scope of the Order**

The merchandise covered by the *Order* is raw, pretreated, or primed

polyethylene terephthalate sheet, whether extruded or coextruded, in nominal thicknesses of equal to or greater than 7 mil (0.007 inches or 177.8  $\mu$ m) and not exceeding 45 mil (0.045 inches or 1143  $\mu$ m) (PET sheet). The scope includes all PET sheet whether made from prime (virgin) inputs or recycled inputs, as well as any blends thereof. The scope includes all PET sheet meeting the above specifications regardless of width, color, surface treatment, coating, lamination, or other surface finish.

The merchandise subject to the *Order* is properly classified under statistical reporting subheading 3920.62.0090 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheading is provided for convenience and customs purposes, the written description of the scope is dispositive.

##### **Initiation of CCR and Consideration of Revocation of the Order**

Pursuant to section 751(b) of the Act, Commerce will conduct a CCR upon receipt of a request from an interested party<sup>3</sup> that shows changed circumstances sufficient to warrant a review of the order. In accordance with 19 CFR 351.216(d), Commerce determines that the information submitted by the petitioners, *i.e.*, their statement of no interest in the continued maintenance of the *Order*, constitutes a sufficient basis to conduct a CCR of the *Order*.

Section 782(h)(2) of the Act and 19 CFR 351.222(g)(1)(i) provide that Commerce may revoke an order (in whole or in part) if it determines that producers accounting for substantially all of the production of the domestic like product have expressed a lack of interest in the order, in whole or in part. In its administrative practice, Commerce has interpreted “substantially all” to mean producers accounting for at least 85 percent of the total U.S. production of the domestic like product covered by the order.<sup>4</sup>

The petitioners stated that they were the sole petitioners in the original investigation, but that they did not

<sup>3</sup> The petitioners reported, in their request for a CCR, that they are U.S.-based producers of PET sheet. As such, the petitioners are an interested party within the meaning of section 771(9)(C) of the Act and 19 CFR 351.102(b)(29)(v).

<sup>4</sup> See, e.g., *Certain Cased Pencils from the People's Republic of China: Initiation and Preliminary Results of Antidumping Duty Changed Circumstances Review, and Intent to Revoke Order in Part*, 77 FR 42276 (July 18, 2012), unchanged in *Certain Cased Pencils from the People's Republic of China: Final Results of Antidumping Duty Changed Circumstances Review, and Determination to Revoke Order, in Part*, 77 FR 53176 (August 31, 2012).

<sup>1</sup> See *Polyethylene Terephthalate Sheet from the Republic of Korea and the Sultanate of Oman: Antidumping Duty Orders*, 85 FR 55824 (September 10, 2020) (*Order*).

<sup>2</sup> See Petitioners' Letter, “Request for a “No Interest” Changed Circumstances Review and Revocation of the Order,” dated October 26, 2022.

know whether they account for substantially all of the U.S. production of the domestic like product covered by the *Order*. Accordingly, we are not combining this notice of initiation with a preliminary determination, pursuant to 19 CFR 351.221(c)(3)(ii). Rather, we will provide interested parties with an opportunity to address the issue of domestic industry support with respect to the revocation of the *Order*, as explained below. After examining comments, if any, concerning domestic industry support for revocation, we will issue the preliminary results of this CCR.

#### Public Comment

Interested parties are invited to provide comments and/or factual information regarding this CCR, including comments on industry support. Any comments and factual information must be submitted to Commerce no later than ten days after the date of publication of this notice. Rebuttal comments and rebuttal factual information must be filed with Commerce no later than seven days after the initial comments and/or factual information submissions.<sup>5</sup> All submissions must be filed electronically using Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS).<sup>6</sup> An electronically filed document must be received successfully in its entirety by ACCESS, by 5:00 p.m. Eastern Time on the due dates set forth in this notice. Note that Commerce has temporarily modified certain of its requirements for serving documents containing business proprietary information until further notice.<sup>7</sup>

#### Preliminary and Final Results of the CCR

Commerce intends to publish in the **Federal Register** a notice of the preliminary results of this CCR in accordance with 19 CFR 351.221(b)(4) and (c)(3)(i). Commerce will set forth its preliminary factual and legal conclusions in that notice. Unless extended, Commerce will issue the final results of this CCR in accordance with the time limits set forth in 19 CFR 351.216(e).

#### Notification to Interested Parties

This initiation notice is published in accordance with section 751(b)(1) of the Act and 19 CFR 351.221(b)(1).

Dated: November 14, 2022.

**James Maeder,**

*Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.*

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

[RTID 0648–XC561]

#### North Pacific Fishery Management Council; Public Meetings

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of public meetings.

**SUMMARY:** The North Pacific Fishery Management Council (Council) and its advisory committees will meet December 5, 2022, through December 14, 2022.

**DATES:** The meetings will be held Monday, December 5, 2022, through Wednesday, December 14, 2022.

**ADDRESSES:** The meetings will be a hybrid conference. The in-person component of the meeting will be held at the Hilton Hotel, 500 W 3rd Ave, Anchorage, AK 99501, or join the meeting online through the links at <https://www.npfmc.org/upcoming-council-meetings>.

*Council address:* North Pacific Fishery Management Council, 1007 W 3rd Ave, Anchorage, AK 99501–2252; telephone: (907) 271–2809. Instructions for attending the meeting via web conference are given under Connection Information below.

#### FOR FURTHER INFORMATION CONTACT:

Diana Evans, Council staff; email: [diana.evans@noaa.gov](mailto:diana.evans@noaa.gov); telephone: (907) 271–2809. For technical support, please contact our Council administrative staff, email: [npfmc.admin@noaa.gov](mailto:npfmc.admin@noaa.gov).

**SUPPLEMENTARY INFORMATION:** The Council's Scientific and Statistical Committee (SSC) will begin at 8 a.m. in the Aleutian room on Monday, December 5, 2022, and continue through Wednesday, December 7, 2022. The Council's Advisory Panel (AP) will begin at 8 a.m. in the Denali room on Tuesday, December 6, 2022, and continue through Friday, December 9, 2022. The Council will begin at 8 a.m. in the Aleutian room on Thursday, December 8, 2022, and continue through Wednesday, December 14, 2022. The Bering Sea FEP LKTK Subsistence Taskforce (LKTKS) will meet on

Monday, December 5, 2022, from 8:30 a.m. to 5 p.m. in the Denali room. The Charter Halibut Committee will meet Wednesday, December 7, 2022, from 8 a.m. to 1 p.m. at the North Pacific Fishery Management Council's Conference Room; 1007 W 3rd Ave, Suite 400, Anchorage, AK 99501–2252. All times listed are Alaska Time.

#### Agenda

*Monday, December 5, 2022, Through Wednesday, December 7, 2022*

The SSC agenda will include the following issues:

- (1) Administrative Issues;
- (2) Snow crab rebuilding analysis—Initial Review;
- (3) Bering Sea Aleutian Islands (BSAI) Groundfish—(a) Bering Sea (BS) and Aleutian Islands (AI) Ecosystem Status Reports, (b) Stock Assessment and Fishery Evaluation (SAFE) report, (c) adopt Acceptable Biological Catch (ABC)/Over Fishing Limits (OFLs); (d) Plan Team report;
- (4) Gulf of Alaska (GOA) Groundfish—(a) GOA Ecosystem Status Report, (b) SAFE report, (c) adopt ABC/OFLs, (d) Plan Team report.

The agenda is subject to change, and the latest version will be posted at <https://meetings.npfmc.org/Meeting/Details/2963> prior to the meeting, along with meeting materials.

In addition to providing ongoing scientific advice for fishery management decisions, the SSC functions as the Council's primary peer review panel for scientific information, as described by the Magnuson-Stevens Act section 302(g)(1)(e), and the National Standard 2 guidelines (78 FR 43066). The peer-review process is also deemed to satisfy the requirements of the Information Quality Act, including the Office of Management and Budget (OMB) Peer Review Bulletin guidelines.

*Tuesday, December 6, 2022, Through Friday, December 9, 2022*

The Advisory Panel agenda will include the following issues:

- (1) Administrative Issues;
- (2) Snow crab rebuilding analysis—Initial Review;
- (3) Cook Inlet Salmon Fishery Management Plan (FMP) amendment—Initial Review;
- (4) Salmon bycatch: Review—(a) Salmon findings of State of Alaska Bycatch Taskforce; (b) Chum salmon bycatch discussion paper; (c) Salmon Bycatch Committee report;
- (5) BSAI Groundfish—(a) BS and AI Ecosystem Status Reports, (b) SAFE report, (c) adopt ABC/OFLs; (d) Plan Team report;

<sup>5</sup> Submissions of rebuttal factual information must comply with 19 CFR 351.301(b)(2).

<sup>6</sup> See generally 19 CFR 351.303.

<sup>7</sup> See *Temporary Rule Modifying AD/CVD Service Requirements Due to COVID-19; Extension of Effective Period*, 85 FR 41363 (July 10, 2020).

(6) GOA Groundfish—(a) GOA Ecosystem Status Report, (b) SAFE report, (c) adopt ABC/OFLs, (d) Plan Team report;

(7) 2023 Charter halibut management measures—Final action;

(8) Staff Tasking.

The agenda is subject to change, and the latest version will be posted at <https://meetings.npfmc.org/Meeting/Details/2964> prior to the meeting, along with meeting materials.

*Thursday, December 8, 2022, Through Wednesday, December 14, 2022*

The Council agenda will include the following issues. The Council may take appropriate action on any of the issues identified.

(1) B Reports (Executive Director, NMFS Management, NOAA General Counsel (GC), NOAA Enforcement Report, Alaska Department of Fish and Game (ADF&G), United States Coast Guard (USCG), United States Fish and Wildlife Service (USFWS), SSC report, AP report);

(2) Red King Crab Savings Area (RKCSA) emergency rule request—Review;

(3) Snow crab rebuilding analysis—Initial Review;

(4) Crab conservation workplan—Review;

(5) Cook Inlet Salmon FMP amendment—Initial Review;

(6) BSAI Groundfish—(a) BS and AI Ecosystem Status Reports, (b) SAFE report, (c) adopt ABC/OFLs; (d) Plan Team report;

(7) GOA Groundfish—(a) GOA Ecosystem Status Report, (b) SAFE report, (c) adopt ABC/OFLs, (d) Plan Team report;

(8) 2023 Charter halibut management measures—Final action;

(9) Salmon bycatch: Review—(a) Salmon findings of State of Alaska Bycatch Taskforce; (b) Chum salmon bycatch discussion paper; (c) Salmon Bycatch Committee report;

(10) Staff Tasking.

The agenda is subject to change, and the latest version will be posted at <https://meetings.npfmc.org/Meeting/Details/2964> prior to the meeting, along with meeting materials.

*Monday, December 5, 2022*

The LKTKS Taskforce agenda will include (a) receive an overview of Taskforce work products, namely the LKTKS protocol which includes the primary guidelines and onramps for

identifying, analyzing, and including LKTKS information and expertise in the Council's decision-making process; (b) further develop the protocol and recommendations for LKTKS onramps; (c) discuss the timeline for remaining work to meet the Council's objectives for the Taskforce; and (d) other business. The Agenda is subject to change, and the latest version will be posted at: <https://meetings.npfmc.org/Meeting/Details/2954>.

*Wednesday, December 7, 2022*

The Charter Halibut Committee agenda will include (a) begin with introductions (b) review the ADF&G analysis for 2023, (c) have a committee discussion, (d) have committee recommendations, (e) have an electronic logbook discussion, (f) discuss upcoming meetings and other business.

The agenda is subject to change, and the latest version will be posted at <https://meetings.npfmc.org/Meeting/Details/2957> prior to the meeting, along with meeting materials.

#### Connection Information

You can attend the meeting online using a computer, tablet, or smart phone; or by phone only. Connection information will be posted online at: <https://www.npfmc.org/upcoming-council-meetings>. For technical support, please contact our administrative staff, email: [npfmc.admin@noaa.gov](mailto:npfmc.admin@noaa.gov).

If you are attending the meeting in-person, please refer to the COVID avoidance protocols on our website, <https://www.npfmc.org/upcoming-council-meetings/>.

#### Public Comment

Public comment letters will be accepted and should be submitted electronically through the links at <https://www.npfmc.org/upcoming-council-meetings>. The Council strongly encourages written public comment for this meeting to avoid any potential for technical difficulties to compromise oral testimony. The written comment period is open from November 18, 2022, to December 2, 2022, and closes at 12 p.m. Alaska Time on Friday, December 2, 2022.

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

[RTID 0648–XC543]

### New England Fishery Management Council; Public Meeting; Correction

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of correction of a public meeting.

**SUMMARY:** The New England Fishery Management Council (Council) is scheduling a public meeting of its Groundfish Advisory Panel via webinar to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

**DATES:** This webinar will be held on Thursday, December 1, 2022, beginning at 1:30 p.m. Webinar registration URL information: <https://attendee.gotowebinar.com/register/3900671858064240652>.

#### ADDRESSES:

*Council address:* New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

#### FOR FURTHER INFORMATION CONTACT:

Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465–0492.

**SUPPLEMENTARY INFORMATION:** The original notice published in the **Federal Register** on November 15, 2022 (87 FR 68440). The original notice stated the time of the meeting was to begin at 12:30 p.m. This notice corrects the time of the meeting to begin at 1:30 p.m. All other previously published information remains the same.

*Authority:* 16 U.S.C. 1801 *et seq.*

Dated: November 15, 2022.

**DEPARTMENT OF COMMERCE****National Oceanic and Atmospheric Administration****[RTID 0648–XC560]****New England Fishery Management Council; Public Meeting**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of public meeting.

**SUMMARY:** The New England Fishery Management Council (Council, NEFMC) will hold a four-day in-person meeting with an option for remote participation to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). The Council continues to follow all public safety measures related to COVID-19 and intends to do so for this meeting.

**DATES:** The meeting will be held on Monday, December 5, 2022 through Thursday, December 8, 2022, beginning at 1 p.m. on Monday and 9 a.m. on Tuesday, Wednesday, and Thursday.

**ADDRESSES:**

*Meeting address:* The meeting will be held at the Hotel Viking, One Bellevue Avenue, Newport, RI 02840; telephone: (401) 847-3300; online at <https://www.hotelviking.com/>. Join the webinar at <https://attendee.gotowebinar.com/register/8990407940060984847>.

*Council address:* New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950; telephone: (978) 465-0492; [www.nefmc.org](http://www.nefmc.org).

**FOR FURTHER INFORMATION CONTACT:**

Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465-0492, ext. 113.

**SUPPLEMENTARY INFORMATION:****Agenda***Monday, December 5, 2022*

After brief announcements, the Council will receive reports on recent activities from its Chair and Executive Director, the Greater Atlantic Regional Fisheries Office (GARFO) Regional Administrator, the Northeast Fisheries Science Center (NEFSC) Director, the NOAA Office of General Counsel, the Mid-Atlantic Fishery Management Council liaison, staff from the Atlantic States Marine Fisheries Commission (ASMFC), and representatives from the U.S. Coast Guard, NOAA's Office of Law Enforcement, and the Northeast Trawl Advisory Panel. Next, the Council will

receive a briefing from NOAA General Counsel on disclosure of financial interests and voting recusal regulations for Regional Fishery Management Council members. This will be followed by an introduction to the Chief of the Bureau of Ocean Energy Management's (BOEM) Office of Renewable Energy Programs, who will provide comments on the responsibilities of this position and take questions. Then, the Habitat Committee will provide its report, which will cover: (1) an update on a framework adjustment to facilitate offshore Atlantic salmon aquaculture; (2) a discussion on the retention of the Georges Bank Dedicated Habitat Research Area; and (3) an update on offshore energy issues and other habitat-related work. As the last item of business for the day, the Council will have a discussion on policies for preventing harassment of Council staff and all other Council process participants.

*Tuesday, December 6, 2022*

The Council will begin the second day of its meeting with a Northeast Fisheries Science Center presentation on the peer-reviewed results of the September 2022 Monkfish Management Track Stock Assessment. Next, the Council will receive a presentation on the peer-reviewed September 2022 Management Track Stock Assessments for numerous groundfish stocks. The Council then will receive a report from its Scientific and Statistical Committee (SSC), which will cover SSC recommendations for overfishing limits (OFLs) and acceptable biological catches (ABCs) for: (1) Georges Bank cod and Georges Bank yellowtail flounder for fishing years 2023–24, as well as 14 other groundfish stocks for fishing years 2023–25; (2) monkfish for fishing years 2023–25; and (3) Atlantic sea scallops for fishing year 2023 and defaults for fishing year 2024.

After the lunch break, members of the public will have the opportunity to speak during an open comment period on issues that relate to Council business but are not included on the published agenda for this meeting. The Council asks the public to limit remarks to 3–5 minutes. These comments will be received both in person and through the webinar. A guide for how to publicly comment through the webinar is available on the Council website at [https://s3.amazonaws.com/nefmc.org/NEFMC-meeting-remote-participation\\_generic.pdf](https://s3.amazonaws.com/nefmc.org/NEFMC-meeting-remote-participation_generic.pdf). Next, the Council will take up the Groundfish Committee report, which is focused on final action for Framework Adjustment 36 to the Northeast Multispecies Fishery

Management Plan (FMP). The framework includes: (1) 2023–24 total allowable catches (TACs) for U.S./Canada shared resources on Georges Bank; (2) 2023–24 specifications for Georges Bank cod and Georges Bank yellowtail flounder; (3) 2023–25 specifications for 14 additional groundfish stocks; (4) revised rebuilding plan for Gulf of Maine cod; (5) additional measures to promote Georges Bank and Gulf of Maine cod stock rebuilding; and (6) acceptable biological catch (ABC) control rule revisions for groundfish. At the conclusion of this discussion, the Council will adjourn for the day.

*Wednesday, December 7, 2022*

The Council will lead off the third day of its meeting discussing Atlantic sturgeon. First, GARFO will provide a presentation on the final action plan for Atlantic sturgeon, which will be followed by a Council discussion on next steps to reduce sturgeon bycatch in federal large-mesh gillnet fisheries. Next, the Council will take up final action on Framework Adjustment 13 to the Monkfish FMP, which contains 2023–25 fishery specifications and other measures. The Council will move into the Scallop Committee report, which will focus on final action for Framework Adjustment 36 to the Atlantic Sea Scallop FMP. The framework includes specifications for the 2023 fishing year, default specifications for the 2024 fishing year, and other measures.

Following the lunch break, the Council will engage in an afternoon-long discussion as a next step under the East Coast Climate Change Scenario Planning initiative. This will be a facilitated discussion to identify main takeaways and potential actions across four thematic areas—management and governance, data and science, alternative ocean uses, and adaptability—developed through the East Coast Climate Change Scenario Planning initiative. The Council will recommend and prioritize actions for evaluation at a February 2023 Summit to assist East Coast fishery management organizations in adapting to climate change. At the conclusion of this discussion, the Council will adjourn for the day.

*Thursday, December 8, 2022*

The Council will lead off the fourth day of its meeting with the Ecosystem-Based Fishery Management (EBFM) Committee report, which will include: (1) a preliminary summary of the in-person EBFM Public Information Workshops conducted in October and November; (2) an overview of the

Prototype Management Strategy Evaluation (MSE) scoping meetings for EBFM and the Georges Bank example Fishery Ecosystem Plan (eFEP); and (3) a short overview of the November 2022 Council Member Ongoing Development (CMOD) meeting in Denver, CO. The Council then will receive a spiny dogfish presentation and approve specifications for the 2023 spiny dogfish fishing year. Next on the agenda, the Council will receive the 2022 Small-Mesh Multispecies (Whiting) Annual Monitoring Report covering the 2021 fishing year. The Council then will review and approve a comment letter on NOAA's updated Saltwater Recreational Fisheries Policy.

Following the lunch break, the Council will discuss and take final action on 2022 Council Priorities for all fishery management plans and other Council responsibilities. Finally, the Council will close out the meeting with other business.

Although non-emergency issues not contained on this agenda may come before the Council for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency. The public also should be aware that the meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

### Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Thomas A. Nies (see **ADDRESSES**) at least 5 days prior to the meeting date.

*Authority:* 16 U.S.C. 1801 *et seq.*

Dated: November 15, 2022.

**Diane M. DeJames-Daly,**

*Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.*

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

[RTID 0648-XC541]

### Endangered and Threatened Species; Take of Anadromous Fish

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of Availability; Receipt of a proposed Habitat Conservation Plan (HCP); Incidental Take Permit (ITP) application; announcement of public meeting; request for comments.

**SUMMARY:** We, the National Marine Fisheries Service (NMFS) and the U.S. Fish and Wildlife Service (FWS) have received separate ITP applications from the Oregon Department of State Lands (ODSL; applicant), associated with the Elliott State Research Forest HCP. The applications, including the HCP, have been submitted pursuant to Section 10 of the Endangered Species Act of 1973, as amended. The applicant is seeking authorization from FWS and NMFS (together, the Services) for the incidental take of three species expected to result from research and management-related activities on the Elliott State Forest in Coos and Douglas Counties, Oregon. These research and management activities include timber removal and infrastructure maintenance. FWS is the lead Federal agency under the National Environmental Policy Act (NEPA), and NMFS is a cooperating agency. The availability of the Draft Environmental Impact Statement was announced separately by FWS. NMFS is seeking public comments on the HCP.

**DATES:** We will accept online or hardcopy comments. Hardcopy comments must be received or postmarked on or before December 19, 2022 (See **ADDRESSES**). Comments submitted online at <https://www.regulations.gov/> must be received by 11:59 p.m. Eastern Time on December 19, 2022.

**Public Meetings:** FWS is hosting a public meeting during the public comment and review period. A meeting link will be posted to the FWS project web page (<https://www.fws.gov/project/elliott-state-research-forest-habitat-conservation-plan>) prior to the meeting. The public meeting will be held virtually at the following time:

- December 13, 2022, from 2 p.m. to 3:30 p.m. Pacific Time.

**ADDRESSES:**

**Written Comments:** Written comments on the proposed HCP will be accepted via the Federal e-Rulemaking Portal. Go to <https://www.regulations.gov> and enter FWS-R1-ES-2022-0029 in the Search Box. Follow instructions for submitting comments on Docket FWS-R1-ES-2022-0029. When commenting, please refer to the specific section and/or page number and the subject of your comment.

**Instructions:** Written comments submitted through any other method, or received after the end of the comment period, may not be considered by NMFS. All comments received are part of the public record and will generally be posted for public viewing on [www.regulations.gov](https://www.regulations.gov). All personal identifying information (e.g., name, address), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter "N/A" in the required fields if you wish to remain anonymous).

**FOR FURTHER INFORMATION CONTACT:** Kathleen Wells, NMFS, 503-230-5437, [Kathleen.Wells@noaa.gov](mailto:Kathleen.Wells@noaa.gov).

### SUPPLEMENTARY INFORMATION:

#### ESA-Listed Species Covered in This Notice

Species covered by NMFS:

- Coho salmon (*Oncorhynchus kisutch*): Threatened.

Species covered by FWS:

- Northern spotted owl (*Strix occidentalis*): Threatened.
- Marbled murrelet (*Brachyramphus marmoratus*): Threatened.

### Background

Section 9 of the ESA and Federal regulations prohibit the taking of a species listed as endangered or threatened. The ESA defines "take" to mean harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct. NMFS and FWS may issue permits, under limited circumstances, to take listed species incidental to, and not the purpose of, otherwise lawful activities. Section 10(a)(1)(B) of the ESA and implementing regulations (50 CFR 222.307 for NMFS and 50 CFR 17.22(b) and 17.32(b) for FWS) provide for authorizing incidental take of listed species.

NMFS and FWS received separate ITP applications from ODSL on October 10, 2022, pursuant to the ESA. ODSL prepared the HCP in support of both ITP applications and is seeking authorization from NMFS and FWS for

incidental take of the species described above.

The ITPs, if issued, would authorize take of the covered species that may occur incidental to ODSL's research and forest management activities (the covered activities). The plan area includes a total of 93,432 acres (378.11 km<sup>2</sup>), which includes School Lands and Board of Forestry Lands managed by ODSL and the Oregon Department of Forestry (ODF). The covered activities include the foundational research design of the Elliott State Research Forest proposal including; forest research treatments; operation standards, by research treatment designation; projected harvest timing, amount, and amount of harvest types, and methods; supporting management activities; supporting infrastructure, including roads and facilities; potential research projects; and implementation of the HCP's conservation strategy.

The HCP specifies the impacts that will likely result from the taking of covered species and describes the steps that ODSL will take to minimize and offset such impacts. The HCP also describes the covered species' life history and ecology, as well as biological goals and objectives of the HCP, adaptive management, monitoring, and funding assurances.

NMFS is seeking public input on the HCP. We specifically request information on the following:

1. Biological information, analysis, and relevant data concerning the covered species, other wildlife, and ecosystems.
2. Potential effects that the proposed permit actions could have on the covered species, and other endangered or threatened species and their habitats, including the interaction of the effects of the project with climate change and other stressors.
3. Alternatives to the proposed action.
4. Adequacy of the conservation strategy to minimize and mitigate the impact of the taking on covered species.
5. Other information relevant to the HCP.

The Services will each make their permit decision on the statutory and regulatory criteria of the ESA. Their decisions will also be informed by the data, analyses, and public comments received on the Draft EIS and HCP. The Services will each document their determinations independently in an ESA Section 10 findings document, and an ESA section 7 biological opinion. It is NMFS' intent to adopt the EIS and issue its own record of decision to complete the NEPA process. If the Services find that all requirements for issuance of the ITPs are met, they will

issue the requested permits, subject to terms and conditions deemed necessary or appropriate to carry out the purposes of ESA Section 10.

*Authority:* Section 10(c) of the ESA and its implementing regulations (50 CFR 222.307, 17.22, and 17.32).

Dated: November 9, 2022.

**Angela Somma,**

*Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.*

**BILLING CODE 3510-22-P**

## DEPARTMENT OF DEFENSE

### Department of the Air Force

#### Notice is Given of the Names of Members of the Performance Review Board for the Department of the Air Force

**AGENCY:** Department of the Air Force, Department of Defense.

**ACTION:** Notice.

**SUMMARY:** Notice is given of the names of members of the 2022 Performance Review Board for the Department of the Air Force.

**FOR FURTHER INFORMATION CONTACT:**

Please direct any written comments or requests for information to Mr. Christopher Whitener, Air Force Civilian Senior Executive Management Office, SAF/MRL, 1660 Air Force Pentagon, Washington, DC, 20330-1040, (PH: 703-695-7323; or via email at [christopher.whitener@us.af.mil](mailto:christopher.whitener@us.af.mil)).

**SUPPLEMENTARY INFORMATION:** Pursuant to 5 U.S.C. 4314(c) (1-5), the Department of the Air Force announces the appointment of members to the Air Force's Senior Executive Service Performance Review Board. Appointments are made by the authorizing official. Each board member shall review and evaluate performance scores provided by the Senior Executive's rater/immediate supervisor. Performance standards must be applied consistently across the Air Force. The board will make final recommendations to the authorizing official relative to the performance of the executive.

The members of the 2022 Performance Review Board for the Air Force are:

1. Honorable Alex Wagner (Chair), Assistant Secretary of the Air Force for Manpower and Reserve Affairs
2. General Duke Richardson (Vice Chair), Commander for Air Force Materiel Command Commander
3. General David Allvin, Vice Chief of Staff of the Air Force

4. General David Thompson, Vice Chief of Space Operations for U.S. Space Force
5. Major General Brook Leonard, Chief of Staff for U.S. Space Command
6. Mr. John Fedrigo, Principal Deputy Assistant Secretary of the Air Force for Manpower and Reserve Affairs
7. Mr. Anthony Reardon, Administrative Assistant to the Secretary of the Air Force
8. Ms. Gwendolyn DeFilippi, Assistant Deputy Chief of Staff for Manpower, Personnel and Services
9. Ms. Katharine Kelley, Deputy Chief of Space Operations for Human Capital, U.S. Space Force
10. Ms. Darlene Costello, Principal Deputy Assistant Secretary of the Air Force Acquisition, Technology & Logistics
11. Mr. Steven Herrera, Principal Deputy Assistant Secretary of the Air Force for Financial Management and Comptroller
12. Ms. Lorna Estep, Executive Director, Air Force Materiel Command
13. Mr. Craig Smith, Principal Deputy General Counsel of the Air Force
14. Mr. John Salvatori, Director, Concepts, Development, and Management Office
15. Ms. Shannon McGuire (Legal Advisor), Deputy General Counsel for Fiscal Ethics and Administrative Law
16. Mr. Richard Desmond (Legal Advisor), Associate General Counsel of the Air Force
17. Ms. Laura Megan-Posch (Legal Advisor), Associate General Counsel of the Air Force

The following Tier 3 Career SES members will serve as alternates:

1. Mr. Douglas Bennett, Auditor General of the Air Force
2. Mr. Richard Lombardi, Deputy Chief Management Officer
3. Ms. Kelli Seybolt, Deputy Under Secretary of the Air Force, International Affairs
4. Mr. Daniel Fri, Assistant Deputy Chief of Staff, Logistics, Engineering and Force Protection
5. Mr. Douglas Sanders, Deputy Administrative Assistant to the Secretary of the Air Force
6. Mr. Thomas Lawhead, Assistant Deputy Chief of Staff, Strategy Integration and Requirements
7. Mr. Michael Shoults, Assistant Deputy Chief of Staff for Strategic Deterrence and Nuclear Integration
8. Mr. Edwin Oshiba, Acting Assistant Secretary of the Air Force for Installations, Environment and Energy
9. Ms. Lauren Knausenberger, Chief Information Officer

10. Mr. Joseph McDade, Assistant Deputy Chief of Staff for Strategic Plans and Programs
11. Mr. Rowayne Schatz Jr., Director for Studies and Analysis, Office of the Secretary of the Air Force
12. Ms. Lisa Costa, Deputy Chief of Space Operations for Technology and Innovation
13. Ms. Wanda Jones-Heath, Principal Cyber Advisor
14. Ms. Jennifer Miller, Director of Staff, Office of the Secretary of the Air Force

**BILLING CODE 5001-10-P**

## DEPARTMENT OF DEFENSE

### Department of the Air Force

#### Notice of Intent To Grant a Partially Exclusive Patent License

**AGENCY:** Department of the Air Force, Department of Defense.

**ACTION:** Notice of intent.

**SUMMARY:** Pursuant to the Bayh-Dole Act and implementing regulations, the Department of the Air Force hereby gives notice of its intent to grant a partially exclusive patent license to UES Inc., a small business, having a place of business at 4401 Dayton-Xenia Road, Dayton, OH 45432-1894. Such license is partially exclusive as it is limited to the field of electronics.

**DATES:** Written objections must be filed no later than fifteen (15) calendar days after the date of publication of this Notice.

**ADDRESSES:** Submit written objections to James F. McBride, Air Force Materiel Command Law Office, AFMCLO/JAZ, 2240 B Street, Area B, Building 11, Wright-Patterson AFB, OH 45433-7109; Facsimile: (937) 255-9318; or Email: [afmclo.jaz.tech@us.af.mil](mailto:afmclo.jaz.tech@us.af.mil). Include Docket ARX-210727A-PL in the subject line of the message.

**FOR FURTHER INFORMATION CONTACT:** James F. McBride, Air Force Materiel Command Law Office, AFMCLO/JAZ, 2240 B Street, Area B, Building 11, Wright-Patterson AFB, OH 45433-7109; Telephone: (937) 713-0229; Facsimile: (937) 255-9318; or Email: [afmclo.jaz.tech@us.af.mil](mailto:afmclo.jaz.tech@us.af.mil).

#### Abstract of Patents and Patent Application(s)

I. Articles comprising a resistor comprising core shell liquid metal encapsulates and methods of detecting an impact on an article using a resistor comprising core shell liquid metal encapsulates are disclosed. Such core shell liquid metal encapsulates enable simple but robust impact sensors as such encapsulates comprise a highly electrically resistant metal oxide shell that prevents such encapsulates from coalescing. Yet when such shell is ruptured, the highly conductive bulk liquid metal is released. Such liquid metal changes electrical properties of a sensor comprising core shell liquid metal encapsulates which in turn is evidence of the aforementioned impact.

#### Intellectual Property

U.S. Patent No. 10,900,848 B2, that issued on January 26, 2021, and entitled “Articles comprising a resistor comprising core shell liquid metal encapsulates and method of detecting an impact.”

II. The present invention relates to core shell liquid metal encapsulates comprising multi-functional ligands, networks comprising such encapsulates and processes of making and using such encapsulates and networks. When subjected to strain, such network’s conductivity is enhanced, thus allowing the network to serve as a healing agent that restores at least a portion of the conductivity in an adjacent conductor.

#### Intellectual Property

U.S. Patent No. 11,100,223 B2, that issued on August 24, 2021, and U.S. Patent Application Serial No. 17/376,644, that was filed on July 15, 2021. Such patent and patent application being entitled “Core shell liquid metal encapsulates comprising multi-functional ligands and networks comprising same”

III. The present invention relates to articles comprising core shell liquid metal encapsulate networks and methods of using core shell liquid metal encapsulate networks to control AC signals and power. Such method permits the skilled artisan to control the radiation, transmission, reflection and modulation of an AC signal and power. As a result, AC system properties such as operation frequency, polarization, gain, directionality, insertion loss, return loss, and impedance can be controlled under strain.

#### Intellectual Property

U.S. Patent Application Serial No. 16/580,652, that was filed on September 24, 2019, and entitled “Articles comprising

*core shell liquid metal encapsulate networks and method to control alternating current signals and power”.*

IV. The present invention relates to substrates comprising a network comprising core shell liquid metal encapsulates comprising multi-functional ligands and processes of making and using such substrates. The core shell liquid metal particles are linked via ligands to form such network. Such networks volumetric conductivity increases under strain which maintains a substrate’s resistance under strain. The constant resistance results in consistent thermal heating via resistive heating. Thus allowing a substrate that comprises such network to serve as an effective heat provider.

#### Intellectual Property

U.S. Patent No. 11,102,883 B2, that issued on August 24, 2021, and U.S. Patent Application Serial No. 17/386,807, that was filed on July 28, 2021. Such patent and patent application being entitled “Substrates comprising a network comprising core shell liquid metal encapsulates comprising multi-functional ligands”

V. The present invention relates to architected liquid metal networks and processes of making and using same. The predetermined template design technology of such architected liquid metal networks provides the desired spatial control of electrical, electromagnetic, and thermal properties as a function of strain. Thus, resulting in improved overall performance including process ability.

#### Intellectual Property

U.S. Patent Application Serial No. 16/671,750, that was filed on November 1, 2019, and entitled “Architected liquid metal networks and processes of making and using same”.

The Department of the Air Force may grant the prospective license unless a timely objection is received that sufficiently shows the grant of the license would be inconsistent with the Bayh-Dole Act or implementing regulations. A competing application for a patent license agreement, completed in compliance with 37 CFR 404.8 and received by the Air Force within the period for timely objections, will be treated as an objection and may be considered as an alternative to the proposed license.

**Adriane Paris,**

*Air Force Federal Register Liaison Officer.*

**BILLING CODE 5001-10-P**

**DEPARTMENT OF ENERGY****Bonneville Power Administration****[BPA File No. BP-24]****Fiscal Year (FY) 2024–2025 Proposed Power and Transmission Rate Adjustments Public Hearing and Opportunities for Public Review and Comment**

**AGENCY:** Bonneville Power Administration (Bonneville or BPA), Department of Energy (DOE).

**ACTION:** Notice of FY 2024–2025 proposed power and transmission rate adjustments.

**SUMMARY:** Bonneville is initiating a rate proceeding under the Northwest Power Planning and Conservation Act (Northwest Power Act) to establish power, transmission, and ancillary and control area services rates for the period from October 1, 2023, through September 30, 2025. Bonneville has designated this proceeding Docket No. BP-24.

**DATES:**

*Prehearing Conference:* The BP-24 proceeding begins with a prehearing conference, which will be held via telephone at 10:00 a.m. on Friday, December 2, 2022.

*Intervention:* Anyone intending to become a party to the BP-24 proceeding must file a petition to intervene on Bonneville's secure website. Petitions to intervene may be filed beginning on the date of publication of this Notice and are due no later than 4:30 p.m. on Monday, December 5, 2022. Part III of this notice, "Public Participation in BP-24," provides details on requesting access to the secure website and filing a petition to intervene.

**ADDRESSES:** Interested parties may obtain the call-in information by accessing Bonneville's BP-24 web page at <https://www.bpa.gov/goto/bp24> or by contacting the Hearing Clerk at [BP24clerk@gmail.com](mailto:BP24clerk@gmail.com).

*Participant Comments:* Written comments by non-party participants must be received by Friday, December 9, 2022, to be considered in the Administrator's Record of Decision (ROD). Part III of this notice, "Public Participation in BP-24," provides details on submitting participant comments.

**FOR FURTHER INFORMATION CONTACT:** Ms. Elissa Haley, DKS-7, BPA Communications, Bonneville Power Administration, P.O. Box 3621, Portland, Oregon 97208; by phone toll-free at 1-800-622-4519; or by email to [enhaley@bpa.gov](mailto:enhaley@bpa.gov).

The Hearing Clerk for this proceeding can be reached via email at [BP24clerk@gmail.com](mailto:BP24clerk@gmail.com) or via telephone at (503) 479-8506.

Please direct questions regarding Bonneville's secure website to the Hearing Coordinator via email at [cwgriffen@bpa.gov](mailto:cwgriffen@bpa.gov) or, if the question is time-sensitive, via telephone at (503) 230-5107.

*Responsible Officials:* Mr. Daniel H. Fisher, Power Rates Manager, is the official responsible for the development of Bonneville's power rates, and Ms. Rebecca E. Fredrickson, Manager of Transmission Rates, Tariff, Regulatory and Compliance, is the official responsible for the development of Bonneville's transmission, ancillary, and control area services rates.

**SUPPLEMENTARY INFORMATION:****Table of Contents**

Part I. Introduction and Procedural Matters  
Part II. Scope of BP-24 Rate Proceeding  
Part III. Public Participation in BP-24  
Part IV. Summary of Rate Proposals  
Part V. Proposed BP-24 Rate Schedules

**Part I—Introduction and Procedural Matters***A. Introduction*

The Northwest Power Act provides that Bonneville must establish, and periodically review and revise, its power and transmission rates so that they recover, in accordance with sound business principles, the costs associated with the acquisition, conservation, and transmission of electric power, including amortization of the Federal investment in the Federal Columbia River Power System (FCRPS) over a reasonable number of years, and Bonneville's other costs and expenses. Section 7(i) of the Northwest Power Act requires that Bonneville's rates be established according to certain procedures, including publication in the **Federal Register**, of a notice of the proposed rates and one or more hearings conducted as expeditiously as practicable by a Hearing Officer to develop a full and complete record for a final decision by the Administrator. Bonneville is conducting the BP-24 proceeding to establish rates for FY 2024–2025.

Bonneville's Rules of Procedure will govern the BP-24 proceeding. The rules are posted on Bonneville's website at <https://www.bpa.gov/energy-and-services/rate-and-tariff-proceedings/rules-of-procedure-revision-process>.

*B. 2022 Integrated Program Review*

Bonneville's Integrated Program Review (IPR) process is designed to allow the public an opportunity to

review and comment on Bonneville's expense and capital cost forecasts before the forecast costs are used to set rates. Bonneville's 2022 IPR process, which addressed the expense and capital program level cost forecasts for FY 2024–25, began in June 2022 and concluded with the issuance of the Final Close-Out Report in October 2022. At the discretion of the Administrator, Bonneville may hold additional processes to review these forecasts outside of the BP-24 rate proceeding.

*C. Proposed Settlement of Rates for Power Sales and Transmission, Ancillary, and Control Area Services*

Since August, Bonneville has been engaged in discussions with customers and other stakeholders to attempt to reach agreement on the proposed power and transmission rates, including ancillary and control area services rates, for the FY 2024–2025 rate period. These discussions have resulted in the BP-24 Rates Settlement, which includes the FY 2024–2025 rates and other terms that Bonneville is proposing to adopt in the BP-24 proceeding. A summary of Bonneville's proposed power and transmission rates is provided in Part IV of this notice. A link to the BP-24 Rates Settlement is provided in Part V.

The BP-24 Rates Settlement calls for Bonneville to file a motion with the BP-24 Hearing Officer to establish a deadline for parties in the BP-24 proceeding to either object to the proposed settlement or waive the right to contest the settlement. Bonneville intends to file its motion soon after the BP-24 prehearing conference. If no party in the BP-24 proceeding objects to the BP-24 Rates Settlement, Bonneville staff will continue moving forward with the proposal that the Administrator adopt the settlement. If a party objects to the BP-24 Rates Settlement, Bonneville will notify all parties and decide how to proceed with respect to rates proposed in the initial proposal.

*D. Proposed Procedural Schedule*

A proposed schedule for the BP-24 proceeding is provided below, which assumes the BP-24 Rates Settlement proceeds without objection. The official schedule will be established by the Hearing Officer and may be amended by the Hearing Officer as needed during the proceeding.

Prehearing Conference—December 2, 2022.

BPA Files Initial Proposal—December 2, 2022.

Deadline for Petitions to Intervene—December 5, 2022.

Deadline for Objections to Settlement Agreement—December 9, 2022.

Close of Participant Comments—

December 9, 2022.

Final ROD and Final Studies Issued—

February 9, 2023.

#### E. *Ex Parte* Communications

Section 1010.5 of Bonneville's Rules of Procedure prohibits *ex parte* communications. *Ex parte* communications include any oral or written communication (1) relevant to the merits of any issue in the proceeding; (2) that is not on the record; and (3) with respect to which reasonable prior notice has not been given. The *ex parte* rule applies to communications with all Bonneville and DOE employees and contractors, the Hearing Officer, and the Hearing Clerk during the proceeding. Except as provided, any communications with persons covered by the rule regarding the merits of any issue in the proceeding by other executive branch agencies, Congress, existing or potential Bonneville customers, nonprofit or public interest groups, or any other non-DOE parties are prohibited. The rule explicitly excludes and does not prohibit communications (1) relating to matters of procedure; (2) otherwise authorized by law or the Rules of Procedure; (3) from or to the Federal Energy Regulatory Commission (Commission); (4) that all litigants agree may be made on an *ex parte* basis; (5) in the ordinary course of business, about information required to be exchanged under contracts, or in information responding to a Freedom of Information Act request; (6) between the Hearing Officer and Hearing Clerk; (7) in meetings for which prior notice has been given; or (8) as otherwise specified in Section 1010.5(b) of Bonneville's Rules of Procedure. The *ex parte* rule remains in effect until the Administrator's Final ROD is issued.

### Part II—Scope of BP-24 Rate Proceeding

#### A. *Joint Rate Proceeding*

The BP-24 proceeding is a joint proceeding for the adoption of both power and transmission rates for FY 2024–2025 (see Parts IV and V). This section provides guidance to the Hearing Officer regarding the scope of the rate proceeding and identifies specific issues that are outside the scope. In addition to the issues specifically listed below, any other issue that is not a ratemaking issue is outside the scope of this proceeding.

Bonneville may revise the scope of the proceeding to include new issues that arise as a result of circumstances or events occurring outside the proceeding that are substantially related to the rates

under consideration in the proceeding. See Rules of Procedure, Section 1010.4(b)(8)(iii), (iv). If Bonneville revises the scope of the proceeding to include new issues, Bonneville will provide public notice on its website, present testimony or other information regarding such issues, and provide a reasonable opportunity to intervene and respond to Bonneville's testimony or other information. *Id.*

#### 1. Expense and Capital Cost Forecasts

Bonneville's forecasts of its expense and capital costs are not determined in rate proceedings. Bonneville develops these forecasts for the purposes of setting rates in external processes, such as the IPR process described previously, with input from stakeholders. These forecasts are used in Bonneville's ratemaking, but do not establish Bonneville's budgets or spending levels for any program. Adjustments to, and selection of, projects for Bonneville's actual spending levels for its programmatic spending, including fish and wildlife spending, occur through the yearly budgetary review process, which includes submission of Bonneville's budget to Congress.

Bonneville also depreciates the capital spending on the Federal power and transmission systems over the service lives of the associated assets. Power's investments are depreciated over fixed periods. Transmission's depreciation is based on a depreciation study calculated consistent with industry standards. The service lives of power and transmission assets, as well as the depreciation study and resulting depreciation rates, are not determined in rate proceedings.

Pursuant to Section 1010.4(b)(8) of the Rules of Procedure, the Administrator directs the Hearing Officer to exclude from the record all argument, testimony, or other evidence that seek to raise issues with or challenge the appropriateness or reasonableness of: (1) the Administrator's forecasts of cost and spending levels, (2) the identification of projects used in Bonneville's cost forecasts; or (3) any decisions on the depreciation rates that are used to calculate depreciation expense. If any re-examination of cost forecasts is necessary, such re-examination will occur outside of the rate proceeding.

The exclusion does not extend to those portions of the revenue requirement related to the following: (1) interest rate forecasts, (2) interest expense and credit, (3) Treasury repayment schedules, (4) calculation of depreciation and amortization expense, (5) forecasts of system replacements used in repayment studies, (6)

purchased power expenses, (7) transmission cost incurred by Power Services, (8) generation cost incurred by Transmission Services, (9) minimum required net revenue, and (10) the costs of risk mitigation actions resulting from the expense and revenue uncertainties included in the risk analysis.

#### 2. Federal and Non-Federal Debt Service and Debt Management

During the 2022 IPR process and in other forums, Bonneville provided the public with background information on Bonneville's internal Federal and non-Federal debt management policies and practices. While these policies and practices are not decided in the IPR process, these discussions were intended to inform interested parties about these matters so the parties would better understand Bonneville's debt structure. Bonneville's debt management policies and practices remain outside the scope of the rate proceeding.

Pursuant to Section 1010.4(b)(8) of the Rules of Procedure, the Administrator directs the Hearing Officer to exclude from the record all argument, testimony, or other evidence that seeks in any way to address the appropriateness or reasonableness of Bonneville's debt management policies and practices. This exclusion does not encompass how debt management actions are reflected in ratemaking.

#### 3. Financial and Accounting Policies and Practices

Bonneville's Financial Plan outlines objectives to sustain the agency's financial strength and resiliency. The Financial Plan focuses on four main areas: cost management; debt utilization; debt capacity; and liquidity. Bonneville has adopted certain financial policies to help further its financial objectives. Bonneville's Financial Reserves Policy establishes lower and upper thresholds for agency and business line financial reserves and parameters for actions to be taken when financial reserves are above or below the thresholds. Bonneville's Sustainable Capital Financing Policy guides BPA's use of debt and revenue financing to finance its capital investments. The terms of Bonneville's Financial Plan and Policies, along with Bonneville's internal financial and accounting policies and practices, are outside the scope of the BP-24 proceeding.

Pursuant to Section 1010.4(b)(8) of the Rules of Procedure, the Administrator directs the Hearing Officer to exclude from the record all argument, testimony, or other evidence that seeks in any way to visit or revisit the terms of

Bonneville's Financial Plan, Financial Reserves Policy, Sustainable Capital Financing Policy, internal financial and accounting policies and practices, and previous decisions regarding the adoption and implementation of the Financial Plan and Policies.

#### 4. Tiered Rate Methodology (TRM)

The TRM restricts Bonneville and its customers with Contract High Water Mark (CHWM) contracts from proposing changes to the TRM's ratemaking guidelines unless certain procedures have been successfully concluded. No proposed changes have been subjected to the required procedures.

Pursuant to Section 1010.4(b)(8) of the Rules of Procedure, the Administrator directs the Hearing Officer to exclude from the record all argument, testimony, or other evidence that seeks in any way to propose revisions to the TRM made by Bonneville, customers with CHWM contracts, or their representatives. This exclusion does not extend to a party or customer that does not have a CHWM contract.

#### 5. Rate Period High Water Mark (RHWM) Process

The RHWM Process preceded the start of the BP-24 proceeding. In that process, as directed by the TRM, Bonneville established FY 2024-2025 RHWMs for Public customers that signed contracts for firm requirements power service providing for tiered rates, referred to as CHWM contracts. Bonneville established the maximum planned amount of power a customer is eligible to purchase at Tier 1 rates during the rate period, the Above-RHWM Loads for each customer, the System Shaped Load for each customer, the Tier 1 System Firm Critical Output, RHWM Augmentation, the Rate Period Tier 1 System Capability (RT1SC), and the monthly/diurnal shape of RT1SC. The RHWM Process provided customers an opportunity to review, comment on, and challenge Bonneville's RHWM determinations.

Pursuant to Section 1010.4(b)(8) of the Rules of Procedure, the Administrator directs the Hearing Officer to exclude from the record all argument, testimony, or other evidence that seeks in any way to visit or revisit Bonneville's determination of a customer's FY 2024-2025 RHWM or other RHWM Process determinations.

#### 6. 2008 Average System Cost Methodology (2008 ASCM) and Average System Cost Determinations

Section 5(c) of the Northwest Power Act established the Residential Exchange Program, which provides

benefits to residential and farm consumers of Pacific Northwest utilities based, in part, on a utility's "average system cost" (ASC) of resources. The 2008 ASCM is not subject to challenge or review in a Section 7(i) proceeding. Determinations of the ASCs of participating utilities are made in separate processes conducted pursuant to the ASCM. Those processes began with ASC filings on June 1, 2022, and concluded in October 2022, with the publication of the Final ASC Reports.

Pursuant to Section 1010.4(b)(8) of the Rules of Procedure, the Administrator directs the Hearing Officer to exclude from the record all argument, testimony, or other evidence that seeks in any way to visit or revisit the appropriateness or reasonableness of the 2008 ASCM or of any of the ongoing ASC determinations.

#### 7. 2012 Residential Exchange Program Settlement Agreement (2012 REP Settlement)

On July 26, 2011, the Administrator executed the 2012 REP Settlement, which resolved longstanding litigation over Bonneville's implementation of the Residential Exchange Program (REP) under Section 5(c) of the Northwest Power Act, 16 U.S.C. 839c(c). The Administrator's findings regarding the legal, factual, and policy challenges to the 2012 REP Settlement are explained in the REP-12 Record of Decision (REP-12 ROD). The Administrator's decisions regarding the 2012 REP Settlement and REP-12 ROD were upheld by the U.S. Court of Appeals for the Ninth Circuit in *Ass'n of Pub. Agency Customers v. Bonneville Power Admin.*, 733 F.3d 939 (9th Cir. 2013). Challenges to Bonneville's decision to adopt the 2012 REP Settlement and implement its terms in Bonneville's rate proceedings are not within the scope of this proceeding.

Pursuant to Section 1010.4(b)(8) of the Rules of Procedure, the Administrator directs the Hearing Officer to exclude from the record all argument, testimony, or other evidence that seeks in any way to visit or revisit in this rate proceeding Bonneville's determination to adopt the 2012 REP Settlement or its terms.

#### 8. Service to the Direct Service Industries (DSIs)

Pursuant to Section 1010.4(b)(8) of the Rules of Procedure, the Administrator directs the Hearing Officer to exclude from the record all argument, testimony, or other evidence that seeks in any way to revisit the appropriateness or reasonableness of Bonneville's decisions regarding service to the DSIs, including Bonneville's decision to offer contracts to the DSIs and the method, level of

service, or other terms embodied in the existing DSI contracts.

#### 9. Operation and Maintenance of the Power and Transmission Systems

Bonneville operates and maintains the Federal Columbia River Transmission System and, in coordination with other Federal entities, the FCRPS in accordance with good utility practice and with applicable reliability standards and operating requirements. Bonneville's power and transmission systems operation and maintenance practices and protocols, such as dispatcher standing orders, operating instructions, reliability of the system, compliance programs, and other operating requirements, are non-rate matters.

Pursuant to Section 1010.4(b)(8) of the Rules of Procedure, the Administrator directs the Hearing Officer to exclude from the record all argument, testimony, or other evidence that seeks in any way to address issues regarding operation and maintenance practices and protocols.

#### 10. Terms and Conditions of Transmission Service

Bonneville offers and provides transmission services, including interconnection service, and ancillary and control area services in accordance with the terms and conditions specified in its open access transmission tariff (Tariff), business practices, and applicable contracts. In addition to and concurrent with this rate proceeding, Bonneville is initiating the TC-24 proceeding to modify the Tariff terms and conditions. Bonneville's business practices provide implementation details for the Tariff. Bonneville's decisions regarding the business practices are determined in other forums and follow the procedures in Bonneville's Business Practice Process posted on its website. The Tariff terms and conditions, business practices, and the contracts and contract disputes between Bonneville and its customers are outside the scope of the BP-24 rate proceeding.

Pursuant to Section 1010.4(b)(8) of the Rules of Procedure, the Administrator directs the Hearing Officer to exclude from the record all argument, testimony, or other evidence that seeks in any way to address issues regarding terms and conditions of transmission service, including interconnection service, and ancillary and control area services. This includes, but is not limited to, argument, testimony, or other evidence regarding Bonneville's decisions whether to offer particular transmission services, the terms and conditions for

participating in the EIM, the procedures and standards for modifications to Bonneville's Tariff or business practices, and whether to include certain terms and conditions in the Tariff or in business practices.

#### 11. Oversupply Management Protocol

The proposed OS-24 Oversupply rate is a formula rate designed to recover Bonneville's actual oversupply costs incurred during the BP-24 rate period. Bonneville incurs oversupply costs pursuant to the Oversupply Management Protocol, Attachment P of Bonneville's Tariff.

Pursuant to Section 1010.4(b)(8) of the Rules of Procedure, the Administrator directs the Hearing Officer to exclude from the record all argument, testimony, or other evidence that seeks in any way to address the terms of the Oversupply Management Protocol; whether the Oversupply Management Protocol complies with orders of the Commission; and whether Bonneville took all actions to avoid using the Oversupply Management Protocol, including the payment of negative prices to generators outside of Bonneville's balancing authority area. This exclusion does not extend to issues concerning the rates for recovering the costs of the Oversupply Management Protocol.

#### 12. Market Initiatives and Regional Carbon Policies

Bonneville is engaged in a number of market initiatives that are outside of the scope of this proceeding. These include (1) the Western Energy Imbalance Market (EIM), which is an extension of the California Independent System Operator's (CAISO) real-time market; (2) the Western Resource Adequacy Program (WRAP); and (3) regional cap and trade policies.

Pursuant to Section 1010.4(b)(8) of the Rules of Procedure, the Administrator directs the Hearing Officer to exclude from the record all argument, testimony, or other evidence that seeks in any way to raise or revisit Bonneville's decision to join the EIM, the WRAP, or review or address Bonneville's position on regional cap and trade policies. This exclusion does not extend to issues concerning rate incentives and the recovery or distribution of EIM-related, carbon-related, and WRAP-related costs or credits, which are within the scope of the BP-24 proceeding.

#### 13. Potential Environmental Impacts, Biological Constraints, and Related Operations

Environmental impacts are addressed in a National Environmental Policy Act

(NEPA) process Bonneville conducts concurrent with the rate proceeding. *See* Section II.B of this notice. In addition, biological constraints on hydropower operations are determined outside of the rate case through processes such as intra-agency consultations under the Endangered Species Act, 16 U.S.C. 1536(a)(2). Finally, implementation of the decision regarding operations, maintenance and configuration (management) of the Columbia River System evaluated in the Columbia River System Operations Environmental Impact Statement (CRSO EIS) and associated joint ROD with the U.S. Army Corps of Engineers and Bureau of Reclamation, and associated biological opinions, court orders, and other agreements, are also not issues to be addressed in this proceeding.

Pursuant to Section 1010.4(a)(8) of Bonneville's Procedures, the Administrator directs the Hearing Officer to exclude from the record all argument, testimony, or other evidence that seeks in any way to address the potential environmental impacts of the rates being developed in this rate proceeding, potential biological effects of operations modeled in the proceeding, the appropriate hydroelectric constraints defined in these environmental compliance processes, or the operations, maintenance, and configuration, (management) assumptions, studies, decisions, or matters addressed in the CRSO EIS or CRSO EIS joint ROD and associated biological opinions, court orders, and other agreements.

#### B. The National Environmental Policy Act

Bonneville is in the process of assessing the potential environmental effects of its proposed power and transmission rate adjustments, consistent with NEPA. The NEPA process is conducted separately from the rate proceeding. As discussed above, all evidence and argument addressing potential environmental impacts of the rate adjustments being developed in the BP-24 rate proceeding are excluded from the rate proceeding record. Instead, comments on environmental effects should be directed to the NEPA process.

Based on its most current assessment of the proposed power and transmission rate adjustments, Bonneville believes this proposal may be the type of action typically excluded from further NEPA review pursuant to U.S. DOE NEPA regulations, which apply to Bonneville. More specifically, the proposal appears to solely involve changes to Bonneville's rates and other cost recovery and management mechanisms

to ensure that there are sufficient revenues to meet Bonneville's financial obligations and other costs and expenses, while using existing generation sources operating within normal limits. As such, it appears this rate proposal falls within Categorical Exclusion B4.3, found at 10 CFR part 1021, subpart D, app. B4.3 (2015), which provides for the categorical exclusion from further NEPA review of "[r]ate changes for electric power, power transmission, and other products or services provided by a Power Marketing Administration that are based on a change in revenue requirements if the operations of generation projects would remain within normal operating limits."

Nonetheless, Bonneville is still assessing the proposal, and, depending upon the ongoing environmental review, Bonneville may instead issue another appropriate NEPA document. Comments regarding the potential environmental effects of the proposal may be submitted to Katey Grange, NEPA Compliance Officer, EC-4, Bonneville Power Administration, 905 NE 11th Avenue, Portland, Oregon 97232, and to [kcgrange@bpa.gov](mailto:kcgrange@bpa.gov). Any such comments received by the comment deadline for Participant Comments identified in Section III.A of this notice will be considered by Bonneville's NEPA compliance staff in the NEPA process that is being conducted for this proposal.

### Part III—Public Participation in BP-24

#### A. Distinguishing Between "Participants" and "Parties"

Bonneville distinguishes between "participants in" and "parties to" the BP-24 proceeding. Separate from the formal hearing process, Bonneville will receive written comments, views, opinions, and information from participants who may submit comments without being subject to the duties of, or having the privileges of, parties. Participants are not entitled to participate in the prehearing conference; may not cross-examine parties' witnesses, seek discovery, or serve or be served with documents; and are not subject to the same procedural requirements as parties. Bonneville customers whose rates are subject to this proceeding, or their affiliated customer groups, may not submit participant comments. Members or employees of organizations that have intervened in the proceeding may submit participant comments as private individuals (that is, not speaking for their organizations) but may not use the comment

procedures to address specific issues raised by their intervenor organizations.

Written comments by participants will be included in the record and considered by the Administrator if they are received by Friday, December 9, 2022. Participants should submit comments through Bonneville's website at [www.bpa.gov/comment](http://www.bpa.gov/comment) or by hard copy to: BPA Public Involvement, DKE-7, Bonneville Power Administration, P.O. Box 3621, Portland, Oregon 97208. All comments should contain the designation "BP-24" in the subject line.

### B. Interventions

Any entity or person intending to become a party in the BP-24 proceeding must file a petition to intervene through Bonneville's secure website (<https://ratecase.bpa.gov/>). A first-time user of Bonneville's secure website must create a user account to submit an intervention. Returning users may request access to the BP-24 proceeding through their existing accounts, and may submit interventions once their permissions have been updated. The secure website contains a link to the user guide, which provides step-by-step instructions for creating user accounts, generating filing numbers, submitting filings, and uploading interventions. Please contact the Hearing Coordinator via email at [cwgriffen@bpa.gov](mailto:cwgriffen@bpa.gov) or, if the question is time-sensitive, via telephone at (503) 230-5107, with any questions regarding the submission process.

All petitions to intervene must be submitted through the BP-24 proceeding secure website by the deadline established in the procedural schedule. Late interventions are strongly disfavored. Petitions to intervene must conform to the format and content requirements in Sections 1010.6 and 1010.11 of Bonneville's Rules of Procedure. Petitions must state the name and address of the entity or person requesting party status and the entity or person's interest in the hearing.

The Hearing Officer will rule on all petitions to intervene. Bonneville customers and affiliated customer groups will be granted intervention based on petitions filed in conformance with the Rules of Procedure. Other petitioners must explain their interests in sufficient detail to permit the Hearing Officer to determine whether the petitioners have a relevant interest in the hearing.

Bonneville or any party may oppose a petition to intervene. The deadline for opposing a timely petition to intervene is two business days after the deadline for filing the petition. Opposition to an untimely petition to intervene must be

filed within two business days after service of the petition.

### C. Developing the Record

The hearing record will include, among other things, the transcripts of the hearing, written evidence and argument entered into the record by Bonneville and the parties, written comments from participants, and other material accepted into the record by the Hearing Officer. The Hearing Officer will review and certify the record to the Administrator for final decision.

The Administrator will develop final rates based on the record and such other materials and information as may have been submitted to or developed by the Administrator. The Final ROD will be made available to all parties. Bonneville will file its rates with the Commission for confirmation and approval after issuance of the Final ROD.

## Part IV—Summary of Rate Proposals

Bonneville is proposing power and transmission rates for FY 2024–25 that are consistent with the terms of the BP-24 Rates Settlement.

### A. Summary of the Power Rate Proposal

Bonneville is proposing four primary rates for Federal power sales and services, along with general rate schedule provisions to implement such rates.

#### 1. Priority Firm Power Rate (PF-24)

The PF rate schedule applies to sales of firm power to public body, cooperative, and Federal agency customers to meet their requirements pursuant to Section 5(b) of the Northwest Power Act. The PF Public rate applies to the sale of Firm Requirements Power under CHWM contracts with customers taking Load Following, Block, or Slice/Block service. Consistent with the TRM, Tier 1 rates include three charges: (1) customer charges, (2) a demand charge, and (3) a load shaping charge. In addition, two Tier 2 Short-Term rates are proposed, the Short-Term and Load Growth rates. These rates would be applicable to customers that have elected to purchase power from Bonneville for service to their Above-RHWM Load.

The proposed average Tier 1 non-Slice product rate impact, which represents the majority of Bonneville's power sales, is flat relative to BP-22. The overall average PF Tier 1 rate impact that includes the Slice and non-Slice products will be a slight decrease relative to BP-22. Customer-specific results will vary around these average impacts, with some customers experiencing higher rate impacts and

some lower rate impacts, based on the specific situation of a particular customer.

The Base PF Exchange rate and its associated surcharges apply to sales pursuant to Residential Purchase and Sale Agreements and Residential Exchange Program Settlement Implementation Agreements with regional utilities that participate in the REP established under Section 5(c) of the Northwest Power Act, 16 U.S.C. 839c(c). The Base PF Exchange rate establishes the threshold for participation in the REP; only utilities with ASCs above the appropriate Base PF Exchange rate may receive REP benefits. If a utility meets the threshold, a utility-specific PF Exchange rate will be established in this proceeding for each eligible utility. The utility-specific PF Exchange rate is used in calculating the REP benefits each REP participant will receive during FY 2024–2025.

The proposed PF-24 rate schedule also includes resource support services rates for customers with non-Federal resources, and a melded PF rate for Public customers that have elected power sales contracts other than CHWM contracts for firm requirements service.

#### 2. New Resource Firm Power Rate (NR-24)

The NR-24 rate applies to firm power sales to investor-owned utilities (IOUs) to meet their net requirements pursuant to Section 5(b) of the Northwest Power Act. The NR-24 rate is also applied to sales of firm power to Public customers when this power is used to serve new large single loads. In addition, the NR rate schedule includes rates for services to support Public customers serving new large single loads with non-Federal resources. In the BP-24 Initial Proposal, Bonneville is forecasting no power sales at the NR rate.

#### 3. Industrial Firm Power Rate (IP-24)

The IP rate is applicable to firm power sales to DSI customers authorized by Section 5(d)(1)(A) of the Northwest Power Act, 16 U.S.C. 839c(d)(1)(A). In the BP-24 Initial Proposal, Bonneville is forecasting sales to one DSI customer at the IP rate.

#### 4. Firm Power and Surplus Products and Services Rate (FPS-24)

The FPS rate schedule is applicable to sales of various surplus power products and surplus transmission capacity for use inside and outside the Pacific Northwest. The rates for these products are negotiated between Bonneville and the purchasers. The FPS-24 rate schedule also includes rates for customers with non-Federal resources;

the Unanticipated Load Service rate; rates for other capacity, energy, and scheduling products and services; rates for reserve services for use outside the Bonneville balancing authority area; and real power losses rates for customers that elect financial settlement of real power losses. Bonneville is proposing a new FPS rate, the Firm Water Transition Power rate that would be applicable to specific Slice customers to help transition them to Bonneville's recently adopted 30-water year and 10th percentile metrics for forecasting firm output.

#### 5. Power General Rate Schedule Provisions (GRSPs)

The Power GRSPs include general rate schedule terms and conditions applicable to Bonneville's power rates. In addition, the Power GRSPs contain special rate adjustments, charges, credits, and pass-through mechanisms for specific events and customer circumstances. Among other matters covered by the Power GRSPs are provisions related to calculating rates, resource support services, charges associated with transfer service, risk adjustments, Slice True-up, the Residential Exchange Program, conservation, payment options, and other charges. Bonneville is proposing two new GRSPs: the Washington Cap-and-Invest Program Charge that would be applicable if Bonneville becomes a First Jurisdictional Deliverer in this program; and a Resource Adequacy Service credit and charge that would be applicable if Bonneville begins participation in a binding season in the Western Resource Adequacy Program under certain defined conditions. Bonneville is also proposing a change in the market index it uses for various services and rates as well as proposing the addition of a rate cap on the Unauthorized Increase Charge.

#### B. Summary of the Transmission Rate Proposal

Bonneville is proposing to extend the current (BP-22) transmission rate levels for the FY 2024–25 rate period, pursuant to the BP-24 Rates Settlement. Bonneville is proposing separate transmission rates for its Network segment, intertie segments, ancillary and control area services, and for various specific purposes.

##### 1. Network Rates

The Network Integration Transmission Rate (NT-24) applies to customers taking network integration service, which allows customers to flexibly serve retail load.

The Point-to-Point Rate (PTP-24) is a contract demand rate that applies to customers taking Point-to-Point service on Bonneville's network. Point-to-Point service provides customers with service from identified points of receipt to identified points of delivery. There are separate rates for long-term firm service, and various increments of firm and non-firm short-term service.

The Formula Power Transmission Rate (FPT-24.1) is based on the cost of using specific types of facilities, including a distance component for the use of transmission lines, and is charged on a contract demand basis.

##### 2. Intertie Rates

The Southern Intertie Rate (IS-24) is a contract demand rate that applies to customers taking Point-to-Point service on the Southern Intertie.

The Montana Intertie Rate (IM-24) applies to customers taking Point-to-Point service on the Eastern Intertie and that are not parties to the Montana Intertie Agreement.

The Townsend-Garrison Transmission Rate (TGT-24) applies to parties to the Montana Intertie Agreement taking firm service over Bonneville's section of the Montana Intertie.

The Eastern Intertie Rate (IE-24) applies to parties to the Montana Intertie Agreement taking non-firm service on the portion of the Eastern Intertie capacity that exceeds Bonneville's firm transmission rights.

##### 3. Other Transmission Rates and General Rate Schedule Provisions

The Use-of-Facilities Rate (UFT-24) establishes a formula rate for the use of a specific facility based on the annual cost of that facility.

The Advance Funding Rate (AF-24) allows Bonneville to collect the capital and related costs of specific facilities through an advance-funding mechanism.

The Regional Compliance Enforcement and Regional Coordinator rate (RC-24) recovers costs assessed to Bonneville for regional reliability compliance monitoring, enforcement, and reliability coordination services.

The Oversupply Rate (OS-24) recovers the costs Bonneville incurs to displace generation under the Oversupply Management Protocol, Attachment P to Bonneville's Tariff.

Other proposed transmission rates and charges include: a Utility Delivery Charge for the use of low-voltage delivery substations; a Reservation Fee for customers that postpone the service commencement date of transmission service; incremental cost rates for transmission service requests that

require new facilities; a penalty charge for failure to comply with dispatch, curtailment, redispatch, or load shedding orders; an Unauthorized Increase Charge for use of the transmission system in excess of contracted-for demand; and rate adjustment mechanisms consistent with Bonneville's Financial Policies.

Bonneville's proposes two new charges associated with real power loss returns. First, Bonneville is proposing a charge to settle loss imbalances associated with in-kind loss returns. In addition, the Invalid Loss Return penalty charge is proposed to replace the Financial for Inaccuracy penalty charge in the current rate schedules and incent accurate and timely return of in-kind loss return obligations.

#### 4. Ancillary Service and Control Area Service Rates

The BP-24 Transmission Rates Proposal includes rates for Bonneville's Ancillary and Control Area Services, along with certain updates to those rates and new rates. Bonneville proposes two new rates and certain changes to existing rates to support its participation in the EIM.

The EIM Contingency Rate is a new rate Bonneville is proposing to apply under temporary EIM contingency events that require corrective action. This rate would allow the EIM market operator to settle using an alternative pricing index when EIM pricing is unavailable.

Bonneville is proposing a new rate to recover credits and charges for the Flexible Ramping Product associated with EIM participation. Bonneville did not previously recover these credits and charges in rates.

Bonneville proposes to remove or revise certain provisions of the rate schedules that were adopted in the BP-22 rate proceeding to account for the mid-rate period transition to the Western EIM.

#### D. Risk Mitigation Tools

Bonneville is proposing three rate adjustment mechanisms for BP-24 power and transmission rates, primarily to buffer against poor financial performance over the rate period and protect the agency's solvency and strong credit rating. These mechanisms implement Bonneville's Financial Reserves Policy (FRP) and provide for adjustments to a business line's rates or other action in the event the business line's financial reserves for risk (Financial Reserves) fall below or exceed certain thresholds.

The Cost Recovery Adjustment Clause (CRAC) will adjust rates upward to

generate additional revenue within the rate period if business line Financial Reserves fall below a defined lower threshold.

The Financial Reserves Policy Surcharge (FRP Surcharge) will also adjust rates upward to generate additional revenue within the rate period if business line Financial Reserves fall below a defined lower threshold.

Finally, the Reserves Distribution Clause (RDC) will trigger if Financial Reserves exceed upper thresholds for the business line and the agency as a whole. If the RDC triggers, Bonneville will consider the amount of Financial Reserves above the threshold for rate relief or investment in high-value, business line-specific purposes such as debt retirement.

Bonneville is proposing certain revisions in the three risk adjustment clauses. First, for FY 2024, the three Power risk adjustment clauses will not be applicable to the portion of a customer's service at PF Tier 1 rates that has been converted from a Slice product to a non-Slice product beginning October 1, 2023. However, the three risk adjustment clauses will apply to such customer's entire service at PF Tier 1 rates for FY 2025. Second, any FY 2024 or 2025 Power RDC will automatically provide a dividend distribution in an amount equal to the lesser of the RDC amount and the amount of Planned Net Revenues for Risk included in the BP-24 power rates. And third, the caps on the Power and Transmission RDCs are removed for the BP-24 rate period, FY 2024–2025.

### Part V—Proposed BP-24 Power Rate Schedules and BP-24 Transmission Rates Schedules

Bonneville's proposed BP-24 Power Rate Schedules and BP-24 Transmission Rate Schedules, which includes Transmission, Ancillary, and Control Area Services Rate Schedules, are a part of this notice and are available for viewing and downloading on Bonneville's website at <https://www.bpa.gov/goto/BP24>. The BP-24 Rates Settlement agreement is also posted at this website.

### Signing Authority

This document of the Department of Energy was signed on November 8, 2022, by John L. Hairston, Administrator and Chief Executive Officer of the Bonneville Power Administration, pursuant to delegated authority from the Secretary of Energy. This document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on November 15, 2022.

**Treena V. Garrett,**

*Federal Register Liaison Officer, U.S. Department of Energy.*

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

[Docket No. AD21–15–000]

### Joint Federal-State Task Force on Electric Transmission; Supplemental Notice of Meeting

As first announced in the Commission's September 8, 2022 Notice<sup>1</sup> in the above-captioned docket, the next public meeting of the Joint Federal-State Task Force on Electric Transmission (Task Force) will be held on November 15, 2022, at the New Orleans Marriott in New Orleans, LA, from approximately 8:00 a.m. to 10:30 a.m. Central time. Commissioners may attend and participate in this meeting. Attached to this Notice is an agenda for the meeting.

The meeting will be open to the public for listening and observing and on the record. There is no fee for attendance and registration is not required. The public may attend in person or via Webcast.<sup>2</sup> This conference will be transcribed. Transcripts will be available for a fee from Ace Reporting, 202–347–3700.

Discussions at the meeting may involve issues raised in proceedings that are currently pending before the Commission. These proceedings include, but are not limited to:

Southwest Power Pool, Inc .....  
Southwest Power Pool, Inc .....  
Public Service Company of New Mexico .....  
Public Service Company of New Mexico .....  
Idaho Power Company .....  
PacifiCorp .....  
Public Service Company of Colorado .....  
Puget Sound Energy, Inc .....  
Puget Sound Energy, Inc .....  
PPL Electric Utilities Corporation .....

Docket No. ER23–72–000.  
Docket No. EL22–70–000.  
Docket No. ER22–2158–001.  
Docket No. EL22–40–000.  
Docket No. EL22–37–000.  
Docket Nos. EL22–38–000, EL22–38–001.  
Docket No. EL22–39–000.  
Docket No. EL22–41–000.  
Docket No. ER23–22–000.  
Docket No. ER22–2719–000.

Commission conferences are accessible under section 508 of the Rehabilitation Act of 1973. For accessibility accommodations, please send an email to [accessibility@ferc.gov](mailto:accessibility@ferc.gov) or call toll free 1–866–208–3372 (voice) or 202–208–8659 (TTY), or send a fax to

202–208–2106 with the required accommodations.

More information about the Task Force, including frequently asked questions, is available here: <https://www.ferc.gov/TFSOET>. For more information about this meeting, please contact: Gretchen Kershaw, 202–502–

8213, [gretchen.kershaw@ferc.gov](mailto:gretchen.kershaw@ferc.gov); or Jennifer Murphy, 202–898–1350, [jmurphy@naruc.org](mailto:jmurphy@naruc.org). For information related to logistics, please contact Benjamin Williams, 202–502–8506, [benjamin.williams@ferc.gov](mailto:benjamin.williams@ferc.gov); or Rob Thormeyer, 202–502–8694, [robert.thormeyer@ferc.gov](mailto:robert.thormeyer@ferc.gov).

<sup>1</sup> Joint Fed.-State Task Force on Elec. Transmission, Notice, Docket No. AD21–15–000 (issued Sept. 8, 2022).

<sup>2</sup> A link to the Webcast will be available on the day of the event at <https://www.ferc.gov/TFSOET>.

Dated: November 14, 2022.

### Federal Energy Regulatory Commission

#### Combined Notice of Filings #1

Take notice that the Commission received the following electric corporate filings:

*Docket Numbers:* EC23-26-000.

*Applicants:* EdSan 1B Group 1 Edwards, LLC, EdSan 1B Group 1 Sanborn, LLC, EdSan 1B Group 2, LLC, EdSan 1B Group 3, LLC, Daylight I, LLC, Edwards Solar Line I, LLC, Sanborn Solar Line I, LLC, Axiom ES Holdings LLC.

*Description:* Joint Application for Authorization Under Section 203 of the Federal Power Act of EdSan 1B Group 1 Edwards, LLC, et al.

*Filed Date:* 11/10/22.

*Accession Number:* 20221110-5246.

*Comment Date:* 5 p.m. ET 12/27/22.

Take notice that the Commission received the following exempt wholesale generator filings:

*Docket Numbers:* EG23-23-000.

*Applicants:* AES Kuihelani Solar, LLC.

*Description:* AES Kuihelani Solar, LLC submits Notice of Self-Certification of Exempt Wholesale Generator Status.

*Filed Date:* 11/14/22.

*Accession Number:* 20221114-5069.

*Comment Date:* 5 p.m. ET 12/5/22.

Take notice that the Commission received the following electric rate filings:

*Docket Numbers:* ER10-2374-015; ER22-2649-000; ER17-2059-009; EL22-57-000.

*Applicants:* Puget Sound Energy, Inc., Puget Sound Energy, Inc., Puget Sound Energy, Inc., Puget Sound Energy, Inc.

*Description:* Refund Report of Puget Sound Energy, Inc. et al.

*Filed Date:* 11/10/22.

*Accession Number:* 20221110-5266.

*Comment Date:* 5 p.m. ET 12/1/22.

*Docket Numbers:* ER23-273-001.

*Applicants:* Wisconsin Public Service Corporation.

*Description:* Tariff Amendment: Amendment to Revisions to the AS Tariff for Reactive Supply Service to be effective 1/1/2023.

*Filed Date:* 11/14/22.

*Accession Number:* 20221114-5248.

*Comment Date:* 5 p.m. ET 12/5/22.

*Docket Numbers:* ER23-415-000.

*Applicants:* Idaho Power Company.

*Description:* Compliance filing: Interconnection Study Metric Report to be effective N/A.

*Filed Date:* 11/14/22.

*Accession Number:* 20221114-5004.

*Comment Date:* 5 p.m. ET 12/5/22.

*Docket Numbers:* ER23-416-000.

*Applicants:* PJM Interconnection, L.L.C.

*Description:* § 205(d) Rate Filing: Original NSA, Service Agreement No. 6703; Queue Nos. AB2-077/AB2-078/AB2-079 to be effective 10/12/2022.

*Filed Date:* 11/14/22.

## ENVIRONMENTAL PROTECTION AGENCY

**[EPA–HQ–OPP–2021–0083; FRL–9409–07–OCSPP]**

### Pesticide Product Registration; Receipt of Applications for New Active Ingredients October 2022

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** EPA has received applications to register pesticide products containing active ingredients not included in any currently registered pesticide products. Pursuant to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), EPA is hereby providing notice of receipt and opportunity to comment on these applications.

**DATES:** Comments must be received on or before December 19, 2022.

**ADDRESSES:** Submit your comments, identified by docket identification (ID) number EPA–HQ–OPP–2021–0083, through the *Federal eRulemaking Portal* at <https://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Additional instructions on commenting and visiting the docket, along with more information about dockets generally, is available at <https://www.epa.gov/dockets>.

**FOR FURTHER INFORMATION CONTACT:** Charles Smith, Biopesticides and Pollution Prevention Division (BPPD) (7511M), main telephone number: (202) 566–1400, email address:

[BPPDFRNotices@epa.gov](mailto:BPPDFRNotices@epa.gov). The mailing address is Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460-0001. As part of the mailing address, include the contact person's name, division, and mail code.

#### **SUPPLEMENTARY INFORMATION:**

### **I. General Information**

#### *A. Does this action apply to me?*

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).

#### *B. What should I consider as I prepare my comments for EPA?*

1. *Submitting CBI.* Do not submit this information to EPA through [regulations.gov](https://www.regulations.gov) or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at <https://www.epa.gov/dockets/commenting-epa-dockets>.

### **II. Registration Applications**

EPA has received applications to register pesticide products containing active ingredients not included in any currently registered pesticide products. Pursuant to the provisions of FIFRA section 3(c)(4) (7 U.S.C. 136a(c)(4)), EPA is hereby providing notice of receipt and opportunity to comment on these applications. Notice of receipt of these applications does not imply a decision by the Agency on these applications.

For actions being evaluated under EPA's public participation process for registration actions, there will be an additional opportunity for public comment on the proposed decisions. Please see EPA's public participation website for additional information on this process (<https://www.epa.gov/pesticide-registration/participation-process-registration-actions>).

## EXPORT-IMPORT BANK

[Public Notice EIB–2022–0020]

### Application for Final Commitment for a Long-Term Loan or Financial Guarantee in Excess of \$100 Million: AP089351XX

**AGENCY:** Export-Import Bank of the United States.

**ACTION:** Notice.

**SUMMARY:** This Notice is to inform the public, in accordance with the Export-Import Bank Act of 1945, as amended, the Export-Import Bank of the United States (“EXIM”) has received an application for final commitment for a long-term loan or financial guarantee in excess of \$100 million. Comments received within the comment period specified below will be presented to the EXIM Board of Directors prior to final action on this Transaction.

Comments received within the comment period specified below will be presented to the EXIM Board of Directors prior to final action on this Transaction.

**DATES:** Comments must be received on or before December 13, 2022 to be assured of consideration before final consideration of the transaction by the Board of Directors of EXIM.

**ADDRESSES:** Comments may be submitted through *Regulations.gov* at *WWW.REGULATIONS.GOV*. To submit a comment, enter EIB–2022–0020 under the heading “Enter Keyword or ID” and select Search. Follow the instructions provided at the Submit a Comment screen. Please include your name, company name (if any) and EIB–2022–0020 on any attached document.

### SUPPLEMENTARY INFORMATION:

*Reference:* AP089351XX.

*Purpose and Use:*

Brief description of the purpose of the transaction: The U.K. obligor is seeking EXIM financing to cover the procurement of two U.S. rocket launches and U.S. brokered launch and initial in-orbit insurance services to support the deployment of two communication satellites.

Brief non-proprietary description of the anticipated use of the items being exported: The U.K. obligor will use the U.S. rocket launches and U.S. brokered insurance services to deploy two

communications satellites that will provide satellite connectivity for fixed and mobile services.

To the extent that EXIM is reasonably aware, the item(s) being exported are not expected to produce exports or provide services in competition with the exportation of goods or provision of services by a United States industry.

**Parties:**

**Principal Suppliers:** Space Exploration Technologies Corp, United Launch Services LLC and Aon International Space Brokers, a division of Aon Risk Services Inc. of Washington, DC.

**Obligor:** Viasat Technologies Ltd.

**Guarantor(s):** Viasat Inc.

**Description of Items Being Exported:** Launch Services and Insurance Services.

**Information on Decision:** Information on the final decision for this transaction will be available in the "Summary Minutes of Meetings of Board of Directors" on <http://exim.gov/newsandevents/boardmeetings/board/>.

**Confidential Information:** Please note that this notice does not include confidential or proprietary business information; information which, if disclosed, would violate the Trade Secrets Act; or information which would jeopardize jobs in the United States by supplying information that competitors could use to compete with companies in the United States.

## FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060-0095; FR ID 114444]

### Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority

**AGENCY:** Federal Communications Commission.

**ACTION:** Notice and request for comments.

**SUMMARY:** As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this

opportunity to comment on the following information collections. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

**DATES:** Written comments shall be submitted on or before January 17, 2023. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, you should advise the contacts below as soon as possible.

**ADDRESSES:** Direct all PRA comments to Cathy Williams, FCC, via email: [PRA@fcc.gov](mailto:PRA@fcc.gov) and to [Cathy.Williams@fcc.gov](mailto:Cathy.Williams@fcc.gov).

**FOR FURTHER INFORMATION CONTACT:** For additional information about the information collection, contact Cathy Williams at (202) 418-2918.

**SUPPLEMENTARY INFORMATION:**

*OMB Control Number:* 3060-0095.

*Title:* Multi-Channel Video Programming Distributors Annual Employment Report, FCC Form 395-A.

*Form Number:* FCC Form 395-A.

*Type of Review:* Extension of currently approved collection.

*Respondents:* Business or other for-profit entities; Not for profit institutions

*Number of Respondents and Responses:* 2,500 respondents; 2,500 responses.

*Estimated Time per Response:* One hour.

*Frequency of Response:* Recordkeeping requirement and annual reporting requirement.

*Total Annual Burden:* 2,500 hours.

*Total Annual Cost:* No cost.

*Obligation to Respond:* Required to obtain or retain benefits. The statutory authority for this collection is contained in Section 154(i) and 634 of the Communications Act of 1934, as amended.

*Needs and Uses:* FCC Form 395-A, "The Multi-Channel Video Programming Distributor Annual Employment Report," is a data collection device used to assess industry employment trends and provide reports to Congress. The report identifies employees by gender and race/ethnicity in sixteen job categories. FCC Form 395-A contains a grid which collects data on full and part-time employees and requests a list of employees by job title, indicating the job category and full or part-time status of the position. Every cable entity with 6 or more full-time employees and all Satellite Master Antenna Television Systems (SMATV) serving 50 or more subscribers and having 6 or more full-time employees must complete Form 395-A in its entirety and file it by September 30 each year. However, cable entities with 5 or fewer full-time employees are not required to file but if they do, they need to complete and file only Sections I, II and VIII of the FCC Form 395-A, and thereafter need not file again unless their employment increases.

On June 4, 2004, the FCC released the Third Report and Order and Fourth Notice of Proposed Rulemaking (3rd R&O), In the *Matter of Review of the Commission's Broadcast and Cable Equal Employment Opportunity Rules and Policies*, MM Docket No. 98-204, FCC 04-103, in which it considers issues relating to the Annual Employment Report forms, including FCC Form 395-A, "The Multi-Channel Video Programming Distributor Annual Employment Report." In the 3rd R&O, the Commission is adopting revised rules for MVPDs to file FCC Form 395-A, which cable and other MVPDs will use to file annual employment reports. The intent of this 3rd R&O is to update rules for MVPDs to file Form 395-A consistent with new rules adopted in the 2nd R&O. The intent of the Fourth Notice of Proposed Rulemaking is to provide time for cable and other MVPDs and the public to address the issue of whether the Commission should keep these forms confidential after they are filed.

Federal Communications Commission.

**Marlene Dortch,**

*Secretary, Office of the Secretary.*

## GENERAL SERVICES ADMINISTRATION

[Notice—MRB—2022—05; Docket No. GAPFAC 2022—0001; Sequence No. 1]

### GSA Acquisition Policy Federal Advisory Committee; Notification of Upcoming Web-Based Public Subcommittee Meetings

**AGENCY:** Office of Government-wide Policy, General Services Administration (GSA).

**ACTION:** Meeting notice.

**SUMMARY:** Notice of these web-based subcommittee meetings is being provided in accordance with GSA Policy. This notice provides the schedule for a series of web-based meetings for three subcommittees of the GSA Acquisition Policy Federal Advisory Committee (GAP FAC): the Acquisition Workforce Subcommittee, the Industry Partnerships Subcommittee, and the Policy and Practice Subcommittee. It is GSA policy that subcommittee meetings are open for the public to observe. Information on attending and providing written public comment is under the MEETING REGISTRATION section.

**DATES:** The Acquisition Workforce Subcommittee will hold recurring web-based meetings every other Tuesday from December 6, 2022 through September 26, 2023, from 3:00 p.m. to 5:00 p.m., Eastern Standard Time (EST). The Industry Partnerships Subcommittee will hold recurring web-based meetings every other Wednesday from December 7, 2022, through September 27, 2023, from 3:00 p.m. to 5:00 p.m., EST. The Policy and Practice Subcommittee will hold recurring web-based meetings every other Thursday from December 8, 2022, through September 28, 2023, from 3:00 p.m. to 5:00 p.m., EST.

**ADDRESSES:** The meetings will be accessible via webcast. Registrants will receive the webcast information before the meeting.

**FOR FURTHER INFORMATION CONTACT:** Boris Arratia, Designated Federal Officer, Office of Government-wide Policy, 703-795-0816, or email: [boris.arratia@gsa.gov](mailto:boris.arratia@gsa.gov); or Stephanie Hardison, Office of Government-wide Policy, 202-258-6823, or email: [stephanie.hardison@gsa.gov](mailto:stephanie.hardison@gsa.gov). Additional information about the subcommittees and the Committee, including meeting materials and agendas, will be available on-line at <https://gsa.gov/policy-regulations/policy/acquisition-policy/gsa-acquisition-policy-federal-advisory-committee>.

**SUPPLEMENTARY INFORMATION:** The Administrator of GSA established the GAP FAC as a discretionary advisory committee under agency authority in accordance with the provisions of the Federal Advisory Committee Act (FACA), as amended (5 U.S.C. app 2). As America's buyer, GSA is uniquely positioned to enable a modern, accessible, and streamlined acquisition ecosystem and a robust marketplace connecting buyers to the suppliers and businesses that meet their mission needs. The GAP FAC will assist GSA in this endeavor through expert advice on a broad range of innovative solutions to acquisition policy, workforce, and industry partnership challenges.

The GAP FAC will serve as an advisory body to GSA's Administrator on how GSA can use its acquisition tools and authorities to target the highest priority Federal acquisition challenges. The GAP FAC will advise GSA's Administrator on emerging acquisition issues, challenges, and opportunities to support its role as America's buyer. The initial focus for the GAP FAC will be on driving regulatory, policy, and process changes required to embed climate and sustainability considerations in Federal acquisition. This includes examining and recommending steps GSA can take to support its workforce and industry partners in ensuring climate and sustainability issues are fully considered in the acquisition process. To accomplish its work, the GAP FAC established three subcommittees: Policy and Practices, Industry Partnerships, and Acquisition Workforce.

The Policy and Practice Subcommittee will focus on procurement policy that supports robust climate and sustainability action. This group will focus on regulatory, policy, and process changes required to embed climate and sustainability considerations in Federal acquisitions.

The Industry Partnerships Subcommittee will investigate ways to expand a climate focus on Federal acquisition while reinforcing inclusion, domestic sourcing, small business opportunity, and innovation from an Industry standpoint. This includes identifying and addressing gaps in sustainable attributes standards for the goods and services that the Federal government buys.

The Acquisition Workforce Subcommittee will explore ways to advance a culture of sustainability and climate action within the acquisition workforce. This includes equipping and enabling the acquisition workforce to effectively use sustainability as a critical

element in the evaluation and source selection process.

### Purpose of the Meetings

The purpose of these web-based meetings is for the subcommittees to develop recommendations for submission to the full Committee. The Committee will, in turn, deliberate on the subcommittees recommendations and decide whether to proceed with formal advice to GSA based upon them.

### Meeting Agenda

- Opening Remarks
- Subject Matter Experts Presentations
- Subcommittee Member Discussions
- Closing Remarks and Adjourn

### Meeting Registration

The subcommittee meetings are open to the public and will be accessible by webcast. All public attendees will need to register to obtain the meeting webcast information. Registration information is located on the GAP FAC website:

<https://www.gsa.gov/policy-regulations/policy/acquisition-policy/gsa-acquisition-policy-federal-advisory-committee>. All registrants will be asked to provide their name, affiliation, and email address. After registration, individuals will receive webcast access information via email.

### Public Comments

Written public comments are being accepted via <http://www.regulations.gov>, the Federal eRulemaking portal throughout the life of the three Subcommittees. To submit a written public comment, go to <http://www.regulations.gov> and search for GAPFAC—2022—0001. Select the link “Comment Now” that corresponds with this notice. Follow the instructions provided on the screen. Please include your name, company name (if applicable), and “GAPFAC—2022—0001, Notification of Upcoming Web-Based Public Meetings” on your attached document (if applicable).

### Special Accommodations

For information on services for individuals with disabilities, or to request accommodation of a disability, please contact the Designated Federal Officer at least 10 business days prior to the meeting to give GSA as much time as possible to process the request. Live ASL interpreter services will be available.

**Jeffrey A. Koses,**

Senior Procurement Executive, Office of Government-wide Policy.

**BILLING CODE 6820-RV-P**

**GENERAL SERVICES  
ADMINISTRATION****[OMB Control No. 3090–0306; Docket No. 2022–0001; Sequence No. 14]****Submission for OMB Review; General Services Administration Acquisition Regulation; Transactional Data Reporting****AGENCY:** Office of Acquisition Policy, General Services Administration (GSA).**ACTION:** Notice of request for comments regarding an extension to an existing OMB clearance.**SUMMARY:** Under the provisions of the Paperwork Reduction Act, the Regulatory Secretariat Division is submitting a request to the Office of Management and Budget (OMB) to review and approve an extension of a previously approved information collection requirement regarding OMB Control No. 3090–0306, Transactional Data Reporting.**DATES:** Submit comments on or before: December 19, 2022.**ADDRESSES:** Written comments and recommendations for this information collection should be sent within 30 days of publication of this notice to [www.reginfo.gov/public/do/PRAMain](http://www.reginfo.gov/public/do/PRAMain). Find this particular information collection by selecting “Currently under Review—Open for Public Comments”; or by using the search function.**FOR FURTHER INFORMATION CONTACT:** Mr. Thomas O’Linn, Procurement Analyst, General Services Acquisition Policy Division, GSA, 202–445–0390 or email [gsarpolicy@gsa.gov](mailto:gsarpolicy@gsa.gov).**SUPPLEMENTARY INFORMATION:****A. Purpose**

This information collection is for GSA Federal Supply Schedules (FSS) and non-FSS offerors and contractors subject to transactional data report (TDR) requirements. Transactional data encompasses the historical details of the products or services delivered by a contractor during the performance of task or delivery orders issued against a contract subject to TDR requirements. TDR requirements are found within Alternate I of General Services Administration Acquisition Regulation (GSAR) clause 552.238–80, Industrial Funding Fee and Sales Reporting, and

552.216–75, Transactional Data Reporting, GSAR clauses 552.216–70, Economic Price Adjustment—FSS Multiple Award Schedule Contracts (Deviation II); Alternate I of 552.238–81, Price Reductions; 552.238–83 Examination of Records by GSA; and 552.238–85, Contractor’s Billing Responsibilities, are additional GSAR clause directly associated with FSS contracts subject to these requirements. This information collection does not apply to GSA FSS offerors and contractors subject to pricing disclosures and sales reporting requirements. The burden associated with pricing disclosures and sales reporting requirements is covered under information collection OMB control number 3090–0235, Federal Supply Schedule Pricing Disclosures and Sales Reporting.

**B. Annual Reporting Burden**

The total estimated annual public cost burden for this information collection is estimated to be \$18,104,484.46. The total estimated annual public burden hours resulting from this information collection is 281,344 hours. These numbers are calculated by adding up the total estimated annual burden cost/hour for each of the following GSAR clauses covered by this information collection: 552.216–75, Transactional Data Reporting; Alternate I of 552.238–80, Industrial Funding Fee and Sales Reporting; Alternate I of 552.238–81, Price Reductions; 552.216–70, Economic Price Adjustment—FSS Multiple Award Schedule Contracts (Deviation II); 552.238–83, Examination of Records by GSA; and 552.238–85, Contractor’s Billing Responsibilities.

**Burden Cost/Hour Calculation.**

Total estimated burden hour/cost for the basic version of 552.216–75, Transactional Data Reporting, and Alternate I of GSAR clause 552.238–80, Industrial Funding Fee and Sales Reporting.

The two primary activities associated with 552.216–75, Transactional Data Reporting, and Alternate I of GSAR clause 552.238–80, Industrial Funding Fee and Sales Reporting, are initial setup and monthly reporting. The below provides the basis for calculating these two activities.

**Initial Setup**

- Estimated hourly rate & job position equivalency. The estimated hourly cost associated with this task is based on the task being accomplished by senior level personnel equivalent to a GS–14, Step 5 employee. A GS–14, Step 5 employee hourly rate for 2022 is \$82.51 (“Rest of U.S.” locality using OPM Salary Table 2022–GS, Effective January 2022).

- Estimated hours by system for initial set-up. A contractor complying with TDR requirements will absorb a one-time setup burden for purposes of establishing a reporting system (*i.e.*, automated reporting system vs. manual reporting system). The estimated setup time varies between automated and manual reporting systems. GSA estimates the average one-time initial setup burden is 8 hours for a manual system and 240 hours for an automated system.

**Monthly Reporting**

- Estimated hourly rate & job position equivalency. The estimated hourly cost associated with this task is based on the task being accomplished by mid-level personnel equivalent to a GS–12, Step 5 employee. A GS–12, Step 5 employee hourly rate for 2022 is \$58.72 (*i.e.*, using “Rest of U.S.” locality within the OPM Salary Table for 2022–GS, Effective January 2022).

- Categorization of contractors by sales revenue. GSA estimates the likelihood of contractors with lower to no reportable sales will spend relatively little time on reporting. In contrast, contractors with more reportable sales will face a higher reporting burden. To account for this difference, GSA is using the below sale revenue categories:

Category 1: No sales activity/revenue (*i.e.*, \$0.00)

Category 2: Sales between \$0.01 and \$25,000.00

Category 3: Sales between \$25,000.01 and \$250,000.00

Category 4: Sales between \$250,000.01 and \$1 million

Category 5: Sales over \$1 million

The below table show the estimated number of contractors (*i.e.*, both FSS and Non-FSS contractors) by sales revenue category:

**ESTIMATED NUMBER OF FSS AND NON-FSS CONTRACTORS BY SALES REVENUE CATEGORY**

|                  | FSS   | Non-FSS | FSS & non-FSS |
|------------------|-------|---------|---------------|
| Category 1 ..... | 100   | 622     | 722           |
| Category 2 ..... | 500   | 2       | 502           |
| Category 3 ..... | 1,000 | 32      | 1,032         |

## ESTIMATED NUMBER OF FSS AND NON-FSS CONTRACTORS BY SALES REVENUE CATEGORY—Continued

|                  | FSS   | Non-FSS | FSS & non-FSS |
|------------------|-------|---------|---------------|
| Category 4 ..... | 500   | 73      | 573           |
| Category 5 ..... | 672   | 418     | 1,090         |
| Total .....      | 2,822 | 1,147   | 3,969         |

○ Automated system vs. manual reporting system. GSA estimates the likelihood of a contractor creating an automated reporting system increases with a contractor's sales revenue. In

contrast, contractors with little to no sales revenue are unlikely to expend the effort needed to establish an automated reporting system. To account for this difference, GSA is using the below table.

The below table shows by sales revenue category the estimated percentage of the likelihood of a contractor using a manual reporting system vs automated reporting system:

## PERCENTAGE OF CONTRACTORS BY TYPE OF REPORTING SYSTEM

| Sales category   | Manual system (%) | Automated system (%) |
|------------------|-------------------|----------------------|
| Category 1 ..... | 100               | 0                    |
| Category 2 ..... | 100               | 0                    |
| Category 3 ..... | 90                | 10                   |
| Category 4 ..... | 50                | 50                   |
| Category 5 ..... | 10                | 90                   |

The following table show the estimated number of contractors for

both FSS contracts and Non-FSS contracts by type of reporting system:

## ESTIMATED NUMBER OF CONTRACTORS FOR BOTH FSS CONTRACTS AND NON-FSS CONTRACTS BY TYPE OF REPORTING SYSTEM

|                  | Manual system (FSS) | Automated system (FSS) | Manual system (non-FSS) | Automated system (non-FSS) |
|------------------|---------------------|------------------------|-------------------------|----------------------------|
| Category 1 ..... | 100                 | 0                      | 622                     | 0                          |
| Category 2 ..... | 500                 | 0                      | 2                       | 0                          |
| Category 3 ..... | 900                 | 100                    | 29                      | 3                          |
| Category 4 ..... | 275                 | 275                    | 36                      | 37                         |
| Category 5 ..... | 67                  | 605                    | 42                      | 376                        |
| Totals .....     | 1,842               | 980                    | 731                     | 416                        |

○ Estimated monthly reporting time (hours)—by reporting system and sales revenue category. GSA estimates that the monthly reporting time varies by

type of reporting system (*i.e.*, manual or automated) and by respective sales revenue category. The below table shows GSA's estimated monthly

reporting times per sales revenue category and system type:

## MONTHLY HOURS BY TYPE OF REPORTING SYSTEM AND CATEGORY

|                  | Manual systems | Automated systems |
|------------------|----------------|-------------------|
| Category 1 ..... | 0.25           | 2.00              |
| Category 2 ..... | 2.00           | 2.00              |
| Category 3 ..... | 4.00           | 2.00              |
| Category 4 ..... | 16.00          | 2.00              |
| Category 5 ..... | 48.00          | 2.00              |

Total estimated burden hour/cost for GSAR clause 552.216–75, Transactional Data Reporting.

*Initial Setup.*

Total estimated annual burden hours: 28,464

Total estimated annual cost burden: \$2,348,650.03

*Monthly Reporting.*

Total estimated annual burden hours: 44,394

Total estimated annual cost burden: \$2,606,982.16

Total estimated burden hour/cost for Alternate I of GSAR clause 552.238–80, Industrial Funding Fee and Sales Reporting.

*Initial Setup.*

Total estimated annual burden hours: 34,328

Total estimated annual cost burden: \$2,832,506.26

*Monthly Reporting.*

Total estimated annual burden hours: 170,412

Total estimated annual cost burden: \$10,007,231.69

Total estimated annual burden hour/cost for 552.216–70, Economic Price Adjustment—FSS Multiple Award Schedule Contracts (Deviation II).

Estimated # of responses per year: 461  
Estimated burden hours per response: × 4.25

Total estimated annual burden hours: 1,959.25

Estimated cost per hour: × \$82.51  
Total estimate annual cost burden: \$161,663.60

Total estimated annual burden hour/cost for Alternate I of GSAR clause 552.238–81, Price Reductions.

Estimated # of responses per year: 25  
Estimated burden hours per response: × 4.25

Total estimated annual burden hours: 106

Estimated cost per hour\*: × \$82.51  
Total estimate annual cost burden: \$8,775.00

Total estimated annual burden hour/cost for GSAR clause 552.238–83, Examination of Records by GSA.  
Estimated # of respondents per year: 8  
Estimated burden hours per respondent: × 455

Total estimated annual burden hours: 3,640

Estimated cost per hour\*: × \$82.51  
Total estimated annual cost burden: \$300,347.32

Total estimated annual burden hour/cost for GSAR clause 552.238–85, Contractor's Billing Responsibilities, is 0 burden hours/\$0.00 burden cost. The reason for zero burden being associated with this clause is because the record keeping requirement contained in this clause does not add any additional burden to what is already captured by Alternate I of GSAR clause 552.238–80, Industrial Funding Fee and Sales Reporting, which is covered by this information collection.

*Total Estimated Annual Burden Hour/Cost*

The total estimated annual burden hour/cost imposed by this information collection is as follows:

*Total estimated annual burden hours*  
FSS contracts: 210,446

Non-FSS contracts: 72,858

Total estimated annual burden hour: 281,344

*Total estimated annual cost burden*  
FSS contracts: \$13,310,515.87

Non-FSS contracts: \$4,955,632.19

Total estimated annual cost burden: \$18,104,484.46

**C. Public Comments**

A 60-day notice published in the **Federal Register** at 87 FR 51418 on August 22, 2022. In response, GSA received a letter from the Coalition for Government Procurement (the Coalition). The following is a summary of the letter:

*1. Comment:* The Coalition supports the TDR program and generally agrees with GSA's assessment of the burden associated with the renewal of this information collection.

*Response:* GSA appreciates the Coalition's support of the TDR program and its assessment of the burden for this renewal.

*2. Comment:* The Coalition believes GSA underestimates the average burden of automated reporting in both absolute time required and the complexity of the process. Specifically, the Coalition believes the estimated burden for automated reporting should be 10 hours.

*Response:* GSA believes the estimated hours for automated reporting is valid given TDR imposes a progressive burden—one that increases with a contractor's sales volume. Namely, reporting time increases with a contractor's applicable sales volume, so contractors with lower to no reportable sales will spend little time on monthly reporting, while those contractors with more reportable sales may have a higher reporting burden, such as the suggested 10 hours.

*3. Comment:* The Coalition recommends GSA expand the use of TDR as an option across the MAS Program and provide further guidance and training on the use of TDR data.

*Response:* GSA anticipates expanding the use of TDR as an option across the MAS program as well as providing any additional guidance and training as part of any such expansion.

*Obtaining Copies of Proposals:* Requesters may obtain a copy of the information collection documents from the GSA Regulatory Secretariat Division, by calling 202–501–4755 or emailing [GSARegSec@gsa.gov](mailto:GSARegSec@gsa.gov). Please cite "Information Collection 3090–0306,

Transactional Data Reporting", in all correspondence.

**Jeffrey A. Koses,**

BILLING CODE 6820–61–P

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**Agency for Healthcare Research and Quality**

**Agency Information Collection Activities: Proposed Collection; Comment Request**

**AGENCY:** Agency for Healthcare Research and Quality, HHS.

**ACTION:** Notice.

**SUMMARY:** This notice announces the intention of the Agency for Healthcare Research and Quality (AHRQ) to request that the Office of Management and Budget (OMB) reapprove the proposed information collection project: "*Medical Expenditure Panel Survey—Insurance Component*."

This proposed information collection was previously published in the **Federal Register** on September 6th, 2022 and allowed 60 days for public comment. AHRQ received no substantive comments from members of the public during this period. The purpose of this notice is to allow an additional 30 days for public comment.

**DATES:** Comments on this notice must be received by December 19, 2022.

**ADDRESSES:** Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to [www.reginfo.gov/public/do/PRAMain](http://www.reginfo.gov/public/do/PRAMain). Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

**FOR FURTHER INFORMATION CONTACT:**

Doris Lefkowitz, AHRQ Reports Clearance Officer, (301) 427–1477, or by email at [doris.lefkowitz@ahrq.hhs.gov](mailto:doris.lefkowitz@ahrq.hhs.gov).

**SUPPLEMENTARY INFORMATION:**

**Proposed Project**

*Medical Expenditure Panel Survey—Insurance Component*

In 2021 employer-sponsored health insurance was the source of coverage for 90.5 million current and former workers, plus many of their family members, and is a cornerstone of the U.S. health care system. The Medical

Expenditure Panel Survey—Insurance Component (MEPS–IC) measures the extent, cost, and coverage of employer-sponsored health insurance on an annual basis. These statistics are produced at the National, State, and sub-State (metropolitan area) level for private industry. Statistics are also produced for State and Local governments.

This research has the following goals:

(1) to provide data for Federal policymakers evaluating the effects of National and State health care reforms.

(2) to provide descriptive data on the current employer-sponsored health insurance system and data for modeling the differential impacts of proposed health policy initiatives.

(3) to supply critical State and National estimates of health insurance spending for the National Health Accounts and Gross Domestic Product.

This study is being conducted by AHRQ through the Bureau of the Census, pursuant to AHRQ's statutory authority to conduct and support research on healthcare and on systems for the delivery of such care, including activities with respect to the cost and use of health care services and with respect to health statistics and surveys. 42 U.S.C. 299a(a)(3) and (8); 42 U.S.C. 299b–2.

#### Method of Collection

To achieve the goals of this project the following data collections for both private sector and state and local government employers will be implemented:

(1) Prescreener Questionnaire—The purpose of the Prescreener Questionnaire, which is collected via telephone, varies depending on the insurance status of the establishment contacted (establishment is defined as a single, physical location in the private sector and a governmental unit in state and local governments). For establishments that do not offer health insurance to their employees, the prescreener is used to collect basic information such as number of employees. Collection is completed for these establishments through this telephone call. For establishments that do offer health insurance, contact name and address information is collected that is used for the mailout of the establishment and plan questionnaires. Obtaining this contact information helps ensure that the questionnaires are directed to the person in the establishment best equipped to complete them.

(2) Establishment Questionnaire—The purpose of the mailed Establishment Questionnaire is to obtain general information from employers that provide health insurance to their employees. Information such as total active enrollment in health insurance, other employee benefits, demographic characteristics of employees, and retiree health insurance is collected through the establishment questionnaire.

(3) Plan Questionnaire—The purpose of the mailed Plan Questionnaire is to collect plan-specific information on each plan (up to four plans) offered by establishments that provide health insurance to their employees. This

questionnaire obtains information on total premiums, employer and employee contributions to the premium, and plan enrollment for each type of coverage offered—single, employee-plus-one, and family—within a plan. It also asks for information on deductibles, copays, and other plan characteristics.

The primary objective of the MEPS–IC is to collect information on employer-sponsored health insurance. Such information is needed in order to provide the tools for Federal, State, and academic researchers to evaluate current and proposed health policies and to support the production of important statistical measures for other Federal agencies.

#### Estimated Annual Respondent Burden

Exhibit 1 shows the estimated annualized burden hours for the respondent's time to participate in the MEPS–IC. The Prescreener questionnaire will be completed by 25,200 respondents and takes 5 minutes to complete. The Establishment questionnaire will be completed by 21,738 respondents and takes 20 minutes to complete. The Plan questionnaire will be completed by 19,246 respondents and will require an average of 2.3 responses per respondent. Each Plan questionnaire takes 11 minutes to complete. The total annualized burden hours are estimated to be 17,461 hours.

Exhibit 2 shows the estimated annualized cost burden associated with the respondents' time to participate in this data collection. The annualized cost burden is estimated to be \$619,691.

EXHIBIT 1—ESTIMATED ANNUALIZED BURDEN HOURS FOR THE 2023–2025 MEPS–IC

| Form name                         | Number of respondents | Number of responses per respondent | Hours per response | Total burden hours |
|-----------------------------------|-----------------------|------------------------------------|--------------------|--------------------|
| Prescreener Questionnaire .....   | 25,200                | 1                                  | 5/60               | 2,100              |
| Establishment Questionnaire ..... | 21,738                | 1                                  | * 20/60            | 7,246              |
| Plan Questionnaire .....          | 19,246                | 2.3                                | 11/60              | 8,115              |
| Total .....                       | 66,184                | na                                 | na                 | 17,461             |

\* The burden estimate printed on the establishment questionnaire is 45 minutes which includes the burden estimate for completing the establishment questionnaire and two plan questionnaires (on average, each establishment completes 2.3 plan questionnaires). The establishment and plan questionnaires are sent to the respondent as a package and are completed by the respondent at the same time.

EXHIBIT 2—ESTIMATED ANNUALIZED COST BURDEN FOR THE 2023–2025 MEPS–IC

| Form name                         | Number of respondents | Total burden hours | Average hourly wage rate* | Total cost burden |
|-----------------------------------|-----------------------|--------------------|---------------------------|-------------------|
| Prescreener Questionnaire .....   | 25,200                | 2,100              | 35.49                     | \$74,529          |
| Establishment Questionnaire ..... | 21,738                | 7,246              | 35.49                     | 257,161           |
| Plan Questionnaire .....          | 19,246                | 8,115              | 35.49                     | 288,001           |

## EXHIBIT 2—ESTIMATED ANNUALIZED COST BURDEN FOR THE 2023–2025 MEPS–IC—Continued

| Form name   | Number of respondents | Total burden hours | Average hourly wage rate * | Total cost burden |
|-------------|-----------------------|--------------------|----------------------------|-------------------|
| Total ..... | 66,184                | 17,461             | na                         | 619,691           |

\*Based upon the mean hourly wage for Compensation, Benefits, and Job Analysis Specialists occupation code 13–1141, at <https://www.bls.gov/oes/current/oes131141.htm> (U.S. Department of Labor, Bureau of Labor Statistics.)

**Request for Comments**

In accordance with the Paperwork Reduction Act, 44 U.S.C. 3501–3520, comments on AHRQ's information collection are requested with regard to any of the following: (a) whether the proposed collection of information is necessary for the proper performance of AHRQ's health care research and health care information dissemination functions, including whether the information will have practical utility; (b) the accuracy of AHRQ's estimate of burden (including hours and costs) of the proposed collection(s) of information; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information upon the respondents, including the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and included in the Agency's subsequent request for OMB approval of the proposed information collection. All comments will become a matter of public record.

Dated: November 14, 2022.

**Marquita Cullom,**  
Associate Director.

BILLING CODE 4160–90–P

**DEPARTMENT OF HEALTH AND HUMAN SERVICES****Centers for Medicare & Medicaid Services**

[Document Identifier: CMS–10227]

**Agency Information Collection Activities: Proposed Collection; Comment Request**

**AGENCY:** Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

**ACTION:** Notice.

**SUMMARY:** The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the

Paperwork Reduction Act of 1995 (the PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

**DATES:** Comments must be received by January 17, 2023.

**ADDRESSES:** When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to <http://www.regulations.gov>. Follow the instructions for “Comment or Submission” or “More Search Options” to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number: \_\_\_\_\_, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, please access the CMS PRA website by copying and pasting the following web address into your web browser: <https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing>.

**FOR FURTHER INFORMATION CONTACT:**

William N. Parham at (410) 786–4669.

**SUPPLEMENTARY INFORMATION:****Contents**

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–10227 PACE State Plan Amendment Preprint

Under the PRA (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term “collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

**Information Collection**

1. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* PACE State Plan Amendment Preprint; *Use:* If a state elects to offer PACE as an optional Medicaid benefit, it must complete a state plan amendment preprint packet described as “Enclosures 3, 4, 5, 6, and 7.” CMS will review the information provided in order to determine if the state has properly elected to cover PACE services as a state plan option. In the event that the state changes something in the state plan, only the affected page must be updated. *Form Number:* CMS–10227 (OMB control number: 0938–1027); *Frequency:* Once and occasionally; *Affected Public:* State, Local, or Tribal Governments; *Number*

of Respondents: 7; Total Annual Responses: 2; Total Annual Hours: 140. (For policy questions regarding this collection contact Angela Cimino at 410-786-2638.)

Dated: November 15, 2022.

**William N. Parham, III,**

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4120-01-P

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Administration for Children and Families

#### Proposed Information Collection Activity; Generic Clearance for Reviewer Recruitment Forms

**AGENCY:** Office of Planning, Research, and Evaluation, Administration for Children and Families, U.S. Department of Health and Human Services.

**ACTION:** Request for public comments.

**SUMMARY:** The Administration for Children and Families (ACF) proposes

to extend approval of the existing overarching generic clearance for Reviewer Recruitment Forms (Office of Management and Budget (OMB) #0970-0477). No changes are proposed to the terms of the overarching generic.

**DATES:** *Comments due within 60 days of publication.* In compliance with the requirements of the Paperwork Reduction Act (PRA) of 1995, ACF is soliciting public comments on the specific aspects of the information collection described above.

**ADDRESSES:** You can obtain copies of the proposed collection of information and submit comments by emailing [opreinfocollection@acf.hhs.gov](mailto:opreinfocollection@acf.hhs.gov). Identify all requests by the title of the information collection.

#### SUPPLEMENTARY INFORMATION:

*Description:* The overarching generic clearance for Reviewer Recruitment Forms provides ACF with the opportunity to collect from potential reviewers, such as those who review grant proposals, conference proposals, research/evaluation plans, study designs, report drafts, and/or other ACF materials.

ACF developed this generic because each program office and within ACF has

slightly different needs for information about reviewer applicants based on the specific activities for which reviewers are needed, yet the individual forms submitted under the generic will serve an identical function. The overarching purpose is to select qualified reviewers for ACF review processes and activities based on professional qualifications. Information will be collection through questions on forms and documents provided by candidates. Example documents include writing samples and curriculum vitae and/or resume. ACF uses the information collected to recruit well-qualified reviewers with relevant background experience and knowledge.

The abbreviated clearance process of the generic clearance allows program offices to gather a suitable pool of candidates within the varied time periods available for reviewer recruitment.

These forms submitted under this generic will be voluntary, low-burden and uncontroversial.

*Respondents:* Individuals who may apply to review materials for ACF.

#### ANNUAL BURDEN ESTIMATES

| Instrument                      | Number of respondents (total over request period) | Number of responses per respondent (total over request period) | Avg. burden per response (in hours) | Total burden (in hours) |
|---------------------------------|---|--|-------------------------------------|-------------------------|
| Reviewer Recruitment Form ..... | 3,000   | 1  | .5                                  | 1,500                   |

*Comments:* The Department specifically requests comments on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

**Mary B. Jones,**

ACF/OPRE Certifying Officer.

BILLING CODE 4184-79-P

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

[Docket No. FDA-2007-D-0369]

#### Product-Specific Guidances; Draft and Revised Draft Guidances for Industry; Availability

**AGENCY:** Food and Drug Administration, Department of Health and Human Services (HHS).

**ACTION:** Notice of availability.

**SUMMARY:** The Food and Drug Administration (FDA or Agency) is announcing the availability of additional draft and revised draft product-specific guidances. The guidances provide product-specific recommendations on, among other things, the design of bioequivalence (BE) studies to support abbreviated new drug applications (ANDAs). In the **Federal Register** of June 11, 2010, FDA

announced the availability of a guidance for industry entitled "Bioequivalence Recommendations for Specific Products" that explained the process that would be used to make product-specific guidances available to the public on FDA's website. The guidances identified in this notice were developed using the process described in that guidance.

**DATES:** Submit either electronic or written comments on the draft guidance by January 17, 2023 to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

**ADDRESSES:** You may submit comments on any guidance at any time as follows:

#### Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments.

Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

#### Written/Paper Submissions

Submit written/paper submissions as follows:

- Mail/Hand Delivery/Courier (for written/paper submissions): Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

**Instructions:** All submissions received must include the Docket No. FDA-2007-D-0369 for "Product-Specific Guidances; Draft and Revised Draft Guidances for Industry." Received comments will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information

redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

**Docket:** For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993-0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

**FOR FURTHER INFORMATION CONTACT:** Christine Le, Center for Drug Evaluation and Research, Food and Drug Administration, 301-796-2398, [PSG-Questions@fda.hhs.gov](mailto:PSG-Questions@fda.hhs.gov).

#### SUPPLEMENTARY INFORMATION:

##### I. Background

In the **Federal Register** of June 11, 2010 (75 FR 33311), FDA announced the availability of a guidance for industry entitled "Bioequivalence Recommendations for Specific Products" that explained the process that would be used to make product-specific guidances available to the public on FDA's website at <https://www.fda.gov/drugs/guidance-compliance-regulatory-information/guidances-drugs>.

As described in that guidance, FDA adopted this process as a means to

develop and disseminate product-specific guidances and provide a meaningful opportunity for the public to consider and comment on those guidances. Under that process, draft guidances are posted on FDA's website and announced periodically in the **Federal Register**. The public is encouraged to submit comments on those recommendations within 60 days of their announcement in the **Federal Register**. FDA considers any comments received and either publishes final guidances or publishes revised draft guidances for comment. Guidances were last announced in the **Federal Register** on August 3, 2022 (87 FR 47425). This notice announces draft product-specific guidances, either new or revised, that are posted on FDA's website.

##### II. Drug Products for Which New Draft Product-Specific Guidances Are Available

FDA is announcing the availability of new draft product-specific guidances for industry for drug products containing the following active ingredients:

TABLE 1—NEW DRAFT PRODUCT-SPECIFIC GUIDANCES FOR DRUG PRODUCTS

| Active ingredient(s)                                   |
|--|
| Ammonium lactate (multiple reference listed drugs).    |
| Budesonide.  |
| Calcitonin salmon.                                     |
| Clindamycin phosphate.                                 |
| Deferiprone.   |
| Drospirenone; Estetrol.                                |
| Eteplirsen.  |
| Fidaxomicin.   |
| Fosdenopterin hydrobromide.                            |
| Hydrocortisone.  |
| Hydroxyurea.   |
| Inotersen sodium.                                      |
| Ketotifen fumarate.                                    |
| Magnesium sulfate; Potassium chloride; Sodium sulfate. |
| Melphalan flufenamide hydrochloride.                   |
| Miconazole nitrate; White petrolatum; Zinc oxide.      |
| Mometasone furoate.                                    |
| Nicardipine hydrochloride.                             |
| Omeprazole magnesium.                                  |
| Patisiran sodium.                                      |
| Ponesimod.   |
| Ranolazine.  |
| Tepotinib hydrochloride.                               |
| Tivozanib hydrochloride.                               |
| Triamcinolone acetonide.                               |
| Trilaciclib dihydrochloride.                           |
| Varenicline tartrate.                                  |
| Voclosporin.   |

##### III. Drug Products for Which Revised Draft Product-Specific Guidances Are Available

FDA is announcing the availability of revised draft product-specific guidances

for industry for drug products containing the following active ingredients:

**TABLE 2—REVISED DRAFT PRODUCT-SPECIFIC GUIDANCES FOR DRUG PRODUCTS**

| Active ingredient(s)  |
|---|
| Acyclovir.  |
| Baricitinib.  |
| Calcium carbonate; Famotidine; Magnesium hydroxide.                             |
| Daunorubicin citrate.   |
| Deferiprone.  |
| Ethinyl estradiol; Norethindrone acetate.                                       |
| Ferric oxyhydroxide (multiple reference listed drugs).                          |
| Goserelin acetate (multiple reference listed drugs).                            |
| Icosapent ethyl.  |
| Lapatinib ditosylate.   |
| Lidocaine.  |
| Oxycodone.  |
| Progesterone.   |
| Ranolazine.   |
| Rifaximin.  |
| Sodium phosphate, dibasic, anhydrous; Sodium phosphate, monobasic, monohydrate. |
| Sumatriptan succinate (multiple product-specific guidances).                    |

For a complete history of previously published **Federal Register** notices related to product-specific guidances, go to <https://www.regulations.gov> and enter Docket No. FDA-2007-D-0369.

These draft guidances are being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). These draft guidances, when finalized, will represent the current thinking of FDA on, among other things, the product-specific design of BE studies to support ANDAs. They do not establish any rights for any person and are not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

#### IV. Paperwork Reduction Act of 1995

FDA tentatively concludes that these draft guidances contain no collection of information. Therefore, clearance by the Office of Management and Budget under the Paperwork Reduction Act of 1995 is not required.

#### V. Electronic Access

Persons with access to the internet may obtain the draft guidance at <https://www.fda.gov/drugs/guidance-compliance-regulatory-information/guidances-drugs>, <https://www.fda.gov/regulatory-information/search-fda-guidance-documents>, or <https://www.regulations.gov>.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### National Institutes of Health

#### Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

*Name of Committee:* Center for Scientific Review Special Emphasis Panel; RFA-RM-22-017 Somatic Cell Genome Editing Program Translational Coordination and Dissemination Center.

*Date:* December 14, 2022.

*Time:* 11:00 a.m. to 3:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

*Contact Person:* Rebecca Catherine Burgess, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, (301) 480-8034, [rebecca.burgess@nih.gov](mailto:rebecca.burgess@nih.gov).

*Name of Committee:* Center for Scientific Review Special Emphasis Panel; Member Conflict: Topics on Tumor Biology.

*Date:* December 14, 2022.

*Time:* 12:00 p.m. to 6:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

*Contact Person:* Jingwu Xie, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, (301) 594-8625, [jingwu.xie@nih.gov](mailto:jingwu.xie@nih.gov).

*Name of Committee:* Center for Scientific Review Special Emphasis Panel; Member Conflict: Respiratory Sciences.

*Date:* December 15-16, 2022.

*Time:* 9:00 a.m. to 6:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

*Contact Person:* Ghenima Dirami, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4122, MSC 7814, Bethesda, MD 20892, (240) 498-7546, [diramig@csr.nih.gov](mailto:diramig@csr.nih.gov).

*Name of Committee:* Center for Scientific Review Special Emphasis Panel; Topics in Autoimmunity.

*Date:* December 15, 2022.

*Time:* 1:00 p.m. to 6:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

*Contact Person:* Xinrui Li, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, (301) 594-2084, [xinrui.li@nih.gov](mailto:xinrui.li@nih.gov).

## DEPARTMENT OF HOMELAND SECURITY

### Coast Guard

[Docket No. USCG-2021-0830]

#### National Boating Safety Advisory Committee; Vacancies

**AGENCY:** Coast Guard, Department of Homeland Security.

**ACTION:** Request for applications.

**SUMMARY:** The U.S. Coast Guard is accepting applications to fill two vacancies on the National Boating Safety Advisory Committee (Committee). This Committee advises the Secretary of Homeland Security, via the Commandant of the U.S. Coast Guard, on matters relating to national recreational boating safety.

**DATES:** Completed applications must reach the U.S. Coast Guard on or before December 19, 2022.

**ADDRESSES:** Applications must be emailed to Mr. Jeff Decker at [NBSAC@uscg.mil](mailto:NBSAC@uscg.mil) with subject line "Application for NBSAC".

**FOR FURTHER INFORMATION CONTACT:** Mr. Jeff Decker, Alternate Designated Federal Officer of the National Boating Safety Advisory Committee; telephone 202-372-1507 or email at [NBSAC@uscg.mil](mailto:NBSAC@uscg.mil).

**SUPPLEMENTARY INFORMATION:** The National Boating Safety Advisory Committee is a Federal advisory committee. The Committee was established on December 4, 2018, by section 601 of the *Frank LoBiondo Coast Guard Authorization Act of 2018*, Public Law No 115-282, 132 Stat. 4192 (codified, at 46 U.S.C. 15105). The Committee operates under the provisions of the *Federal Advisory Committee Act*, (5 U.S.C. appendix), and 46 U.S.C. 15109. The National Boating Safety Advisory Committee provides advice, consults with, and make recommendations to the Secretary of Homeland Security, via the Commandant of the U.S. Coast Guard, on matters relating to national recreational boating safety.

The Committee is required to meet at least once a year in accordance with 46 U.S.C. 15109(a). We expect the Committee will hold meetings at least twice a year, but it may meet more frequently.

All members serve at their own expense and receive no salary or other compensation from the Federal Government. Members may be reimbursed for travel and per diem in accordance with Federal Travel Regulations.

As required by 46 U.S.C. 15109(f)(6), if you are appointed as a member of the Committee, your membership term will expire on December 31st of the third full year after the effective date of your appointment. Members serve at the pleasure of the Secretary of Homeland Security and may be removed prior to the end of their term for just cause. In this solicitation for Committee members, we will consider applications for two (2) positions:

- State official responsible for State boating safety programs.

Each member of the Committee serves as a representative and must have particular expertise, knowledge, and experience in matters relating to the function of the Committee, which is to advise the Secretary of Homeland Security on the matters described above.

In order for the Department, to fully leverage broad-ranging experience and education, the National Boating Safety Advisory Committee must be diverse with regard to professional and technical expertise. The Department is committed to pursuing opportunities, consistent with applicable law, to compose a committee that reflects the diversity of the nation's people.

If you are interested in applying to become a member of the Committee, email your application to [NBSAC@uscg.mil](mailto:NBSAC@uscg.mil) as provided in the **ADDRESS** section of this notice. Applications must include: (1) a cover letter expressing interest in an appointment to the National Boating Safety Advisory Committee; (2) a resume detailing the applicant's relevant experience and (3) a brief biography of the applicant. The U.S. Coast Guard will not consider incomplete or late applications.

Dated: November 15, 2022.

**Jason D. Neubauer,**

*Captain, U.S. Coast Guard, Acting Director of Inspections and Compliance.*

## DEPARTMENT OF HOMELAND SECURITY

### U.S. Customs and Border Protection

[Docket No. USCBP-2022-0044]

#### Commercial Customs Operations Advisory Committee

**AGENCY:** U.S. Customs and Border Protection (CBP), Department of Homeland Security (DHS).

**ACTION:** Committee Management; Notice of Federal Advisory Committee Meeting.

**SUMMARY:** The Commercial Customs Operations Advisory Committee (COAC)

will hold its quarterly meeting on Wednesday, December 7, 2022, in College Park, Maryland. The meeting will be open for the public to attend in person or via webinar. Due to COVID-19 restrictions, the in-person capacity is limited to 100 persons for public attendees.

**DATES:** The COAC will meet on Wednesday, December 7, 2022, from 1 p.m. to 5 p.m. EST. Please note that the meeting may close early if the committee has completed its business. Registration to attend and comments must be submitted no later than December 2, 2022.

**ADDRESSES:** The meeting will be held at the National Archives and Records Administration College Park, 8601 Adelphi Road, College Park, MD 20740, on the basement level in Lecture Rooms C, D, and E. All in-person participants are required to show valid government-issued identification to enter the building. For virtual participants, the webinar link and conference number will be provided to all registrants by 5:00 p.m. EST on December 6, 2022. For information or to request special assistance for the meeting, contact Mrs. Latoria Martin, Office of Trade Relations, U.S. Customs and Border Protection, at (202) 344-1440, as soon as possible.

Comments may be submitted by one of the following methods:

- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Search for Docket Number USCBP-2022-0044. To submit a comment, click the "Comment" button located on the top-right hand side of the docket page.

- **Email:** [tradeevents@cbp.dhs.gov](mailto:tradeevents@cbp.dhs.gov). Include Docket Number USCBP-2022-0044 in the subject line of the message.

Comments must be submitted in writing no later than December 2, 2022, and must be identified by Docket No. USCBP-2022-0044. All submissions received must also include the words "Department of Homeland Security." All comments received will be posted without change to <https://www.cbp.gov/trade/stakeholder-engagement/coac/coac-public-meetings> and [www.regulations.gov](http://www.regulations.gov). Therefore, please refrain from including any personal information you do not wish to be posted. You may wish to view the Privacy and Security Notice which is available via a link on the homepage of [www.regulations.gov](http://www.regulations.gov).

See **SUPPLEMENTARY INFORMATION** for file formats and other information about electronic filing.

**FOR FURTHER INFORMATION CONTACT:** Mrs. Latoria Martin, Office of Trade Relations, U.S. Customs and Border

Protection, 1300 Pennsylvania Avenue NW, Room 3.5A, Washington, DC 20229, (202) 344-1440; or Ms. Felicia M. Pullam, Designated Federal Officer, at (202) 344-1440 or via email at [tradeevents@cbp.dhs.gov](mailto:tradeevents@cbp.dhs.gov).

**SUPPLEMENTARY INFORMATION:** Notice of this meeting is given under the authority of the Federal Advisory Committee Act, 5 U.S.C. Appendix. The Commercial Customs Operations Advisory Committee (COAC) provides advice to the Secretary of Homeland Security, the Secretary of the Treasury, and the Commissioner of U.S. Customs and Border Protection (CBP) on matters pertaining to the commercial operations of CBP and related functions within the Department of Homeland Security and the Department of the Treasury.

**Pre-Registration:** Meeting participants may attend either in person or via webinar. All participants must register using one of the methods indicated below:

For members of the public who plan to participate in person, please register online at <https://teregistration.cbp.gov/index.asp?w=296> by 5 p.m. EST on December 2, 2022. For members of the public who are pre-registered to attend the meeting in person and later need to cancel, please do so by 5 p.m. EST on December 2, 2022, utilizing the following link: <https://teregistration.cbp.gov/cancel.asp?w=296>.

For members of the public who plan to participate via webinar, please register online at <https://teregistration.cbp.gov/index.asp?w=295> by 5 p.m. EST on December 2, 2022. For members of the public who are pre-registered to attend the meeting via webinar and later need to cancel, please do so by 5 p.m. EST on December 2, 2022, utilizing the following link: <https://teregistration.cbp.gov/cancel.asp?w=295>.

The COAC is committed to ensuring that all participants have equal access regardless of disability status. If you require a reasonable accommodation due to a disability to fully participate, please contact Mrs. Latoria Martin at (202)-344-1440 as soon as possible.

Please feel free to share this information with other interested members of your organization or association.

To facilitate public participation, we are inviting public comment on the issues the committee will consider prior to the formulation of recommendations as listed in the Agenda section below.

There will be multiple public comment periods held during the meeting on December 7, 2022. Speakers

are requested to limit their comments to two minutes or less to facilitate greater participation. Please note that the public comment period for speakers may end before the time indicated on the schedule that is posted on the CBP web page: <http://www.cbp.gov/trade/stakeholder-engagement/coac>.

### Agenda

The COAC will hear from the current subcommittees on the topics listed below:

1. The Next Generation Facilitation Subcommittee will provide updates on its task forces and working groups, including an update on the progress of the 21st Century Customs Framework (21CCF) and E-Commerce Task Forces. The 21CCF Task Force will provide an update on the work addressed this past quarter, which includes discussions with Partner Government Agencies (PGAs) and some of the discussion drafts of trade-related legislative proposals stemming from the 21CCF Task Force and Focus Group. The Automated Commercial Environment (ACE) 2.0 Working Group will provide an update regarding adding new members to the working group to help focus on the identified gaps and potential solutions for ACE 2.0 Modernization. Finally, the One United States Government (1USG) Working Group will provide updates on some of the discussions held this past quarter pertaining to involvement of PGAs in a trusted trader program, with benefits to the trade stakeholders, as well as single window automation with the PGAs.

2. The Rapid Response Subcommittee will provide updates for the Broker Modernization Working Group, Domestic Manufacturing and Production (DMAP) Working Group, and the United States-Mexico-Canada Agreement (USMCA) Working Group. The Broker Modernization Working Group currently meets monthly with the expectation that recommendations will be developed and submitted for consideration at an upcoming COAC public meeting. The DMAP Working Group meets bi-weekly to obtain input from industry stakeholders on trade enforcement areas affecting domestic manufacturers and producers. The USMCA Working Group has reconvened and meets bi-weekly. The focus of this working group is on Chapter 7 of the trade agreement, specifically the trilateral Committee on Trade Facilitation established pursuant to Article 7.24, which is composed of government representatives of each party to the USMCA.

3. The Secure Trade Lanes Subcommittee will provide updates on

its four active working groups: the Cross-Border Recognition Working Group, the Export Modernization Working Group, the In-Bond Working Group, and the Trade Partnership and Engagement Working Group. Recommendations for the committee's consideration are anticipated from the Export Modernization Working Group regarding export-related benefits for Customs Trade Partnership Against Terrorism (CTPAT) partners. The In-Bond Working Group plans to present recommendations for the committee's consideration related to the trade community's proposed regulatory revisions/updates to 19 CFR part 18. The Trade Partnership and Engagement Working Group continues to provide an opportunity for input on CTPAT Trade Compliance program development and implementation from trade members with broad subject matter expertise. The Cross-Border Recognition Working Group continues to work on developing recommendations for the committee's consideration regarding potential changes to the current joint inspection program (Unified Cargo Processing) and has continued its discussions on CBP's CTPAT program and Mexico's Authorized Economic Operator program to ensure alignment and compliance with the mutual recognition arrangement signed in 2014.

4. The Intelligent Enforcement Subcommittee will provide updates on the work completed and topics discussed in its working groups. The Antidumping/Countervailing Duty (AD/CVD) Working Group will provide updates regarding its work and discussions on importer compliance with AD/CVD requirements. The Intellectual Property Rights Working Group (IPRWG) will provide recommendations for the committee's consideration relating to the automation of the CBP detention and seizure process and suggested enhancements to the CBP IPR web page. The Bond Working Group will report on the ongoing discussions and status updates for eBond requirements. The Forced Labor Working Group will submit recommendations for the committee's consideration regarding the Uyghur Forced Labor Prevention Act (UFLPA). Meeting materials will be available on November 28, 2022, at: <http://www.cbp.gov/trade/stakeholder-engagement/coac/coac-public-meetings>.

Dated: November 14, 2022.

## DEPARTMENT OF HOMELAND SECURITY

### Cybersecurity and Infrastructure Security Agency

[Docket No. CISA-2022-0008]

### Notice of Cybersecurity and Infrastructure Security Agency Cybersecurity Advisory Committee Meeting

**AGENCY:** Cybersecurity and Infrastructure Security Agency (CISA), Department of Homeland Security (DHS).

**ACTION:** Notice of Federal Advisory Committee Act (FACA) meeting; request for comments.

**SUMMARY:** CISA is publishing this notice to announce the CISA Cybersecurity Advisory Committee Quarterly Meeting will meet in person on Tuesday, December 6, 2022. This meeting will be partially closed to the public. Members of the public may join the public portion of the meeting by teleconference.

#### DATES:

*Meeting Registration:* Registration to attend the meeting is required and must be received no later than 5:00 p.m. Eastern Standard Time (EST) on December 4, 2022.

*Speaker Registration:* Registration to speak during the meeting's public comment period must be received no later than 5:00 p.m. EST on December 4, 2022.

*Written Comments:* Written comments must be received no later than 5:00 p.m. EST on December 4, 2022.

*Meeting Date:* The CISA Cybersecurity Advisory Committee will meet in-person at Apple Park in Cupertino, California on December 6, 2022, from 9:30 a.m. to 3:00 p.m. Pacific Standard Time (PST). The meeting may close early if the committee has completed its business.

**ADDRESSES:** The CISA Cybersecurity Advisory Committee's meeting will be open to the public, per 41 CFR 102-3.150 and will be held in person at One Apple Park Way, Cupertino, CA 95014. Members of the public may participate via teleconference only. For access to the conference call bridge, information on services for individuals with disabilities, or to request special assistance, please email [CISA\\_CybersecurityAdvisoryCommittee@cisa.dhs.gov](mailto:CISA_CybersecurityAdvisoryCommittee@cisa.dhs.gov) by 5:00 p.m. EST December 4, 2022. The CISA Cybersecurity Advisory Committee is committed to ensuring all participants have equal access regardless of

disability status. If you require a reasonable accommodation due to a disability to fully participate, please contact Ms. Megan Tsuyi at (202) 594-7374 as soon as possible.

**Comments:** Members of the public are invited to provide comment on issues that will be considered by the committee as listed in the **SUPPLEMENTARY INFORMATION** section below. Associated materials that may be discussed during the meeting will be made available for review at <https://www.cisa.gov/cisa-cybersecurity-advisory-committee-meeting-resources> by December 1, 2022. Comments should be submitted by 5:00 p.m. EST on December 4, 2022 and must be identified by Docket Number CISA-2022-0008. Comments may be submitted by one of the following methods:

- **Federal eRulemaking Portal:** [www.regulations.gov](http://www.regulations.gov). Please follow the instructions for submitting written comments.

- **Email:** [CISA\\_CybersecurityAdvisoryCommittee@cisa.dhs.gov](mailto:CISA_CybersecurityAdvisoryCommittee@cisa.dhs.gov). Include the Docket Number CISA-2022-0008 in the subject line of the email.

**Instructions:** All submissions received must include the words "Cybersecurity and Infrastructure Security Agency" and the Docket Number for this action. Comments received will be posted without alteration to [www.regulations.gov](http://www.regulations.gov), including any personal information provided. You may wish to review the Privacy & Security notice available via a link on the homepage of [www.regulations.gov](http://www.regulations.gov).

**Docket:** For access to the docket and comments received by the CISA Cybersecurity Advisory Committee, please go to [www.regulations.gov](http://www.regulations.gov) and enter docket number CISA-2022-0008.

A public comment period is scheduled to be held during the meeting from 2:50 p.m. to 3:00 p.m. PST.

Speakers who wish to participate in the public comment period must email [CISA\\_CybersecurityAdvisoryCommittee@cisa.dhs.gov](mailto:CISA_CybersecurityAdvisoryCommittee@cisa.dhs.gov) to register. Speakers should limit their comments to 3 minutes and will speak in order of registration. Please note that the public comment period may end before the time indicated, depending on the number of speakers who register to participate.

**FOR FURTHER INFORMATION CONTACT:** Megan Tsuyi, 202-594-7374, [CISA\\_CybersecurityAdvisoryCommittee@cisa.dhs.gov](mailto:CISA_CybersecurityAdvisoryCommittee@cisa.dhs.gov).

**SUPPLEMENTARY INFORMATION:** The CISA Cybersecurity Advisory Committee was established under the National Defense

Authorization Act for Fiscal Year 2021, Public Law 116-283. Notice of this meeting is given under FACA, 5 U.S.C. Appendix (Pub. L. 92-463). The CISA Cybersecurity Advisory Committee advises the CISA Director on matters related to the development, refinement, and implementation of policies, programs, planning, and training pertaining to the cybersecurity mission of the Agency.

**Agenda:** The CISA Cybersecurity Advisory Committee will hold an in-person meeting on Tuesday, December 6, 2022, from 9:30 a.m. to 3:00 p.m. PST to discuss current CISA Cybersecurity Advisory Committee activities. The open session will include: (1) a period for public comment (2) a discussion on the status of previous CISA Cybersecurity Advisory Committee recommendations (3) a member roundtable on the CISA Cybersecurity Advisory Committee strategic focus for 2023, and (4) discussion on the CISA Cybersecurity Advisory Committee annual report.

The committee will also meet in a closed session from 9:30 a.m. to 12:30 p.m. PST to participate in an operational discussion that will address areas of critical cybersecurity vulnerabilities and priorities for CISA. Government officials will share sensitive information with CSAC members on initiatives and future security requirements for assessing cyber risks to critical infrastructure.

**Basis for Closure:** In accordance with section 10(d) of FACA and 5 U.S.C. 552b(c)(9)(B), *The Government in the Sunshine Act*, it has been determined that certain agenda items require closure, as the premature disclosure of the information that will be discussed would be likely to significantly frustrate implementation of proposed agency actions.

This agenda item addresses areas of CISA's operations that include critical cybersecurity vulnerabilities and priorities for CISA. Government officials will share sensitive information with CSAC members on initiatives and future security requirements for assessing cyber risks to critical infrastructure.

As the premature disclosure of the information that will be discussed would be likely to significantly frustrate implementation of proposed agency action, this portion of the meeting is required to be closed pursuant to

section 10(d) of FACA and 5 U.S.C. 552b(c)(9)(B).

**Megan M. Tsuyi,**

*Designated Federal Officer, CISA Cybersecurity Advisory Committee, Cybersecurity and Infrastructure Security Agency, Department of Homeland Security.*

## DEPARTMENT OF HOMELAND SECURITY

[Docket No. DHS-2022-0032]

### Privacy Act of 1974; System of Records

**AGENCY:** Federal Emergency Management Agency, Department of Homeland Security.

**ACTION:** Notice of a Modified System of Records.

**SUMMARY:** In accordance with the Privacy Act of 1974, the Department of Homeland Security (DHS) proposes to modify a current DHS system of records titled, "DHS/Federal Emergency Management Agency (FEMA)-006 Citizen Corps Program System of Records" and retitle it, "DHS/FEMA-006 Individual and Community Preparedness Division System of Records." This system of records allows DHS/FEMA to collect from and maintain records on individuals who contact the agency about their interest in preparedness and specific voluntary programs, register and participate in FEMA's Individual and Community Preparedness Division (ICPD) programs, correspond with community stakeholder organizations, and receive survey responses. DHS/FEMA is updating this System of Records Notice to (1) revise the system name, (2) modify the system location, (3) update the purpose of the system, (4) update the authority for maintenance of the system, (5) revise the category of individuals covered by the system, (6) update the category of records in the system, (7) update record source categories; (8) update record access procedures; and (9) revise and add routine uses. Additionally, this notice includes non-substantive changes to simplify the formatting and text of the previously published notice. This modified system will be included in DHS's inventory of record systems.

**DATES:** Submit comments on or before December 19, 2022. This modified system will be effective upon publication. New or modified routine uses will be effective December 19, 2022.

**ADDRESSES:** You may submit comments, identified by docket number DHS–2022–0032 by one of the following methods:

- *Federal e-Rulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

- *Fax:* 202–343–4010.

- *Mail:* Lynn Parker Dupree, Privacy Office, Department of Homeland Security, Washington, DC 20528–0655.

*Instructions:* All submissions received must include the agency name and docket number DHS–2022–0032. All comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided.

*Docket:* For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>.

**FOR FURTHER INFORMATION CONTACT:** For general questions, please contact: Tammi Hines, (202) 212–5100, [FEMA-Privacy@fema.dhs.gov](mailto:FEMA-Privacy@fema.dhs.gov), Senior Director for Information Management, Federal Emergency Management Agency, Department of Homeland Security, Washington, DC 20472. For privacy questions, please contact: Lynn Parker Dupree, (202) 343–1717, [Privacy@hq.dhs.gov](mailto:Privacy@hq.dhs.gov), Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528–0655.

#### **SUPPLEMENTARY INFORMATION:**

##### **I. Background**

This modified System of Records Notice is being published because the Federal Emergency Management Agency (FEMA) collects, maintains, uses, retrieves, and disseminates the personally identifiable information (PII) of individuals who contact the agency about their interest in preparedness and specific voluntary programs, register and participate in FEMA's Individual and Community Preparedness Division (ICPD) programs, correspond with community stakeholder organizations, and receive survey responses to facilitate development of emergency preparedness measures and strengthen collaborations with stakeholders to better prepare individuals and communities to respond to disasters.

The Robert T. Stafford Disaster Relief and Emergency Assistance Act, Public Law 93–288, as amended, at Section 611, 42 U.S.C. 5196(e)(1), authorizes the FEMA Administrator to “study and develop emergency preparedness measures designed to afford adequate protection of life and property, including—research and studies as to the best methods of treating the effects of hazards.”

According to 6 U.S.C. 313(b)(1), “the primary mission of the Agency is to reduce the loss of life and property and protect the nation from all hazards, including natural disasters, acts of terrorism, and other man-made disasters, by leading and supporting the Nation in a risk-based, comprehensive emergency management system of preparedness, protection, response, recovery, and mitigation.”

According to 6 U.S.C. 314(a)(9)(B), the Administrator is required to take leadership in preparedness, by planning, training, and building the emergency management profession to prepare effectively for, mitigate against, respond to, and recover from any hazard.

FEMA's Individual and Community Preparedness Division supports the FEMA mission by connecting individuals, organizations, and communities with research and tools to build and sustain capabilities to prepare for any disaster or emergency. The Individual and Community Preparedness Division conducts research to develop emergency preparedness measures and conducts surveys to better understand effective preparedness actions and ways to motivate the public to take those actions. Through the Individual and Community Preparedness Division, FEMA administers the Citizen Responder Program, which includes Citizen Corps and Community Emergency Response Teams (CERT); the Youth Preparedness Council; the National Household Survey on Disaster Preparedness; the Post-Disaster Survivor Survey Preparedness Research; and the Preparedness Activity Registration and Feedback collection.

Citizen Responder aims to strengthen the collaboration with communities and to enhance their preparation and response to threats of terrorism, crime, public health issues, and disasters of all kinds. As part of this responsibility to help and support emergency response providers, FEMA supports efforts to train and assist in organizing citizen responder programs. Citizen Responder allows the Individual and Community Preparedness Division to analyze program activities, structures, and proper sponsorship. Data collected indicates, at a state, local, tribal, and territorial (SLTT) level, how local grassroots programs help to prepare communities and individuals. This information is required to link members of the public who are interested in getting prepared with organizations in their community that can help.

The Youth Preparedness Council (YPC) brings together youth leaders

nationwide who are highly interested and engaged in advocating youth disaster preparedness and making a difference in their communities. Youth applicants, between the ages of 13 and 17, apply to the Youth Preparedness Council in their 8th, 9th, 10th, or 11th grade. Youth Preparedness Council members represent the youth perspective on emergency preparedness and share this information with their communities. FEMA collects information from Youth Preparedness Council applicants in various forms (paper, electronic, video, or web), as well contact information for parents of applicants under the age of 18, and individuals providing recommendations of applicants.

The National Household Survey on Disaster Preparedness identifies progress and gaps in individual and community preparedness and helps FEMA better understand the motivators and barriers to preparedness and specific hazards. The survey measures the public's knowledge, attitudes, and behaviors relative to preparing for a wide range of hazards and is used by FEMA to tailor messaging and public information efforts, community outreach, and strategic planning initiatives.

The Post-Disaster Survivor Preparedness Survey was created after the 2017 hurricane season where Hurricanes Harvey, Irma, and Maria significantly impacted historically underserved communities and illustrated the critical importance of tailoring preparedness and warning information for specific local features, and the need for protective action guidance based on these likely local impacts. This survey helps identify how members of specific communities impacted by disasters prepare, as well as the barriers that prevent underserved individuals and families from being more prepared.

The Preparedness Activity Registration and Feedback collection provides general feedback on the (1) effectiveness of national FEMA preparedness programs and initiatives; (2) website user experience; (3) activity details and other information regarding the type, size, and location of preparedness activities hosted by members of the public and community organizers; (4) point of contact information for registration within the site, follow-on communication, if needed, and future engagement requests that will allow for the public to enroll in the Individual and Community Preparedness Division newsletter or other public communications; and (6) publication ordering via submitting

requests to the FEMA publication warehouse to have materials shipped directly to members of the public.

FEMA is updating this System of Records Notice to reflect the following changes. First, the system name is revised to incorporate additional Individual and Community Preparedness Division programs and activities. When the system of records was established, Citizen Corps was the primary program in the Individual and Community Preparedness Division. Since that time, Citizen Corps has become one of many Individual and Community Preparedness Division programs and the purpose of this update is to incorporate all current Individual and Community Preparedness Division collections. The system name has been updated to accurately align with additional Individual and Community Preparedness Division programs.

Second, the system location is updated to accurately reflect the location of the records within the Federal Risk and Authorization Management Program (FedRAMP) approved Salesforce Government Cloud environment, a Software-as-a-Service (SaaS) cloud system located in Salesforce Data Center, Ashburn, VA.

Third, the purpose of the system is updated to document the various preparedness activities, programs, and surveys administered by FEMA, in addition to the Citizen Corp and CERT programs.

Fourth, the authority for maintenance of the system is updated to include FEMA's statutory authority to administer preparedness activities, programs, and surveys.

Fifth, the category of individuals has been revised to include individuals engaging in preparedness programs, in addition to Citizen Corp and CERT programs, and survey respondents for preparedness assessment surveys.

Sixth, the category of records has been updated to include date of birth, race/ethnicity, gender/sex, academic records, letters of recommendation, school grade level and extracurricular activities (for Youth Preparedness Council only; disciplinary records are not requested or required). Other CERT program information has been removed.

Seventh, the record source categories are modified to align with the system's purpose and to include additional sources of records.

Eighth, record access procedures are updated to include notification procedures that reflect FEMA's internal reorganization.

Finally, routine uses are updated to comply with OMB Memorandum M-17-12 requiring disclosure of

information necessary to respond to a breach either of the agency's personally identifiable information or, as appropriate, to assist another agency in its response to a breach. The incident-related routine uses will help identify what information was potentially compromised, the population of individuals potentially affected, the purpose for which the information had originally been collected, the permitted uses and disclosures of the information, and other information that may be useful when developing the agency's incident response. Former Routine Use H has been removed from the System of Records Notice. Previous Routine Uses I and J have been combined, re-lettered, and modified to reflect the current name of the program, Citizen Responder and CERT. Routine Use J has been added to account for the use of FEMA data to conduct testing of new technologies, with the exception of Youth Preparedness Council data.

DHS/FEMA may share information with appropriate federal, state, local, tribal, territorial, foreign, or international government agencies, consistent with the routine uses set forth in this System of Records Notice.

This updated system will be included in DHS's inventory of record systems.

## II. Privacy Act

The fair information practice principles found in the Privacy Act underpin the statutory framework governing the means by which Federal Government agencies collect, maintain, use, and disseminate individuals' records. The Privacy Act applies to information that is maintained in a "system of records." A "system of records" is a group of any records under the control of an agency from which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass U.S. citizens and lawful permanent residents. Additionally, the Judicial Redress Act (JRA) provides covered persons with a statutory right to make requests for access and amendment to covered records, as defined by the Judicial Redress Act, along with judicial review for denials of such requests. In addition, the Judicial Redress Act prohibits disclosures of covered records, except as otherwise permitted by the Privacy Act.

Below is the description of the DHS/FEMA-006 Individual and Community Preparedness System of Records.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this system of records to the Office of

Management and Budget and to Congress.

### SYSTEM NAME AND NUMBER:

Department of Homeland Security (DHS)/Federal Emergency Management Agency (FEMA)-006 Individual and Community Preparedness System of Records.

### SECURITY CLASSIFICATION:

Unclassified.

### SYSTEM LOCATION:

Records are maintained at the FEMA Headquarters in Washington, DC, and field offices. Records also are maintained in the Salesforce Government Cloud environment located in Salesforce Data Center, Ashburn, VA.

### SYSTEM MANAGER(S):

Individual and Community Preparedness Division (ICPD) Preparedness Behavior Change Branch Chief, 500 C St SW, Washington, DC 20472.

### AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Robert T. Stafford Disaster Relief and Emergency Assistance Act, Public Law 93-288, as amended, Sec. 611, at 42 U.S.C 5196(e); 6 U.S.C. 314(a)(9)(B); 6 U.S.C. 313(b)(1), (b)(2)(H); Exec. Order (E.O.) No. 13254, "Establishing the USA Freedom Corps", Jan. 29, 2002, as amended by E.O. 13286.

### PURPOSE(S) OF THE SYSTEM:

The purpose of this system is to enable FEMA to facilitate contact between individuals, communities, and organizations about their interest in preparedness and specific voluntary programs; enable individuals, communities, and organizations to register and participate in FEMA's Individual and Community Preparedness Division programs; and enable FEMA to correspond with community stakeholder organizations, administer surveys, and receive survey responses. As a whole, these records enable FEMA and the Individual and Community Preparedness Division to connect with individuals, organizations, and communities with research, training, and tools to build and sustain capabilities to prepare for any disaster, hazard, or emergency.

### CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals designated as the points of contact for a citizen responder team (Community Emergency Response Team (CERT) or Citizen Corps partner organization), members of the public who contact the agency about their interest in preparedness programs,

which may include youth between grades 8 and 11, their parents or guardians, or individuals recommending the youth for preparedness programs. This system will also include members of the public who respond to FEMA-administered preparedness assessment surveys.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

- Individual's Name;
- Organization or Sponsoring Organization;
- Telephone Number;
- Fax Number;
- Mailing Address;
- Email Address;
- Unique User ID (for IT system access);
- Password (for IT system access);
- User Type;
- Date of Birth;
- Race/Ethnicity;
- Gender/Sex;
- Academic Records;
- Letter of Recommendation, including Relationship to Applicant;
- School Grade Level;
- Extracurricular Activities;
- Volunteer Program Area and Type of Interest;
- Emergency Preparedness Training Information (*e.g.*, courses taken and dates of courses);
- Community Preparedness Surveys and Instruments (aggregate self-reported attitudes, opinions and experiences of disasters and preparedness)

**RECORD SOURCE CATEGORIES:**

FEMA collects information directly from the individuals who contact, correspond with, register for, and participate in FEMA's Individual and Community Preparedness programs.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:**

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed outside DHS as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

A. To the Department of Justice (DOJ), including the U.S. Attorneys Offices, or other federal agencies conducting litigation or proceedings before any court, adjudicative, or administrative body, when it is relevant or necessary to the litigation and one of the following is a party to the litigation or has an interest in such litigation:

1. DHS or any component thereof;
2. Any employee or former employee of DHS in his/her official capacity;

3. Any employee or former employee of DHS in his/her individual capacity, only when DOJ or DHS has agreed to represent the employee; or

4. The United States or any agency thereof.

B. To a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of the individual to whom the record pertains.

C. To the National Archives and Records Administration (NARA) or General Services Administration pursuant to records management inspections being conducted under the authority of 44 U.S.C. secs. 2904 and 2906.

D. To an agency or organization for the purpose of performing audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function.

E. To appropriate agencies, entities, and persons when (1) DHS suspects or has confirmed that there has been a breach of the system of records; (2) DHS has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, DHS (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DHS's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

F. To another federal agency or federal entity, when DHS determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

H. To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for DHS, when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to DHS officers and employees.

I. To organizations participating, partnering, or affiliated with the Citizen Responder Program if an individual has volunteered to assist or requested information about this specific type of organization.

J. To appropriate federal, state, local, tribal, or foreign governmental agencies or multilateral governmental organizations, with the approval of the Chief Privacy Officer, when DHS is aware of a need to use relevant aggregate, deidentified data, that relate to the purpose(s) stated in this System of Records Notice, for purposes of testing new technology. Data collected through the Youth Preparedness Council will not be used to test new technology.

K. To the news media and the public, with the approval of the Chief Privacy Officer in consultation with counsel, when there exists a legitimate public interest in the disclosure of the information, when disclosure is necessary to preserve confidence in the integrity of DHS, or when disclosure is necessary to demonstrate the accountability of DHS's officers, employees, or individuals covered by the system, except to the extent the Chief Privacy Officer determines that release of the specific information in the context of a particular case would constitute a clearly unwarranted invasion of personal privacy.

**POLICIES AND PRACTICES FOR STORAGE OF RECORDS:**

DHS/FEMA stores records in this system electronically or on paper in secure facilities in a locked drawer behind a locked door. The records may be stored on magnetic disc, tape, and digital/electronic media.

**POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:**

DHS/FEMA may retrieve records using a system-generated case number associated with a unique application, or by Name, Mailing Address, Email Address, Phone Number, and User ID and password. DHS/FEMA may also retrieve records by non-personal information in aggregate, such as CERTs or survey respondents by county or state location, preparedness events by number of training events held per period-of-time, average positive feedback rating on preparedness surveys, and types of preparedness events and activities conducted by individuals.

**POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:**

Youth Preparedness Council applications are maintained in accordance with National Archives and

Records Administration N1-311-86-1, Item 1K1c (Administrative records common to most offices in FEMA). In accordance with N1-311-86-1, Item 1K1c, for enrolled applicants, Youth Preparedness Council application records will be destroyed at the end of the calendar year of the applicant's last year in the program. For applicants that are not enrolled, Youth Preparedness Council application records will be destroyed at the end of calendar year submitted.

For all other Individual and Community Preparedness Division records (e.g., results from surveys) that are not Youth Preparedness Council applications, the records are only retained until they are incorporated into the master file in accordance with NARA General Records Schedule 5.2, Item 20. (Intermediary Records). Individual and Community Preparedness Division staff use the collected data for studies and development of trend analysis. Records are continuously used and monitored and are retained until they are no longer deemed useful for analysis after which the records will be destroyed after another 3 years in accordance with NARA General Records Schedule 5.3, Item 010 (continuity planning and related emergency planning files).

#### **ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:**

DHS/FEMA safeguards records in this system according to applicable rules and policies, including all applicable DHS automated systems security and access policies. DHS/FEMA has imposed strict controls to minimize the risk of compromising the information that is being stored. Access to the computer system containing the records in this system is limited to those individuals who have a need to know the information for the performance of their official duties and who have appropriate clearances or permissions.

#### **RECORD ACCESS PROCEDURES:**

Individuals seeking access to and notification of any record contained in this system of records, or seeking to contest its content, may submit a request in writing to the Chief Privacy Officer and the FEMA Freedom of Information Act (FOIA) Officer, whose contact information can be found at <http://www.dhs.gov/foia> under "Contact Information." If an individual believes more than one component maintains Privacy Act records concerning them, the individual may submit the request to the Chief Privacy Officer and Chief Freedom of Information Act Officer, Department of Homeland Security,

Washington, DC 20528-0655 or electronically at <https://www.dhs.gov/dhs-foia-privacy-act-request-submission-form>. Even if neither the Privacy Act nor the Judicial Redress Act provide a right of access, certain records about you may be available under the Freedom of Information Act.

When an individual is seeking records about themselves from this system of records or any other Departmental system of records, the individual's request must conform with the Privacy Act regulations set forth in 6 CFR part 5. The individual must first verify their identity, meaning that the individual must provide their full name, current address, and date and place of birth. The individual must sign the request, and the individual's signature must either be notarized or submitted under 28 U.S.C. 1746, a law that permits statements to be made under penalty of perjury as a substitute for notarization. An individual may obtain more information about this process at <http://www.dhs.gov/foia>. In addition, the individual should, whenever possible:

- Explain why they believe the Department would have information being requested;
  - Identify which component(s) of the Department they believe may have the information;
  - Specify when the individual believes the records would have been created; and
  - Provide any other information that will help the FOIA staff determine which DHS component agency may have responsive records;
- If the request is seeking records pertaining to another living individual, the request must include an authorization from the individual whose record is being requested, authorizing the release to the requester.
- Without the above information, the component(s) may not be able to conduct an effective search, and the individual's request may be denied due to lack of specificity or lack of compliance with applicable regulations.

#### **CONTESTING RECORD PROCEDURES:**

For records covered by the Privacy Act or covered Judicial Redress Act records, individuals may make a request for amendment or correction of a record of the Department about the individual by writing directly to the Department component that maintains the record, unless the record is not subject to amendment or correction. The request should identify each particular record in question, state the amendment or correction desired, and state why the individual believes that the record is not accurate, relevant, timely, or complete.

The individual may submit any documentation that would be helpful. If the individual believes that the same record is in more than one system of records, the request should state that and be addressed to each component that maintains a system of records containing the record.

#### **NOTIFICATION PROCEDURES:**

See "Record Access Procedures" above.

#### **EXEMPTIONS PROMULGATED FOR THE SYSTEM:**

None.

#### **HISTORY:**

78 FR 43890 (July 22, 2013); 73 FR 77785 (December 19, 2008).

## **DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT**

[Docket No. FR-7056-N-50]

### **60-Day Notice of Proposed Information Collection: Multifamily Housing Procedures for Projects Affected by Presidentially-Declared Disasters, OMB Approval No.: 2502-0582**

**AGENCY:** Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

**ACTION:** Notice.

**SUMMARY:** HUD is seeking approval from the Office of Management and Budget (OMB) to extend the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed extension of collection of information. The purpose of this notice is to allow for 60 days of public comment.

**DATES:** *Comments Due Date:* January 17, 2023.

**ADDRESSES:** Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Colette Pollard, Reports Management Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Room 4176, Washington, DC 20410-5000; telephone 202-402-3400 (this is not a toll-free number) or email at [Colette.Pollard@hud.gov](mailto:Colette.Pollard@hud.gov) for a copy of the proposed forms or other available

information. HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech and communication disabilities. To learn more about how to make an accessible telephone call, please visit <https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs>.

**FOR FURTHER INFORMATION CONTACT:**

Colette Pollard, Reports Management Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email Colette Pollard at [Colette.Pollard@hud.gov](mailto:Colette.Pollard@hud.gov) or telephone 202-402-3400. This is not a toll-free number. HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech and communication disabilities. To learn more about how to make an accessible telephone call, please visit <https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs>.

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

**SUPPLEMENTARY INFORMATION:** This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

**A. Overview of Information Collection**

*Title of Information Collection:*

Disaster Management.

*OMB Approval Number:* 2502-0582.

*OMB Expiration Date:* June 30, 2023.

*Type of Request:* Extension of currently approved collection.

*Form Number:* None.

*Description of the need for the information and proposed use:* Disaster relief is intended to provide an orderly and continuing means of assistance by the Federal Government to non-profit institutions in carrying out their responsibilities to alleviate the suffering and damage which result from such disasters. The purpose of this information collection is to ensure that owners follow HUD procedures, as laid out in HUD Housing Handbook 4350.1, chapter 38, regarding recovery efforts after a Presidentially declared disaster." This information collection is used to ensure these procedures minimize disruption to HUD's normal business requirements by owners and set guidelines for owner/tenant responsibilities under these circumstances. Affected owners are provided instruction and assistance to respond with disaster management. Disaster Relief is limited to the period following a disaster event.

*Respondents:* Non-profit institutions.

*Estimated Number of Respondents:* 5,367.

*Estimated Number of Responses:* 5,367.

*Frequency of Response:* 1.

*Average Hours per Response:* 0.25.

*Total Estimated Burden:* 1,342.

**B. Solicitation of Public Comment**

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond—including through the use of appropriate automated collection techniques or other forms of information technology, such as permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

**C. Authority**

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. chapter 35.

**Jeffrey D. Little,**

*General Deputy Assistant Secretary, Office of Housing.*

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

**SUPPLEMENTARY INFORMATION:** This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

**A. Overview of Information Collection**

*Title of Information Collection:*

Capital Needs Assessment (CNAs).

*OMB Approval Number:* 2502-0505.

*OMB Expiration Date:* 08/31/2023.

*Type of Request:* Extension of a currently approved collection.

*Form Number:* N/A.

*Description of the need for the information and proposed use:* A Capital Needs Assessment is a detailed review of a property's expected capital expenditures over future years. It is needed to appropriately value a project/property, to determine financial

sustainability, and to plan for funding of an escrow account to be used for capital repair and replacement needs during the estimate period. It is used by external parties, and HUD for valuation, underwriting, and asset management purposes.

*Respondents:* Assessor firms, lender originator, lender servicer, Participating Administrative Entity (PAE), Public Housing Agency (PHA) for RAD Projects, and the Project Rental Assistance Contract (PRAC) owner.

*Estimated Number of Respondents:* 2,041.

*Estimated Number of Responses:* 2,041.

*Frequency of Response:* Once periodically.

*Average Hours per Response:* 36 hours.

*Total Estimated Burden:* 73,476 hours.

## B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

## C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. 3507.

To learn more about how to make an accessible telephone call, please visit <https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs>. Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

**SUPPLEMENTARY INFORMATION:** This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

## A. Overview of Information Collection

*Title of Information Collection:* Multifamily Project Monthly Accounting Reports.

*OMB Approval Number:* 2502-0108.

*OMB Expiration Date:* September 30, 2020.

*Type of Request:* Reinstatement, without change, of previously approved collection for which approval has expired.

*Form Number:* HUD-93479, HUD-93480, and HUD-93481.

*Description of the need for the information and proposed use:* This information is necessary for HUD to monitor compliance with contractual agreements and to analyze cash flow trends as well as occupancy and rent collection levels.

*Respondents:* Business and other for profit and non-profit entities.

*Estimated Number of Respondents:* 8,192.

*Estimated Number of Responses:* 1,638.

*Frequency of Response:* 12.

*Average Hours per Response:* 0.08 each.

*Total Estimated Burden:* 4,719 hours.

## B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

**60-Day Notice of Proposed Information Collection: Mortgage Insurance for Cooperative and Condominium Housing, OMB Control No.: 2502–0141**

**AGENCY:** Office of the Assistant Secretary for Housing–Federal Housing Commissioner, HUD.

**ACTION:** Notice.

**SUMMARY:** HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

**DATES:** *Comments Due Date:* January 17, 2023.

**ADDRESSES:** Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Colette Pollard, Reports Management Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Room 4176, Washington, DC 20410–5000; telephone 202–402–3400 (this is not a toll-free number) or email at [Colette.Pollard@hud.gov](mailto:Colette.Pollard@hud.gov) for a copy of the proposed forms or other available information. HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech and communication disabilities. To learn more about how to make an accessible telephone call, please visit <https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs>.

**FOR FURTHER INFORMATION CONTACT:** Colette Pollard, Reports Management Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email Colette Pollard at [Colette.Pollard@hud.gov](mailto:Colette.Pollard@hud.gov) or telephone 202–402–3400. This is not a toll-free number. HUD

welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech and communication disabilities. To learn more about how to make an accessible telephone call, please visit <https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs>. Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

**SUPPLEMENTARY INFORMATION:** This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

**A. Overview of Information Collection**

*Title of Information Collection:* Mortgage Insurance for Cooperative and Condominium Housing.

*OMB Approval Number:* 2502–0141.

*OMB Expiration Date:* November 30, 2020.

*Type of Request:* Reinstatement, without change, of previously approved collection for which approval has expired.

*Form Number:* HUD–93201.

*Description of the need for the information and proposed use:* The information collected on the “Application for Mortgage Insurance for Cooperative Housing” form is used to analyze data, cost data, drawings, and specifications to determine cooperative or condominium project eligibility for FHA mortgage insurance.

*Respondents:* 12.

*Estimated Number of Respondents:* 12.

*Estimated Number of Responses:* 12.

*Frequency of Response:* On Occasion.

*Average Hours per Response:* 2.

*Total Estimated Burden:* 24.

**B. Solicitation of Public Comment**

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency’s estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

**C. Authority**

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. 3507.

**Jeffrey D. Little,**

*General Deputy Assistant Secretary, Office of Housing.*

[FR Doc. 2022–25145 Filed 11–17–22; 8:45 am]

**DEPARTMENT OF THE INTERIOR**
**Fish and Wildlife Service**

[Docket No. FWS–R1–ES–2022–0029; ES1114010000–234–FF01E0000]

**Draft Environmental Impact Statement for the Elliott State Research Forest Habitat Conservation Plan in Coos and Douglas Counties, OR**

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of availability; notice of public meeting; request for comments.

**SUMMARY:** We, the U.S. Fish and Wildlife Service (FWS) and the National Marine Fisheries Service (NMFS) (together, the Services), have received two separate incidental take permit (ITP) applications from the Oregon Department of State Lands (ODSL; applicant), associated with ODSL’s Elliott State Research Forest habitat conservation plan (HCP). The applications, including the HCP, have been submitted pursuant to the Endangered Species Act. ODSL is seeking authorization from the Services for the incidental take of three species (two under FWS jurisdiction, and one under NMFS jurisdiction), expected to result from research and management activities on the Elliott State Forest in Coos and Douglas Counties, Oregon. In accordance with the National Environmental Policy Act (NEPA), this notice also announces the availability of a draft environmental impact statement (DEIS). FWS is the lead Federal agency under NEPA, and NMFS is a cooperating agency. We invite public comments on the HCP and DEIS from the public and Federal, Tribal, State, and local governments.

**DATES:**

*Submitting Comments:* We will accept online or hardcopy comments.

Hardcopy comments must be received or postmarked on or before January 3, 2023. (See **ADDRESSES.**) Comments submitted online at <https://www.regulations.gov/> must be received

by 11:59 p.m. Eastern Time on January 3, 2023.

**Virtual Public Meeting:** FWS will hold a virtual public meeting on December 13, 2022, from 2 to 3:30 p.m. Pacific Time. For more information, see Public Comments and Virtual Public Meeting under **SUPPLEMENTARY INFORMATION**.

#### ADDRESSES:

**Submitting Comments:** You may submit comments by one of the following methods:

- **Internet:** <https://www.regulations.gov>. Follow the instructions for submitting comments on Docket No. FWS-R1-ES-2022-0029.

- **U.S. Mail:** Public Comments Processing; Attn: Docket No. FWS-R1-ES-2022-0029; U.S. Fish and Wildlife Service Headquarters, MS: PRB/3W; 5275 Leesburg Pike, Falls Church, VA 22041-3803.

We will post all comments on <https://www.regulations.gov>. This generally means that we will post online any personal information that you provide. We request that you submit comments by only the methods above. For additional information about submitting comments, see Public Comments and Virtual Public Meeting under **SUPPLEMENTARY INFORMATION**.

**Public Meeting:** A link and access instructions to the virtual meeting will be posted to <https://www.fws.gov/project/elliott-state-research-forest-habitat-conservation-plan/> at least 1 week prior to the public meeting date.

**Reviewing U.S. Environmental Protection Agency (EPA) Comments on the Draft HCP and DEIS:** See EPA's Role in the EIS Process under **SUPPLEMENTARY INFORMATION**.

#### FOR FURTHER INFORMATION CONTACT:

Shauna Everett, by telephone at 503-231-6949, or by email at [shauna\\_everett@fws.gov](mailto:shauna_everett@fws.gov). Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

**SUPPLEMENTARY INFORMATION:** We, the U.S. Fish and Wildlife Service (FWS), have prepared a draft environmental impact statement (DEIS) pursuant to the requirements of the National Environmental Policy Act of 1969, as amended (NEPA; 42 U.S.C. 4321 *et seq.*) to evaluate applications for incidental take permits (ITPs) received on October 10, 2022, from the Oregon Department of State Lands (ODSL; applicant). ODSL

submitted two applications, one for two species under FWS jurisdiction, and the second application for one species under National Marine Fisheries Service (NMFS) jurisdiction. NMFS is a cooperating agency under NEPA. In support of the ITP applications, the ODSL prepared the draft Elliott State Research Forest Habitat Conservation Plan (ESRF HCP), which, among other components, specifies the impacts that will likely result from the take of covered species, describes the steps the applicant will take to avoid, minimize, and mitigate such impacts, and explains the funding available to implement such steps.

#### Background

Section 9 of the Endangered Species Act (ESA; 16 U.S.C. 1531 *et seq.*) prohibits "take" of fish and wildlife species listed as endangered under section 4 (16 U.S.C. 1538 and 16 U.S.C. 1533, respectively). The ESA implementing regulations extend, under certain circumstances, the prohibition of take to threatened species (50 CFR 17.31). Under section 3 of the ESA, the term "take" means to "harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or attempt to engage in any such conduct" (16 U.S.C. 1532(19)). The term "harm" is defined by FWS regulations as "an act which actually kills or injures wildlife. Such act may include significant habitat modification or degradation where it actually kills or injures wildlife by significantly impairing essential behavioral patterns, including breeding, feeding, or sheltering" (50 CFR 17.3; see 50 CFR 222.102 for NMFS regulations).

Under section 10(a) of the ESA, the Services may issue permits to authorize incidental take of listed fish and wildlife species. "Incidental take" is defined by the ESA as take that is incidental to, and not the purpose of, carrying out an otherwise lawful activity. Section 10(a)(1)(B) of the ESA contains provisions for issuing ITPs to non-Federal entities for the take of endangered and threatened species, provided the following criteria are met:

1. The taking will be incidental;
2. The applicant will, to the maximum extent practicable, minimize and mitigate the impact of such taking;
3. The applicant will ensure that adequate funding for the plan will be provided;
4. The taking will not appreciably reduce the likelihood of the survival and recovery of the species in the wild; and
5. The applicant will carry out any other measures that FWS (or NMFS)

may require as being necessary or appropriate for the purposes of the HCP.

#### Applicant's Proposal

In accordance with the requirements of the ESA, ODSL is requesting authorization of incidental take of the threatened northern spotted owl (*Strix occidentalis caurina*), threatened marbled murrelet (*Brachyramphus marmoratus*), and threatened Oregon Coast coho salmon (*Oncorhynchus kisutch*) (together, the covered species), each of which is known to occur in the Elliott State Forest. Incidental take permits for the northern spotted owl and marbled murrelet fall under the jurisdiction of FWS; incidental take permits for the Oregon Coast coho salmon fall under the jurisdiction of NMFS.

ODSL is seeking incidental take coverage for a variety of research and management activities on the Elliott State Forest, located in Coos and Douglas Counties in southwestern Oregon. The proposed covered activities include forest research treatments, timber removal, forest and species research projects, supporting management activities, supporting infrastructure management, and activities identified in the conservation strategy and monitoring program that may result in effects on covered species. These activities are described further in the draft HCP and in the DEIS. The proposed permit term is 80 years.

The draft HCP and DEIS include analyses of projected impacts to covered species. ODSL anticipates that take of northern spotted owl or murrelets is likely to occur as a result of habitat loss and modification. For this reason, and because it is not practical to detect take of individual northern spotted owls or marbled murrelets, ODSL has established modeled habitat units as a surrogate for use in take estimates. Similarly, to estimate take for Oregon Coast coho salmon, ODSL established surrogate habitat units based on the proportion of each independent population within the permit area and the acres of projected harvest levels within the watersheds that overlap with each evolutionarily significant unit. More details regarding ODSL's methodology for estimating and quantifying take and related conservation outcomes over time can be found in the draft HCP.

Measures to minimize and mitigate impacts on covered species are described in the draft HCP for each species as conservation measures and conditions on covered activities, guided by goals and objectives in the conservation strategy of the HCP. ODSL

would monitor implementation of these measures for compliance and effectiveness. Minimization and mitigation measures are subject to adaptive management to ensure their effectiveness, and to ensure achievement of the ESRF HCP's biological goals and objectives.

The ESRF HCP includes funding information and assurances, monitoring requirements, adaptive management, and provisions for changed and unforeseen circumstances to help ensure conservation outcomes for the covered species over the permit term. Annual reports to the Services would confirm the amount, type, and location of impacts and mitigation, as well as the status of monitoring, adaptive management, changed circumstances, and funding.

### National Environmental Policy Act Compliance

#### *Draft Environmental Impact Statement*

The FWS, with input from NMFS as a cooperating agency, prepared a draft environmental impact statement (DEIS) to evaluate the impacts of the proposed ITP action on the human environment, consistent with the purpose and goals of NEPA (42 U.S.C. 4321 *et seq.*). This DEIS was prepared pursuant to the Council on Environmental Quality's implementing NEPA regulations at 40 CFR parts 1500–1508, which became effective on May 20, 2022 (April 20, 2022, 87 FR 23453). The DEIS analyzes the proposed action and a reasonable range of alternatives to the proposed action. The environmental consequences of each alternative, including the direct, indirect, and cumulative effects, were analyzed to determine if significant impacts to the human environment would occur. Four alternatives are analyzed in detail in the DEIS.

**Alternative 1—No-Action Alternative:** The Services would not issue incidental take authorizations to ODSL, and ODSL would not implement the HCP. ODSL's mandate to manage lands under its jurisdiction with the objective of obtaining the greatest benefit for the people of the State, consistent with the conservation of the resource under sound techniques of land management, would remain in place, and ODSL would continue to be subject to the ESA as well as other Federal, State, and local requirements for any forest management activities in the Elliott State Forest. The No Action alternative assumes that ODSL would manage the Elliott State Forest for timber harvest using a take avoidance approach to ESA compliance.

**Alternative 2—Proposed Action:** The Services would, in accordance with applicable law, issue the requested ITPs to ODSL for the incidental take of covered species from covered activities in the permit area and implementation of the conservation strategy for a term of 80 years. ODSL would implement the ESRF HCP and its conservation strategy, including conditions on covered activities, mitigation measures to offset the impacts of the taking on covered species, and monitoring and reporting requirements. ODSL would provide funding for HCP implementation.

**Alternative 3—Increased Conservation:** The Services would, in accordance with applicable law, issue ITPs to ODSL with the same permit area, permit term, covered species, and monitoring and adaptive management program as the proposed action. The HCP's covered activities and conservation strategy would be modified to allocate additional covered species' habitat and forest stands of a certain age ( $\leq 80$  years) to reserves; expand protected riparian areas around certain categories of streams, prohibit harvest activities such as restoration thinning on steep slopes and in stands of a certain age ( $> 65$  years), and implement additional conditions for permanent new road miles and vacated roads.

**Alternative 4—Increased Harvest:** The Services would issue ITPs to ODSL with the same permit area, covered activities, covered species, permit term, and monitoring and adaptive management program as the proposed action. The HCP's research design would be modified to eliminate reserve areas located outside of occupied and modeled potential marbled murrelet habitat. In these areas, intensive and extensive prescriptions would be applied to stands under 65 years of age as of 2020 and over 65 years of age as of 2020, respectively. Protected riparian areas would be reduced around certain categories of streams and on the Lower Millicoma River. Under this alternative, the requirement for no net increase in permanent road miles in certain conservation areas would not apply.

#### *EPA's Role in the EIS Process*

The EPA is charged under section 309 of the Clean Air Act with reviewing all Federal agencies' EISs and commenting on the adequacy and acceptability of the environmental impacts of proposed actions. Under the CEQ NEPA regulations, EPA is also responsible for administering the EIS filing process. EPA is publishing a notice in the **Federal Register** announcing this DEIS. The publication date of EPA's notice of

availability is the official beginning of the public comment period. EPA serves as the repository (EIS database) for EISs prepared by Federal agencies. You may search for EPA comments on EISs, along with EISs themselves, at <https://cdxapps.epa.gov/cdx-enepa-II/public/action/eis/search>.

### Public Comments and Virtual Public Meeting

#### *Submitting Comments*

You may submit your comments and materials on the draft HCP and the DEIS by one of the methods in **ADDRESSES**. We specifically request information on the following:

1. Biological information, analysis, and relevant data concerning the covered species, other wildlife, and ecosystems.
2. Potential effects that the proposed permit actions could have on the covered species, and other endangered or threatened species, and their habitats, including the interaction of the effects of the project with climate change and other stressors.
3. Adequacy of the proposed actions to minimize and mitigate the impact of the taking on covered species, including but not limited to conservation measures, conditions on covered activities, and adaptive management procedures.
4. Potential effects that the proposed permit action could have on other aspects of the human environment, including effects on plants and animals, water resources, and aesthetic, historic, cultural, economic, social, environmental justice, climate change, or health effects.
5. The alternatives analysis conducted by FWS, including the alternatives analyzed, the range of alternatives analyzed, and the alternatives considered but not analyzed in detail.
6. The presence of historic properties—including archaeological sites, buildings and structures, historic events, sacred and traditional areas, and other historic preservation concerns—in the proposed permit area, which are required to be considered in project planning by the National Historic Preservation Act.
7. Cumulative effects, which are effects on the environment that result from the incremental effects of the action when added to the effects of other past, present, and reasonably foreseeable actions, as well as any connected actions that are closely related and should be discussed in the same DEIS.
8. The alternatives, information, and analyses submitted during the public

scoping period and the summary thereof.

9. Other information relevant to the ESRF HCP and its impacts on the human environment.

#### *Virtual Public Meeting*

To provide for the wide attendance of interested parties and help protect the public from potential spread of the COVID-19 virus, a virtual public meeting will be conducted. See **DATES** and **ADDRESSES** for the date and time of the virtual public meeting. During the virtual public meeting, ODSL and the Services will present information pertinent to the ESRF HCP and give the public the opportunity to ask questions about the draft HCP and DEIS. Oral comments will not be accepted during the meeting; written comments may be submitted by the methods listed in **ADDRESSES**.

#### *Reasonable Accommodations*

Persons needing reasonable accommodations in order to participate in the public meeting should contact the Service's Oregon Fish and Wildlife Office as soon as possible, using one of the methods listed in **ADDRESSES**. In order to allow sufficient time to process requests, please make contact at least 15 days before the public meeting. Information regarding this proposed action is available in alternative formats upon request.

#### *Public Availability of Comments*

You may submit your comments and materials by one of the methods listed in **ADDRESSES**. Before including your address, phone number, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—might be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Comments and materials we receive, as well as references for supporting documentation we used in preparing the DEIS, will be available for public inspection online in Docket No. FWS-R1-ES-2022-0029 at <https://www.regulations.gov/> (see **FOR FURTHER INFORMATION CONTACT**).

#### **Next Steps and Decision To Be Made**

After public review and comment, the Services will evaluate the respective permit applications, associated documents, and any comments received, to determine whether the permit applications meet the requirements of section 10(a)(1)(B) of the ESA. The decisions will also be informed by the data, analyses, and findings in the EIS and public comments received on the Draft EIS and HCP. The Services will each document their determinations independently in an ESA section 10 findings document, ESA section 7 biological opinion, and a NEPA record of decision developed at the conclusion of the ESA and NEPA compliance processes. FWS expects to submit a Final EIS for publication in the **Federal Register** by June 2023. At least 30 days after the FEIS is published, we expect that the Services will complete records of decision on the requested ITPs in accordance with applicable timeframes established in 40 CFR 1506.11, and that the Services will issue decisions on the requested ITPs. The current estimate for the issuance of records of decision is August 2023.

#### **Authority**

We provide this notice in accordance with the requirements of section 10(c) of the ESA (16 U.S.C. 1539(c)) and NEPA and its implementing regulations (40 CFR 1503.1 and 1506.6).

**Nanette Seto,**

*Acting Deputy Regional Director, U.S. Fish and Wildlife Service.*

[FR Doc. 2022-24980 Filed 11-17-22; 8:45 am]

**BILLING CODE 4333-15-P**

#### **DEPARTMENT OF THE INTERIOR**

**[Docket No. FWS-R6-ES-2014-0048; FXES11140600000-234-FF06E22000]**

#### **Notice of Intent To Prepare a Supplemental Environmental Impact Statement for the R-Project Transmission Line Revised Habitat Conservation Plan, Nebraska**

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of intent; virtual public scoping meeting; request for comments.

**SUMMARY:** We, the U.S. Fish and Wildlife Service (FWS), provide this notice to open a public scoping period and announce virtual public scoping meetings, in accordance with requirements of the National Environmental Policy Act and its

implementing regulations. The scoping period is associated with the preparation of a supplemental environmental impact statement (SEIS) to the February 2019 *Final Environmental Impact Statement on Issuance of an Incidental Take Permit and Implementation of a Habitat Conservation Plan for the R-Project Transmission Line*. Nebraska Public Power District (NPPD, applicant) is preparing a revised habitat conservation plan (HCP) in support of its anticipated resubmission of an application for an incidental take permit (ITP) under the Endangered Species Act (ESA) for activities it will undertake in constructing, operating, and maintaining a new transmission line (known as the R-Project) in central Nebraska. The SEIS will evaluate the impacts on the human environment related to the proposed issuance of the ITP and implementation of the HCP, including addressing the issues identified by the U.S. District Court for the District of Colorado in its remand of the ITP that FWS issued June 12, 2019.

#### **DATES:**

**Submitting Comments:** We will accept online or hardcopy comments. Hardcopy comments must be received or postmarked on or before December 19, 2022. (See **ADDRESSES**.) Comments submitted online at <https://www.regulations.gov/> must be received by 11:59 p.m. Eastern Time on December 19, 2022.

**Public Meetings:** The FWS will hold 2 virtual public scoping meetings during the scoping period at the following times:

- December 8, 2022, at 10:00 a.m. CST.
- December 8, 2022, at 6:30 p.m. CST.

Registration and information on the virtual public meetings are available at <https://www.fws.gov/project/r-project-transmission-line>. Additionally, a recording of a public scoping meeting will be available for viewing by the public online, at <https://www.fws.gov/project/r-project-transmission-line> and at the following locations:

- North Platte Public Library, 120 W 4th St., North Platte, NE 69101;
- Thomas County Library, 501 Main St., Thedford, NE 69166;
- Taylor Public Library, 106 William St., Taylor, NE 68879.

#### **ADDRESSES:**

**Submitting Comments:** You may submit comments by one of the following methods:

- **Internet:** <https://www.regulations.gov/>. Follow the instructions for submitting comments on FWS-R6-ES-2014-0048.

• *U.S. mail*: Public Comments Processing; Attn: Docket No. FWS–R6–ES–2014–0048; U.S. Fish and Wildlife Service Headquarters, MS: PRB/3W; 5275 Leesburg Pike, Falls Church, VA 22041–3803.

For additional information about submitting comments, see Public Scoping Process under **SUPPLEMENTARY INFORMATION**.

**FOR FURTHER INFORMATION CONTACT:** Jeff Runge, by telephone at 308–382–6468, or by email at [jeff\\_runge@fws.gov](mailto:jeff_runge@fws.gov). Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

**SUPPLEMENTARY INFORMATION:** The U.S. Fish and Wildlife Service (FWS) issued an incidental take permit (ITP) to Nebraska Public Power District (NPPD) on June 12, 2019, authorizing incidental take of the American burying beetle (*Nicrophorus americanus*) that would result from the R-Project, a 345,000-volt, 226-mile-long transmission line. The **Federal Register** notice of availability for ITP, Habitat Conservation Plan (HCP), and Final Environmental Impact Statement published on February 8, 2019 (84 FR 2900). The proposed project starts at NPPD's Gerald Gentleman Substation near Sutherland, Nebraska; goes north to a 345 kV substation located in Thomas County near Thedford; and then extends eastward to another 345 kV substation sited in Holt County, which is to interconnect with Western Area Power Administration's existing Fort Thompson to Grand Island 345 kV line that is located on the eastern border of Holt County.

The purpose of the R-Project is three-fold: (1) relieve electrical congestion within the existing transmission system; (2) enhance system reliability; and (3) provide opportunities for development of renewable resources. On June 17, 2020, the U.S. District Court for the District of Colorado issued a decision on a lawsuit challenging the FWS's decision to issue the ITP under the Endangered Species Act (ESA), National Environmental Policy Act (NEPA), and the National Historic Preservation Act. In its ruling, the court vacated and remanded the ITP to the FWS for further proceedings consistent with the court's order. The FWS is preparing a Supplemental Environmental Impact Statement (SEIS) to address the anticipated resubmission of NPPD's ITP

application, the issues identified by the court, and to address new information and changes in circumstances, as relevant, to the R-Project Revised HCP.

In accordance with section 10(a)(2)(A) of the ESA, NPPD intends to submit the Revised HCP to the FWS in support of a resubmitted application for an ITP for the threatened American burying beetle. The requested ITP would authorize incidental take of the American burying beetle likely to result from construction and anticipated emergency repairs of the R-Project. The Revised HCP is required to include measures to minimize and mitigate the impacts of the taking on American burying beetle to the maximum extent practicable.

We intend to prepare a draft SEIS and, later, a final SEIS, to evaluate the effects on the human environment of issuing an ITP under the anticipated resubmitted application, and NPPD's implementation of the R-Project Revised HCP. The SEIS is necessary to meet our requirements under NEPA; 42 U.S.C. 4321 *et seq.*) and its implementing regulations. The FWS's purpose and need for the proposed action is to (1) process the applicant's resubmitted request for an ITP and (2) either grant, grant with conditions, or deny the ITP request in compliance with the FWS's authority under applicable law, including, without limitation, section 10(a)(1)(B) of the ESA and applicable ESA implementing regulations.

#### **Preliminary Proposed Action and Alternatives**

Consistent with 40 CFR 1501.9(d)(2), the preliminary description of the proposed action is issuance of an ITP authorizing incidental take of a covered species in association with covered activities and Revised HCP implementation.

The draft SEIS will include a reasonable range of alternatives, which may include but are not limited to scope of the covered activities, variations in the level of permitted take, the length of the permit term, type of conservation minimization and mitigation measures, and implementation and effectiveness monitoring. Additionally, a No Action Alternative will be included, in which the FWS would not issue an ITP and would assume that NPPD would not construct the R-Project.

#### **Background**

Section 9 of the ESA prohibits “take” of fish and wildlife species listed as endangered under section 4 (16 U.S.C. 1538 and 16 U.S.C. 1533, respectively). The ESA implementing regulations extend, under certain circumstances, the prohibition of take to threatened species

(50 CFR 17.31). Under section 3 of the ESA, the term “take” means to “harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or attempt to engage in any such conduct” (16 U.S.C. 1532(19)). The term “harm” is defined by regulations as “an act which actually kills or injures wildlife” (50 CFR 17.3). “Such act may include significant habitat modification or degradation where it actually kills or injures wildlife by significantly impairing essential behavioral patterns, including breeding, feeding, or sheltering” (50 CFR 222.102).

Under section 10(a) of the ESA, FWS may issue permits to authorize incidental take of listed fish and wildlife species. “Incidental take” is defined by the ESA as take that is incidental to, and not the purpose of, carrying out an otherwise lawful activity. Section 10(a)(1)(B) of the ESA contains provisions for issuing ITPs to non-Federal entities for the take of endangered and threatened species, provided the following criteria are met:

1. The taking will be incidental;
2. The applicant will, to the maximum extent practicable, minimize and mitigate the impact of such taking;
3. The applicant will ensure that adequate funding for the plan will be provided;
4. The taking will not appreciably reduce the likelihood of the survival and recovery of the species in the wild; and
5. The applicant will carry out any other measures the FWS may require as being necessary or appropriate for the purposes of the HCP.

#### **R-Project Revised Habitat Conservation Plan**

NPPD intends to implement the R-Project Revised HCP to cover construction and anticipated emergency repairs of the R-Project. The R-Project Revised HCP includes measures to minimize and mitigate impacts of the taking on American burying beetle. NPPD is expected to request a 50-year ITP from the FWS.

#### **Covered Activities**

The proposed covered activities will likely include:

- *Access*: Creation of temporary access routes and permanent access roads.
- *Right-of-way preparation*: Removal of trees and tall brush from the 200-foot-wide right-of-way.
- *Temporary work areas*: Grading and filling to create temporary work areas including assembly areas, construction yard, staging areas, and structure work areas.

- *Tower installation*: Construction associated with power line foundation installation and structure erection.

- *Power line installation*: Stringing, pulling, and tensioning necessary for power line placement on towers.

- *Relocation of existing infrastructure*: Relocation of existing overhead distribution power lines and livestock and center-pivot irrigation wells to outside the right-of-way.

- *Emergency repairs*: Repairs to isolated damages, such as single insulators or weak points on conductors, as well as large-scale repairs following damage from severe weather events.

- *HCP Implementation Activities*: Activities identified in the conservation strategy and monitoring program that may result in short-term effects on covered species.

#### Covered Species

The American burying beetle is the species anticipated to be proposed for coverage under the R-Project Revised HCP and ITP. The American burying beetle is known to occur within the proposed corridor for the R-Project. The R-Project Revised HCP will include an analysis of impacts to American burying beetle and methodology for estimating and quantifying take from covered activities and minimization and mitigation measures. The R-Project Revised HCP is anticipated to include analysis of evaluated species, which are species that may occur in the project area but for which NPPD is not requesting take authorization. The HCP describes measures to avoid take of these species. Species anticipated as evaluated species may include the following:

Bald eagle (*Haliaeetus leucocephalus*)

Blanding's turtle (*Emydoidea blandingii*)

Blowout penstemon (*Penstemon haydenii*)

Golden eagle (*Aquila chrysaetos*)

Northern long-eared bat (*Myotis septentrionalis*)

Tricolored bat (*Perimyotis subflavus*)

Piping plover (*Charadrius melodus*)

Rufa red knot (*Calidris canutus rufa*)

Topeka shiner (*Notropis topeka* [=tristis])

Western prairie-fringed orchid (*Platanthera praeclara*)

Whooping crane (*Grus americana*)

Measures to minimize and mitigate impacts on the American burying beetle will be described in the Revised HCP as conservation measures and conditions on covered activities, guided by goals and objectives in the conservation strategy of the Revised HCP. These

measures would be systematically implemented and monitored for success. Impacts would be offset by the protection of high-quality habitat for the American burying beetle. Minimization and mitigation measures are subject to adaptive management to ensure their effectiveness and to ensure achievement of the R-Project HCP's biological goals and objectives.

The R-Project Revised HCP will include funding information and assurances, monitoring requirements, adaptive management, and changed circumstance provisions to help ensure conservation outcomes for American burying beetle. Annual reports would confirm the amount, type, and location of impacts and mitigation, as well as the status of monitoring, adaptive management, changed circumstances, and funding.

#### Summary of Expected Impacts

The draft SEIS will identify and describe the effects of the proposed Federal action on the human environment that are reasonably foreseeable, including direct, indirect, and cumulative effects. This includes effects that occur at the same time and place as the proposed action or alternatives and effects that are later in time or farther removed in distance from the proposed action or alternatives. Expected impacts may include, but are not limited to, positive and negative impacts to the American burying beetle, biological resources, visual resources/aesthetics, and cultural and historic resources. The effects of these expected impacts will be analyzed in the SEIS (see 40 CFR 1508.1(g) and 40 CFR 1502.16).

#### Schedule for the Decision Making Process

The FWS will conduct an environmental review to analyze the effects of the proposed permit action, along with other alternatives considered and the associated impacts of each alternative for the development of the draft SEIS. Following completion of the environmental review, the FWS will publish a notice of availability and request for public comments on the draft SEIS and the draft Revised HCP resubmitted with the ITP application. The FWS expects to make the draft SEIS and draft HCP available to the public in summer 2023. After public review and comment, the FWS will evaluate the permit application and associated documents, and any comments received, to determine whether the requirements of section 10(a)(2) of the ESA and implementing permit regulations are met. The FWS expects to

make the final SEIS and final Revised HCP available to the public in spring 2024. At least 30 days after the final SEIS is available, the FWS's record of decision will be completed in accordance with applicable timeframes established in 40 CFR 1506.11. If appropriate, the FWS would issue the ITP after the issuance of the record of decision. If issued, the permit may include such terms and conditions deemed necessary or appropriate to carry out the purposes of the ITP and the Revised HCP.

#### Public Scoping Process

##### Virtual Public Meeting

This notice of intent initiates the scoping process, which aids in the development of the EIS.

See **DATES** and **ADDRESSES** for the date and time of the virtual public scoping meetings. The virtual public scoping meetings will provide FWS with an opportunity to present to the public information pertinent to the R-Project Revised HCP, and for the public to ask questions on the scope of issues and alternatives that FWS should consider when preparing the SEIS. We will accept only written comments. Written comments may be submitted by the methods listed in **ADDRESSES**.

##### Reasonable Accommodations

Persons needing reasonable accommodations to attend and participate in the virtual public scoping meetings should contact the FWS's Nebraska Ecological Services Field Office (see **FOR FURTHER INFORMATION CONTACT**) as soon as possible. To allow sufficient time to process requests, please make contact no later than 1 week before the desired public meeting. Information and documents are available in alternative formats upon request.

##### Request for Information

We request comments on the proposed action, concerning the scope of the analysis and identification of relevant information, studies, and analyses from the public; affected Federal, State, Tribal, and local governments, agencies, and offices; the scientific community; industry; or any other interested party. We will consider these comments in developing the draft SEIS. Specifically, we seek:

1. Biological information, analysis, and relevant data concerning the covered species, evaluated species, and other wildlife;
2. Potential effects that the proposed permit action could have on the covered species, and/or other endangered or

threatened species, and their associated ecological communities or habitats;

3. Potential effects that the proposed permit action could have on other aspects of the human environment;

4. Other possible reasonable alternatives that FWS should consider, including additional or alternative avoidance, minimization, and mitigation measures;

5. The presence of historic properties—including archaeological sites, buildings, and structures; historic events; sacred and traditional areas; and other historic preservation concerns—in the proposed plan and permit area, which are required to be considered in project planning by the National Historic Preservation Act;

6. Information on other current or planned activities in, or in the vicinity of, the R-Project and their possible impacts on the covered species, including any connected actions that are closely related and should be discussed in the same draft SEIS; and

7. Other information relevant to the R-Project Revised HCP and its impacts on the human environment.

#### Public Availability of Comments

You may submit your comments and materials by one of the methods listed in **ADDRESSES**. Before including your address, phone number, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—might be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Comments and materials we receive, as well as supporting documentation we use in preparing the DEIS, will be available for public inspection online in Docket No. FWS-R6-ES-2014-0048, at <https://www.regulations.gov/>.

#### Next Steps

Once the draft SEIS is prepared, there will be further opportunity for comment on the proposed permit action through an additional public comment period.

#### Lead and Cooperating Agencies

The FWS is the lead agency for the NEPA process. Cooperating agencies include the Advisory Council on Historic Preservation, History Nebraska,

the Nebraska Game and Parks Commission, the National Park Service, the U.S. Army Corps of Engineers, and the U.S. Environmental Protection Agency. The FWS welcomes inquiries from other Federal, State, or Tribal, or local agencies potentially interested in being a cooperating agency for the NEPA process.

#### Decisionmakers and Nature of Decision To Be Made

The decisionmaker is the FWS Regional Director of the Mountain-Prairie Region. If, after publication of the record of decision, the agencies determine that all requirements are met for ITP issuance, the decisionmaker will issue a decision on the requested ITP.

#### Authority

We provide this notice in accordance with the requirements of section 10(c) of the ESA (16 U.S.C. 1539(c)) and NEPA regulations on the publication of a notice of intent to issue an EIS (40 CFR 1501.9(d)).

#### Drue DeBerry,

*Acting Assistant Regional Director, Ecological Services, Mountain-Prairie Region.*

### Fish and Wildlife Service

**[FWS-HQ-FAC-2022-N059;  
FXFR13360900000-FF09F14000-201]**

#### Aquatic Nuisance Species Task Force Meeting

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of meeting.

**SUMMARY:** The U.S. Fish and Wildlife Service gives notice of a public meeting of the Aquatic Nuisance Species (ANS) Task Force, in accordance with the Federal Advisory Committee Act. The ANS Task Force's purpose is to develop and implement a program for U.S. waters to prevent introduction and dispersal of aquatic invasive species; to monitor, control, and study such species; and to disseminate related information.

**DATES:** The ANS Task Force will meet Wednesday and Thursday, January 11–12, 2023, from 8 a.m. to 5 p.m. each day (Eastern Time).

**Registration:** Registration is required. The deadline for registration is January 6, 2023.

**Accessibility:** The deadline for accessibility accommodation requests is

January 6, 2023. Please see *Accessibility Information*, below.

**ADDRESSES:** The ANS Task Force meeting will take place at the U.S. Fish and Wildlife Service Headquarters, 5275 Leesburg Pike, Falls Church, VA 22041. Virtual participation will also be available via teleconference and broadcast over the internet. To register and receive the web address and telephone number for virtual participation, contact the Executive Secretary (see **FOR FURTHER INFORMATION CONTACT**) or visit the ANS Task Force website at <https://www.fws.gov/program/aquatic-nuisance-species-task-force>.

#### FOR FURTHER INFORMATION CONTACT:

Susan Pasko, Executive Secretary, ANS Task Force, by telephone at (703) 358–2466, or by email at [Susan\\_Pasko@fws.gov](mailto:Susan_Pasko@fws.gov). Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

**SUPPLEMENTARY INFORMATION:** The Aquatic Nuisance Species (ANS) Task Force was established by the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990, as amended (16 U.S.C. 4721–4728), and is composed of Federal and ex-officio members. The ANS Task Force's purpose is to develop and implement a program for U.S. waters to prevent introduction and dispersal of aquatic invasive species; to monitor, control, and study such species; and to disseminate related information.

This meeting is open to the public. The meeting agenda will include: reports from ANS Task Force members and subcommittees; discussion on priority outputs to advance the goals identified in the ANS Task Force Strategic Plan for 2020–2025; presentations on new species occurrences in the United States; aquatic invasive species risk mitigation measures, advancement of the early detection rapid response framework, and progress on updating or implementing species management plans; recommendations by the ANS Task Force regional panels; and public comment. The final agenda and other related meeting information will be posted on the ANS Task Force website, <https://www.fws.gov/program/aquatic-nuisance-species-task-force>.

## Public Input

If you wish to provide oral public comment or provide a written comment for the ANS Task Force to consider, contact the ANS Task Force Executive Secretary (see **FOR FURTHER INFORMATION CONTACT**) no later than Friday, January 6, 2023.

Depending on the number of people who want to comment and the time available, the amount of time for individual oral comments may be limited. Interested parties should contact the ANS Task Force Executive Secretary, in writing (see **FOR FURTHER INFORMATION CONTACT**), for placement on the public speaker list for this meeting. Requests to address the ANS Task Force during the meeting will be accommodated in the order the requests are received. Registered speakers who wish to expand upon their oral statements, or those who had wished to speak but could not be accommodated on the agenda, may submit written statements to the Executive Secretary up to 30 days following the meeting.

## Accessibility Information

Please make requests in advance for sign language interpreter services, assistive listening devices, or other reasonable accommodations. Please contact the ANS Task Force Executive Secretary (see **FOR FURTHER INFORMATION CONTACT**) no later than Friday, January 6, 2023, to give the U.S. Fish and Wildlife Service sufficient time to process your request. All reasonable accommodation requests are managed on a case-by-case basis.

## Public Disclosure

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

*Authority:* 5 U.S.C. appendix 2.

## DEPARTMENT OF THE INTERIOR

### Geological Survey

**[GX23ZS00COM0000; OMB Control Number 1028–NEW]**

### Agency Information Collection Activities; AstroLink Community Survey on the Archive, Access, and Use of Planetary Information

**AGENCY:** Geological Survey.

**ACTION:** Notice of information collection; request for comment.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995 (PRA), the U.S. Geological Survey (USGS) is proposing approval of a collection currently in use without approval.

**DATES:** Interested persons are invited to submit comments on or before January 17, 2023.

**ADDRESSES:** Send your comments on this information collection request (ICR) by mail to U.S. Geological Survey, Information Collections Officer, 12201 Sunrise Valley Drive MS 159, Reston, VA 20192; or by email to [gs-info\\_collections@usgs.gov](mailto:gs-info_collections@usgs.gov). Please reference OMB Control Number 1028–NEW in the subject line of your comments.

**FOR FURTHER INFORMATION CONTACT:** To request additional information about this ICR, contact Marc Hunter by email at [mahunter@usgs.gov](mailto:mahunter@usgs.gov) or by telephone at 928–556–7220. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

**SUPPLEMENTARY INFORMATION:** In accordance with the PRA (44 U.S.C. 3501 *et seq.*) and 5 CFR 1320.8(d)(1), all information collections require approval. We may not conduct or sponsor, nor are you required to respond to, a collection of information unless it displays a currently valid OMB control number.

As part of our continuing effort to reduce paperwork and respondent burdens, we invite the public and other Federal agencies to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and

provide the requested data in the desired format.

We are especially interested in public comment addressing the following:

- (1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;
- (2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;
- (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and
- (4) How the agency might minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personally identifiable information (PII) in your comment, you should be aware that your entire comment—including your PII—may be made publicly available at any time. While you can ask us in your comment to withhold your PII from public review, we cannot guarantee that we will be able to do so.

**Abstract:** This survey will gather opinions, experiences, and preferences regarding the state of planetary science information, both for data producers and consumers. The results of this survey will be used to provide summary statistics that reflect all aspects of the planetary science community, to include the interested public, and provide actionable information to stakeholders.

**Title of Collection:** AstroLink Community Survey on the Archive, Access and Use of Planetary Information  
**OMB Control Number:** 1028–NEW.

**Form Number:** None.

**Type of Review:** New.

**Respondents/Affected Public:** Individuals.

**Total Estimated Number of Annual Respondents:** 100.

**Total Estimated Number of Annual Responses:** 100.

**Estimated Completion Time per Response:** 10 minutes.

**Total Estimated Number of Annual Burden Hours:** 17.

**Respondent's Obligation:** Voluntary.

**Frequency of Collection:** One time.

*Total Estimated Annual Nonhour Burden Cost: 0.*

An agency may not conduct or sponsor, nor is a person required to respond to, a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the PRA (44 U.S.C. 3501 *et seq.*).

**Justin Hagerty,**

*USGS Astrogeology Science Center Director, Southwest Region.*

## DEPARTMENT OF THE INTERIOR

### Geological Survey

[GX23EF000COM00; OMB Control Number 1028–0092]

#### Agency information collection Activities; Submission to the Office of Management and Budget for Review and Approval; Topographic and Hydrography Data Grants

**AGENCY:** U.S. Geological Survey, Interior.

**ACTION:** Notice of Information Collection; request for comment.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995 (PRA), the U.S. Geological Survey (USGS) is proposing to renew an information collection with revisions.

**DATES:** Interested persons are invited to submit comments on or before December 19, 2022.

**ADDRESSES:** Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to [www.reginfo.gov/public/do/PRAMain](http://www.reginfo.gov/public/do/PRAMain). Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function. U.S. Geological Survey, Information Collections Officer, 12201 Sunrise Valley Drive MS 159, Reston, VA 20192; or by email to [gs-info\\_collections@usgs.gov](mailto:gs-info_collections@usgs.gov). Please reference OMB Control Number 1028–0092 in the subject line of your comments.

**FOR FURTHER INFORMATION CONTACT:** To request additional information about this Information Collection Request (ICR), contact Susan Buto by email at [sbuto@usgs.gov](mailto:sbuto@usgs.gov), or by telephone at 775–546–3059. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United

States should use the relay services offered within their country to make international calls to the point-of-contact in the United States. You may also view the ICR at <http://www.reginfo.gov/public/do/PRAMain>.

**SUPPLEMENTARY INFORMATION:** In accordance with the PRA and 5 CFR 1320.8(d)(1), we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public’s reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on December 22, 2021 (86 FR 72613). No comments were received.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again soliciting comments from the public and other Federal agencies on the proposed ICR that is described below. We are especially interested in public comment addressing the following:

- (1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;
- (2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;
- (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and
- (4) How the agency might minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personally identifiable information (PII) in your comment, you should be aware that your entire comment—including your PII—may be made publicly available at any time. While you can ask us in your comment to withhold your PII from public review, we cannot guarantee that we will be able to do so.

**Abstract:** The USGS gathers topographic data through the 3D Elevation Program (3DEP) and, contingent on funding, the 3D Hydrography Program (3DHP). The primary goal of 3DEP is to systematically collect three-dimensional (3D) elevation data in the form of high-quality light detection and ranging (lidar) data for the conterminous United States, Hawaii, and the U.S. territories and to collect interferometric synthetic aperture radar (IfSAR) data for Alaska. The primary goal of the 3DHP is to leverage 3DEP data to create a high-precision, z-enabled representation of the surface waters of the United States and its territories. The implementation model for 3DEP is based on multi-agency partnership funding for topographic data acquisition, with the USGS leading management of the program to facilitate planning and acquisition and use of government contracts and partnership agreements for the broader community. The USGS issues an annual Broad Agency Announcement (BAA), which is a competitive solicitation issued to facilitate agreements with partners to collect lidar and derived elevation data for 3DEP. The BAA has been included in the annual Catalog of Federal Domestic Assistance under USGS 15.8 17. Federal agencies, state and local governments, tribes, academic institutions, and the private sector are eligible to submit proposals. The USGS collects information from applicants about their proposed topographic data collection and cost-sharing offers and then uses that information to determine grant awards. Implementation of 3DHP will follow the 3DEP model over time as funding permits. This ICR expands the scope of the collection to include proposals for both the 3DEP and 3DHP BAA activities.

**Title of Collection:** Topographic and Hydrography Data Grants.

**OMB Control Number:** 1028–0092.

**Form Number:** None

**Type of Review:** Extension of a currently approved collection with revision.

**Respondents/Affected Public:** Federal agencies, State and local governments, tribes, academic institutions, and the private sector.

**Total Estimated Number of Annual Respondents:** 80.

**Total Estimated Number of Annual Responses:** 80.

**Estimated Completion Time per Response:** 41 hours.

**Total Estimated Number of Annual Burden Hours:** 3,280.

**Respondent’s Obligation:** Voluntary.  
**Frequency of Collection:** Annually.

*Total Estimated Annual Nonhour Burden Cost:* None.

An agency may not conduct or sponsor, nor is a person required to respond to, a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the PRA (44 U.S.C. 3501 *et seq.*).

**Michael Tischler,**

*Director, USGS National Geospatial Program.*

### Bureau of Land Management

[LLCAD01000.223L1109AF.L12200000.FH0000.LXSSB0280000; MO#4500164048]

#### Notice of Temporary Annual Closure on Public Lands for the King of the Hammers Race, San Bernardino County, CA

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of temporary closure.

**SUMMARY:** As authorized under the provisions of the Federal Land Policy and Management Act of 1976, as amended, the Bureau of Land Management (BLM) is giving notice that certain public lands located near Johnson Valley, California, within the Johnson Valley Off-Highway Vehicle Recreation Area, will be temporarily closed to all public use to enhance public safety during Hammerking Productions' annual King of the Hammers desert race authorized under a 5-year Special Recreation Permit (SRP).

**DATES:** This action is in effect for a 10-day period in January and February each year from 2023 through 2027 for the King of the Hammers race. The race takes place annually from approximately the end of January through mid-February. The next King of the Hammers closure will take place February 2–12, 2023. The week prior to the race will be dedicated to set up and the building of the short course. The BLM will post the dates for King of the Hammers, the dates of the temporary closures, and a map of the closure area at the main entry points into the Johnson Valley Off-Highway Vehicle Recreation Area, the California Desert District Office, the Barstow Field Office, and on the BLM website at the addresses provided below every year at least 30 days prior to the events.

**ADDRESSES:** California Desert District, 1201 Bird Springs Drive, Palm Springs

CA, 92262; Barstow Field Office, 2601 Barstow Road, Barstow CA, 92311; BLM website: [www.blm.gov/california](http://www.blm.gov/california).

#### FOR FURTHER INFORMATION CONTACT:

Dana Stephenson, Outdoor Recreation Planner, 300 South Richmond Rd., Ridgecrest, CA 93555, telephone: (760) 384–5429, email: [dstephenson@blm.gov](mailto:dstephenson@blm.gov). Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

**SUPPLEMENTARY INFORMATION:** This closure applies to all public use, including pedestrian use and vehicles. Over the 5-year SRP (beginning in 2023 and ending in 2027), the annual 10-day closure will comply with the management plan for the area, ensuring that a minimum of three staging areas within the Johnson Valley Off-Highway Vehicle Recreation Area remain open to the public every weekend (Saturday and Sunday) throughout the closure period.

**Exclusive Use:** During the 10-day closure period, the closure area will be for the exclusive use of King of the Hammers participants, registered spectators for the King of the Hammers, and other authorized users with an authorized SRP valid for activities within the closure area.

**Exceptions:** Closure restrictions do not apply to medical and rescue personnel in the performance of their official duties; official United States military and Federal, State, and local law enforcement; Federal, State, and local officers and employees in the performance of their official duties; King of the Hammers event officials and race participants; vendors with a valid BLM SRP; and registered event spectators.

**Enforcement:** Any person who violates the temporary closure order may be tried before a United States Magistrate and fined in accordance with 18 U.S.C. 3571, imprisoned no more than 12 months under 43 U.S.C. 1733(a) and 43 CFR 8360.0–7, or both. In accordance with 43 CFR 8365.1–7, State or local officials may also impose penalties for violations of California law.

(Authority: 43 CFR 8360.0–7 and 8364.1).

**Michelle Lynch,**

*BLM California Desert District Manager.*

### Bureau of Land Management

[LLNM930000.L14400000.BJ0000.BX0000]

#### Notice of Filing of Plat of Survey; New Mexico

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of official filing.

**SUMMARY:** The plat of survey of the following described lands is scheduled to be officially filed 30 days after the date of this publication in the Bureau of Land Management (BLM), New Mexico Office, Santa Fe, New Mexico. The survey announced in this notice is necessary for the management of lands administered by the agency indicated.

**ADDRESSES:** This plat will be available for inspection in the New Mexico Office, Bureau of Land Management, 301 Dinosaur Trail, Santa Fe, New Mexico, 85004–4427. Protests of a survey should be sent to the New Mexico Director at the above address.

#### FOR FURTHER INFORMATION CONTACT:

Michael J. Purtee, Chief Cadastral Surveyor; (505) 761–8903; [mpurtee@blm.gov](mailto:mpurtee@blm.gov). Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339 to contact the above individual during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

#### SUPPLEMENTARY INFORMATION:

##### New Mexico Principal Meridian, New Mexico

The plat, representing the conditional corrective resurvey of a portion of certain tracts in section 8, within the Pojoaque Grant, Township 19 North, Range 9 East, accepted November 9, 2022, for Group 1120, New Mexico.

This plat was prepared to correct the plat requested by the Bureau of Indian Affairs, Southwestern Region, accepted November 2, 2011, for Group 1120, New Mexico.

A person or party who wishes to protest against this survey must file a written notice of protest within 30 calendar days from the date of this publication with the New Mexico Director, Bureau of Land Management, stating that they wish to protest.

A statement of reasons for a protest may be filed with the notice of protest to the State Director, or the statement of reasons must be filed with the State Director within 30 days after the protest

is filed. Before including your address, or other personal information in your protest, please be aware that your entire protest, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

*Authority:* 43 U.S.C. Chap. 3.

### Bureau of Land Management

[223.LLID00000.L1330000.EO0000.241A]

#### Notice of Availability of the Final Environmental Impact Statement for the Proposed Husky 1 North Dry Ridge Phosphate Mine, Caribou County, ID

**AGENCY:** Forest Service, Agriculture (USDA); Bureau of Land Management, Interior.

**ACTION:** Notice of availability.

**SUMMARY:** In compliance with the National Environmental Policy Act of 1969, as amended and the Federal Land Policy and Management Act of 1976, as amended, the Bureau of Land Management (BLM) and the U.S. Department of Agriculture, Forest Service (USFS) Caribou-Targhee National Forest (CTNF), announce the availability of the Final Environmental Impact Statement (EIS) for the proposed Husky 1 North Dry Ridge Phosphate Mine (Project).

**DATES:** The Final EIS and the USFS Draft Record of Decision (ROD) are now available for public review. A 45-day objection period for the USFS Draft ROD will start when the USFS publishes a legal notice in the newspaper of record. The BLM will not issue a decision on the proposal for a minimum of 30 days after the date that the Environmental Protection Agency (EPA) publishes its Notice of Availability (NOA) in the **Federal Register**. The USFS will issue a Final ROD following resolution of any objections.

**ADDRESSES:** The Final EIS and documents pertinent to this proposal are available for review on the BLM ePlanning project website at <https://>

[go.usa.gov/x7HSJ](https://go.usa.gov/x7HSJ); the Caribou-Targhee National Forest Current and Recent Projects at <http://www.fs.usda.gov/projects/ctnf/landmanagement/projects>; or at the BLM Pocatello Field Office at 4350 Cliffs Drive, Pocatello, ID 83204.

**FOR FURTHER INFORMATION CONTACT:** Wes Gilmer, BLM Pocatello Field Office, 4350 Cliffs Drive, Pocatello, ID 83204; phone (208) 478–6369; email: [wgilmer@blm.gov](mailto:wgilmer@blm.gov); fax (208) 478–6376.

Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Mr. Gilmer. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

**SUPPLEMENTARY INFORMATION:** Itafos Conda LLC (Itafos) submitted a proposed mine and reclamation plan (MRP) for the Husky 1 North Dry Ridge Phosphate Mine to conduct operations and recover phosphate ore from existing leases (IDI–8289, IDI–05549, I–04, and IDI–0678). The MRP proposes surface mining, support and reclamation activities on approximately 1,146 acres of mostly National Forest System (NFS) land. A modification (enlargement by 559 acres) of Federal phosphate lease IDI–05549 to recover adjacent ore reserves that would otherwise be bypassed and rendered unmineable in the future is also requested.

The BLM, the Federal lease administrator, is the lead agency, and the USFS, the Federal land management agency, is the co-lead agency. The United States Army Corps of Engineers, Idaho Department of Environmental Quality, Idaho Department of Lands and Idaho Governor's Office of Energy and Mineral Resources are cooperating agencies.

The NOA for the Draft EIS was published on October 22, 2021 (86 FR 58686), initiating a 45-day public comment period that ended on December 6, 2021. Agencies, organizations and individual stakeholders provided comments on the Draft EIS via mail, email and through the project website.

Comments on the Draft EIS received from the public were considered and incorporated as appropriate into the Final EIS. Public comments resulted in the addition of clarifying text and two new alternatives but did not significantly change the proposed action or predicted impacts of the proposal.

The Final EIS addresses issues identified during scoping and public

review of the Draft EIS by analyzing impacts to the human and natural environment including water resources, air quality, health and safety, socioeconomics and wildlife. It also addresses reclamation, financial assurance, mitigation and monitoring. The Final EIS considers a range of alternatives and evaluates several in detail: the proposed action, an alternative cover, an alternative stream routing, two alternative access routes, an alternative sequence of mining and the No Action alternative. The agencies' preferred alternative combines four alternatives that modify the proposed action to be more protective of natural resources, including: alternative cover that reduces impacts to surface water and ground water by reducing infiltration of meteoric water into waste rock; alternative stream routing to limit long-term impacts to Stewart Creek by returning it permanently to its natural channel after mining; alternative access Option 2 that permanently relocates NFS Road 134 to maintain public and tribal access to the site and through NFS lands; and the alternative mine sequence in which mining would begin in the North Dry Ridge area prior to developing the Husky 1 area.

The BLM and USFS will make separate but coordinated decisions related to the Project. The BLM will either approve, approve with modifications, or deny the MRP; and decide whether to modify lease IDI–05549. The BLM will base its decisions on the Final EIS; public, Tribal, and agency input; and any recommendations that the USFS may have regarding surface management of leased NFS lands. The USFS will make recommendations to the BLM concerning surface management and best management practices on leased lands within the CTNF and issue decisions on approval of proposed special use authorizations (SUAs) for off-lease mining support activities and the alternative access. The USFS SUAs are necessary for any off-lease disturbances or structures associated with the Project located within the CTNF. The reroute of the Simplot slurry line, which crosses the proposed mine operations, will require an amendment of the Caribou National Forest Revised Land and Resource Management Plan (2003 Revised Forest Plan (RFP)).

The portion of the Project related to proposed USFS SUAs for off-lease activities, the selection of the alternative access and the amendment of the 2003 RFP are subject to the objection process pursuant to 36 CFR 218 subparts A and B. Instructions for filing objections will be provided in the legal notice

published in the newspaper of record for the USFS Draft ROD. Objections will be accepted only from those who have previously submitted specific written comments regarding the proposed project, either during scoping or other designated opportunities for public comment, in accordance with 36 CFR 218.5. Issues raised in objections must be based on previously submitted, timely and specific written comments regarding the proposed project, unless based on new information arising after designated opportunities.

(Authority: 36 CFR 218; 40 CFR 1506.6, 40 CFR 1506.10; 43 CFR 46; and 43 CFR 3590.)

LLCAD01000.19X (MO #4500161985)]

### Notice of Intent to Prepare an Environmental Impact Statement for the Proposed Ivanpah-Control Project, Inyo, Kern, and San Bernardino Counties, CA

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of intent.

**SUMMARY:** In compliance with the National Environmental Policy Act of 1969, as amended (NEPA), and the Federal Land Policy and Management Act of 1976, as amended (FLPMA), the Bureau of Land Management (BLM) California Desert District Office, Palm Springs, California, intends to prepare an Environmental Impact Statement (EIS) to consider the effects of the Ivanpah-Control Project (Project) and by this notice is announcing the beginning of the scoping process to solicit public comments and identify issues.

**DATES:** This notice initiates the public scoping process for the EIS. The BLM requests comments concerning the scope of the analysis and identification of relevant information and studies by January 3, 2023. To afford the BLM the opportunity to consider comments in the Draft EIS, please ensure your comments are received prior to the close of the 45-day scoping period or 15 days after the last public meeting, whichever is later. The BLM will hold public

scoping meetings; the dates, locations, and times will be announced at least 15 days in advance through public notices, media releases, mailings, and the BLM website at: <https://bit.ly/3knv8cm>.

**ADDRESSES:** You may submit comments related to the Ivanpah-Control Project by any of the following methods:

- **Website:** <https://bit.ly/3knv8cm>.
- **Email:** [BLM\\_CA\\_CD\\_TLRR\\_IvanpahControl@blm.gov](mailto:BLM_CA_CD_TLRR_IvanpahControl@blm.gov).
- **Fax:** 760-833-7199.
- **Mail:** Ivanpah-Control

Environmental Impact Statement, Bureau of Land Management California Desert District Office, 1201 Bird Center Drive, Palm Springs CA 92262.

Documents pertinent to this proposal may be examined online at <https://bit.ly/3knv8cm> and at the BLM California Desert District Office.

**FOR FURTHER INFORMATION CONTACT:** Joan Patrovsky, Project Manager, Ivanpah-Control Project, telephone: (760) 252-6032; address: Bureau of Land Management California Desert District Office, 1201 Bird Center Drive, Palm Springs CA 92262; email: [jpatrovs@blm.gov](mailto:jpatrovs@blm.gov). Contact Ms. Patrovsky to have your name added to our mailing list. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Ms. Patrovsky. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

### SUPPLEMENTARY INFORMATION:

#### Purpose and Need for the Proposed Action

The purpose of this Federal action is to respond to a right-of-way application from Southern California Edison for demolition, construction, operations, and maintenance of the Ivanpah-Control 115 kilovolt transmission line on BLM-administered lands, consistent with applicable laws, regulations, and policies. The Secretary of the Interior is authorized to grant rights-of-way on public lands for systems for generation, transmission, and distribution of electric energy (43 U.S.C. Section 1761(a)(4)); the need for the BLM's action is established by this delegated authority under Title V of FLPMA.

The applicant is Southern California Edison and the purpose for the Project is to ensure compliance with the California Public Utilities Commission's General Order 95 and National Electric Reliability Corporation reliability standards. The proposed action is to

implement engineering solutions to remediate approximately 2,950 discrepancies along the Ivanpah-Control alignment, continue to provide safe and reliable electrical service, meet Project needs while minimizing environmental impacts, and design and construct the physical components of the Project in conformance with industry and/or Southern California Edison's approved engineering, design, and construction standards for substation and subtransmission system projects.

### Preliminary Proposed Action and Alternatives

Southern California Edison proposes to remediate physical clearance discrepancies on existing 115 kilovolt subtransmission lines, referred to collectively as the Ivanpah-Control transmission line, located in southern California. The Project is composed of five segments (1, 2, 3N, 3S, and 4) spanning Inyo County, northeast Kern County, and northern San Bernardino County. The northern/western terminus is the Control Substation, approximately 5 miles west of the city of Bishop in Inyo County; the eastern terminus is at Ivanpah Substation, located in California approximately 6 miles southwest of Primm, Nevada. To address the discrepancies, Southern California Edison proposes to conduct the following activities:

- **Segment 1:** Control Substation (Bishop) to Inyokern Substation (126-mile segment): The subtransmission lines would be rebuilt in a new alignment adjacent to the existing alignment (but outside the existing right-of-way) and the existing subtransmission structures would be removed. This would involve removing approximately 1,161 existing structures and replacing with 905 new structures.
- **Segment 2:** Inyokern Substation to Kramer Junction (48-mile segment): The subtransmission line would be rebuilt in a new alignment adjacent to the existing alignment (but within the existing right-of-way) and the existing subtransmission structures would be removed. This would involve removing approximately 390 transmission structures and installing 342 new structures.
- **Segment 3N:** Kramer Junction-Coolwater Substation (44-mile segment): The subtransmission line would be reconducted. Some existing subtransmission structures would be replaced with steel and wood H-frames and wood pole multipole structures; most replacement structures would be installed proximate to existing structures that would be removed. This would involve removing approximately

43 existing structures and installing approximately 45 structures.

- Segment 3S: Kramer Junction–Tortilla Substation–Coolwater Substation (44-mile segment): The subtransmission line would be reconducted. Some existing subtransmission structures would be replaced with tubular steel pole and wood multipole structures, and steel and wood H-frames; replacement structures would be installed proximate to existing structures which would be removed. This would involve removing approximately 42 existing structures and installing approximately 42 structures.

- Segment 4: Coolwater Substation to Ivanpah Substation (98-mile segment): The existing subtransmission circuit would be derated, which would remediate some existing discrepancies with no physical modification to the facilities. To remediate the remaining discrepancies, some existing subtransmission structures would be replaced with steel and wood H-frames; these replacement structures would mostly be installed proximate to existing structures which would be removed. This would involve removing approximately 60 structures, installing approximately 62 structures, and modifying approximately 83 structures.

A range of reasonable alternatives will be developed and analyzed in the EIS after considering information received during the scoping period. Preliminary action alternatives include a full rebuild in segments 3N, 3S, and 4 and the use of different pole designs in portions of segments 1 and 2. The range of reasonable alternatives will include a no action alternative, under which the BLM would deny the application and the Ivanpah–Control line would remain as existing with ongoing maintenance activities as needed. The BLM welcomes comments on all preliminary alternatives as well as suggestions for additional alternatives. As alternatives should resolve a problem with the Proposed Action, please indicate the purpose of any suggested alternative.

#### Summary of Expected Impacts

Preliminary issues, either beneficial or adverse and of varying intensity, for the Project have been identified by BLM personnel and in consultation with Federal, State, and local agencies, Tribes, and other Cooperating Agencies. These preliminary issues include potential impacts to:

- Special status wildlife and vegetation species;
- Visual resources;
- Cultural resources; and

- Areas of Critical Environmental Concern

The public scoping process will guide determination of relevant issues that will influence the scope of the environmental analysis, including alternatives and mitigation measures. The EIS will identify and describe the effects of the Proposed Action and alternatives on the human environment. The BLM also requests the identification of potential impacts that should be analyzed. Impacts should be a result of the action; therefore, please identify the activity along with the potential impact.

#### Anticipated Permits and Authorizations

In addition to the requested right-of-way grant, other Federal, State, and local authorizations will be required for the Project. These include authorizations under the Bald and Golden Eagle Protection Act, the Endangered Species Act, Clean Water Act, 14 CFR part 77, and other laws and regulations determined to be applicable to the Project.

#### Schedule for the Decision-Making Process

The BLM will provide additional opportunities for public participation consistent with the NEPA process, including a 45-day comment period on the Draft EIS. The Draft EIS is anticipated to be available for public review in Fall 2023 and the Final EIS is anticipated to be released in Summer 2024 with a Record of Decision in Summer/Fall 2024.

#### Public Scoping Process

This notice of intent initiates the scoping period. The BLM will be holding at least two virtual public scoping meetings. The specific date(s) and location(s) of these scoping meetings will be announced at least 15 days in advance through public notices, media releases, mailings, and the BLM website above.

#### Lead and Cooperating Agencies

The BLM is the lead Federal agency for this EIS and the related National Historic Preservation Act Section 106 process. The following have agreed to participate in the environmental analysis of the Project as Cooperating Agencies: Inyo County, Los Angeles Department of Water and Power, United States Fish and Wildlife Service, National Park Service, United States Army Corps of Engineers, United States Environmental Protection Agency, Fort Irwin National Training Center, Marine Corps Logistics Base Barstow, Edwards Air Force Base, and Naval Air Weapons Station China Lake. Twenty-eight

entities declined or did not respond to the BLM's offer to participate in the Project as a Cooperating Agency. Federal, State, and local agencies, Tribes, and stakeholders interested in the scoping process may request or be requested by the BLM, if eligible, to participate in the development of the EIS as a Cooperating Agency.

#### Responsible Official

The BLM California State Director is the responsible official who will make the decisions below.

#### Nature of Decision to Be Made

The BLM will use the analysis in the EIS to inform the following: whether to grant, grant with conditions, or deny the application for a right-of-way. Pursuant to 43 CFR 2805.10, if the BLM issues a grant, the BLM decision maker may include terms, conditions, and stipulations determined to be in the public interest.

#### Additional Information

The BLM will identify, analyze, and consider mitigation to address the reasonably foreseeable impacts to resources from the proposed action and all analyzed reasonable alternatives and, in accordance with 40 CFR 1502.14(e), include appropriate mitigation measures not already included in the proposed action or alternatives. Mitigation may include avoidance, minimization, rectification, reduction or elimination over time, and compensation, and may be considered at multiple scales, including the landscape scale.

The BLM will utilize and coordinate the NEPA process to help support compliance with applicable procedural requirements under the Endangered Species Act (16 U.S.C. 1536) and Section 106 of the National Historic Preservation Act (54 U.S.C. 306108) as provided in 36 CFR 800.2(d)(3), including public involvement requirements of Section 106. The information about historic and cultural resources and threatened and endangered species within the area potentially affected by the proposed plan will assist the BLM in identifying and evaluating impacts to such resources.

The BLM will consult with Indian Tribal Nations on a government-to-government basis in accordance with Executive Order 13175, BLM MS 1780, and other Departmental policies. Tribal concerns, including impacts on Indian trust assets and potential impacts to cultural resources, will be given due consideration. Federal, State, and local agencies, along with Indian Tribal Nations and stakeholders that may be

interested in or affected by the proposed Ivanpah-Control Project that the BLM is evaluating, are invited to participate in the scoping process and, if eligible, may request or be requested by the BLM to participate in the development of the environmental analysis as a cooperating agency. The BLM has sent invitations to potentially affected Tribal Nations and initiated government-to-government consultation meetings and intends to continue coordination throughout the NEPA process.

The Project is in conformance with the California Desert Conservation Area Plan as amended and would not require any plan amendments. The Ivanpah-Control transmission lines are within west-wide energy corridors (established under Section 368 of the Energy Policy Act of 2005), including corridor numbers 23–25, which BLM anticipates reviewing in an upcoming revision. The Project is not in conflict with nor would it require the revision of any existing or proposed west-wide energy corridors.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

(Authority: 40 CFR 1501.9).

**Karen Mouritsen,**

*Bureau of Land Management California State Director.*

## DEPARTMENT OF THE INTERIOR

### National Park Service

[NPS–WASO–NAGPRA–NPS0034878; PPWOCRADN0–PCU00RP14.R50000]

### Notice of Inventory Completion: Warren Anatomical Museum, Harvard University, Boston, MA

**AGENCY:** National Park Service, Interior.

**ACTION:** Notice.

**SUMMARY:** The Peabody Museum of Archaeology and Ethnology and Warren Anatomical Museum, Harvard University have completed an inventory of human remains, in consultation with the appropriate Indian Tribes or Native Hawaiian organizations, and have determined that there is no cultural affiliation between the human remains

and any present-day Indian Tribes or Native Hawaiian organizations. Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request to the Peabody Museum of Archaeology and Ethnology, Harvard University. If no additional requestors come forward, transfer of control of the human remains to the Indian Tribes or Native Hawaiian organizations stated in this notice may proceed.

**DATES:** Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to the Peabody Museum of Archaeology and Ethnology, Harvard University at the address in this notice by December 19, 2022.

**FOR FURTHER INFORMATION CONTACT:** Jane Pickering, William & Muriel Seabury Howells Director, Peabody Museum of Archaeology and Ethnology, Harvard University, 11 Divinity Avenue, Cambridge, MA 02138, telephone (617) 496–2374, email [jpickering@fas.harvard.edu](mailto:jpickering@fas.harvard.edu).

**SUPPLEMENTARY INFORMATION:** Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains under the control of the Warren Anatomical Museum, Harvard University, Boston, MA. The human remains were removed from Barnstable County, MA.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3) and 43 CFR 10.11(d). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

### Consultation

A detailed assessment of the human remains was made by the Peabody Museum of Archaeology and Ethnology and Warren Anatomical Museum professional staff in consultation with representatives of the Mashpee Wampanoag Tribe (*previously* listed as Mashpee Wampanoag Indian Tribal Council, Inc.); Narragansett Indian Tribe; Wampanoag Tribe of Gay Head (Aquinnah); and the Assonet Band of the Wampanoag Nation, a non-federally recognized Indian group (hereafter

referred to as “The Consulted Tribes and Group”).

### History and Description of the Remains

In 1831, human remains representing, at minimum, two individuals were removed from an “Indian burial ground” in Yarmouth, Barnstable County, MA, by an unknown person. In December of 1883, J. Collins Warren donated these human remains to the Warren Anatomical Museum as part of the J. Mason Warren Collection. These individuals were buried approximately two feet below the ground surface in a mound of gravel and sand near the water's edge. The human remains were described as having been interred in a flexed position. The human remains are the nearly complete cranium of an adult male and the nearly complete mandible of an adult that is probably male. No known individuals were identified. No associated funerary objects are present.

### Determinations Made by the Peabody Museum of Archaeology and Ethnology and the Warren Anatomical Museum, Harvard University

Officials of the Peabody Museum of Archaeology and Ethnology and the Warren Anatomical Museum, Harvard University have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice are Native American based on osteological analysis, archeological context, and museum records.
- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of two individuals of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(2), a relationship of shared group identity cannot be reasonably traced between the Native American human remains and any present-day Indian Tribe.
- Treaties, Acts of Congress, or Executive Orders, indicate that the land from which the Native American human remains were removed is the aboriginal land of the Mashpee Wampanoag Tribe (*previously* listed as Mashpee Wampanoag Indian Tribal Council, Inc.) and the Wampanoag Tribe of Gay Head (Aquinnah) (hereafter referred to as “The Tribes”).
- Pursuant to 43 CFR 10.11(c)(1), the disposition of the human remains may be to The Tribes.

### Additional Requestors and Disposition

Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of

the request to Jane Pickering, William & Muriel Seabury Howells Director, Peabody Museum of Archaeology and Ethnology, Harvard University, 11 Divinity Avenue, Cambridge, MA 02138, telephone (617) 496-2374, email [jpickering@fas.harvard.edu](mailto:jpickering@fas.harvard.edu), by December 19, 2022. After that date, if no additional requestors have come forward, transfer of control of the human remains to The Tribes may proceed.

The Peabody Museum of Archaeology and Ethnology on behalf of the Warren Anatomical Museum, Harvard University is responsible for notifying The Consulted Tribes and Group that this notice has been published.

Dated: November 9, 2022.

#### Notice of Intent To Repatriate Cultural Items: Milwaukee Public Museum, Milwaukee, WI

**AGENCY:** National Park Service, Interior.

**ACTION:** Notice.

**SUMMARY:** In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Milwaukee Public Museum intends to repatriate a cultural item that meets the definitions of both a sacred object and an object of cultural patrimony and that has a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice. The cultural item was obtained in WI.

**DATES:** Repatriation of the cultural item in this notice may occur on or after December 19, 2022.

**ADDRESSES:** Dawn Scher Thomae, Milwaukee Public Museum, 800 W. Wells Street, Milwaukee, WI 53233, telephone (414) 278-6157, email [thomae@mpm.edu](mailto:thomae@mpm.edu).

**SUPPLEMENTARY INFORMATION:** This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Milwaukee Public Museum. The National Park Service is not responsible for the determinations in this notice. Additional information on the determinations in this notice, including

the results of consultation, can be found in the summary or related records held by the Milwaukee Public Museum.

#### Description

The cultural item, a drum, originated in northern Wisconsin. The drum was donated to the Milwaukee Public Museum in 1941 by Ms. Odelia Mumm Abel of Tomahawk, WI. She obtained the drum from her father, Mr. H.L. Mumm, who operated several trading posts at various locations in northern Wisconsin between 1914 and 1952. The object is documented as a Chief's drum.

#### Cultural Affiliation

The cultural item in this notice is connected to one or more identifiable earlier groups, tribes, peoples, or cultures. There is a relationship of shared group identity between the identifiable earlier groups, tribes, peoples, or cultures and one or more Indian Tribes or Native Hawaiian organizations. The following types of information were used to reasonably trace the relationship: geographical information, historical information, kinship, and expert opinion.

#### Determinations

Pursuant to NAGPRA and its implementing regulations, and after consultation with the appropriate Indian Tribes and Native Hawaiian organizations, the Milwaukee Public Museum has determined that:

- The cultural item described above is a specific ceremonial object needed by traditional Native American religious leaders for the practice of traditional Native American religions by their present-day adherents.
- The cultural item described above has ongoing historical, traditional, or cultural importance central to the Native American group or culture itself, rather than property owned by an individual.
- There is a relationship of shared group identity that can be reasonably traced between the cultural item and the Forest County Potawatomi Community, Wisconsin.

#### Requests for Repatriation

Additional, written requests for repatriation of the cultural item in this notice must be sent to the Responsible Official identified in **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated

Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural item in this notice to a requestor may occur on or after December 19, 2022. If competing requests for repatriation are received, the Milwaukee Public Museum must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural item are considered a single request and not competing requests. The Milwaukee Public Museum is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

**Authority:** Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.8, § 10.10, and § 10.14.

Dated: November 9, 2022.

#### Notice of Intent to Repatriate Cultural Items: Bryn Mawr College, Bryn Mawr, PA

**AGENCY:** National Park Service, Interior.

**ACTION:** Notice.

**SUMMARY:** In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), Bryn Mawr College intends to repatriate certain cultural items that meet the definition of sacred objects and that have a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice. The cultural items were removed from Humboldt County, CA.

**DATES:** Repatriation of the cultural items in this notice may occur on or after December 19, 2022.

**ADDRESSES:** Marianne Weldon, Bryn Mawr College, 101 N Merion Avenue, Bryn Mawr, PA 19010, telephone (610) 526-5022, email [mweldon@brynmawr.edu](mailto:mweldon@brynmawr.edu).

**SUPPLEMENTARY INFORMATION:** This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of Bryn Mawr College. The National Park Service is not responsible for the determinations in this notice. Additional information

on the determinations in this notice, including the results of consultation, can be found in the summary or related records held by Bryn Mawr College.

### Description

Six cultural items were removed from Humboldt Bay, Humboldt County, CA, in the spring of 1963, by Frederica de Laguna, who later donated them to Bryn Mawr College. The six sacred objects are one clam shell fragment (64.5.2), four lots of fire-cracked rocks (64.5.4.a–64.5.4.d), and one piece of flaked chert (64.5.3).

### Cultural Affiliation

The cultural items in this notice are connected to one or more identifiable earlier groups, tribes, peoples, or cultures. There is a relationship of shared group identity between the identifiable earlier groups, tribes, peoples, or cultures and one or more Indian Tribes or Native Hawaiian organizations. The following types of information were used to reasonably trace the relationship: geographical information and expert opinion.

### Determinations

Pursuant to NAGPRA and its implementing regulations, and after consultation with the appropriate Indian Tribes and Native Hawaiian organizations, Bryn Mawr College has determined that:

- The six cultural items described above are specific ceremonial objects needed by traditional Native American religious leaders for the practice of traditional Native American religions by their present-day adherents.
- There is a relationship of shared group identity that can be reasonably traced between the cultural items and the Wiyot Tribe, California (*previously* listed as Table Bluff Reservation—Wiyot Tribe).

### Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the Responsible Official identified in **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on or after December 19, 2022. If competing requests for repatriation are received, Bryn Mawr College must determine the

most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are considered a single request and not competing requests. Bryn Mawr College is responsible for sending a copy of this notice to the Indian Tribe identified in this notice.

**Authority:** Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.8, § 10.10, and § 10.14.

Dated: November 9, 2022.

## DEPARTMENT OF THE INTERIOR

### National Park Service

**[NPS–WASO–NAGPRA–NPS0034882; PPWOCRADN0–PCU00RP14.R50000]**

### Notice of Inventory Completion: Central Museum of History, Central Methodist University, Fayette, MO

**AGENCY:** National Park Service, Interior.

**ACTION:** Notice.

**SUMMARY:** The Central Museum of History, Central Methodist University has completed an inventory of human remains, in consultation with the appropriate Indian Tribes or Native Hawaiian organizations, and has determined that there is no cultural affiliation between the human remains and any present-day Indian Tribes or Native Hawaiian organizations. Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request to the Central Museum of History. If no additional requestors come forward, transfer of control of the human remains to the Indian Tribes or Native Hawaiian organizations stated in this notice may proceed.

**DATES:** Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to the Central Museum of History at the address in this notice by December 19, 2022.

**FOR FURTHER INFORMATION CONTACT:** Dr. Robert P. Wieggers, Central Museum of History, 411 CMU Square, Fayette, MO 65248, telephone (660) 248–6341, email [rwieggers@centralmethodist.edu](mailto:rwieggers@centralmethodist.edu).

**SUPPLEMENTARY INFORMATION:** Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains under the control of the Central Museum of History, Central Methodist University, Fayette, MO. The human remains were removed from Howard County, MO.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3) and 43 CFR 10.11(d). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

### Consultation

A detailed assessment of the human remains was made by the Central Museum of History professional staff in consultation with representatives of the Apache Tribe of Oklahoma; Miami Tribe of Oklahoma; Seneca-Cayuga Nation (*previously* listed as Seneca-Cayuga Tribe of Oklahoma); and The Osage Nation (*previously* listed as Osage Tribe) (hereafter referred to as “The Consulted Tribes”).

### History and Description of the Remains

At an unknown date, human remains representing, at minimum, two individuals were removed from a mound in Howard County, MO. The human remains include one cranium without mandible, a left mandible, right maxilla fragment, left femur, femur fragments, associated teeth, and bone fragments. No known individuals were identified. No associated funerary objects are present.

### Determinations Made by the Central Museum of History, Central Methodist University

Officials of the Central Museum of History, Central Methodist University have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice are Native American based on a handwritten note attached to the human remains.
- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of two individuals of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(2), a relationship of shared group identity cannot be reasonably traced between the Native American human remains and any present-day Indian Tribe.

- The Treaty of 1808, also known as the treaty of Fort Clark, indicates that the land from which the Native American human remains were removed is the aboriginal land of The Osage Nation (*previously* listed as Osage Tribe).

- Pursuant to 43 CFR 10.11(c)(1), the disposition of the human remains may be to The Osage Nation (*previously* listed as Osage Tribe).

#### **Additional Requestors and Disposition**

Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to Dr. Robert P. Wieggers, Central Museum of History, 411 CMU Square, Fayette, MO 65248, telephone (660) 248-6341, email [rwieggers@centralmethodist.edu](mailto:rwieggers@centralmethodist.edu), by December 19, 2022. After that date, if no additional requestors have come forward, transfer of control of the human remains to The Osage Nation (*previously* listed as Osage Tribe) may proceed.

The Central Museum of History, Central Methodist University is responsible for notifying The Consulted Tribes that this notice has been published.

Dated: November 9, 2022.

#### **Notice of Inventory Completion: Louisiana State University, Museum of Natural Science, Baton Rouge, LA**

**AGENCY:** National Park Service, Interior.

**ACTION:** Notice.

**SUMMARY:** The Louisiana State University, Museum of Natural Science (LSUMNS), has completed an inventory of human remains and associated funerary objects in consultation with the appropriate Indian Tribes or Native Hawaiian organizations and has determined that there is a cultural affiliation between the human remains and associated funerary objects and present-day Indian Tribes or Native Hawaiian organizations. Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice

that wish to request transfer of control of these human remains and associated funerary objects should submit a written request to LSUMNS. If no additional requestors come forward, transfer of control of the human remains and associated funerary objects to the lineal descendants, Indian Tribes, or Native Hawaiian organizations stated in this notice may proceed.

**DATES:** Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains and associated funerary objects should submit a written request with information in support of the request to LSUMNS at the address in this notice by December 19, 2022.

**FOR FURTHER INFORMATION CONTACT:** Dr. Rebecca Saunders, Louisiana State University, Museum of Natural Science, 119 Foster Hall, LSU, Baton Rouge, LA 70803, telephone (225) 578-6562 or (225) 588-0909, email [rsaunde@lsu.edu](mailto:rsaunde@lsu.edu).

**SUPPLEMENTARY INFORMATION:** Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains and associated funerary objects under the control of Louisiana State University, Museum of Natural Science, Baton Rouge, LA. The human remains and associated funerary objects were removed from multiple sites and parishes in the State of Louisiana.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains and associated funerary objects. The National Park Service is not responsible for the determinations in this notice.

#### **Consultation**

A detailed assessment of the human remains was made by LSUMNS professional staff in consultation with representatives of the Chitimacha Tribe of Louisiana and members of the STARR Alliance.

#### **History and Description of the Remains**

In 1973, human remains representing, at minimum, two individuals, were removed from the Diversion Canal site (16AN16), in Ascension Parish, LA. The two burials were excavated by Richard Weinstein when he was examining the site as part of the research for his M.A. thesis (Weinstein 1974). At the time, the

burials were eroding into the canal. Weinstein laid out excavation units encompassing the human remains and excavated them. The human remains were taken to LSUMNS, where Weinstein's major professor, Robert Neuman, was Curator of Anthropology. Burial 1 contained the human remains of an adult female. Burial 2 also contained the human remains of an adult, probably female. No known individuals were identified. No associated funerary objects are present.

In 1952, human remains representing, at minimum, 10 individuals were removed from the Big Goddel Bayou site (16AS1), in Assumption Parish, LA. Based on LSUMNS site cards and State site forms, these human remains derive from two separate surface collections made on August 2, 1952 by, respectively, Ed Orton (working for the McIntire Delta survey) and individuals from Louisiana State University (LSU). Nine of the individuals are adults and one is a subadult; all are of unknown sex. No known individuals were identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, nine individuals, were removed from the Marksville State Historic Site Museum, in Avoyelles Parish, LA. Two of the individuals are certainly from the Marksville site; provenience of the other individuals is unclear. In 1987, the Marksville State Historic Site Museum transferred some of these human remains to LSUMNS, and sometime between 1993 and 2000, it transferred the remainder to the Louisiana Division of Archaeology (LDOA). In 2000, LDOA transferred to LSUMNS the human remains it had obtained from the Marksville State Historic Site Museum. The human remains—primarily crania—belong to nine adults. No known individuals were identified. No associated funerary objects are present.

Between 1938 and 1940, and again between 1988 and 1989, human remains representing, at minimum, 112 individuals were removed from the Greenhouse Site (16AV2), in Avoyelles Parish, LA. Of this number, 107 individuals were removed during excavations conducted by the Works Progress Administration (WPA), under the direction of Robert Neitzel and Edward Doran. The human remains of an additional five individuals were removed from the site by Dennis Jones, during his work on the *Archaeological Atlas and Report of Prehistoric Mounds* (The Atlas). No known individuals were identified. No associated funerary objects are present.

In 1939, human remains representing, at minimum, one individual were removed from the Moncla Mound site (16AV9), in Avoyelles Parish, LA, by William Mulloy during a surface collection. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1939, human remains representing, at minimum, one individual were removed from the Johnson Place Cemetery site (16AV14) (also known as Emile Saucier Place), in Avoyelles Parish, LA, during a surface collection made by Robert S. Neitzel. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

Between May and June of 1979, human remains representing, at minimum, 13 individuals, were removed from the Lake St. Agnes site (16AV26) (also known as Lac St. Agnes, and related to LMS 28–I–1), in Avoyelles Parish, LA, by Alan Toth during excavations overseen by Robert Neuman. Toth's field count reported 18 individuals, but this number was amended to 13 as a result of thesis research by Ken Tremblay in 2021. No known individuals were identified. (Seven associated funerary objects are in the possession of the landowner.)

In 1972, human remains representing, at minimum, one individual were removed from the School Bus Mound site (16AV38), in Avoyelles Parish, LA, during a surface collection conducted by Alan Toth. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1964, human remains representing, at minimum, one individual were removed from the Gunby East site (16CA4) (identified as Boeuf River Site on the LSUMNS site card, and identified as LMS 24–I–31 by the Peabody Museum Lower Mississippi Survey (LMS)), in Caldwell Parish, LA, during a surface collection conducted by William Haag. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1982, human remains representing, at minimum, one individual were removed from the Cottingham Landing site (16CA17) (LMS 25–I–20), in Caldwell Parish, LA, during a surface collection by Robert Neuman and the landowner, A.J. Guyon. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, three individuals were removed by an

unknown collector from either Little Chenier Mound site (16CM22) or Little Chenier (Ridge) site (16CM30), in Cameron Parish, LA. The human remains belong to three adults. No known individuals were identified. No associated funerary objects are present.

In 1967, human remains representing, at minimum, one individual were removed from the Little Chenier (Ridge) site (16CM30), in Cameron Parish, LA, during a surface collection conducted by Glen Cobb. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1972, human remains representing, at minimum, one individual were removed from the Little Pecan Island site (16CM43), in Cameron Parish, LA, by Robert Neuman during a surface collection. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed from the Elkhorn Plantation site (16CO3) (called the Thomas site in the Baker collection records), in Concordia Parish, LA, by William Baker during an excavation at the site. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1988, human remains representing, at minimum, one individual were removed from the Prairie Lake Mound site (16CO28) (also known as the Glendale Landing Mound site), in Concordia Parish, LA, by Dennis Jones, Malcolm Shuman, and Ann Whitmer. The human remains were recovered from a pothole during mapping of the site for The Atlas. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1938, human remains representing, at minimum, one individual were removed from the Troyville Mounds site (16CT7), in Catahoula Parish, LA, by Norman Haight during a surface collection. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed from 16CT42 (called the Open Brake site in the Baker collection records), in Catahoula Parish, LA, by William Baker during a surface collection. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

At an unknown date, possibly 1997, human remains representing, at minimum, one individual were removed from 16CT97 (called the South Woods Bayou in the Baker collection records) in Catahoula Parish, LA, by William Baker. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1977, human remains, representing, at minimum, one individual were removed from the Griffin Field Site (16CT98) (LMS 25–J–12), in Catahoula Parish, LA, by William Baker during a surface collection. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, 10 individuals were removed from the Cemetery #2 site (16CT116), in Catahoula Parish, LA, by William Baker during surface collection and excavation. These human remains belong to nine adults and one adolescent. One of the individuals might be male, but the collection is highly fragmented. No known individuals were identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed from the Bayou Louis #3 site (16CT128) (called the Plum Mounds site in the Baker collection records), in Catahoula Parish, LA, by William Baker during a surface collection. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

Between 1977 and 1982, human remains representing, at minimum, one individual were removed from 16CT141 (called the Hawkins Shed site in the Baker collection records), in Catahoula Parish, LA, by William Baker during a surface collection. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

Between 1976 and 1984, human remains representing, at minimum, 26 individuals were removed from the Cowpen Slough site (16CT147), in Catahoula Parish, LA, by several unnamed individuals. No known individuals were identified. No associated funerary objects are present. (A pair of antlers was associated with the burials in Feature 8, but the location of the antlers is unknown.)

Possibly in 1937—the date was not recorded in the LSUMNS ledger, but the surrounding entries suggest this date—human remains representing, at minimum, two individuals were

removed from the Knox Place site (16EBR4), in East Baton Rouge Parish, LA, during a surface collection by Fred Kniffen and Walter Beecher. The human remains belong to two adults. No known individuals were identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, two individuals were removed from a plowed field in Franklin Parish, LA, by an unknown individual during a surface collection. The human remains belong to two adults. No known individuals were identified. No associated funerary objects are present.

In 1968, human remains representing, at minimum, 12 individuals were removed from the White Oak Landing site, (16FR6), in Franklin Parish, LA, during a surface collection of a plowed field by T.L. Gatton. (The GIS database also lists LMS 24–I–4 and Ford’s #74. The site has also received the number 16FR161, but the form for that site indicates that 16FR6 is preferred.) The human remains belong to 12 adults. No known individuals were identified. No associated funerary objects are present.

Between 1969 and 1971, human remains representing, at minimum, 275 individuals were removed from the Morton Shell Mound site (16IB3) (also known as Weeks Island and LMS 33–I–3), on the Weeks Island salt dome, in Iberia Parish, LA. The burials were recovered as part of an intensive research program under the direction of then-LSUMNS Curator of Anthropology Robert Neuman. No known individuals were identified. No associated funerary objects are present.

In 1937, human remains representing, at minimum, one individual were removed from the Blind Hooppole Bayou site (16IB6) in Iberia Parish, LA, by Fred Kniffen and Walter Beecher during a surface collection. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1975, human remains representing, at minimum, two individuals were removed from 16IB107, in Iberia Parish, LA, during a surface collection conducted by Frank Servello and others. The human remains belong to an adult and a juvenile. No known individuals were identified. No associated funerary objects are present.

In 1937, human remains representing, at minimum, one individual were removed from the Bayou Sorrel Mound site (16IV4), in Iberville Parish, LA, by Fred Kniffen and Walter Beecher during a surface collection. The human remains—a mandible fragment with three extremely worn teeth—belong to an older adult. No known individual

was identified. No associated funerary objects are present.

In 1937, human remains representing, at minimum, one individual were recovered from the Reed Mounds site (16IV5) (also known as Kniffen’s #4), in Iberville Parish, LA, as part of a surface collection by Fred B. Kniffen and Walter F. Beecher. LSUMNS has located six cranial fragments. The LSUMNS ledger also lists five human teeth, but they cannot be located at this time. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1960, human remains representing, at minimum, one individual were removed from the Bruly St. Martin site (16IV6) (also known as the Grand Bayou Site and Kniffen #11) in Iberville Parish, LA, by William G. Haag, as part of a surface collection of the site. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1883, human remains representing, at minimum, one individual were removed from site 16JE000, in Jefferson Parish, LA, by R.W. Shufeldt during surface collection and excavation. The human remains, which are part of the Shufeldt Collection at LSUMNS, belong to an adult. No known individual was identified. No associated funerary objects are present.

At an unknown date (possibly 1935), human remains representing, at minimum, five individuals were removed from the Little Bayou Barataria (16JE1) (Kniffen referred to this site as Bayou Dupont), in Jefferson Parish, LA, by an unknown individual. The human remains belong to five adults. No known individuals were identified. No associated funerary objects are present.

In 1935, and again in 1975, human remains representing, at minimum, two individuals were removed from the Bayou Cutler #1 site (16JE3) (also known as Bayou Cutler and Cheniere Cutler), in Jefferson Parish, LA. The human remains removed in 1935 were part of a surface collection by Fred B. Kniffen (#687). These human remains—a single incisor—belong to an adult. The human remains collected in 1975, presumably from the surface of the site, were discovered in wooden box of the type used by Sherwood Gagliano, Ph.D., to store survey materials. The box was labeled “Metairie Beach Deposit No. 1,” and the bones were labeled with ledger numbers identifying them as having come from 16JE3. The human remains belong to two adults. No known individuals were identified. No associated funerary objects are present.

Between the 1930s and 1958, human remains representing, at minimum,

eight individuals were collected from the Bonnabel site (16JE6), in Jefferson Parish, LA. LSUMNS ledger records indicate that in 1939, an unnamed individual gave materials from this site to the Museum (#5262). Subsequent surface collections containing human bones were made by Gagliano (1950s (#20480) and 1958 (#19605)) and Saucier and Gagliano (1958 (#20150)). In addition, labels on two bags contain provenience information (#19780 states “pit A in mound” and #20480 states “second mound”). Lastly, a donation of human remains from this site contains no information regarding the collector or the date when the human remains were removed. The human remains belong to eight adults. No known individuals were identified. No associated funerary objects are present.

Sometime in the 1970s (perhaps 1975 or 1977), human remains representing, at minimum, one individual were removed from the Fleming/Berthoud Cemetery (16JE36) (also known as Mavis Grove Plantation), in Jefferson Parish, LA, by Sherwood Gagliano during a surface collection. According to the LSUMNS ledger, the accession number (#20637) was one of a block of numbers given by LSUMNS to Coastal Environments, Inc. (CEI), a cultural resources management firm co-founded by Gagliano. Gagliano took the collection to CEI, where it remained until, in 2001, it was brought to LSUMNS by a graduate student employed at CEI. In 2021, when CEI sent Gagliano’s catalogs to LSUMNS, the number was not on those logs. No known individual was identified. No associated funerary objects are present.

In 1952, human remains representing, at minimum, one individual were removed from the Graveyard site (16JE45), in Jefferson Parish, LA, by Kniffen, McIntire, and Saucier during a surface collection. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1969, human remains representing, at minimum, six individuals were removed from the Killeen site (16JE48), in Jefferson Parish, LA, by Robert Neuman and David Morgan. The human remains belong to four adults and two subadults. No known individuals were identified. No associated funerary objects are present.

Between 1938 and 1939, human remains representing, at minimum, 82 individuals were removed from the Crooks Mound site (16LA3), in LaSalle Parish, LA, during a joint excavation project between LSU and the Works Progress Administration (WPA). No known individuals were identified. The

24 associated funerary objects are two projectile points, three plain pottery vessels, 16 decorated pottery vessels, one ear spool, and two quartz crystals.

At an unknown date, human remains representing, at minimum, one individual were removed from the Bradford's Camp site (16LA21) (also known as J. Gibson #2), in LaSalle Parish, LA, by Ed Yule, a resident of the Town of Jena. The human remains belong to an adult. No known individual was identified. The three associated funerary objects are vessels.

At an unknown date, human remains representing, at minimum, one individual were removed from the Temple Mound site (16LF4) (also appearing as "Grand Temple Mound" on one site form), in Lafourche Parish, LA, by an unknown collector. The human remains belong to an adult. No known individual was identified. No associated funerary items are present.

In 1935, human remains, representing, at minimum, one individual were removed from the Bayou Chactimahan site (16LF17) (also known as Bowie), in Lafourche Parish, LA, by an unknown collector. The human remains—a mandible—belong to a young-to-middle-aged adult male. No known individual was identified. No associated funerary objects are present.

In 1952, human remains, representing, at minimum, one individual were removed from site 16LF28 (the LSUMNS site card name is Eagle Island Bayou), in LaFourche Parish, LA, by Randolph Bazet during a surface collection. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1973, 1992, and 1994, human remains representing, at minimum, two individuals were removed from the Booth Shell Bank site (16LV6), in Livingston Parish, LA. A portion of the human remains was recovered by Paul Orr in 1973 (Accession #16LV6–8). Another portion was removed by R. Saunders in 1994 during a separate surface collection (Accession #16LV6–45). In 1992, Michael Eldredge, an avocational archeologist, collected materials from the site, among which were human bones. After passing through the Louisiana Office of State Parks, the Eldridge collection was transferred to LDOA sometime between 1993 and 2000. In 2000, LDOA transferred the collection to LSUMNS. At least one of the individuals can be identified as an 18–21-year-old adolescent/young adult. No known individuals were identified. No associated funerary objects are present.

In 1996, human remains, representing, at minimum, two individuals were removed from the Sharp Site (16LV13) in Livingston Parish, LA, during a surface collection by Robert Barilleaux. The human remains belong to two adults. No known individuals were identified. No associated funerary objects are present.

Sometime during 1996–1997, human remains representing, at minimum, one individual were removed from the Sharp Site (16LV13) in Livingston Parish, LA, during field school excavations directed by Dr. Rebecca Saunders of LSU. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1973, human remains representing, at minimum, one individual were removed from the Clio Mound Site (16LV15) (also known as Clio), in Livingston Parish, LA. These fragmentary human remains were excavated from Test Pit #2 by Weinstein and Facundas as part of the research for Weinstein's M.A. thesis. The bone fragments were retrieved from the first 10 cm of the excavation. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed from the Fontenot site (16LV16), in Livingston Parish, LA, by an unknown collector. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed from the Hall Site (16LV33), in Livingston Parish, LA, by an unknown collector, presumably during a surface collection. Numbers associated with the remains follow a format like the one used by LSUMNS (and the State of Louisiana), but there is no accession/catalog record for this site in LSUMNS's records. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

Between 1969 and 1973, human remains representing, at minimum, two individuals were removed from the Burial site (16LV37) (also known as Old Tree), in Livingston Parish, LA. In 1969, Robert Neuman removed human remains during a surface collection (Accession #16LV37–1, 2). Subsequently (1973), Weinstein and Facundus also removed human bone (Accession #16LV37–7). The human remains belong to two adults. No known individuals were identified. No associated funerary objects are present.

Between 1973 and 1974, human remains representing, at minimum, four individuals were removed from the Bayou Chene Blanc site (16LV43) (also known as Whitehall), in Livingston Parish, LA, by Richard Weinstein, who was following up on the results of his 1974 M.A. thesis research. The human remains belong to four adults. No individuals were identified. No associated funerary objects are present.

In 1932, human remains, representing, at minimum, one individual were removed from the Sevier's Place site (16MA3) (identical with 16MA24 and 16MA45), in Madison Parish, LA, by James Ford during a surface collection. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

During 1969–1970, human remains, representing, at minimum, 77 individuals were removed from the Mt. Nebo site (16MA18) (LMS 23–K–12), in Madison Parish, LA, during excavations conducted by Robert Neuman of LSUMNS. No known individuals were identified. No associated funerary objects are present.

In 1968, human remains, representing, at minimum, one individual were removed from the Batchelor Mound Site (16MA27) (also known as Bull Bayou and LMS 22–K–23), in Madison Parish, LA, by George Percy during a surface collection. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1968, human remains representing, at minimum, four individuals were removed from the L.C. Parker site (16MA33), in Madison Parish, LA, by George Percy during a surface collection. When Percy moved to Florida to become the Florida State Historic Preservation Officer, he took materials from Louisiana with him, including a portion of the collection from 16MA33. Those 16MA33 materials were returned to LSUMNS in 2009, and were added to a pre-existing catalog. The human remains belong to four adults. No known individuals were identified. No associated funerary objects are present.

In 1972 and 1974, human remains representing, at minimum, four individuals were removed from the J.W. Copes site (16MA47), in Madison Parish, LA, during surface collections. The 1972 collector was William Haag; the 1974 collector is unknown. The human remains belong to two adults, one juvenile, and one neonate. No known individuals were identified. No associated funerary objects are present.

In 1973, human remains representing, at minimum, one individual were removed from site 16NA19, in Natchitoches Parish, LA, by Ricky Collins and Artis Durr during a surface collection. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1973, human remains representing, at minimum, one individual were removed from the Sportsman's Inn site (16NA20\_16NA105) (also known as the Sportsman Lodge Site, as NSU NA 105 and, in the LSUMNS ledger, as Fort Selden), in Natchitoches Parish, LA, by Robert Neuman during a surface collection. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1939, human remains representing, at minimum, 47 individuals were removed from the "The Little Woods" sites (16OR1–5), in Orleans Parish, LA, by Preston Holder, during "re-excavations" of a series of discrete shell middens on the southeastern shore of Lake Pontchartrain. The human remains belong to 47 adults. No known individuals were identified. No associated funerary objects are present.

In 1972, 1973, and 1982, human remains representing, at minimum, 69 individuals were removed from the Big Oak Island site (16OR6), in Orleans Parish, LA. No known individuals were identified. No associated funerary objects are present.

In 1939, 1974, and in the 1980s, human remains representing, at minimum, 29 individuals were removed from the Pine Island/Little Oak Island site (16OR7), in Orleans Parish, LA, by, respectively, Preston Holder (during an excavation); Richard Shenkel and Jon Gibson (during excavations); and Richard Shenkel and Douglas Owsley (during surface collection and excavation). No known individuals were identified. No associated funerary objects are present.

In 1970, human remains representing, at minimum, one individual were removed from the Rabbit Island site (16OR16), in Orleans Parish, LA, by Gloria Thom during a surface collection of materials that had been dredged from the site. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1970, human remains representing, at minimum, one individual were removed from the Hospital Foundations/Garcia site (16OR34) (also known as Les Petites Coquilles, as Little Shells, and as Fort Pike Hospital), in Orleans Parish, LA, by Tommy Ryan

during a surface collection at the site. (Among Louisiana archeologists, 'Garcia' prevails as the site name.) The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1964, human remains representing, at minimum, one individual were removed from the Linsley Site (16OR40), in Orleans Parish, LA, by Sherwood Gagliano, during a surface collection. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1985, human remains representing, at minimum, one individual were removed from the Catfish Point site (16OR61), in Orleans Parish, LA, by Lacefield and Burden, during a surface collection. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1935 and also at an unknown date, human remains representing, at minimum, one individual were removed from the Pargoud Landing site (16OU1), in Oachita Parish, LA. The 1935 collectors were Ford and Freeman; the collector of the undated collection is unknown. The human remains belong to an adult female. No known individual was identified. The three associated funerary objects are one globular jar with restricted neck, one lot of bowl sherds, and one lot of jar sherds.

In 2002–2003, human remains representing, at minimum, two individuals were removed from the Bayou Grande Cheniere site (16PL159) (also known as Pelican Mounds), in Plaquemines Parish, LA, by R. Saunders, during excavations conducted in conjunction with an LSU field school. The human remains belong to a 3–4-year-old juvenile and an adult. No known individuals were identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed from site 16SB00A in St. Bernard Parish, LA, by Sherwood Gagliano. LSUMNS has no other information about these human remains. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1982, human remains representing, at minimum, one individual were removed from dredge spoil at site 16SB00B (the LSUMNS reference name is Trosclair Collection), in St. Bernard Parish, LA, near Fort Beauregard, during a surface collection by H. Trosclair, a local avocational archeologist. The human remains—predominantly long bone fragments—belong to an adult. No

known individual was identified. No associated funerary objects are present.

In 1935, human remains representing, at minimum, one individual were removed from the Machias Lake Site (16SB2), in St. Bernard Parish, LA, by Richard B. Russell, a professor in the Department of Geology at LSU. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1936, and over numerous trips between 1976 and 1985, human remains representing, at minimum, 10 individuals were removed from the Mulatto Bayou site (16SB12\_16SB18), in St. Bernard Parish, LA, by Eric Lacefield, a local amateur collector. The human remains belong to four adult males, one adult female, and five adults of undetermined sex. No known individuals were identified. No associated funerary objects are present.

Between 1972 and 1984, and at an unknown date, human remains representing, at minimum, seven individuals were removed from site 16SB20 (also known as Grand Pass, as Grand Pass #1 in LSUMNS card records, and as Camp at Grand Pass) in St. Bernard Parish, LA, by Robert Neuman (1970), Brant Savoie (Department of Fish and Wildlife), and Eric Lacefield (1980–1984), during surface collections. The human remains belong to seven adults. No known individuals were identified. No associated funerary objects are present.

In 1972, human remains representing, at minimum, one individual were removed from the Seven Dollar Bay site (16SB33), in St. Bernard Parish, LA, by Robert Neuman, during a surface collection. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1952 and 1981, human remains representing, at minimum, eight individuals were removed from the East Bayou site (16SB48), in St. Bernard Parish, LA. In 1952, Treadwell made a surface collection at the site in conjunction with the LSU Delta Survey initiated by McIntire, during which the remains of three individuals were removed (#52–327). Subsequent investigations of 16SB48 are poorly recorded but appear to have occurred in 1981, and to have included both surface collection and excavations, at which time the remains of an additional five individuals were removed. The human remains belong to eight adults. No known individuals were identified. No associated funerary objects are present.

In 1952, human remains representing, at minimum, one individual were removed from the Shotgun Shell site

(16SB52), in St. Bernard Parish, LA, by Robert Treadwell, as part of a surface collection. This collection was made in conjunction with McIntire's survey project, *Prehistoric Indian Settlements of the Changing Mississippi River Delta* (Delta Survey). The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains, representing at minimum, one individual were removed from the Lake of the Second Trees site (16SB61), in St. Bernard Parish, LA, by unknown individuals. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1964 and 1965, human remains representing, at minimum, three individuals were removed from the Lower Vacherie site (16SJ2) (also known as Shell Hill Plantation and, in LSUMNS records, as Foulgoust), in St. Johns Parish, LA, during surface collections by William McIntire and William Haag (1964), and by Mike Zatarain (1965). The human remains belong to one juvenile and two adults. No known individuals were identified. No associated funerary objects are present. (Information in the State site files indicates that mortuary objects were present, but they are not at LSUMNS.)

Between 1974 and 1975, human remains representing, at minimum, 11 individuals were removed from the Bayou Jasmine site (16SJB2), in St. John the Baptist Parish, LA, during a series of surface collections atop deep dredge spoil deposited during highway and interstate construction through the site. Collections were made by professional and avocational collectors in 1974 (by Neuman and Lewis; Weinstein and Neuman; Neuman; Rivet; and Weinstein, Neuman, and Conn) and 1975 (by Ryan and Neuman; Wingate; and Melvin Glory). In addition, excavations conducted at the site in 1975 by Robert Neuman produced a small number of human bones culled from faunal samples belonging to the Tchefuncte component by Kathleen Byrd (#176, 180). The human remains belong to 11 adults. No known individuals were identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, six individuals were removed from the Bayou Becnel site (16SJB5), in St. John the Baptist Parish, LA. Although bags containing artifacts and human bones have what appears to be a trinomial accession number like those used in LSUMNS binders, there are no

accession records for 16SJB5 in the LSUMNS's records. The human remains belong to six adults. No known individuals were identified. No associated funerary objects are present.

In 1940 and 1957, human remains representing, at minimum, five adult individuals were removed from the Miller Place site (16SM6) (also known as Belle River Landing), in St. Martin Parish, LA. Surface collections were made by Edward Doran in 1940, by Neitzel in 1940, and by Saucier and Gagliano in 1957. The human remains belong to five adults. No known individuals were identified. No associated funerary objects are present.

In 1941, human remains representing, at minimum, 60 individuals were removed from the Lafayette Mounds site (16SM17), in St. Martin Parish, LA. The human remains belong to 60 adults. No known individuals were identified. No associated funerary objects are present.

In 1970, human remains representing, at minimum, two adult individuals were removed from the Mary Barber site (16SM35), in St. Martin Parish, LA, by Robert Neuman during a surface collection. The human remains belong to two adults. No known individuals were identified. No associated funerary objects are present.

In 1975, human remains representing, at minimum, one individual were removed from the Patterson Mound site (16SMY10) (also known as Atchafalaya Basin, as Cocke Mounds, and as Qiteet Kuti'ngi na'mu), in St. Mary Parish, LA, by Frank Servello, during a surface collection. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1950, human remains representing, at minimum, two individuals were removed from the Oyster Bayou Site (16SMY11), in St. Mary Parish, LA, by R.J. Russell, during a surface collection. The human remains probably were collected in conjunction with McIntire's Delta Survey. The human remains were catalogued into LSUMNS in 1952. The human remains belong to two adults. No known individuals were identified. No associated funerary objects are present.

In 1952, human remains representing, at minimum, one individual were removed from the Possum Point site (16SMY31), in St. Mary Parish, LA, by an unknown collector. The surface collection was probably done by an individual associated with McIntire's Delta survey. No known individual was identified. No associated funerary objects are present.

Between 1940 and 1941, human remains representing, at minimum, 60 individuals were removed from the

Tchefuncte site (16ST1), in St. Tammany Parish, LA. The human remains were recovered as part of excavation projects conducted initially by Clarence Johnson, under the auspices of the Civilian Conservation Corps (CCC) and subsequently by Edwin Doran, through the WPA. No known individuals were identified. No associated funerary objects are present.

In 1937, human remains representing, at minimum, one individual were removed from the Indian Village Landing site (16ST6), in St. Tammany Parish, LA, by James Ford, during a surface collection. The collection was limited to vertebral fragments. No known individual was identified. No associated funerary objects are present.

In 1941, human remains representing, at minimum, one individual were removed from the West Pearl River site (16ST7) (related to 16ST47), in St. Tammany Parish, LA, by Edward Doran, during testing at the site. No known individual was identified. No associated funerary objects are present.

In 1995, human remains representing, at minimum, one individual were removed from the Hoover site (16TA5), in Tangipahoa Parish, LA. This individual was recovered as part of excavations conducted by R. Saunders of LSUMNS. The human remains, which had been interred secondarily and were very poorly preserved, belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1955, human remains representing, at minimum, one individual were removed from the Shackelford Church site (16TE1) (also known as Shackelford Lake; other site numbers are 16TE59 and LMS 24-K-3), in Tensas Parish, LA, by William Haag, during a surface collection. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, three individuals were removed from the Seabreeze Pass site (16TR17), in Terrebonne Parish, LA, by Rainwater during a surface collection. Sometime in the 1980s, Rainwater donated these human remains, along with artifacts, to LSUMNS. The human remains belong to three adults. No known individuals were identified. No associated funerary objects are present.

In 1952, human remains representing, at minimum, one individual were removed from the Bayou Du Large site (16TR19) (also known as Bayou Mauvais), in Terrebonne Parish, LA, by William McIntire, presumably during a surface collection. The human remains

belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1952 and 1993, human remains representing, at minimum, one individual were removed from the Bayou Sale #2 site (16TR35), in Terrebonne Parish, LA. In 1952, William McIntire removed the remains during a surface collection, and in 1993, R. Saunders removed two molars, also during a surface collection. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1971, human remains representing, at minimum, five individuals were removed from 16TR81 (no State site file name; called Crochet's Island in LSUMNS cards), in Terrebonne Parish, LA, by William Haag, during a surface collection. The human remains belong to four adults and one subadult. No known individuals were identified. No associated funerary objects are present.

In March of 1993, human remains representing, at minimum, one individual were removed from the Bayou Terrebonne #8L site (16TR273), in Terrebonne Parish, LA, by Gerard Riché, during a surface collection. No known individual was identified. No associated funerary objects are present.

In 1950 and again in 1952, human remains representing, at minimum, six individuals were removed from the Veazey site (16VM7\_16VM8, also LMS 34-G-4, LMS 34-G-5), in Vermillion Parish, LA. The human remains were removed during surface collections, first by an unknown individual (possibly R.J. Russell), and later by Roger Saucier. The human remains belong to five adults and one subadult. No known individuals were identified. No associated funerary objects are present.

In 1951, human remains representing, at minimum, four individuals were removed from the Morgan Mounds site (16VM9), in Vermillion Parish, LA, by William McIntire, as part of a surface collection. The human remains belong to three adults and one subadult. No known individuals were identified. No associated funerary objects are present.

In 1951, human remains, representing, at minimum, one individual were removed from the Six Mile Canal site, (16VM14), in Vermillion Parish, LA, by William McIntire, during a surface collection. The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

In 1952 and at an unknown date, human remains representing, at minimum, one individual were removed from the Indian Point site (16VM24), in Vermillion Parish, LA. In 1952, Saucier

and Van Lopik recovered a single tooth during a surface collection (#52-133), and at an unknown date, a collector listed in LSUMNS's ledger as "Ford?" found a fragment of a mandible (#19920). The human remains belong to an adult. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed from an unknown site in Louisiana by an individual named "Moorman." The human remains—two teeth—were found among artifacts donated to LSUMNS in 1964. The human remains, which are identified as prehistoric, belong to an adult. No known individual was identified. No associated funerary objects are present.

#### **Determinations Made by Louisiana State University, Museum of Natural Science**

Officials of Louisiana State University, Museum of Natural Science have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of 1,070 individuals of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(3)(A), the 30 objects described in this notice are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and associated funerary objects and the Chitimacha Tribe of Louisiana. The determination of affiliation with the Chitimacha is based on the presence of a Lower Mississippi River Valley (LMRV) cultural assemblage or site location within the LMRV culture area. The Chitimacha are the only federally recognized Tribe with direct prehistoric ties to the LMRV culture area.

#### **Additional Requestors and Disposition**

Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains and associated funerary objects should submit a written request with information in support of the request to Dr. Rebecca Saunders, Louisiana State University, Museum of Natural Science, 119 Foster Hall, LSU, Baton Rouge, LA 70803, telephone (225) 578-6562 or (225) 588-0909, email [rsaunde@lsu.edu](mailto:rsaunde@lsu.edu), by December 19, 2022. After that date, if no additional

requestors have come forward, transfer of control of the human remains and associated funerary objects to the Chitimacha Tribe of Louisiana may proceed.

Louisiana State University, Museum of Natural Science is responsible for notifying the Chitimacha Tribe of Louisiana that this notice has been published.

Dated: November 9, 2022.

**Notice of Inventory Completion: Texas Archeological Research Laboratory, The University of Texas at Austin, Austin, TX**

**AGENCY:** National Park Service, Interior.

**ACTION:** Notice.

**SUMMARY:** The Texas Archeological Research Laboratory (TARL) has completed an inventory of human remains and an associated funerary object, in consultation with the appropriate Indian Tribes or Native Hawaiian organizations and has determined the lineal descent of a present-day individual from the Native American individual whose human remains are described in this notice. Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains and this associated funerary object should submit a written request to TARL. If no additional requestors come forward, transfer of control of the human remains and the associated funerary object to the lineal descendant stated in this notice may proceed.

**DATES:** Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains and this associated funerary object should submit a written request with information in support of the request to TARL at the address in this notice by December 19, 2022.

**FOR FURTHER INFORMATION CONTACT:** Annie Riegert Cummings, Texas Archeological Research Laboratory, 1 University Station R7500, Austin, TX

78712, telephone (512) 471-6006, email [annie.riegert@austin.utexas.edu](mailto:annie.riegert@austin.utexas.edu).

**SUPPLEMENTARY INFORMATION:** Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains and an associated funerary object under the control of the Texas Archeological Research Laboratory, The University of Texas at Austin, Austin, TX. The human remains and associated funerary object were removed from the Spirit Eye Cave Site, 41PS25, in Presidio County, TX.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains and associated funerary object. The National Park Service is not responsible for the determinations in this notice.

#### Consultation

Archeologist Deborah Gray conducted a detailed assessment of the human remains prior to their acquisition by TARL professional staff in 1998. In 2000, the human remains were further assessed and inventoried by TARL. Between 2000 and 2021, no potential consulting parties were identified, and no Indian Tribes requested to consult on the human remains. In 2021, Mr. Xoxi Nayapiltzin was identified as directly descending from the Native American individual whose human remains are described in this notice, and consultation was conducted with him.

#### History and Description of the Remains

In 1968, human remains representing, at minimum, one individual were looted by Kenneth Novak and Adrian Benke from the Spirit Eye Cave site (41PS25), previously known as the Novak and Benke site, in Presidio County, TX. The largely complete mummified remains belong to a middle aged-to-old adult female. The one associated funerary object is a piece of yellow ochre.

Due to the looted context, no additional information concerning the burial can be determined with great confidence. Following their removal in 1968, the human remains were advertised in a magazine, *The Shotgun*, and sold to a private buyer in California, Bob Howard. In 1998, during a search of Howard's residence by the California Department of Fish and Game, the mummified remains were recovered from a display case and taken to Wiefels and Son Mortuary, where they were analyzed by Deborah Gray. Mr. Howard

told Ms. Gray where the human remains were disinterred and when he acquired them. As possession of human remains in California is illegal, the human remains were first transferred to the Riverside County Coroner's Office and then, upon the recommendation of the Office of the Texas State Archaeologist, to TARL. The human remains arrived at TARL on August 27, 1998 and were accessioned in 1999 under TARL Accession 1999.0155 and under human osteology accession number 3713.

Based on the presence of prehistoric artifacts at the Spirit Eye Cave site (41PS25), the human remains are reasonably believed to date from the prehistoric phase. Initial ancestry estimation was established through biological analysis of the cranium by Deborah Gray. In an attempt aid in repatriation, Dr. Bryon Schroeder of Sul Ross University sampled the mummified human remains after approval for a sampling request. Dr. Meradeth Snow conducted the genetic analysis and determined that this and another individual from Spirit Eye Cave belong to the B2a4a1 lineage. Dr. Snow then compared the genetic results to data from living individuals and from human remains found in removed archaeological contexts in the Americas.

Mr. Xoxi Nayapiltzin approached researchers at Sul Ross State University and the Center for Big Bend Studies concerning prehistoric human remains in the Big Bend area on behalf of his family, the Nana Tana family. During this conversation Mr. Nayapiltzin provided his own haplogroup B2a4a1. The genetic distance between them is close as indicated by a single mutation in Mr. Nayapiltzin's own mitogenome sequence. The single mutation indicates that he is much more closely related to the individual belonging to the human remains at TARL than any other individuals used in Dr. Snow's analysis. Dr. Snow has provided TARL with a report supporting the lineal descent of Mr. Nayapiltzin from the Native American individual whose human remains are described in this notice.

During consultation, Mr. Nayapiltzin reported that nine matrilineal generations of the Nana Tana family have resided in Alpine, TX (55 miles from Spirit Eye Cave). Since starting his genealogical research 53 years ago, Mr. Nayapiltzin has located the 1833 baptismal records of his great great-great grandmother in Meoqui, and through additional research, he has traced his lineage in Meoqui back three more generations. This geographical information is consistent with the burial location of the mummified human

remains and further supports the already established genetic findings.

#### Determinations Made by the Texas Archeological Research Laboratory, The University of Texas at Austin

Officials of the Texas Archeological Research Laboratory, The University of Texas at Austin have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(3)(A), the one object described in this notice is reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- Pursuant to 43 CFR 10.2(b)(1) and 10.14(b), Mr. Xoxi Nayapiltzin is the direct lineal descendant of the Native American individual whose human remains are described in this notice.

#### Additional Requestors and Disposition

Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains and this associated funerary object should submit a written request with information in support of the request to Annie Riegert Cummings, Texas Archeological Research Laboratory, 1 University Station R7500, Austin, TX 78712, telephone (512) 471-6006, email [annie.riegert@austin.utexas.edu](mailto:annie.riegert@austin.utexas.edu), by December 19, 2022. After that date, if no additional requestors have come forward, transfer of control of the human remains and the associated funerary object to Mr. Xoxi Nayapiltzin may proceed.

The Texas Archeological Research Laboratory, The University of Texas at Austin is responsible for notifying Mr. Xoxi Nayapiltzin that this notice has been published.

Dated: November 9, 2022.

**Notice of Inventory Completion:**  
**University of California, Davis, Davis, CA**

**AGENCY:** National Park Service, Interior.

**ACTION:** Notice.

**SUMMARY:** In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the University of California, Davis (UC Davis) has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice. The human remains and associated funerary objects were removed from Colusa County, CA.

**DATES:** Repatriation of the human remains and associated funerary objects in this notice may occur on or after December 19, 2022.

**ADDRESSES:** Megon Noble, NAGPRA Project Manager, University of California, Davis, 412 Mrak Hall, One Shields Avenue, Davis, CA 95616, telephone (530) 752-8501, email [mnnoble@ucdavis.edu](mailto:mnnoble@ucdavis.edu).

**SUPPLEMENTARY INFORMATION:** This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of UC Davis. The National Park Service is not responsible for the determinations in this notice. Additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records held by UC Davis.

**Description**

Human remains representing, at minimum, 14 individuals were removed from Colusa County, CA. In 1962 and 1963, CA-COL-1 (UC Davis Accession 38) was excavated by Dr. Martin Baumhoff and Walt Brown as a part of a UC Davis Field School. No known individuals were identified. Of the 649 associated funerary objects listed in this notice, 559 objects are present and accounted for in the UC Davis collections and 90 objects are currently missing. The 559 associated funerary objects are 13 *Olivella* beads or shells, one shell pendant, two clamshell beads or clamshell disc beads, one historic bead, one bone bead, two stone beads, one stone "tinkler," 70 projectile points, 85 bone awls, three bone pins, one incised bone (possible whistle), 13 bone tubes, six bone flakers, seven bone wedges, seven bone spatulas, 104 miscellaneous worked bones, 30 chipped stone items (bifaces, debitage, flake tools, and stone scrapers), 14 miscellaneous worked stone items, six miscellaneous worked shells, four groundstone items (including one

pestle), one piece of historic metal, three pieces of charcoal or ash, two unmodified rocks, 46 lots of unmodified shell, 10 lots of clay (including baked clay), and 126 lots of animal bone fragments. UC Davis continues to look for the following 90 missing associated funerary objects: 19 *Olivella* beads or shells, one shell pendant, one shell bead (unknown type), six clamshell beads or clamshell disc beads, one stone bead, 11 projectile points, four bone awls, one bone pin, one bone harpoon, one bone tube, 14 misc. worked bones, eight chipped stones, six miscellaneous worked stones, one miscellaneous worked shell, four groundstone items, one piece of charcoal, one miscellaneous ceramic item (possibly an ear plug), one lot of unmodified shell, seven lots of clay, and one lot of animal bone fragments.

**Cultural Affiliation**

The human remains and associated funerary objects in this notice are connected to one or more identifiable earlier groups, tribes, peoples, or cultures. There is a relationship of shared group identity between the identifiable earlier groups, tribes, peoples, or cultures and one or more Indian Tribes or Native Hawaiian organizations. The following types of information were used to reasonably trace the relationship: anthropological, archeological, biological, geographical, historical, linguistic, and oral traditional.

**Determinations**

Pursuant to NAGPRA and its implementing regulations, and after consultation with the appropriate Indian Tribes and Native Hawaiian organizations, UC Davis has determined that:

- The human remains described in this notice represent the physical remains of 14 individuals of Native American ancestry.
- The 649 objects described in this notice are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a relationship of shared group identity that can be reasonably traced between the human remains and associated funerary objects described in this notice and the Cachil DeHe Band of Wintun Indians of the Colusa Indian Community of the Colusa Rancheria, California; Kletsel Dehe Band of Wintun Indians (*previously* listed as Cortina Indian Rancheria); and the Yocha Dehe Wintun Nation, California (*previously*

listed as Rumsey Indian Rancheria of Wintun Indians of California).

**Requests for Repatriation**

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the Responsible Official identified in

**ADDRESSES.** Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after December 19, 2022. If competing requests for repatriation are received, UC Davis must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. UC Davis is responsible for sending a copy of this notice to the Indian Tribes identified in this notice.

**Authority:** Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.9, 10.10, and 10.14.

Dated: November 9, 2022.

**Notice of Inventory Completion:  
Warren Anatomical Museum, Harvard  
University, Boston, MA**

**AGENCY:** National Park Service, Interior.  
**ACTION:** Notice.

**SUMMARY:** The Peabody Museum of Archaeology and Ethnology and Warren Anatomical Museum, Harvard University have completed an inventory of human remains, in consultation with the appropriate Indian Tribes or Native Hawaiian organizations, and have determined that there is no cultural affiliation between the human remains

and any present-day Indian Tribes or Native Hawaiian organizations. Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request to the Peabody Museum of Archaeology and Ethnology, Harvard University. If no additional requestors come forward, transfer of control of the human remains to the Indian Tribes or Native Hawaiian organizations stated in this notice may proceed.

**DATES:** Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to the Peabody Museum of Archaeology and Ethnology, Harvard University at the address in this notice by December 19, 2022.

**FOR FURTHER INFORMATION CONTACT:** Jane Pickering, William & Muriel Seabury Howells Director, Peabody Museum of Archaeology and Ethnology, Harvard University, 11 Divinity Avenue, Cambridge, MA 02138, telephone (617) 496-2374, email [jpickering@fas.harvard.edu](mailto:jpickering@fas.harvard.edu).

**SUPPLEMENTARY INFORMATION:** Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains under the control of the Warren Anatomical Museum, Harvard University, Boston, MA. The human remains were removed from Essex, Norfolk, and Suffolk Counties, MA.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3) and 43 CFR 10.11(d). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

### Consultation

A detailed assessment of the human remains was made by the Peabody Museum of Archaeology and Ethnology and Warren Anatomical Museum professional staff in consultation with representatives of the Mashpee Wampanoag Tribe (*previously* listed as Mashpee Wampanoag Indian Tribal Council, Inc.); Narragansett Indian Tribe; Wampanoag Tribe of Gay Head (Aquinnah); and two non-federally recognized Indian groups: the Assonet

Band of the Wampanoag Nation and the Massachusetts-Ponkapoag Tribal Council (hereafter referred to as "The Consulted Tribes and Groups").

### History and Description of the Remains

Sometime before 1870, human remains representing, at minimum, one individual were removed from an unknown site in the town of Nahant, Essex County, MA, by Dr. Walter Channing. In December of 1883, J. Collins Warren donated the human remains to the Warren Anatomical Museum as part of the J. Mason Warren Collection. The human remains are the nearly complete cranial remains of an adult male. No known individual was identified. No associated funerary objects are present.

Sometime before 1850, human remains representing, at minimum, one individual were removed from an unknown site in the city of Salem, Essex County, MA, by an unknown person and were donated to the Warren Anatomical Museum by an unknown person. The human remains are the nearly complete cranial remains of an adult female. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed from an unknown site in the town of Milton, Norfolk County, MA, by Dr. John Edwards Holbrook. In December of 1883, J. Collins Warren donated the human remains to the Warren Anatomical Museum as part of the J. Mason Warren Collection. The human remains are the nearly complete cranial remains of an adult female. No known individual was identified. No associated funerary objects are present.

In June of 1861, human remains representing, at minimum, four individuals were removed from a burial site ten feet from the eastern edge of Long Island in Boston Harbor, Suffolk County, MA, by Dr. P.A. O'Connell of the United States Army. Dr. O'Connell sent the human remains to Dr. Henry G. Clark, who presented the human remains to the Warren Anatomical Museum in 1862. No known individuals were identified. No associated funerary objects are present.

The burials on Long Island were organized into a burial ground, arranged in rows, and the individuals were consistently buried in a flexed posture with the head directed to the south and without accompanying funerary objects. This contextual information suggests that these interments date to the Late Woodland period or later (*i.e.*, post-1000 B.P.). The history of Long Island

strongly indicates that during and after King Philip's War (A.D. 1675–1676) it served as a burial place for a population of New England Native American individuals that included, but was not limited to, the Massachusetts and Pawtucket. During King Philip's War, Long Island was used as an internment camp for the so-called "Praying Indians" captured from the 14 towns within Massachusetts and Pawtucket homelands. The internment of Praying Indians on Long Island, Deer Island, and other Boston Harbor islands ended in 1677, but not before many had died of starvation, disease, and exposure. During later historic periods, several other groups used Long Island for burials, at least some of whom may have included individuals of Native American ancestry. The burial places of these individuals may have been confused with burial places of Native American individuals in recorded histories, remembered histories, and during archeological and other island surveys.

Historical documents and consultation information demonstrate that areas of northeastern Massachusetts are the aboriginal land of the Wampanoag people. These same types of information also demonstrate that portions of Suffolk, Essex, Norfolk, and Middlesex Counties, MA, are the aboriginal land of the Massachusetts and Pawtucket peoples, neither of whom are represented by any federally recognized Indian Tribe.

### Determinations Made by the Peabody Museum of Archaeology and Ethnology and the Warren Anatomical Museum, Harvard University

Officials of the Peabody Museum of Archaeology and Ethnology and the Warren Anatomical Museum, Harvard University have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice are Native American based on osteological analysis, archeological context, and museum records.

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of seven individuals of Native American ancestry.

- Pursuant to 25 U.S.C. 3001(2), a relationship of shared group identity cannot be reasonably traced between the Native American human remains and any present-day Indian Tribe.

- Treaties, Acts of Congress, or Executive Orders, indicate that the land from which the Native American human remains were removed is the aboriginal land of the Mashpee Wampanoag Tribe (*previously* listed as Mashpee

Wampanoag Indian Tribal Council, Inc.) and the Wampanoag Tribe of Gay Head (Aquinnah) (hereafter referred to as "The Tribes").

- Pursuant to 43 CFR 10.11(c)(1), the disposition of the human remains may be to The Tribes.

#### Additional Requestors and Disposition

Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to Jane Pickering, William & Muriel Seabury Howells Director, Peabody Museum of Archaeology and Ethnology, Harvard University, 11 Divinity Avenue, Cambridge MA 02138, telephone (617) 496-2374, email [jpickering@fas.harvard.edu](mailto:jpickering@fas.harvard.edu), by December 19, 2022. After that date, if no additional requestors have come forward, transfer of control of the human remains to The Tribes may proceed.

The Peabody Museum of Archaeology and Ethnology on behalf of the Warren Anatomical Museum, Harvard University is responsible for notifying The Consulted Tribes and Groups that this notice has been published.

Dated: November 9, 2022.

#### Notice of Inventory Completion: Vassar College, Poughkeepsie, NY

**AGENCY:** National Park Service, Interior.

**ACTION:** Notice.

**SUMMARY:** Vassar College has completed an inventory of human remains in consultation with the appropriate Indian Tribes or Native Hawaiian organizations and has determined that there is a cultural affiliation between the human remains and present-day Indian Tribes or Native Hawaiian organizations. Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request to Vassar College. If no additional requestors come forward, transfer of control of the human remains

to the lineal descendants, Indian Tribes, or Native Hawaiian organizations stated in this notice may proceed.

**DATES:** Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to Vassar College at the address in this notice by December 19, 2022.

#### FOR FURTHER INFORMATION CONTACT:

Brian Daly, Vassar College, 124 Raymond Avenue, Poughkeepsie, NY 12604, telephone (845) 437-5310, email [brdaly@vassar.edu](mailto:brdaly@vassar.edu).

**SUPPLEMENTARY INFORMATION:** Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains under the control of Vassar College, Poughkeepsie, NY. The human remains were removed from an unknown geographic location.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

#### Consultation

A detailed assessment of the human remains was made by Vassar College professional staff in consultation with representatives of the Gila River Indian Community of the Gila River Indian Reservation, Arizona and the Salt River Pima-Maricopa Indian Community of the Salt River Reservation, Arizona.

An invitation to consult was extended to the Ak-Chin Indian Community (previously listed as Ak Chin Indian Community of the Maricopa (Ak Chin) Indian Reservation, Arizona); Hopi Tribe of Arizona; Tohono O'odham Nation of Arizona; and the Zuni Tribe of the Zuni Reservation, New Mexico.

Hereafter, all the Indian Tribes listed in this section are referred to as "The Tribes."

#### History and Description of the Remains

On an unknown date, human remains representing, at minimum, five individuals were removed from an unknown geographic location. During the 1920s, the human remains (Mandible 1; Mandible 2; Mandible 5; Mandible 7) were acquired by Vassar College's Natural History and Social

Museums. After the museums dissolved in the 1960s, the human remains were acquired by the Anthropology and Biology departments. Human remains located in the Biology and Anthropology Department teaching collections were examined for visual and statistical markers of Native American affinities, with results reported on December 21, 2020. The results from the assessments identified these individuals with "Hohokam" affinity. No known individuals were identified. No associated funerary objects are present.

#### Determinations Made by Vassar College

Officials of Vassar College have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of five individuals of Native American ancestry.

- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and The Tribes.

#### Additional Requestors and Disposition

Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to Brian Daly, Vassar College, 124 Raymond Avenue, Poughkeepsie, NY 12604, telephone (845) 437-5310, email [brdaly@vassar.edu](mailto:brdaly@vassar.edu), by December 19, 2022. After that date, if no additional requestors have come forward, transfer of control of the human remains to The Tribes may proceed.

Vassar College is responsible for notifying The Tribes that this notice has been published.

Dated: November 9, 2022.

#### Notice of Inventory Completion: Peabody Museum of Archaeology and Ethnology, Harvard University, Cambridge, MA

**AGENCY:** National Park Service, Interior.

**ACTION:** Notice.

**SUMMARY:** The Peabody Museum of Archaeology and Ethnology, Harvard University has completed an inventory of human remains and associated funerary objects, in consultation with the appropriate Indian Tribes or Native Hawaiian organizations, and has determined that there is no cultural affiliation between the human remains and associated funerary objects and any present-day Indian Tribes or Native Hawaiian organizations. Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains and associated funerary objects should submit a written request to the Peabody Museum of Archaeology and Ethnology, Harvard University. If no additional requestors come forward, transfer of control of the human remains and associated funerary objects to the Indian Tribes or Native Hawaiian organizations stated in this notice may proceed.

**DATES:** Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains and associated funerary objects should submit a written request with information in support of the request to the Peabody Museum of Archaeology and Ethnology, Harvard University at the address in this notice by December 19, 2022.

**FOR FURTHER INFORMATION CONTACT:** Jane Pickering, William & Muriel Seabury Howells Director, Peabody Museum of Archaeology and Ethnology, Harvard University, 11 Divinity Avenue, Cambridge, MA 02138, telephone (617) 496-2374, email [jpickering@fas.harvard.edu](mailto:jpickering@fas.harvard.edu).

**SUPPLEMENTARY INFORMATION:** Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains and associated funerary objects under the control of the Peabody Museum of Archaeology and Ethnology, Harvard University, Cambridge, MA. The human remains and associated funerary objects were removed from Essex, Middlesex, Norfolk, and Suffolk Counties, MA.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3) and 43 CFR 10.11(d). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains and associated funerary objects.

The National Park Service is not responsible for the determinations in this notice.

**Consultation**

A detailed assessment of the human remains and associated funerary objects was made by the Peabody Museum of Archaeology and Ethnology professional staff in consultation with representatives of the Mashpee Wampanoag Tribe (*previously* listed as Mashpee Wampanoag Indian Tribal Council, Inc.); Narragansett Indian Tribe; Wampanoag Tribe of Gay Head (Aquinnah); and three non-federally recognized Indian groups: the Assonet Band of the Wampanoag Nation; Massachusetts-Ponkapoag Tribal Council; and the Nipmuc Nation Tribal Council Inc. (hereafter referred to as "The Consulted Tribes and Groups").

**History and description of the Remains***Essex County, MA*

Sometime prior to 1912, human remains representing, at minimum, one individual were removed by Andrew Lee II from Lee Field, located in Manchester-by-the-Sea. In June of 1912, Lee donated the human remains of this individual to the Peabody Museum through Alice E. Putnam. Descriptions of the burial noted the presence of several skeletons accompanied by a large piece of sheet copper, an iron tomahawk, several bone points, cordage, and other unnamed funerary objects. The funerary objects described in the burial suggest the interment dates to the Historic/Contact Period (*i.e.*, post-500 B.P.). The human remains are hair. No known individual was identified. The two associated funerary objects are one bone point and one vial of fragments of matting and human hair.

Around 1864, human remains representing, at minimum, two individuals were removed by an unknown person from an "Indian cemetery" in Marblehead. In 1916, F. H. C. Reynolds donated the human remains to the Peabody Museum. A description of the burial noted that the skeletons were laid in a flexed position; no other contextual information is available. The human remains are nearly complete crania belonging to two adult females. No known individuals were identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by an unknown person from a gravel pit in Boxford. In 1917, the town donated these human remains to the Peabody Museum. The human remains are

cranial fragments belonging to an adult male. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, two individuals were removed by an unknown person from an unknown site in Salem. In 1919, the Peabody Museum of Salem, now the Peabody Essex Museum, donated these human remains to the Peabody Museum at Harvard University. The human remains are cranial and postcranial fragments belonging to two adults, one male and one of unknown sex. No known individuals were identified. No associated funerary objects are present.

In 1921, human remains representing, at minimum, six individuals were removed by Alfred Vincent Kidder from the Shattuck Farm Site in Andover. In 1921, Kidder and the Department of Archaeology at the Phillips Andover Academy donated these human remains to the Peabody Museum. Kidder described a small celt, a set of antler punches, a bone or antler harpoon head, and four or five small arrowpoints accompanying the burial. These items are not in the collection of the Peabody Museum. The Shattuck Farm Site dates from the Archaic to Historic time periods. The human remains are cranial and postcranial fragments belonging to one male adult, one female adult, three adults of unknown sex, and one child of unknown sex. No known individuals were identified. The one associated funerary object is a stone gouge.

At an unknown date, human remains representing, at minimum, nine individuals were removed by an unknown person from "Indian graves" in Manchester-by-the-Sea. In 1922, George A. Gray donated these human remains to the Peabody Museum. Also in 1922, the heirs of John Lee (Sarah Crombie, Emma F. Priest, Mrs. Downing Lee, Mrs. Andrew Lee, and Mary E. Blaisdell) donated the associated funerary objects and the hair of one of these individuals to the Peabody Museum. The site from which these human remains and associated funerary objects were removed is possibly Lee Field, based on the description of a grave in Manchester-by-the-Sea discovered about fourteen inches below the surface and containing four skeletons lying side-by-side with their heads to the west. Based on the associated funerary objects and copper stains present on some of the human remains, this interment most likely dates to the Historic/Contact Period (*i.e.*, post-500 B.P.). The human remains are the nearly complete cranium and hair belonging to an adult male; cranial

fragments belonging to one adult male and one adult of unknown sex; and cranial and postcranial fragments belonging to one adult male, three adults of unknown sex, one subadult of unknown sex, and one child of unknown sex. No known individuals were identified. The 33 associated funerary objects are five fragments of wooden spoons, six broken bone arrowpoints, one broken terracotta tobacco pipe, one lot of fragments of a beaver incisor, one lot of fragments of brass plate, six fragments of textile, six fragments of cordage, six red fox bones, and one mammal long bone.

In 1904, human remains representing, at minimum, two individuals were removed by Dr. Francis B. Harrington from graves located at "Indian Ridge," on Harrington's estate in Ipswich. In 1927, Harrington's wife donated these human remains to the Peabody Museum. Copper staining on the human remains, as well as European items accompanying the burial, indicate a post-Contact date for the interment (*i.e.*, A.D. post-1600). The human remains are cranial and postcranial fragments belonging to two adults of unknown sex. No known individuals were identified. The four associated funerary objects are one ceramic and brass or copper elbow pipe, one broken bracelet strand with loose beads, one necklace of white and blue glass beads, and one brass brazier. The brazier most likely dates to the latter half of the sixteenth century and was possibly obtained from a Spanish or Portuguese ship visiting the area.

Around 1944, human remains representing, at minimum, one individual were removed by Frank W. Snow from sand under a building on Plum Island. In 1946, Snow sent these human remains to Harvard University's Department of Legal Medicine, which donated the human remains to the Peabody Museum through Alan R. Moritz that same year. The human remains are the nearly complete cranium and postcranial fragments belonging to an adult female. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by an unknown person from an unknown site in Danvers. In 1950, the Peabody Museum of Salem, now the Peabody Essex Museum, donated these human remains to the Peabody Museum through Ernest S. Dodge. Copper staining on the cranium indicates the individual was interred during the post-Contact/Early Historic Period or later (*i.e.*, A.D. post-1614). The human remains are the partial cranium

belonging to an adult female. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by an unknown person from an unknown site in Andover. In 1950, the Peabody Museum of Salem, now the Peabody Essex Museum, donated these human remains to the Peabody Museum through Ernest S. Dodge. Based on an osteological analysis of the human remains, this individual was of mixed Native American and African/African American ancestry, indicating the individual lived during the post-Contact/Early Historic Period or later (*i.e.*, A.D. post-1614). The human remains are the partial cranium belonging to a subadult of unknown sex. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by an unknown person from an unknown site in Andover. In 1950, the Peabody Museum of Salem, now the Peabody Essex Museum, donated these human remains to the Peabody Museum through Ernest S. Dodge. The human remains are the partial cranium belonging to an adult male. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by an unknown person from a site in Annisquam, a village in Gloucester. In 1950, the Peabody Museum of Salem, now the Peabody Essex Museum, donated these human remains to the Peabody Museum through Ernest S. Dodge. The human remains are the nearly complete cranium belonging to an adult male. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by an unknown person from an unknown site in Beverly. In 1950, the Peabody Museum of Salem, now the Peabody Essex Museum, donated the human remains to the Peabody Museum through Ernest S. Dodge. The human remains are the partial cranium belonging to an adult male. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by an unknown person from Summer Street in Salem. In 1950, the Peabody Museum of Salem, now the Peabody Essex Museum,

donated these human remains to the Peabody Museum through Ernest S. Dodge. Copper staining on the cranium indicates the individual was interred during the post-Contact/Early Historic Period or later (*i.e.*, A.D. post-1614). The human remains are cranial fragments belonging to an adult female. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by an unknown person from Turner Street in Salem. In 1950, the Peabody Museum of Salem, now the Peabody Essex Museum, donated these human remains to the Peabody Museum through Ernest S. Dodge. The human remains are cranial fragments belonging to an adult male. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, two individuals were removed by an unknown person from Salem Harbor. In 1950, the Peabody Museum of Salem, now the Peabody Essex Museum, donated these human remains to the Peabody Museum through Ernest S. Dodge. The human remains are cranial fragments belonging to an adult of unknown sex and the partial cranium belonging to an adult female. No known individuals were identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, two individuals were removed by an unknown person from the vicinity of Fort Lee in Salem. In 1950, the Peabody Museum of Salem, now the Peabody Essex Museum, donated these human remains to the Peabody Museum through Ernest S. Dodge. The human remains are the partial cranium belonging to an adult who is probably male and postcranial fragments belonging to an adult female. No known individuals were identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, two individuals were removed by an unknown person from Jessy W. Peabody's land in Middletown. In 1950, the Peabody Museum of Salem, now the Peabody Essex Museum, donated these human remains to the Peabody Museum through Ernest S. Dodge. The human remains are the partial cranium and postcranial elements belonging to an adult female and postcranial fragments belonging to an adult of unknown sex. No known individuals were identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one

individual were removed by an unknown person from an unknown site in Essex. In 1950, the Peabody Museum of Salem, now the Peabody Essex Museum, donated these human remains to the Peabody Museum through Ernest S. Dodge. The human remains are cranial and postcranial fragments belonging to an adult male. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, three individuals were removed by an unknown person from Lagrange Street in Salem. In 1950, the Peabody Museum of Salem, now the Peabody Essex Museum, donated these human remains to the Peabody Museum through Ernest S. Dodge. The human remains are cranial and postcranial fragments belonging to one adult male, one adult female, and one adult of unknown sex. No known individuals were identified. No associated funerary objects are present.

In August of 1892, human remains representing, at minimum, four individuals were removed by the Salem Gas Company from Lagrange Street in Salem. In June of 1916, the Salem Gas Company presented these human remains to the Peabody Museum of Salem, now the Peabody Essex Museum, which in turn donated them to the Peabody Museum in 1950, through Ernest S. Dodge. The human remains are cranial fragments and postcranial elements belonging to one adult male, one adult female, and two subadults of unknown sex. No known individuals were identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, three individuals were removed by an unknown person from an unknown site in Salem. In 1950, the Peabody Museum of Salem, now the Peabody Essex Museum, donated these human remains to the Peabody Museum through Ernest S. Dodge. The human remains are partial cranial and postcranial elements belonging to two adult males and one subadult of unknown sex. No known individuals were identified. No associated funerary objects are present.

In October of 1866, human remains representing, at minimum, six individuals were removed by David Moore from Salem. In December of 1953, these human remains were donated anonymously to the Peabody Museum. The human remains are postcranial fragments belonging to an adult of unknown sex, cranial and postcranial fragments belonging to an adult of unknown sex, cranial fragments belonging to two children of unknown

sex, the partial cranium and postcranial elements belonging to a child of unknown sex, and postcranial fragments belonging to a fetus of unknown sex. No known individuals were identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, six individuals were removed by an unknown person from an unknown site in Ipswich. In 1957, Richard Ford of the Harvard School of Legal Medicine donated these human remains to the Peabody Museum through Edward E. Hunt. The human remains are cranial and postcranial fragments belonging to five children and one infant, all of unknown sex. No known individuals were identified. No associated funerary objects are present.

In July of 1957, human remains representing, at minimum, one individual were removed by Theodore L. Stoddard of the Robert S. Peabody Foundation from the Belosselsky Estate in Ipswich. In November of 1957, Princess Florence Crane Belosselsky donated these human remains to the Peabody Museum. The human remains were located approximately two feet below the rim of a drumlin, in sand. The individual had been interred in a flexed position on the left side, facing west, with the feet to the north. A stone pestle was found with the burial, but it is not in the collection of the Peabody Museum. No information is available regarding the dating of the interment. The human remains are the partial cranium and postcranial elements belonging to an adult female. No known individual was identified. No associated funerary objects are present.

In 1897, human remains representing, at minimum, one individual were removed by an unknown person from an unknown site in Nahant. In May of 1959, the Warren Anatomical Museum, Harvard University (WAM) transferred these human remains to the Peabody Museum. The human remains are postcranial fragments belonging to an adult of unknown sex. No known individual was identified. No associated funerary objects are present.

In 1890, human remains representing, at minimum, one individual were removed by Dr. F. Humphrey from an unknown site in Ipswich. Humphrey presented these human remains to the Robert S. Peabody Institute, which in turn donated them to the Peabody Museum in February of 1963. The human remains are cranial fragments belonging to an adult of unknown sex. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one

individual were removed by Thomas Clegg from an unknown site in Lawrence. Clegg presented these human remains to the Robert S. Peabody Institute, which in turn donated them to the Peabody Museum in February of 1963. The human remains are the partial cranium belonging to an adult male. No known individual was identified. No associated funerary objects are present.

In 1890, human remains representing, at minimum, one individual were removed by Walter W. Taylor from the bank of the Merrimack River in Lowell. Taylor presented these human remains to the Robert S. Peabody Institute, which in turn donated them to the Peabody Museum in February of 1963. The human remains are the nearly complete cranium belonging to an adult male. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, two individuals were removed by some boys from a gravel pit in Ipswich. Dr. Wigglesworth, the medical examiner in Ipswich, presented these remains to Dr. Edwin V. Hill at the Department of Legal Medicine, Harvard Medical School. Hill in turn donated the remains to the Peabody Museum in March of 1964. The human remains are the partial cranium and postcranial fragments belonging to two subadults of unknown sex. No known individuals were identified. No associated funerary objects are present.

In May of 1916, human remains representing, at minimum, two individuals were removed by an unknown person from Lagrange Street in Salem. In April of 1964, these hitherto uncatalogued human remains were found in the Peabody Museum and were accessioned. The human remains are cranial and postcranial fragments belonging to one adult and one subadult of unknown sex. No known individuals were identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by H.C. Perkins from near the mouth of the Merrimack River in Newburyport. In 1867, Perkins donated these human remains to the Peabody Museum. The human remains are the partial cranium belonging to an adult male. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by H.C. Perkins from an unknown site in Beverly. In 1867, Perkins donated these human remains to the Peabody

Museum. The human remains are the partial cranium belonging to an adult female. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by an unknown person from an unknown site, possibly George Titcomb's cellar, in Newburyport. In 1867, Edward A. Hale donated these human remains to the Peabody Museum. Copper stains present on the human remains indicate interment sometime during the early Historic period or later (*i.e.*, A.D. post-1600). The human remains are cranial fragments belonging to a child of unknown sex. No known individual was identified. No associated funerary objects are present.

In 1867, human remains representing, at minimum, one individual were removed by George Peabody Russell from an unknown site in Essex and donated by him to the Peabody Museum the same year. The human remains are cranial fragments belonging to an adult of unknown sex. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by William C. Otis from an unknown site in Nahant. In 1868, Otis donated these human remains to the Peabody Museum. The human remains are the nearly complete cranium belonging to an adult male. No known individual was identified. No associated funerary objects are present.

In 1868, human remains representing, at minimum, two individuals were removed by Jefferies Wyman and J. Elliot Cabot from the Eagle Hill shell heap, 19ES0084, in Ipswich and donated by them to the Peabody Museum the same year. Non-funerary objects found at the site, including shells, animal bones, pottery fragments, small stemmed points, and small triangle points, indicate that the interments date to the Late Archaic through Woodland Periods (5000–500 B.P.). The human remains are cranial fragments belonging to a child of unknown sex and postcranial fragments belonging to an adult of unknown sex. No known individuals were identified. No associated funerary objects are present.

In October of 1876, human remains representing, at minimum, three individuals were removed by Joseph Ballard for the Peabody Academy of Science from an "Indian grave" in Saugus. The Peabody Academy of Science, now the Peabody Essex Museum, in turn donated these human

remains to the Peabody Museum the same year. Based on the associated funerary objects, this interment dates to the post-Contact period or later (*i.e.*, A.D. post-1600). The human remains are the nearly complete crania belonging to one adult male and one adult female and the partial cranium belonging to an adult male. No known individuals were identified. The 66 associated funerary objects are one pair of iron scissors, one iron jackknife with a molded brass handle, one bone implement, one broken bone implement, and 62 shell beads.

In 1874 and 1876, human remains representing, at minimum, 20 individuals were removed by the Essex Institute for the Peabody Academy of Science from Beesom's Pasture in Marblehead. In 1876, the Peabody Academy of Science, now the Peabody Essex Museum, donated these human remains to the Peabody Museum. The burials are described as being in a flexed position, and based on the positioning of the individuals, all the decedents likely were interred at the same time. A dark red ochre-like substance was also found on the human remains. The associated funerary objects, which are not in the collection of the Peabody Museum, include the remains of a bearskin pouch, copper tubular beads, and pottery fragments. Based on the description of the burials at the site, these remains were likely interred during the Late Woodland Period or later (*i.e.*, post-1000 B.P.). The human remains are the partial cranium belonging to an adult male; postcranial fragments belonging to 13 adults of unknown sex; the partial cranium and postcranial elements belonging to one adult male and one adult of unknown sex; postcranial fragments belonging to an adult male; and cranial and postcranial fragments belonging to one adult female, one adult male, and one adult of unknown sex. No known individuals were identified. No associated funerary objects are present.

In 1876 and at an unknown date, human remains representing, at minimum, nine individuals were removed by D. R. Bickford from his lawn in Marblehead. In 1876, the Peabody Academy of Science, now the Peabody Essex Museum, donated these human remains to the Peabody Museum. The human remains are the nearly complete cranium belonging to an adult female; cranial fragments belonging to two adults who are probably male; cranial fragments belonging to one adult of unknown sex, one subadult of unknown sex, and one child of unknown sex; and postcranial

elements belonging to two adult females and one subadult of unknown sex. No known individuals were identified. No associated funerary objects are present.

In 1876, human remains representing, at minimum, one individual were removed by James Kimball from the corner of Essex and Cambridge Streets in Salem. That same year, the Peabody Academy of Science, now the Peabody Essex Museum, donated these human remains to the Peabody Museum. Based on an osteological analysis of these remains, this individual was of mixed Native American and African/African American ancestry and therefore lived during the post-Contact or early Historic Period or later (*i.e.*, A.D. post-1614). The human remains are the partial cranium belonging to an adult male. No known individual was identified. No associated funerary objects are present.

In 1876, human remains representing, at minimum, four individuals were removed by James Kimball from the corner of Essex and Cambridge Streets in Salem. That same year, the Peabody Academy of Science, now the Peabody Essex Museum, donated these human remains to the Peabody Museum. The human remains are the partial cranium belonging to one adult male, cranial and postcranial fragments belonging to one adult male, one subadult of unknown sex, and cranial and postcranial fragments belonging to one child of unknown sex. No known individuals were identified. No associated funerary objects are present.

In 1872, human remains representing, at minimum, three individuals were removed by C. Cooke of the Peabody Academy of Science from the Pine Grove shell heap, 19ES0226, in Marblehead. In 1876, the Peabody Academy of Science, now the Peabody Essex Museum, donated these human remains to the Peabody Museum. Non-funerary items from the site not in the collection of the Peabody Museum include bifacial stone points, an adze, pendants, stone tools, chipping waste, and a pestle. These items indicate that interment took place during the pre-Contact Period, possibly in the Late Archaic Period (5000–3000 B.P.). The human remains are the partial cranium belonging to one adult male and postcranial fragments belonging to one adult female and one adult who is probably female. No known individuals were identified. No associated funerary objects are present.

In 1872, human remains representing, at minimum, 16 individuals were removed by C. Cooke of the Peabody Academy of Science from Linden Street in Salem. In 1876, the Peabody Academy of Science, now the Peabody

Essex Museum, donated these human remains to the Peabody Museum. The human remains are postcranial fragments belonging to 11 adults of unknown sex and cranial and postcranial fragments belonging to one adult male, three adult females, and one adult of unknown sex. No known individuals were identified. No associated funerary objects are present.

In January of 1874, human remains representing, at minimum, two individuals were removed by W. B. Wyman from a location near the Pine Grove shell heap in Marblehead. In 1876, the Peabody Academy of Science, now the Peabody Essex Museum, donated these human remains to the Peabody Museum. Non-funerary items from the Pine Grove shell heap not in the collection of the Peabody Museum include bifacial stone points, an adze, pendants, stone tools, chipping waste, and a pestle. These items indicate that interment took place during the pre-Contact Period, possibly in the Late Archaic Period (5000–3000 B.P.). The human remains are cranial and postcranial fragments belonging to an adult female and postcranial fragments belonging to an adult male. No known individuals were identified. No associated funerary objects are present.

In November of 1874, human remains representing, at minimum, one individual were removed by the Essex Institute for the Peabody Academy of Science from Wyman's Pasture in Marblehead. In 1876, the Peabody Academy of Science, now the Peabody Essex Museum, donated these human remains to the Peabody Museum. Copper staining on the human remains indicate the individual was interred during the Historic/Contact Period (*i.e.*, post-500 B.P.). The human remains are cranial and postcranial fragments belonging to an adult female. No known individual was identified. No associated funerary objects are present.

In 1872, human remains representing, at minimum, one individual were removed by Frederic Ward Putnam and the Peabody Academy of Science from the Eagle Hill shell heap, 19ES0084, in Ipswich. In 1876, the Peabody Academy of Science, now the Peabody Essex Museum, donated these human remains to the Peabody Museum. Non-funerary objects found at the site, including shells, animal bones, pottery fragments, small stemmed points, and small triangle points, indicate that the interments date to the Late Archaic through Woodland Periods (5000–500 B.P.). The human remains are cranial fragments belonging to an adult of unknown sex. No known individual was

identified. No associated funerary objects are present.

In 1872, human remains representing, at minimum, one individual were removed by C. Cooke of the Peabody Academy of Science from the Wyman's Crossing shell heap in Marblehead. In 1876, the Peabody Academy of Science, now the Peabody Essex Museum, donated these human remains to the Peabody Museum. Non-funerary items from the site, which include stone tools, stone chips, animal bones, and charred wood, indicate the human remains were interred during the Late Archaic Period (5000–3000 B.P.). The human remains are postcranial fragments belonging to an adult of unknown sex. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by A.J. Colburn from Peter's Falls in West Andover. In February of 1877, the Peabody Museum purchased these human remains. The human remains are the partial cranium and postcranial elements belonging to an adult male. No known individual was identified. The one associated funerary object is a metal button. The metal button post-dates the arrival of Europeans and indicates the human remains were interred during the Historic/Contact Period (*i.e.*, post-500 B.P.).

In 1878, human remains representing, at minimum, one individual were removed by Henry Coleman from an unknown site in Swampscott. In May of 1879, Coleman donated these human remains to the Peabody Museum. The human remains are the nearly complete cranium belonging to an adult who is probably female. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by a Mr. Ober from "Indian Hill," located on Beverly Cove, in Beverly. Today, this site is the location of the Beverly Cemetery. In July of 1879, the Peabody Museum purchased these human remains as part of the Ober Collection. Objects found at the site not associated with the burial include atlatl fragments, a full-grooved axe, plain and grooved gouges, and temporally diagnostic bifaces such as Atlantic, Orient Fishtails, and Neville points. The stone implements and projectile point types support a Late to Transitional Archaic Period date for the interment (5000–3000 B.P.). The human remains are the nearly complete cranium belonging to an adult female. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by an unknown person from an unknown site in Salem. In July of 1881, Cordelia A. Studley donated these human remains to the Peabody Museum. The human remains are the partial cranium belonging to an adult who is probably female. No known individual was identified. No associated funerary objects are present.

In January of 1968, human remains representing, at minimum, one individual were removed by Douglas S. Byers near or on Launching Road in Andover, after they were unearthed by a bulldozer working on construction of a new road. That same month, Byers donated these human remains to the Peabody Museum. The human remains are cranial and postcranial fragments belonging to an adult female. No known individual was identified. No associated funerary objects are present.

#### *Middlesex County, MA*

Sometime in the 1950s, human remains representing, at minimum, one individual were removed by Malcolm Brooks Davis from a location somewhere between Spy Pond and Menotomy Rocks Park, in Arlington. In October of 1975, John Blackwell donated these human remains to the Peabody Museum. The human remains are the nearly complete cranium belonging to an adult male. No known individual was identified. No associated funerary objects are present.

About 1895, human remains representing, at minimum, two individuals were removed by R. L. Richardson from burials at the Fresh Pond ice houses in Cambridge. In 1913, Richardson's wife donated these human remains to the Peabody Museum. The human remains are the partial cranium belonging to an adult male and postcranial fragments belonging to an adult of unknown sex. No known individuals were identified. No associated funerary objects are present.

In 1913, human remains representing, at minimum, one individual were removed by Samuel J. Guernsey, as part of a Peabody Museum Expedition, from a stone-lined grave in Watertown. Artifacts found in the immediate vicinity, not associated with the burial indicate these human remains were interred during the Transitional Archaic Period (3500–2500 B.P.). The human remains are cranial and postcranial fragments belonging to an adult of unknown sex. No known individual was identified. No associated funerary objects are present.

In 1913, human remains representing, at minimum, one individual were removed by Samuel J. Guernsey, as part of a Peabody Museum Expedition, from a grave in Watertown. A description of the burial noted that there were acorns at the bottom of the pit, and the human remains rested against the side of the pit and were nearly all decayed. Artifacts found in the immediate vicinity, not associated with the burial indicate these human remains were interred during the Transitional Archaic Period (3500–2500 B.P.). The human remains are cranial and postcranial fragments belonging to an adult of unknown sex. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, 14 individuals were likely removed by George or Cheston Sawtelle from an unknown site in the vicinity of Lowell. Subsequently, these human remains formed part of the Sawtelle Collection at the Robert S. Peabody Institute. In 1951, the Robert S. Peabody Institute donated the human remains to the Peabody Museum through Douglas S. Byers. The human remains are cranial and postcranial fragments belonging to one child, three subadults, and four adults, all of unknown sex; cranial fragments belonging to two adults of unknown sex; cranial fragments belonging to an adult male; cranial fragments belonging to two adult females; and cranial fragments belonging to an individual of unknown age and sex. No known individuals were identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, five individuals were removed by an unknown person from a grave in Winchester. An unknown person likely donated these human remains to the Peabody Museum in 1892. The human remains are the partial cranium and postcranial elements belonging to five adults, four of whom are of unknown sex and one who is probably female. No known individuals were identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by an unknown person from a sand bank in West Newton. These human remains were likely donated to the Peabody Museum by the West Newton Board of Health in 1895. The human remains are the partial cranium and postcranial elements belonging to an adult female. No known individual was identified. No associated funerary objects are present.

In 1877, human remains representing, at minimum, one individual were removed by James G. Wade from his

farm in Wayland. In 1895, Wade donated these human remains to the Peabody Museum. The human remains are the partial cranium and postcranial elements belonging to a subadult who is probably male. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, two individuals were removed by an unknown person from a sand bank on Washington Street in West Newton. In 1896, the West Newton Board of Health donated these human remains to the Peabody Museum. The human remains are the partial cranium and postcranial elements belonging to an adult female and cranial fragments belonging to a child of unknown sex. No known individuals were identified. No associated funerary objects are present.

In January of 1967, human remains representing, at minimum, one individual were removed by Ramon de Cruz and James Di Tucci from the fill or dump for the Charles Farm located behind a cemetery, in Cambridge. Presumably, these human remains had been bulldozed off the edge of the cemetery. That same month, de Cruz and Di Tucci donated the human remains to the Peabody Museum. The human remains are cranial and postcranial fragments belonging to an adult male. No known individual was identified. No associated funerary objects are present.

In August of 1967, human remains representing, at minimum, one individual were removed by Roger W. Hamilton and Robert F. Doherty from the fill or dump for the Charles Farm, located behind a cemetery, in Cambridge. Presumably, these human remains had been bulldozed off the edge of the cemetery. In September of 1967, Hamilton and Doherty donated the human remains to the Peabody Museum. The human remains are cranial fragments belonging to an adult of unknown sex. No known individual was identified. No associated funerary objects are present.

#### *Norfolk County, MA*

In 1901, human remains representing, at minimum, 14 individuals were removed by William O. Crosby from the Squantum shell heap in Quincy. That same year, Crosby donated these human remains to the Peabody Museum. Although this site is a known Native American shell heap, no information concerning the context or date of these human remains is available. The human remains are cranial and postcranial fragments belonging to two adults who are probably female, four adults of

unknown sex, seven children of unknown sex, and one subadult male. No known individuals were identified. No associated funerary objects are present.

In 1927, human remains representing, at minimum, one individual were removed by Augustus Hemenway from the vicinity of Green Street in Canton. That same year, Hemenway gave these human remains to the Peabody Museum. The human remains are the partial cranium belonging to an adult male. No known individual was identified. No associated funerary objects are present.

In October of 1937, human remains representing, at minimum, two individuals were removed by Marshall T. Newman of Harvard University's Division of Anthropology from the vicinity of Crabtree Road in Quincy. That same month, the Division of Anthropology gave these human remains to the Peabody Museum. The individuals were interred in a flexed position with the head to the east and with several rolled copper sheet beads around the head. Copper staining on the human remains and the associated copper sheet beads indicate this interment dates to the post-Contact period (*i.e.*, A.D. post-1600). The human remains are the nearly complete cranium and postcranial fragments belonging to an adult male and postcranial fragments belonging to an adult female. No known individuals were identified. The three associated funerary objects are two copper beads with attached human hair and one flat ovate stone.

At an unknown date, human remains representing, at minimum, one individual were removed by the Police Department of Quincy from an unknown site in Quincy. In November of 1954, the Quincy Police Department donated these human remains to the Peabody Museum through Edward E. Hunt. The human remains are the nearly complete cranium and postcranial elements belonging to an adult female. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by Dr. H.B. Inches from an unknown site in Brookline. Inches presented these human remains to the Boston Society for Medical Improvement (BSMI). In 1888–1889, the cabinet of the BSMI was officially transferred to the Warren Anatomical Museum, Harvard University (WAM), and in May of 1959, WAM transferred these human remains to the Peabody Museum. The human remains are the partial cranium

belonging to an adult who is probably male. No known individual was identified. No associated funerary objects are present.

In August of 1898, human remains representing, at minimum, one individual were removed during a Peabody Museum expedition from Hough's Neck in Quincy. These human remains were found with five other skeletons not in the collection of the Peabody Museum and whose locations are unknown. The human remains are the partial cranium belonging to an adult male. No known individual was identified. No associated funerary objects are present.

In October of 1969, human remains representing, at minimum, nine individuals were removed by Dr. Stephen Williams and Dr. Dena Dincauze, as part of a Peabody Museum expedition, from the Burr Lane Cemetery in Canton. These human remains were removed from burials in a known, eighteenth-century "Praying Indian" cemetery of the Ponkapoag. The burials in this cemetery exhibited English customs of the eighteenth century, such as securing shrouds with copper pins, using pine coffins, and rectangular graves. Grave markers were likely present, as one footstone was discovered. Objects associated with burials from this site, such as coffin nails, an eighteenth-century kaolin pipe, a fragment of ceramic, a piece of lead shot, and a fragment of shroud cloth with a copper pin adhering, also support an early-mid eighteenth-century date for these interments. A small-handled cup found in the immediate vicinity but not in association with any burials is of a type of English ware in use from 1690–1720. The human remains are postcranial fragments belonging to an adult who is probably male and an adult of unknown sex; the partial cranium and postcranial fragments belonging to an adult female; cranial fragments belonging to an adult of unknown sex; the nearly complete skeletons belonging to an adult female and an adult male; cranial and postcranial fragments belonging to an adult who is probably female; the nearly complete cranium and postcranial fragments belonging to an adult who is probably female; and the partial cranium belonging to an adult of unknown sex. No known individuals were identified. The seven associated funerary objects are one bag of nails, one bag of textile fragments, one clay pipe, one fragment of white-glazed ceramic material, one fragment of lead shot, one lot of shroud cloth fragments with an adhering copper pin, and one lot of iron

nails and fragments with adhering wood fragments.

#### *Suffolk County, MA*

At an unknown date, human remains representing, at minimum, seven individuals were removed by an unknown person from an unknown burial location, possibly at Bunker Hill in Charlestown. In 1900, an unknown person donated these human remains to the Peabody Museum. The human remains are the partial cranium and postcranial elements belonging to an adult male, an adult female, and five adults of unknown sex. No known individuals were identified. No associated funerary objects are present.

In June of 1861, human remains representing, at minimum, one individual were removed by Dr. P.A. O'Connell of the United States Army from a burial site ten feet from the eastern edge of Long Island in Boston Harbor. O'Connell sent these human remains to Dr. Henry G. Clark, who in turn presented them to the Warren Anatomical Museum, Harvard University (WAM) in 1862. In 1916, the Peabody Museum received the human remains via an exchange with WAM. The Long Island burial site was an organized burial ground, with the burials arranged in rows. Individuals were consistently buried in a flexed posture with the head directed to the south and without accompanying funerary objects. This contextual information suggests these interments date to the Late Woodland period or later (*i.e.*, post-1000 B.P.). The history of Long Island strongly indicates that during and after King Philip's War (A.D. 1675–1676), it served as a burial place for a population of New England Native American individuals that included, but was not limited to, the Massachusetts and Pawtucket. During King Philip's War, Long Island was used as an internment camp for so-called "Praying Indians" captured from the 14 towns within Massachusetts and Pawtucket homelands. The internment of Praying Indians on Long Island, Deer Island, and other Boston Harbor islands ended in 1677, but not before many of them had died of starvation, disease, and exposure. During later historic periods, several other groups used Long Island for burials, at least some of whom may have included individuals of Native American ancestry. The burial places of these individuals may have been confused with burial places of Native American individuals in recorded histories, remembered histories, and during archeological and other island surveys. The human remains are the partial cranium belonging to an adult

female. No known individual was identified. No associated funerary objects are present.

In November of 1921, human remains representing, at minimum, one individual were removed by Frank N. Belcher from the Belcher estate in Winthrop. That same year Belcher donated these human remains to the Peabody Museum. Belcher described the burial as "on the southeast slope of a sand and gravel soil, about 4 feet deep." The human remains are cranial and postcranial fragments belonging to an adult male. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by an unknown person from Washington Street in Boston. In May of 1959, the Warren Anatomical Museum, Harvard University (WAM) transferred these human remains to the Peabody Museum. The human remains are the partial cranium belonging to an adult male. No known individual was identified. No associated funerary objects are present.

In 1878, human remains representing, at minimum, one individual were removed by A.A. Tapley from the G.A. Tapley Farm in Revere. That same year, A.A. Tapley donated these human remains to the Peabody Museum. The human remains are the partial cranium belonging to an adult female. No known individual was identified. No associated funerary objects are present.

In December of 1881, human remains representing, at minimum, two individuals were removed by E.H. Whorf from an unknown site in Revere. That same year, Walter Faxon donated these human remains to the Peabody Museum. The human remains are the nearly complete skeleton belonging to an adult male and postcranial fragments belonging to an adult of unknown sex. No known individuals were identified. No associated funerary objects are present.

In June of 1886, human remains representing, at minimum, one individual were removed by Dr. D.D. Slade from a "ledgy hillside" northeast of the Reservoir Gateway in Brighton. That same month, Slade donated these human remains to the Peabody Museum. The human remains were removed from under 3.5 feet of loam. The human remains are the partial cranium and postcranial elements belonging to a subadult female. No known individual was identified. No associated funerary objects are present.

In May of 1888, human remains representing, at minimum, one

individual were removed by William Doogue, Dexter Brackett, and Franklin Otis from the vicinity of the Tremont Street Mall on the Boston Common in Boston. That same month, Doogue, Brackett, and Otis donated these human remains to the Peabody Museum. At the time of removal, clam shells were found in association with the human remains. The human remains are the nearly complete cranium and postcranial fragments belonging to an adult male. No known individual was identified. The one associated funerary object is a clam shell (*Mya arenaria*).

In April of 1888, human remains representing, at minimum, 13 individuals were removed by railroad workers and railroad superintendent C.H. Hammond from the Central Station site, 19SU0003, in Winthrop. In May of 1888, Hammond donated these human remains to the Peabody Museum. The Central Station site dates to ca. 1450–1634. Objects associated with burials at the site, such as copper items and European materials provide a date during the Historic/Contact Period, and a cattle pound built by the town near the burials provides a *terminus ante quem* date of 1634 for the site. The human remains are partial crania belonging to one adult female and one adult male; cranial fragments belonging to one adult who is probably female and one adult of unknown sex; the nearly complete, partially mummified cranium belonging to an adult male; cranial and postcranial elements belonging to three adult males and three adult females; cranial and postcranial fragments belonging to one child of unknown sex; and cranial and postcranial fragments belonging to one adult of unknown sex. No known individuals were identified. The seven associated funerary objects include four objects that are present in the Peabody Museum collections and three objects that are currently missing. The four present associated funerary objects are one bag of copper fragments, one bag of bark cloth fragments, one sheet of copper, and one bag of birchbark mat fragments. The three associated funerary objects currently missing are two lots of copper and bark cloth fragments and one lot of sand.

In 1888 and 1890, human remains representing, at minimum, 14 individuals were removed by Frederic Ward Putnam, as part of a Peabody Museum expedition, from the Central Station site, 19SU0003, in Winthrop. As described above, the Central Station site is dated to ca. 1450–1634. The human remains are the nearly complete skeletons belonging to three adult males, one adult female, one subadult who is probably male, and one child of

unknown sex; partial cranium belonging to one infant of unknown sex; cranial and postcranial fragments belonging to two infants of unknown sex and one child of unknown sex; partial cranium belonging to one adult male; cranial and postcranial fragments belonging to one child of unknown sex; and cranial fragments belonging to two adults of unknown sex. No known individuals were identified. The 82 associated funerary objects include 81 objects that are present in the Peabody Museum collections and one object that is currently missing. The 81 present associated funerary objects are one fragmented pottery vessel, six lots of pottery vessel fragments, one pottery vessel, two iron implements, eight copper or brass beads, 11 bone points, one beaver tooth, one beaver tooth fragment, one brass arrowpoint, one lot of copper beads and fragments of string, one lot of bark mat fragments, one shell, one strand of shell beads, 10 beads, two strands of glass beads, 11 shell and blue glass beads, one lot of a clay pipe and its fragments, one bag of textile fragments, two metal spoons, six brass or copper ornaments, four shell beads, one small pottery vessel and three sherds, one stone effigy pestle, one rubbing stone, one antler spoon, and one bone implement. The one associated funerary object currently missing is the fragment of a pottery vessel.

Between 1885 and 1887, human remains representing, at minimum, 28 individuals were removed by the Boston Gas Light Company from Commercial Point in Dorchester, during construction. In 1889, Walter K. Means of the Boston Gas Light Company donated these human remains to the Peabody Museum. The human remains were found at the top of a beach, between two and three feet below the original surface, with streaks of beach gravel and scatterings of clam shells and black ashes visible in the soil. There were no funerary objects found with the human remains, but the partial preservation of some of the human remains due to the action of copper salts suggests that a copper burial object had also been interred. The presence of this cupric staining indicates that the interments post-date the Contact Period and provides a burial date of post-500 B.P. The human remains are cranial and postcranial fragments belonging to an adult of unknown sex; cranial fragments belonging to two adults and one subadult of unknown sex; cranial elements belonging to four children of unknown sex; postcranial fragments belonging to four adults, four subadults,

four children, and one infant of unknown sex; postcranial fragments belonging to an adult female; the nearly complete cranium and postcranial elements belonging to an adult female; cranial and postcranial elements belonging to two children and one infant of unknown sex; cranial elements belonging to an adult female; and cranial and postcranial fragments belonging to an adult who is probably female. No known individuals were identified. No associated funerary objects are present.

About 1899, human remains representing, at minimum, one individual were removed by Freeman F. Burr from the Squantum shell heap in Quincy. That same year, Burr donated these human remains to the Peabody Museum. The human remains were located approximately a foot below the level of the shell heap. Based on the non-funerary objects at this site, which include a chipped stone implement; fragments of thin, black, friable, sand-tempered, decorated ceramics; shells; a slate slab; charcoal; and fragments of bone, this interment most likely occurred during the Late Archaic to Late Woodland periods (5000–500 B.P.). The human remains are the nearly complete skeleton belonging to one infant of unknown sex. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were likely removed by an unknown person from Revere. In 1892, G. Arthur Tapley donated these human remains to the Peabody Museum. The human remains are partial cranial elements belonging to an adult male. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by an unknown person from an unknown site in Chelsea. The human remains were likely donated to the Peabody Museum by Jefferies Wyman in 1867. The human remains are cranial elements belonging to an adult female. No known individual was identified. No associated funerary objects are present.

Between 1880 and 1899, human remains representing, at minimum, one individual were removed by George B. Frazar from a burial place in Winthrop. In 1899, Frazar sold these human remains to the Peabody Museum. The burial place in question is likely the Central Station site (19SU0003), also known as the Winthrop Cemetery or The Pound, which was discovered and destroyed during railroad depot

construction between 1888 and 1890. As described above, the Central Station site is dated to ca. 1450–1634. The human remains are cranial elements belonging to an adult female. No known individual was identified. No associated funerary objects are present.

In April of 1971, human remains representing, at minimum, one individual were removed by Dr. Dena Dincauze, as part of a Peabody Museum expedition, from a shell midden on Peddock's Island (19PL0003 and 19–SU–3a) in Boston Harbor. The shell midden above the human remains was five to six inches deep; no shells were found below the human remains in the burial pit. The burial pit was lined with black organic matter, and red ochre stain was observed in the northeast corner of the pit, on some of the bones. Three fieldstone slabs of Cambridge slate were in the north and northeast areas of the pit, beside and over the head. The human remains had been tightly bundled, almost certainly had been defleshed, and were at least partially articulated at the time of burial. Human remains from this site have been radiocarbon dated to 4435 ± 225 B.P., or 2600–2900 B.P., which corresponds to the Late Archaic Period (5000–3000 B.P.) for the Peddock's Island area. The red ochre found with the human remains supports this date. The human remains are cranial and postcranial fragments belonging to an adult male. No known individual was identified. No associated funerary objects are present.

Between 1969 and 1972, human remains representing, at minimum, one individual were removed by Dr. Dena Dincauze, David Braun, and William Fitzhugh, as part of a Peabody Museum expedition, from Thompson's Island in Boston Harbor. This habitation and midden site covers a large part of the surface of the sandy elevation at the southeastern corner of the island. Occupation most likely began during the Atlantic phase, ca. 4000 B.P., and continued through the Late Woodland Period, ca. 1000–500 B.P. The interment is a shell midden sub-burial, which indicates that it pre-dates at least some of the occupational periods of the site. The burial position was most likely flexed with a northern orientation. No artifacts were found within the burial pit and there were no temporally diagnostic artifacts within the two clam shell strata located directly above the burial. However, in other portions of the site similar clam shell strata contained artifacts ranging from 4000–500 B.P., suggesting that the burial dates to the earlier occupational period of the Late Archaic. The human remains are cranial

fragments belonging to an adult of unknown sex. No known individual was identified. No associated funerary objects are present.

Historical documents and other information obtained through consultation show that areas of northeastern Massachusetts were aboriginally occupied by the Wampanoag people. These types of sources also show that portions of Suffolk, Essex, Norfolk, and Middlesex Counties, MA, were aboriginally occupied by the Massachusetts and Pawtucket peoples, neither of whom are represented by any federally recognized Indian Tribe.

#### **Determinations Made by the Peabody Museum of Archaeology and Ethnology, Harvard University**

Officials of the Peabody Museum of Archaeology and Ethnology, Harvard University have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice are Native American based on osteological analysis, archeological context, and museum records.
- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of 277 individuals of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(3)(A), the 207 objects described in this notice are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- Pursuant to 25 U.S.C. 3001(2), a relationship of shared group identity cannot be reasonably traced between the Native American human remains and associated funerary objects and any present-day Indian Tribe.
- Treaties, Acts of Congress, or Executive Orders, indicate that the land from which the Native American human remains and associated funerary objects were removed is the aboriginal land of the Mashpee Wampanoag Tribe (*previously* listed as Mashpee Wampanoag Indian Tribal Council, Inc.) and the Wampanoag Tribe of Gay Head (Aquinnah) (hereafter referred to as "The Tribes").
- Pursuant to 43 CFR 10.11(c)(1), the disposition of the human remains and associated funerary objects may be to The Tribes.

#### **Additional Requestors and Disposition**

Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains and associated funerary objects should submit a written request

with information in support of the request to Jane Pickering, William & Muriel Seabury Howells Director, Peabody Museum of Archaeology and Ethnology, Harvard University, 11 Divinity Avenue, Cambridge, MA 02138, telephone (617) 496–2374, email [jpickering@fas.harvard.edu](mailto:jpickering@fas.harvard.edu), by December 19, 2022. After that date, if no additional requestors have come forward, transfer of control of the human remains and associated funerary objects to The Tribes may proceed.

The Peabody Museum of Archaeology and Ethnology, Harvard University is responsible for notifying The Consulted Tribes and Groups that this notice has been published.

Dated: November 9, 2022.

#### **Notice of Inventory Completion: Peabody Museum of Archaeology and Ethnology, Harvard University, Cambridge, MA**

**AGENCY:** National Park Service, Interior.

**ACTION:** Notice.

**SUMMARY:** The Peabody Museum of Archaeology and Ethnology, Harvard University has completed an inventory of human remains and associated funerary objects, in consultation with the appropriate Indian Tribes or Native Hawaiian organizations, and has determined that there is no cultural affiliation between the human remains and associated funerary object and any present-day Indian Tribes or Native Hawaiian organizations. Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains and associated funerary object should submit a written request to the Peabody Museum of Archaeology and Ethnology, Harvard University. If no additional requestors come forward, transfer of control of the human remains and associated funerary object to the Indian Tribes or Native Hawaiian organizations stated in this notice may proceed.

**DATES:** Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these

human remains and associated funerary object should submit a written request with information in support of the request to the Peabody Museum of Archaeology and Ethnology, Harvard University at the address in this notice by December 19, 2022.

**FOR FURTHER INFORMATION CONTACT:** Jane Pickering, William & Muriel Seabury Howells Director, Peabody Museum of Archaeology and Ethnology, Harvard University, 11 Divinity Avenue, Cambridge, MA 02138, telephone (617) 496-2374, email [jpickering@fas.harvard.edu](mailto:jpickering@fas.harvard.edu).

**SUPPLEMENTARY INFORMATION:** Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains and associated funerary objects under the control of the Peabody Museum of Archaeology and Ethnology, Harvard University, Cambridge, MA. The human remains and associated funerary object were removed from Barnstable, Bristol, Dukes, and Plymouth Counties, MA.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3) and 43 CFR 10.11(d). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains and associated funerary object. The National Park Service is not responsible for the determinations in this notice.

### Consultation

A detailed assessment of the human remains and associated funerary objects was made by the Peabody Museum of Archaeology and Ethnology professional staff in consultation with representatives of the Mashpee Wampanoag Tribe (*previously* listed as Mashpee Wampanoag Indian Tribal Council, Inc.); Narragansett Indian Tribe; Wampanoag Tribe of Gay Head (Aquinnah); and the Assonet Band of the Wampanoag Nation, a non-federally recognized Indian group (hereafter referred to as "The Consulted Tribes and Group").

### History and Description of the Remains

#### *Barnstable County, MA*

In 1901, human remains representing, at minimum, one individual were removed by an unknown person from an unknown site in Osterville. In 1901 or 1902, Dr. S.W. Driver donated these human remains to the Peabody Museum through Dr. Frederic Ward Putnam. The human remains are postcranial

fragments belonging to an adult female. No known individual was identified. No associated funerary objects are present.

In the spring of 1921, human remains representing, at minimum, three individuals were removed by Charles C. Owen from Grand Island in Osterville. In December of 1921, A.A. Marsters donated these human remains to the Peabody Museum. The human remains are cranial and postcranial elements belonging to two adult males and one adult of unknown sex. No known individuals were identified. No associated funerary objects are present.

In March of 1934, human remains representing, at minimum, one individual were removed by Lauchlan M. Crocker, the Sheriff of Barnstable County, from an unknown site in Barnstable. That same month, Crocker donated these human remains to the Peabody Museum. The human remains were recorded as being 12 feet underground. The human remains are cranial and postcranial fragments belonging to an adult female. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by Edward H. Rogers from an unknown site in Provincetown. Rogers donated these human remains to the Robert S. Peabody Institute, which in turn donated them to the Peabody Museum in December of 1937. The human remains are the partial cranium and postcranial elements belonging to an adult female. No known individual was identified. The one associated funerary object is a projectile point. As the point's shape most likely falls within the "Neville" tradition, it is a modified Neville point. The Neville tradition is associated with the Middle Archaic period in southeastern New England (ca. 8000–6000 B.P.).

In 1947, human remains representing, at minimum, one individual were removed by Ross Moffett from the Hillside site in Truro. That same year, Moffett donated these human remains to the Peabody Museum. The human remains were located in a brownish-black, sandy midden layer. Moffett's descriptions of grit-tempered pottery known as Early Woodland Period Vinette I and Fox Creek style projectile points—these are not in the collections of the Peabody Museum—suggest that this interment most likely dates from the Early to Middle Woodland Period (3000–1000 B.P.). The human remains are the nearly complete skeleton belonging to a subadult male. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by Deputy Sheriff Louis Cataldo from the Indian Neck site in Wellfleet. In March of 1966, Cataldo donated these human remains to the Peabody Museum through Dr. Edward Hunt. The human remains are the partial cranium and postcranial elements belonging to an adult male. No known individual was identified. No associated funerary objects are present.

In 1867, human remains representing, at minimum, one individual were removed by Dr. Jeffries Wyman from the Cotuit port shell heap and donated by him to the Peabody Museum. The human remains are postcranial fragments belonging to an adult of unknown sex. No known individual was identified. No associated funerary objects are present.

In February of 1970, human remains representing, at minimum, one individual were removed by the Bourne Police from an unknown site in Buzzards Bay in Bourne. Deputy Sheriff Cataldo donated these human remains to the Peabody Museum. The human remains were removed from a depth of approximately 30 feet. The human remains are the nearly complete cranium belonging to an adult female. No known individual was identified. No associated funerary objects are present.

#### *Bristol County, MA*

In July of 1945, human remains representing, at minimum, one individual were removed by workmen while excavating a sewer on the property of John Martin in Taunton. That same month, Dr. Alan Richards Moritz of Harvard University's Department of Legal Medicine donated these human remains to the Peabody Museum. The human remains are the partial cranium and postcranial fragments belonging to an adult female. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by an unknown person from an unknown site in New Bedford. These human remains were given to the Robert S. Peabody Institute, which in turn presented them to the Peabody Museum in February of 1963. The human remains are the partial cranium belonging to an adult male. No known individual was identified. No associated funerary objects are present.

#### *Dukes County, MA*

In 1914, human remains representing, at minimum, one individual were removed by Edward Wigglesworth from Wasque Point on Martha's Vineyard. In

July of 1914, Curtis N. Smith donated these human remains to the Peabody Museum. The human remains are cranial and postcranial fragments belonging to an adult of unknown sex. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by Dr. Charles T. Jackson from an "Indian burial place" on Martha's Vineyard. Jackson presented these remains to the Boston Society for Medical Improvement (BSMI). In June of 1889, the cabinet of the BSMI was officially transferred to the Warren Anatomical Museum, Harvard University (WAM), and in May of 1959, WAM transferred the human remains to the Peabody Museum. The original inventory of the human remains describes the burial location as full of small shells and notes that many of the bodies in the burial place were interred in an erect posture surrounded by shells. The human remains are the nearly complete cranium belonging to an adult female. No known individual was identified. No associated funerary objects are present.

#### *Plymouth County, MA*

In March of 1940, human remains representing, at minimum, one individual were removed by Norman Merry, Arthur Chandler, and Superintendent Sherman from an unknown site in Lakeville. That same month, Dr. Alan Richards Moritz of Harvard University's Department of Legal Medicine donated these human remains to the Peabody Museum. The human remains are postcranial fragments belonging to an adult of unknown sex. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by Dr. Charles T. Jackson from a refuse heap in Plymouth. In November of 1943, the Boston Society of Natural History donated these human remains to the Peabody Museum through Dr. Frederic T. Lewis. The human remains are postcranial fragments belonging to an adult of unknown sex. No known individual was identified. No associated funerary objects are present.

In May of 1946, human remains representing, at minimum, one individual were removed by Dr. Raymond G. Vinal from an unknown site in Norwell. Vinal turned these human remains over to the Massachusetts State Police, who delivered them to Harvard University's Department of Legal Medicine. That

same month, Dr. Alan Richards Moritz of the Department of Legal Medicine donated these human remains to the Peabody Museum. The human remains were found buried 2.5–3 feet beneath the ground in gravel resembling hard-packed sand. The human remains are cranial and postcranial fragments belonging to an adult male. No known individual was identified. No associated funerary objects are present.

In April of 1947, human remains representing, at minimum, two individuals were removed by Dr. Maurice Robbins and William Bell Taylor from the Taylor Farm Site, 19Pl165, in North Middleboro. In May of 1947, Robbins donated these human remains to the Peabody Museum. The human remains are the partial cranium and postcranial elements belonging to two adult females. No known individuals were identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, one individual were removed by an unknown person from an unknown site in Middleboro. In December of 1883, J. Collins Warren donated these human remains to the Warren Anatomical Museum, Harvard University (WAM) as part of the J. Mason Warren Collection, and in May of 1959, WAM transferred them to the Peabody Museum. The human remains are the nearly complete cranium belonging to an adult male. No known individual was identified. No associated funerary objects are present.

In August of 1961, human remains representing, at minimum, seven individuals were removed by a member of the Cohannet Chapter of the Massachusetts Archaeological Society named "Curtis" from the Wapanucket 8 site in Middleboro. In September of 1961, the Massachusetts Archaeological Society, through Maurice Robbins, donated the human remains to the Peabody Museum. The human remains were found in a burial feature consisting of burned and unburned bones capped by a layer of red paint. Radiocarbon dates, artifacts diagnostic of the Archaic period, and the cremation burial suggest that this site and interment dates to the Late Archaic Period (5000–3000 B.P.). The human remains are cranial and postcranial fragments belonging to two infants of unknown sex, one child of unknown sex, one subadult of unknown sex, one adult male, one adult female, and one adult of unknown sex. No known individuals were identified. No associated funerary objects are present.

#### **Determinations Made by the Peabody Museum of Archaeology and Ethnology, Harvard University**

Officials of the Peabody Museum of Archaeology and Ethnology, Harvard University have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice are Native American based on osteological analysis, archeological context, and museum records.
- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of 27 individuals of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(3)(A), the one object described in this notice is reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- Pursuant to 25 U.S.C. 3001(2), a relationship of shared group identity cannot be reasonably traced between the Native American human remains and associated funerary object and any present-day Indian Tribe.
- Treaties, Acts of Congress, or Executive Orders, indicate that the land from which the Native American human remains and associated funerary object were removed is the aboriginal land of the Mashpee Wampanoag Tribe (previously listed as Mashpee Wampanoag Indian Tribal Council, Inc.) and the Wampanoag Tribe of Gay Head (Aquinnah) (hereafter referred to as "The Tribes").
- Pursuant to 43 CFR 10.11(c)(1), the disposition of the human remains and associated funerary object may be to The Tribes.

#### **Additional Requestors and Disposition**

Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains and associated funerary object should submit a written request with information in support of the request to Jane Pickering, William & Muriel Seabury Howells Director, Peabody Museum of Archaeology and Ethnology, Harvard University, 11 Divinity Avenue, Cambridge, MA 02138, telephone (617) 496–2374, email [jpickering@fas.harvard.edu](mailto:jpickering@fas.harvard.edu), by December 19, 2022. After that date, if no additional requestors have come forward, transfer of control of the human remains and associated funerary object to The Tribes may proceed.

The Peabody Museum of Archaeology and Ethnology, Harvard University is responsible for notifying The Consulted Tribes and Group that this notice has been published.

Dated: November 9, 2022.

### National Park Service

[NPS–WASO–NAGPRA–NPS0034884;  
PPWOCRADNO–PCU00RP14.R50000]

### Notice of Inventory Completion Amendment: University of Arkansas Museum Collections, Fayetteville, AR

**AGENCY:** National Park Service, Interior.

**ACTION:** Notice; amendment.

**SUMMARY:** In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the University of Arkansas Museum Collections has amended a Notice of Inventory Completion originally published in the **Federal Register** on November 13, 2018 and subsequently amended in a Notice of Inventory Completion Correction published in the **Federal Register** on May 20, 2022. This notice amends the minimum number of individuals and number of associated funerary objects in collections removed from Cross, Mississippi, and Poinsett Counties, AR.

**DATES:** Repatriation of the human remains and associated funerary objects in this notice may occur on or after December 19, 2022.

**ADDRESSES:** Dr. Mary Suter, University of Arkansas Museum Collections, Biomass 125, Fayetteville, AR 72701, telephone (479) 575–3456, email [msuter@uark.edu](mailto:msuter@uark.edu).

**SUPPLEMENTARY INFORMATION:** This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the University of Arkansas Museum Collections. The National Park Service is not responsible for the determinations in this notice. Additional information on the amendments and determinations in this notice, including the results of consultation, can be found in the inventory or related records held by the University of Arkansas Museum Collections.

### Amendment

This notice amends the determinations originally published in a Notice of Inventory Completion in the **Federal Register** (83 FR 56371–56374, November 13, 2018) and subsequently

amended in a Notice of Inventory Completion Correction published in the **Federal Register** (87 FR 30990–30993, May 20, 2022). Repatriation of the items in the original and amended notices has not occurred. Accordingly, the minimum number of individuals whose human remains were removed from Rose Mound (3CS27) in Cross County, AR, is nine (previously six individuals were listed). In addition, this amendment lists as currently missing human remains representing nine individuals that had been removed from the Golden Lake site (3MS60) in Mississippi County, AR (previously no individuals were listed as missing). Also, this amendment lists as currently missing one additional associated funerary object that had been removed from the Hazel Site (3PO6) in Poinsett County, AR (previously 52 associated funerary objects were listed as missing).

In 1950, 1967, and another unknown date, human remains representing, at minimum, nine individuals were removed from the Rose Mound Site (3CS27) in Cross County, AR. No known individuals were identified. The five associated funerary objects are five fragments of copper.

At an unknown date, human remains representing, at minimum, 105 individuals were removed from the Golden Lake Site (3MS60) in Mississippi County, AR. Of that number, human remains representing nine individuals are currently missing from the collection. The University of Arkansas Museum continues to look for the missing individuals. No known individuals were identified. No associated funerary objects are present.

In 1933, human remains representing, at minimum, 260 individuals were removed from the Hazel Site (3PO6) in Poinsett County, AR. No known individuals were identified. In total, there are 1,319 associated funerary objects, of which 53 objects are currently missing from the collection. The 1,266 associated funerary objects currently accounted for are one abrader, six deer antler tines, one arrow point, one artifact sample, two bone awls, one axe, one basketry fragment, 30 bone beads, two ceramic beads, four crinoid beads, 439 shell beads, 83 animal bones, three bird bones, 118 fish bones, 78 ceramic bottles, 83 ceramic bowls, two non-vessel ceramic objects, two lots of charcoal, two clay lumps, two sheets of copper, one corn cob, nine pieces of daub, three ceramic discs, eight ear plugs, two effigy bottles, 12 effigy bowls, one effigy jar, one shell gorget, 43 ceramic jars, one knife, one antler knife, one bone needle, one copper ornament, one shell pendant, 21 bone pins, three

pipes, 35 gar scales, two samples of sediment, 26 mussel shells, four pieces of turtle shell, 219 ceramic sherds, one painted stone, two textiles, three animal teeth, two twigs, and two partial vessels. The University of Arkansas Museum continues to look for the missing 53 (previously identified as 52) associated funerary objects, which are one deer antler tine, one artifact sample, one bird bill awl, one bone awl, three shell beads, two worked bones, eight ceramic bottles, 12 ceramic bowls (previously identified as 11 ceramic bowls), one ceramic non-vessel objects, one lot of charcoal, one sheet of copper, three ear plugs, one effigy bottle, four effigy bowls, one bone needle, one pipe, four mussel shells, one sherd, and six vessels.

### Determinations (as Amended)

Pursuant to NAGPRA and its implementing regulations, and after consultation with the appropriate Indian Tribes and Native Hawaiian organizations, the University of Arkansas Museum Collections has determined that:

- The human remains represent the physical remains of 374 individuals of Native American ancestry.
- The 1,324 objects are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a relationship of shared group identity that can be reasonably traced between the human remains and associated funerary objects described in this notice and the Quapaw Nation (previously listed as The Quapaw Tribe of Indians).

### Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the Responsible Official identified in **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after December 19, 2022. If competing requests for repatriation are received, the University of Arkansas Museum Collections must determine the most

appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The University of Arkansas Museum Collections is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

**Authority:** Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.9, § 10.10, § 10.13, and § 10.14.

Dated: November 9, 2022.

**Melanie O'Brien,**

Manager, National NAGPRA Program.

## DEPARTMENT OF THE INTERIOR

### Bureau of Ocean Energy Management

[Docket No. BOEM–2022–0053]

#### Notice of Availability of a Draft Environmental Impact Statement for Empire Offshore Wind, LLC's Proposed Wind Energy Facility Offshore New York

**AGENCY:** Bureau of Ocean Energy Management (BOEM), Interior.

**ACTION:** Notice of availability; request for comments.

**SUMMARY:** BOEM announces the availability of the draft environmental impact statement (DEIS) for the construction and operations plan (COP) submitted by Empire Offshore Wind, LLC (Empire Wind) for its proposed Empire Wind Project (Project) offshore New York. The DEIS analyzes the potential environmental impacts of the Project as described in the COP (the proposed action) and the alternatives to the proposed action. This notice of availability (NOA) announces the start of the public review and comment period, as well as the dates and times for public hearings on the DEIS. After BOEM holds the public hearings and addresses comments provided, BOEM will publish a final environmental impact statement (EIS). The EIS will inform BOEM's decision whether to approve, approve with modifications, or disapprove the COP.

**DATES:** Comments must be received no later than January 17, 2023. BOEM will conduct three virtual public hearings. BOEM's virtual public hearings will be held at the following times (eastern time).

- Wednesday, December 7, 2022; 5 p.m.
- Tuesday, December 13, 2022; 5 p.m.
- Thursday, December 15, 2022; 1 p.m.

Registration for the virtual public hearings may be completed here: <https://www.boem.gov/renewable-energy/state-activities/empire-wind-farm-deis-project-page-virtual-meetings> or by calling (703) 787–1520.

Registration for the virtual hearings is required. Meeting information will be sent to registrants via their email address provided during registration.

**ADDRESSES:** The DEIS and detailed information about the Project, including the COP, can be found on BOEM's website at: <https://www.boem.gov/renewable-energy/state-activities/empire-wind>. Comments can be submitted in any of the following ways:

- Orally or in written form during any of the public hearings identified in this NOA.
- In written form by mail or any other delivery service, enclosed in an envelope labeled "Empire Wind COP DEIS" and addressed to Program Chief, Office of Renewable Energy, Bureau of Ocean Energy Management, 45600 Woodland Road, VAM–OREP, Sterling, VA 20166.
- Through the *regulations.gov* web portal: Navigate to <https://www.regulations.gov> and search for Docket No. BOEM–2022–0053. Click on the "Comment" button below the document link. Enter your information and comment, then click "Submit Comment."

For more information about submitting comments, please see "Information on Submitting Comments" under the **SUPPLEMENTARY INFORMATION** heading below.

**FOR FURTHER INFORMATION CONTACT:** Jessica Stromberg, BOEM Office of Renewable Energy Programs, 45600 Woodland Road, VAM–OREP, Sterling, Virginia 20166, (703) 787–1722 or [jessica.stromberg@boem.gov](mailto:jessica.stromberg@boem.gov).

#### **SUPPLEMENTARY INFORMATION:**

**Proposed Action:** Empire Wind seeks approval to construct, operate, and maintain the Project: two wind energy farms and their associated export cables on the Outer Continental Shelf (OCS) offshore New York. The Project would be developed within the range of design parameters outlined in the Empire Wind COP, subject to applicable mitigation measures. Empire Wind proposes to develop the lease area in two wind farms, known as Empire Wind 1 (EW 1) and Empire Wind 2 (EW 2) (collectively, the Project). EW 1 and EW 2 will be electrically isolated and independent from each other. Empire Wind proposes to construct and operate up to 147 wind

turbines and up to 2 offshore substations with 2 cable routes under the terms of Renewable Energy Lease OCS–A 0512. The lease area is located 14 miles from Long Island, New York, and 19.5 miles from Long Branch, New Jersey. The onshore components of the Project will include up to three export cable landfall areas in New York (one for EW 1 and up to two for EW 2) and two onshore substations. The EW 1 onshore substation will be in Brooklyn, New York; and the EW 2 Onshore Substation A in Oceanside, New York, or the EW 2 Onshore Substation C in Island Park, New York.

**Alternatives:** BOEM considered 30 alternatives when preparing the DEIS and carried forward 7 alternatives for further analysis in the DEIS. These seven alternatives include six action alternatives and a no action alternative. BOEM rejected 23 alternatives because they did not meet the purpose and need for the proposed action or did not meet screening criteria, which are presented in DEIS appendix C. The screening criteria included consistency with law and regulations; technical and economic feasibility; environmental impact; and geographic considerations.

**Availability of the DEIS:** The DEIS, Empire Wind COP, and associated information are available on BOEM's website at: <https://www.boem.gov/renewable-energy/state-activities/empire-wind>. BOEM has distributed digital copies of the DEIS to all parties listed in DEIS appendix K, which also includes the location of all libraries receiving a copy. If you need a flash drive or paper copy, BOEM will provide one upon request, as long as copies are available. You may request a flash drive or paper copy of the DEIS by calling (703) 787–1520.

**Cooperating Agencies:** The following 15 Federal agencies, Tribal Nations, and State and city governmental entities participated as cooperating agencies in the preparation of the DEIS: Bureau of Safety and Environmental Enforcement; U.S. Environmental Protection Agency; National Marine Fisheries Service; U.S. Army Corps of Engineers; U.S. Coast Guard; U.S. Fish and Wildlife Service; Department of Defense; Department of the Navy; Maritime Administration; National Park Service; the Shinnecock Indian Nation; New York State Department of Environmental Conservation; New York State Energy Research & Development Authority; New York State Department of State; and New York City.

**Information on Submitting Comments:** BOEM does not consider anonymous comments. Please include your name and address as part of your

comment. BOEM makes all comments, including the names and addresses of respondents, available for public review online and during regular business hours. Individual respondents may request that BOEM withhold their names, addresses, or any other personal identifiable information (PII) included in their comment from the public record; however, BOEM cannot guarantee that it will be able to do so. If you wish your name, address, or other PII to be withheld, you must state your request prominently in a cover letter and explain the harm that you fear from its disclosure, such as unwarranted privacy invasion, embarrassment, or injury. Even if BOEM withholds your information in the context of this notice, your submission is subject to the Freedom of Information Act (FOIA) and any relevant court orders. If your submission is requested under the FOIA or such court order, your information will only be withheld if a determination is made that one of the FOIA's exemptions to disclosure applies or if such court order is challenged. Such a determination will be made in accordance with the Department's FOIA regulations and applicable law.

Please label privileged or confidential information as "Contains Confidential Information," and consider submitting such information as a separate attachment. Information that is not labeled as privileged or confidential may be regarded by BOEM as suitable for public release.

All submissions from organizations or businesses and from individuals identifying themselves as representatives or officials of organizations or businesses will be made available for public inspection in their entirety.

*Authority:* 42 U.S.C. 4231 *et seq.* (NEPA, as amended) and 40 CFR 1506.6.

## INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701-TA-671-672 and 731-TA-1571-1573 (Final)]

### Oil Country Tubular Goods From Argentina, Mexico, Russia, and South Korea

#### Determinations

On the basis of the record<sup>1</sup> developed in the subject investigations, the United States International Trade Commission ("Commission") determines, pursuant to the Tariff Act of 1930 ("the Act"), that an industry in the United States is materially injured by reason of imports of oil country tubular goods from Argentina and Mexico provided for in subheadings 7304.29, 7305.20, and 7306.29 of the Harmonized Tariff Schedule of the United States, that have been found by the U.S. Department of Commerce ("Commerce") to be sold in the United States at less than fair value ("LTFV"); by reason of imports of oil country tubular goods from Russia that have been found by Commerce to be sold in the United States at LTFV and subsidized by the government of Russia; and by reason of imports of oil country tubular goods from South Korea that have been found by Commerce to be subsidized by the government of South Korea.<sup>2,3</sup>

#### Background

The Commission instituted these investigations effective October 6, 2021, following receipt of petitions filed with the Commission and Commerce by Borusan Mannesmann Pipe U.S., Inc., Baytown, Texas; PTC Liberty Tubulars LLC, Liberty, Texas; U.S. Steel Tubular Products, Inc., Pittsburgh, Pennsylvania; Welded Tube USA, Inc., Lackawanna, New York; and the United States Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied Industrial and Service Workers International Union, AFL-CIO, CLC, Pittsburgh, Pennsylvania. The final phase of the investigations was scheduled by the Commission following notification of a preliminary determination by Commerce that imports of oil country tubular goods from Russia were subsidized within the

meaning of section 703(b) of the Act (19 U.S.C. 1671b(b)) and preliminary determinations by Commerce that imports of oil country tubular goods from Argentina, Mexico, and Russia were sold at LTFV within the meaning of 733(b) of the Act (19 U.S.C. 1673b(b)).<sup>4</sup> Notice of the scheduling of the final phase of the Commission's investigations and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** on June 9, 2022 (87 FR 35246). The Commission conducted its hearing on September 22, 2022. All persons who requested the opportunity were permitted to participate.

The Commission made these determinations pursuant to §§ 705(b) and 735(b) of the Act (19 U.S.C. 1671d(b) and 19 U.S.C. 1673d(b)). It completed and filed its determinations in these investigations on November 14, 2022. The views of the Commission are contained in USITC Publication 5381 (November 2022), entitled *Oil Country Tubular Goods from Argentina, Mexico, Russia, and South Korea: Investigation Nos. 701-TA-671-672 and 731-TA-1571-1573 (Final)*.

By order of the Commission.

Issued: November 14, 2022.

## INTERNATIONAL TRADE COMMISSION

### Summary of Commission Practice Relating to Administrative Protective Orders

**AGENCY:** International Trade Commission.

**ACTION:** Summary of commission practice relating to administrative protective orders.

**SUMMARY:** Since February 1991, the U.S. International Trade Commission ("Commission") has published in the **Federal Register** reports on the status of its practice with respect to breaches of

<sup>1</sup> The record is defined in § 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

<sup>2</sup> 87 FR 59041, 59045, 59047, 59054, and 59056 (September 29, 2022).

<sup>3</sup> The Commission also finds that imports subject to Commerce's affirmative critical circumstances determinations are not likely to undermine seriously the remedial effect of the antidumping duty orders on oil country tubular goods from Mexico and Russia.

<sup>4</sup> 87 FR 28801, 28804, and 28808 (May 11, 2022) (antidumping duty preliminary determinations) and 87 FR 14249 (March 14, 2022) (countervailing duty preliminary determination for Russia). Commerce preliminarily determined that countervailable subsidies were not being provided to producers and exporters of oil country tubular goods from South Korea. 87 FR 14248 (March 14, 2022) (countervailing duty preliminary determination for South Korea).

its administrative protective orders (“APOs”) under the Tariff Act of 1930 in response to a direction contained in the Conference Report to the Customs and Trade Act of 1990. Over time, the Commission has added to its report discussions of APO breaches in Commission proceedings other than under title VII and violations of the Commission’s rules, including the rule on bracketing business proprietary information (the “24-hour rule”). This notice provides a summary of APO breach investigations completed during fiscal year 2022. This summary addresses APO breach investigations related to proceedings under both title VII and section 337 of the Tariff Act of 1930. The Commission intends for this summary to inform representatives of parties to Commission proceedings of the specific types of APO breaches before the Commission and the corresponding types of actions that the Commission has taken.

**FOR FURTHER INFORMATION CONTACT:**

Caitlin Stephens, Office of the General Counsel, U.S. International Trade Commission, telephone (202) 205–2076. Hearing-impaired individuals may obtain information on this matter by contacting the Commission’s TDD terminal at (202) 205–1810. General information concerning the Commission is available on its website at <https://www.usitc.gov>.

**SUPPLEMENTARY INFORMATION:** Statutory authorities for Commission investigations provide for the release of business proprietary information (“BPI”) or confidential business information (“CBI”) to certain authorized representatives in accordance with requirements set forth in the Commission’s Rules of Practice and Procedure. Such statutory and regulatory authorities include: 19 U.S.C. 1677f; 19 CFR 207.7; 19 U.S.C. 1337(n); 19 CFR 210.5, 210.34; 19 U.S.C. 2252(i); 19 CFR 206.17; 19 U.S.C. 4572(f); 19 CFR 208.22; 19 U.S.C. 1516a(g)(7)(A); and 19 CFR 207.100–207.120. The discussion below describes APO breach investigations that the Commission completed during fiscal year 2022, including descriptions of actions taken in response to any breaches.

Since 1991, the Commission has published annually a summary of its actions in response to violations of Commission APOs and rule violations. See 86 FR 71916 (Dec. 20, 2021); 85 FR 7589 (Feb. 10, 2020); 83 FR 42140 (Aug. 20, 2018); 83 FR 17843 (Apr. 24, 2018); 82 FR 29322 (June 28, 2017); 81 FR 17200 (Mar. 28, 2016); 80 FR 1664 (Jan. 13, 2015); 78 FR 79481 (Dec. 30, 2013); 77 FR 76518 (Dec. 28, 2012); 76 FR

78945 (Dec. 20, 2011); 75 FR 66127 (Oct. 27, 2010); 74 FR 54071 (Oct. 21, 2009); 73 FR 51843 (Sept. 5, 2008); 72 FR 50119 (Aug. 30, 2007); 71 FR 39355 (July 12, 2006); 70 FR 42382 (July 22, 2005); 69 FR 29972 (May 26, 2004); 68 FR 28256 (May 23, 2003); 67 FR 39425 (June 7, 2002); 66 FR 27685 (May 18, 2001); 65 FR 30434 (May 11, 2000); 64 FR 23355 (Apr. 30, 1999); 63 FR 25064 (May 6, 1998); 62 FR 13164 (Mar. 19, 1997); 61 FR 21203 (May 9, 1996); 60 FR 24880 (May 10, 1995); 59 FR 16834 (Apr. 8, 1994); 58 FR 21991 (Apr. 26, 1993); 57 FR 12335 (Apr. 9, 1992); and 56 FR 4846 (Feb. 6, 1991). This report does not provide an exhaustive list of conduct that will be deemed to be a breach of the Commission’s APOs. The Commission considers APO breach investigations on a case-by-case basis.

As part of the Commission’s efforts to educate practitioners about the Commission’s current APO practice, the Secretary to the Commission (“Secretary”) issued in January 2022 a sixth edition of *An Introduction to Administrative Protective Order Practice in Import Injury Investigations* (Pub. No. 5280). This document is available on the Commission’s website at <http://www.usitc.gov>.

**I. In General**

**A. Antidumping and Countervailing Duty Investigations**

The current APO application form for antidumping and countervailing duty investigations, which the Commission revised in May 2020, requires an APO applicant to agree to:

- (1) Not divulge any of the BPI disclosed under this APO or otherwise obtained in this investigation and not otherwise available to him or her, to any person other than—
  - (i) Personnel of the Commission concerned with the investigation,
  - (ii) The person or agency from whom the BPI was obtained,
  - (iii) A person whose application for disclosure of BPI under this APO has been granted by the Secretary, and
  - (iv) Other persons, such as paralegals and clerical staff, who (a) are employed or supervised by and under the direction and control of the authorized applicant or another authorized applicant in the same firm whose application has been granted; (b) have a need thereof in connection with the investigation; (c) are not involved in competitive decision making for an interested party which is a party to the investigation; and (d) have signed the acknowledgment for clerical personnel in the form attached hereto (the authorized applicant shall also sign

such acknowledgment and will be deemed responsible for such persons’ compliance with this APO);

(2) Use such BPI solely for the purposes of the above-captioned Commission investigation or for U.S. judicial or review pursuant to the North American Free Trade Agreement the determination resulting from such investigation of such Commission investigation;

(3) Not consult with any person not described in paragraph (1) concerning BPI disclosed under this APO or otherwise obtained in this investigation without first having received the written consent of the Secretary and the party or the representative of the party from whom such BPI was obtained;

(4) Whenever materials (e.g., documents, computer disks or similar media) containing such BPI are not being used, store such material in a locked file cabinet, vault, safe, or other suitable container (N.B.: [S]torage of BPI on so-called hard disk computer media or similar media is to be avoided, because mere erasure of data from such media may not irreversibly destroy the BPI and may result in violation of paragraph C of this APO);

(5) Serve all materials containing BPI disclosed under this APO as directed by the Secretary and pursuant to section 207.7(f) of the Commission’s rules;

(6) Transmit each document containing BPI disclosed under this APO:

(i) With a cover sheet identifying the document as containing BPI,

(ii) With all BPI enclosed in brackets and each page warning that the document contains BPI,

(iii) If the document is to be filed by a deadline, with each page marked “Bracketing of BPI not final for one business day after date of filing,” and

(iv) Within two envelopes, the inner one sealed and marked “Business Proprietary Information—To be opened only by [name of recipient]”, and the outer one sealed and not marked as containing BPI;

(7) Comply with the provision of this APO and section 207.7 of the Commission’s rules

(i) Make true and accurate representations in the authorized applicant’s application and promptly notify the Secretary of any changes that occur after the submission of the application and that affect the representations made in the application (e.g., change in personnel assigned to the investigation),

(ii) Report promptly and confirm in writing to the Secretary any possible breach of this APO, and

(iii) Acknowledge that breach of this APO may subject the authorized applicant and other persons to such sanctions or other actions as the Commission deems appropriate, including the administrative sanctions and actions set out in this APO.

The APO form for antidumping and countervailing duty investigations also provides for the return or destruction of the BPI obtained under the APO on the order of the Secretary, at the conclusion of the investigation, or at the completion of Judicial Review. The BPI disclosed to an authorized applicant under an APO during the preliminary phase of the investigation generally may remain in the applicant's possession during the final phase of the investigation.

The APO further provides that breach of an APO may subject an applicant to:

(1) Disbarment from practice in any capacity before the Commission along with such person's partners, associates, employer, and employees, for up to seven years following publication of a determination that the order has been breached;

(2) Referral to the United States Attorney;

(3) In the case of an attorney, accountant, or other professional, referral to the ethics panel of the appropriate professional association;

(4) Such other administrative sanctions as the Commission determines to be appropriate, including public release of, or striking from the record any information or briefs submitted by, or on behalf of, such person or the party he represents; denial of further access to business proprietary information in the current or any future investigations before the Commission, and issuance of a public or private letter of reprimand; and

(5) Such other actions, including but not limited to, a warning letter, as the Commission determines to be appropriate.

APOs issued in cross-border long-haul trucking ("LHT") investigations, conducted under the United States-Mexico-Canada Agreement ("USMCA") Implementation Act, 19 U.S.C. 4571–4574 (19 U.S.C. 4501 note), and safeguard investigations, conducted under the statutory authorities listed in 19 CFR 206.1 and 206.31, contain similar (though not identical) provisions.

#### *B. Section 337 Investigations*

APOs in section 337 investigations differ from those in title VII investigations: There is no set form like the title VII APO application, and provisions of individual APOs may differ depending on the investigation

and the presiding administrative law judge. However, in practice, the provisions are often similar in scope and applied quite similarly. Any person seeking access to CBI during a section 337 investigation (including outside counsel for parties to the investigation, secretarial and support personnel assisting such counsel, and technical experts and their staff who are employed for the purposes of the investigation) is required to read the APO, file a letter with the Secretary indicating agreement to be bound by the terms of the APO, agree not to reveal CBI to anyone other than another person permitted access by the APO, and agree to utilize the CBI solely for the purposes of that investigation.

In general, an APO in a section 337 investigation will define what kind of information is CBI and direct how CBI is to be designated and protected. The APO will state which persons may have access to CBI and which of those persons must sign onto the APO. The APO will provide instructions on how CBI is to be maintained and protected by labeling documents and filing transcripts under seal. It will provide protections for the suppliers of CBI by notifying them of a Freedom of Information Act request for the CBI and providing a procedure for the supplier to seek to prevent the release of the information. There are provisions for disputing the designation of CBI and a procedure for resolving such disputes. Under the APO, suppliers of CBI are given the opportunity to object to the release of the CBI to a proposed expert. The APO requires a person who discloses CBI, other than in a manner authorized by the APO, to provide all pertinent facts to the supplier of the CBI and to the administrative law judge and to make every effort to prevent further disclosure. Under Commission practice, if the underlying investigation is before the Commission at the time of the alleged breach or if the underlying investigation has been terminated, a person who discloses CBI, other than in a manner authorized by the APO, should report the disclosure to the Secretary. *See* 19 CFR 210.25, 210.34(c). Upon final termination of an investigation, the APO requires all signatories to the APO to either return to the suppliers or, with the written consent of the CBI supplier, destroy the originals and all copies of the CBI obtained during the investigation.

The Commission's regulations provide for the imposition of certain sanctions if a person subject to the APO violates its restrictions. The Commission keeps the names of the persons being investigated for violating

an APO confidential unless the sanction imposed is a public letter of reprimand. 19 CFR 210.34(c)(1). The possible sanctions are:

(1) An official reprimand by the Commission.

(2) Disqualification from or limitation of further participation in a pending investigation.

(3) Temporary or permanent disqualification from practicing in any capacity before the Commission pursuant to 19 CFR 201.15(a).

(4) Referral of the facts underlying the violation to the appropriate licensing authority in the jurisdiction in which the individual is licensed to practice.

(5) Making adverse inferences and rulings against a party involved in the violation of the APO or such other action that may be appropriate. 19 CFR 210.34(c)(3).

Commission employees are not signatories to the Commission's APOs and do not obtain access to BPI or CBI through APO procedures. Consequently, they are not subject to the requirements of the APO with respect to the handling of BPI and CBI. However, Commission employees are subject to strict statutory and regulatory constraints concerning BPI and CBI, and they face potentially severe penalties for noncompliance. *See* 18 U.S.C. 1905; title 5, U.S. Code; and Commission personnel policies implementing the statutes. Although the Privacy Act (5 U.S.C. 552a) limits the Commission's authority to disclose any personnel action against agency employees, this should not lead the public to conclude that no such actions have been taken.

#### **II. Investigations of Alleged APO Breaches**

The Commission conducts APO breach investigations for potential breaches that occur in title VII, safeguard, and LHT investigations, as well as potential breaches in section 337 investigations that are before the Commission or have been terminated.<sup>1</sup> Administrative law judges handle potential APO breaches in section 337 investigations when the breach occurred and is discovered while the underlying investigation is before the administrative law judge. The Commission may review any decision that the administrative law judge makes

<sup>1</sup> Procedures for investigations to determine whether a prohibited act, such as a breach, has occurred and for imposing sanctions for violation of the provisions of a protective order issued during a North American Free Trade Agreement or USMCA panel or committee proceedings are set out in 19 CFR 207.100–207.120. The Commission's Office of Unfair Import Investigations conducts those investigations initially.

on sanctions in accordance with Commission regulations. *See* 19 CFR 210.25, 210.34(c).

For Commission APO breach investigations, upon finding evidence of an APO breach or receiving information that there is reason to believe that one has occurred, the Secretary notifies relevant Commission offices that the Secretary has opened an APO breach file and the Commission has commenced an APO breach investigation. The Commission then notifies the alleged breaching parties of the alleged breach and provides them with the voluntary option to proceed under a one- or two-step investigatory process. Under the two-step process, which was the Commission's historic practice, the Commission determines first whether a breach has occurred and, if so, who is responsible for it. This is done after the alleged breaching parties have been provided an opportunity to present their views on the matter. The breach investigation may conclude after this first step if: (1) the Commission determines that no breach occurred and issues a letter so stating; or (2) the Commission finds that a breach occurred, but concludes that no further action is warranted and issues a warning letter. If the Commission determines that a breach occurred that warrants further action, the Commission will then determine what sanction, if any, to impose. Before making this determination, the Commission provides the breaching parties with an opportunity to present their views on the appropriate sanction and any mitigating circumstances. The Commission can decide as part of either the first or second step to issue a warning letter. A warning letter is not a sanction, but the Commission will consider a warning letter as part of a subsequent APO breach investigation.

The Commission recognizes that the two-step process can result in duplicative work for the alleged breaching party and Commission staff in some APO breach investigations. For example, parties who self-report their own breach often address mitigating circumstances and sanctions in their initial response to the Commission's letter of inquiry on the breach. But, under the Commission's two-step process, they must await a Commission decision on breach and then submit again their views on mitigating circumstances and sanctions. To streamline this process and accelerate processing times, the Commission offers alleged breaching parties the option to voluntarily elect a one-step APO breach investigation process. Under this process, the Commission will determine

simultaneously whether a breach occurred and, if so, the appropriate sanction to impose, if any. Under either process, the alleged breaching party has the opportunity to submit affidavits reciting the facts concerning the alleged breach and mitigating factors pertaining to the appropriate response if a breach is found.

Sanctions for APO violations serve three basic interests: (a) preserving the confidence of submitters of BPI/CBI that the Commission is a reliable protector of BPI/CBI; (b) disciplining breachers; and (c) deterring future violations. As the Conference Report to the Omnibus Trade and Competitiveness Act of 1988 observed: "[T]he effective enforcement of limited disclosure under [APO] depends in part on the extent to which private parties have confidence that there are effective sanctions against violation." H.R. Conf. Rep. 100–576, at 623 (1988).

The Commission has worked to develop consistent jurisprudence, not only in determining whether a breach has occurred, but also in selecting an appropriate response. In determining the appropriate response, the Commission generally considers mitigating factors such as the unintentional nature of the breach, the lack of prior breaches committed by the breaching party, the corrective measures taken by the breaching party, and the promptness with which the breaching party reported the violation to the Commission. The Commission also considers aggravating circumstances, especially whether persons not authorized under the APO had access to and viewed the BPI/CBI. The Commission considers whether there have been prior breaches by the same person or persons in other investigations and whether there have been multiple breaches by the same person or persons in the same investigation.

The Commission's rules permit an economist or consultant to obtain access to BPI/CBI under the APO in a title VII, safeguard, or LHT investigation if the economist or consultant is under the direction and control of an attorney under the APO, or if the economist or consultant appears regularly before the Commission and represents an interested party who is a party to the investigation. *See* 19 CFR 207.7(a)(3)(i)(B) and (C); 19 CFR 206.17(a)(3)(i)(B) and (C); and 19 CFR 208.22(a)(3)(i)(B) and (C). Economists and consultants who obtain access to BPI/CBI under the APO under the direction and control of an attorney nonetheless remain individually responsible for complying with the

APO. In appropriate circumstances, for example, an economist under the direction and control of an attorney may be held responsible for a breach of the APO by failing to redact APO information from a document that is subsequently filed with the Commission and served as a public document, or for retaining BPI/CBI without consent of the submitter after the termination of an investigation. This is so even though the Commission may also hold the attorney exercising direction or control over the economist or consultant responsible for the APO breach. In section 337 investigations, technical experts and their staff who are employed for the purposes of the investigation are required to sign onto the APO and agree to comply with its provisions.

The records of Commission investigations of alleged APO breaches in antidumping and countervailing duty cases, section 337 investigations, safeguard investigations, and LHT investigations are not publicly available and are exempt from disclosure under the Freedom of Information Act, 5 U.S.C. 552. *See, e.g.,* 19 U.S.C. 1677f(g); 19 U.S.C. 1333(h); 19 CFR 210.34(c).

The two types of breaches most frequently investigated by the Commission involve: (1) the APO's prohibition on the dissemination or exposure of BPI or CBI to unauthorized persons; and (2) the APO's requirement that the materials received under the APO be returned or destroyed and that a certificate be filed with the Commission indicating what actions were taken after the termination of the investigation or any subsequent appeals of the Commission's determination. The dissemination of BPI/CBI usually occurs as the result of failure to delete BPI/CBI from public versions of documents filed with the Commission or transmission of proprietary versions of documents to unauthorized recipients. Other breaches have included the failure to bracket properly BPI/CBI in proprietary documents filed with the Commission, the failure to report immediately known or suspected violations of an APO, and the failure to adequately supervise non-lawyers in the handling of BPI/CBI.

Occasionally, the Commission conducts APO breach investigations that involve members of a law firm or consultants working with a firm who were granted access to APO materials by the firm although they were not APO signatories. In many of these cases, the firm and the person using the BPI/CBI mistakenly believed an APO application had been filed for that person. The Commission has determined in all of these cases that the person who was a non-signatory, and therefore did not

agree to be bound by the APO, could not be found to have breached the APO. However, under Commission rule 201.15 (19 CFR 201.15), the Commission may take action against these persons for good cause shown. In all cases in which the Commission has taken such action, it decided that the non-signatory appeared regularly before the Commission, was aware of the requirements and limitations related to APO access, and should have verified their APO status before obtaining access to and using the BPI/CBI. The Commission notes that section 201.15 may also be available to issue sanctions to attorneys or agents in different factual circumstances in which they did not technically breach the APO, but their action or inaction did not demonstrate diligent care of the APO materials, even though they appeared regularly before the Commission and were aware of the importance that the Commission places on the proper care of APO materials.

The Commission has held routinely that the disclosure of BPI/CBI through recoverable metadata or hidden text constitutes a breach of the APO even when the BPI/CBI is not immediately visible without further manipulation of the document. In such cases, breaching parties have transmitted documents that appear to be public documents in which the parties have removed or redacted all BPI/CBI. However, further inspection of the document reveals that confidential information is actually retrievable by manipulating codes in software or through the recovery of hidden text or metadata. In such instances, the Commission has found that the electronic transmission of a public document with BPI/CBI in a recoverable form was a breach of the APO.

The Commission has cautioned counsel to ensure that each authorized applicant files with the Commission within 60 days of the completion of an import injury investigation or at the conclusion of judicial or binational review of the Commission's determination, a certificate stating that, to the signatory's knowledge and belief, all copies of BPI/CBI have been returned or destroyed, and no copies of such materials have been made available to any person to whom disclosure was not specifically authorized. This requirement applies to each attorney, consultant, or expert in a firm who has access to BPI/CBI. One firm-wide certificate is insufficient.

Attorneys who are signatories to the APO in a section 337 investigation should inform the administrative law judge and the Secretary if there are any changes to the information that was provided in the application for access to

the CBI. This is similar to the requirement to update an applicant's information in title VII investigations.

In addition, attorneys who are signatories to the APO in a section 337 investigation should send a notice to the Commission if they stop participating in the investigation or the subsequent appeal of the Commission's determination. The notice should inform the Commission about the disposition of CBI obtained under the APO that was in their possession, or the Commission could hold them responsible for any failure of their former firm to return or destroy the CBI in an appropriate manner.

### III. Specific APO Breach Investigations

Case 1. The Commission determined that a partner at a law firm breached the APO issued in a title VII investigation when the partner supervised the drafting, revision, and review of a publicly filed document that contained BPI.

Three attorneys, including the partner, were responsible for drafting the document at issue. Despite the firm's instructions to place brackets around any BPI that an attorney added to the draft, one of the non-partner attorneys inadvertently failed to include brackets around a quote in a footnote. The partner completed two full reviews of the document before its filing, but the partner failed to identify the unbracketed BPI in the footnote. The law firm filed the document on the Commission's Electronic Document Information System (EDIS), and it also served the document on all parties on the public service list. The Commission first became aware of this breach through Commission staff, who discovered the exposed BPI and notified the Secretary. The Office of the Secretary notified the partner of the breach, and the law firm filed a corrected version of the public document later that day.

In determining whether to issue a sanction for the breach, the Commission considered mitigating factors, including that: (1) the breach was inadvertent and unintentional; (2) the law firm took prompt corrective actions to mitigate the effect of the breach by correcting its filing, notifying the recipients of the document's error and of its substitute filing, and obtaining the recipient's confirmation of the document's destruction; and (3) the partner had not previously breached an APO in the two-year period preceding the date of the breach. The Commission also considered the following aggravating factors: (1) the Commission was the first to discover and flag the breach; and (2)

unauthorized individuals accessed and presumably viewed the CBI.

The Commission issued a private letter of reprimand to the partner after finding that the partner was ultimately responsible for the failure to redact BPI from the public document.

Case 2. The Commission determined that an expert breached the APO issued in a section 337 investigation by submitting expert reports containing CBI in several unrelated actions pending before a federal district court.

The expert drafted and filed before a federal district court six expert reports that contained a sentence from the confidential version of an administrative law judge's initial determination. Two months later, counsel for one of the parties involved in the underlying section 337 investigation, and in the federal district court action, notified the expert that the quoted sentence did not appear in the public version of the initial determination. The expert took immediate steps to replace the page that contained the CBI, but the expert did not notify the Commission until about a month after the breach's discovery. The expert acknowledged the failure to follow firm procedures, which would have required comparison of the draft expert report with the public version of the initial determination.

In determining whether to issue a sanction for the breach, the Commission considered the following mitigating factors: (1) the breach was inadvertent and unintentional; (2) the expert self-reported the breach to the Commission; and (3) the expert had not previously breached an APO in the two-year period preceding the breach. The Commission also considered the following aggravating factors: (1) the expert did not discover the breach; (2) the breach resulted in exposure of CBI to unauthorized individuals; (3) there was a delay of two months between the discovery of the breach and the mitigation of the breach; (4) the expert waited more than one month to report the breach to the Commission; and (5) the expert failed to handle CBI with due diligence and care, and the expert did not follow firm procedures for protecting CBI.

The Commission issued a private letter of reprimand to the expert.

Case 3. The Commission determined that a supervisory attorney at a law firm breached an APO in a title VII investigation when a legal support staff member under the attorney's supervision inadvertently attached a confidential brief from one investigation to a public brief in another investigation and publicly filed both briefs as one

document with the Department of Commerce (Commerce). The Commission also determined that the supervisory attorney breached the APO a second time by providing BPI to that legal support staff member before the staff member had signed an APO acknowledgment for clerical personnel.

After filing the document in Commerce's IA ACCESS website, the legal support staff member served the document on the parties listed on the public brief's service list. None of the served parties were on the APO service list for the confidential brief. Three days later, the law firm received notification from one of the parties on the public brief's service list that the document contained BPI from an unrelated investigation. Upon review of the document, the law firm discovered that the legal support staff member who had filed and served the document had included a copy of a confidential brief from another title VII investigation. The law firm immediately contacted Commerce to request removal of the document from the IA ACCESS website. Commerce indicated to the law firm that multiple individuals had accessed the document while it was posted publicly to that website. The law firm also contacted the parties on the public service list to ask that they destroy any copies.

The law firm immediately notified the Commission of the breach after learning of it. In its correspondence to the Commission, the firm indicated that the breach occurred because of the legal support staff member's failure to follow firm procedures in handling and storing the confidential brief. The firm also indicated that the supervisory attorney had supervised the preparation of the confidential brief and had been aware of staff's inconsistent adherence to the firm's BPI procedures. In addition, over the course of the APO breach investigation, the Commission discovered that the supervisory attorney had provided BPI to the legal support staff member without first having the staff member sign an APO acknowledgment for clerical personnel.

In determining whether to issue a sanction for the breach, the Commission considered mitigating factors, including that: (1) the breach was inadvertent and unintentional; (2) the law firm took prompt action to remedy the breach and prevent further dissemination of BPI; (3) the law firm promptly self-reported the breach to the Commission; (4) the law firm implemented new procedures to prevent similar breaches in the future; and (5) the supervisory attorney had not previously breached an APO in the two-year period preceding the date of the

breach. The Commission also considered the following aggravating factors: (1) unauthorized individuals had access to and viewed the BPI; (2) the law firm violated the APO in two different ways; (3) the law firm did not discover either breach; and (4) the supervisory attorney and legal support staff failed to follow the law firm's procedures for protecting BPI.

The Commission also considered whether to find in breach of the APO a second attorney who supervised the preparation of the public brief, and it determined not to do so. The second attorney was an APO signatory in both relevant investigations, but the second attorney had not supervised the preparation of the confidential brief. Further, the second attorney had reviewed the public brief before the legal support staff member had attached the confidential version to it. The Commission determined that the second attorney would have had no reason to suspect that the legal support staff member would attach BPI materials to the public brief after the final review and approval of the brief.

The Commission issued a private letter of reprimand to the supervisory attorney. The Commission did not take any further action against the legal support staff member whose actions contributed to the breach because the staff member had since passed away.

Case 4. The Commission determined that two attorneys at a law firm breached an APO in a title VII investigation when they reviewed, filed in EDIS, and served a public version of a brief that contained unredacted BPI belonging to a third party.

The attorneys served the brief on the parties to the public service list in the investigation, which included individuals who were not authorized under the APO to view BPI, and the brief was publicly posted to EDIS, where at least one unauthorized individual accessed it. In addition, one of the attorneys forwarded copies of the brief to the firm's clients. Two days after filing and serving the brief, the two attorneys received notification from another party to the investigation (after Commission business hours) that the brief contained BPI. The two attorneys immediately reviewed the brief, and they discovered that they had bracketed, but failed to remove, the BPI at issue. That same day, the two attorneys contacted their clients and the parties on the public service list to request that they destroy the brief and contact anyone else to whom they may have forwarded the brief. The next day, the two attorneys notified the Commission of the breach and requested that the

Secretary remove the document from public view on EDIS. Over the course of the investigation, the two attorneys confirmed to the Commission that they had received responses (and confirmations of destruction) from all but two individual recipients of the brief. Those two individuals never acknowledged the attorneys' emails nor confirmed destruction of the brief.

In determining whether to issue a sanction for the breach, the Commission considered mitigating factors, including that: (1) the breach was inadvertent and unintentional; (2) the law firm promptly self-reported the breach to the Commission; (3) the law firm took prompt action to remedy the breach and prevent further dissemination of BPI; (4) the law firm implemented new procedures to prevent similar breaches in the future; and (5) neither attorney had previously breach an APO in the two-year period preceding the date of the breach. The Commission also considered the following aggravating factors: (1) unauthorized individuals had access to and presumably viewed the BPI; and (2) the law firm did not discover its own breach.

The Commission determined to issue private letters of reprimand to both attorneys.

Case 5. The Commission determined that an attorney and a paralegal at a law firm breached the APO in a title VII investigation when an economist at the firm accessed BPI materials that the law firm had received under the APO before the Secretary had approved the economist's APO application.

The attorney, who was lead counsel for the investigation, did not confirm that the Secretary had approved the economist's APO application before instructing the economist to access the BPI materials. The economist also failed to confirm that the Secretary had approved the APO application before accessing the BPI materials. The paralegal, who had set up the folder containing the BPI materials in the law firm's system, had failed to restrict access to the folder (in accordance with the firm's procedures) to only authorized individuals whose APO applications had been approved. Upon discovery that the Secretary had not yet approved the economist's APO application, the attorney immediately notified the Commission of the breach and restricted access to the folder containing the BPI materials to approved APO applicants. However, the economist had access to and viewed on several occasions the BPI at issue for approximately two weeks before authorized to do so. The law firm confirmed that the economist was the

only unauthorized individual to access the BPI materials.

In determining whether to issue a sanction for the breach, the Commission considered mitigating factors, including that: (1) the breach was inadvertent and unintentional; (2) the law firm took prompt action to remedy the breach and prevent further dissemination of BPI; (3) the firm immediately self-reported the breach to the Commission; (4) the law firm implemented new procedures to prevent similar breaches in the future; (5) the economist, who was later added to the APO, acted at all times as if bound by the APO, and thus no other unauthorized individuals viewed the BPI materials; and (6) the attorney and the paralegal had not previously breached an APO in the two-year period preceding the date of the breach. The Commission also considered the following aggravating factors: (1) the economist was not an authorized APO signatory at the time of the initial access and viewing of the BPI; and (2) the attorney, the paralegal, and the economist failed to follow the law firm's procedures for protecting BPI.

The Commission determined to issue warning letters to the attorney and the paralegal. The Commission also found that good cause existed to issue a warning letter to the economist under 19 CFR 201.15(a). Though the economist was not a signatory to the APO at the time of the inappropriate access to the BPI, the economist was, or should have been, aware of the requirements and limitations related to APO access. The economist's failure to verify that the Commission had accepted the APO application before using the BPI materials demonstrated a disregard for the Commission's rules protecting the confidentiality of the information that is provided under the APO.

Case 6. The Commission determined that 18 attorneys from one law firm breached the APO issued in a section 337 investigation when the law firm filed in EDIS a public version of a document that contained unredacted CBI in a footnote.

Two supervisory attorneys oversaw the redaction and filing of the public version of the document and 16 attorneys contributed to its review and redaction. Each attorney had the opportunity to discover the presence of the unredacted CBI in the footnote of the document during their respective review, but none did. The firm filed the document in EDIS and served it on the parties. One day later, one of the firm's attorneys, who had an opportunity to review the document before its filing, discovered that the footnote in question contained unredacted CBI. The firm

notified the Commission that same day, after the document had been publicly posted to EDIS, and the firm filed a replacement document about a week later.

In determining whether to issue a sanction for the breach, the Commission considered the following mitigating factors: (1) the breach was inadvertent and unintentional; (2) the law firm took prompt action to remedy the breach and prevent further dissemination of CBI; (3) the law firm immediately self-reported the breach to the Commission; and (4) the law firm implemented new procedures to prevent similar breaches in the future. The Commission also considered the aggravating factor that unauthorized persons had access to and presumably viewed CBI.

The Commission issued warning letters to 16 attorneys whose actions contributed to the breach. The Commission also issued private letters of reprimand to the two supervisory attorneys who bore ultimate responsibility for overseeing the redaction and filing of the document at issue.

Case 7. The Commission determined that a supervisory attorney and an associate attorney breached the APO issued in a section 337 investigation when they exposed CBI from the investigation to their client.

The associate attorney, in reporting the work that the attorney had performed for the underlying investigation, noted details of that work in an internal electronic time entry system. The details included references to company names that one of the parties to the investigation considered to be CBI. The firm incorporated the associate attorney's entries from the time entry system into a billing invoice that it sent to its client. The supervisory attorney personally reviewed the billing invoice at issue and approved it for transmittal to the firm's client. Upon receipt of the billing invoice, the client contacted the firm to inquire about the entries that contained CBI, which caused the firm to discover its own breach. The firm requested that its client return the original invoice, and the client immediately did so. The firm notified the party whose CBI was exposed, and after conducting an internal investigation, the firm notified the Commission about two months later.

In determining whether to issue a sanction for the breach, the Commission considered the following mitigating factors: (1) the breach was inadvertent and unintentional; (2) the law firm self-reported the breach to the Commission; (3) the law firm took prompt action to remedy the breach and prevent further

dissemination of CBI; (4) the attorneys had not previously breached an APO in the two-year period preceding the date of the breach; and (5) the law firm implemented new measures to prevent future similar breaches in the future. The Commission also considered the following aggravating factors: (1) unauthorized persons had access to and viewed CBI; and (2) the law firm waited nearly two months to notify the Commission of the breach.

The Commission issued a warning letter to the associate attorney whose actions contributed to, but did not directly cause, the breach. It issued a private letter of reprimand to the supervisory attorney.

Case 8. The Commission determined that 16 attorneys from one law firm breached the APO issued in a section 337 investigation when the law firm filed in EDIS 79 public demonstrative exhibits that contained unredacted CBI.

Fifteen attorneys were part of a team that was responsible for preparing and filing demonstrative exhibits following a hearing in the investigation. One senior attorney was responsible for supervising the team's effort. The breach occurred because when, in preparing the demonstrative exhibits for filing, the team failed to follow an instruction to place a "-C" designation after the exhibit number where the exhibits contained CBI. Because the team did not include the "-C" designation on the exhibits in question, the legal support staff who filed the exhibits in EDIS assumed that they were public and filed them on the public record. Over a year later, the law firm learned that opposing counsel in unrelated federal court litigation accessed the exhibits through EDIS. The law firm promptly notified the Commission and the affected parties whose CBI had been exposed, and the firm spent over 1,000 hours in its efforts to remediate the breach. Following the breach's discovery, the law firm changed its protocols for protecting CBI in section 337 investigations.

In determining whether to issue a sanction for the breach, the Commission considered the following mitigating factors: (1) the breach was inadvertent and unintentional; (2) the law firm discovered its own breach and promptly self-reported it to the Commission; (3) the law firm took prompt action to investigate and remedy the breach; (4) the attorneys had not previously breached an APO in the preceding two years; and (5) the law firm implemented new measures to prevent future similar breaches. The Commission also considered the following aggravating factors: (1) unauthorized persons had access to and viewed CBI; and (2) the

delay in the discovery of the breach left CBI publicly exposed for a period of about 15 months.

The Commission issued a private letter of reprimand to the supervisor of the team responsible for the preparation and filing of the exhibits at issue after finding that the attorney's supervision was inadequate and failed to secure the confidential treatment of the CBI in those exhibits. The Commission issued warning letters to 14 attorneys on the team who contributed to the preparation and filing of the exhibits. The Commission also issued a warning letter to one attorney who did not directly participate in the preparation and filing of the exhibits but permitted legal support staff to use, without supervision, the attorney's credentials to file the exhibits.

Case 9. The Commission found that an associate attorney breached the APO issued in a section 337 investigation when the attorney's actions exposed CBI obtained under the APO to the attorney's client.

The breach occurred when the attorney arranged for the client to access firm files stored on an electronic server by a discovery vendor. The attorney instructed the vendor to provide the client with limited access to certain file locations that stored only public files. However, the attorney did not verify that the vendor had followed the attorney's instructions before granting the client access to the firm's files. The vendor mistakenly granted the client unlimited access, and, as a result, the client inadvertently accessed 14 files containing CBI obtained under the APO. In accordance with the predetermined arrangement, the vendor terminated that client's unlimited access one day later. However, the attorney did not discover the breach until about 14 months later. The attorney reported the breach to the Commission a few days after making the discovery.

In determining whether to issue a sanction for the breach, the Commission considered the following mitigating factors: (1) the breach was inadvertent and unintentional; (2) the law firm discovered its own breach; (3) the law firm took prompt action to investigate and remedy the breach; (4) the attorney had not previously breached an APO in the two-year period preceding the date of the breach; and (5) the law firm self-reported its own breach to the Commission. The Commission also considered the following aggravating factors: (1) unauthorized persons had access to and viewed CBI; and (2) the law firm did not discover its own breach until about 14 months after it occurred. However, the Commission noted that

because the client's access to the CBI-containing files was limited to one day, the CBI was not exposed to unauthorized individuals during those 14 months.

The Commission issued a private letter of reprimand to the associate attorney and found that, in the context of this matter, the attorney was obligated to take additional steps to ensure that the client was unable to access the files containing CBI.

Case 10. The Commission determined that an attorney and a paralegal at a law firm breached the APO in a title VII investigation when they publicly filed in EDIS a brief with BPI in recoverable hidden text.

While multiple attorneys reviewed the public version of the brief, the attorney and the paralegal were the only individuals who prepared and reviewed the final .pdf version of the document. Under firm procedures, the paralegal prepared the public version of the document by changing bracketed BPI to white font, converting the document from Microsoft Word to a .pdf file format, and then removing hidden information from the final .pdf file. Following the paralegal's preparation of the final document, the attorney reviewed the .pdf version of the document to ensure that all BPI had been removed from the file. The paralegal then publicly filed the document to EDIS. That same day, while preparing the document for service, another paralegal at the same firm noticed that the document contained BPI in recoverable hidden text. The attorney immediately notified the Commission of the breach and requested that the document be removed from public viewing. However, unauthorized individuals accessed and presumably viewed the brief while it was posted publicly to EDIS.

In determining whether to issue a sanction for the breach, the Commission considered mitigating factors, including that: (1) the breach was inadvertent and unintentional; (2) the law firm discovered its own breach; (3) the law firm took prompt action to remedy the breach and prevent further dissemination of BPI; (4) the law firm immediately self-reported the breach to the Commission; (5) the law firm implemented new procedures to prevent similar breaches in the future; and (6) neither the attorney nor the paralegal had previously breached an APO in the two-year period preceding the date of the breach. The Commission also considered the aggravating factor that unauthorized persons had access to and presumably viewed BPI.

The Commission determined to issue private letters of reprimand to both the attorney and the paralegal. The Commission also considered whether to find in breach other attorneys and legal support staff who reviewed the public version of the brief and approved the bracketing. However, the Commission declined to do so, determining that this breach occurred not because of bracketing issues, but because of a failure to remove properly bracketed BPI from the final .pdf file.

By order of the Commission.

Issued: November 14, 2022.

## **INTERNATIONAL TRADE COMMISSION**

**[Investigation Nos. 731–TA–1064 and 1066–1068 (Third Review)]**

### **Frozen Warmwater Shrimp From China, India, Thailand, and Vietnam; Scheduling of Full Five-Year Reviews**

**AGENCY:** United States International Trade Commission.

**ACTION:** Notice.

**SUMMARY:** The Commission hereby gives notice of the scheduling of full reviews pursuant to the Tariff Act of 1930 (“the Act”) to determine whether revocation of the antidumping duty orders on frozen warmwater shrimp from China, India, Thailand, and Vietnam would be likely to lead to continuation or recurrence of material injury within a reasonably foreseeable time. The Commission has determined to exercise its authority to extend the review period by up to 90 days.

**DATES:** November 14, 2022.

**FOR FURTHER INFORMATION CONTACT:** Tyler Berard (202–205–3354) or Keysha Martinez (202–205–2136), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>). The public record for these reviews may be viewed on the

Commission's electronic docket (EDIS) at <https://edis.usitc.gov>.

#### SUPPLEMENTARY INFORMATION:

**Background.**—On August 5, 2022, the Commission determined that responses to its notice of institution of the subject five-year reviews were such that full reviews should proceed (87 FR 54260, September 2, 2022); accordingly, full reviews are being scheduled pursuant to section 751(c)(5) of the Tariff Act of 1930 (19 U.S.C. 1675(c)(5)). A record of the Commissioners' votes, the Commission's statement on adequacy, and any individual Commissioner's statements are available from the Office of the Secretary and at the Commission's website.

**Participation in the reviews and public service list.**—Persons, including industrial users of the subject merchandise and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in these reviews as parties must file an entry of appearance with the Secretary to the Commission, as provided in section 201.11 of the Commission's rules, by 45 days after publication of this notice. A party that filed a notice of appearance following publication of the Commission's notice of institution of the reviews need not file an additional notice of appearance. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the reviews.

For further information concerning the conduct of these reviews and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A, D, E, and F (19 CFR part 207).

Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, <https://edis.usitc.gov>.) No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

**Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list.**—Pursuant to section 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in these reviews available to authorized applicants under the APO issued in the reviews, provided that the application is made by 45 days after publication of this notice. Authorized applicants must represent interested

parties, as defined by 19 U.S.C. 1677(9), who are parties to the reviews. A party granted access to BPI following publication of the Commission's notice of institution of the reviews need not reapply for such access. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

**Staff report.**—The prehearing staff report in these reviews will be placed in the nonpublic record on March 20, 2023, and a public version will be issued thereafter, pursuant to section 207.64 of the Commission's rules.

**Hearing.**—The Commission will hold a hearing in connection with these reviews beginning at 9:30 a.m. on April 11, 2023. Information about the place and form of the hearing, including about how to participate in and/or view the hearing, will be posted on the Commission's website at <https://www.usitc.gov/calendarpad/calendar.html>. Interested parties should check the Commission's website periodically for updates. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission on or before March 30, 2023. Any requests to appear as a witness via videoconference must be included with your request to appear. Requests to appear via videoconference must include a statement explaining why the witness cannot appear in person; the Chairman, or other person designated to conduct the reviews, may in their discretion for good cause shown, grant such a request. Requests to appear as remote witness due to illness or a positive COVID-19 test result may be submitted by 3 p.m. the business day prior to the hearing.

A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the hearing. All parties and nonparties desiring to appear at the hearing and make oral presentations should attend a prehearing conference to be held at 9:30 a.m. on April 4, 2023, if held. Parties shall file and serve written testimony and presentation slides in connection with their presentation at the hearing by no later than 4 p.m. on April 10, 2023. Oral testimony and written materials to be submitted at the public hearing are governed by sections 201.6(b)(2), 201.13(f), and 207.24 of the Commission's rules. Parties must submit any request to present a portion of their hearing testimony *in camera* no later than 7 business days prior to the date of the hearing.

**Written submissions.**—Each party to the reviews may submit a prehearing brief to the Commission. Prehearing

briefs must conform with the provisions of section 207.65 of the Commission's rules; the deadline for filing is March 29, 2023. Parties also shall file written testimony in connection with their presentation at the hearing, and posthearing briefs, which must conform with the provisions of section 207.67 of the Commission's rules. The deadline for filing posthearing briefs is April 20, 2023. In addition, any person who has not entered an appearance as a party to the reviews may submit a written statement of information pertinent to the subject of the reviews on or before April 20, 2023. On May 18, 2023, the Commission will make available to parties all information on which they have not had an opportunity to comment. Parties may submit final comments on this information on or before May 22, 2023, but such final comments must not contain new factual information and must otherwise comply with section 207.68 of the Commission's rules. All written submissions must conform with the provisions of section 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of sections 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures*, available on the Commission's website at [https://www.usitc.gov/documents/handbook\\_on\\_filing\\_procedures.pdf](https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf), elaborates upon the Commission's procedures with respect to filings.

Additional written submissions to the Commission, including requests pursuant to section 201.12 of the Commission's rules, shall not be accepted unless good cause is shown for accepting such submissions, or unless the submission is pursuant to a specific request by a Commissioner or Commission staff.

In accordance with sections 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the reviews must be served on all other parties to the reviews (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

The Commission has determined that these reviews are extraordinarily complicated and therefore has determined to exercise its authority to extend the review period by up to 90 days pursuant to 19 U.S.C. 1675(c)(5)(B).

**Authority:** These reviews are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to section 207.62 of the Commission's rules.

By order of the Commission.

Issued: November 15, 2022.

**Katherine Hiner,**

*Acting Secretary to the Commission.*

BILLING CODE 7020-02-P

## INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701-TA-682 and 731-TA-1592-1593 (Preliminary)]

### Certain Freight Rail Couplers and Parts Thereof From China and Mexico

#### Determinations

On the basis of the record<sup>1</sup> developed in the subject investigations, the United States International Trade Commission (“Commission”) determines, pursuant to the Tariff Act of 1930 (“the Act”), that there is a reasonable indication that an industry in the United States is materially injured by reason of imports of certain freight rail couplers and parts thereof from China and Mexico, provided for in subheadings 8607.30.10 and 7326.90.86 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value (“LTFV”) and to be subsidized by the government of China.<sup>2</sup>

#### Commencement of Final Phase Investigations

Pursuant to section 207.18 of the Commission’s rules, the Commission also gives notice of the commencement of the final phase of its investigations. The Commission will issue a final phase notice of scheduling, which will be published in the **Federal Register** as provided in § 207.21 of the Commission’s rules, upon notice from the U.S. Department of Commerce (“Commerce”) of affirmative preliminary determinations in the investigations under §§ 703(b) or 733(b) of the Act, or, if the preliminary determinations are negative, upon notice of affirmative final determinations in those investigations under §§ 705(a) or 735(a) of the Act. Parties that filed entries of appearance in the preliminary phase of the investigations need not enter a separate appearance for the final phase of the investigations. Industrial users, and, if the merchandise under investigation is sold at the retail level, representative consumer organizations have the right

to appear as parties in Commission antidumping and countervailing duty investigations. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to the investigations.

#### Background

On September 28, 2022, McConway & Torley LLC, Pittsburgh, Pennsylvania, and the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied Industrial and Service Workers International Union, AFL-CIO, CLC filed petitions with the Commission and Commerce, alleging that an industry in the United States is materially injured or threatened with material injury by reason of subsidized imports of freight rail couplers from China and LTFV imports of freight rail couplers from China and Mexico. Accordingly, effective September 28, 2022, the Commission instituted countervailing duty investigation no. 701-TA-682 and antidumping duty investigation nos. 731-TA-1592-1593 (Preliminary).

Notice of the institution of the Commission’s investigations and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of October 5, 2022 (87 FR 60413). The Commission conducted its conference on October 19, 2022. All persons who requested the opportunity were permitted to participate.

The Commission made these determinations pursuant to §§ 703(a) and 733(a) of the Act (19 U.S.C. 1671b(a) and 1673b(a)). It completed and filed its determinations in these investigations on November 14, 2022. The views of the Commission are contained in USITC Publication 5387 (November 2022), entitled *Certain Freight Rail Couplers and Parts Thereof: Investigation Nos. 701-TA-682 and 731-TA-1592-1593 (Preliminary)*.

By order of the Commission.

Issued: November 15, 2022.

**Katherine Hiner,**

*Acting Secretary to the Commission.*

BILLING CODE 7020-02-P

## DEPARTMENT OF JUSTICE

### Drug Enforcement Administration

[Docket No. 1115]

#### Bulk Manufacturer of Controlled Substances Application: Bulk Manufacturer of Marihuana: Berkshire Roots, Inc.

**AGENCY:** Drug Enforcement Administration, Justice.

**ACTION:** Notice of application.

**SUMMARY:** The Drug Enforcement Administration (DEA) is providing notice of an application it has received from an entity applying to be registered to manufacture in bulk basic class(es) of controlled substances listed in schedule I. DEA intends to evaluate this and other pending applications according to its regulations governing the program of growing marihuana for scientific and medical research under DEA registration.

**DATES:** Registered bulk manufacturers of the affected basic class(es), and applicants therefore, may submit electronic comments on or objections to the issuance of the proposed registration on or before January 17, 2023.

**ADDRESSES:** The DEA requires that all comments be submitted electronically through the Federal eRulemaking Portal, which provides the ability to type short comments directly into the comment field on the web page or attach a file for lengthier comments. Please go to <https://www.regulations.gov> and follow the online instructions at that site for submitting comments. Upon submission of your comment, you will receive a Comment Tracking Number. Please be aware that submitted comments are not instantaneously available for public view on <https://www.regulations.gov>. If you have received a Comment Tracking Number, your comment has been successfully submitted and there is no need to resubmit the same comment.

**SUPPLEMENTARY INFORMATION:** The Controlled Substances Act (CSA) prohibits the cultivation and distribution of marihuana except by persons who are registered under the CSA to do so for lawful purposes. In accordance with the purposes specified in 21 CFR 1301.33(a), DEA is providing notice that the entity identified below has applied for registration as a bulk manufacturer of schedule I controlled substances. In response, registered bulk manufacturers of the affected basic class(es), and applicants therefore, may submit electronic comments on or objections of the requested registration, as provided in this notice. This notice

<sup>1</sup> The record is defined in § 207.2(f) of the Commission’s Rules of Practice and Procedure (19 CFR 207.2(f)).

<sup>2</sup> 87 FR 64440 and 87 FR 64444 (October 25, 2022).

does not constitute any evaluation or determination of the merits of the application submitted.

The applicant plans to manufacture bulk active pharmaceutical ingredients (APIs) for product development and distribution to DEA registered researchers. If the application for registration is granted, the registrant would not be authorized to conduct other activity under this registration aside from those coincident activities specifically authorized by DEA regulations. DEA will evaluate the application for registration as a bulk manufacturer for compliance with all applicable laws, treaties, and regulations and to ensure adequate safeguards against diversion are in place.

As this applicant has applied to become registered as a bulk manufacturer of marihuana, the application will be evaluated under the criteria of 21 U.S.C. 823(a). DEA will conduct this evaluation in the manner described in the rule published at 85 FR 82333 on December 18, 2020, and reflected in DEA regulations at 21 CFR part 1318.

In accordance with 21 CFR 1301.33(a), DEA is providing notice that on October 17, 2022, Berkshire Roots, Inc., 501 Dalton Avenue, Pittsfield, Massachusetts 01201, applied to be registered as a bulk manufacturer of the following basic class(es) of controlled substances:

| Controlled substance | Drug code | Schedule |
|----------------------|-----------|----------|
| Marihuana Extract.   | 7350      | I        |
| Marihuana .....      | 7360      | I        |

**Kristi O'Malley,**  
Assistant Administrator.

## DEPARTMENT OF JUSTICE

### Drug Enforcement Administration

[Docket No. 22–50]

#### Adley Dasilva, P.A.; Decision and Order

On August 18, 2022, the Drug Enforcement Administration (DEA or Government) issued an Order to Show Cause (OSC) to Adley Dasilva, P.A. (Respondent). OSC, at 1, 3. The OSC proposed the revocation of Respondent's Certificate of Registration No. MD4826915 at the registered address of 1941 Southeast Port Saint

Lucie Boulevard, Port St. Lucie, Florida 34952. *Id.* at 1. The OSC alleged that Respondent's registration should be revoked because Respondent is “without authority to handle controlled substances in the State of Florida, the state in which [he is] registered with DEA.” *Id.* at 1–2 (citing 21 U.S.C. 824(a)(3)).

By letter dated September 2, 2022, Respondent requested a hearing. On September 15, 2022, the Government filed a Motion for Summary Disposition (Government's Motion), which Respondent opposed. On September 28, 2022, the ALJ granted the Government's Motion and recommended the revocation of Respondent's registration, finding that because Respondent lacks state authority to handle controlled substances in Florida, the state in which he is registered with DEA, there is no genuine issue of material fact. Order Granting the Government's Motion for Summary Disposition, and Recommended Rulings, Findings of Fact, Conclusions of Law, and Decision of the Administrative Law Judge (Recommended Decision or RD), at 4–5.

The Agency issues this Decision and Order based on the entire record before it and makes the following findings of fact.

#### Findings of Fact

On June 8, 2022, the Florida Department of Health issued an Order of Emergency Suspension of License which ordered the immediate suspension of Respondent's Florida P.A. license. Government's Motion Exhibit (GX) B, at 1, 33–34.

According to Florida's online records, of which the Agency takes official notice, Respondent's Florida P.A. license is currently under an “emergency suspension” status and Respondent is not authorized to practice medicine in Florida.<sup>1</sup> Florida Department of Health License Verification, <https://mqa-internet.doh.state.fl.us/MQASearch>

<sup>1</sup> Under the Administrative Procedure Act, an agency “may take official notice of facts at any stage in a proceeding—even in the final decision.” United States Department of Justice, Attorney General's Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C 556(e), “[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.” Accordingly, Respondent may dispute the Agency's finding by filing a properly supported motion for reconsideration of findings of fact within fifteen calendar days of the date of this Order. Any such motion and response shall be filed and served by email to the other party and to Office of the Administrator, Drug Enforcement Administration at [dea.addo.attorneys@dea.usdoj.gov](mailto:dea.addo.attorneys@dea.usdoj.gov).

*Services* (last visited date of signature of this Order). Accordingly, the Agency finds that Respondent is not currently licensed to engage in the practice of medicine in Florida, the state in which he is registered with the DEA.

#### Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under section 823 of the Controlled Substances Act (CSA) “upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing of controlled substances.” With respect to a practitioner, the DEA has also long held that the possession of authority to dispense controlled substances under the laws of the state in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner's registration. *See, e.g., James L. Hooper, M.D.*, 76 FR 71, 371 (2011), *pet. for rev. denied*, 481 F. App'x 826 (4th Cir. 2012); *Frederick Marsh Blanton, M.D.*, 43 FR 27,616, 27,617 (1978).<sup>2</sup>

<sup>2</sup> This rule derives from the text of two provisions of the CSA. First, Congress defined the term “practitioner” to mean “a physician . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice.” 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner's registration, Congress directed that “[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.” 21 U.S.C. 823(f). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, the DEA has held repeatedly that revocation of a practitioner's registration is the appropriate sanction whenever he is no longer authorized to dispense controlled substances under the laws of the state in which he practices. *See, e.g., James L. Hooper, M.D.*, 76 FR at 71,371–72; *Sheran Arden Yeates, M.D.*, 71 FR 39,130, 39,131 (2006); *Dominick A. Ricci, M.D.*, 58 FR 51,104, 51,105 (1993); *Bobby Watts, M.D.*, 53 FR 11,919, 11,920 (1988); *Frederick Marsh Blanton*, 43 FR at 27,617. Moreover, because “the controlling question” in a proceeding brought under 21 U.S.C. 824(a)(3) is whether the holder of a practitioner's registration “is currently authorized to handle controlled substances in the [S]tate,” *Hooper*, 76 FR at 71,371 (quoting *Anne Lazar Thorn*, 62 FR 12,847, 12,848 (1997)), the Agency has also long held that revocation is warranted even where a practitioner is still challenging the underlying action. *Bourne Pharmacy*, 72 FR 18,273, 18,274 (2007); *Wingfield Drugs*, 52 FR 27,070, 27,071 (1987). Thus, it is of no consequence that Respondent is still challenging the underlying action here. *See* Respondent's Response to Government's Motion; RD, at 4–5. What is consequential is the Agency's finding that Respondent is not currently authorized to dispense controlled substances in Florida, the state in which he is registered with the DEA.

According to Florida statute, “A practitioner, in good faith and in the course of his or her professional practice only, may prescribe, administer, dispense, mix, or otherwise prepare a controlled substance.” Fla. Stat. 893.05(1)(a) (2022). Further, a “practitioner” as defined by Florida statute includes “a physician assistant licensed under chapter 458 or 459.”<sup>3</sup> *Id.* at 893.02(23).

Here, the undisputed evidence in the record is that Respondent is not currently a licensed practitioner in Florida, and a physician assistant must be a licensed practitioner to dispense a controlled substance in Florida. Thus, because Respondent lacks authority to handle controlled substances in Florida, Respondent is not eligible to maintain a DEA registration based in Florida. Accordingly, the Agency will order that Respondent’s DEA registration be revoked.

### Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. MD4826915 issued to Adley Dasilva, P.A. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(f), I hereby deny any pending applications of Adley Dasilva, P.A., to renew or modify this registration, as well as any other pending application of Adley Dasilva, P.A., for additional registration in Florida. This Order is effective December 19, 2022.

### Signing Authority

This document of the Drug Enforcement Administration was signed on November 9, 2022, by Administrator Anne Milgram. That document with the original signature and date is maintained by DEA. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DEA Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of DEA. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

### Drug Enforcement Administration

[Docket No. DEA–1096]

### Bulk Manufacturer of Controlled Substances Application: Vici Health Sciences, LLC

**AGENCY:** Drug Enforcement Administration, Justice.

**ACTION:** Notice of application.

**SUMMARY:** Vici Health Sciences, LLC has applied to be registered as a bulk manufacturer of basic class(es) of controlled substance(s). Refer to Supplementary Information listed below for further drug information.

**DATES:** Registered bulk manufacturers of the affected basic class(es), and applicants therefore, may submit electronic comments on or objections to the issuance of the proposed registration on or before January 17, 2023. Such persons may also file a written request for a hearing on the application on or before January 17, 2023.

**ADDRESSES:** The Drug Enforcement Administration requires that all comments be submitted electronically through the Federal eRulemaking Portal, which provides the ability to type short comments directly into the comment field on the web page or attach a file for lengthier comments. Please go to <https://www.regulations.gov> and follow the online instructions at that site for submitting comments. Upon submission of your comment, you will receive a Comment Tracking Number. Please be aware that submitted comments are not instantaneously available for public view on <https://www.regulations.gov>. If you have received a Comment Tracking Number, your comment has been successfully submitted and there is no need to resubmit the same comment.

**SUPPLEMENTARY INFORMATION:** In accordance with 21 CFR 1301.33(a), this is notice that on August 5, 2022, Vici Health Sciences, LLC, 6655 Amberton Drive, Suite N, Elkridge, Maryland 21075, applied to be registered as a bulk manufacturer of the following basic class(es) of controlled substance(s):

| Controlled substance  | Drug code | Schedule |
|---|-----------|----------|
| Ibogaine .....  | 7260      | I        |
| Fentanyl related-compounds as defined in 21 CFR 1308.11(h). | 9850      | I        |

The company plans to bulk manufacture the listed controlled

substances or their intermediates for sale to its customers. No other activities for these drug codes are authorized for this registration.

**Kristi O’Malley,**

*Assistant Administrator.*

## DEPARTMENT OF JUSTICE

### Notice of Lodging of Proposed Consent Decree Under the Clean Water Act

On November 14, 2022, the Department of Justice lodged a proposed Consent Decree with the United States District Court for the Southern District of Illinois in the lawsuit entitled *United States and the State of Illinois v. Prairie State Solar, LLC*, Civil Action No. 3:22–cv–02660.

In this case, the United States and the State seek to resolve claims against Defendant Prairie State Solar, LLC under the Clean Water Act. The United States and the State allege Prairie States violated its state stormwater permit during the construction of a large-scale solar farm in Perry County, Illinois. The proposed Consent Decree requires Prairie State to perform injunctive relief measures to ensure compliance until construction is complete and the stormwater permit is terminated. The Consent Decree also requires Prairie State to pay a civil penalty of \$225,000, with \$157,500 to the United States and \$67,500 to the State of Illinois.

The publication of this notice opens a period for public comment on the Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States and The State of Illinois v. Prairie State Solar*, D.J. Ref. No. 90–5–1–1–12558/1. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

## DEPARTMENT OF JUSTICE

### Notice of Lodging of Proposed Consent Decree Under the Clean Water Act

On November 14, 2022, the Department of Justice lodged a proposed Consent Decree with the United States District Court for the Southern District of Illinois in the lawsuit entitled *United States and the State of Illinois v. Big River Solar, LLC* Civil Action No. 3:22–cv–02659.

In this case, the United States and the State seek to resolve claims against Defendant Big River Solar, LLC, under the Clean Water Act. The United States and the State allege Big River violated of its state stormwater permit, during the construction of a large-scale solar farm in White County, Illinois. The proposed Consent Decree requires Big River to perform injunctive relief measures to ensure compliance until construction is complete and the stormwater permit is terminated. The Consent Decree also requires Big River to pay a civil penalty of \$175,000, with \$122,500 to the United States, and \$52,500 to the State of Illinois.

The publication of this notice opens a period for public comment on the Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States State of Illinois v. Big River Solar, LLC*, D.J. Ref. No. 90–5–1–1–12558. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

## LEGAL SERVICES CORPORATION

### Pro Bono Innovation Fund Process for Submitting Pre-Applications for 2023 Grants

**AGENCY:** Legal Services Corporation.

**ACTION:** Notice.

**SUMMARY:** The Legal Services Corporation (LSC) issues this Notice describing the conditions for submitting a Pre-Application for 2023 Pro Bono Innovation Fund grants.

**DATES:** Pre-applications must be submitted by 11:59 p.m. EST on Friday, January 27, 2023.

**ADDRESSES:** Letters of Intent must be submitted electronically at <http://lscgrants.lsc.gov>.

**FOR FURTHER INFORMATION CONTACT:** Mytrang Nguyen, Program Counsel, Office of Program Performance, Legal Services Corporation, 3333 K Street NW, Washington, DC 20007; (202) 295–1564 or [nguyenm@lsc.gov](mailto:nguyenm@lsc.gov).

**SUPPLEMENTARY INFORMATION:**

#### I. Introduction

Since 2014, Congress has provided an annual appropriation to LSC “for a Pro Bono Innovation Fund.” *See, e.g.,*

Consolidated Appropriations Act, 2017, Public Law 115–31, 131 Stat. 135 (2017). LSC requested these funds for grants to “develop, test, and replicate innovative pro bono efforts that can enable LSC grantees to expand clients’ access to high quality legal assistance.” LSC Budget Request, Fiscal Year 2014 at 26 (2013). The grants must involve innovations that are either “new ideas” or “new applications of existing best practices.” *Id.* Each grant would “either serve as a model for other legal services providers to follow or effectively replicate a prior innovation. *Id.* The Senate Appropriations Committee explained that these funds “will support innovative projects that promote and enhance pro bono initiatives throughout the Nation,” and the House Appropriations Committee directed LSC “to increase the involvement of private attorneys in the delivery of legal services to [LSC-eligible] clients.” Senate Report 114–239 at 123 (2016), House Report 113–448 at 85 (2014).

Since its inception, the Pro Bono Innovation Fund has advanced LSC’s goal of increasing the quantity and quality of legal services by funding projects that more efficiently and effectively involve pro bono volunteers in serving the critical unmet legal needs of LSC-eligible clients. In 2017, LSC built on these successes by creating three funding categories to better focus on innovations serving unmet and well-defined client needs (Project Grants), on building comprehensive and effective pro bono programs through new applications of existing best practices (Transformation Grants), and on providing continued development support for the most promising innovations (Sustainability Grants). In 2021, LSC created Non-Direct Service Project Grants to fund organizations to develop and implement innovative solutions to pro bono challenges that do not involve providing direct legal services to clients. In 2022, LSC created a new funding category to provide organizations with resources to plan and establish a strong foundation (Planning Grants). Planning Grants will be available on a pilot basis in the 2023 funding cycle to select organizations.

## II. Funding Opportunities Information

### A. Eligible Applicants

To be eligible for the Pro Bono Innovation Fund’s Project, Sustainability, and Transformation grants, Applicants must be current grantees of LSC Basic Field-General, Basic Field-Migrant, or Basic Field-Native American grants. In addition, Sustainability Grant Applicants must

also be a current Pro Bono Innovation Fund grantee with a 2019 grant award.

*B. Pro Bono Innovation Fund Purpose and Key Goals*

Pro Bono Innovation Fund grants develop, test, and replicate innovative pro bono efforts that can enable LSC grantees to use pro bono volunteers to serve larger numbers of low-income clients and improve the quality and effectiveness of the services provided. The key goals of the Pro Bono Innovation Fund are to:

- 1. Address gaps in the delivery of legal services to low-income people;
- 2. Engage more lawyers and other volunteers in pro bono service;
- 3. Develop, test, and replicate innovative pro bono efforts.

*C. Funding Categories*

1. Planning Grants

In 2023, LSC is piloting a new grant category, called Planning Grants, to provide select organizations with the resources to assess their pro bono program and develop an action plan and proposal for a 2024 Pro Bono Innovation Fund Transformation grant. Planning Grants are one-time, six-month grants.

2. Project Grants

The goal of Pro Bono Innovation Fund Project Grants is to leverage volunteers to meet a critical, unmet and well-defined client need. Consistent with the key goals of the Pro Bono Innovation Fund, applicants are encouraged to focus on engaging volunteers to increase free civil legal aid for low-income Americans by proposing new, replicable ideas. The Pro Bono Innovation Fund has two Project Grant types, Direct Service and Non-Direct Service. Direct Service projects are focused on engaging volunteers to increase free legal assistance for eligible clients. Non-

Direct Service projects propose to strengthen core aspects of pro bono delivery systems and may not result in direct pro bono client services within the grant timeframe (*i.e.*, develop a suite of substantive training materials, create on-demand videos for volunteers, etc.).

Applicants are strongly encouraged to research prior Pro Bono Innovation Fund projects to replicate and improve upon them. LSC is particularly interested in applications that propose to replicate projects LSC has previously funded with “Sustainability” Grants. Project Grants can be either 18 or 24 months.

3. Transformation Grants

The goal of Pro Bono Innovation Fund Transformation Grants is to support LSC grantees in comprehensive assessment and restructuring of pro bono programs through new applications of existing best practices in pro bono delivery. Each Transformation Grant will support a rigorous assessment of an LSC grantee’s pro bono program and the identification of best practices in pro bono delivery that are best suited to that grantee’s needs and circumstances.

Transformation Grants are targeted towards LSC grantees whose leadership is committed to restructuring an entire pro bono program and incorporating pro bono best practices into core, high-priority client services with an urgency to create a high-impact pro bono program. This funding opportunity is open to all LSC grantees but is primarily intended for LSC grantees who have been unsuccessful applying for Project Grants or who have never applied for a Pro Bono Innovation Fund grant in the past. Transformation Grants can be either 24 or 36 months.

4. Sustainability Grants

Pro Bono Innovation Fund Sustainability Grants are available to

current Pro Bono Innovation Fund grantees who received a 2021 Project grant. The goal of Sustainability Grants is to support further development of the most promising and replicable Pro Bono Innovation Fund projects with an additional 24 months of funding so grantees can leverage new sources of revenue for the project and collect meaningful data to demonstrate the project’s results and outcomes for clients and volunteers. Applicants for Sustainability Grants will be asked to propose an ambitious strategy that reduces the Pro Bono Innovation Fund contribution to the project over the Sustainability Grant term.

*D. Available Funds and Additional Consideration for 2021 Grants*

The amount of funds available for Pro Bono Innovation Fund Grants for FY2023 depends on LSC’s final appropriation. LSC currently operates under a Continuing Resolution for FY2023, which funds the Federal government through December 16, 2022. The Continuing Resolution maintains funding for the Pro Bono Innovation Fund at \$4,750,000. LSC will make Pro Bono Innovation Fund grant decisions for FY2023 in the summer of 2023. LSC anticipates publicizing the total amount available for Pro Bono Innovation Fund grants when Congress enacts the FY2023 appropriation. LSC will not designate fixed or estimated amounts for the three different funding categories and will make grant awards for the three categories within the total amount of funding available.

*E. Grant Terms*

Pro Bono Innovation Fund awards can have grant terms of 6, 18, 24, or 36 months, depending on the category of grant.

|                       | 6 Months | 12 Months | 18 Months | 24 Months | 36 Months |
|-----------------------|----------|-----------|-----------|-----------|-----------|
| Planning Grants       | ✓        | X         | X         | X         | X         |
| Project Grants        | X        | X         | ✓         | ✓         | X         |
| Transformation Grants | X        | X         | X         | ✓         | ✓         |
| Sustainability Grants | X        | X         | X         | ✓         | X         |

Applicants invited to submit a Pre-Application for a pilot Planning Grant can apply for a 6-month grant. Applicants for Project Grants can apply for either an 18- or a 24-month grant.

Applicants for Transformation Grants can apply for either a 24- or a 36-month grant. Applicants for Sustainability Grants can apply for a 24-month grant only. Applications must cover the full

proposed grant term. The grant term is expected to commence on October 1, 2023.

### III. Grant Application Process

#### A. Pro Bono Innovation Fund Grant Application Process

The Pro Bono Innovation Fund application process will be administered in LSC's unified grants management system, GrantEase. Applicants must first submit a Pre-Application to LSC in GrantEase by January 27, 2023 to be considered for a grant. After review by LSC Staff, LSC's President decides which applicants will be asked to submit a full application. Applicants will be notified of approval to submit a full application by early March 2023. Full applications are due to LSC in the GrantEase system on May 1, 2023. Once received, full applications will undergo a rigorous review by LSC staff and other subject matter experts. LSC's President makes the final decision on funding for the Pro Bono Innovation Fund.

#### B. Late or Incomplete Applications

LSC may consider a request to submit a Pre-Application after the deadline, but only if the Applicant has submitted an email to [probonoinnovation@lsc.gov](mailto:probonoinnovation@lsc.gov) explaining the circumstances that caused the delay prior to the Pre-Application deadline. Communication with LSC staff, including assigned Program Liaisons, is not a substitute for sending a formal request and explanation to [probonoinnovation@lsc.gov](mailto:probonoinnovation@lsc.gov). At its discretion, LSC may consider incomplete applications. LSC will determine the admissibility of late or incomplete applications on a case-by-case basis.

#### C. Multiple Pre-Applications

Applicants may submit multiple Pre-applications under the same or different funding category. If applying for multiple grants, applicants should submit separate Pre-applications for each funding request.

#### D. Additional Information and Guidelines

Additional guidance and instructions on the Pro Bono Innovation Fund Pre-Application and Application processes, will be available and regularly updated at <https://www.lsc.gov/grants-grantee-resources/our-grant-programs/pro-bono-innovation-fund>.

Dated: November 15, 2022.

### NATIONAL SCIENCE FOUNDATION

#### Advisory Committee for Computer and Information Science and Engineering; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation (NSF) announces the following meeting:

**NAME AND COMMITTEE CODE:** Advisory Committee for Computer and Information Science and Engineering (#1115).

**DATE AND TIME:** December 16, 2022; 11:00 a.m.–5:00 p.m. (Eastern).

**PLACE:** NSF, 2415 Eisenhower Avenue, Alexandria, VA 22314 (Virtual).

Virtual meeting attendance only; to attend the virtual meeting, please send your request for the virtual meeting link to the following email: [cmessam@nsf.gov](mailto:cmessam@nsf.gov).

**TYPE OF MEETING:** Open.

**CONTACT PERSONS:** KaJuana Mayberry, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314; Telephone: (703) 292-8900; email: [kmayberry@nsf.gov](mailto:kmayberry@nsf.gov).

**PURPOSE OF MEETING:** To provide advice, recommendations and counsel on major goals and policies pertaining to Computer and Information Science and Engineering programs and activities.

#### AGENDA:

- NSF and CISE update
- NSF investments in cybersecurity research
- Infrastructure for computing research

Dated: November 15, 2022.

**Crystal Robinson,**

Committee Management Officer.

### OFFICE OF PERSONNEL MANAGEMENT

#### Notice of Federal Long Term Care Insurance Program (FLTCIP)—Suspension of Applications for FLTCIP Coverage

**AGENCY:** Office of Personnel Management.

**ACTION:** Notice of Suspension of Applications for FLTCIP Coverage for Currently and Newly Eligible Individuals.

**SUMMARY:** The U.S. Office of Personnel Management (OPM) is announcing a suspension of applications for Federal Long Term Care Insurance Program (FLTCIP) coverage. During the

suspension period, no applications for FLTCIP coverage will be accepted, and current enrollees may not apply to increase their coverage. Eligible individuals who submit an application for FLTCIP to the program administrator, Long Term Care Partners, LLC, prior to the date that the suspension period begins, will have their application considered. If the Carrier approves the application for coverage, the individual will receive a benefit booklet and schedule of benefits with complete coverage information.

**DATES:** The suspension period will begin on December 19, 2022. The suspension period will remain in effect for 24 months from the date the suspension period begins.

**FOR FURTHER INFORMATION CONTACT:** You may call 1-800-LTC-FEDS (1-800-582-3337) (TTY: 1-800-843-3557) or visit <http://www.ltcfed.com>. For purposes of this **Federal Register** notice only, the contact at OPM is Dyan Dyttmer, Senior Policy Analyst, at [dyan.dyttmer@opm.gov](mailto:dyan.dyttmer@opm.gov) or (202) 936-0152.

**SUPPLEMENTARY INFORMATION:** OPM is suspending applications for coverage in FLTCIP to allow OPM and the FLTCIP Carrier to assess the benefit offerings and establish sustainable premium rates that reasonably and equitably reflect the cost of the benefits provided, as required under 5 U.S.C. 9003(b)(2). OPM has issued regulations [CITE FINAL RULE] setting forth the process for suspension of applications in 5 CFR 875.110.

*Authority:* 5 U.S.C. 9008; Public Law 116-92, 133 Stat. 1198 (5 U.S.C. 8956 note); 5 CFR 875.110.

Office of Personnel Management.

## OFFICE OF PERSONNEL MANAGEMENT

### Chief Human Capital Officers (CHCO) Council; Virtual Public Meeting

**AGENCY:** Office of Personnel Management.

**ACTION:** Notice of meeting.

**SUMMARY:** The Chief Human Capital Officers (CHCO) Council plans to meet on Tuesday, December 13, 2022. The meeting will start at 9 a.m. EST and will be held by Zoom.

**FOR FURTHER INFORMATION CONTACT:** CHCO Council email—[chcocouncil@opm.gov](mailto:chcocouncil@opm.gov).

**SUPPLEMENTARY INFORMATION:** The purpose of the meeting is for the CHCO Council to host their annual public meeting per Public Law 107-296.

The CHCO Council is the principal interagency forum to advise and coordinate the activities of the agencies of its members on such matters as modernization of human resources systems, improved quality of human resources information and legislation affecting human resources operations and organizations.

Persons desiring to attend this public meeting of the Chief Human Capital Officers Council should contact OPM at least 5 business days in advance of the meeting date at the email address shown below. Note: If you require an accommodation, please contact [chcocouncil@opm.gov](mailto:chcocouncil@opm.gov) no later than December 6, 2022.

U.S. Office of Personnel Management.

## POSTAL REGULATORY COMMISSION

**[Docket Nos. MC2023-43 and CP2023-43;  
MC2023-44 and CP2023-44]**

### New Postal Products

**AGENCY:** Postal Regulatory Commission.

**ACTION:** Notice.

**SUMMARY:** The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

**DATES:** *Comments are due:* November 21, 2022.

**ADDRESSES:** Submit comments electronically via the Commission's Filing Online system at <http://www.prc.gov>. Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

**FOR FURTHER INFORMATION CONTACT:** David A. Trissell, General Counsel, at 202-789-6820.

**SUPPLEMENTARY INFORMATION:**

### Table of Contents

- I. Introduction
- II. Docketed Proceeding(s)

### I. Introduction

The Commission gives notice that the Postal Service filed request(s) for the

Commission to consider matters related to negotiated service agreement(s). The request(s) may propose the addition or removal of a negotiated service agreement from the Market Dominant or the Competitive product list, or the modification of an existing product currently appearing on the Market Dominant or the Competitive product list.

Section II identifies the docket number(s) associated with each Postal Service request, the title of each Postal Service request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 (Public Representative). Section II also establishes comment deadline(s) pertaining to each request.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (<http://www.prc.gov>). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.<sup>1</sup>

The Commission invites comments on whether the Postal Service's request(s) in the captioned docket(s) are consistent with the policies of title 39. For request(s) that the Postal Service states concern Market Dominant product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3622, 39 U.S.C. 3642, 39 CFR part 3030, and 39 CFR part 3040, subpart B. For request(s) that the Postal Service states concern Competitive product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3040, subpart B. Comment deadline(s) for each request appear in section II.

## II. Docketed Proceeding(s)

1. *Docket No(s):* MC2023-43 and CP2023-43; *Filing Title:* USPS Request to Add Priority Mail Contract 765 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 10, 2022; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3040.130 through 3040.135, and 39 CFR 3035.105; *Public Representative:* Kenneth R. Moeller; *Comments Due:* November 21, 2022.

2. *Docket No(s):* MC2023-44 and CP2023-44; *Filing Title:* USPS Request

<sup>1</sup> See Docket No. RM2018-3, Order Adopting Final Rules Relating to Non-Public Information, June 27, 2018, Attachment A at 19-22 (Order No. 4679).

to Add Priority Mail Express, Priority Mail, First-Class Package Service & Parcel Select Contract 84 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date*: November 10, 2022; *Filing Authority*: 39 U.S.C. 3642, 39 CFR 3040.130 through 3040.135, and 39 CFR 3035.105; *Public Representative*: Madison Lichtenstein; *Comments Due*: November 21, 2022.

This Notice will be published in the **Federal Register**.

Erica A. Barker,  
Secretary.

## POSTAL REGULATORY COMMISSION

[Docket Nos. MC2023-45 and MC2023-46; Order No. 6328]

### Competitive Products

**AGENCY:** Postal Regulatory Commission.

**ACTION:** Notice.

**SUMMARY:** The Commission is recognizing recent Postal Service filings requesting the removal of Priority Mail International Regional Rate Boxes—Non-Published Rates and Priority Mail International Regional Rate Boxes (PMI RRB) Contracts from the competitive product list and a request for classification changes concerning Global Reseller Expedited Package Contracts. This notice informs the public of the filings, invites public comment, and takes other administrative steps.

**DATES:** *Comments are due:* December 8, 2022.

**ADDRESSES:** Submit comments electronically via the Commission's Filing Online system at <http://www.prc.gov>. Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

**FOR FURTHER INFORMATION CONTACT:** David A. Trissell, General Counsel, at 202-789-6820.

### SUPPLEMENTARY INFORMATION:

#### Table of Contents

- I. Introduction
- II. Summary of Changes
- III. Notice of Commission Action
- IV. Ordering Paragraphs

#### I. Introduction

On November 10, 2022, pursuant to 39 U.S.C. 3642 and 39 CFR 3040.130 *et seq.*, the Postal Service filed a request to remove Priority Mail International

Regional Rate Boxes—Non-Published Rates and Priority Mail International Regional Rate Boxes (PMI RRB) Contracts from the Competitive product list.<sup>1</sup> To support this request, the Postal Service filed a copy of the Governors' Decision No. 19-1, an application for nonpublic treatment of the Governors' Decision, a Statement of Supporting Justification in accordance with 39 CFR 3040.132, and proposed changes to the Mail Classification Schedule (MCS). *See* Priority Mail International Regional Rate Boxes Request, Attachments A-D.

Also on November 10, 2022, pursuant to 39 CFR 3040.180 *et seq.*, the Postal Service filed a request for classification changes concerning Global Reseller Expedited Package Contracts.<sup>2</sup> To support this request, the Postal Service filed a copy of the Governors' Decision No. 19-1, an application for nonpublic treatment of the Governors' Decision, and proposed changes to the MCS. *See* Competitive Classification Change Request, Attachments 1-3.

#### II. Summary of Changes

The Postal Service requests to remove MCS subsection 2510.9 Priority Mail International Regional Rate Boxes—Non-Published Rates and MCS subsection 2510.11 PMI RRB Contracts from the Competitive product list, effective January 22, 2023. *See* Priority Mail International Regional Rate Boxes Request at 1. The Postal Service states that the removal of these MCS subsections conforms with the elimination of Priority Mail Regional Rate Boxes set forth in Governors' Decision No. 22-6, which was included in the Postal Service's Notice of Changes in Rates and Classifications of General Applicability for Competitive Products.<sup>3</sup> The Postal Service asserts the proposed removal satisfies the criteria in 39 CFR 3040.132. Priority Mail International Regional Rate Boxes Request at 3.

The Postal Service also requests to remove all references to PMI RRB from

<sup>1</sup> Docket No. MC2023-45, Request of the United States Postal Service to Remove Priority Mail International Regional Rate Boxes—Non-Published Rates and Priority Mail International Regional Rate Boxes (PMI RRB) Contracts from the Competitive Product List, November 10, 2022 (Priority Mail International Regional Rate Boxes Request).

<sup>2</sup> Docket No. MC2023-46, Request of the United States Postal Service for Classification Changes Concerning Global Reseller Expedited Package Contracts and Notice of Filing Materials Under Seal, November 10, 2022 (Competitive Classification Change Request).

<sup>3</sup> *Id.* at 1-2 (citing Docket No. CP2023-42, USPS Notice of Changes in Rates and Classifications of General Applicability for Competitive Products, November 10, 2022 (Notice of Changes in Rates and Classifications of General Applicability for Competitive Products)). Docket No. CP2023-42 is pending before the Commission.

MCS subsection 2510.7 Global Reseller Expedited Package Contracts, effective January 22, 2023. Competitive Classification Change Request at 1-2. The Postal Service states that the proposed removal conforms with the elimination of Priority Mail Regional Rate Boxes set forth in Governors' Decision No. 22-6, which was included in the Postal Service's Notice of Changes in Rates and Classifications of General Applicability for Competitive Products. *Id.* at 1. The Postal Service asserts that the proposed removal will not result in the violation of any of standards in 39 U.S.C. 3633 and 39 CFR part 3035, because "there are no Global Reseller Expedited Contracts currently in effect that include prices for Priority Mail International Regional Rate Boxes." *Id.* at 3. The Postal Service also asserts that the proposed removal will not significantly change the user experience with Global Reseller Expedited Package Contracts and will not significantly impact competitors. *Id.* at 3-4. The Postal Service further asserts that the proposed removal will improve the accuracy of the information in MCS subsection 2510.7. *Id.* at 4.

#### III. Notice of Commission Actions

The Commission establishes Docket No. MC2023-45 to consider matters raised by the Priority Mail International Regional Rate Boxes Request and Docket No. MC2023-46 to consider matters raised by the Competitive Classification Change Request. *See* 39 CFR 3040.133. The instant dockets involve related issues pertaining to product removal. Accordingly, the Commission will consolidate them. *See* 39 CFR 3010.104.

Pursuant to 39 CFR 3040.133 and 3040.182, the Commission has posted the Priority Mail International Regional Rate Boxes Request and the Competitive Classification Change Request on its website, respectively. The Commission invites comments on the Priority Mail International Regional Rate Boxes Request and the Competitive Classification Change Request. Comments are due no later than December 8, 2022. The filings can be accessed via the Commission's website (<http://www.prc.gov>).

The Commission appoints R. Tim Boone to represent the interests of the general public (Public Representative) in these dockets.

#### IV. Ordering Paragraphs

##### *It is ordered:*

1. The Commission establishes Docket No. MC2023-45 to consider matters raised by the Priority Mail International Regional Rate Boxes Request.

2. The Commission establishes Docket No. MC2023–46 to consider matters raised by the Competitive Classification Change Request.

3. The Commission consolidates Docket Nos. MC2023–45 and MC2023–46.

4. Comments by interested persons are due by December 8, 2022.

5. Pursuant to 39 U.S.C. 505, R. Tim Boone is appointed to serve as an officer of the Commission (Public Representative) to represent the interests of the general public in these proceedings.

6. The Commission directs the Secretary of the Commission to arrange for prompt publication of this notice in the **Federal Register**.

By the Commission.

## POSTAL REGULATORY COMMISSION

[Docket No. MC2023–12; Order No. 6326]

### Market Dominant Product List

**AGENCY:** Postal Regulatory Commission.

**ACTION:** Notice.

**SUMMARY:** The Commission is recognizing a recent Postal Service filing requesting to add USPS Connect Local Mail as a new, permanent product to the Mail Classification Schedule and the request's dismissal.

**FOR FURTHER INFORMATION CONTACT:** David A. Trissell, General Counsel, at 202–789–6820.

### SUPPLEMENTARY INFORMATION:

#### Table of Contents

- I. Introduction
- II. Commission Action
- III. Ordering Paragraphs

#### I. Introduction

On October 11, 2022, the Postal Service filed a request with the Commission pursuant to 39 U.S.C. 3642 and 39 CFR 3045.18 to convert the experimental product offering USPS Connect Local Mail into a permanent product offering on the Mail Classification Schedule.<sup>1</sup> On October 17, 2022, the Commission dismissed the Request without prejudice, allowing the Postal Service to file an amended request if it so chose.<sup>2</sup>

<sup>1</sup> United States Postal Service Request to Convert USPS Connect Local Mail to a Permanent Offering, October 11, 2022 (Request).

<sup>2</sup> Order Dismissing Without Prejudice Postal Service's Request to Convert USPS Connect Local

On November 9, 2022, the Postal Service filed a revised request to convert USPS Connect Local Mail into a permanent offering, effective January 22, 2023.<sup>3</sup> In support of its Revised Request, the Postal Service filed the following documents:

- Attachment A—Proposed Changes to the Mail Classification Schedule;
- Attachment B—Market Test Quarterly Data Collection Reports;
- Attachment C—Resolution of the Governors of the United States Postal Service; and
- Attachment D—Statement of Supporting Justification

See Revised Request, Attachments A through D.

The USPS Connect Local Mail market test was initially authorized by the Commission on January 4, 2022.<sup>4</sup> It is currently set to expire on January 8, 2024. Order No. 6080 at 20. USPS Connect Local Mail is a derivative of First-Class Mail that functions as an alternative to long-distance, end-to-end mailing for use by business mailers who wish to send mail locally with regular frequency. Order No. 6080 at 2. The Postal Service asserts that the USPS Connect Local Mail market test has proven successful and that it now wishes to insert the USPS Connect Local Mail product offering into the Mail Classification Schedule under section 1115 (Market Dominant Products: First-Class Mail: First-Class Mail Flats). Revised Request at 2. The Postal Service maintains that the USPS Connect Local Mail product meets all the conditions in 39 U.S.C. 3642 and 39 CFR 3045.18 for adding a non-experimental product based on an experimental product to the product list. *Id.* at 3–6. The Postal Service also, as required by 39 CFR 3045.18(e), filed a separate notice of the instant request in Docket No. MT2022–1.<sup>5</sup> The planned rate for USPS Connect Local Mail is \$2.95. Revised Request at 2–3.

#### II. Commission Action

The Commission reopens Docket No. MC2023–12 to consider the Postal Service's Revised Request. Interested persons may submit comments on whether the Request is consistent with

Mail Market Test to a Permanent Offering, October 17, 2022, at 5–6 (Order No. 6301).

<sup>3</sup> United States Postal Service Revised Request to Convert USPS Connect Local Mail to a Permanent Offering, November 9, 2022 (Revised Request).

<sup>4</sup> Docket No. MT2022–1, Order Authorizing Market Test of Experimental Product—USPS Connect Local Mail, January 4, 2022 (Order No. 6080).

<sup>5</sup> Docket No. MT2022–1, United States Postal Service Notice of Revised Request to Convert USPS Connect Local Mail to a Permanent Offering, November 9, 2022.

the policies of 39 U.S.C. 3642, 39 CFR 3045.18, and 39 CFR 3040.130 through .135. Comments are due by December 9, 2022.

The Request and related filings are available on the Commission's website (<http://www.prc.gov>). The Commission encourages interested persons to review the Request for further details.

The Commission appoints Mallory L. Smith to serve as Public Representative in this proceeding.

### III. Ordering Paragraphs

*It is ordered:*

1. The Commission reopens Docket No. MC2023–12 for consideration of the United States Postal Service Revised Request to Convert USPS Connect Local Mail to a Permanent Offering, filed November 9, 2022.

2. Pursuant to 39 U.S.C. 505, Mallory L. Smith is appointed to serve as an officer of the Commission (Public Representative) to represent the interests of the general public in this proceeding.

3. Comments by interested persons are due by December 9, 2022.

4. The Secretary shall arrange for publication of this order in the **Federal Register**.

By the Commission.

## POSTAL REGULATORY COMMISSION

[Docket No. CP2023–42; Order No. 6327]

### Competitive Price Changes

**AGENCY:** Postal Regulatory Commission.

**ACTION:** Notice.

**SUMMARY:** The Commission is recognizing a recently filed Postal Service document with the Commission concerning changes in rates and classifications of general applicability for competitive products. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

**DATES:** Comments are due: December 2, 2022.

**ADDRESSES:** Submit comments electronically via the Commission's Filing Online system at <http://www.prc.gov>. Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

**FOR FURTHER INFORMATION CONTACT:**

David A. Trissell, General Counsel, at 202-789-6820.

**SUPPLEMENTARY INFORMATION:****Table of Contents**

- I. Introduction and Overview
- II. Initial Administrative Actions
- III. Ordering Paragraphs

**I. Introduction and Overview**

On November 10, 2022, the Postal Service filed notice with the Commission concerning changes in rates and classifications of general applicability for Competitive products.<sup>1</sup> The Postal Service represents that, as required by 39 CFR 3035.102(b) and 39 CFR 3035.104(b), the Notice includes an explanation and justification for the changes, the effective date, and a schedule of the changed rates. See Notice at 1–2. The changes are scheduled to take effect on January 22, 2023. *Id.* at 1.

Attached to the Notice is Governors' Decision No. 22–6, which states the new prices are in accordance with 39 U.S.C. 3632 and 3633 and 39 CFR 3035.102.<sup>2</sup> The Governors' Decision provides an analysis of the Competitive products' price and classification changes intended to demonstrate that the changes comply with 39 U.S.C. 3633 and 39 CFR part 3035. Governors' Decision No. 22–6 at 1. The attachment to the Governors' Decision sets forth the classification and price changes and includes draft Mail Classification Schedule language for Competitive products of general applicability.

The Notice also includes an application for non-public treatment of the attributable costs, contribution, and cost coverage data in the unredacted version of the annex to the Governors' Decision, as well as the supporting materials for the data. Notice at 1–2.

*Planned price and classification changes.* The Governors' Decision includes an overview of the Postal Service's planned price changes which are summarized in the table below.

<sup>1</sup> USPS Notice of Changes in Rates and Classifications of General Applicability for Competitive Products, November 10, 2022 (Notice). Pursuant to 39 U.S.C. 3632(b)(2), the Postal Service is obligated to publish the Governors' Decision and record of proceedings in the **Federal Register** at least 30 days before the effective date of the new rates.

<sup>2</sup> Notice, Decision of the Governors of the United States Postal Service on Changes in Rates and Classification of General Applicability for Competitive Products (Governors' Decision No. 22–6), at 1 (Governors' Decision No. 22–6).

**TABLE I–1—PROPOSED PRICE CHANGES**

| Product name   | Average price increase (percent) |
|--|----------------------------------|
| <b>Domestic Competitive Products</b>                         |                                  |
| Priority Mail Express .....                                  | 6.6                              |
| Retail .....   | 6.7                              |
| Commercial .....   | 6.0                              |
| Priority Mail .....  | 5.5                              |
| Retail .....   | 6.8                              |
| Commercial .....   | 3.6                              |
| Parcel Select .....  | 5.1                              |
| Destination-Entered non-Lightweight ...                      | 5.1                              |
| Destination Delivery Unit .....                              | 5.6                              |
| Destination Sectional Center Facility ...                    | 4.7                              |
| Destination Network Distribution Center .....                | 5.0                              |
| Lightweight .....  | 6.1                              |
| Ground <sup>3</sup> .....                                    | 0.0                              |
| First-Class Package Service <sup>4</sup> .....               | 7.8                              |
| Retail .....   | 6.9                              |

| <b>International Ancillary Services and Special Services</b> |                                  |
| International Ancillary Services .....                       | 12.2                             |

**Source:** See Governors' Decision No. 22–6 at 2–5.

Further classification changes for Priority Mail, Parcel Select, and certain International Special Services are summarized as follows:

- Commercial Base and Commercial Plus categories of Priority Mail Express and Priority Mail will collapse into one price category labelled “Commercial.”
- Priority Mail Regional Rate Boxes will be eliminated.
- For several Competitive products “Zone L 1, 2”, will be split into new “Zone 1” and Zone 2 categories and the “Local Zone” will be eliminated.
- A new price category under the Competitive Ancillary Services product

<sup>3</sup> The Postal Service notes that Parcel Select Ground is slated to be eliminated later in 2023.

<sup>4</sup> The Postal Service notes that First Class Package Service is slated to be expanded later in 2023.

<sup>5</sup> The Postal Service notes that USPS Retail Ground is slated for removal later in 2023.

titled “Label Delivery Service” will be introduced.

- Prices for Priority Mail Express International items that are weight-rated and tendered at retail counters will no longer be eligible for the discounted Priority Mail International rate.

- Zones prices that differ by origin ZIP Code for Priority Mail International destined to Canada will be collapsed into a single country group, and the related fee for the International Service Center (ISC) zone chart for such pieces will be eliminated.

Notice at 2–6; Governors' Decision No. 22–6 at 2–5.

**II. Initial Administrative Actions**

The Commission establishes Docket No. CP2023–42 to consider the Postal Service's Notice. Interested persons may express views and offer comments on whether the planned changes are consistent with 39 U.S.C. 3632, 3633, and 3642, 39 CFR part 3035, and 39 CFR 3040 subparts B and E. Comments are due no later than December 2, 2022. For specific details of the planned price changes, interested persons are encouraged to review the Notice, which is available on the Commission's website at [www.prc.gov](http://www.prc.gov).

Pursuant to 39 U.S.C. 505, Gregory S. Stanton is appointed to serve as Public Representative to represent the interests of the general public in this docket.

**III. Ordering Paragraphs**

*It is ordered:*

1. The Commission establishes Docket No. CP2023–42 to provide interested persons an opportunity to express views and offer comments on whether the planned changes are consistent with 39 U.S.C. 3632, 3633, and 3642, 39 CFR part 3035, and 39 CFR 3040 subparts B and E.

2. Comments are due no later than December 2, 2022.

3. Pursuant to 39 U.S.C. 505, the Commission appoints Gregory S. Stanton to serve as an officer of the Commission (Public Representative) to represent the interests of the general public in this docket.

4. The Secretary shall arrange for publication of this Order in the **Federal Register**.

By the Commission.

**Erica A. Barker,**  
Secretary.

## POSTAL SERVICE

### Change in Rates and Classes of General Applicability for Competitive Products

**AGENCY:** Postal Service™.

**ACTION:** Notice of a change in rates and classifications of general applicability for competitive products.

**SUMMARY:** This notice sets forth changes in rates and classifications of general applicability for competitive products.

**DATES:** *Effective date:* January 22, 2023.

**FOR FURTHER INFORMATION CONTACT:** Elizabeth Reed, 202–268–3179.

**SUPPLEMENTARY INFORMATION:** On November 9, 2022, pursuant to their authority under 39 U.S.C. 3632, the Governors of the Postal Service established prices and classification changes for competitive products. The Governors' Decision and the record of proceedings in connection with such decision are reprinted below in accordance with section 3632(b)(2). Mail Classification Schedule language containing the new prices and classification changes can be found at [www.prc.gov](http://www.prc.gov).

**Ruth Stevenson,**  
*Chief Counsel, Ethics and Legal Compliance.*

### Decision of the Governors of the United States Postal Service on Changes in Rates and Classifications of General Applicability for Competitive Products (Governors' Decision No. 22–6)

November 9, 2022

#### Statement of Explanation and Justification

Pursuant to authority under section 3632 of title 39, as amended by the Postal Accountability and Enhancement Act of 2006 ("PAEA"), we establish prices and classifications of general applicability for the Postal Service's competitive products. The changes are described generally below, with a detailed description of the changes in the Postal Service's associated draft Mail Classification Schedule change document. That document contains the draft Mail Classification Schedule sections with classification changes in legislative format, and new prices displayed in the price charts.

As shown in the nonpublic annex being filed under seal herewith, the changes we establish should enable each competitive product to cover its attributable costs (39 U.S.C. 3633(a)(2)) and should result in competitive products as a whole complying with 39 U.S.C. 3633(a)(3), which, as implemented by 39 CFR 3035.107(c),

requires competitive products collectively to contribute a minimum of 10.4 percent to the Postal Service's institutional costs. Accordingly, no issue of subsidization of competitive products by market dominant products should arise (39 U.S.C. 3633(a)(1)). We therefore find that the new prices and classification changes are in accordance with 39 U.S.C. 3632–3633 and 39 CFR 3035.102 and 104.

#### I. Domestic Products

##### A. Priority Mail Express

Overall, the Priority Mail Express price change represents a 6.6 percent increase. The Commercial Base and Commercial Plus price categories, which have had equivalent prices since 2016, will be consolidated into one Priority Mail Express Commercial price category for 2023. Also new for 2023, the zoned prices for the existing "Local, 1, 2" Zone will be differentiated. The Local zone will be eliminated, and separate prices will be established for Zone 1 and Zone 2. No other structural changes are proposed. Dimensional weighting, which was introduced for all zones in 2019, will continue in 2023.

Retail prices will increase an average of 6.7 percent. The price for the Retail Flat Rate Envelope, a significant portion of all Priority Mail Express volume, will increase to \$28.75, with the Legal Size and Padded Flat Rate Envelopes priced at \$28.95 and \$29.45, respectively.

The newly consolidated Commercial price category will increase 6.0 percent on average. Commercial prices will, on average, reflect a 12.5 percent discount off of Retail prices. Nonstandard Fees (NSFs) are changing for our full network products for 2023. Priority Mail Express will see an increase in NSFs, while ground products will see a price decrease in NSFs.

##### B. Priority Mail

On average, the Priority Mail prices will be increased by 5.5 percent. Similar to Priority Mail Express, the Commercial Base and Commercial Plus price categories, which have had equivalent prices since 2019, will be consolidated into one Priority Mail Commercial price category for 2023. Dimensional weighting, which was extended to all zones in 2019, will continue in 2023. New for 2023, the Priority Mail Regional Rate Boxes will be eliminated because of low usage and to avoid product redundancies. Also new for 2023, the zoned prices for the existing "Local, 1, 2" Zone will be differentiated. The Local zone will be eliminated, and separate prices will be

established for Zone 1 and Zone 2. No other structural changes are proposed.

Retail prices will increase by an average of 6.8 percent. Retail Flat Rate Box prices will be: Small, \$10.20; Medium, \$17.10; Large, \$22.80 and Large APO/FPO/DPO, \$21.20.

Thus, the Large APO/FPO/DPO Flat Rate Box will be \$1.60 less than the Large Flat Rate Box. The regular Flat Rate Envelope will be priced at \$9.65, with the Legal Size and Padded Flat Rate Envelopes priced at \$9.95 and \$10.40, respectively.

The newly consolidated Commercial price category will increase by 3.6 percent on average. Commercial prices will, on average, reflect a 20.1 percent discount off of Retail prices. Nonstandard Fees (NSFs) are changing for our full network products for 2023. Priority Mail will see an increase in NSFs, while ground products will see a price decrease in NSFs.

##### C. Parcel Select

On average, Parcel Select prices as a whole will increase 5.1 percent. Prices for destination-entered non-Lightweight Parcel Select, the Postal Service's bulk ground shipping product, will increase 5.1 percent on average. For destination delivery unit (DDU) entered parcels, the average price increase is 5.6 percent. For destination sectional center facility (DSCF) destination entered parcels, the average price increase is 4.7 percent. For destination network distribution center (DNDC) parcels, the average price increase is 5.0 percent. Prices for Parcel Select Lightweight will increase by 6.1 percent on average. Prices for USPS Connect Local, introduced in 2022, will remain unchanged for 2023. Finally, Parcel Select Ground, which is slated to be eliminated later in 2023, will see very minor price adjustments in certain cells, with a zero percent average change. Dimensional weighting, which was introduced for all zones in 2019, will continue in 2023.

New for 2023, the zoned prices for the existing "Local, 1, 2" Zone will be differentiated. The Local zone will be eliminated, and separate prices will be established for Zone 1 and Zone 2. No other structural changes are proposed. Nonstandard Fees (NSFs) are changing for our full network products for 2023. Ground products will see a price decrease in NSFs.

##### D. First-Class Package Service

First-Class Package Service (FCPS) is currently positioned as a lightweight (less than one pound) offering primarily used by businesses for fulfillment purposes. Later in 2023, the Postal Service plans to enhance and expand

the FCPS product up to seventy pounds, but for January 2023, FCPS will remain only a lightweight offering. Overall, FCPS prices will increase 7.8 percent on average, with a 6.9 percent increase for FCPS-Retail and a 8.0 percent increase for FCPS-Commercial. New for 2023, the zoned prices for the existing “Local, 1, 2” Zone will be differentiated. The Local zone will be eliminated, and separate prices will be established for Zone 1 and Zone 2. No other structural changes are proposed. Nonstandard Fees (NSFs) are changing for our full network products for 2023. Ground products will see a price decrease in NSFs.

#### *F. USPS Retail Ground*

USPS Retail Ground, which is also slated for removal later in 2023 as part of the Postal Service’s expansion of FCPS and product simplification efforts, will remain on the competitive product list in January 2023. USPS Retail Ground prices will increase 6.4 percent overall on average. New for 2023, the zoned prices for the existing “Local, 1, 2” Zone will be differentiated. The Local zone will be eliminated, and separate prices will be established for Zone 1 and Zone 2. No other structural changes are proposed. Nonstandard Fees (NSFs) are changing for our full network products for 2023. Ground products will see a price decrease in NSFs.

#### *G. Domestic Extra Services*

Premium Forwarding Service (PFS) prices will increase 6.5 percent on average in 2023. The retail counter enrollment fee will increase to \$25.45. The online enrollment option, introduced in 2014, will increase to \$23.40. The weekly reshipment fee will increase to \$25.45. PFS Local, which was introduced in 2019 for P.O. Box customers, will have an increased reshipment fee of \$25.45. Prices for Adult Signature service will increase to \$9.05 for the basic service and \$9.35 for the person-specific service. Address Enhancement Service prices will remain the same for 2023. Competitive Post Office Box prices will be increasing 6.5 percent on average, within the existing price ranges. Package Intercept Service will increase to \$17.00. The Pickup On Demand fee will increase to \$26.50 for 2023. Premium Data Retention and Retrieval Service (USPS Tracking Plus), which was introduced in 2020, will not see a price change in 2023. New for 2023, the Postal Service is introducing a new Label Delivery Service under the Competitive Ancillary Services product, whereby residential and business customers can request return label

delivery for a \$1.25 fee for certain products.

## **II. International Products**

### *A. Expedited Services*

International expedited services include Global Express Guaranteed (GXG) and Priority Mail Express International (PMEI). Overall, GXG prices will rise by 4.9 percent, and PMEI will be subject to an overall 6.0 percent increase. Commercial Plus prices will be equivalent to Commercial Base.

### *B. Priority Mail International*

The overall increase for Priority Mail International (PMI) will be 6.0 percent. Commercial Plus prices will be equivalent to Commercial Base. For Priority Mail Express International, weight-rated items tendered at retail counters will no longer be offered at prices equivalent to Priority Mail International for certain destinations and weight steps subject to certain requirements and conditions. The zoned prices based on origin ZIP Code for Priority Mail International destined to Canada will be collapsed into a single country group for Priority Mail International to Canada, and the related fee for the International Service Center (ISC) zone chart for Priority Mail International pieces destined to Canada will be eliminated.

### *C. International Priority Airmail and International Surface Air Lift*

Published prices for International Priority Airmail (IPA) and International Surface Air Lift (ISAL) will increase by 3.5 percent and 12.0 percent, respectively.

### *D. Airmail M-Bags*

The published prices for Airmail M-Bags will increase by 6.4 percent.

### *E. First-Class Package International Service™*

The overall increase for First-Class Package International Service (FCPIS) prices will be 6.5 percent. Commercial Plus prices will be equivalent to Commercial Base.

### *F. International Ancillary Services and Special Services*

Prices for several international ancillary services will be increased, with an overall increase of 12.2 percent.

## **Order**

The changes in prices and classes set forth herein shall be effective at 12:01 a.m. on January 22, 2023. We direct the Secretary to have this decision published in the **Federal Register** in accordance with 39 U.S.C. 3632(b)(2)

and direct management to file with the Postal Regulatory Commission appropriate notice of these changes.

By The Governors:  
/s/

Roman Martinez IV,  
Chairman, Board of Governors.

## **UNITED STATES POSTAL SERVICE OFFICE OF THE BOARD OF GOVERNORS**

### **CERTIFICATION OF GOVERNORS’ VOTE ON GOVERNORS’ DECISION NO. 22–6**

Consistent with 39 U.S.C. 3632(a), I hereby certify that, on November 9, 2022, the Governors voted on adopting Governors’ Decision No. 22–6, and that a majority of the Governors then holding office voted in favor of that Decision.

Date: November 9, 2022.  
/s/

Michael J. Elston,  
Secretary of the Board of Governors.

## **OFFICE OF SCIENCE AND TECHNOLOGY POLICY**

### **Request for Information (RFI) on Data Collection for Emergency Clinical Trials and Interoperability Pilot; Extension of Comment Period**

**AGENCY:** White House Office of Science and Technology Policy (OSTP).

**ACTION:** Request for Information (RFI) on Data Collection for Emergency Clinical Trials and Interoperability Pilot; extension of comment period.

**SUMMARY:** On October 28, 2022, the Office of Science and Technology Policy (OSTP) published in the **Federal Register** a document entitled “Request for Information (RFI) on Data Collection for Emergency Clinical Trials and Interoperability Pilot.” This RFI, issued by OSTP in partnership with the Office of the National Coordinator for Health Information Technology (ONC), invited comments on how to optimize data collection for clinical trials carried out across a range of institutions and sites, both in emergency settings and in the pre-emergency phase. OSTP and ONC are seeking input on viable technical strategies to distribute clinical trial protocols and capture clinical trial data using common application programming interfaces (APIs). OSTP and ONC also seek information about whether there is value in a pilot or demonstration project to operationalize data capture in the near term, for

example within 6–12 months of the close of comments on the RFI. In response to requests by prospective commenters that they would benefit from additional time to adequately consider and respond to the RFI, OSTP has determined that an extension of the comment period until January 27, 2023 is appropriate.

**DATES:** The end of the comment period for the document entitled “Request for Information (RFI) on Data Collection for Emergency Clinical Trials and Interoperability Pilot,” published on October 28, 2022 (87 FR 65259), is extended from December 27, 2022 to January 27, 2023.

**ADDRESSES:** Comments submitted in response to 87 FR 65259 should be submitted electronically to [datacollectionforclinicaltrials@ostp.eop.gov](mailto:datacollectionforclinicaltrials@ostp.eop.gov) and should include “Data Collection for Clinical Trials RFI” in the subject line of the email. Due to time constraints, mailed paper submissions will not be accepted, and electronic submissions received after the deadline cannot be ensured to be incorporated or taken into consideration.

**Instructions:** Response to this RFI (87 FR 65259) is voluntary. Each responding entity (individual or organization) is requested to submit only one response. Please feel free to respond to one or as many prompts as you choose. Please be concise with your submissions, which must not exceed 10 pages in 12-point or larger font, with a page number on each page. Responses should include the name of the person(s) or organization(s) filing the comment.

OSTP invites input from all stakeholders, including members of the public, representing all backgrounds and perspectives. In particular, OSTP is interested in input from health information technology (health IT) companies, app developers, clinical trial designers, and users of health IT products. *Please indicate which of these stakeholder types, or what other description, best fits you as a respondent.* If a comment is submitted on behalf of an organization, the individual respondent’s role in the organization may also be provided on a voluntary basis.

Comments containing references, studies, research, and other empirical data that are not widely published should include copies or electronic links of the referenced materials. No business proprietary information, copyrighted information, or personally identifiable information should be submitted in response to this RFI (87 FR 65259). Please be aware that comments submitted in response to this RFI (87 FR

65259) may be posted on OSTP’s website or otherwise released publicly.

In accordance with FAR 15.202(3), responses to this notice are not offers and cannot be accepted by the Federal Government to form a binding contract. Additionally, those submitting responses are solely responsible for all expenses associated with response preparation.

**FOR FURTHER INFORMATION CONTACT:** For additional information, please direct questions to Grail Sipes at 202–456–4444 or [datacollectionforclinicaltrials@ostp.eop.gov](mailto:datacollectionforclinicaltrials@ostp.eop.gov).

**SUPPLEMENTARY INFORMATION:** In accordance with the 2022 National Biodefense Strategy for Countering Biological Threats, Enhancing Pandemic Preparedness, and Achieving Global Health Security (National Biodefense Strategy) and the American Pandemic Preparedness Plan (AP3), OSTP, in partnership with the National Security Council (NSC), is leading efforts to ensure that coordinated and large-scale clinical trials can be efficiently carried out across a range of institutions and sites to address outbreaks of disease and other emergencies.<sup>1</sup> On October 28, 2022, OSTP, in partnership with ONC, published in the **Federal Register** a document inviting comments on how to optimize data collection for clinical trials carried out across a range of institutions and sites, both in emergency settings and in the pre-emergency phase (87 FR 65259). OSTP and ONC are seeking input on viable technical strategies to distribute clinical trial protocols and capture clinical trial data using common APIs. OSTP and ONC also seek information about whether there is value in a pilot or demonstration project to operationalize data capture in the near term, for example within 6–12 months of the close of comments on the RFI. The RFI was issued to seek input from a broad array of stakeholders on a range of topics related to data capture in the clinical trials context, including ways in which ONC standards and frameworks for interoperability might be leveraged to further the goals of the RFI. The document stated that the comment period would close on December 27, 2022. OSTP has received requests to extend the comment period. An extension of the comment period will provide additional opportunity for the public to consider the RFI and prepare comments to address the topics listed therein. Therefore, OSTP is extending

<sup>1</sup> See Notice of Request for Information (RFI) on Clinical Research Infrastructure and Emergency Clinical Trials, published October 26, 2022 (87 FR 64821).

the end of the comment period for the RFI from December 27, 2022 to January 27, 2023.

Submitted by the White House Office of Science and Technology Policy on November 15, 2022.

**Stacy Murphy,**  
*Operations Manager.*

## SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–811, OMB Control No. 3235–0767]

**Submission for OMB Review;  
Comment Request; Extension: Rule 204–5**

*Upon Written Request, Copies Available From:* Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (the “Commission”) has submitted to the Office of Management and Budget a request for extension of the previously approved collection of information discussed below.

The title for the collection of information is: “Rule 204–5 under the Investment Advisers Act of 1940.” Rule 204–5 requires an investment adviser to deliver an electronic or paper version of the relationship summary to each retail investor before or at the time the adviser enters into an investment advisory contract with the retail investor. The purpose of the relationship summary is to assist retail investors in making an informed choice when choosing an investment firm and professional, and type of account. Retail investors can use the information required in the relationship summary to determine whether to hire or retain an investment adviser, as well as what types of accounts and services are appropriate for their needs.

We estimate the total collection of information burden for rule 204–5 to be 1,137,413 annual aggregate hours per year, or 124 hours per respondent, for a total annual aggregate monetized cost of \$77,344,061, or \$8,402 per adviser.

The likely respondents to this information collection are approximately 9,205 investment advisers registered with the Commission that are required to deliver a relationship summary to retail investors pursuant to rule 204–5. We also note

that these figures include the 325 registered broker-dealers that are dually registered as investment advisers.

The requirements of this collection of information are mandatory. Responses will not be kept confidential. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid control number.

The public may view background documentation for this information collection at the following website: [www.reginfo.gov](http://www.reginfo.gov). Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice by December 19, 2022 to (i) [MBX.OMB.OIRA.SEC\\_desk\\_officer@omb.eop.gov](mailto:MBX.OMB.OIRA.SEC_desk_officer@omb.eop.gov) and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549, or by sending an email to: [PRA\\_Mailbox@sec.gov](mailto:PRA_Mailbox@sec.gov).

Dated: November 14, 2022.

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–96307; File No. SR–CboeBYX–2022–026]

### Self-Regulatory Organizations; Cboe BYX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fee Schedule

November 14, 2022.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),<sup>1</sup> and Rule 19b–4 thereunder,<sup>2</sup> notice is hereby given that on November 1, 2022, Cboe BYX Exchange, Inc. (the "Exchange" or "BYX") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

#### I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BYX Exchange, Inc. (the "Exchange" or BYX) proposes to amend its Fee Schedule. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website ([http://markets.cboe.com/us/equities/regulation/rule\\_filings/byx/](http://markets.cboe.com/us/equities/regulation/rule_filings/byx/)), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

#### II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

##### A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

###### 1. Purpose

The Exchange proposes to amend its Fee Schedule to clarify that fee code X<sup>3</sup> is applicable to certain routed orders that add or remove liquidity. The Exchange proposes to implement these changes effective November 1, 2022.

The Exchange proposes to clarify that fee code X is applicable to routed orders that add or remove liquidity. When certain fee codes were deleted from the Fee Schedule, the Exchange simultaneously proposed to update fee code X to make clear that it applies to all other routed orders that are not otherwise specified under other fee codes in the Fee Schedule.<sup>4</sup> However, the Exchange did not make clear in the fee code table that fee code X is therefore also applicable to orders that both add and remove liquidity.<sup>5</sup> Therefore, the Exchange is now

<sup>3</sup> Fee code X is appended to routed orders.

<sup>4</sup> See Securities Exchange Act No. 90999 (January 27, 2021) 86 FR 7914 (February 2, 2021) (SR-CboeBYX–2021–003).

<sup>5</sup> Under the Transaction Fees section of the Fee Schedule, bullet four provides "[u]nless otherwise noted, all routing fees or rebates in the Fee Codes and Associated Fees table are for removing liquidity from the destination venue."

proposing to add such language to the description of fee code X, eliminate the reference to "Removing" liquidity in the Standard Rates header for the Routing Liquidity column (which is applicable to fee code X), and make corresponding updates to footnote 8.

###### 2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Exchange Act of 1934 (the "Act"),<sup>6</sup> in general, and furthers the objectives of Section 6(b)(4),<sup>7</sup> in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members, issuers and other persons using its facilities.

The Exchange believes the proposal to modify fee code X to explicitly provide that it is applicable to routed orders that add and remove liquidity on the destination exchange is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. Specifically, the proposal is intended only to make a clarifying change to the Fee Schedule and involves no substantive change.

##### B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes its proposal to clarify that fee code X is applicable to liquidity adding and removing orders will have no impact on competition as it involves no substantive change, but merely is a clarifying change to the existing Fee Schedule.

##### C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

#### III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act<sup>8</sup> and paragraph (f) of Rule 19b–4<sup>9</sup> thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may

<sup>6</sup> 15 U.S.C. 78f.

<sup>7</sup> 15 U.S.C. 78f(b)(4).

<sup>8</sup> 15 U.S.C. 78s(b)(3)(A).

<sup>9</sup> 17 CFR 240.19b–4(f).

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b–4.

temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

#### IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

##### *Electronic Comments*

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include File Number SR-CboeBYX-2022-026 on the subject line.

##### *Paper Comments*

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090. All submissions should refer to File Number SR-CboeBYX-2022-026. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should

submit only information that you wish to make available publicly. All submissions should refer to File Number SR-CboeBYX-2022-026 and should be submitted on or before December 9, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>10</sup>

#### **SECURITIES AND EXCHANGE COMMISSION**

**[SEC File No. 270-793, OMB Control No. 3235-0738]**

#### **Submission for OMB Review; Comment Request; Extension: Rules 13n-4(b)(9), (b)(10) and (d)**

*Upon Written Request, Copies Available From:* Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549-2736

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 ("PRA") (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission ("Commission") has submitted to the Office of Management and Budget ("OMB") a request for approval of extension of the previously approved collection of information provided for in rules 13n-4(b)(9), (b)(10) and (d) under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*).

Rules 13n-4(b)(9), (b)(10) and (d) implement Exchange Act sections 13(n)(5)(G) and (H), which conditionally require security-based swap data repositories (SDRs) registered with the SEC to make security-based swap data available to certain regulators and other authorities. The rules in part would condition this access to data on the regulators and other authorities entering into memoranda of understanding or other arrangements with the Commission to address the confidentiality of the data made available. The rules further would require SDRs to create and maintain records regarding such data access. In addition, certain regulators or other authorities that are not otherwise designated by statute or rule may submit applications to the Commission requesting that they be deemed eligible to access the relevant security-based swap data.

Implementation of the statutory data access provisions—including the

confidentiality condition and the Commission's authority to designate entities to access such information—will facilitate regulatory oversight of the security-based swap market and its participants, including oversight of systemic and other risks associated with the market. Implementation also will promote compliance with applicable laws and regulations, including but not limited to compliance with the antifraud provisions of the federal securities laws.

Commission Staff estimates that the total annual burden associated with Rules 13n-4(b)(9), (b)(10) and (d) is 11,405 hours and \$120,000, calculated as follows:

Commission staff estimates a total of 50 regulators or other authorities will enter into confidentiality arrangements with the Commission to obtain access to security-based swap data pursuant to these provisions. On average, each of those recipients of data is expected to expend 500 hours in connection with negotiating these MOUs or other arrangements, for a one-time aggregate burden of 25,000 hours, with no associated ongoing burdens. This equates to 8,333 hours per year when annualized over three years.

Commission staff estimates that a total of 41 regulators or other authorities (that otherwise are not identified by statute or the rules as being eligible for access) may request that the Commission determine that they be able to access such security-based swap data. On average, each of those entities is expected to expend 40 hours in connection with such requests, for a one-time aggregate burden of 1,640 hours, with no associated ongoing burdens. This equates to 547 hours per year when annualized over three years.

Commission staff also estimates that a total of three SDRs may be expected to incur systems-related costs associated with setting up access to security-based swap data for regulators and other authorities. On average, each of those entities is expected to expend 1,300 hours in connection with providing such connectivity (based on each SDR incurring 26 hours per recipient, over 50 total recipients), for a one-time aggregate burden of 3,900 hours, with no associated no ongoing burdens associated with this requirement. This equates to 1,300 hours when annualized over three years.

In addition, Commission staff estimates that a total of three SDRs may incur costs associated with notifying the Commission when the SDR receives the first request for security-based swap data from a particular entity. On average, each of those SDRs is expected

<sup>10</sup> 17 CFR 200.30-3(a)(12).

to expend 25 hours in connection with this notice requirement (based on each SDR providing 50 notices, at half-hour per notice), for a one-time aggregate burden of 75 hours, with no associated ongoing burdens. This equates to 25 hours per year when annualized over three years.

Commission staff estimates that a total of three SDRs may incur costs associated with the requirement that they maintain records of all information related to initial and subsequent requests for data access. On average, compliance with this provision is expected to require 360 hours initially and 280 hours annually per SDR, for a total burden of 1,080 hours initially and 840 hours annually across three SDRs. This equates to 1,200 hours per year when annualized over three years. Commission staff further estimates that those SDRs each will require \$40,000 annually in connection with that requirement, for a total cost of \$120,000 annually across three SDRs.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

The public may view background documentation for this information collection at the following website: [www.reginfo.gov](http://www.reginfo.gov). ## SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–506, OMB Control No. 3235–0564]

**Submission for OMB Review;  
Comment Request; Extension: Rule  
17a–6**

*Upon Written Request, Copies Available  
From: Securities and Exchange  
Commission, Office of FOIA Services,*

100 F Street NE, Washington, DC  
20549–2736.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (the "Commission") has submitted to the Office of Management and Budget ("OMB") a request for extension of the previously approved collection of information discussed below.

Section 17(a) of the Investment Company Act of 1940 (the "Act") generally prohibits affiliated persons of a registered investment company ("fund") from borrowing money or other property from, or selling or buying securities or other property to or from, the fund or any company that the fund controls. Rule 17a–6 (17 CFR 270.17a–6) permits a fund, or a company controlled by the fund, and a "portfolio affiliate" of the fund (a company that is an affiliated person of the fund because the fund controls the company, or holds five percent or more of the company's outstanding voting securities) to engage in principal transactions that would otherwise be prohibited under section 17(a) of the Act under certain conditions. A fund may not rely on the exemption in the rule to enter into a principal transaction with a portfolio affiliate if certain prohibited participants (*e.g.*, directors, officers, employees, or investment advisers of the fund) have a financial interest in a party to the transaction. Rule 17a–6 specifies certain interests that are not "financial interests," including any interest that the fund's board of directors (including a majority of the directors who are not interested persons of the fund) finds to be not material. A board making this finding is required to record the basis for the finding in its meeting minutes. This recordkeeping requirement is a collection of information under the Paperwork Reduction Act of 1995 ("PRA").

The rule is designed to permit transactions between funds and their portfolio affiliates in circumstances in which it is unlikely that the affiliate would be in a position to take advantage of the fund. In determining whether a financial interest is "material," the board of the fund should consider whether the nature and extent of the interest in the transaction is sufficiently small that a reasonable person would not believe that the interest affected the determination of whether to enter into the transaction or arrangement or the terms of the transaction or arrangement. The information collection requirements in rule 17a–6 are intended to ensure that Commission staff can review, in the

course of its compliance and examination functions, the basis for a board of director's finding that the financial interest of an otherwise prohibited participant in a party to a transaction with a portfolio affiliate is not material.

Based on public filings made with the Commission, we estimate that annually 335 funds and their series (collectively, "funds") may rely on rule 17a–6 to engage in otherwise prohibited transactions under section 17(a) of the 1940 Act. This estimate is based on publicly available Form N–CEN filings. Solely for the purposes of this PRA extension, we assume that each of these funds has engaged in one transaction per reporting period that resulted in a paperwork burden pursuant to rule 17a–6. We estimate that compliance with the recordkeeping requirement for rule 17a–6 will impose a burden of .2 hours (12 minutes) for each transaction for which there is a paperwork burden. Therefore, we estimate 67 burden hours to be associated with rule 17a–6 recordkeeping requirements annually, with an associated internal cost of \$5,762.

The estimate of burden hours and burden costs is made solely for the purposes of the PRA. The estimate is not derived from a comprehensive or even a representative survey or study of the costs of Commission rules. Complying with this collection of information requirement is necessary to obtain the benefit of relying on rule 17a–6. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

The public may view background documentation for this information collection at the following website: [www.reginfo.gov](http://www.reginfo.gov). Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice by December 19, 2022 to (i) [MBX.OMB.OIRA.SEC\\_desk\\_officer@omb.eop.gov](mailto:MBX.OMB.OIRA.SEC_desk_officer@omb.eop.gov) and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549, or by sending an email to: [PRA\\_Mailbox@sec.gov](mailto:PRA_Mailbox@sec.gov).

Dated: November 14, 2022.

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–96305; File No. SR–NYSEARCA–2022–75]

### Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Amend the NYSE Arca Equities Fees and Charges

November 14, 2022.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),<sup>1</sup> and Rule 19b–4 thereunder,<sup>2</sup> notice is hereby given that on November 1, 2022, NYSE Arca, Inc. (“NYSE Arca” or the “Exchange”) filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

#### I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the NYSE Arca Equities Fees and Charges (“Fee Schedule”) to adopt a new pricing tier, Retail Tier 2. The Exchange proposes to implement the fee changes effective November 1, 2022. The proposed rule change is available on the Exchange’s website at [www.nyse.com](http://www.nyse.com), at the principal office of the Exchange, and at the Commission’s Public Reference Room.

#### II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

##### A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

###### 1. Purpose

The Exchange proposes to amend the Fee Schedule to adopt a new pricing

tier, Retail Tier 2. The proposed changes respond to the current competitive environment where order flow providers have a choice of where to direct liquidity-providing orders by offering further incentives for ETP Holders to send additional displayed liquidity to the Exchange.

The Exchange proposes to implement the fee changes effective November 1, 2022.

###### Background

The Exchange operates in a highly competitive market. The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system “has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.”<sup>3</sup>

While Regulation NMS has enhanced competition, it has also fostered a “fragmented” market structure where trading in a single stock can occur across multiple trading centers. When multiple trading centers compete for order flow in the same stock, the Commission has recognized that “such competition can lead to the fragmentation of order flow in that stock.”<sup>4</sup> Indeed, equity trading is currently dispersed across 16 exchanges,<sup>5</sup> numerous alternative trading systems,<sup>6</sup> and broker-dealer internalizers and wholesalers, all competing for order flow. Based on publicly available information, no single exchange currently has more than 17% market share.<sup>7</sup> Therefore, no exchange possesses significant pricing power in the execution of equity order flow. More specifically, the Exchange currently has

less than 10% market share of executed volume of equities trading.<sup>8</sup>

The Exchange believes that the ever-shifting market share among the exchanges from month to month demonstrates that market participants can move order flow, or discontinue or reduce use of certain categories of products. While it is not possible to know a firm’s reason for shifting order flow, the Exchange believes that one such reason is because of fee changes at any of the registered exchanges or non-exchange venues to which a firm routes order flow. The competition for Retail Orders<sup>9</sup> is even more stark, particularly as it relates to exchange versus off-exchange venues.

The Exchange thus needs to compete in the first instance with non-exchange venues for Retail Order flow, and with the 15 other exchange venues for that Retail Order flow that is not directed off-exchange. Accordingly, competitive forces compel the Exchange to use exchange transaction fees and credits, particularly as they relate to competing for Retail Order flow, because market participants can readily trade on competing venues if they deem pricing levels at those other venues to be more favorable.

To respond to this competitive environment, the Exchange has established a number of Retail Tiers, e.g., Retail Tier 1, Retail Tier 2, Retail Tier 3 and Retail Step-Up Tier, which are designed to provide an incentive for ETP Holders to route Retail Orders to the Exchange by providing higher credits for adding liquidity correlated to an ETP Holder’s higher trading volume in Retail Orders on the Exchange. Under three of these four tiers, ETP Holders also do not pay a fee when such Retail Orders have a time-in-force of Day that remove liquidity from the Exchange.

###### Proposed Rule Change

The proposed rule change is designed to be available to all ETP Holders on the Exchange and is intended to provide ETP Holders an opportunity to receive enhanced rebates by quoting and trading more on the Exchange.

The Exchange currently provides tiered credits for Retail Orders that provide liquidity on the Exchange. Specifically, Section VII. Tier Rates—Round Lots and Odd Lots (Per Share

<sup>3</sup> See Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005) (File No. S7–10–04) (Final Rule) (“Regulation NMS”).

<sup>4</sup> See Securities Exchange Act Release No. 61358, 75 FR 3594, 3597 (January 21, 2010) (File No. S7–02–10) (Concept Release on Equity Market Structure).

<sup>5</sup> See Choe U.S. Equities Market Volume Summary, available at [https://markets.cboe.com/us/equities/market\\_share](https://markets.cboe.com/us/equities/market_share). See generally <https://www.sec.gov/fast-answers/divisionsmarketregmrexchangesshtml>.

<sup>6</sup> See FINRA ATS Transparency Data, available at <https://otctransparency.finra.org/otctransparency/AtsIssueData>. A list of alternative trading systems registered with the Commission is available at <https://www.sec.gov/foia/docs/atstlist.htm>.

<sup>7</sup> See Choe Global Markets U.S. Equities Market Volume Summary, available at [http://markets.cboe.com/us/equities/market\\_share/](http://markets.cboe.com/us/equities/market_share/).

<sup>8</sup> See *id.*

<sup>9</sup> A Retail Order is an agency order that originates from a natural person and is submitted to the Exchange by an ETP Holder, provided that no change is made to the terms of the order to price or side of market and the order does not originate from a trading algorithm or any other computerized methodology. See Securities Exchange Act Release No. 67540 (July 30, 2012), 77 FR 46539 (August 3, 2012) (SR–NYSEArca–2012–77).

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b–4.

Price \$1.00 or Above), provides a credit of \$0.0038 per share for Adding under Retail Tier 1, a credit of \$0.0036 per share for Adding under Retail Tier 2, a credit of \$0.0034 per share for Adding under Retail Tier 3, and a credit of \$0.0035 per share for Adding under Retail Step-Up Tier.<sup>10</sup> The Retail Tiers are designed to encourage ETP Holders that provide displayed liquidity in Retail Orders on the Exchange to increase that order flow, which would benefit all ETP Holders by providing

greater execution opportunities on the Exchange. In order to provide an incentive for ETP Holders to direct providing displayed Retail Order flow to the Exchange, the credits increase in the various tiers based on increased levels of volume directed to the Exchange.

The Exchange proposes to adopt a new pricing tier, Retail Tier 2,<sup>11</sup> which would provide a credit of \$0.0037 per share to ETP Holders that execute an ADV of Retail Orders with a time-in-force of Day that add or remove liquidity during the month that is equal

to at least 0.35% of CADV. As with current Retail Tier 1, Retail Tier 2 and Retail Step-Up Tier, under the proposed Retail Tier 2, ETP Holders that qualify for proposed Retail Tier 2 would also not be charged a fee for Retail Orders with a time-in-force of Day that remove liquidity.<sup>12</sup>

With this proposed rule change, the following credits would be available to ETP Holders that provide increased levels of displayed liquidity in Retail Orders on the Exchange:

| Tier                      | Credit for retail adding              |
|---------------------------|---------------------------------------|
| Retail Tier 1 .....       | \$0.0038 (Tape A, Tape B and Tape C). |
| Retail Tier 2 .....       | \$0.0037 (Tape A, Tape B and Tape C). |
| Retail Tier 3 .....       | \$0.0036 (Tape A, Tape B and Tape C). |
| Retail Tier 4 .....       | \$0.0034 (Tape A, Tape B and Tape C). |
| Retail Step-Up Tier ..... | \$0.0035 (Tape A, Tape B and Tape C). |

The purpose of the proposed rule change is to encourage greater participation from ETP Holders and promote additional liquidity in Retail Orders. As described above, ETP Holders with liquidity-providing orders have a choice of where to send those orders. The Exchange believes that the proposed new increased credit should encourage more ETP Holders to route their liquidity-providing Retail Order to the Exchange rather than to a competing exchange.

The Exchange does not know how much Retail Order flow ETP Holders choose to route to other exchanges or to off-exchange venues. While the proposed Retail Tier 2 pricing tier would be available to all ETP Holders, no ETP Holder currently qualifies given the pricing tier is new. Without having a view of ETP Holders' activity on other markets and off-exchange venues, the Exchange has no way of knowing whether this proposed rule change would result in any ETP Holders sending more of their Retail Orders to the Exchange to qualify for the proposed Retail Order credit. The Exchange cannot predict with certainty how many ETP Holders would avail themselves of this opportunity, but additional liquidity-providing Retail Orders would benefit all market participants because it would provide greater execution opportunities on the Exchange.

## 2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,<sup>13</sup> in general, and furthers the objectives of Sections 6(b)(4) and (5) of the Act,<sup>14</sup> in particular, because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

### The Proposed Fee Change Is Reasonable

As discussed above, the Exchange operates in a highly fragmented and competitive market. The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system "has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies."<sup>15</sup>

Given this competitive environment, the proposal represents a reasonable attempt to attract additional order flow to the Exchange.

As noted above, the competition for Retail Order flow is stark given the

amount of retail limit orders that are routed to non-exchange venues. The Exchange believes that the ever-shifting market share among the exchanges from month to month demonstrates that market participants can shift order flow, or discontinue or reduce use of certain categories of products, in response to fee changes. This competition is particularly acute for non-marketable, or limit, retail orders, *i.e.*, retail orders that can provide liquidity on an exchange. That competition is even more fierce for retail limit orders that provide *displayed* liquidity on an exchange. With respect to such orders, ETP Holders can choose from any one of the 16 currently operating registered exchanges to route such order flow. Accordingly, competitive forces constrain exchange transaction fees, particularly as they relate to competing for retail orders. Stated otherwise, changes to exchange transaction fees can have a direct effect on the ability of an exchange to compete for order flow.

The Exchange believes the proposed change to adopt the Retail Tier 2 pricing tier is reasonable because it would provide ETP Holders with additional incentives to send a greater number of Retail Orders to the Exchange. The Exchange believes that the proposal represents a reasonable effort to provide enhanced order execution opportunities for ETP Holders. All ETP Holders would benefit from the greater amounts of liquidity on the Exchange, which would

<sup>10</sup> See Fee Schedule, Retail Tiers table under Section VII. Tier Rates—Round Lots and Odd Lots (Per Share Price \$1.00 or Above).

<sup>11</sup> With this proposed rule change to adopt new Retail Tier 2, the Exchange proposes to rename current Retail Tier 2 to Retail Tier 3 and rename current Retail Tier 3 to Retail Tier 4.

<sup>12</sup> Pursuant to footnote (e) under Retail Tiers, ETP Holders that qualify for current Retail Tier 1, Retail Tier 2 and Retail Step-Up Tier are not charged a fee or provided a credit for Retail Orders where each side of the executed order (1) shares the same MPID and (2) is a Retail Order with a time-in-force of Day. See Fee Schedule. With the proposed renaming of

current Retail Tier 2 to Retail Tier 3, the Exchange also proposes to add Retail Tier 3 to current footnote (e) to reflect its applicability to the renamed tier.

<sup>13</sup> 15 U.S.C. 78f(b).

<sup>14</sup> 15 U.S.C. 78f(b)(4) and (5).

<sup>15</sup> See *supra* note 3.

represent a wider range of execution opportunities. The Exchange notes that market participants are free to shift their order flow to competing venues if they believe other markets offer more favorable fees and credits.

The Exchange believes the proposed change is also reasonable because the increased credit proposed herein would continue to encourage ETP Holders to send Retail Orders to the Exchange to qualify for the proposed pricing tier. As noted above, the Exchange operates in a highly competitive environment, particularly for attracting Retail Order flow that provides displayed liquidity on an exchange. The Exchange believes it is reasonable to continue to provide credits for adding liquidity, in general, and higher credits for Retail Orders that provide displayed liquidity if an ETP Holder meets the requirement for the Retail Tiers.

Further, given the competitive market for attracting Retail Orders, the Exchange notes that with this proposed rule change, the Exchange's pricing for Retail Orders would be comparable to credits currently in place on other exchanges that the Exchange competes with for order flow. For example, Cboe EDGX Exchange, Inc. ("EDGX") provides its members with a credit of \$0.0037 per share for retail orders that add liquidity to that market if an EDGX member adds liquidity in Retail Orders of at least 0.45% of CADV.<sup>16</sup> Additionally, MIAX PEARL, LLC ("MIAX") provides its member with a similar credit of \$0.0037 per share for Retail Orders that add liquidity to that market.<sup>17</sup>

The Exchange believes the proposed change is also reasonable because it is designed to attract higher volumes of Retail Orders transacted on the Exchange by ETP Holders which would benefit all market participants by offering greater price discovery, increased transparency, and an increased opportunity to trade on the Exchange.

On the backdrop of the competitive environment in which the Exchange currently operates, the proposed rule change is a reasonable attempt to increase liquidity on the Exchange and improve the Exchange's market share relative to its competitors.

#### The Proposed Fee Change Is an Equitable Allocation of Fees and Credits

The Exchange believes that the proposed rule change to adopt new Retail Tier 2 equitably allocates fees and credits among its market participants because it is reasonably related to the value of the Exchange's market quality associated with higher volume in Retail Orders. The Exchange believes that pricing is just one of the factors that ETP Holders consider when determining where to direct their order flow. Among other things, factors such as execution quality, fill rates, and volatility, are important and deterministic to ETP Holders in deciding where to send their order flow.

Further, the Exchange notes that, with this proposed rule change, the difference between the highest credit provided for Retail Orders, \$0.0038 per share under Retail Tier 1, and the credit for Retail Orders that do not qualify for any Retail Order pricing tiers, \$0.0032 per share, is \$0.0006, or 15%, which the Exchange believes is relatively small given the heightened requirements that ETP Holders must meet to qualify for the higher credit. Similarly, with this proposed rule change, the difference in the highest credit for Retail Orders, \$0.0038 per share under Retail Tier 1 and the credit provided for Retail Orders to those ETP Holders qualifying for proposed Retail Tier 2, \$0.0037 per share, would only be \$0.0001 per share, or less than 3%. Therefore, the Exchange believes the proposed new Retail Tier 2 pricing tier is equitably allocated and provides credits that are reasonably related to the value to the Exchange's market quality associated with higher volumes.

Finally, the Exchange believes that the proposed adoption of new Retail Tier 2 is equitable because the magnitude of the proposed credit is not unreasonably high relative to credits paid by other exchanges for orders that provide additional liquidity in Retail Orders.<sup>18</sup> The Exchange believes the proposed rule change would improve market quality for all market participants on the Exchange and, as a consequence, attract more Retail Orders to the Exchange, thereby improving market-wide quality and price discovery.

The Exchange believes that the proposed rule change equitably allocates its fees and credits because maintaining the proportion of Retail Orders in exchange-listed securities that are executed on a registered national securities exchange (rather than relying

on certain available off-exchange execution methods) would contribute to investors' confidence in the fairness of their transactions and would benefit all investors by deepening the Exchange's liquidity pool, supporting the quality of price discovery, promoting market transparency and improving investor protection.

#### The Proposed Fee Change Is Not Unfairly Discriminatory

The Exchange believes that the proposed rule change is not unfairly discriminatory. In the prevailing competitive environment, ETP Holders are free to disfavor the Exchange's pricing if they believe that alternatives offer them better value. Moreover, the proposal neither targets nor will it have a disparate impact on any particular category of market participant. The Exchange believes that the proposal does not permit unfair discrimination because the proposal would be applied to all similarly situated ETP Holders and all ETP Holders would be similarly subject to the proposed volume requirement to qualify for the proposed new Retail Tier 2. Accordingly, no ETP Holder already operating on the Exchange would be disadvantaged by the proposed allocation of fees. The Exchange further believes that the proposed change would not permit unfair discrimination among ETP Holders because the general and tiered rates are available equally to all ETP Holders.

As described above, in today's competitive marketplace, order flow providers have a choice of where to direct liquidity-providing order flow, and the Exchange believes the proposed adoption of an increased credit under the proposed new pricing tier will incentivize greater number of ETP Holders to direct their order flow to the Exchange. Lastly, the submission of Retail Orders is optional for ETP Holders in that they could choose whether to submit Retail Orders and, if they do, the extent of its activity in this regard. The Exchange believes that it is subject to significant competitive forces, as described below in the Exchange's statement regarding the burden on competition.

For the foregoing reasons, the Exchange believes that the proposal is consistent with the Act.

#### B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,<sup>19</sup> the Exchange believes that the proposed rule change would not impose

<sup>16</sup> See EDGX Fee Schedule, Fee Codes and Associated Fees, at [https://markets.cboe.com/us/equities/membership/fee\\_schedule/edgx/](https://markets.cboe.com/us/equities/membership/fee_schedule/edgx/).

<sup>17</sup> See MIAX Fee Schedule, at [https://www.miaxoptions.com/sites/default/files/fee\\_schedule-files/MIAX\\_Pearl\\_Equities\\_Fee\\_Schedule\\_09012022.pdf](https://www.miaxoptions.com/sites/default/files/fee_schedule-files/MIAX_Pearl_Equities_Fee_Schedule_09012022.pdf).

<sup>18</sup> See *supra* notes 16–17.

<sup>19</sup> 15 U.S.C. 78f(b)(8).

any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Instead, as discussed above, the Exchange believes that the proposed changes would encourage the submission of additional liquidity to a public exchange, thereby promoting market depth, price discovery and transparency and enhancing order execution opportunities for ETP Holders. As a result, the Exchange believes that the proposed change furthers the Commission's goal in adopting Regulation NMS of fostering integrated competition among orders, which promotes "more efficient pricing of individual stocks for all types of orders, large and small."<sup>20</sup>

**Intramarket Competition.** The Exchange believes the proposed rule change does not impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. Particularly, the proposed change applies to all ETP Holders equally in that all ETP Holders are eligible for the proposed pricing tier, have a reasonable opportunity to meet the proposed pricing tier's criteria and will all receive the proposed rebate if such criteria is met. The Exchange does not believe that the proposed change represents a significant departure from previous pricing offered by the Exchange or its competitors. The proposed change is designed to attract additional order flow to the Exchange. The Exchange believes the proposed new pricing tier would continue to incentivize market participants to submit orders that qualify as Retail Order to the Exchange. Greater overall order flow, trading opportunities, and pricing transparency would benefit all market participants on the Exchange by enhancing market quality and would continue to encourage ETP Holders to send their orders to the Exchange, thereby contributing towards a robust and well-balanced market ecosystem. Additionally, the proposed rule change would apply to all ETP Holders equally in that all ETP Holders would be eligible for the proposed pricing tier, have a reasonable opportunity to meet the proposed pricing tier's criteria and would all receive the proposed credit if such criteria is met.

**Intermarket Competition.** The Exchange believes the proposed rule change does not impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange operates in a highly competitive market in which market

participants can readily choose to send their orders to other exchanges and off-exchange venues if they deem fee levels at those other venues to be more favorable. As noted above, the Exchange's market share of intraday trading (*i.e.*, excluding auctions) is currently less than 10%. In such an environment, the Exchange must continually adjust its fees and rebates to remain competitive with other exchanges and with off-exchange venues. Because competitors are free to modify their own fees and credits in response, and because market participants may readily adjust their order routing practices, the Exchange does not believe this proposed fee change would impose any burden on intermarket competition.

The Exchange believes that the proposed change could promote competition between the Exchange and other execution venues, including those that currently offer similar order types and comparable transaction pricing, by encouraging additional orders to be sent to the Exchange for execution.

#### *C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others*

No written comments were solicited or received with respect to the proposed rule change.

### **III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A)<sup>21</sup> of the Act and subparagraph (f)(2) of Rule 19b-4<sup>22</sup> thereunder, because it establishes a due, fee, or other charge imposed by the Exchange.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)<sup>23</sup> of the Act to determine whether the proposed rule change should be approved or disapproved.

<sup>21</sup> 15 U.S.C. 78s(b)(3)(A).

<sup>22</sup> 17 CFR 240.19b-4(f)(2).

<sup>23</sup> 15 U.S.C. 78s(b)(2)(B).

### **IV. Solicitation of Comments**

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

#### *Electronic Comments*

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include File Number SR-NYSEARCA-2022-75 on the subject line.

#### *Paper Comments*

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-NYSEARCA-2022-75. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal offices of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-NYSEARCA-2022-75, and should be submitted on or before December 9, 2022.

<sup>20</sup> See *supra* note 3.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>24</sup>

BILLING CODE 8011–01–P

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–96311; File No. SR–NASDAQ–2022–063]

### Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Its Schedule of Credits at Equity 7, Section 118(a)

November 15, 2022.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),<sup>1</sup> and Rule 19b–4 thereunder,<sup>2</sup> notice is hereby given that on November 4, 2022, The Nasdaq Stock Market LLC (“Nasdaq” or “Exchange”) filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

#### I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Exchange’s schedule of credits at Equity 7, Section 118(a), as described further below.

The text of the proposed rule change is available on the Exchange’s website at <https://listingcenter.nasdaq.com/rulebook/nasdaq/rules>, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

#### II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of

the most significant aspects of such statements.

#### A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

##### 1. Purpose

The purpose of the proposed rule change is to amend the Exchange’s schedule of credits, at Equity 7, Section 118(a).<sup>3</sup> Specifically, with respect to its schedule of credits for non-displayed midpoint orders (other than Supplemental Orders) that provide liquidity, the Exchange proposes to add a new supplemental credit in Tapes A, B and C and make conforming changes to its schedule of credits.

The Exchange proposes to provide a new supplemental credit for midpoint orders (excluding buy (sell) orders with midpoint pegging that receive an execution price that is lower (higher) than the midpoint of the NBBO) that provide liquidity to the Exchange. Specifically, the Exchange proposes to provide a supplemental credit of \$0.0001 per share executed for midpoint orders (excluding buy (sell) orders with midpoint pegging that receive an execution price that is lower (higher) than the midpoint of the NBBO) if the member executes at least 0.35% of Consolidated Volume through providing midpoint orders and through Midpoint Extended Life Orders (“M–ELO”) during the month, and (ii) executes at least 0.20% of Consolidated Volume through providing midpoint orders during the month.

The proposed credit will be in addition to other credits otherwise available to members for adding non-displayed liquidity to the Exchange, meaning that this supplemental credit is cumulative. Members that receive this new supplemental credit will be entitled to a combined credit (regular and supplemental) up to a maximum of \$0.0028 per share executed for midpoint orders. Members that do not receive this new supplemental credit are entitled to a combined credit (regular and supplemental) up to a maximum of \$0.0027 per share executed for midpoint orders.

The purpose of the new credit is to provide extra incentive to members that provide non-displayed liquidity to the Exchange to do so through midpoint orders. The Exchange believes that if such incentive is effective, then any

ensuing increase in liquidity to the Exchange will improve market quality, to the benefit of all participants.

##### 2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,<sup>4</sup> in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,<sup>5</sup> in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

##### The Proposal Is Reasonable

The Exchange’s proposed changes to its schedule of credits are reasonable in several respects. As a threshold matter, the Exchange is subject to significant competitive forces in the market for equity securities transaction services that constrain its pricing determinations in that market. The fact that this market is competitive has long been recognized by the courts. In *NetCoalition v. Securities and Exchange Commission*, the D.C. Circuit stated as follows: “[n]o one disputes that competition for order flow is ‘fierce.’ . . . As the SEC explained, ‘[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution’; [and] ‘no exchange can afford to take its market share percentages for granted’ because ‘no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers’ . . . .”<sup>6</sup>

The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, while adopting a series of steps to improve the current market model, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system “has been remarkably successful in promoting market competition in its

<sup>4</sup> 15 U.S.C. 78f(b).

<sup>5</sup> 15 U.S.C. 78f(b)(4) and (5).

<sup>6</sup> *NetCoalition v. SEC*, 615 F.3d 525, 539 (D.C. Cir. 2010) (quoting Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770, 74782–83 (December 9, 2008) (SR–NYSEArca–2006–21)).

<sup>24</sup> 17 CFR 200.30–3(a)(12).

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b–4.

<sup>3</sup> The Exchange initially filed the proposed pricing changes on November 1, 2022 (SR–NASDAQ–2022–062). The instant filing replaces SR–NASDAQ–2022–062, which was withdrawn on November 4, 2022.

broader forms that are most important to investors and listed companies.”<sup>7</sup>

Numerous indicia demonstrate the competitive nature of this market. For example, clear substitutes to the Exchange exist in the market for equity security transaction services. The Exchange is only one of several equity venues to which market participants may direct their order flow. Competing equity exchanges offer similar tiered pricing structures to that of the Exchange, including schedules of rebates and fees that apply based upon members achieving certain volume thresholds.

Within this environment, market participants can freely and often do shift their order flow among the Exchange and competing venues in response to changes in their respective pricing schedules. As such, the proposal represents a reasonable attempt by the Exchange to increase its liquidity and market share relative to its competitors.

The Exchange believes it is reasonable to establish a supplemental credit of \$0.0001 per share executed for midpoint orders (excluding buy (sell) orders with midpoint pegging that receive an execution price that is lower (higher) than the midpoint of the NBBO) if the member executes at least 0.35% of Consolidated Volume through providing midpoint orders and through M-ELO during the month, and (ii) executes at least 0.20% of Consolidated Volume through providing midpoint orders during the month. This proposal is reasonable because it will provide extra incentive to members that provide non-displayed liquidity to the Exchange to do so through midpoint orders. The Exchange believes that if such incentive is effective, then any ensuing increase in liquidity to the Exchange will improve market quality, to the benefit of all participants.

The Exchange believes that it is reasonable to exclude from the supplemental credit orders with midpoint pegging which execute at prices less aggressive than the midpoint of the NBBO because such orders already receive price improvements, such that members do not require additional inducements to enter these orders on the Exchange.

The Exchange notes that those market participants that are dissatisfied with the proposal are free to shift their order flow to competing venues that offer more generous pricing or less stringent qualifying criteria.

#### The Proposal Is an Equitable Allocation of Credits

The Exchange believes its proposal will allocate its charges and credits fairly among its market participants.

The Exchange believes that it is an equitable allocation to establish a new transaction credit because the proposal will encourage the addition of non-displayed liquidity to the Exchange through midpoint orders. To the extent that the Exchange succeeds in increasing the levels of liquidity and activity on the Exchange, then the Exchange will experience improvements in its market quality, which stands to benefit all market participants.

Any participant that is dissatisfied with the proposal is free to shift their order flow to competing venues that provide more generous pricing or less stringent qualifying criteria.

#### The Proposal Is Not Unfairly Discriminatory

The Exchange believes that its proposal is not unfairly discriminatory. As an initial matter, the Exchange believes that nothing about its volume-based tiered pricing model is inherently unfair; instead, it is a rational pricing model that is well-established and ubiquitous in today's economy among firms in various industries—from co-branded credit cards to grocery stores to cellular telephone data plans—that use it to reward the loyalty of their best customers that provide high levels of business activity and incent other customers to increase the extent of their business activity. It is also a pricing model that the Exchange and its competitors have long employed with the assent of the Commission. It is fair because it enhances price discovery and improves the overall quality of the equity markets.

The Exchange believes that its proposal to adopt a new credit is not unfairly discriminatory because the credit is available to all members. Moreover, the proposal stands to improve the overall market quality of the Exchange, to the benefit of all market participants, by incentivizing members to increase liquidity adding activity in midpoint orders on the Exchange. Any participant that is dissatisfied with the proposal is free to shift their order flow to competing venues that provide more generous pricing or less stringent qualifying criteria.

#### *B. Self-Regulatory Organization's Statement on Burden on Competition*

The Exchange does not believe that the proposed rule change will impose

any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

#### Intramarket Competition

The Exchange does not believe that its proposal will place any category of Exchange participant at a competitive disadvantage.

As noted above, the Exchange's proposal to add a new transaction credit is intended to have market-improving effects, to the benefit of all members. Any member may elect to achieve the level of liquidity in midpoint orders and volume in M-ELO required in order to qualify for the new credit.

The Exchange notes that its members are free to trade on other venues to the extent they believe that the Exchange's fee schedule is not attractive. As one can observe by looking at any market share chart, price competition between exchanges is fierce, with liquidity and market share moving freely between exchanges in reaction to fee and credit changes.

#### Intermarket Competition

In terms of inter-market competition, the Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually adjust its credits and fees to remain competitive with other exchanges and with alternative trading systems that have been exempted from compliance with the statutory standards applicable to exchanges. Because competitors are free to modify their own credits and fees in response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which credit or fee changes in this market may impose any burden on competition is extremely limited.

The proposed new credit is reflective of this competition because, as a threshold issue, the Exchange is a relatively small market so its ability to burden intermarket competition is limited. In this regard, even the largest U.S. equities exchange by volume only has 17–18% market share, which in most markets could hardly be categorized as having enough market power to burden competition. Moreover, as noted above, price competition between exchanges is fierce, with liquidity and market share moving freely between exchanges in reaction to fee and credit changes. This is in

<sup>7</sup> Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005) (“Regulation NMS Adopting Release”).

addition to free flow of order flow to and among off-exchange venues which comprises more than 40% of industry volume in recent months.

The Exchange's proposal to add a new transaction credit is pro-competitive in that the Exchange intends for the credit to increase liquidity addition activity in midpoint orders on the Exchange, thereby rendering the Exchange a more attractive and vibrant venue to market participants.

In sum, if the changes proposed herein are unattractive to market participants, it is likely that the Exchange will lose market share as a result. Accordingly, the Exchange does not believe that the proposed change will impair the ability of members or competing order execution venues to maintain their competitive standing in the financial markets.

*C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others*

No written comments were either solicited or received.

**III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

The foregoing rule change has become effective pursuant to section 19(b)(3)(A)(ii) of the Act.<sup>8</sup>

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

**IV. Solicitation of Comments**

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

*Electronic Comments*

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include File Number SR-NASDAQ-2022-063 on the subject line.

*Paper Comments*

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.
- All submissions should refer to File Number SR-NASDAQ-2022-063. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-NASDAQ-2022-063 and should be submitted on or before December 9, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>9</sup>

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 ("PRA") (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission ("Commission") is soliciting comments on the existing collection of information provided for in Rule 3a71-3(d), (17 CFR 240.3a71-3(d)), under the Securities Exchange Act of 1934 ("Exchange Act") (15 U.S.C. 78a *et seq.*). The Commission plans to submit this existing collection of information to the Office of Management and Budget ("OMB") for extension and approval.

Rule 3a71-3 under the Exchange Act provides in part that, for purposes of determining whether they can avail themselves of the *de minimis* exception to the "security-based swap dealer" definition, non-U.S. persons must count certain dealing transactions with non-U.S. counterparties that have been "arranged, negotiated, or executed" by personnel in the United States. Rule 3a71-3(d) provides an exception from that "arranged, negotiated, or executed" counting requirement.

The Commission estimates that up to 24 entities may seek to rely on the exception to the *de minimis* counting requirement of Rule 3a71-3. In connection with the conditions to the exception, each of those up to 24 entities would make use of an affiliated registered security-based swap dealer or registered broker. In general, the registered entity would be required to comply with the collections of information. Applications for "listed jurisdiction" status may be submitted by the up to 24 relying entities, but the staff believes that the greater portion of such applications will be submitted by foreign financial authorities.

The Commission estimates that the total annual time burden for Rule 3a71-3(d), for all respondents, is approximately 235,243 hours per year. In addition, the Commission estimates that the total annual cost burden for Rule 3a71-3(d), for all respondents, is approximately \$1,242,595 per year. A detailed break-down of the burdens is provided in the supporting statement.

*Written comments are invited on:* (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's estimates of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the

<sup>8</sup> 15 U.S.C. 78s(b)(3)(A)(ii).

<sup>9</sup> 17 CFR 200.30-3(a)(12).

collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted by January 17, 2023.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

Please direct your written comments to: David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549, or send an email to: [PRA\\_Mailbox@sec.gov](mailto:PRA_Mailbox@sec.gov).

Dated: November 14, 2022.

**Sherry R. Haywood,**  
Assistant Secretary.

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-96306; File No. SR-MEMX-2022-30]

### Self-Regulatory Organizations; MEMX LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Exchange's Fee Schedule

November 14, 2022

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"),<sup>1</sup> and Rule 19b-4 thereunder,<sup>2</sup> notice is hereby given that on October 31, 2022, MEMX LLC ("MEMX" or the "Exchange") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

#### I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing with the Commission a proposed rule change to amend the Exchange's fee schedule applicable to Members<sup>3</sup> (the "Fee Schedule") pursuant to Exchange Rules 15.1(a) and (c). The Exchange proposes to implement the changes to the Fee Schedule pursuant to this proposal on November 1, 2022. The text of the

proposed rule change is provided in Exhibit 5.

#### II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

##### A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

###### 1. Purpose

The purpose of the proposed rule change is to amend the Fee Schedule to: (i) modify the Liquidity Provision Tiers by adopting a new Liquidity Provision Tier 4 and modifying the required criteria under Liquidity Provision Tier 2; (ii) increase the fee and modify the required criteria under Liquidity Removal Tier 1; (iii) increase the fee for certain executions of Pegged Orders<sup>4</sup> with a Midpoint Peg<sup>5</sup> instruction (such orders, "Midpoint Peg Orders") and a time-in-force ("TIF") instruction of IOC<sup>6</sup> or FOK<sup>7</sup> that execute at the midpoint of the national best bid and offer ("NBBO"); and (iv) modify the pricing for certain executions of orders in securities priced below \$1.00 per share (such orders, "Sub-Dollar Volume"), each as further described below.

The Exchange first notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. More specifically, the Exchange is only one of 16 registered equities exchanges, as well as a number of alternative trading systems and other off-exchange venues, to which market participants may direct their order flow. Based on publicly available information, no single registered equities exchange currently has more than approximately 16% of the total market share of executed

volume of equities trading.<sup>8</sup> Thus, in such a low-concentrated and highly competitive market, no single equities exchange possesses significant pricing power in the execution of order flow, and the Exchange currently represents approximately 3.5% of the overall market share.<sup>9</sup> The Exchange in particular operates a "Maker-Taker" model whereby it provides rebates to Members that add liquidity to the Exchange and charges fees to Members that remove liquidity from the Exchange. The Fee Schedule sets forth the standard rebates and fees applied per share for orders that add and remove liquidity, respectively. Additionally, in response to the competitive environment, the Exchange also offers tiered pricing, which provides Members with opportunities to qualify for higher rebates or lower fees where certain volume criteria and thresholds are met. Tiered pricing provides an incremental incentive for Members to strive for higher tier levels, which provides increasingly higher benefits or discounts for satisfying increasingly more stringent criteria.

###### Liquidity Provision Tiers

The Exchange currently provides a standard rebate of \$0.0020 per share for executions of orders in securities priced at or above \$1.00 per share that add displayed liquidity to the Exchange (such orders, "Added Displayed Volume"). The Exchange also currently offers Liquidity Provision Tiers 1-4 under which a Member may receive an enhanced rebate for executions of Added Displayed Volume by achieving the corresponding required volume criteria for each tier. The Exchange now proposes to adopt a new tier under the Liquidity Provision Tiers, which, as proposed, would be the new Liquidity Provision Tier 4, and the current Liquidity Provision Tier 4 would be renumbered as Liquidity Provision Tier 5 (hereinafter referred to as such). The rebate for executions of Added Displayed Volume and the required criteria under Liquidity Provision Tier 5 would remain unchanged.

Under the proposed new Liquidity Provision Tier 4, the Exchange would provide an enhanced rebate of \$0.0028 per share for executions of Added Displayed Volume for Members that qualify for such tier by achieving one of the following two alternative criteria: (1)

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b-4.

<sup>3</sup> See Exchange Rule 1.5(p).

<sup>4</sup> See Exchange Rule 11.6(h).

<sup>5</sup> See Exchange Rule 11.6(h)(2).

<sup>6</sup> See Exchange Rule 11.6(o)(1).

<sup>7</sup> See Exchange Rule 11.6(o)(3).

<sup>8</sup> Market share percentage calculated as of October 31, 2022. The Exchange receives and processes data made available through consolidated data feeds (*i.e.*, CTS and UTDF).

<sup>9</sup> *Id.*

an ADAV<sup>10</sup> that is equal to or greater than 0.10% of the TCV;<sup>11</sup> or (2) a Displayed ADAV<sup>12</sup> (excluding Retail Orders) that is equal to or greater than 750,000 shares and a Step-Up Displayed ADAV<sup>13</sup> (excluding Retail Orders) from October 2022 that is equal to or greater than 30% of the Member's October 2022 Displayed ADAV (excluding Retail Orders).<sup>14</sup> The Exchange proposes to provide Members that qualify for the proposed new Liquidity Provision Tier 4 a rebate of 0.075% of the total dollar volume of the transaction for executions of orders in securities priced below \$1.00 per share that add displayed liquidity to the Exchange, which is the same rebate that will be applicable to such executions for all Members after giving effect to the Sub-Dollar Volume pricing changes proposed below. The proposed new Liquidity Provision Tier 4 is designed to encourage Members to maintain or increase their order flow that adds liquidity, including in the form of displayed orders, to the Exchange in order to qualify for the proposed enhanced rebate for executions of Added Displayed Volume, thereby promoting price discovery and contributing to a deeper and more liquid market to the benefit of all market participants.

Currently, under Liquidity Provision Tier 2, the Exchange provides an

<sup>10</sup> As set forth on the Fee Schedule, "ADAV" means the average daily added volume calculated as the number of shares added per day, which is calculated on a monthly basis.

<sup>11</sup> As set forth on the Fee Schedule, "TCV" means total consolidated volume calculated as the volume reported by all exchanges and trade reporting facilities to a consolidated transaction reporting plan for the month for which the fees apply.

<sup>12</sup> As set forth on the Fee Schedule, "Displayed ADAV" means ADAV with respect to displayed orders.

<sup>13</sup> As set forth on the Fee Schedule, "Step-Up Displayed ADAV" means Displayed ADAV in the relevant baseline month subtracted from current Displayed ADAV.

<sup>14</sup> The pricing for Liquidity Provision Tier 4 is referred to by the Exchange on the Fee Schedule under the description "Added displayed volume, Liquidity Provision Tier 4" with a Fee Code of "B4", "D4" or "J4", as applicable, to be provided by the Exchange on the monthly invoices provided to Members. The Exchange notes that because the determination of whether a Member qualifies for a certain pricing tier for a particular month will not be made until after the month-end, the Exchange will provide the Fee Codes otherwise applicable to such transactions on the execution reports provided to Members during the month and will only designate the Fee Codes applicable to the achieved pricing tier on the monthly invoices, which are provided after such determination has been made, as the Exchange does for its tier-based pricing today. The Exchange also notes that the pricing for Liquidity Provision Tier 5 is referred to by the Exchange on the Fee Schedule under the description "Added displayed volume, Liquidity Provision Tier 5" with a Fee Code of "B5", "D5" or "J5", as applicable, to be provided by the Exchange on the monthly invoices provided to Members.

enhanced rebate of \$0.0032 per share for executions of Added Displayed Volume for Members that qualify for such tier by achieving an ADAV that is equal to or greater than 0.20% of the TCV. Now, the Exchange proposes to modify the required criteria such that a Member would now qualify for such tier by achieving one of the following two alternative criteria: (1) an ADAV that is equal to or greater than 0.20% of the TCV; or (2) an ADAV that is equal to or greater than 15,000,000 shares and a Step-Up ADAV from October 2022 that is equal to or greater than 0.10% of the Member's October 2022 ADAV. Thus, such proposed change would keep the existing criteria intact and add an alternative criteria that includes an overall ADAV threshold and a Step-Up ADAV threshold, which are designed to encourage the submission of additional order flow that adds liquidity to the Exchange. The Exchange notes that, as the proposed change to the required criteria under Liquidity Provision Tier 2 simply provides an alternative criteria and does not change the existing criteria, the Exchange believes that such change would make the tier easier for Members to achieve, and, in turn, while the Exchange has no way of predicting with certainty how the proposed new criteria will impact Member activity, the Exchange expects that more Members will strive to qualify for such tier than currently do, resulting in the submission of additional order flow to the Exchange. The Exchange is not proposing to change the rebate provided for executions of Added Displayed Volume under Liquidity Provision Tier 2.

#### Liquidity Removal Tier 1

The Exchange currently charges a standard fee of \$0.0030 per share for executions of orders in securities priced at or above \$1.00 per share that remove liquidity from the Exchange (such orders, "Removed Volume"). The Exchange also currently offers Liquidity Removal Tier 1 under which qualifying Members are charged a discounted fee of \$0.0029 per share for executions of Removed Volume by achieving one of the following two alternative criteria: (1) an ADV<sup>15</sup> that is equal to or greater than 0.45% of the TCV and an ADAV that is equal to or greater than 0.20% of the TCV; or (2) an ADV that is equal to or greater than 1.00% of the TCV.

Now, the Exchange proposes to increase the fee charged for executions

<sup>15</sup> As set forth on the Fee Schedule, "ADV" means average daily volume calculated as the number of shares added or removed, combined, per day, which is calculated on a monthly basis.

of Removed Volume under Liquidity Removal Tier 1 to \$0.00295 per share, and to modify the required criteria such that a Member would now qualify for such tier by achieving one of the following two alternative criteria: (1) an ADV that is equal to or greater than 0.50% of the TCV and a Remove ADAV<sup>16</sup> that is equal to or greater than 0.25% of the TCV; or (2) an ADV that is equal to or greater than 1.00% of the TCV.<sup>17</sup> Thus, the proposed change to the required criteria would increase the ADV threshold by 0.05% (*i.e.*, from 0.45% to 0.50%) of the TCV and replace the ADAV threshold with a Remove ADV threshold in the first of such alternative criteria, and it would keep the second of such alternative criteria intact without any change. The proposed changes to increase the ADV threshold and include a Remove ADV threshold in the first of such alternative criteria are designed to encourage Members to maintain or increase their order flow, including in the form of orders that remove liquidity, to the Exchange in order to qualify for the proposed discounted fee for executions of Removed Volume. While the Exchange's overall pricing philosophy generally encourages adding liquidity over removing liquidity, the Exchange believes that providing alternative criteria that are based on different types of volume that Members may choose to achieve, such as the proposed new criteria which includes a Remove ADV threshold, contributes to a more robust and well-balanced market ecosystem on the Exchange to the benefit of all Members.

The purpose of increasing the fee charged for executions of Removed Volume under such tier as proposed (*i.e.*, by \$0.00005 per share), which the Exchange believes is a modest increase and remains commensurate with the proposed new required criteria, is for business and competitive reasons, as the Exchange believes that increasing such

<sup>16</sup> As set forth on the Fee Schedule, "Remove ADV" means ADV with respect to orders that remove liquidity.

<sup>17</sup> The pricing for Liquidity Removal Tier 1 is referred to by the Exchange on the Fee Schedule under the existing description "Removed volume from MEMX Book, Liquidity Removal Tier 1" with a Fee Code of "R1" to be provided by the Exchange on the monthly invoices provided to Members. The Exchange notes that because the determination of whether a Member qualifies for a certain pricing tier for a particular month will not be made until after the month-end, the Exchange will provide the Fee Codes otherwise applicable to such transactions on the execution reports provided to Members during the month and will only designate the Fee Codes applicable to the achieved pricing tier on the monthly invoices, which are provided after such determination has been made, as the Exchange does for its tier-based pricing today.

fee would generate additional revenue to offset some of the costs associated with the Exchange's current transaction pricing structure, which provides various rebates for liquidity-adding orders, and the Exchange's operations generally.

The Exchange notes that it is also proposing to change the fee charged under Liquidity Removal Tier 1 for executions of Removed Sub-Dollar Volume (as defined below), as further described below.

#### Midpoint Peg IOC/FOK Orders

As noted above, the Exchange currently charges a standard fee of \$0.0030 per share for executions of Removed Volume. The Exchange also currently charges a discounted fee of \$0.0026 per share for executions of Midpoint Peg Orders in securities priced at or above \$1.00 per share with a TIF instruction of IOC or FOK that execute at the midpoint of the NBBO and remove liquidity from the Exchange upon entry (such orders, "Midpoint Peg IOC/FOK Orders"). Charging a discounted fee for executions of Midpoint Peg IOC/FOK Orders is intended to incentivize the submission of such orders and, in turn, attract additional contra-side orders designed to execute at the midpoint to be posted on the Exchange, and is therefore designed to deepen liquidity and increase execution opportunities at the midpoint on the Exchange, thereby improving the Exchange's market quality to the benefit of all Members and enhancing its attractiveness as a trading venue.

Now, the Exchange proposes to increase the fee charged for executions of Midpoint Peg IOC/FOK Orders to \$0.0027 per share.<sup>18</sup> The purpose of increasing the fee for executions of Midpoint Peg IOC/FOK Orders as proposed (*i.e.*, by \$0.0001 per share), which the Exchange believes is a modest increase and remains commensurate with the market quality benefits that such discounted fee is intended to achieve, is for business and competitive reasons, as the Exchange believes that increasing such fee would generate additional revenue to offset some of the costs associated with the Exchange's current transaction pricing structure, which provides various rebates for liquidity-adding orders, and the Exchange's operations generally.

<sup>18</sup> The pricing for executions of Midpoint Peg IOC/FOK Orders is referred to by the Exchange on the Fee Schedule under the description "Removed volume from MEMX Book, Midpoint Peg (IOC/FOK)" with a Fee Code of "Rm" assigned by the Exchange.

#### Pricing for Certain Sub-Dollar Volume

Currently, the Exchange charges a fee of 0.25% of the total dollar value of the transaction for executions of Sub-Dollar Volume that remove liquidity from the Exchange (such orders, "Removed Sub-Dollar Volume"). This fee is applicable to all executions of Removed Sub-Dollar Volume (except Retail Orders with a TIF of Day, GTT or RHO that remove liquidity from the Exchange upon entry<sup>19</sup>) and is applicable to all Members (including those that qualify for any of the Exchange's volume tiers). Now, the Exchange proposes to increase the fee charged to all Members (including those that qualify for any of the Exchange's volume tiers) for all executions of Removed Sub-Dollar Volume (except Retail Orders with a TIF of Day, GTT or RHO that remove liquidity from the Exchange upon entry) to 0.28% of the total dollar value of the transaction. The purpose of increasing the fee for such executions of Removed Sub-Dollar Volume is for business and competitive reasons, as the Exchange believes that increasing such fee would generate additional revenue to offset some of the costs associated with the Exchange's current transaction pricing structure, which provides various rebates for liquidity-adding orders, and the Exchange's operations generally. The Exchange notes that despite the increase proposed herein, which the Exchange believes is modest, the proposed fee for such executions of Removed Sub-Dollar Volume (*i.e.*, 0.28% of the total dollar value of the transaction) remains lower than, and competitive with, the standard fee charged by other equity exchanges for executions of orders in securities priced below \$1.00 per share that remove liquidity.<sup>20</sup>

Currently, the Exchange provides a rebate of 0.10% of the total dollar value of the transaction for executions of Sub-

<sup>19</sup> Such orders have different pricing that is referred to by the Exchange on the Fee Schedule under the description "Removed volume from MEMX Book upon entry, Retail Order (Day/GTT/RHO)" with a Fee Code of "Rr0" assigned by the Exchange.

<sup>20</sup> See, e.g., the Cboe BZX Exchange, Inc. ("Cboe BZX") equities trading fee schedule on its public website (available at [https://www.cboe.com/us/equities/membership/fee\\_schedule/bzx/](https://www.cboe.com/us/equities/membership/fee_schedule/bzx/)), which reflects a standard fee of 0.30% of the total dollar value of the transaction for executions of orders in securities priced below \$1.00 per share that remove liquidity from Cboe BZX; the Cboe EDGX Exchange, Inc. ("Cboe EDGX") equities trading fee schedule on its public website (available at [https://www.cboe.com/us/equities/membership/fee\\_schedule/edgx/](https://www.cboe.com/us/equities/membership/fee_schedule/edgx/)), which reflects a standard fee of 0.30% of the total dollar value of the transaction for executions of orders in securities priced below \$1.00 per share that remove liquidity from Cboe EDGX.

Dollar Volume that add displayed liquidity to the Exchange (such orders, "Added Displayed Sub-Dollar Volume"). This fee is applicable to all executions of Added Displayed Sub-Dollar Volume and is applicable to all Members (including those that qualify for any of the Exchange's volume tiers). Now, the Exchange proposes to reduce the rebate provided to all Members (including those that qualify for any of the Exchange's volume tiers) for all executions of Added Displayed Sub-Dollar Volume to 0.075% of the total dollar value of the transaction. The purpose of reducing the rebate for executions of Added Displayed Sub-Dollar Volume is for business and competitive reasons, as the Exchange believes that reducing such rebate would decrease the Exchange's expenditures with respect to its transaction pricing in a manner that is still consistent with the Exchange's overall pricing philosophy of encouraging added displayed liquidity. The Exchange notes that despite the reduction proposed herein, which the Exchange believes is modest, the proposed rebate for executions of Added Displayed Sub-Dollar Volume (*i.e.*, 0.075% of the total dollar value of the transaction) remains higher than, and competitive with, the rebates offered by other equity exchanges for executions of orders in securities priced below \$1.00 per share that add displayed liquidity.<sup>21</sup>

#### 2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,<sup>22</sup> in general, and with Sections 6(b)(4) and 6(b)(5) of the Act,<sup>23</sup> in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

As discussed above, the Exchange operates in a highly fragmented and competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient, and the Exchange represents only a small percentage of

<sup>21</sup> See, e.g., the Cboe BZX equities trading fee schedule on its public website (available at [https://www.cboe.com/us/equities/membership/fee\\_schedule/bzx/](https://www.cboe.com/us/equities/membership/fee_schedule/bzx/)), which reflects that no rebate is provided (*i.e.*, a free execution) for executions of orders in securities priced below \$1.00 per share that add displayed liquidity to Cboe BZX.

<sup>22</sup> 15 U.S.C. 78f.

<sup>23</sup> 15 U.S.C. 78f(b)(4) and (5).

the overall market. The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and also recognized that current regulation of the market system “has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.”<sup>24</sup>

The Exchange believes that the ever-shifting market share among the exchanges from month to month demonstrates that market participants can shift order flow or discontinue to reduce use of certain categories of products, in response to new or different pricing structures being introduced into the market. Accordingly, competitive forces constrain the Exchange’s transaction fees and rebates, including with respect to Added Displayed Volume, Removed Volume and Sub-Dollar Volume, and market participants can readily trade on competing venues if they deem pricing levels at those other venues to be more favorable. The Exchange believes the proposal reflects a reasonable and competitive pricing structure designed to incentivize market participants to direct additional order flow, including displayed, liquidity-adding and/or liquidity-removing orders, to the Exchange, which the Exchange believes would promote price discovery and enhance liquidity and market quality on the Exchange to the benefit of all Members and market participants. While the Exchange has proposed increasing its fees for certain executions of Removed Volume and Removed Sub-Dollar Volume, and reducing its rebate for executions of Added Displayed Sub-Dollar Volume, as further discussed below, the Exchange believes that each of such changes represents a modest increase (decrease) from the current fee (rebate) applicable to such executions.

The Exchange notes that volume-based incentives and discounts have been widely adopted by exchanges, including the Exchange, and are reasonable, equitable and not unfairly discriminatory because they are open to all members on an equal basis and provide additional benefits or discounts that are reasonably related to the value to an exchange’s market quality associated with higher levels of market activity, such as higher levels of

liquidity provision and/or growth patterns, and the introduction of higher volumes of orders into the price and volume discovery process. The Exchange believes that the proposed new Liquidity Provision Tier 4, the Liquidity Provision Tier 2 as modified by the proposed change to the required criteria under such tier, and the Liquidity Removal Tier 1 as modified by the proposed changes to the fee for executions of Removed Volume and the required criteria under such tier, are reasonable, equitable and not unfairly discriminatory for these same reasons, as such tiers would provide Members with an incremental incentive to achieve certain volume thresholds on the Exchange, are available to all Members on an equal basis, and, as described above, are designed to encourage Members to maintain or increase their order flow, including in the form of displayed, liquidity-adding and/or liquidity removing orders, to the Exchange in order to qualify for an enhanced rebate for executions of Added Displayed Volume or a discounted fee for executions of Removed Volume, as applicable, thereby contributing to a deeper, more liquid and well balanced market ecosystem on the Exchange to the benefit of all Members and market participants. The Exchange also believes that such tiers reflect a reasonable and equitable allocation of fees and rebates, as the Exchange believes that the enhanced rebate for executions of Added Displayed Volume under the proposed new Liquidity Provision Tier 4 and the modified Liquidity Provision Tier 2, as well as the discounted fee for executions of Removed Volume under the modified Liquidity Removal Tier 1, each remains commensurate with the corresponding required criteria under each such tier and is reasonably related to the market quality benefits that each such tier is designed to achieve, as described above.

The Exchange also believes the proposed increased fee for executions of Midpoint Peg IOC/FOK Orders is reasonable, equitable and not unfairly discriminatory because the Exchange believes that the increase (*i.e.*, \$0.0001 per share) is modest and that the fee remains commensurate with the market quality benefits that such discounted fee is intended to achieve, as described above, and such fee would continue to be charged uniformly to all executions of such orders for all Members.

Regarding the proposed changes to Sub-Dollar Volume pricing, the Exchange believes the proposed changes to increase the fee for executions of Removed Sub-Dollar Volume (except

Retail Orders with a TIF of Day, GTT or RHO that remove liquidity from the Exchange upon entry) and reduce the rebate for executions of Added Displayed Sub-Dollar Volume are reasonable because, as described above, the Exchange believes that each of such changes represents a modest increase (decrease) from the current fee (rebate) applicable to such executions and that such changes would decrease the Exchange’s expenditures and generate additional revenue, as applicable, with respect to its transaction pricing in a manner that is still consistent with the Exchange’s overall pricing philosophy of encouraging added displayed liquidity. The Exchange also believes such proposed changes are reasonable, as the proposed fee for executions of Removed Sub-Dollar Volume (except Retail Orders with a TIF of Day, GTT or RHO that remove liquidity from the Exchange upon entry) and the proposed rebate for executions of Added Displayed Sub-Dollar Volume are competitive with the standard fees and rebates, as applicable, assessed for such executions on other equity exchanges.<sup>25</sup> Additionally, the Exchange believes that the proposed changes to these rates represent an equitable allocation of fees and are not unfairly discriminatory because such rates will continue to apply equally to all Members (including those that qualify for any of the Exchange’s volume tiers) for all such executions.

For the reasons discussed above, the Exchange submits that the proposal satisfies the requirements of Sections 6(b)(4) and 6(b)(5) of the Act<sup>26</sup> in that it provides for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities and is not designed to unfairly discriminate between customers, issuers, brokers, or dealers. As described more fully below in the Exchange’s statement regarding the burden on competition, the Exchange believes that its transaction pricing is subject to significant competitive forces, and that the proposed fees and rebates described herein are appropriate to address such forces.

#### *B. Self-Regulatory Organization’s Statement on Burden on Competition*

The Exchange does not believe that the proposal will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Instead, as discussed above, the proposal is

<sup>24</sup> Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005).

<sup>25</sup> See *supra* notes 20–21.

<sup>26</sup> 15 U.S.C. 78f(b)(4) and (5).

intended to incentivize market participants to direct additional order flow, including displayed, liquidity-adding and liquidity-removing orders, to the Exchange, thereby enhancing liquidity and market quality on the Exchange to the benefit of all Members and market participants, as well as to generate additional revenue and decrease the Exchange's expenditures with respect to its transaction pricing in a manner that is still consistent with the Exchange's overall pricing philosophy of encouraging added displayed liquidity. As a result, the Exchange believes the proposal would enhance its competitiveness as a market that attracts actionable orders, thereby making it a more desirable destination venue for its customers. For these reasons, the Exchange believes that the proposal furthers the Commission's goal in adopting Regulation NMS of fostering competition among orders, which promotes "more efficient pricing of individual stocks for all types of orders, large and small."<sup>27</sup>

#### Intramarket Competition

As discussed above, the Exchange believes that the proposal would incentivize Members to submit additional order flow, including displayed, liquidity-adding and liquidity-removing orders, to the Exchange, thereby enhancing liquidity and market quality on the Exchange to the benefit of all Members, as well as enhancing the attractiveness of the Exchange as a trading venue, which the Exchange believes, in turn, would continue to encourage market participants to direct additional order flow to the Exchange. Greater liquidity benefits all Members by providing more trading opportunities and encourages Members to send additional orders to the Exchange, thereby contributing to robust levels of liquidity, which benefits all market participants. The opportunity to qualify for the proposed new Liquidity Provision Tier 4, and thus receive the proposed enhanced rebate for executions of Added Displayed Volume under such tier, would be available to all Members that meet the associated volume requirements in any month. Similarly, the opportunity to qualify for the proposed new alternative criteria under Liquidity Provision Tier 2 and the proposed modified criteria under Liquidity Removal Tier 1, and thus receive the enhanced rebate for executions of Added Displayed Volume or be charged the discounted fee for executions of Removed Volume, respectively, would continue to be

available to all Members that meet the associated volume requirements in any month. Additionally, as described above, the Exchange believes that the proposed changes to the fee for executions of Midpoint Peg IOC/FOK Orders, the fee for executions of Removed Sub-Dollar Volume (except Retail Orders with a TIF of Day, GTT or RHO that remove liquidity from the Exchange upon entry) and the rebate for executions of Added Displayed Sub-Dollar Volume are modest, and such fees and rebate will continue to apply to all such executions for all Members as they do today. For the foregoing reasons, the Exchange believes the proposed changes would not impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act.

#### Intermarket Competition

As noted above, the Exchange operates in a highly competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. Members have numerous alternative venues that they may participate on and direct their order flow to, including 15 other equities exchanges and numerous alternative trading systems and other off-exchange venues. As noted above, no single registered equities exchange currently has more than approximately 16% of the total market share of executed volume of equities trading. Thus, in such a low-concentrated and highly competitive market, no single equities exchange possesses significant pricing power in the execution of order flow. Moreover, the Exchange believes that the ever-shifting market share among the exchanges from month to month demonstrates that market participants can shift order flow or discontinue to reduce use of certain categories of products, in response to new or different pricing structures being introduced into the market. Accordingly, competitive forces constrain the Exchange's transaction fees and rebates, including with respect to Added Displayed Volume, Removed Volume and Sub-Dollar Volume, and market participants can readily choose to send their orders to other exchange and off-exchange venues if they deem fee levels at those other venues to be more favorable. As described above, the proposed changes represent a competitive proposal through which the Exchange is seeking to decrease the Exchange's expenditures and generate additional revenue with respect to its transaction pricing and to encourage the

submission of additional order flow to the Exchange through volume-based tiers, which have been widely adopted by exchanges, including the Exchange. Accordingly, the Exchange believes the proposal would not burden, but rather promote, intermarket competition by enabling it to better compete with other exchanges that offer similar pricing incentives to market participants.

Additionally, the Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system "has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies."<sup>28</sup> The fact that this market is competitive has also long been recognized by the courts. In *NetCoalition v. SEC*, the D.C. Circuit stated as follows: "[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'. . . ."<sup>29</sup> Accordingly, the Exchange does not believe its proposed pricing changes impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

#### C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

#### III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section

<sup>28</sup> See *supra* note 24.

<sup>29</sup> *NetCoalition v. SEC*, 615 F.3d 525, 539 (D.C. Cir. 2010) (quoting Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770, 74782–83 (December 9, 2008) (SR–NYSE–2006–21)).

<sup>27</sup> See *supra* note 24.

19(b)(3)(A)(ii) of the Act<sup>30</sup> and Rule 19b-4(f)(2)<sup>31</sup> thereunder.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

#### IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

##### *Electronic Comments*

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include File Number SR-MEMX-2022-30 on the subject line.

##### *Paper Comments*

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090. All submissions should refer to File Number SR-MEMX-2022-30. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the

filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-MEMX-2022-30 and should be submitted on or before December 9, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>32</sup>

#### SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270-340, OMB Control No.3235-0375]

#### Proposed Collection; Comment Request; Extension: Schedule 13E-4F

*Upon Written Request Copies Available From:* Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549-2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission ("Commission") is soliciting comments on the collection of information summarized below. The Commission plans to submit this existing collection of information to the Office of Management and Budget for extension and approval.

Schedule 13E-4F (17 CFR 240.13e-102) may be used by an issuer that is incorporated or organized under the laws of Canada to make a cash tender or exchange offer for the issuer's own securities if less than 40 percent of the class of such issuer's securities outstanding that are the subject of the tender offer is held by U.S. holders. The information collected must be filed with the Commission and is publicly available. We estimate that it takes approximately 2 hours per response to prepare Schedule 13E-4F and that the information is filed by approximately 3 respondents for a total annual reporting burden of 6 hours (2 hours per response × 3 responses).

*Written comments are invited on:* (a) whether this proposed collection of

information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden imposed by the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication by January 17, 2023.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

Please direct your written comment to David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549 or send an email to: [PRA\\_Mailbox@sec.gov](mailto:PRA_Mailbox@sec.gov).

Dated: November 14, 2022.

comments on the proposed rule change from interested persons.

## I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to establish initial and annual fees for the listing of Exchange Traded Products on the Exchange. The proposed rule change is available on the Exchange's website at [www.nyse.com](http://www.nyse.com), at the principal office of the Exchange, and at the Commission's Public Reference Room.

## II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

### A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

#### 1. Purpose

The Exchange proposes to establish initial and annual fees for the listing of Exchange Traded Products ("ETPs")<sup>4</sup> on the Exchange by adopting a new Section 902.12 to the NYSE Listed Company Manual (the "Manual").

The proposed changes respond to the current extremely competitive environment for ETP listings in which issuers can readily favor competing venues or transfer their listings if they deem fee levels at a particular venue to be excessive, or discount opportunities available at other venues to be more favorable. The proposed changes are designed to establish a fee structure for the listing of ETPs on the Exchange that would incentivize issuers to list new products and transfer existing products as well as to maintain listings on the Exchange, which the Exchange believes will enhance competition both among issuers and listing venues, to the benefit of investors.

<sup>4</sup> See NYSE Rule 1.1(l). As discussed below, proposed Section 902.12 would incorporate the definition of ETP so issuers can easily identify the class of securities that would be subject to the initial and annual listing fees.

#### Proposed Rule Change

As proposed, new Section 902.12 of the Manual would set forth initial listing and annual listing fees for listed ETPs. Proposed Section 902.12 would be titled "Listing Fees for Exchange Traded Products."<sup>5</sup> Under the proposed heading, the Exchange would include the following text (new text *italicized*):

The Listing Fees and Annual Fees set out in this section apply to Exchange Traded Products as defined in NYSE Rule 1.1(l), which defines an "Exchange Traded Product" as a security that meets the definition of "derivative securities product" in Rule 19b-4(e) under the Securities and Exchange Act of 1934 (the "Act").

Below this proposed text, a new heading titled "Initial Listing Fees" would be followed by a chart beneath setting forth proposed initial listing fees of \$20,000 (for up to and including 10 million shares), \$30,000 (for over 10 million up to and including 20 million shares) or \$40,000 (for over 20 million shares). As set forth in proposed footnote \*, the Exchange would waive the initial listing fees for issuers that transfer their listings from any other national securities exchange. The proposed listing fee waiver would apply to all class of securities of an ETP.

Further, the Exchange proposes a technical original listing fee of \$2,500 per application fixed charge, which may include multiple issues of securities. As explained in proposed footnote \*\*, a Technical Original Listing would occur as a result of a change in state of incorporation, reincorporation under the laws of same state, reverse stock split, recapitalization, creation of a holding company or new company by operation of law or through an exchange offer, or similar events affecting the nature of a listed security. As further explained, the proposed fee would apply if the change in the company's status is technical in nature and the shareholders of the original company receive or retain a share-for-share interest in the new company without any change in their equity position or rights. The proposed fee and text is based on the technical original listing fee applicable to ETPs listed on the Exchange's affiliate NYSE Arca, Inc. ("NYSE Arca").<sup>6</sup>

Finally, under a second new heading titled "Annual Listing Fees," the Exchange proposes that ETPs would be

<sup>5</sup> The Exchange also proposes a conforming change to Section 902.02 (General Information on Fees) to add ETPs to the list of securities therein.

<sup>6</sup> See NYSE Arca Schedule of Fees and Charges for Exchange Services, available at [https://www.nyse.com/publicdocs/nyse/markets/nyse-arca/NYSE\\_Arca\\_Listing\\_Fee\\_Schedule.pdf](https://www.nyse.com/publicdocs/nyse/markets/nyse-arca/NYSE_Arca_Listing_Fee_Schedule.pdf).

charged annual listing fees at a rate of \$0.001025 per share, with a minimum fee of \$25,000. As set forth in proposed footnote \*\*\*, issuers transferring their listings from another national securities exchange would not be required to pay Annual Fees for the remainder of the calendar year in which the transfer occurs. The proposed waiver of Annual Fees would apply to all classes of securities.

The proposed fees for listed ETPs are the same as the fees currently applicable to listed Closed-End Funds set forth in Section 902.04 of the Manual.<sup>7</sup> Given the structural similarities between Closed-End Funds and ETPs, the Exchange believes that the anticipated costs associated with the listing and regulating ETPs, including costs related to issuer services, listing administration, product development and regulatory oversight, would be similar to Closed-End Funds. Given this correlation, the Exchange believes that applying the same fees to listed ETPs would be reasonable.

Each of the proposed changes described above are not otherwise intended to address other issues, and the Exchange is not aware of any significant problems that market participants would have in complying with the proposed changes

#### 2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with section 6(b) of the Act,<sup>8</sup> in general, and furthers the objectives of section 6(b)(4)<sup>9</sup> of the Act, in particular, in that it is designed to provide for the equitable allocation of reasonable dues, fees, and other charges. The Exchange also believes that the proposed rule change is consistent with section 6(b)(5) of the Act,<sup>10</sup> in that it is designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the

<sup>7</sup> Under Section 902.04, a Closed-End Fund is charged initial listing fees when it first lists a class of common stock according to a tiered schedule. Under this tiered schedule, a Closed-End Fund pays \$20,000 (for up to and including 10 million shares), \$30,000 (for over 10 million up to and including 20 million shares) or \$40,000 (for over 20 million shares). Additionally, under Section 902.04, Closed-End Funds are subject to annual fees at a rate of \$0.001025 per share, subject to a \$25,000 minimum fee. In addition, a \$2,500 fee applies to applications for changes that involve modifications to Exchange records, for example, changes of name, par value, title of security or designation.

<sup>8</sup> 15 U.S.C. 78f(b).

<sup>9</sup> 15 U.S.C. 78f(b)(4).

<sup>10</sup> 15 U.S.C. 78f(b)(5).

mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

#### The Proposed Change Is Reasonable

The Exchange operates in a highly competitive marketplace for the listing of the various categories of securities, including the ETPs affected by the proposed fees. The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS,<sup>11</sup> the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system “has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.”<sup>12</sup>

The Exchange believes that the ever-shifting market share among the exchanges with respect to new listings and the transfer of existing listings between competitor exchanges demonstrates that issuers can choose different listing markets in response to fee changes. Accordingly, competitive forces constrain exchange listing fees. Stated otherwise, changes to exchange listing fees can have a direct effect on the ability of an exchange to compete for new listings and retain existing listings.

Given this competitive environment, the proposal represents a reasonable attempt to establish pricing for ETPs on the Exchange. As noted, ETPs are structurally similar to Closed-End Funds and the Exchange anticipates devoting substantially similar resources to the listing and regulation of ETPs. Therefore, the Exchange believes that it is reasonable and represents an equitable allocation of its fees among market participants to apply the same initial and annual fees to issuers of listed ETPs as the Exchange currently charges issuers of Closed-End Funds.

Further, the Exchange believes it is reasonable to not charge a listing fee upon listing and to not charge an annual fee for the remainder of the calendar year after an ETP transfers to the Exchange because such a transferring ETP would have already paid listing and/or annual listing fees to the

predecessor national securities exchange and may incur multiple listing and/or annual fees in the same year in connection with a listing transfer, which may operate as a disincentive to transferring a listing to the Exchange that the issuer has determined is preferable based on the issuer's assessment of the Exchange's services, value and market quality. Due to the very limited anticipated loss of revenue associated with the proposed waiver, the Exchange does not expect the proposed fee waiver to affect its ability to devote the same level of resources to its oversight of its listed issuers that benefit from the waiver as it does for other issuers or, more generally, impact its resource commitment to its regulatory oversight of the listing process or its regulatory programs.

#### The Proposal is an Equitable Allocation of Fees

The Exchange believes its proposal equitably allocates its fees among its market participants. In the prevailing competitive environment, issuers can readily favor competing venues or transfer listings if they deem fee levels at a particular venue to be excessive, or discount opportunities available at other venues to be more favorable.

The proposed listing and annual fees for ETPs are equitable because the proposed increased annual fees would apply uniformly to all issuers. Moreover, the proposed fees would be equitably allocated among issuers because issuers would qualify for the listed fee based on issuing ETPs and for the annual fee based on the number of shares outstanding and under criteria applied uniformly to all such issuers. The proposal neither targets nor will it have a disparate impact on any particular category of market participant. The proposed annual fees would be applicable to all existing and potential ETP issuers uniformly and in equal measure.

In addition, the Exchange believes the proposed waiver of listing and annual fees for ETPs transferring from another national securities exchange represents an equitable allocation of fees because the proposed waivers would apply to all issuers that transfer ETP listings to the Exchange on an equal basis and would enable all issuers transferring ETPs from any other national securities exchange to benefit from the same waivers with respect to listing and/or annual fees for the specified time period. The Exchange believes that the proposed waivers would therefore equitably allocate fees among issuers transferring ETP listings to the Exchange.

#### The Proposal Is Not Unfairly Discriminatory

The Exchange believes that the proposal is not unfairly discriminatory. In the prevailing competitive environment, issuers are free to list elsewhere if they believe that alternative venues offer them better value.

The Exchange believes that the proposal is not unfairly discriminatory because the same fee schedule will apply to all issuers of ETPs listed on the Exchange.

In addition, Exchange Listed Products have substantial structural similarities to Closed-End Funds and the Exchange believes it is therefore it is not unfairly discriminatory to offer the same listing fees for ETPs as are currently applicable to Closed-End Fund products. Conversely, ETPs are not similar to any other class of securities listed on the Exchange, so the Exchange does not believe it is unfairly discriminatory to charge different fees for the listed ETPs than it does for any other class of listed securities other than Closed-End Funds.

In addition, the Exchange believes that the proposed waiver of listing and annual fees for ETPs transferring from another national securities exchange is not unfairly discriminatory because the proposed amendment would enable all issuers transferring ETPs from any other national securities exchange to benefit from the same waivers with respect to fees for the specified time period. The proposed waivers would apply to all issuers of securities that transfer ETP listings to the Exchange. Therefore, the Exchange believes there would be no unfair discrimination against issuers of securities transferring ETP listings to the Exchange. Further, the Exchange believes that the proposed waivers are not unfairly discriminatory with respect to issuers that are already listed on the Exchange because, as noted above, issuers transferring ETPs from other markets may already have paid listing and/or annual fees at their predecessor exchange and may incur multiple listing and/or annual fees in the same year in connection with a listing transfer, which may operate as a disincentive to transferring an ETP listing to the Exchange. As also noted, due to the very limited anticipated loss of revenue associated with the proposed waiver, the Exchange does not expect the proposed fee waiver to affect its ability to devote the same level of resources to its oversight of its listed issues that benefit from the waiver as it does for other issuers or, more generally, impact its resource commitment to its regulatory oversight of the listing process or its regulatory programs.

<sup>11</sup> See Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37495, 37499 (June 29, 2005) (S7-10-04) (Final Rule) (“Regulation NMS Adopting Release”).

<sup>12</sup> See Regulation NMS Adopting Release, 70 FR at 37499.

Finally, the Exchange believes that it is subject to significant competitive forces, as described below in the Exchange's statement regarding the burden on competition.

For the foregoing reasons, the Exchange believes that the proposal is consistent with the Act.

#### *B. Self-Regulatory Organization's Statement on Burden on Competition*

In accordance with Section 6(b)(8) of the Act,<sup>13</sup> the Exchange believes that the proposed rule change would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is designed to ensure that the fees charged by the Exchange accurately reflect the services provided and benefits realized by listed companies. The market for listing services is extremely competitive. Each listing exchange has a different fee schedule that applies to issuers seeking to list securities on its exchange. Issuers have the option to list their securities on these alternative venues based on the fees charged and the value provided by each listing. Because issuers have a choice to list their securities on a different national securities exchange, the Exchange does not believe that the proposed fee changes impose a burden on competition.

#### *Intramarket Competition*

The proposed changes are designed to attract listings to the Exchange by establishing listing and annual fees for an ETPs listed under a new rule. The Exchange believes that the proposed changes would incentivize issuers to develop and list new products, transfer existing products to the Exchange, and maintain listings on the Exchange. The proposed fees would be available to all issuers, and, as such, the proposed change would not impose a disparate burden on competition among market participants on the Exchange.

#### *Intermarket Competition*

The Exchange operates in a highly competitive market in which issuers can readily choose to list new securities on other exchanges and transfer listings to other exchanges if they deem fee levels at those other venues to be more favorable. Because competitors are free to modify their own fees in response, and because issuers may change their chosen listing venue, the Exchange does not believe its proposed fee change can impose any burden on intermarket competition. As such, the proposal is a competitive proposal designed to

enhance pricing competition among listing venues and implement pricing for ETPs to reflect the revenue and expenses associated with listing on the Exchange.

#### *C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others*

No written comments were solicited or received with respect to the proposed rule change.

### **III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A)<sup>14</sup> of the Act and subparagraph (f)(2) of Rule 19b-4<sup>15</sup> thereunder, because it establishes a due, fee, or other charge imposed by the Exchange.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under section 19(b)(2)(B)<sup>16</sup> of the Act to determine whether the proposed rule change should be approved or disapproved.

### **IV. Solicitation of Comments**

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

#### *Electronic Comments*

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include File Number SR-NYSE-2022-51 on the subject line.

#### *Paper Comments*

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090. All submissions should refer to File Number SR-NYSE-2022-51. This file number should be included on the

subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-NYSE-2022-51 and should be submitted on or before December 9, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>17</sup>

### **Proposed Collection; Comment Request; Extension: Rule 155**

*Upon Written Request Copies Available From:* Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549-2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission ("Commission") is soliciting comments on the collection of information

<sup>13</sup> See 15 U.S.C. 78f(b)(8).

<sup>14</sup> 15 U.S.C. 78s(b)(3)(A).

<sup>15</sup> 17 CFR 240.19b-4(f)(2).

<sup>16</sup> 15 U.S.C. 78s(b)(2)(B).

<sup>17</sup> 17 CFR 200.30-3(a)(12).

summarized below. The Commission plans to submit this existing collection of information to the Office of Management and Budget for extension and approval.

Rule 155 (17 CFR 230.155) under the Securities Act of 1933 (15 U.S.C. 77a *et seq.*) provides safe harbors for a registered offering of securities from integration in two circumstances: (1) a registered offering that follows an abandoned private offering; and (2) a private offering that follows a withdrawn registered offering. Each of the rule's safe harbors imposes conditions designed to assure that there is a clean break between the abandoned offering and the later offering. In each safe harbor, these conditions include specified disclosure designed to assure that investors understand this break as they consider an investment decision in the later offering. We estimate Rule 155 takes approximately 4 hours per response to prepare and is filed by approximately 600 respondents annually. We estimate that 50% of the 4 hours per response (2 hours per response) is prepared by the filer for a total annual reporting burden of 1,200 hours (2 hours per response × 600 responses).

Written comments are invited on: (a) whether this proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden imposed by the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication by January 17, 2023.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

Please direct your written comment to David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549 or send an email to: [PRA\\_Mailbox@sec.gov](mailto:PRA_Mailbox@sec.gov).

Dated: November 15, 2022.

## SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270-814, OMB Control No. 3235-0764]

### Submission for OMB Review; Comment Request; Extension: Rule 6c-11

*Upon Written Request, Copies Available From:* Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549-2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (the "Commission") has submitted to the Office of Management and Budget a request for extension of the previously approved collection of information discussed below.

Rule 6c-11 under the Investment Company Act of 1940 (the "Act") permits exchange-traded funds ("ETFs") that satisfy certain conditions to operate without first obtaining an exemptive order from the Commission. The rule was designed to create a consistent, transparent, and efficient regulatory framework for ETFs and facilitate greater competition and innovation among ETFs. Rule 6c-11 requires an ETF to disclose certain information on its website, to maintain certain records, and to adopt and implement written policies and procedures governing its constructions of baskets, as well as written policies and procedures that set forth detailed parameters for the construction and acceptance of custom baskets that are in the best interests of the ETF and its shareholders.

We estimate that the total hour burdens and time costs associated with rule 6c-11, including the burden associated with reviewing and updating website disclosures, recordkeeping, and reviewing and updating policies and procedures, will result in an average aggregate annual burden of 51,156 hours and an average aggregate time cost of \$1,248,912.

The requirements of this collection of information are mandatory. If information collected pursuant to rule 6c-11 is reviewed by the Commission's examination staff, it will be accorded the same level of confidentiality accorded to other responses provided to the Commission in the context of its examination and oversight program.

The public may view background documentation for this information collection at the following website: [www.reginfo.gov](http://www.reginfo.gov). Find this particular information collection by selecting

"Currently under 30-day Review—Open for Public Comments" or by using the search function. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice by December 19, 2022 to (i) [MBX.OMB.OIRA.SEC\\_desk\\_officer@omb.eop.gov](mailto:MBX.OMB.OIRA.SEC_desk_officer@omb.eop.gov) and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549, or by sending an email to: [PRA\\_Mailbox@sec.gov](mailto:PRA_Mailbox@sec.gov).

Dated: November 14, 2022.

**Sherry R. Haywood,**  
Assistant Secretary.

BILLING CODE 8011-01-P

## SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 34752; 812-15251]

### Trinity Capital Inc.

**AGENCY:** Securities and Exchange Commission ("Commission").

**ACTION:** Notice.

Notice of an application under section 6(c) of the Investment Company Act of 1940 (the "Act") for an exemption from section 12(d)(3) of the Act.

**SUMMARY OF APPLICATION:** Applicant requests an order to permit a business development company ("BDC") to organize, acquire, and wholly-own a portfolio company that intends to operate as an investment adviser registered under the Investment Advisers Act of 1940 (the "Advisers Act").

**APPLICANT:** Trinity Capital Inc. (the "Company" or "Applicant").

**FILING DATES:** The application was filed on August 5, 2021, and amended on August 5, 2022 and on November 7, 2022.

**HEARING OR NOTIFICATION OF HEARING:** An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing by emailing the Commission's Secretary at [Secretaries-Office@sec.gov](mailto:Secretaries-Office@sec.gov) and serving Applicant with a copy of the request, by email. Hearing requests should be received by the Commission by 5:30 p.m. on December 12, 2022 and should be accompanied by proof of service on the Applicant, in the form of an affidavit, or for lawyers, a certificate of service. Pursuant to rule 0-5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing

upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission's Secretary at *Secretarys-Office@sec.gov*.

**ADDRESSES:** The Commission: *Secretarys-Office@sec.gov*. Applicant: Steven L. Brown, Chairman and Chief Executive Officer, Trinity Capital Inc. *atsbrown@trincapinvestment.com*.

**FOR FURTHER INFORMATION CONTACT:** Harry Eisenstein, Senior Special Counsel, or Terri Jordan, Branch Chief, at (202) 551-6825 (Division of Investment Management, Chief Counsel's Office).

**SUPPLEMENTARY INFORMATION:** For Applicants' representations, legal analysis, and conditions, please refer to Applicants' second amended and restated application, dated November 7, 2022, which may be obtained via the Commission's website by searching for the file number at the top of this document, or for an Applicant using the Company search field, on the SEC's EDGAR system. The SEC's EDGAR system may be searched at <https://www.sec.gov/edgar/searchedgar/legacy/companysearch.html>. You may also call the SEC's Public Reference Room at (202) 551-8090.

*Applicant's Representations:*

1. The Company is a Maryland corporation that operates as an internally managed, closed-end, non-diversified management investment company. The Company has elected to be regulated as a BDC under the Act. The Company's investment objective is to generate current income and, to a lesser extent, capital appreciation through its investments. The Company seeks to achieve its investment objective by making investments consisting primarily of term loans and equipment financings and, to a lesser extent, working capital loans, equity and equity-related investments.

2. The Company intends to organize, acquire, and wholly own the securities of a portfolio company ("Adviser Sub"), which it expects to be formed as a limited liability company under the laws of the State of Delaware and will be a direct or an indirect wholly owned portfolio company of the Company.<sup>1</sup> As discussed below, the Adviser Sub intends to operate as an investment adviser registered with the Commission

under the Advisers Act.<sup>2</sup> The Company expects the Adviser Sub to receive fees in connection with its management of one or more privately-offered pooled investment vehicles, registered management investment companies, BDCs, and/or investment accounts (collectively, "Managed Accounts") similar to those received by comparable investment advisers.

3. Those Managed Accounts that are not registered managed investment companies or BDCs (such Managed Accounts, "Private Fund Managed Accounts") may make equity investments in growth stage portfolio companies via participation rights. Participation rights will generally be negotiated by the Company at the time the Company makes a debt investment in, or enters into an equipment financing agreement with, a growth stage portfolio company. Managed Accounts other than Private Fund Managed Accounts would not participate in such investments.

4. The Company is, and the Adviser Sub will be, directly or indirectly overseen by the Company's six member Board of Directors (the "Board"), of whom four are not considered "interested persons" of the Company within the meaning of section 2(a)(19) of the Act. In its capacity as the Board of the Advisers Sub's parent company, the Board will indirectly oversee the Adviser Sub.

5. The Company has elected to be treated for U.S. federal income tax purposes, and intends to qualify annually, as a regulated investment company ("RIC") under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"). Applicant states that as a RIC, the Company generally will not pay corporate-level federal income taxes on any net ordinary income or capital gains that it distributes to its stockholders as dividends in accordance with the timing requirements of the Code. To maintain its RIC status, the Company must, among other things, meet specified source-of-income requirements. Applicant states that the Company will satisfy the source-of-income test for purposes of qualifying as a RIC if it derives in each taxable year at least 90% of its gross income from dividends, interest, payments with respect to certain securities loans, gains from the sale of stock or other securities or currencies, net income from certain "qualified publicly traded partnerships"

(as defined in the Code) or other income derived with respect to its business of investing in such stock, securities or currencies (income from such sources, "Good RIC Income").

6. Applicant states that fee income received in connection with the provision of services to the Managed Accounts generally would not constitute Good RIC Income to the Company if it earned such income directly. Therefore, in order for the Company to maintain its RIC status while receiving the income from the provision of advisory services to the Managed Accounts, the Company believes that it is in the best interests of the Company and its shareholders for the Adviser Sub to provide advisory services to and to receive fees from the Managed Accounts instead of the Company providing such services and receiving such fees directly.

7. Under the Advisers Act, an investment adviser is generally required to be registered if it has \$100 million or more of regulatory assets under management.<sup>3</sup> An investment adviser may also register under the Advisers Act in compliance with rule 203A-2(c)(1) of the Advisers Act if it expects to be eligible to register as an adviser within 120 days of registering.

Applicant states that the Adviser Sub will register as an investment adviser under the Advisers Act in compliance with rule 203A-2(c)(1) of the Advisers Act after the relief requested in the application is granted to the Company because the Adviser Sub expects to have \$100 million or more of regulatory assets under management within 120 days of such registration.

*Applicable Law:*

1. Section 12(d)(3) makes it unlawful for any registered investment company, and any company controlled by a registered investment company, to acquire any interest in the business of a person who is either an investment adviser of an investment company or an investment adviser registered under the Advisers Act, unless (a) such person is a corporation all the outstanding securities of which are owned by one or more registered investment companies; and (b) such person is primarily engaged in the business of underwriting and distributing securities issued by other persons, selling securities issued

<sup>1</sup> Adviser Sub will be a wholly owned portfolio company of the Company and will also fall within the definition of "wholly owned subsidiary" for purposes of section 2(a)(43) of the Act.

<sup>2</sup> Adviser Sub has not yet been formed, but it does not intend to commence operations unless and until the relief requested in the application has been granted.

<sup>3</sup> In addition, an investment adviser to an investment company registered under the Act or to a company that has elected to be a BDC with \$25 million or more of regulatory assets under management would also be required to register under the Advisers Act. Applicants state that the Adviser Sub also may act as an investment adviser to an investment company registered under the Act or to a company that has elected to be a BDC with \$25 million or more of regulatory assets under management after the relief requested is granted.

by other persons, selling securities to customers, or any one or more of such or related activities, and the gross income of such person normally is derived principally from such business or related activities. Section 60 of the Act states that section 12 shall apply to a BDC to the same extent as if it were a registered closed-end investment company.

2. Section 6(c) of the Act provides that the Commission may exempt any person or transaction from any provision of the Act if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

#### *Applicant's Legal Analysis*

1. Applicant represents that the Company will own 100% of the equity interests in the Adviser Sub. However, Applicant states that it is not expected that the Adviser Sub would also be a broker-dealer that is primarily engaged in the business of underwriting and distributing securities issued by other persons. The ownership of the Adviser Sub, at such point as it becomes registered as an investment adviser, could thus cause the Company to be in violation of the provisions of section 12(d)(3) unless the requested Order is issued.<sup>4</sup> In addition, the Company expects that after the relief requested in the application is granted the Adviser Sub will act as an investment adviser to investment companies. To the extent it does so, relief from section 12(d)(3) is also required because the Adviser Sub acting as an investment adviser of an investment company would result in the Company acquiring a security of an investment adviser of an investment company. Therefore, Applicant requests the Order pursuant to section 6(c) of the Act granting an exemption from the provisions of section 12(d)(3) of the Act, to the extent necessary in order to permit the Company to organize, acquire, and wholly own the securities of the Adviser Sub.

2. Applicant states that section 12(d)(3) was intended to: (a) limit the risk of a registered investment

company's exposure to the entrepreneurial risks, or general liabilities, that are peculiar to securities-related businesses; and (b) prevent potential conflicts of interest and reciprocal practices between investment companies and securities-related businesses. Applicant submits that the Company's ownership and control of the Adviser Sub does not present the concerns against which section 12(d)(3) was intended to safeguard.

3. Applicant states that much of the concern regarding entrepreneurial risks stemmed from the fact that when section 12(d)(3) was adopted, most securities-related businesses were organized as privately held general partnerships. As a result, an investment in such a company would expose an investment company to the unlimited liabilities of a general partner. Applicant notes that today's financial services industry is subject to a much more robust body of regulation, which contributes to a more conservative risk profile for those companies that comprise the industry. Moreover, Applicant states that the risks presented by the form of organization of a securities-related business are no longer as germane as they were at the time of the adoption of section 12(d)(3) because many formerly closely-held securities-related businesses have reorganized into corporate forms that are characterized by limited liability. Applicant asserts in particular that the Company's shareholders are not exposed to the risk of unlimited liability associated with an interest in the Adviser Sub because they are insulated by a layer of liability protection between the Adviser Sub and the Company, as the Adviser Sub is a separate entity and is structured as a limited liability company, not a partnership.

4. Applicant also submits that the Company will own 100% of the equity interests in the Adviser Sub and, as a result, will exercise total control over the strategic direction of the Adviser Sub, including the power to control the policies that affect the Company and to protect the Company from potential conflicts of interest and reciprocal practices. Moreover, as a wholly owned portfolio company and the sole shareholder of the Adviser Sub, the Adviser Sub and the Company will generally have aligned interests.

5. Applicant states that the Company will adopt policies and procedures with respect to the Adviser Sub designed to ensure that the Company and the Adviser Sub are both being operated and managed in the best interests of the Company's shareholders and that the ownership by the Company of the

Adviser Sub is consistent with the purposes fairly intended by the policy and provisions of the Act.<sup>5</sup> Applicant states that the Company and the Adviser Sub will adopt policies and procedures to address potential conflicts of interest, including but not limited to policies and procedures that govern the allocation of expenses, personal securities trading, and insider trading and confidentiality of proprietary information.

6. Applicant notes that the Company and the Managed Accounts may invest in the same securities or different securities of the same issuer to the extent consistent with applicable law, regulatory guidance, or any exemptive order obtained by the Company. The Company and the Adviser Sub will implement policies and procedures that will govern the allocation of investment opportunities when investment advisory personnel of the Company and/or Adviser Sub become aware of investment opportunities that may be appropriate for the Company and one or more Managed Accounts.

7. Applicant asserts that the acquisition by Private Fund Managed Accounts of participation rights negotiated by the Company would not trigger the application of section 57(a) because the Private Fund Managed Accounts are "downstream" affiliates of the Company and, as a result, Applicant notes that rule 57b-1 would apply. Applicant agrees that, to the extent the Company's compliance personnel believes a conflict arises out of the sharing of information obtained due to ownership by the Company, on the one hand, and a Managed Account, on the other hand, of different instruments issued by the same issuer, an information wall will be put into place limiting the flow of information between the Company and the applicable Managed Account (and the Adviser Sub as its manager).

8. Applicant states that the Company's proposal to enter into the advisory business through a wholly owned and controlled portfolio company will benefit the Company's shareholders by: (a) allowing them to share in the profits from the new advisory business; (b) allowing that advisory business to be more marketable than if the services were provided by the Company itself; and (c) limiting any potential liabilities arising from Adviser

<sup>4</sup> Rule 12d3-1(a) and (b) under the Act each provides limited relief from the restrictions of section 12(d)(3) if the acquired company derives 15 percent or less of its gross revenues from securities related activities (as defined in the rule) or the acquiring company owns not more than five percent of the outstanding securities of that class of the acquired company's equity securities. The Company does not believe that it may rely on this relief with respect to its investment in Adviser Sub, since the Company expects that a significant portion of the Adviser Sub's gross revenues will be derived from securities related activities and the Company will own all of the outstanding securities of the Adviser Sub.

<sup>5</sup> Applicant represents that the Adviser Sub's borrowings, if any, would be used only for its own legitimate business purposes, and would not be used directly or indirectly by the Company for its business purposes unrelated to the Adviser Sub, and that the Company will adopt procedures to ensure Board oversight of compliance with this representation.

Sub's provision of advisory services. In addition, the growth in the Company's advisory business through the Adviser Sub will enable the Company to add advisory personnel that it could not on its own, such as additional portfolio managers and investment analysts, who will be available to provide advisory services both to the Company and to the Managed Accounts of the Adviser Sub and further enhance the experience and relationships of the Company's investment team. Without the growth of the Company's advisory business through the Adviser Sub, the Company would not have the ability to support such additional advisory personnel. Applicant also states that the Adviser Sub's organization as a wholly owned portfolio company of the Company and registration as an investment adviser would permit the Adviser Sub to operate the business of managing the Managed Accounts as a direct or an indirect wholly owned taxable portfolio company of the Company, thereby protecting the Company's RIC status.

9. Applicant represents that the Company's Board, including a majority of the disinterested directors, found that the Company organizing, acquiring, and wholly owning 100% of the equity interest in the Adviser Sub subsequent to its registration as an investment adviser is in the best interests of the Company and its shareholders. Applicant agrees that the Board will review at least annually the investment advisory business of the Adviser Sub to determine whether such business should be continued and whether the benefits derived by the Company from the Adviser Sub's business warrant the continued ownership of the Adviser Sub. Applicant states that shareholders of the Company will be provided with notice, in advance of, or concurrent with, the Adviser Sub's start of investment advisory activities.

10. Accordingly, Applicant represents that the requested relief is both necessary and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

*Applicant's Conditions:*

Applicant agrees that the Order of the Commission granting the requested relief shall be subject to the following conditions:

1. The determination to enter into the advisory business through the Adviser Sub has been made by a vote of at least a majority of the Board who are not "interested persons" of the Company as defined in section 2(a)(19).

2. The Company will wholly own and control the Adviser Sub. The Company

will not have an investment adviser within the meaning of section 2(a)(20). Only persons acting in their capacities as directors, officers or employees of the Company will provide advisory services to the Company.

3. In each of its annual reports to shareholders and in future registration statements, the Company will discuss the existence of the Adviser Sub and the provision by the Adviser Sub of outside advisory services as well as include an assessment of whatever risks, if any, are associated with the existence of the Adviser Sub and its provision of such services.

4. The Adviser Sub will not make any proprietary investment that the Company would be prohibited from making directly under the Company's investment objectives, policies and restrictions or under any applicable law.

5. In assessing compliance with the asset coverage requirements under section 18 of the Act, the Company will deem the assets, liabilities, and indebtedness of the Adviser Sub as its own.

6. The Board will review at least annually the investment advisory business of the Adviser Sub to determine whether such business should be continued and whether the benefits derived by the Company from the Adviser Sub's business warrant the continued ownership of the Adviser Sub and, if appropriate, approve (by a vote of at least a majority of its directors who are not "interested persons" as defined in the Act) at least annually such continuation. In determining whether the investment advisory business of the Adviser Sub should be continued and whether the benefits derived by the Company from the Adviser Sub's business warrant the continued ownership of the Adviser Sub, the Board will take into consideration, among other things, the following: (a) the compensation of the officers of the Company and of the Adviser Sub; (b) all investments by and investment opportunities considered for the Company that relate to any investments by or investment opportunities considered for a client of the Adviser Sub; and (c) the allocation of expenses associated with the provision of advisory services between the Company and the Adviser Sub.<sup>6</sup>

For the Commission, by the Division of Investment Management, under delegated authority.

<sup>6</sup> Such expenses may include: administration and operating expenses; investment research expenses; sales and marketing expenses; office space and general expenses; and direct expenses, including legal and audit fees, directors' fees and taxes.

Dated: November 15, 2022.

## SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270-115, OMB Control No.3235-0132]

**Proposed Collection; Comment Request; Extension: 7a-15 Through 7a-37**

*Upon Written Request Copies Available From:* Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549-2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission ("Commission") is soliciting comments on the collection of information summarized below. The Commission plans to submit this existing collection of information to the Office of Management and Budget for extension and approval.

Rules 7a-15 through 7a-37 (17 CFR 260.7a-15—260.7a-37) under the Trust Indenture Act of 1939 (15 U.S.C. 77aaa *et seq.*) set forth the general requirements as to form and content of applications, statements and reports that must be filed under the Trust Indenture Act. The respondents are persons and entities subject to requirements of the Trust Indenture Act. Trust Indenture Act Rules 7a-15 through 7a-37 are disclosure guidelines and do not directly result in any collection of information. The rules are assigned only one burden hour for administrative convenience.

*Written comments are invited on:* (a) whether this proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden imposed by the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication by January 17, 2023.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

Please direct your written comment to David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549 or send an email to: [PRA\\_Mailbox@sec.gov](mailto:PRA_Mailbox@sec.gov).

Dated: November 14, 2022.

**Sherry R. Haywood,**  
Assistant Secretary.

BILLING CODE 8011–01–P

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–96322; File No. SR–NYSEARCA–2022–76]

### Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 7.31–E

November 15, 2022.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the “Act”),<sup>1</sup> and Rule 19b–4 thereunder,<sup>2</sup> notice is hereby given that on November 2, 2022, NYSE Arca, Inc. (“NYSE Arca” or the “Exchange”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

#### I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 7.31–E regarding Discretionary Pegged Orders. The proposed rule change is available on the Exchange’s website at [www.nyse.com](http://www.nyse.com), at the principal office of the Exchange, and at the Commission’s Public Reference Room.

#### II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received

on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

#### A. Self-Regulatory Organization’s Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

##### 1. Purpose

The Exchange proposes to (1) amend Rule 7.31–E to delete Commentary .03 to end the temporary suspension of the Discretionary Pegged Order, and (2) amend Rule 7.31–E(h)(3) to modify the operation of the Discretionary Pegged Order.

The Discretionary Pegged Order is a non-displayed order to buy (sell) that is pegged to the same side of the PBBO and assigned a working price equal to the lower (higher) of the midpoint of the PBBO (the “Midpoint Price”) or the limit price of the order.<sup>3</sup> A Discretionary Pegged Order will exercise the least amount of discretion necessary from its working price to its discretionary price (defined as the lower (higher) of the Midpoint Price or the limit price of the order) to trade with contra-side interest. Current Rule 7.31–E(h)(3)(C) provides that a Discretionary Pegged Order will not exercise discretion if the PBBO is determined to be unstable via a “quote instability calculation” that assesses the probability of a change to the PBB or PBO. Specifically, as set forth in current Rule 7.31–E(h)(3)(D), the Exchange uses the quote instability calculation along with real-time relative quoting activity of protected quotations to assess the probability of an imminent change to the PBBO (the “quote instability factor”). When the quoting activity meets predefined criteria described in Rule 7.31–E(h)(3)(D)(i)(A) through (C) and the quote instability factor calculated is greater than the Exchange’s quote instability threshold (defined in Rule 7.31–E(h)(3)(D)(i)(D)(2)), the Exchange treats the quote as unstable. The quote stability calculation utilizes quote stability coefficients and quote stability variables, as defined in Rules 7.31–E(h)(3)(D)(i)(D)(1)(a) and (b). In July 2022, the Exchange modified the quote stability calculation to incorporate updated quote stability coefficients that would allow the quote stability

calculation to more accurately identify changes to the PBBO.<sup>4</sup>

##### End of Temporary Suspension

In August 2022, the Exchange added Commentary .03 to Rule 7.31–E to provide for the temporary suspension of the Discretionary Pegged Order.<sup>5</sup> The Exchange determined to temporarily suspend use of the Discretionary Pegged Order to evaluate system performance impacts following the modification of the quote stability coefficients, as described above. Commentary .03 to Rule 7.31–E provides that the Exchange will submit a proposed rule filing to end the temporary suspension and will provide notice of the end of the suspension period by Trader Update.

The Exchange now proposes to end the temporary suspension period, as it has assessed system performance impact and is prepared to resume offering the Discretionary Pegged Order, as modified by this filing. The Exchange also proposes to delete Commentary .03 from 7.31–E to remove text that would no longer have application once the temporary suspension is lifted.

##### Modification of Discretionary Pegged Orders

The Exchange proposes to amend Rule 7.31–E(h)(3) to modify the operation of Discretionary Pegged Orders following the end of the temporary suspension period. As noted above, the temporary suspension period provided the Exchange with an opportunity to evaluate the impact of the order type on system performance. Based on the Exchange’s assessment of such impact, and, specifically, the system resources required to perform the quote stability calculation, the Exchange now proposes to modify Rule 7.31–E(h)(3) to provide that the Discretionary Pegged Order would not be restricted from exercising discretion during periods of quote instability, thereby eliminating the need to perform the quote stability calculation.

As proposed, the Discretionary Pegged Order would operate as defined in Rule 7.31–E(h)(3) and as specified in current Rules 7.31–E(h)(3)(A), (B), and (E), without any changes except that the order would continue to exercise the least amount of price discretion

<sup>4</sup> See Securities Exchange Act Release No. 95154 (June 24, 2022), 87 FR 39134 (June 30, 2022) (SR–NYSEARCA–2022–13) (Notice of Filing of Amendment No. 2 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 2, To Amend Rule 7.31–E(h)(3) Relating to Discretionary Pegged Orders).

<sup>5</sup> See Securities Exchange Act Release No. 95584 (August 23, 2022), 87 FR 52826 (August 29, 2022) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change to Amend Rule 7.31–E).

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b–4.

<sup>3</sup> See Rule 7.31–E(h)(3). As defined in NYSE Arca Rule 1.1, “PBBO” means the Best Protected Bid and the Best Protected Offer. Rule 1.1 also defines “PBB” as the highest Protected Bid and “PBO” as the lowest Protected Offer.

necessary from its working price to its discretionary price to trade with contra-side orders on the NYSE Arca Book without regard to potential quote instability. The Exchange thus proposes to delete the clause beginning with “except” in the last sentence of current Rule 7.31–E(h)(3). In addition, because the Exchange proposes to permit Discretionary Pegged Orders to exercise discretion without considering potential quote instability, the Exchange would no longer perform the quote instability calculation to assess the probability of an imminent change to the PBBO or identify periods of quote instability. To effect this change, the Exchange proposes to delete current Rules 7.31–E(h)(3)(C) and (D), including the subparagraphs thereunder. The Exchange also proposes to renumber current Rule 7.31–E(h)(3)(E) as Rule 7.31–E(h)(3)(C) to reflect those deletions.

Although the Discretionary Pegged Order, as modified, would no longer provide price protection during periods of quote instability, the Exchange believes that it would still provide ETP Holders with the flexibility and benefits of an order type that can exercise discretion to trade with contra-side interest. The Exchange notes that the Discretionary Pegged Order, as modified, would operate similarly to order types currently offered by other equities exchanges.<sup>6</sup>

Because of the technology changes associated with this proposed rule change, the Exchange will announce the end of the temporary suspension and availability of the Discretionary Pegged Order, as proposed in this filing, by Trader Update. Subject to effectiveness of this rule filing, the Exchange will implement the changes described herein in the fourth quarter of 2022.

## 2. Statutory Basis

The proposed rule change is consistent with Section 6(b) of the Act,<sup>7</sup> in general, and furthers the objectives of Section 6(b)(5),<sup>8</sup> in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to, and perfect the mechanism of, a free and open market

and a national market system and, in general, to protect investors and the public interest.

The Exchange believes that the proposed change to end the temporary suspension of Discretionary Pegged Orders and delete Commentary .03 would promote just and equitable principles of trade and remove impediments to, and perfect the mechanism of, a free and open market and a national market system because it would permit the Exchange to resume offering the Discretionary Pegged Order to ETP Holders and remove rule text that would no longer have application following the end of the suspension period. Furthermore, as discussed above, the temporary suspension of the Discretionary Pegged Order allowed the Exchange an opportunity to evaluate system performance impacts. Accordingly, the Exchange believes that the proposed change to modify the operation of the Discretionary Pegged Order, further to such assessment, would remove impediments to, and perfect the mechanism of, a free and open market and a national market system, as well as protect investors and the public interest, by continuing to provide ETP Holders with the benefits of an order type that can exercise discretion to trade with contra-side interest, without a quote instability calculation that would restrict such order from exercising discretion during periods of quote instability. The Exchange also believes that the proposed modification of the Discretionary Pegged Order would remove impediments to, and perfect the mechanism of, a free and open market and a national market system by modifying the Discretionary Pegged Order to function similarly to discretionary orders currently offered by other equities exchanges.<sup>9</sup>

## B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes that the proposed change would promote competition by ending the temporary suspension of the Discretionary Pegged Order and making the order type once again available to ETP Holders, as proposed. The proposed modification of the Discretionary Pegged Order would also promote competition by permitting the Exchange to offer ETP Holders an order type that can exercise discretion to trade

with contra-side interest and would not be restricted from doing so by a quote stability calculation. The Exchange also believes that the proposed modification to the operation of the Discretionary Pegged Order could promote competition because the order type would function similarly to order types currently offered by other equities exchanges.<sup>10</sup>

## C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

## III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act<sup>11</sup> and subparagraph (f)(6) of Rule 19b–4 thereunder.<sup>12</sup>

A proposed rule change filed under Rule 19b–4(f)(6)<sup>13</sup> normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),<sup>14</sup> the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay to allow the Exchange to end the temporary suspension and modify the Discretionary Pegged Order as soon as the technology associated with those proposed changes is available and make the Discretionary Pegged Order available for use by interested ETP Holders. The Exchange states that the proposed changes would allow the Exchange to end the temporary suspension of an approved order type and modify the order type to operate similarly to discretionary orders

<sup>10</sup> See *id.*

<sup>11</sup> 15 U.S.C. 78s(b)(3)(A)(iii).

<sup>12</sup> 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires the Exchange to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

<sup>13</sup> 17 CFR 240.19b–4(f)(6).

<sup>14</sup> 17 CFR 240.19b–4(f)(6)(iii).

<sup>6</sup> See, e.g., Cboe EDGA Exchange, Inc. Rule 11.8(e) (defining the MidPoint Discretionary Order as a limit order to buy or sell that is pegged to the NBBO with discretion to execute at prices up or down to and including the midpoint of the NBBO); Cboe EDGX Exchange, Inc. Rule 11.8(g) (same).

<sup>7</sup> 15 U.S.C. 78f(b).

<sup>8</sup> 15 U.S.C. 78f(b)(5).

<sup>9</sup> See note 6, *supra*.

currently offered by other equities exchanges. The Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest because the proposal does not raise any new or novel issues. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposal operative upon filing.<sup>15</sup>

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

#### IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

##### *Electronic Comments*

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include File Number SR-NYSEARCA-2022-76 on the subject line.

##### *Paper Comments*

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-NYSEARCA-2022-76. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the

Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange.

All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly.

All submissions should refer to File Number SR-NYSEARCA-2022-76 and should be submitted on or before December 9, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>16</sup>

#### SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270-617, OMB Control No. 3235-0728]

#### Submission for OMB Review; Comment Request; Extension: Rule 17Ab2-2

*Upon Written Request, Copies Available From:* Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549-2736

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 ("PRA") (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission ("Commission") has submitted to the Office of Management and Budget ("OMB") a request for approval of extension of the previously approved collection of information provided for in Rule 17Ab2-2 (17 CFR 240.17Ab2-2) under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*).

Exchange Act Rule 17Ab2-2 establishes procedures for the Commission to make a determination, either of its own initiative or upon application by any clearing agency or member of a clearing agency, whether a

covered clearing agency is systemically important in multiple jurisdictions and procedures to determine, if the Commission deems appropriate, whether any of the activities of a clearing agency providing central counterparty services, in addition to clearing agencies registered with the Commission for the purpose of clearing security-based swaps, have a more complex risk profile. In addition, Exchange Act Rule 17Ab2-2 provides a procedure for the Commission to determine whether to rescind any such determinations previously made by the Commission.

Because determinations made by the Commission pursuant to Exchange Act Rule 17Ab2-2 may be made upon the request of a clearing agency, respondent clearing agencies would have the burden of preparing such requests for submission to the Commission.

Commission staff estimates that Rule 17Ab2-2 will impose a PRA burden on registered clearing agencies that seek a determination from the Commission regarding the covered clearing agency's status as systemically important in multiple jurisdictions. Commission staff estimates that two registered clearing agencies or their members on their behalf will apply for a Commission determination, or may be subject to a Commission-initiated determination, regarding whether a registered clearing agency is involved in activities with a more complex risk profile or whether a covered clearing agency is systemically important in multiple jurisdictions.

Commission staff estimates that each respondent clearing agency incurs a one-time burden of 10 hours and a one-time cost of \$2,000 to draft and review a determination request submitted to the Commission, for a total of 20 hours and \$4,000 for all respondents. The total annualized burden and cost for all respondents are 6.66 hours and \$1,333.33.

Any agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a valid OMB control number.

The public may view background documentation for this information collection at the following website: [www.reginfo.gov](http://www.reginfo.gov). Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function. Written comments and recommendations for the proposed information collection should be sent by December 19, 2022 to (i) [MBX.OMB.OIRA.SEC\\_desk\\_officer@omb.eop.gov](mailto:>MBX.OMB.OIRA.SEC_desk_officer@omb.eop.gov) and (ii) David Bottom, Director/Chief Information Officer,

<sup>15</sup> For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

<sup>16</sup> 17 CFR 200.30-3(a)(12).

Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549, or by sending an email to: [PRA\\_Mailbox@sec.gov](mailto:PRA_Mailbox@sec.gov).

Dated: November 14, 2022.

## SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–793, OMB Control No. 3235–0734]

### Submission for OMB Review; Comment Request; Extension: Rule 22c–1

*Upon Written Request, Copies Available From:* Securities and Exchange Commission Office of FOIA Services  
100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), the Securities and Exchange Commission (the “Commission”) has submitted to the Office of Management and Budget a request for extension of the previously approved collection of information discussed below.

Rule 22c–1 (17 CFR 270.22c–1) under the Investment Company Act of 1940 (15 U.S.C. 80a) (the “Investment Company Act” or “Act”) enables a fund to choose to use “swing pricing” as a tool to mitigate shareholder dilution. Rule 22c–1 is intended to promote investor protection by providing funds with an additional tool to mitigate the potentially dilutive effects of shareholder purchase or redemption activity and a set of operational standards that allow funds to gain comfort using swing pricing as a means of mitigating potential dilution.

The respondents to amended rule 22c–1 are open-end management investment companies (other than money market funds or exchange-traded funds) that engage in swing pricing. Compliance with rule 22c–1(a)(3) is mandatory for any fund that chooses to use swing pricing to adjust its NAV in reliance on the rule.

While we are not aware of any funds that have engaged in swing pricing,<sup>1</sup> we are estimating for the purpose of this analysis that 5 fund complexes have funds that may adopt swing pricing policies and procedures in the future pursuant to the rule. We estimate that

the total burden associated with the preparation and approval of swing pricing policies and procedures by those fund complexes that would use swing pricing will be 280 hours.<sup>2</sup> We also estimate that it will cost a fund complex \$48,188 to document, review and initially approve these policies and procedures, for a total cost of \$240,940.<sup>3</sup>

Rule 22c–1 requires a fund that uses swing pricing to maintain the fund’s swing policies and procedures that are in effect, or at any time within the past six years were in effect, in an easily accessible place.<sup>4</sup> The rule also requires a fund to retain a written copy of the periodic report provided to the board prepared by the swing pricing administrator that describes, among other things, the swing pricing administrator’s review of the adequacy of the fund’s swing pricing policies and procedures and the effectiveness of their implementation, including the impact on mitigating dilution and any back-testing performed.<sup>5</sup> The retention of these records is necessary to allow the staff during examinations of funds to determine whether a fund is in compliance with its swing pricing policies and procedures and with rule 22c–1. We estimate a time cost per fund complex of \$344.<sup>6</sup> We estimate that the total for recordkeeping related to swing pricing will be 20 hours, at an aggregate cost of \$1,720, for all fund complexes that we believe include funds that have adopted swing pricing policies and procedures.<sup>7</sup>

<sup>2</sup> This estimate is based on the following calculation: (48 + 2 + 6) hours × 5 fund complexes = 280 hours.

<sup>3</sup> These estimates are based on the following calculations: 24 hours × \$237 (hourly rate for a senior accountant) = \$5,688; 24 hours × \$545 (blended hourly rate for assistant general counsel (\$510) and chief compliance officer (\$580)) = \$13,080; 2 hours (for a fund attorney’s time to prepare materials for the board’s determinations) × \$400 (hourly rate for a compliance attorney) = \$800; 6 hours × \$4,770 (hourly rate for a board of 9 directors) = \$28,620; (\$5,688 + \$13,080 + \$800 + \$28,620) = \$48,188; \$48,188 × 5 fund complexes = \$240,940. The hourly wages used are from SIFMA’s Management & Professional Earnings in the Securities Industry 2013, modified by Commission staff to account for an 1800-hour work-year and inflation, and multiplied by 5.35 to account for bonuses, firm size, employee benefits, and overhead. The staff has estimated the average cost of board of director time as \$4,770 per hour for the board as a whole, based on information received from funds and their counsel.

<sup>4</sup> See rule 22c–1(a)(3)(iii).

<sup>5</sup> See *id.*

<sup>6</sup> This estimate is based on the following calculations: 2 hours × \$68 (hourly rate for a general clerk) = \$136; 2 hours × \$104 (hourly rate for a senior computer operator) = \$208. \$136 + \$208 = \$344.

<sup>7</sup> These estimates are based on the following calculations: 4 hours × 5 fund complexes = 20 hours. 5 fund complexes × \$344 = \$1,720.

Amortized over a three-year period, we believe that the hour burdens and time costs associated with rule 22c–1, including the burden associated with the requirements that funds adopt policies and procedures, obtain board approval, and periodic review of an annual written report from the swing pricing administrator, and retain certain records and written reports related to swing pricing, will result in an average aggregate annual burden of 113.3 hours, and average aggregate time costs of \$82,033.<sup>8</sup> We also estimate that rule 22c–1 imposes a total external cost burden of \$2,655 for outside legal services related to compliance with the policies and procedures requirement.<sup>9</sup>

These estimates of average costs are made solely for the purposes of the Paperwork Reduction Act. The estimate is not derived from a comprehensive or even a representative survey or study of the costs of Commission rules.

This collection of information is necessary to obtain a benefit and will not be kept confidential. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The public may view background documentation for this information collection at the following website: [www.reginfo.gov](http://www.reginfo.gov). Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice by December 19, 2022 to (i) [MBX.OMB.OIRA.SEC\\_desk\\_officer@omb.eop.gov](mailto:MBX.OMB.OIRA.SEC_desk_officer@omb.eop.gov) and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549, or by sending an email to: [PRA\\_Mailbox@sec.gov](mailto:PRA_Mailbox@sec.gov).

Dated: November 14, 2022.

**Sherry R. Haywood,**  
Assistant Secretary.

[FR Doc. 2022–25099 Filed 11–17–22; 8:45 am]

**BILLING CODE 8011–01–P**

<sup>8</sup> These estimates are based on the following calculations: (280 hours (year 1) + (3 × 20 hours) (years 1, 2 and 3)) ÷ 3 = 113.3 hours; (\$240,940 (year 1) + (3 × \$1,720) (years 1, 2 and 3)) ÷ 3 = \$82,033.

<sup>9</sup> This estimated burden is based on the estimated wage rate of \$531 per hour for outside legal services and the following calculation: \$531 × 5 fund complexes = \$2,655.

<sup>1</sup> No funds have engaged in swing pricing as reported on Form N–CEN as of August 15, 2022.

## SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–389, OMB Control No. 3235–0444]

### Proposed Collection; Comment Request; Extension: Rule 10b–10

*Upon Written Request, Copies Available From:* Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) (“PRA”), the Securities and Exchange Commission (“Commission”) is soliciting comments on the existing collection of information provided for in Rule 10b–10 (17 CFR 240.10b–10) under the Securities and Exchange Act of 1934 (15 U.S.C. 78a *et seq.*). The Commission plans to submit this existing collection of information to the Office of Management and Budget (“OMB”) for extension and approval.

Rule 10b–10 requires broker-dealers to convey specified information to customers regarding their securities transactions. This information includes the date and time of the transaction, the identity and number of shares bought or sold, and whether the broker-dealer acts as agent for the customer or as principal for its own account. Depending on whether the broker-dealer acts as agent or principal, Rule 10b–10 requires the disclosure of commissions, as well as mark-up and mark-down information. For transactions in debt securities, Rule 10b–10 requires the disclosure of redemption and yield information. Rule 10b–10 potentially applies to all of the approximately 3,531 firms registered with the Commission that effect transactions for or with customers.

Based on information provided by registered broker-dealers to the Commission in FOCUS Reports, the Commission staff estimates that on average, registered broker-dealers process approximately 27,151,388,510 order tickets per year for transactions for or with customers. Each order ticket representing a transaction effected for or with a customer generally results in one confirmation. Therefore, the Commission staff estimates that approximately 27,151,388,510 confirmations are sent to customers annually. The confirmations required by Rule 10b–10 are generally processed through automated systems. It takes approximately 30 seconds to generate and send a confirmation. Accordingly, the Commission staff estimates that broker-dealers spend approximately 226,261,571 hours per year complying

with Rule 10b–10 ( $27,151,388,510 \times .5 \div 60$ ).

The number of confirmations sent and the cost of sending each confirmation varies from firm to firm. Smaller firms generally send fewer confirmations than larger firms because they effect fewer transactions. The Commission staff estimates the cost of producing and sending a paper confirmation, including postage, to be approximately 67 cents. The Commission staff also estimates that the cost of producing and sending a wholly electronic confirmation is approximately 40 cents. Based on informal discussions with industry participants, as well as representations made in requests for exemptive and no-action letters relating to Rule 10b–10, the staff estimates that broker-dealers used electronic confirmations for approximately 35 percent of transactions. Based on these calculations, Commission staff estimates that 17,648,402,532 paper confirmations are mailed each year at a cost of \$11,824,429,696. Commission staff also estimates that 9,502,985,979 wholly electronic confirmations are sent each year at a cost of \$3,801,194,392. Accordingly, Commission staff estimates that the total annual cost associated with generating and delivering to investors the information required under Rule 10b–10 is approximately \$15,625,624,088.

*Written comments are invited on:* (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission’s estimates of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted by January 17, 2023.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

Please direct your written comments to: David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549, or send an email to: [PRA\\_Mailbox@sec.gov](mailto:PRA_Mailbox@sec.gov).

Dated: November 14, 2022.

**Sherry R. Haywood,**  
*Assistant Secretary.*

BILLING CODE 8011–01–P

## SMALL BUSINESS ADMINISTRATION

### Reporting and Recordkeeping Requirements Under OMB Review

**AGENCY:** Small Business Administration.  
**ACTION:** 30-Day notice.

**SUMMARY:** The Small Business Administration (SBA) is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act and OMB procedures, SBA is publishing this notice to allow all interested member of the public an additional 30 days to provide comments on the proposed collection of information.

**DATES:** Submit comments on or before December 19, 2022.

**ADDRESSES:** Written comments and recommendations for this information collection request should be sent within 30 days of publication of this notice to [www.reginfo.gov/public/do/PRAMain](http://www.reginfo.gov/public/do/PRAMain). Find this particular information collection request by selecting “Small Business Administration;” “Currently Under Review;” then select the “Only Show ICR for Public Comment” checkbox. This information collection can be identified by title and/or OMB Control Number.

**FOR FURTHER INFORMATION CONTACT:** You may obtain a copy of the information collection and supporting documents from the Agency Clearance Office at [Curtis.Rich@sba.gov](mailto:Curtis.Rich@sba.gov); (202) 205–7030, or from [www.reginfo.gov/public/do/PRAMain](http://www.reginfo.gov/public/do/PRAMain)

**SUPPLEMENTARY INFORMATION:** The SBA Emerging Leaders (EL) initiative was designed to strengthen and grow existing local entrepreneur communities in historically distressed cities. The key goals of the program are to (1) increase small business growth and survival, and (2) promote economic growth in distressed communities by providing employment opportunities as well as necessary goods and services. To achieve these goals, the program offers executives of high-growth small businesses a five-month executive leader education series, free of charge, that provide the networks, resources, and knowledge required to promote a sustainable business growth, create jobs, and contribute to the economic well-

being of local communities. In 2022, the program was revamped under the new name, T.H.R.I.V.E. Emerging Leaders Reimagined. The revised program provides training that customizes content for small businesses' unique needs, increases accessibility through a virtual component, and specifically promotes business ecosystem connections among business owners, government agencies, and the financial community. This information collection is necessary for SBA to understand the progress made by the T.H.R.I.V.E. program toward achieving its goals.

The evaluation will be used to track participants' business growth, to provide guidance to the program training contractor on areas for additional assistance, and to increase SBA's understanding of the program outcome trends. This evaluation aims to examine the program participants' business growth outcomes including revenue, profits, job creation, and business survival. The evaluation also describes the population of program participants—their businesses, business management practices, experiences with the program, and satisfaction with and perceived effectiveness of the program. Over the previous years, the evaluation results have helped to track the program performance outcomes and provide suggestions for program improvements to better facilitate small business growth. The results are also expected to provide suggestions for improving future evaluations.

The following surveys are conducted with the program participants: (1) the application form before the program enrollment, (2) the intake survey before the training, (3) the module feedback form during the training, (4) the feedback survey right after the graduation, and (5) the follow-up survey annually up to three years after graduation. The application form examines the eligibility status of the enrollees, obtains their contact information, and asks for their business goals. The data from the Intake survey is used to determine baseline levels of business outcomes, the use of management practices, and the extent to which the target population for the program is reached. The module feedback form assesses the participants' experience with each of the eight modules of the training program. The feedback survey is used to measure participant satisfaction with the training activities and to suggest training adjustments, if necessary. The annual follow-up survey tracks changes in the small business owner's management practices and business outcomes for three years after graduation from the

program. The data collection covers four cohorts of program participants. The given year participants complete the application form, intake survey, module feedback, and feedback survey. The three cohorts of participants who graduated from the program one, two, and three years prior complete the follow-up survey.

#### **Solicitation of Public Comments**

Comments may be submitted on (a) whether the collection of information is necessary for the agency to properly perform its functions; (b) whether the burden estimates are accurate; (c) whether there are ways to minimize the burden, including through the use of automated techniques or other forms of information technology; and (d) whether there are ways to enhance the quality, utility, and clarity of the information.

*Title:* The SBA Emerging Leaders (EL) initiative was designed to strengthen and grow existing local entrepreneur communities in historically distressed cities. The key goals of the program are to (1) increase small business growth and survival, and (2) promote economic growth in distressed communities by providing employment opportunities as well as necessary goods and services. To achieve these goals, the program offers executives of high-growth small businesses a five-month executive leader education series, free of charge, that provide the networks, resources, and knowledge required to promote a sustainable business growth, create jobs, and contribute to the economic well-being of local communities. In 2022, the program was revamped under the new name, T.H.R.I.V.E. Emerging Leaders Reimagined. The revised program provides training that customizes content for small businesses' unique needs, increases accessibility through a virtual component, and specifically promotes business ecosystem connections among business owners, government agencies, and the financial community. This information collection is necessary for SBA to understand the progress made by the T.H.R.I.V.E. program toward achieving its goals.

The evaluation will be used to track participants' business growth, to provide guidance to the program training contractor on areas for additional assistance, and to increase SBA's understanding of the program outcome trends. This evaluation aims to examine the program participants' business growth outcomes including revenue, profits, job creation, and business survival. The evaluation also describes the population of program participants—their businesses, business management practices, experiences with

the program, and satisfaction with and perceived effectiveness of the program. Over the previous years, the evaluation results have helped to track the program performance outcomes and provide suggestions for program improvements to better facilitate small business growth. The results are also expected to provide suggestions for improving future evaluations.

The following surveys are conducted with the program participants: (1) the application form before the program enrollment, (2) the intake survey before the training, (3) the module feedback form during the training, (4) the feedback survey right after the graduation, and (5) the follow-up survey annually up to three years after graduation. The data from the Intake survey is used to determine baseline levels of business outcomes, the use of management practices, and the extent to which the target population for the program is reached. The module feedback form assesses the participants' experience with each of the eight modules of the training program. The feedback survey is used to measure participant satisfaction with the training activities and to suggest training adjustments, if necessary. The annual follow-up survey tracks changes in the small business owner's management practices and business outcomes for three years after graduation from the program. The data collection covers four cohorts of program participants. The given year participants complete the application form, intake survey, module feedback, and feedback survey. The three cohorts of participants who graduated from the program one, two, and three years prior complete the follow-up survey.

*OMB Control Number:* 3245–0394.

*Title:* T.H.R.I.V.E. Emerging Leaders Reimagined.

*Description of Respondents:* Existing local entrepreneur communities in historically distressed cities.

*Estimated Number of Respondents:* 5,644.

*Estimated Annual Responses:* 5,644.

*Estimated Annual Hour Burden:* 4,851.

## DEPARTMENT OF STATE

[Public Notice: 11919]

**Clean Energy Resources Advisory Committee****ACTION:** Announcement of meeting.

**SUMMARY:** The Department of State will host a virtual, open meeting of the Clean Energy Resources Advisory Committee (CERAC). There will not be an in-person option for this meeting.

**DATES:** CERAC will meet virtually December 7, 2022 from 11:00 a.m. to 12:30 p.m. (EST).

**FOR FURTHER INFORMATION CONTACT:** Bureau of Energy Resources, Energy Officer Brian Bedell at (202) 647-7687, or [CERAC@state.gov](mailto:CERAC@state.gov).

**SUPPLEMENTARY INFORMATION:**

*Purpose:* This Committee will provide input and advice regarding energy minerals and metals, their supply chains, and end uses. This third meeting will focus on investment needs across clean energy supply chains and strategies to accelerate public and private investment to support supply chain security and diversification.

*Participation:* Members of the public wishing to participate must RSVP by December 5, 2022 via email to [CERAC@state.gov](mailto:CERAC@state.gov) (subject line: RSVP). The Department will provide login information prior to the meeting. Requests for reasonable accommodation should be submitted no later than December 1, 2022. Reasonable accommodation requests received after that date will be considered but may not be possible to fulfill.

Any written comments should be emailed to [CERAC@state.gov](mailto:CERAC@state.gov) with "PUBLIC COMMENT" as the subject line at least 48 hours before the start of the meeting. During this meeting, there will not be an option for members of the public to make oral statements.

(Authority: 5 U.S.C. app. 10(a) and 22 U.S.C. 2651a)

**Brian Bedell,**

*Energy Officer, Bureau of Energy Resources, Department of State.*

**BILLING CODE 4710-AE-P**

## DEPARTMENT OF TRANSPORTATION

**Federal Aviation Administration****Random Drug and Alcohol Testing Percentage Rates of Covered Aviation Employees for the Period of January 1, 2023, Through December 31, 2023**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice.

**SUMMARY:** The FAA has determined that the minimum random drug and alcohol testing percentage rates for the period January 1, 2023, through December 31, 2023, will remain at 25 percent of safety-sensitive employees for random drug testing and 10 percent of safety-sensitive employees for random alcohol testing.

**FOR FURTHER INFORMATION CONTACT:** Ms. Vicky Dunne, Federal Aviation Administration, Office of Aerospace Medicine, Drug Abatement Division, Program Policy Branch; Email [drugabatement@faa.gov](mailto:drugabatement@faa.gov); Telephone (202) 267-8442.

*Discussion:* Pursuant to 14 CFR 120.109(b), the FAA Administrator's decision on whether to change the minimum annual random drug testing rate is based on the reported random drug test positive rate for the entire aviation industry. If the reported random drug test positive rate is less than 1.00%, the Administrator may continue the minimum random drug testing rate at 25%. In 2021, the random drug test positive rate was 0.728%. Therefore, the minimum random drug testing rate will remain at 25% for calendar year 2023.

Similarly, 14 CFR 120.217(c), requires the decision on the minimum annual random alcohol testing rate to be based on the random alcohol test violation rate. If the violation rate remains less than 0.50%, the Administrator may continue the minimum random alcohol testing rate at 10%. In 2021, the random alcohol test violation rate was 0.114%. Therefore, the minimum random alcohol testing rate will remain at 10% for calendar year 2023.

**SUPPLEMENTARY INFORMATION:** If you have questions about how the annual random testing percentage rates are determined, please refer to the Code of Federal Regulations Title 14, section 120.109(b) (for drug testing), and 120.217(c) (for alcohol testing).

Issued in Washington, DC.

**Susan Northrup,**

*Federal Air Surgeon.*

## DEPARTMENT OF TRANSPORTATION

**Federal Transit Administration**

[FTA Docket No. FTA 2022-0037]

**Agency Information Collection Activity Under OMB Review: Public Transportation Emergency Relief Program**

**AGENCY:** Federal Transit Administration, Department of Transportation (DOT).

**ACTION:** Notice of request for comments.

**SUMMARY:** In compliance with the Paperwork Reduction Act of 1995, this notice announces that the Information Collection Requirements (ICRs) abstracted below have been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describe the nature of the information collection and their expected burdens.

**DATES:** Comments must be submitted on or before December 19, 2022.

**ADDRESSES:** Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to [www.reginfo.gov/public/do/PRAMain](http://www.reginfo.gov/public/do/PRAMain) Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

*Comments are Invited On:* Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology. A comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication of this notice in the **Federal Register**.

**FOR FURTHER INFORMATION CONTACT:** Tia Swain, Office of Administration, Management Planning Division, 1200 New Jersey Avenue SE, Mail Stop TAD-10, Washington, DC 20590 (202) 366-0354 or [tia.swain@dot.gov](mailto:tia.swain@dot.gov).

**SUPPLEMENTARY INFORMATION:** The Paperwork Reduction Act of 1995 (PRA), Public Law 104-13, Section 2, 109 Stat. 163 (1995) (codified as revised at 44 U.S.C. 3501-3520), and its implementing regulations, 5 CFR part 1320, require Federal agencies to issue

two notices seeking public comment on information collection activities before OMB may approve paperwork packages. 44 U.S.C. 3506, 3507; 5 CFR 1320.5, 1320.8(d)(1), 1320.12. On August 24, 2022, FTA published a 60-day notice (87 FR 52109) in the **Federal Register** soliciting comments on the ICR that the agency was seeking OMB approval. FTA received one anonymous non-significant comment not associated with information collection or burden. Accordingly, DOT announces that these information collection activities have been re-evaluated and certified under 5 CFR 1320.5(a) and forwarded to OMB for review and approval pursuant to 5 CFR 1320.12(c).

Before OMB decides whether to approve these proposed collections of information, it must provide 30 days for public comment. 44 U.S.C. 3507(b); 5 CFR 1320.12(d). Federal law requires OMB to approve or disapprove paperwork packages between 30 and 60 days after the 30-day notice is published. 44 U.S.C. 3507 (b)–(c); 5 CFR 1320.12(d); *see also* 60 FR 44978, 44983, Aug. 29, 1995. OMB believes that the 30-day notice informs the regulated community to file relevant comments and affords the agency adequate time to digest public comments before it renders a decision. 60 FR 44983, Aug. 29, 1995. Therefore, respondents should submit their respective comments to OMB within 30 days of publication to best ensure having their full effect. 5 CFR 1320.12(c); *see also* 60 FR 44983, Aug. 29, 1995.

The summaries below describe the nature of the information collection requirements (ICRs) and the expected burden. The requirements are being submitted for clearance by OMB as required by the PRA.

**Title:** Public Transportation Emergency Relief Program.

**OMB Control Number:** 2132–0575.

**Background:** Since the authorization of the Public Transportation Emergency Relief Program in 2012, Congress has appropriated funds three times for transit agencies affected by disaster.

The first appropriation of funds for the program was in 2013 following Hurricane Sandy, for which the President declared a major disaster for areas of 12 States and the District of Columbia. Under the Disaster Relief Appropriations Act (Pub. L. 113–2), Congress provided \$10.9 billion for FTA's Emergency Relief Program for recovery, relief, and resilience efforts in the counties specified in the disaster declaration. Approximately \$10.0 billion remained available after implementation of the Balanced Budget and Emergency Deficit Control Act of

2011 (Pub. L. 112–25) and after intergovernmental transfers to other bureaus and offices within DOT. FTA has allocated the full amount in multiple tiers for response, recovery and rebuilding; for locally prioritized resilience projects, and for competitively selected resilience projects.

The second appropriation of funds for the Emergency Relief Program was in 2018 following Hurricanes Harvey, Irma, and Maria, for which the President declared major disasters in areas of Florida, Georgia, Louisiana, Puerto Rico, South Carolina, Texas, and the U.S. Virgin Islands. Under the Bipartisan Budget Act of 2018 (Pub. L. 115–123), Congress provided \$330 million for FTA's Emergency Relief Program for transit systems affected by Hurricanes Harvey, Irma, and Maria. On May 31, 2018 FTA allocated \$277.5 million for response, recovery, rebuilding, and resilience projects.

The third appropriation of funds for the Emergency Relief Program was in 2019. Under the Additional Supplemental Appropriations for Disaster Relief Act of 2019, Congress appropriated \$10.5 million for FTA's Emergency Relief Program for transit systems affected by major declared disasters occurring in calendar year 2018.

On March 13, 2020, FTA announced that expanded eligibility of federal assistance is available under FTA's Emergency Relief Program to help transit agencies respond to the coronavirus (COVID–19) in states where the Governor has declared an emergency. This includes allowing all transit providers, including those in large urban areas, to use federal formula funds for emergency-related capital and operating expenses, and raises the cap on the federal government's share of those expenses.

**Respondents:** States, local governmental authorities, Indian tribes and other FTA recipients impacted by Hurricane Sandy which affected mid-Atlantic and northeastern states in October 2012; Hurricane Harvey which affected areas of Texas and Louisiana in August 2017; and Hurricanes Irma and Maria which affected the southeastern states and the territories of the Puerto Rico and the U.S. Virgin Islands in September 2017, and by major declared disasters occurring in calendar year 2018.

**Estimated Annual Number of Respondents:** 26.

**Estimated Total Annual Burden:** 4,680 hours.

**Frequency:** Annually.

**Nadine Pemberton,**

*Deputy Associate Administrator, Office of Administration.*

### Federal Transit Administration

[FTA Docket No. FTA 2022–0036]

#### Agency Information Collection Activity Under OMB Review: Bus Testing Program

**AGENCY:** Federal Transit Administration, Department of Transportation (DOT).

**ACTION:** Notice of request for comments.

**SUMMARY:** In compliance with the Paperwork Reduction Act of 1995, this notice announces that the Information Collection Requirements (ICRs) abstracted below have been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describe the nature of the information collection and their expected burdens.

**DATES:** Comments must be submitted on or before December 19, 2022.

**ADDRESSES:** Written comments and recommendations for the proposed information collection should be sent

within 30 days of publication of this notice to [www.reginfo.gov/public/do/PRAMain](http://www.reginfo.gov/public/do/PRAMain) Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

**Comments are Invited On:** Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department’s estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology. A comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication of this notice in the **Federal Register**.

**FOR FURTHER INFORMATION CONTACT:** Tia Swain, Office of Administration, Management Planning Division, 1200 New Jersey Avenue SE, Mail Stop TAD–10, Washington, DC 20590 (202) 366–0354 or [tia.swain@dot.gov](mailto:tia.swain@dot.gov).

#### SUPPLEMENTARY INFORMATION:

The Paperwork Reduction Act of 1995 (PRA), Public Law 104–13, section 2, 109 Stat. 163 (1995) (codified as revised at 44 U.S.C. 3501–3520), and its implementing regulations, 5 CFR part 1320, require Federal agencies to issue two notices seeking public comment on information collection activities before OMB may approve paperwork packages. 44 U.S.C. 3506, 3507; 5 CFR 1320.5, 1320.8(d)(1), 1320.12. On August 24, 2022, FTA published a 60-day notice (87 FR 52210) in the **Federal Register** soliciting comments on the ICR that the agency was seeking OMB approval. FTA received no comments after issuing this 60-day notice. Accordingly, DOT announces that these information collection activities have been re-evaluated and certified under 5 CFR 1320.5(a) and forwarded to OMB for review and approval pursuant to 5 CFR 1320.12(c).

Before OMB decides whether to approve these proposed collections of information, it must provide 30 days for public comment. 44 U.S.C. 3507(b); 5 CFR 1320.12(d). Federal law requires OMB to approve or disapprove paperwork packages between 30 and 60 days after the 30-day notice is published. 44 U.S.C. 3507 (b)–(c); 5 CFR 1320.12(d); *see also* 60 FR 44978, 44983, Aug. 29, 1995. OMB believes that the 30-day notice informs the regulated

community to file relevant comments and affords the agency adequate time to digest public comments before it renders a decision. 60 FR 44983, Aug. 29, 1995. Therefore, respondents should submit their respective comments to OMB within 30 days of publication to best ensure having their full effect. 5 CFR 1320.12(c); *see also* 60 FR 44983, Aug. 29, 1995.

The summaries below describe the nature of the information collection requirements (ICRs) and the expected burden. The requirements are being submitted for clearance by OMB as required by the PRA.

*Title:* Bus Testing Program.

*OMB Control Number:* 2132–0550.

*Background:* 49 U.S.C. 5318(a) provides that Federal funds appropriated or otherwise made available under 49 U.S.C. chapter 53 [FTA funding] may not be obligated or expended for the acquisition of a new bus model unless a bus of that model has been tested for maintainability, reliability, safety, performance (including braking performance), structural integrity, fuel economy, emissions, and noise.

At this time, there is one active Bus Testing Center operated by the Thomas D. Larson Pennsylvania Transportation Institute of the Pennsylvania State University (LTI). LTI operates and maintains the Center under a cooperative agreement with FTA and establishes and collects fees for the testing of the vehicles at the facility. Upon completion of the testing of the vehicle at the Center with a passing test score, a draft Bus Testing Report is provided to the manufacturer of the new bus model. If the manufacturer approves the Report for publication, the bus model becomes eligible for FTA funding. 49 CFR 665.7 requires a recipient of FTA funds to certify that a bus model has been tested at the bus testing facility, that the bus model received a passing score, and that the recipient has a copy of the applicable Bus Testing Report(s) on a bus model before final acceptance of any buses of that model. Recipients are strongly encouraged to review the Bus Testing Report(s) relevant to a bus model before final acceptance and/or selection of that bus model.

*Respondents:* Bus manufacturers and recipients of FTA funds.

*Estimated Annual Number of Responses:* 60.

*Estimated Total Annual Burden:* 2,131 hours.

*Frequency:* On occasion.

**Nadine Pembleton,**

*Deputy Associate Administrator, Office of Administration.*

## DEPARTMENT OF TRANSPORTATION

### Federal Transit Administration

#### Limitation on Claims Against a Proposed Public Transportation Project—Silver Line Project

**AGENCY:** Federal Transit Administration (FTA), Department of Transportation (DOT).

**ACTION:** Notice.

**SUMMARY:** This notice announces final environmental actions taken by the Federal Transit Administration (FTA) regarding the construction of the Silver Line Project, formerly known as the Cotton Belt Corridor Regional Rail Project. The purpose of this notice is to publicly announce FTA's environmental decisions on the subject project and to activate the limitation on any claims that may challenge these final environmental actions.

**DATES:** A claim seeking judicial review of FTA actions announced herein for the listed public transportation project will be barred unless the claim is filed on or before April 17, 2023.

**FOR FURTHER INFORMATION CONTACT:** Kathryn Loster, Assistant Chief Counsel, Office of Chief Counsel, (312) 705–1269, or Saadat Khan, Environmental Protection Specialist, Office of Environmental Programs, (202) 366–9647. FTA is located at 1200 New Jersey Avenue SE, Washington, DC 20590. Office hours are from 9 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

**SUPPLEMENTARY INFORMATION:** Notice is hereby given that FTA has taken final agency actions subject to 23 U.S.C. 139(l) by issuing certain approvals for the public transportation project listed below. The actions on the project, as well as the laws under which such actions were taken, are described in the documentation issued in connection with the project to comply with the National Environmental Policy Act (NEPA) and in other documents in the FTA environmental project files for the project. Interested parties may contact either the project sponsor or the relevant FTA Regional Office for more information. Contact information for FTA's Regional Offices may be found at <https://www.transit.dot.gov>.

This notice applies to all FTA decisions on the listed project as of the issuance date of this notice and all laws under which such actions were taken, including, but not limited to, NEPA (42 U.S.C. 4321–4375), section 4(f) requirements (23 U.S.C. 138, 49 U.S.C. 303), section 106 of the National Historic Preservation Act (54 U.S.C. 306108), Endangered Species Act (16 U.S.C. 1531), Clean Water Act (33 U.S.C. 1251), Uniform Relocation and Real Property Acquisition Policies Act (42 U.S.C. 4601), and the Clean Air Act (42 U.S.C. 7401–7671q). This notice does not, however, alter or extend the limitation period for challenges of project decisions subject to previous notices published in the **Federal Register**. The project and actions that are the subject of this notice follow:

*Project name and location:* Silver Line Project, Tarrant, Dallas, and Collin Counties, Texas. *Project Sponsor:* Dallas Area Rapid Transit (DART). *Project description:* The project consists of a 26-mile double-track regional commuter rail line extending from Dallas-Fort Worth International (DFW) Airport to Shiloh Road in Plano. The alignment traverses seven cities: Grapevine, Coppell, Dallas, Carrollton, Addison, Richardson, and Plano. FTA issued a combined Final Environmental Impact Statement (FEIS) and Record of Decision (ROD) on November 9, 2018 for the project. Subsequently, FTA published a notice of limitation on claims against the project on March 19, 2019, per 23 U.S.C. 139(l). Since then, FTA has completed a series of re-evaluations of the project to address changes DART identified resulting from design modifications and stakeholder coordination. This notice only applies to the discrete actions taken by FTA under the re-evaluations, as described below.

*Final agency actions:* FTA determined for each re-evaluation that neither a Supplemental Environmental Impact Statement nor a Supplemental Environmental Assessment is necessary, and the November 2018 FEIS/ROD remains valid. *Supporting documentation:* Memorandum to File Phase A, concerning the relocation of the Equipment Maintenance Facility, dated October 30, 2020; Memorandum to File Phase B, concerning the Elimination of DFW pocket track, Deferral of DFW North Through Platform, Elimination of Oncor Tower Relocation at Cypress Waters Station, and Addition of new at-grade crossing—Huntington Road, dated December 16, 2021; Memorandum to File Phase C, concerning the Elimination of Adaptive Reuse of White Rock Creek Bridge,

dated April 5, 2022; Memorandum to File Phase D, concerning Freight Infrastructure Improvements, dated April 5, 2022; and Memorandum to File Phase E, concerning Hillcrest Road Design Advancement, dated October 6, 2022. All supporting documentation can be viewed and downloaded from: <https://www.dart.org/about/expansion/silverline.asp>.

Authority: 23 U.S.C. 139(l)(1).

BILLING CODE 4910-57-P

## DEPARTMENT OF TRANSPORTATION

[Docket No. DOT-OST-2022-0133]

### Agency Request for Renewal of a Previously Approved Information Collection: Department of Transportation's (DOT/Department) "Individual Complaint of Employment Discrimination" Form

**AGENCY:** Departmental Office of Civil Rights, Office of the Secretary, DOT.

**ACTION:** Notice and request for comments.

**SUMMARY:** DOT invites public comments about its intention to request the Office of Management and Budget (OMB) approval to renew an information collection used by DOT's Equal Employment Opportunity Complaints and Investigations Division within the Departmental Office of Civil Rights. This collection is a form titled "Individual Complaint of Employment Discrimination" (Complaint Form). The Complaint Form is necessary for employees, former employees, and/or applicants for employment to file formal equal employment opportunity (EEO) discrimination complaints against DOT and, in turn, for DOT to process the complaints. The Paperwork Reduction Act of 1995 requires DOT to publish this 60-day notice in the **Federal Register**.

**DATES:** Written comments should be submitted by January 17, 2023.

**ADDRESSES:** You may submit comments [identified by Docket No. DOT-OST-2022-0133] through one of the following methods:

- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the online instructions for submitting comments.
- **Mail or Hand Delivery:** Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Room W12-140, Washington, DC 20590, between 9

a.m. and 5 p.m., Monday through Friday, except on Federal holidays.

### FOR FURTHER INFORMATION CONTACT:

Barbara Dougherty, (202) 366-9850, [barbara.dougherty@dot.gov](mailto:barbara.dougherty@dot.gov), U.S. Department of Transportation/Office of the Secretary/Departmental Office of Civil Rights, 1200 New Jersey Avenue SE, Washington, DC 20590.

### SUPPLEMENTARY INFORMATION:

OMB Control Number: 2105-0556.

Title: Individual Complaint of Employment Discrimination Form (Form Number: DOT-F 1050-8).

Type of Review: Renewal of a previously approved information collection.

Abstract: DOT uses the Complaint Form to collect information necessary to process EEO discrimination complaints filed by DOT employees, former employees and/or applicants for employment. DOT uses the Complaint Form to obtain information from the individual for processing the individual's EEO discrimination complaint and to identify an attorney or other representative, if appropriate. An individual's filing of an EEO discrimination complaint is solely voluntary. DOT processes the complaints in accordance with the U.S. Equal Employment Opportunity Commission's regulations in Title 29, Code of Federal Regulations, Part 1614, as amended.

Respondents: DOT employees, former employees and/or applicants for employment.

Estimated Number of Respondents: 275 per year.

Frequency: Once.

Estimated Hours Burden: One hour.

Estimated Cost Burden: Zero (there is no cost for obtaining the form and it is submitted electronically).

Estimated Total Burden on Respondents: 275 hours per year (one hour per respondent).

Public Comments Invited: DOT requests comment on any aspect of this information collection, including whether the proposed collection is reasonable for the proper performance of the Department's EEO functions; the accuracy of the estimated burden; methods by which the Department could enhance the quality, utility, and clarity of the information collection; and ways the burdens could be minimized without reducing the quality of the collected information. DOT will summarize and include all comments with its request for OMB's renewed approval.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; and 49 CFR 1.49.

Issued in Washington, DC, on November 14, 2022.

**Irene B. Marion,**

*Director, Departmental Office of Civil Rights.*

## DEPARTMENT OF THE TREASURY

### Alcohol and Tobacco Tax and Trade Bureau

[Docket No. TTB-2022-0002]

### Proposed Information Collections; Comment Request (No. 88)

**AGENCY:** Alcohol and Tobacco Tax and Trade Bureau (TTB); Treasury.

**ACTION:** Notice and request for comments.

**SUMMARY:** As part of our continuing effort to reduce paperwork and respondent burden, and as required by the Paperwork Reduction Act of 1995, we invite comments on the proposed or continuing information collections listed below in this document.

**DATES:** We must receive your written comments on or before January 17, 2023.

**ADDRESSES:** You may send comments on the information collections described in this document using one of these two methods:

- **Internet**—To submit comments electronically, use the comment form for this document posted on the "Regulations.gov" e-rulemaking website at <https://www.regulations.gov> within Docket No. TTB-2022-0002.

- **Mail**—Send comments to the Paperwork Reduction Act Officer, Regulations and Rulings Division, Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street, NW, Box 12, Washington, DC 20005.

Please submit separate comments for each specific information collection described in this document. You must reference the information collection's title, form or recordkeeping requirement number (if any), and OMB control number in your comment.

You may view copies of this document, the relevant TTB forms, and any comments received at <https://www.regulations.gov> within Docket No. TTB-2022-0002. TTB has posted a link to that docket on its website at <https://www.ttb.gov/rrd/information-collection-notices>. You also may obtain paper copies of this document, the listed forms, and any comments received by contacting TTB's Paperwork Reduction Act Officer at the addresses or telephone number shown below.

**FOR FURTHER INFORMATION CONTACT:**

Michael Hoover, Regulations and Rulings Division, Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street, NW, Box 12, Washington, DC 20005; 202-453-1039, ext. 135; or complete the Regulations and Rulings Division contact form at <https://www.ttb.gov/contact-rrd>.

**SUPPLEMENTARY INFORMATION:****Request for Comments**

The Department of the Treasury and its Alcohol and Tobacco Tax and Trade Bureau (TTB), as part of a continuing effort to reduce paperwork and respondent burden, invite the general public and other Federal agencies to comment on the proposed or continuing information collections described below, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Comments submitted in response to this document will be included or summarized in our request for Office of Management and Budget (OMB) approval of the relevant information collection. All comments are part of the public record and subject to disclosure. Please do not include any confidential or inappropriate material in your comments.

We invite comments on: (a) Whether an information collection is necessary for the proper performance of the agency's functions, including whether the information has practical utility; (b) the accuracy of the agency's estimate of the information collection's burden; (c) ways to enhance the quality, utility, and clarity of the information collected; (d) ways to minimize the information collection's burden on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide the requested information.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information has a valid OMB control number.

**Information Collections Open for Comment**

Currently, we are seeking comments on the following forms, letterhead applications or notices, recordkeeping requirements, questionnaires, or surveys:

**OMB Control No. 1513-0002**

*Title:* Personnel Questionnaire—Alcohol and Tobacco Products.  
*TTB Form Number:* TTB F 5000.9.

*Abstract:* Provisions of chapters 51 and 52 of the Internal Revenue Code (IRC, 26 U.S.C. chapters 51 and 52) and the Federal Alcohol Administration Act (FAA Act; 27 U.S.C. 201 *et seq.*) require all persons who desire to engage in certain alcohol and tobacco activities to obtain a permit or registration from, or file a notice with, the Secretary of the Treasury (the Secretary) before beginning operations. The IRC and FAA Act provide that an applicant must meet certain qualifications. For example, an applicant is not eligible for such permits or approvals if the Secretary finds that the applicant, (including company officers, directors, or principal investors) is not likely to lawfully operate or has certain criminal convictions. Under its delegated IRC and FAA Act authorities, the Alcohol and Tobacco Tax and Trade Bureau (TTB) regulations authorize the collection of information from applicants so that TTB can determine if they meet the minimum statutory and regulatory qualifications for alcohol and tobacco permits, registrations, or notices. To assist TTB in making such determinations, applicants use form TTB F 5000.9, Personnel Questionnaire—Alcohol and Tobacco, or its electronic Permits Online (PONL) equivalent, to provide TTB with information regarding their identity and their criminal and business history.

*Current Actions:* There are no program changes associated with this information collection, and TTB is submitting for extension purposes only. As for adjustments, due to changes in agency estimates, TTB is increasing the estimated number of annual respondents, responses, and burden hours associated with this collection.

*Type of Review:* Extension of a currently approved collection.

*Affected Public:* Businesses and other for-profits; Individuals and households.

- *Number of Respondents:* 9,850.
- *Average Responses per Respondent:* 1 (one).
- *Number of Responses:* 9,850.
- *Average Per-response Burden:* 51.08 minutes.
- *Total Burden:* 8,386 hours.

**OMB Control No. 1513-0016**

*Title:* Drawback on Wines Exported.  
*TTB Form Number:* TTB F 5120.24.

*Abstract:* In general, the IRC at 26 U.S.C. 5041 imposes Federal excise tax on wine produced or imported into the United States, while section 5362(c) allows domestic wine to be exported, transferred to a foreign trade zone, or used on certain vessels and aircraft without payment of that tax. In the case of taxpaid domestic wine that is

subsequently exported, the IRC at 26 U.S.C. 5062(b) provides that exporters of such wine may claim “drawback” (refund) of the Federal excise tax paid or determined on the exported wine. Under the TTB regulations in 27 CFR part 28, Exportation of Alcohol, exporters of taxpaid domestic wine use form TTB F 5120.24 to document the wine's exportation and to submit drawback claims for the Federal excise taxes paid on the exported wine. TTB uses the provided information to determine if the exported wine is eligible for drawback.

*Current Actions:* There are no program changes or adjustments associated with this information collection, and TTB is submitting it for extension purposes only.

*Type of Review:* Extension of a currently approved collection.

*Affected Public:* Businesses and other for-profits.

- *Number of Respondents:* 40.
- *Average Responses per Respondent:* 4 (four).
- *Number of Responses:* 160.
- *Average Per-response Burden:* 67 minutes.
- *Total Burden:* 179 hours.

**OMB Control No. 1513-0031**

*Title:* Specific and Continuing Transportation Bonds—Distilled Spirits or Wines Withdrawn for Transportation to Manufacturing Bonded Warehouse, Class Six.

*TTB Form Number:* TTB F 5100.12.

*Abstract:* The IRC at 26 U.S.C. 5214(a)(6) and 5362(c)(4) authorizes the transfer without payment of Federal excise tax of, respectively, distilled spirits and wine from a bonded premises to certain customs bonded warehouses for subsequent exportation. To provide proprietors of manufacturing bonded warehouses with operational flexibility based on individual need, the TTB alcohol export regulations in 27 CFR part 28 allow the filing of either a specific transportation bond using form TTB F 5100.12 to cover a single shipment from a bonded premises to a manufacturing bonded warehouse, or a continuing transportation bond using form TTB F 5110.67 to cover multiple shipments.

*Current Actions:* There are no program changes or adjustments associated with this information collection, and TTB is submitting it for extension purposes only.

*Type of Review:* Extension of a currently approved collection.

*Affected Public:* Businesses and other for-profits.

- *Number of Respondents:* 50.
- *Average Responses per Respondent:* 1 (one).

- *Number of Responses:* 50.
- *Average Per-response Burden:* 1 hour.
- *Total Burden:* 50 hours.

OMB Control No. 1513–0056

*Title:* Distilled Spirits Plants—Transaction and Supporting Records.  
*TTB Recordkeeping Number:* TTB REC 5110/05.

*Abstract:* In general, the IRC at 26 U.S.C. 5001 imposes Federal alcohol excise tax on distilled spirits produced or imported into the United States. The IRC at 26 U.S.C. 5207 also provides that distilled spirits plant (DSP) proprietors must maintain records related to their production, storage, denaturing, and processing activities and render reports covering those activities “as the Secretary shall by regulations prescribe.” Under that IRC authority, the TTB regulations in 27 CFR parts 19, 26, 27, and 28 require DSP proprietors to keep certain usual and customary records related to their production, storage, denaturing, and processing activities. This information collection consists of the transaction and supporting records that are common to all four of those DSP activities. Proprietors use those common records, along with records that are unique to each activity, to document the data provided on their monthly DSP production, storage, denaturing, and processing operations reports. (TTB requirements to keep records unique to each of the four DSP activities, and the four related DSP operations reports, are approved under other OMB control numbers.) TTB personnel may examine the required records to verify the data provided by DSP proprietors in their monthly operations reports as those reports are the basis for determining a DSP proprietor’s Federal excise tax liability. This information collection implements the relevant statutory provisions and supports the accurate determination of Federal excise tax.

*Current Actions:* There are no program changes associated with this information collection, and TTB is submitting it for extension purposes only. As for adjustments, due to changes in agency estimates, TTB is increasing the estimated number of annual respondents and responses.

*Type of Review:* Extension of a currently approved collection.

*Affected Public:* Businesses or other for-profits.

- *Number of Respondents:* 4,800.
- *Average Responses per Respondent:* 1 (one).
- *Number of Responses:* 4,800.
- *Average Per-response and Total Burden:* As this information collection

consists of usual and customary records kept by respondents during the normal course of business, under 5 CFR 1320.3(b)(2), there is no additional burden on respondents associated with this information collection.

OMB Control No. 1513–0061

*Title:* Letterhead Applications and Notices Relating to Denatured Spirits.  
*TTB Recordkeeping Number:* TTB REC 5150/2.

*Abstract:* Under the IRC at 26 U.S.C. 5214, denatured spirits (alcohol to which denaturants have been added to render it unfit for beverage purposes) may be withdrawn from distilled spirits plants free of tax for nonbeverage industrial purposes in the manufacture of certain personal and household products. Since it is possible to recover potable alcohol from denatured spirits and articles made with denatured spirits, the IRC at 26 U.S.C. 5271–5275 sets forth provisions relating to denatured spirits and articles made with denatured spirits. Under those IRC authorities, the TTB regulations in 27 CFR part 20 require specially denatured spirits (SDS) dealers and manufacturers of nonbeverage products made with denatured alcohol to apply for and obtain a permit. In addition, the part 20 regulations that concern this information collection require such permit holders to submit letterhead applications and notices to TTB regarding certain changes to permit information, use of alternate methods and emergency variations from requirements, adoption or use of certain formulas, discontinuance of business, losses in transit, and requests to waive certain sample shipment and invoice requirements. The information collected implements the IRC’s statutory provisions regarding denatured spirits.

*Current Actions:* There are no program changes or adjustments associated with this information collection at this time, and TTB is submitting it for extension purposes only.

*Type of Review:* Extension of a currently approved collection.

*Affected Public:* Businesses and other for-profits.

- *Number of Respondents:* 3,800.
- *Average Responses per Respondent:* 1 (one).
- *Number of Responses:* 3,800.
- *Average Per-response Burden:* 30 minutes.
- *Total Burden:* 1,900 hours.

OMB Control No. 1513–0086

*Title:* Marks on Equipment and Structures (TTB REC 5130.3), and Marks

and Labels on Containers of Beer (TTB REC 5130.4).

*TTB Recordkeeping Numbers:* TTB REC 5130.3 and TTB REC 5130.4.

*Abstract:* Under the authority of chapter 51 of the IRC, the TTB regulations in 27 CFR part 25, Beer, require brewers to place certain marks, signs, and measuring devices on their equipment and structures, and to place certain brands, labels, and marks on bulk and consumer containers of beer and other brewery products. The required information identifies the use, capacity, and contents of brewery equipment and structures, as well as taxable brewery products and the responsible taxpayer. As such, the required information is necessary to protect the revenue and ensure effective administration of the IRC’s provisions regarding brewery operations and products. The required information also identifies the contents of bulk and consumer containers of beer and other brewery products. For the purposes of inventory control, cost accounting, equipment utilization, and product identification, TTB believes that brewers would, in the normal course of business, place the information required under the regulations on their equipment and structures and on their bulk and consumers containers of beer and other brewery products, regardless of any TTB requirement to do so.

*Current Actions:* There are no program changes associated with this information collection, and TTB is submitting it for extension purposes only. As for adjustments, due to changes in agency estimates, TTB is increasing the estimated number of annual respondents and responses associated with this collection.

*Type of Review:* Extension of a currently approved collection.

*Affected Public:* Businesses or other for-profits.

- *Number of Respondents:* 13,720.
- *Average Responses per Respondent:* 1 (one).
- *Number of Responses:* 13,720.
- *Average Per-response and Total Burden:* As this information collection consists of usual and customary marks and labels placed by brewers during the normal course of business, under 5 CFR 1320.3(b)(2), there is no additional burden on respondents associated with this information collection.

OMB Control No. 1513–0110

*Title:* Recordkeeping for Tobacco Products Removed in Bond from a Manufacturer’s Premises for Experimental Purposes—27 CFR 40.232(e).

**Abstract:** The IRC at 26 U.S.C. 5704(a) provides that manufacturers of tobacco products may remove tobacco products for experimental purposes without payment of Federal excise tax, as prescribed by regulation. Under that authority, the TTB regulations at 27 CFR 40.232(e) require the keeping of certain usual and customary business records regarding the description, shipment, use, and disposition of tobacco products removed for experimental purposes outside of the factory. These records are subject to TTB inspection and are necessary to protect the revenue, as they allow TTB to account for the lawful experimental use and disposition of nontaxpaid tobacco products, and to detect diversion of such products into the domestic market.

**Current Actions:** There are no program changes or adjustments associated with this information collection, and TTB is submitting it for extension purposes only.

**Type of Review:** Extension of a currently approved collection.

**Affected Public:** Businesses or other for-profits.

- **Number of Respondents:** 235.
- **Average Responses per Respondent:** 1 (one).
- **Number of Responses:** 235.
- **Average Per-response and Total**

**Burden:** As this information collection consists of usual and customary records kept by respondents during the normal course of business, under 5 CFR 1320.3(b)(2), there is no additional burden on respondents associated with this information collection.

**OMB Control No. 1513-0111**

**Title:** COLAs Online Access Request  
**TTB Form Number:** TTB F 5013.2.

**Abstract:** To provide consumers with adequate information as to the identity of alcohol beverages and prohibit consumer deception, the FAA Act at 26 U.S.C. 205, and the TTB regulations in 27 CFR parts 4, 5, and 7 that implement that section, require alcohol beverage bottlers and importers to apply for Certificates of Label Approval (COLAs) for such products introduced into interstate commerce or released from customs custody. Domestic bottlers also must apply for COLA exemptions for certain alcohol beverage products that will not be introduced into interstate or foreign commerce. Respondents may complete and submit COLA and COLA exemption applications electronically using TTB's COLAs Online system. To protect TTB computer systems from cyber threats and misuse, persons desiring to use the COLAs Online system must first receive TTB approval of a COLAs Online Access Request. The

collected information identifies the applicant and confirms their authority to act on behalf of a specific alcohol beverage industry member. Applicants submit COLAs Online Access Requests electronically using the COLAs Online User Registration function or its paper equivalent, TTB F 5013.2, COLAs Online Access Request.

**Current Actions:** There are no program changes associated with this information collection, and TTB is submitting it for extension purposes only. As for adjustments, due to changes in agency estimates, TTB is increasing the estimated number of annual respondents, responses, and total burden hours associated with this collection.

**Type of Review:** Extension of a currently approved collection.

**Affected Public:** Businesses or other for-profits.

- **Number of Respondents:** 4,200.
- **Average Responses per Respondent:** 1 (one).
- **Number of Responses:** 4,200.
- **Average Per-response Burden:** 18 minutes
- **Total Burden:** 1,260 hours.

**OMB Control No. 1513-0124**

**Title:** Customer Satisfaction Surveys for Permit Applications, Permits Online (PONL), Formulas Online (FONL), and COLAs Online.

**Abstract:** As part of TTB's efforts to improve customer service, we survey customers who submit applications for original or amended alcohol or tobacco permits, or for approval of alcohol beverage formulas or certificates of label approval (COLAs). These surveys assist TTB in identifying potential customer needs and problems, along with opportunities for improvement in our applications processes, with particular focus on customer experiences with TTB's various electronic application systems, Permits Online (PONL), Formulas Online (FONL), and COLAs Online.

**Current Actions:** There are no program changes associated with this information collection, and TTB is submitting it for extension purposes only. As for adjustments, due to changes in agency estimates, TTB is decreasing the estimated number of annual respondents, responses, and total burden hours associated with this collection.

**Type of Review:** Extension of a currently approved collection.

**Affected Public:** Businesses or other for-profits; and Individuals or households.

- **Number of Respondents:** 16,000.
- **Average Responses per Respondent:** 1 (one).

- **Number of Responses:** 16,000.
- **Average Per-response Burden:** 12 minutes.
- **Total Burden:** 3200 hours.

**OMB Control No. 1513-0142**

**Title:** CBMA Imports Refund Program—Foreign Producer Registration and Assignment System; CBMA Importer Refund Claims System.

**Abstract:** The IRC at 26 U.S.C. 5001, 5041, and 5051 imposes Federal excise tax on, respectively, distilled spirits, wine, and beer manufactured in or imported into the United States. Under the Craft Beverage Modernization Act (CBMA), certain limited quantities of those products are eligible for lower excise tax rates (see sections 13801–13808 of the Tax Cuts and Jobs Act of 2017, Pub. L. 115–97). Recent amendments to the IRC and CBMA made by the Taxpayer Certainty and Disaster Tax Relief Act of 2020 (Tax Relief Act; Division EE of Pub. L. 116–260) transferred responsibility for administering those CBMA reduced excise tax rate provisions from Customs and Border Protection (CBP) to the Treasury Department, effective January 1, 2023. In addition, rather than receiving CBMA tax benefits at the time of an import's entry, for entries after that date, U.S. importers are required to pay the full excise tax rate to CBP and then subsequently submit refund claims to Treasury to receive their assigned CBMA tax benefits. Under the IRC at 26 U.S.C. 5001(c), 5041(c), and 5051(a), a U.S. importer will only be eligible for CBMA tax benefits if a foreign producer has elected to assign, and the importer has elected to receive, such benefits in accordance with regulations and procedures issued by the Secretary. Finally, under the new provision at 26 U.S.C. 6038E, foreign producers electing to make such assignments are required to provide the information the Secretary requires by regulation, including information about controlled group structures of such producers.

Under those amended IRC authorities, and authorities delegated to TTB by the Secretary, TTB issued temporary regulations in 27 CFR part 27 establishing procedures for alcohol industry members to take advantage of the CBMA tax benefits (see T.D. TTB–186, 09/23/2022, 87 FR 58021). In particular, the new regulations establish the procedures by which (1) Foreign producers may assign CBMA tax benefits to U.S. importers, and (2) U.S. importers may elect to receive those assignments and submit their CBMA tax benefit refund claims to TTB. This information collection is required to ensure that the IRC provisions regarding

CBMA tax benefit refund claims for U.S. alcohol importers are appropriately applied, which is necessary to protect the revenue.

*Current Actions:* There are no program changes or adjustments associated with this information collection, which was recently approved by the Office of Management and Budget on an emergency basis, and TTB is submitting it for extension purposes only.

*Type of Review:* Extension of a currently approved collection.

*Affected Public:* Businesses and other for-profits.

- *Number of Respondents:* 26,000.
- *Average Responses per Respondent:* 1.8077.
- *Number of Responses:* 47,000.
- *Average Per-response Burden:* 2 hours.
- *Total Burden:* 94,000 hours.

Dated: November 15, 2022.

**Amy R. Greenberg,**

*Director, Regulations and Rulings Division.*

## DEPARTMENT OF THE TREASURY

### Office of Foreign Assets Control

#### Notice of OFAC Sanctions Actions

**AGENCY:** Office of Foreign Assets Control, Treasury.

**ACTION:** Notice.

**SUMMARY:** The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of one or more persons and property that have been placed on OFAC's Specially Designated Nationals and Blocked Persons List (SDN List) based on OFAC's determination that one or more applicable legal criteria were satisfied. All property and interests in property subject to U.S. jurisdiction of these persons are blocked, and U.S. persons are generally prohibited from engaging in transactions with them. Additionally, OFAC is publishing updates to the identifying information of one person currently included on the SDN List. OFAC is further publishing the name of one person that has been removed from the SDN List.

**DATES:** See **SUPPLEMENTARY INFORMATION** section for effective date(s).

**FOR FURTHER INFORMATION CONTACT:**

OFAC: Andrea Gacki, Director, tel.: 202–622–2490; Associate Director for Global Targeting, tel.: 202–622–2420; Assistant Director for Licensing, tel.: 202–622–2480; Assistant Director for Regulatory Affairs, tel.: 202–622–4855; or the Assistant Director for Sanctions Compliance & Evaluation, tel.: 202–622–2490.

**SUPPLEMENTARY INFORMATION:**

#### Electronic Availability

The SDN List and additional information concerning OFAC sanctions programs are available on OFAC's website (<https://www.treasury.gov/ofac>).

#### Notice of OFAC Actions

A. On November 14, 2022, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following persons are blocked and also identified the following property as blocked under the relevant sanctions authority listed below.

**BILLING CODE 4810–AL–P**

**Individuals:**

1. ALIEV, Murat Magomedovich (Cyrillic: АЛИЕВ, Мурат Магомедович), Haldenstrasse, Bld 20, Apt. 1.2, Luzern 6006, Switzerland; Bolshoy Afanasyevskiy Lane, Apt. 41, Moscow 119019, Russia; Gesegnetmattstrasse 16/18, Luzern 6006, Switzerland; DOB 24 May 1979; POB Nalchik, Russia; nationality Russia; Gender Male; Passport 753717301 (Russia) issued 15 Sep 2016 expires 15 Sep 2026; alt. Passport 753606344 (Russia) issued 19 Aug 2016 expires 19 Aug 2026; National ID No. 8300091117 (Russia) (individual) [RUSSIA-EO14024].

Designated pursuant to section 1(a)(i) of Executive Order 14024 of April 15, 2021, "Blocking Property With Respect To Specified Harmful Foreign Activities of the Government of the Russian Federation," 86 FR 20249 (April 19, 2021) (E.O. 14024) for operating or having operated in the financial services sector of the Russian Federation economy.

2. GADZHIEV, Nariman Gadzhievich (a.k.a. GADZHIYEV, Nariman Gadzhiyevich), Tannegg 1, St. Niklausen 6005, Switzerland; Dubai, United Arab Emirates; DOB 31 May 1976; POB Derbent, Russia; nationality Russia; alt. nationality Saint Kitts and Nevis; Gender Male; Passport RE0032776 (Saint Kitts and Nevis) issued 19 Feb 2015 expires 18 Feb 2025 (individual) [RUSSIA-EO14024] (Linked To: KERIMOV, Suleiman Abusaidovich).

Designated pursuant to section 1(a)(vii) of E.O. 14024 for having acted or purported to act for or on behalf of, directly or indirectly, Suleiman Abusaidovich Kerimov, a person whose property and interests in property are blocked pursuant to E.O. 14024.

3. KATZ, Laurin, Switzerland; DOB 15 Jan 1988; POB Zurich, Switzerland; nationality Switzerland; Gender Male (individual) [RUSSIA-EO14024] (Linked To: KERIMOVA, Gulnara Suleymanovna).

Designated pursuant to section 1(a)(vii) of E.O. 14024 for having acted or purported to act for or on behalf of, directly or indirectly, Gulnara Suleymanovna Kerimova, a person whose property and interests in property are blocked pursuant to E.O. 14024.

4. KERIMOV, Said Suleymanovich (a.k.a. KERIMOV, Said Suleimanovich), Apt 270, Build. 31, Pyatnitskoe Shosse, Moscow 123430, Russia; DOB 06 Jul 1995; POB Moscow, Russia; alt. POB Makhachkala, Republic of Dagestan, Russia; nationality Russia; Gender Male; Passport 724109376 (Russia) issued 17 Apr 2013 expires 17 Apr 2023; National ID No. 4515180935 (Russia); Tax ID No. 773382620676 (Russia) (individual) [RUSSIA-EO14024] (Linked To: KERIMOV, Suleiman Abusaidovich).

Designated pursuant to section 1(a)(v) of E.O. 14024 for being a spouse or adult child of Suleiman Abusaidovich Kerimov, a person whose property and interests in property are blocked pursuant to section 1(a)(iii) of E.O. 14024.

5. KERIMOVA, Amina Suleymanovna (a.k.a. KERIMOVA, Aminat Suleymanovna), Apt. 270, Build. 31, Pyatnitskoe Shosse, Moscow 123430, Russia; DOB 26 Sep 2003; POB Moscow, Russia; nationality Russia; Gender Female; Passport 724263564 (Russia) issued 26 Apr 2013 expires 26 Apr 2023 (individual) [RUSSIA-EO14024] (Linked To: KERIMOV, Suleiman Abusaidovich).

Designated pursuant to section 1(a)(v) of E.O. 14024 for being a spouse or adult child of Suleiman Abusaidovich Kerimov, a person whose property and interests in property are blocked pursuant to section 1(a)(iii) of E.O. 14024.

6. KERIMOVA, Firuza Nazimovna (a.k.a. KHANBALAEVA, Firuza Nazimovna), Apt. 270, Build. 31, Pyatnitskoe Shosse, Moscow 123430, Russia; DOB 22 Dec 1967; alt. DOB 22 Oct 1967; POB Makhachkala, Russia; nationality Russia; Gender Female; Passport 724348524 (Russia) issued 06 May 2013 expires 06 May 2023; National ID No. 4512970434 (Russia); Tax ID No. 052901215575 (Russia) (individual) [RUSSIA-EO14024] (Linked To: KERIMOV, Suleiman Abusaidovich).

### Medicare and Medicaid Programs; CY 2023 Payment Policies Under the Physician Fee Schedule and Other Changes to Part B Payment and Coverage Policies; Medicare Shared Savings Program Requirements; Implementing Requirements for Manufacturers of Certain Single-dose Container or Single-use Package Drugs To Provide Refunds With Respect to Discarded Amounts; and COVID–19 Interim Final Rules

**AGENCY:** Centers for Medicare & Medicaid Services (CMS), Health and Human Services (HHS).

**ACTION:** Final rule and interim final rules.

**SUMMARY:** This major final rule addresses: changes to the physician fee schedule (PFS); other changes to Medicare Part B payment policies to ensure that payment systems are updated to reflect changes in medical practice, relative value of services, and changes in the statute; Medicare Shared Savings Program requirements; updates to the Quality Payment Program; Medicare coverage of opioid use disorder services furnished by opioid treatment programs; updates to certain Medicare and Medicaid provider enrollment policies, including for skilled nursing facilities; updates to conditions of payment for DMEPOS suppliers; HCPCS Level II coding and payment for wound care management products; electronic prescribing for controlled substances for a covered Part D drug under a prescription drug plan or an MA–PD plan under the Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment (SUPPORT) for Patients and Communities Act (SUPPORT Act); updates to the Medicare Ground Ambulance Data Collection System; provisions under the Infrastructure Investment and Jobs Act; and finalizes the CY 2022 Methadone Payment Exception for Opioid Treatment Programs IFC. We are also finalizing, as implemented, a few provisions included in the COVID–19 interim final rules with comment period.

**DATES:** These regulations are effective on January 1, 2023.

**FOR FURTHER INFORMATION CONTACT:** *MedicarePhysicianFeeSchedule@cms.hhs.gov*, for any issues not identified below. Please indicate the specific issue in the subject line of the email.

Michael Soracoe, (410) 786–6312, for issues related to practice expense, work RVUs, conversion factor, and PFS specialty-specific impacts.

Kris Corwin, (410) 786–8864, for issues related to the comment solicitation on strategies for updates to practice expense data collection and methodology.

Sarah Leipnik, (410) 786–3933, and Anne Blackfield, (410) 786–8518, for issues related to the comment solicitation on strategies for improving global surgical package valuation.

Larry Chan, (410) 786–6864, for issues related to potentially misvalued services under the PFS.

Kris Corwin, (410) 786–8864, Patrick Sartini, (410) 786–9252, and Larry Chan, (410) 786–6864, for issues related to telehealth services and other services involving communications technology.

Regina Walker-Wren, (410) 786–9160, for issues related to nurse practitioner and clinical nurse specialist certification by the Nurse Portfolio Credentialing Center (NPCC).

Lindsey Baldwin, (410) 786–1694, or *MedicarePhysicianFeeSchedule@cms.hhs.gov*, for issues related to PFS payment for behavioral health services.

*MedicarePhysicianFeeSchedule@cms.hhs.gov*, for issues related to PFS payment for evaluation and management services.

Geri Mondowney, (410) 786–1172, Morgan Kitzmiller, (410) 786–1623, Julie Rauch, (410) 786–8932, and Tamika Brock, (312) 886–7904, for issues related to malpractice RVUs and geographic practice cost indices (GPCIs).

*MedicarePhysicianFeeSchedule@cms.hhs.gov*, for issues related to non-face-to-face nonphysician services/remote therapeutic monitoring services (RTM).

Zehra Hussain, (214) 767–4463, or *MedicarePhysicianFeeSchedule@cms.hhs.gov*, for issues related to payment of skin substitutes.

Pamela West, (410) 786–2302, for issues related to revisions to regulations to allow audiologists to furnish diagnostic tests, as appropriate without a physician order.

Emily Forrest, (410) 786–8011, Laura Ashbaugh, (410) 786–1113, Anne Blackfield, (410) 786–8518, and Erick Carrera, (410) 786–8949, for issues related to PFS payment for dental services.

Heidi Oumarou, (410) 786–7942, for issues related to the rebasing and revising of the Medicare Economic Index (MEI).

Laura Kennedy, (410) 786–3377, Adam Brooks, (202) 205–0671, and Rachel Radzyner, (410) 786–8215, for issues related to requiring manufacturers of certain single-dose container or single-use package drugs payable under Medicare Part B to provide refunds with respect to discarded amounts.

Laura Ashbaugh, (410) 786–1113, and Rasheeda Arthur, (410) 786–3434, for issues related to Clinical Laboratory Fee Schedule.

Lisa Parker, (410) 786–4949, or *FQHC-PPS@cms.hhs.gov*, for issues related to FQHCs.

Michele Franklin, (410) 786–9226, or *RHC@cms.hhs.gov*, for issues related to RHCs.

Daniel Feller, (410) 786–6913, and Elizabeth Truong, (410) 786–6005, for issues related to coverage of colorectal cancer screening.

Heather Hostetler, (410) 786–4515, for issues related to removal of selected national coverage determinations.

Lindsey Baldwin, (410) 786–1694, for issues related to Medicare coverage of opioid use disorder treatment services furnished by opioid treatment programs.

Sabrina Ahmed, (410) 786–7499, or *SharedSavingsProgram@cms.hhs.gov*, for issues related to the Medicare Shared Savings Program (Shared Savings Program) Quality performance standard and quality reporting requirements.

Aryanna Abouzari, (415) 744–3668, or *SharedSavingsProgram@cms.hhs.gov*, for issues related to the Shared Savings Program burden reduction proposal on OHCA's.

Janae James, (410) 786–0801, or Elizabeth November, (410) 786–4518, or *SharedSavingsProgram@cms.hhs.gov*, for issues related to Shared Savings Program beneficiary assignment and financial methodology.

Lucy Bertocci, (410) 786–4008, or *SharedSavingsProgram@cms.hhs.gov*, for inquiries related to Shared Savings Program advance investment payments, participation options and burden reduction policies.

Rachel Radzyner, (410) 786–8215, and Michelle Cruse, (443) 478–6390, for issues related to vaccine administration services.

Katie Parker, (410) 786–0537, for issues related to medical necessity and documentation requirements for nonemergency, scheduled, repetitive ambulance services.

Frank Whelan, (410) 786–1302, for issues related to Medicare provider

enrollment regulation updates (including for skilled nursing facilities), State options for implementing Medicaid provider enrollment affiliation provisions, and conditions of payment for DMEPOS suppliers.

Mei Zhang, (410) 786–7837, and Kimberly Go, (410) 786–4560, for issues related to requirement for electronic prescribing for controlled substances for a covered Part D drug under a prescription drug plan or an MA–PD plan (section 2003 of the SUPPORT Act).

Amy Gruber, (410) 786–1542, or *AmbulanceDataCollection@cms.hhs.gov*, for issues related to the Medicare Ground Ambulance Data Collection System and Ambulance Fee Schedule (AFS).

Sundus Ashar, *Sundus.ashar1@cms.hhs.gov*, for issues related to HCPCS Level II Coding for skin substitutes.

Renee O'Neill, (410) 786–8821, or Kati Moore, (410) 786–5471, for inquiries related to Merit-based Incentive Payment System (MIPS).

Richard Jensen, (410) 786–6126, for inquiries related to Alternative Payment Models (APMs).

Lindsey Baldwin, (410) 786–1694 for inquiries related to Opioid Treatment Programs: CY 2022 Methadone Payment Exception.

#### SUPPLEMENTARY INFORMATION:

##### I. Executive Summary

This major final rule revises payment policies under the Medicare PFS and makes other policy changes, including to the implementation of certain provisions of the Consolidated Appropriations Act, 2022 (CAA, 2022) (Pub. L. 117–103, March 15, 2022), Protecting Medicare and American Farmers from Sequester Cuts Act (PMAFSCA) (Pub. L. 117–71, December 10, 2021), Infrastructure Investment and Jobs Act (Pub. L. 117–58, November 15, 2021), Consolidated Appropriations Act, 2021 (CAA, 2021) (Pub. L. 116–260, December 27, 2020), Bipartisan Budget Act of 2018 (BBA of 2018) (Pub. L. 115–123, February 9, 2018) and the Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment (SUPPORT) for Patients and Communities Act (the SUPPORT Act) (Pub. L. 115–271, October 24, 2018), related to Medicare Part B payment. In addition, this major final rule includes provisions regarding other Medicare payment policies described in sections III. and IV.

##### B. Summary of the Major Provisions

The statute requires us to establish payments under the PFS, based on

national uniform relative value units (RVUs) that account for the relative resources used in furnishing a service. The statute requires that RVUs be established for three categories of resources: work, practice expense (PE), and malpractice (MP) expense. In addition, the statute requires that each year we establish, by regulation, the payment amounts for physicians' services paid under the PFS, including geographic adjustments to reflect the variations in the costs of furnishing services in different geographic areas.

In this major final rule, we are establishing RVUs for CY 2023 for the PFS to ensure that our payment systems are updated to reflect changes in medical practice and the relative value of services, as well as changes in the statute. This final rule also includes discussions and provisions regarding several other Medicare Part B payment policies.

Specifically, this final rule addresses:

- Determination of PE RVUs (section II.B.)
- Potentially Misvalued Services Under the PFS (section II.C.)
- Payment for Medicare Telehealth Services Under Section 1834(m) of the Act (section II.D.)
- Valuation of Specific Codes (section II.E.)
- Evaluation and Management (E/M) Visits (section II.F.)
- Geographic Practice Cost Indices (GPCI) (section II.G.)
- Determination of Malpractice Relative Value Units (RVUs) (section II.H.)
- Non-Face-to-Face/Remote Therapeutic Monitoring (RTM) Services (section II.I.)
- Payment for Skin Substitutes (section II.J.)
- Provision to Allow Audiologists to Furnish Certain Diagnostic Tests Without a Physician Order (section II.K.)
- Provisions on Medicare Parts A and B Payment for Dental Services (section II.L.)
- Rebasing and Revising the Medicare Economic Index (MEI) (section II.M.)
- Requiring Manufacturers of Certain Single-dose Container or Single-use Package Drugs to Provide Refunds with Respect to Discarded Amounts (§§ 414.902 and 414.940) (section III.A.)
- Rural Health Clinics (RHCs) and Federally Qualified Health Centers (FQHCs) (section III.B.)
- Clinical Laboratory Fee Schedule: Revised Data Reporting Period and Phase-in of Payment Reductions, and Policies for Specimen Collection Fees and Travel Allowance for Clinical Diagnostic Laboratory Tests (section III.C.)

- Expansion of Coverage for Colorectal Cancer Screening and Reducing Barriers (section III.D.)
- Removal of Selected National Coverage Determinations (section III.E.)
- Modifications Related to Medicare Coverage for Opioid Use Disorder (OUD) Treatment Services Furnished by Opioid Treatment Programs (OTPs) (section III.F.)
- Medicare Shared Savings Program (section III.G.)
- Medicare Part B Payment for Preventive Vaccine Administration Services (section III.H.)
- Medical Necessity and Documentation Requirements for Nonemergency, Scheduled, Repetitive Ambulance Services (section III.I.)
- Medicare Provider and Supplier Enrollment and Conditions of DMEPOS Payment (section III.J.)
- State Options for Implementing Medicaid Provider Enrollment Affiliation Provision (section III.K.)
- Requirement for Electronic Prescribing for Controlled Substances for a Covered Part D Drug under a Prescription Drug Plan or an MA–PD Plan (section 2003 of the SUPPORT Act) (section III.L.)
- Medicare Ground Ambulance Data Collection System (GADCS) (section III.M.)
- Revisions to HCPCS Level II Coding Procedures for Skin Substitutes Products (section III.N.)
- Updates to the Quality Payment Program (section IV.)
- Opioid Treatment Programs: CY 2022 Methadone Payment Exception and Origin and Destination Requirements Under the Ambulance Fee Schedule (section V.A.)
- Finalizing provisions from the Medicare and Medicaid Programs; Policy and Regulatory Revisions in Response to the COVID–19 Public Health Emergency (CMS–1744–IFC) (Section V.B.)
- Finalizing provisions from the Medicare and Medicaid Programs, Basic Health Program, and Exchanges; Additional Policy and Regulatory Revisions in Response to the COVID–19 Public Health Emergency and Delay of Certain Reporting Requirements for the Skilled Nursing Facility Quality Reporting Program (CMS–5531–IFC) (Section V.C.)
- Collection of Information Requirements (section VI.)
- Regulatory Impact Analysis (section VII.)

##### 3. Summary of Costs and Benefits

We have determined that this final rule is economically significant. For a detailed discussion of the economic

impacts, see section VII., Regulatory Impact Analysis, of this final rule.

## B. Determination of PE RVUs

### 1. Overview

Practice expense (PE) is the portion of the resources used in furnishing a service that reflects the general categories of physician and practitioner expenses, such as office rent and personnel wages, but excluding malpractice (MP) expenses, as specified in section 1848(c)(1)(B) of the Act. As required by section 1848(c)(2)(C)(ii) of the Act, we use a resource-based system for determining PE RVUs for each physicians' service. We develop PE RVUs by considering the direct and indirect practice resources involved in furnishing each service. Direct expense categories include clinical labor, medical supplies, and medical equipment. Indirect expenses include administrative labor, office expense, and all other expenses. The sections that follow provide more detailed information about the methodology for translating the resources involved in furnishing each service into service specific PE RVUs. We refer readers to the CY 2010 Physician Fee Schedule (PFS) final rule with comment period (74 FR 61743 through 61748) for a more detailed explanation of the PE methodology.

### 2. Practice Expense Methodology

#### a. Direct Practice Expense

We determine the direct PE for a specific service by adding the costs of the direct resources (that is, the clinical staff, medical supplies, and medical equipment) typically involved with furnishing that service. The costs of the resources are calculated using the refined direct PE inputs assigned to each CPT code in our PE database, which are generally based on our review of recommendations received from the RUC and those provided in response to public comment periods. For a detailed explanation of the direct PE methodology, including examples, we refer readers to the 5-year review of work RVUs under the PFS and proposed changes to the PE methodology CY 2007 PFS proposed notice (71 FR 37242) and the CY 2007 PFS final rule with comment period (71 FR 69629).

#### b. Indirect Practice Expense per Hour Data

We use survey data on indirect PEs incurred per hour worked, in developing the indirect portion of the PE RVUs. Prior to CY 2010, we primarily used the PE/HR by specialty that was obtained from the AMA's SMS.

The AMA administered a new survey in CY 2007 and CY 2008, the Physician Practice Information Survey (PPIS). The PPIS is a multispecialty, nationally representative, PE survey of both physicians and NPPs paid under the PFS using a survey instrument and methods highly consistent with those used for the SMS and the supplemental surveys. The PPIS gathered information from 3,656 respondents across 51 physician specialty and health care professional groups. We believe the PPIS is the most comprehensive source of PE survey information available. We used the PPIS data to update the PE/HR data for the CY 2010 PFS for almost all of the Medicare recognized specialties that participated in the survey.

When we began using the PPIS data in CY 2010, we did not change the PE RVU methodology itself or the manner in which the PE/HR data are used in that methodology. We only updated the PE/HR data based on the new survey. Furthermore, as we explained in the CY 2010 PFS final rule with comment period (74 FR 61751), because of the magnitude of payment reductions for some specialties resulting from the use of the PPIS data, we transitioned its use over a 4-year period from the previous PE RVUs to the PE RVUs developed using the new PPIS data. As provided in the CY 2010 PFS final rule with comment period (74 FR 61751), the transition to the PPIS data was complete for CY 2013. Therefore, PE RVUs from CY 2013 forward are developed based entirely on the PPIS data, except as noted in this section.

Section 1848(c)(2)(H)(i) of the Act requires us to use the medical oncology supplemental survey data submitted in 2003 for oncology drug administration services. Therefore, the PE/HR for medical oncology, hematology, and hematology/oncology reflects the continued use of these supplemental survey data.

Supplemental survey data on independent labs from the College of American Pathologists were implemented for payments beginning in CY 2005. Supplemental survey data from the National Coalition of Quality Diagnostic Imaging Services (NCQDIS), representing independent diagnostic testing facilities (IDTFs), were blended with supplementary survey data from the American College of Radiology (ACR) and implemented for payments beginning in CY 2007. Neither IDTFs, nor independent labs, participated in the PPIS. Therefore, we continue to use the PE/HR that was developed from their supplemental survey data.

Consistent with our past practice, the previous indirect PE/HR values from the

supplemental surveys for these specialties were updated to CY 2006 using the Medicare Economic Index (MEI) to put them on a comparable basis with the PPIS data.

We also do not use the PPIS data for reproductive endocrinology and spine surgery since these specialties currently are not separately recognized by Medicare, nor do we have a method to blend the PPIS data with Medicare recognized specialty data.

Previously, we established PE/HR values for various specialties without SMS or supplemental survey data by crosswalking them to other similar specialties to estimate a proxy PE/HR. For specialties that were part of the PPIS for which we previously used a crosswalked PE/HR, we instead used the PPIS based PE/HR. We use crosswalks for specialties that did not participate in the PPIS. These crosswalks have been generally established through notice and comment rulemaking and are available in the file titled "CY 2023 PFS final rule PE/HR" on the CMS website under downloads for the CY 2023 PFS final rule at <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/PFS-Federal-Regulation-Notices.html>.

#### c. Allocation of PE to Services

To establish PE RVUs for specific services, it is necessary to establish the direct and indirect PE associated with each service.

##### (1) Direct Costs

The relative relationship between the direct cost portions of the PE RVUs for any two services is determined by the relative relationship between the sum of the direct cost resources (that is, the clinical staff, medical supplies, and medical equipment) typically involved with furnishing each of the services. The costs of these resources are calculated from the refined direct PE inputs in our PE database. For example, if one service has a direct cost sum of \$400 from our PE database and another service has a direct cost sum of \$200, the direct portion of the PE RVUs of the first service would be twice as much as the direct portion of the PE RVUs for the second service.

##### (2) Indirect Costs

We allocate the indirect costs at the code level based on the direct costs specifically associated with a code and the greater of either the clinical labor costs or the work RVUs. We also incorporate the survey data described earlier in the PE/HR discussion. The general approach to developing the

indirect portion of the PE RVUs is as follows:

- For a given service, we use the direct portion of the PE RVUs calculated as previously described and the average percentage that direct costs represent of total costs (based on survey data) across the specialties that furnish the service to determine an initial indirect allocator. That is, the initial indirect allocator is calculated so that the direct costs equal the average percentage of direct costs of those specialties furnishing the service. For example, if the direct portion of the PE RVUs for a given service is 2.00 and direct costs, on average, represent 25 percent of total costs for the specialties that furnish the service, the initial indirect allocator would be calculated so that it equals 75 percent of the total PE RVUs. Thus, in this example, the initial indirect allocator would equal 6.00, resulting in a total PE RVU of 8.00 (2.00 is 25 percent of 8.00 and 6.00 is 75 percent of 8.00).

- Next, we add the greater of the work RVUs or clinical labor portion of the direct portion of the PE RVUs to this initial indirect allocator. In our example, if this service had a work RVU of 4.00 and the clinical labor portion of the direct PE RVU was 1.50, we would add 4.00 (since the 4.00 work RVUs are greater than the 1.50 clinical labor portion) to the initial indirect allocator of 6.00 to get an indirect allocator of 10.00. In the absence of any further use of the survey data, the relative relationship between the indirect cost portions of the PE RVUs for any two services would be determined by the relative relationship between these indirect cost allocators. For example, if one service had an indirect cost allocator of 10.00 and another service had an indirect cost allocator of 5.00, the indirect portion of the PE RVUs of the first service would be twice as great as the indirect portion of the PE RVUs for the second service.

- Then, we incorporate the specialty specific indirect PE/HR data into the calculation. In our example, if, based on the survey data, the average indirect cost of the specialties furnishing the first service with an allocator of 10.00 was half of the average indirect cost of the specialties furnishing the second service with an indirect allocator of 5.00, the indirect portion of the PE RVUs of the first service would be equal to that of the second service.

### (3) Facility and Nonfacility Costs

For procedures that can be furnished in a physician's office, as well as in a facility setting, where Medicare makes a separate payment to the facility for its costs in furnishing a service, we

establish two PE RVUs: facility and nonfacility. The methodology for calculating PE RVUs is the same for both the facility and nonfacility RVUs, but is applied independently to yield two separate PE RVUs. In calculating the PE RVUs for services furnished in a facility, we do not include resources that would generally not be provided by physicians when furnishing the service. For this reason, the facility PE RVUs are generally lower than the nonfacility PE RVUs.

### (4) Services With Technical Components and Professional Components

Diagnostic services are generally comprised of two components: a professional component (PC); and a technical component (TC). The PC and TC may be furnished independently or by different providers, or they may be furnished together as a global service. When services have separately billable PC and TC components, the payment for the global service equals the sum of the payment for the TC and PC. To achieve this, we use a weighted average of the ratio of indirect to direct costs across all the specialties that furnish the global service, TCs, and PCs; that is, we apply the same weighted average indirect percentage factor to allocate indirect expenses to the global service, PCs, and TCs for a service. (The direct PE RVUs for the TC and PC sum to the global.)

### (5) PE RVU Methodology

For a more detailed description of the PE RVU methodology, we direct readers to the CY 2010 PFS final rule with comment period (74 FR 61745 through 61746). We also direct readers to the file titled "Calculation of PE RVUs under Methodology for Selected Codes" which is available on our website under downloads for the CY 2023 PFS final rule at <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/PFS-Federal-Regulation-Notices.html>. This file contains a table that illustrates the calculation of PE RVUs as described in this final rule for individual codes.

#### (a) Setup File

First, we create a setup file for the PE methodology. The setup file contains the direct cost inputs, the utilization for each procedure code at the specialty and facility/nonfacility place of service level, and the specialty specific PE/HR data calculated from the surveys.

#### (b) Calculate the Direct Cost PE RVUs

Sum the costs of each direct input.  
*Step 1:* Sum the direct costs of the inputs for each service.

*Step 2:* Calculate the aggregate pool of direct PE costs for the current year. We set the aggregate pool of PE costs equal to the product of the ratio of the current aggregate PE RVUs to current aggregate work RVUs and the projected aggregate work RVUs.

*Step 3:* Calculate the aggregate pool of direct PE costs for use in ratesetting. This is the product of the aggregate direct costs for all services from Step 1 and the utilization data for that service.

*Step 4:* Using the results of Step 2 and Step 3, use the CF to calculate a direct PE scaling adjustment to ensure that the aggregate pool of direct PE costs calculated in Step 3 does not vary from the aggregate pool of direct PE costs for the current year. Apply the scaling adjustment to the direct costs for each service (as calculated in Step 1).

*Step 5:* Convert the results of Step 4 to an RVU scale for each service. To do this, divide the results of Step 4 by the CF. Note that the actual value of the CF used in this calculation does not influence the final direct cost PE RVUs as long as the same CF is used in Step 4 and Step 5. Different CFs would result in different direct PE scaling adjustments, but this has no effect on the final direct cost PE RVUs since changes in the CFs and changes in the associated direct scaling adjustments offset one another.

#### (c) Create the Indirect Cost PE RVUs

Create indirect allocators.

*Step 6:* Based on the survey data, calculate direct and indirect PE percentages for each physician specialty.

*Step 7:* Calculate direct and indirect PE percentages at the service level by taking a weighted average of the results of Step 6 for the specialties that furnish the service. Note that for services with TCs and PCs, the direct and indirect percentages for a given service do not vary by the PC, TC, and global service.

We generally use an average of the 3 most recent years of available Medicare claims data to determine the specialty mix assigned to each code. Codes with low Medicare service volume require special attention since billing or enrollment irregularities for a given year can result in significant changes in specialty mix assignment. We finalized a policy in the CY 2018 PFS final rule (82 FR 52982 through 52983) to use the most recent year of claims data to determine which codes are low volume for the coming year (those that have fewer than 100 allowed services in the Medicare claims data). For codes that fall into this category, instead of assigning specialty mix based on the specialties of the practitioners reporting

the services in the claims data, we use the expected specialty that we identify on a list developed based on medical review and input from expert interested parties. We display this list of expected specialty assignments as part of the annual set of data files we make available as part of notice and comment rulemaking and consider recommendations from the RUC and other interested parties on changes to this list on an annual basis. Services for which the specialty is automatically assigned based on previously finalized policies under our established methodology (for example, “always therapy” services) are unaffected by the list of expected specialty assignments. We also finalized in the CY 2018 PFS

final rule (82 FR 52982 through 52983) a policy to apply these service-level overrides for both PE and MP, rather than one or the other category.

We did not make any proposals associated with the list of expected specialty assignments for low volume services, however we received public comments on this topic from interested parties. The following is a summary of the comments we received and our responses.

*Comment:* Several commenters stated that they had performed an analysis to identify all codes that meet the criteria to receive a specialty override under this CMS policy and drafted updated recommendations for CY 2023.

Commenters stated that the purpose of

assigning a specialty to these codes was to avoid the major adverse impact on MP RVUs that result from errors in specialty utilization data magnified in representation (percentage) by small sample size. These commenters submitted a list of several dozen low volume HCPCS codes with recommended expected specialty assignments.

*Response:* After reviewing the information provided by the commenters to determine that the submitted specialty assignments were appropriate for the service in question, we are finalizing the additions in Table 1 to the list of expected specialty assignments for low volume services.

**BILLING CODE 4150-28-P**

**TABLE 1: New Additions to Expected Specialty Assignment List**

| HCPCS  | Short Descriptor              | Expected Specialty Assignment      |
|--------|-------------------------------|------------------------------------|

\* Recommended specialty assignment crosswalked; see below.

#### BILLING CODE 4150-28-C

*Comment:* Commenters recommended an expected specialty assignment of interventional cardiology for CPT codes 33370, 33894, 33895, 33897, and 33997.

*Response:* We do not have PE/HR data for the interventional cardiology specialty as it was not part of the PPIS when it was conducted in 2007. We use the cardiology specialty for this specialty's PE/HR data, and therefore, we have crosswalked the CPT codes in question to the cardiology specialty on the list of expected specialty assignments for low volume services.

*Comment:* Commenters also recommended an expected specialty assignment of hand surgery for CPT code 26705.

*Response:* During our review of claims data for this code, we found that the most frequently reported specialty for CPT code 26705 was orthopedic surgery, reported more than twice as often as the hand surgery specialty. Therefore, we are finalizing orthopedic surgery and not hand surgery as the expected specialty assignment for CPT code 26705.

We also note for commenters that each HCPCS code that appears on the list of expected specialty assignments for low volume services remains on the list from year to year, even if the volume for the code in question rises to over 100 services for an individual calendar year. The HCPCS codes and expected specialty assignment remain on the list, and will be applied should the volume fall below 100 services in any calendar year; there is no need to "reactivate" individual codes as some commenters have suggested in past submissions.

After consideration of the public comments, we are finalizing the updates to the list of expected specialty assignments for low volume services as detailed above.

*Step 8:* Calculate the service level allocators for the indirect PEs based on the percentages calculated in Step 7. The indirect PEs are allocated based on the three components: the direct PE

RVUs; the clinical labor PE RVUs; and the work RVUs.

For most services the indirect allocator is: indirect PE percentage \* (direct PE RVUs/direct percentage) + work RVUs.

There are two situations where this formula is modified:

- If the service is a global service (that is, a service with global, professional, and technical components), then the indirect PE allocator is: indirect percentage (direct PE RVUs/direct percentage) + clinical labor PE RVUs + work RVUs.

- If the clinical labor PE RVUs exceed the work RVUs (and the service is not a global service), then the indirect allocator is: indirect PE percentage (direct PE RVUs/direct percentage) + clinical labor PE RVUs.

(*Note:* For global services, the indirect PE allocator is based on both the work RVUs and the clinical labor PE RVUs. We do this to recognize that, for the PC service, indirect PEs would be allocated using the work RVUs, and for the TC service, indirect PEs would be allocated using the direct PE RVUs and the clinical labor PE RVUs. This also allows the global component RVUs to equal the sum of the PC and TC RVUs.)

For presentation purposes, in the examples in the download file titled "Calculation of PE RVUs under Methodology for Selected Codes", the formulas were divided into two parts for each service.

- The first part does not vary by service and is the indirect percentage (direct PE RVUs/direct percentage).
- The second part is either the work RVU, clinical labor PE RVU, or both depending on whether the service is a global service and whether the clinical PE RVUs exceed the work RVUs (as described earlier in this step).

Apply a scaling adjustment to the indirect allocators.

*Step 9:* Calculate the current aggregate pool of indirect PE RVUs by multiplying the result of step 8 by the average indirect PE percentage from the survey data.

*Step 10:* Calculate an aggregate pool of indirect PE RVUs for all PFS services by adding the product of the indirect PE allocators for a service from Step 8 and the utilization data for that service.

*Step 11:* Using the results of Step 9 and Step 10, calculate an indirect PE adjustment so that the aggregate indirect allocation does not exceed the available aggregate indirect PE RVUs and apply it to indirect allocators calculated in Step 8.

Calculate the indirect practice cost index.

*Step 12:* Using the results of Step 11, calculate aggregate pools of specialty specific adjusted indirect PE allocators for all PFS services for a specialty by adding the product of the adjusted indirect PE allocator for each service and the utilization data for that service.

*Step 13:* Using the specialty specific indirect PE/HR data, calculate specialty specific aggregate pools of indirect PE for all PFS services for that specialty by adding the product of the indirect PE/HR for the specialty, the work time for the service, and the specialty's utilization for the service across all services furnished by the specialty.

*Step 14:* Using the results of Step 12 and Step 13, calculate the specialty specific indirect PE scaling factors.

*Step 15:* Using the results of Step 14, calculate an indirect practice cost index at the specialty level by dividing each specialty specific indirect scaling factor by the average indirect scaling factor for the entire PFS.

*Step 16:* Calculate the indirect practice cost index at the service level to ensure the capture of all indirect costs. Calculate a weighted average of the practice cost index values for the specialties that furnish the service. (Note: For services with TCs and PCs, we calculate the indirect practice cost index across the global service, PCs, and TCs. Under this method, the indirect practice cost index for a given service (for example, echocardiogram) does not vary by the PC, TC, and global service.)

*Step 17:* Apply the service level indirect practice cost index calculated

in Step 16 to the service level adjusted indirect allocators calculated in Step 11 to get the indirect PE RVUs.

(d) Calculate the Final PE RVUs

*Step 18:* Add the direct PE RVUs from Step 5 to the indirect PE RVUs from Step 17 and apply the final PE budget neutrality (BN) adjustment. The final PE BN adjustment is calculated by comparing the sum of steps 5 and 17 to the aggregate work RVUs scaled by the ratio of current aggregate PE and work RVUs. This adjustment ensures that all PE RVUs in the PFS account for the fact that certain specialties are excluded from the calculation of PE RVUs but included in maintaining overall PFS BN. (See “Specialties excluded from ratesetting calculation” later in this final rule.)

*Step 19:* Apply the phase-in of significant RVU reductions and its

associated adjustment. Section 1848(c)(7) of the Act specifies that for services that are not new or revised codes, if the total RVUs for a service for a year would otherwise be decreased by an estimated 20 percent or more as compared to the total RVUs for the previous year, the applicable adjustments in work, PE, and MP RVUs shall be phased in over a 2-year period. In implementing the phase-in, we consider a 19 percent reduction as the maximum 1-year reduction for any service not described by a new or revised code. This approach limits the year one reduction for the service to the maximum allowed amount (that is, 19 percent), and then phases in the remainder of the reduction. To comply with section 1848(c)(7) of the Act, we adjust the PE RVUs to ensure that the total RVUs for all services that are not new or revised codes decrease by no

more than 19 percent, and then apply a relativity adjustment to ensure that the total pool of aggregate PE RVUs remains relative to the pool of work and MP RVUs. For a more detailed description of the methodology for the phase-in of significant RVU changes, we refer readers to the CY 2016 PFS final rule with comment period (80 FR 70927 through 70931).

(e) Setup File Information

- **Specialties excluded from ratesetting calculation:** For the purposes of calculating the PE and MP RVUs, we exclude certain specialties, such as certain NPPs paid at a percentage of the PFS and low volume specialties, from the calculation. These specialties are included for the purposes of calculating the BN adjustment. They are displayed in Table 2.

**BILLING CODE 4150–28–P**

**TABLE 2: Specialties Excluded from Ratesetting Calculation**

| Specialty Code | Specialty Description  |
|----------------|--|
| 49             | Ambulatory surgical center   |
| 50             | Nurse practitioner   |

| C1             | Centralized Flu  |
| C2             | Indirect Payment Procedure   |
| C5             | Dentistry  |

**BILLING CODE 4150–28–C**

• Crosswalk certain low volume physician specialties: Crosswalk the utilization of certain specialties with relatively low PFS utilization to the associated specialties.

• Physical therapy utilization: Crosswalk the utilization associated with all physical therapy services to the specialty of physical therapy.

• Identify professional and technical services not identified under the usual TC and 26 modifiers: Flag the services that are PC and TC services but do not use TC and 26 modifiers (for example, electrocardiograms). This flag associates the PC and TC with the associated

global code for use in creating the indirect PE RVUs. For example, the professional service, CPT code 93010 (Electrocardiogram, routine ECG with at least 12 leads; interpretation and report only), is associated with the global service, CPT code 93000 (Electrocardiogram, routine ECG with at least 12 leads; with interpretation and report).

• Payment modifiers: Payment modifiers are accounted for in the creation of the file consistent with current payment policy as implemented in claims processing. For example, services billed with the assistant at surgery modifier are paid 16 percent of

the PFS amount for that service; therefore, the utilization file is modified to only account for 16 percent of any service that contains the assistant at surgery modifier. Similarly, for those services to which volume adjustments are made to account for the payment modifiers, time adjustments are applied as well. For time adjustments to surgical services, the intraoperative portion in the work time file is used; where it is not present, the intraoperative percentage from the payment files used by contractors to process Medicare claims is used instead. Where neither is available, we use the payment adjustment ratio to adjust the time

accordingly. Table 3 details the manner in which the modifiers are applied.

**TABLE 3: Application of Payment Modifiers to Utilization Files**

| Modifier               | Description  | Volume Adjustment  | Time Adjustment                       |
|------------------------|--|--|---------------------------------------|
| <b>80,81,82</b>        | Assistant at Surgery                                 | 16%  | Intraoperative portion                |
| <b>AS</b>              | Assistant at Surgery – Physician Assistant           | 14% (85% * 16%)  | Intraoperative portion                |
| <b>50 or LT and RT</b> | Bilateral Surgery                                    | 150%   | 150% of work time                     |
| <b>51</b>              | Multiple Procedure                                   | 50%  | Intraoperative portion                |
| <b>52</b>              | Reduced Services                                     | 50%  | 50%                                   |
| <b>53</b>              | Discontinued Procedure                               | 50%  | 50%                                   |
| <b>54</b>              | Intraoperative Care only                             | Preoperative + Intraoperative Percentages on the payment files used by Medicare contractors to process Medicare claims | Preoperative + Intraoperative portion |
| <b>55</b>              | Postoperative Care only                              | Postoperative Percentage on the payment files used by Medicare contractors to process Medicare claims                  | Postoperative portion                 |
| <b>62</b>              | Co-surgeons  | 62.5%  | 50%                                   |
| <b>66</b>              | Team Surgeons  | 33%  | 33%                                   |
| <b>CO, CQ</b>          | Physical and Occupational Therapy Assistant Services | 88%  | 88%                                   |

We also adjust volume and time that correspond to other payment rules, including special multiple procedure endoscopy rules and multiple procedure payment reductions (MPPRs). We note that section 1848(c)(2)(B)(v) of the Act exempts certain reduced payments for multiple imaging procedures and multiple therapy services from the BN calculation under section 1848(c)(2)(B)(ii)(II) of the Act. These MPPRs are not included in the development of the RVUs.

Beginning in CY 2022, section 1834(v)(1) of the Act required that we apply a 15 percent payment reduction for outpatient occupational therapy services and outpatient physical therapy services that are provided, in whole or in part, by a physical therapist assistant (PTA) or occupational therapy assistant (OTA). Section 1834(v)(2)(A) of the Act required CMS to establish modifiers to identify these services, which we did in the CY 2019 PFS final rule (83 FR 59654 through 59661), creating the CQ and CO payment modifiers for services provided in whole or in part by PTAs and OTAs, respectively. These payment modifiers are required to be used on claims for services with dates of service beginning January 1, 2020, as specified in the CY 2020 PFS final rule (84 FR 62702 through 62708). We applied the 15 percent payment reduction to therapy services provided by PTAs (using the CQ modifier) or OTAs (using the CO

modifier), as required by statute. Under sections 1834(k) and 1848 of the Act, payment is made for outpatient therapy services at 80 percent of the lesser of the actual charge or applicable fee schedule amount (the allowed charge). The remaining 20 percent is the beneficiary copayment. For therapy services to which the new discount applies, payment will be made at 85 percent of the 80 percent of allowed charges. Therefore, the volume discount factor for therapy services to which the CQ and CO modifiers apply is:  $(0.20 + (0.80 * 0.85))$ , which equals 88 percent.

For anesthesia services, we do not apply adjustments to volume since we use the average allowed charge when simulating RVUs; therefore, the RVUs as calculated already reflect the payments as adjusted by modifiers, and no volume adjustments are necessary. However, a time adjustment of 33 percent is made only for medical direction of two to four cases since that is the only situation where a single practitioner is involved with multiple beneficiaries concurrently, so that counting each service without regard to the overlap with other services would overstate the amount of time spent by the practitioner furnishing these services.

- **Work RVUs:** The setup file contains the work RVUs from this final rule.

#### (6) Equipment Cost per Minute

The equipment cost per minute is calculated as:

$$(1/(\text{minutes per year} * \text{usage})) * \text{price} * ((\text{interest rate}/(1/(1 + \text{interest rate}))^{\text{life of equipment}})) + \text{maintenance})$$

Where:

minutes per year = maximum minutes per year if usage were continuous (that is, usage=1); generally, 150,000 minutes.  
usage = variable, see discussion below in this final rule.  
price = price of the particular piece of equipment.  
life of equipment = useful life of the particular piece of equipment.  
maintenance = factor for maintenance; 0.05.  
interest rate = variable, see discussion below in this final rule.

**Usage:** We currently use an equipment utilization rate assumption of 50 percent for most equipment, with the exception of expensive diagnostic imaging equipment, for which we use a 90 percent assumption as required by section 1848(b)(4)(C) of the Act.

**Useful Life:** In the CY 2005 PFS final rule we stated that we updated the useful life for equipment items primarily based on the AHA's "Estimated Useful Lives of Depreciable Hospital Assets" guidelines (69 FR 66246). The most recent edition of these guidelines was published in 2018. This reference material provides an estimated useful life for hundreds of different

types of equipment, the vast majority of which fall in the range of 5 to 10 years, and none of which are lower than 2 years in duration. We believe that the updated editions of this reference material remain the most accurate source for estimating the useful life of depreciable medical equipment.

In the CY 2021 PFS final rule, we finalized a proposal to treat equipment life durations of less than 1 year as having a duration of 1 year for the purpose of our equipment price per minute formula. In the rare cases where items are replaced every few months, we noted that we believe it is more accurate to treat these items as disposable supplies with a fractional supply quantity as opposed to equipment items with very short equipment life durations. For a more detailed discussion of the methodology associated with very short equipment life durations, we refer readers to the CY 2021 PFS final rule (85 FR 84482 through 84483).

- *Maintenance:* We finalized the 5 percent factor for annual maintenance in the CY 1998 PFS final rule with comment period (62 FR 33164). As we previously stated in the CY 2016 PFS final rule with comment period (80 FR 70897), we do not believe the annual maintenance factor for all equipment is precisely 5 percent, and we concur that the current rate likely understates the true cost of maintaining some equipment. We also noted that we believe it likely overstates the maintenance costs for other equipment. When we solicited comments regarding sources of data containing equipment maintenance rates, commenters were unable to identify an auditable, robust data source that could be used by CMS on a wide scale. We noted that we did not believe voluntary submissions regarding the maintenance costs of individual equipment items would be an appropriate methodology for determining costs. As a result, in the absence of publicly available datasets

regarding equipment maintenance costs or another systematic data collection methodology for determining a different maintenance factor, we did not propose a variable maintenance factor for equipment cost per minute pricing as we did not believe that we have sufficient information at present. We noted that we would continue to investigate potential avenues for determining equipment maintenance costs across a broad range of equipment items.

- *Interest Rate:* In the CY 2013 PFS final rule with comment period (77 FR 68902), we updated the interest rates used in developing an equipment cost per minute calculation (see 77 FR 68902 for a thorough discussion of this issue). The interest rate was based on the Small Business Administration (SBA) maximum interest rates for different categories of loan size (equipment cost) and maturity (useful life). The Interest rates are listed in Table 4.

TABLE 4: SBA Maximum Interest Rates

| Price          | Useful Life | Interest Rate |
|----------------|-------------|---------------|
| <\$25K         | <7 Years    | 7.50%         |
| \$25K to \$50K | <7 Years    | 6.50%         |
| >\$50K         | <7 Years    | 5.50%         |
| <\$25K         | 7+ Years    | 8.00%         |
| \$25K to \$50K | 7+ Years    | 7.00%         |
| >\$50K         | 7+ Years    | 6.00%         |

We did not propose and we are not finalizing any changes to the equipment interest rates for CY 2023.

3. Adjusting RVUs To Match the PE Share of the Medicare Economic Index (MEI)

For CY 2023, as explained in detail in section II.M. of this final rule, we proposed to rebase and revise the Medicare Economic Index (MEI) to reflect more current market conditions faced by physicians in furnishing physicians' services. The MEI is an index that measures changes in the market price of the inputs used to furnish physician services. This index measure is authorized under section 1842(b)(3) of the Act, and is developed by the CMS Office of the Actuary. We believe that the MEI is the best measure available of the relative weights of the three components in payments under the PFS—work, PE and malpractice. Accordingly, we believe that to assure that the PFS payments reflect the relative resources in each of these components as required by section

1848(c)(3) of the Act, the RVUs used in developing rates should reflect the same weights in each component as the MEI. In the past, we have proposed (and subsequently, finalized) to accomplish this by holding the work RVUs constant and adjusting the PE RVUs, the MP RVUs and the CF to produce the appropriate balance in RVUs among the PFS components and payment rates for individual services. The most recent adjustments to the RVUs to reflect changes in the MEI weights were made for the CY 2014 RVUs, when the MEI was last updated. In the CY 2014 PFS proposed rule (78 FR 43287 through 43288) and final rule (78 FR 74236 through 74237), we detailed the steps necessary to accomplish this result (see steps 3, 10, and 18). The CY 2014 proposed and final adjustments were consistent with our longstanding practice to make adjustments to match the RVUs for the PFS components with the MEI cost share weights for the components, including the adjustments described in the CY 1999 PFS final rule (63 FR 58829), CY 2004 PFS final rule

(68 FR 63246 and 63247), and CY 2011 PFS final rule (75 FR 73275).

In the past when we have proposed a rebasing and/or revision of the MEI, as we discuss in section II.M. of this final rule, we typically have also proposed to modify steps 3 and 10 to adjust the aggregate pools of PE costs (direct PE in step 3 and indirect PE in step 10) in proportion to the change in the PE share in the rebased and revised MEI cost share weights, as previously described in the CY 2014 PFS final rule (78 FR 74236 and 74237), and to recalibrate the relativity adjustment that we apply in step 18 as described in the CY 2014 PFS final rule. Instead, we proposed to delay the adjustments to the PE pools in steps 3 and 10 and the recalibration of the relativity adjustment in step 18 until the public had an opportunity to comment on the proposed rebased and revised MEI, which is being finalized for CY 2023, as discussed in section II.M. of this final rule. Because we proposed significant methodological and data source changes to the MEI for CY 2023 and significant time has elapsed since

the last rebasing and revision of the MEI, we explained that we believe it is important to allow public comment and finalization of the proposed MEI changes based on the review of public comment before we incorporated the updated MEI into PFS ratesetting, and we believe this is consistent with our efforts to balance payment stability and predictability with incorporating new data through more routine updates. We refer readers to the discussion of our comment solicitation in section II.B. of this final rule, where we review our ongoing efforts to update data inputs for PE to aid stability, transparency, efficiency, and data adequacy. Similarly, we delayed the implementation of the proposed rebased and revised MEI for use in the PE geographic practice cost index (GPCI) and solicited comment on appropriate timing for implementation for potential future rulemaking, discussed in detail in section II.G. and section VI. of this final rule.

In light of the proposed delay in using the proposed update to the MEI to make the adjustments to the PE pools in steps 3 and 10 and the relativity adjustment in step 18, we solicited comment on when and how to best incorporate the proposed rebased and revised MEI discussed in section II.M. of the proposed rule into PFS ratesetting, and whether it would be appropriate to consider a transition to full implementation for potential future rulemaking. In section VI. of this final rule, we present the impacts of implementing the proposed rebased and revised MEI in PFS ratesetting through a 4-year transition and through full immediate implementation, that is, with no transition period. Given the significance of the impacts that result from a full implementation and the interaction with other CY 2023 proposals, we did not consider proposing to fully implement a rebased and revised MEI in PFS ratesetting for CY 2023. We solicited comment on other implementation strategies for potential future rulemaking that are not outlined in section VI. of this final rule.

The following is a summary of the comments we received and our responses.

*Comment:* Many commenters supported our proposed delayed implementation of the rebased and revised MEI in PFS ratesetting until the public had an opportunity to comment on the proposed changes to the MEI, as discussed in section II.M. of this final rule.

*Response:* We thank the commenters for their support.

*Comment:* Many commenters expressed concerns with the redistributive impacts discussed in section VI. of the proposed rule, where we discussed the alternative considered to implement the proposed rebased and revised MEI in PFS ratesetting through a 4-year transition for CY 2023. Many of the commenters cited other proposals and their confluence with the proposed rebased and revised MEI as a source of their concerns regarding the implementation of the MEI in PFS ratesetting. Most commenters noted that the AMA has said it intends to collect practice cost data from physician practices in the near future and urged CMS to pause consideration of other sources for the MEI until the AMA's efforts have concluded. A few commenters urged CMS to implement the MEI for PFS ratesetting when appropriate using a 4-year transition to minimize shifts and maintain stability in PFS payments.

*Response:* We appreciate commenters' feedback, specifically as it relates to updating PFS ratesetting, and will consider this information in future rulemaking. We note that we discuss comments relating to the proposed rebased and revised MEI in section II.M. of this final rule.

#### 4. Changes to Direct PE Inputs for Specific Services

This section focuses on specific PE inputs. The direct PE inputs are included in the CY 2023 direct PE input public use files, which are available on the CMS website under downloads for the CY 2023 PFS final rule at <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/PFS-Federal-Regulation-Notices.html>.

##### a. Standardization of Clinical Labor Tasks

As we noted in the CY 2015 PFS final rule with comment period (79 FR 67640 through 67641), we continue to make improvements to the direct PE input database to provide the number of clinical labor minutes assigned for each task for every code in the database instead of only including the number of clinical labor minutes for the preservice, service, and post service periods for each code. In addition to increasing the transparency of the information used to set PE RVUs, this level of detail would allow us to compare clinical labor times for activities associated with services across the PFS, which we believe is important to maintaining the relativity of the direct PE inputs. This information would facilitate the identification of the usual numbers of minutes for clinical

labor tasks and the identification of exceptions to the usual values. It would also allow for greater transparency and consistency in the assignment of equipment minutes based on clinical labor times. Finally, we believe that the detailed information can be useful in maintaining standard times for particular clinical labor tasks that can be applied consistently to many codes as they are valued over several years, similar in principle to the use of physician preservice time packages. We believe that setting and maintaining such standards would provide greater consistency among codes that share the same clinical labor tasks and could improve relativity of values among codes. For example, as medical practice and technologies change over time, changes in the standards could be updated simultaneously for all codes with the applicable clinical labor tasks, instead of waiting for individual codes to be reviewed.

In the CY 2016 PFS final rule with comment period (80 FR 70901), we solicited comments on the appropriate standard minutes for the clinical labor tasks associated with services that use digital technology. After consideration of comments received, we finalized standard times for clinical labor tasks associated with digital imaging at 2 minutes for "Availability of prior images confirmed", 2 minutes for "Patient clinical information and questionnaire reviewed by technologist, order from physician confirmed and exam protocol by radiologist", 2 minutes for "Review examination with interpreting MD", and 1 minute for "Exam documents scanned into PACS" and "Exam completed in RIS system to generate billing process and to populate images into Radiologist work queue." In the CY 2017 PFS final rule (81 FR 80184 through 80186), we finalized a policy to establish a range of appropriate standard minutes for the clinical labor activity, "Technologist QC's images in PACS, checking for all images, reformats, and dose page." These standard minutes will be applied to new and revised codes that make use of this clinical labor activity when they are reviewed by us for valuation. We finalized a policy to establish 2 minutes as the standard for the simple case, 3 minutes as the standard for the intermediate case, 4 minutes as the standard for the complex case, and 5 minutes as the standard for the highly complex case. These values were based upon a review of the existing minutes assigned for this clinical labor activity; we determined that 2 minutes is the duration for most services and a small number of codes

with more complex forms of digital imaging have higher values. We also finalized standard times for a series of clinical labor tasks associated with pathology services in the CY 2016 PFS final rule with comment period (80 FR 70902). We do not believe these activities would be dependent on number of blocks or batch size, and we believe that the finalized standard values accurately reflect the typical time it takes to perform these clinical labor tasks.

In reviewing the RUC-recommended direct PE inputs for CY 2019, we noticed that the 3 minutes of clinical labor time traditionally assigned to the “Prepare room, equipment and supplies” (CA013) clinical labor activity were split into 2 minutes for the “Prepare room, equipment and supplies” activity and 1 minute for the “Confirm order, protocol exam” (CA014) activity. We proposed to maintain the 3 minutes of clinical labor time for the “Prepare room, equipment and supplies” activity and remove the clinical labor time for the “Confirm order, protocol exam” activity wherever we observed this pattern in the RUC-recommended direct PE inputs. Commenters explained in response that when the new version of the PE worksheet introduced the activity codes for clinical labor, there was a need to translate old clinical labor tasks into the new activity codes, and that a prior clinical labor task was split into two of the new clinical labor activity codes: CA007 (*Review patient clinical extant information and questionnaire*) in the preservice period, and CA014 (*Confirm order, protocol exam*) in the service period. Commenters stated that the same clinical labor from the old PE worksheet was now divided into the CA007 and CA014 activity codes, with a standard of 1 minute for each activity. We agreed with commenters that we would finalize the RUC-recommended 2 minutes of clinical labor time for the CA007 activity code and 1 minute for the CA014 activity code in situations where this was the case. However, when reviewing the clinical labor for the reviewed codes affected by this issue, we found that several of the codes did not include this old clinical labor task, and we also noted that several of the reviewed codes that contained the CA014 clinical labor activity code did not contain any clinical labor for the CA007 activity. In these situations, we continue to believe that in these cases, the 3 total minutes of clinical staff time would be more accurately described by the CA013 “Prepare room, equipment and supplies” activity code, and we

finalized these clinical labor refinements. For additional details, we direct readers to the discussion in the CY 2019 PFS final rule (83 FR 59463 and 59464).

Following the publication of the CY 2020 PFS proposed rule, one commenter expressed concern with the published list of common refinements to equipment time. The commenter stated that these refinements were the formulaic result of the applying refinements to the clinical labor time and did not constitute separate refinements; the commenter requested that CMS no longer include these refinements in the table published each year. In the CY 2020 PFS final rule, we agreed with the commenter that these equipment time refinements did not reflect errors in the equipment recommendations or policy discrepancies with the RUC’s equipment time recommendations. However, we believed that it was important to publish the specific equipment times that we were proposing (or finalizing in the case of the final rule) when they differed from the recommended values due to the effect that these changes can have on the direct costs associated with equipment time. Therefore, we finalized the separation of the equipment time refinements associated with changes in clinical labor into a separate table of refinements. For additional details, we direct readers to the discussion in the CY 2020 PFS final rule (84 FR 62584).

Historically, the RUC has submitted a “PE worksheet” that details the recommended direct PE inputs for our use in developing PE RVUs. The format of the PE worksheet has varied over time and among the medical specialties developing the recommendations. These variations have made it difficult for both the RUC’s development and our review of code values for individual codes. Beginning with its recommendations for CY 2019, the RUC has mandated the use of a new PE worksheet for purposes of their recommendation development process that standardizes the clinical labor tasks and assigns them a clinical labor activity code. We believe the RUC’s use of the new PE worksheet in developing and submitting recommendations will help us to simplify and standardize the hundreds of different clinical labor tasks currently listed in our direct PE database. As we did in previous calendar years, to facilitate rulemaking for CY 2023, we are continuing to display two versions of the Labor Task Detail public use file: one version with the old listing of clinical labor tasks, and one with the same tasks crosswalked to the new

listing of clinical labor activity codes. These lists are available on the CMS website under downloads for the CY 2023 PFS final rule at <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/PFS-Federal-Regulation-Notices.html>.

#### b. Updates to Prices for Existing Direct PE Inputs

In the CY 2011 PFS final rule with comment period (75 FR 73205), we finalized a process to act on public requests to update equipment and supply price and equipment useful life inputs through annual rulemaking, beginning with the CY 2012 PFS proposed rule. Beginning in CY 2019 and continuing through CY 2022, we conducted a market-based supply and equipment pricing update, using information developed by our contractor, StrategyGen, which updated pricing recommendations for approximately 1300 supplies and 750 equipment items currently used as direct PE inputs. Given the potentially significant changes in payment that would occur, in the CY 2019 PFS final rule we finalized a policy to phase in our use of the new direct PE input pricing over a 4-year period using a 25/75 percent (CY 2019), 50/50 percent (CY 2020), 75/25 percent (CY 2021), and 100/0 percent (CY 2022) split between new and old pricing. We believed that implementing the proposed updated prices with a 4-year phase-in would improve payment accuracy, while maintaining stability and allowing interested parties the opportunity to address potential concerns about changes in payment for particular items. This 4-year transition period to update supply and equipment pricing concluded in CY 2022; for a more detailed discussion, we refer readers to the CY 2019 PFS final rule with comment period (83 FR 59473 through 59480).

For CY 2023, we proposed to update the price of eight supplies and two equipment items in response to the public submission of invoices following the publication of the CY 2022 PFS final rule. The eight supply and equipment items with proposed updated prices are listed in the valuation of specific codes section of the preamble under Table 19, CY 2023 Invoices Received for Existing Direct PE Inputs.

We received the following comments on our proposal to update the price of eight supplies and two equipment items in response to the public submission of invoices following the publication of the CY 2022 PFS final rule:

*Comment:* Several commenters submitted comments to clarify that the invoice they included in their submission that was identified as the Lysing Reagent (SL089) supply was intended for a different supply item, the Lysing Solution (SL039). The commenters stated that our proposed reduction of the price for the SL089 supply appeared to be based on the invoice they had as misidentified as being for the SL089 supply, when it was intended for the SL039 supply. The commenters asked CMS to disregard the earlier mistaken submission and submitted additional invoices with updated pricing for the SL089 supply for consideration to correct the oversight in their original submission.

*Response:* We appreciate the clarification from the commenters and the updated invoices with pricing information for the SL089 supply. We are finalizing an increase in the price of the Lysing Reagent (SL089) supply to \$5.53 based on the average of the ten submitted invoices from the commenter. (Note: the separate discussion of the SL039 supply below is based on a different invoice submitted by a different interested party unconnected to the SL089 supply. We believe it is appropriate to consider and revise the price for the SL089 supply based on the clarification and new invoices submitted by commenters for that supply. However, given that the invoice for SL039 submitted by these commenters was not intended to be submitted for the SL039 supply, we did not consider the invoice for SL039 that was mistakenly submitted by these commenters.)

*Comment:* Several commenters stated their support for the proposed pricing changes to the EP014 and EP088 equipment items and the SA117, SK082, SL024, SL030, SL061, and SL469 supply items. The commenters urged CMS to finalize them as proposed in the final rule.

*Response:* We appreciate the support for our proposed pricing from the commenters.

In the proposed rule, we did not propose to update the price of another eight supplies and two equipment items which were the subject of public submission of invoices. Our rationale for not updating these prices is detailed below:

- *Acetic acid 5% (SH001):* We received an invoice submission that would suggest an increase in price from 3 cents per ml to 9.5 cents per ml for the SH001 supply. However, the invoice stated that this price was for an “Alcian Blue 1% in 3% Acetic Acid pH 2.5” supply and it is not clear that this

represents the same supply as the “Acetic acid 5%” described by the SH001 supply item. We also do not believe that the typical price for this supply has increased 200 percent in the 3 years since StrategyGen researched its pricing, especially given that we increased the price for the SH001 supply from 1.2 cents in CY 2019 to its current price of 3 cents for CY 2022.

- *Cytology, lysing soln (CytoLyt) (SL039):* We received an invoice submission that would suggest an increase in price from 6 cents per ml to 80 cents per ml for the SL039 supply. We do not believe that the typical price for this supply has increased 1200% in the 3 years since StrategyGen researched its pricing, especially given that we increased the price for the SL039 supply from 3.4 cents in CY 2019 to its current price of 6 cents for CY 2022.

- *Fixative (for tissue specimen) (SL068):* We received an invoice submission that would suggest an increase in price from 1.3 cents per ml to \$4.87 for the SL068 supply. We believe that this was the result of confusion on the part of the interested party regarding the unit quantity for the SL068 supply. This item is paid on a per ml basis and not a per unit basis; there was not enough information on the submitted invoice to determine the price for the SL068 supply on a per ml basis.

- *Ethanol, 100% (SL189):* We received an invoice submission that would suggest an increase in price from 0.33 cents per ml to 1.2 cents per ml for the SL189 supply. However, we noted that the invoice was based on the price for a single gallon of 100% ethanol which is typically sold in much larger quantities than a single gallon. We found that 100% ethanol was readily available for sale online in larger unit sizes and the current price of 0.33 cents per ml (based on the past StrategyGen market research) appears to be accurate based on online bulk pricing. We also found that the submitted invoices for the ethanol, 70% (SL190), ethanol, 95% (SL248), and stain, PAP OG-6 (SL491) supplies were also based on pricing for a single gallon. Each of these supply items was also available for purchase in larger unit quantities which indicated that the current pricing remained typical for these supplies. Therefore, we did not propose to update the prices for the SL189, SL190, SL248 or SL491 supply, as we do not believe that the higher prices paid for smaller quantities of these supplies would be typical.

- *Biohazard specimen transport bag (SM008):* We received an invoice submission that would suggest an increase in price from 8 cents to 45

cents for the SM008 supply. However, it is not clear that the item described on the invoice is the same item as the SM008 supply. The invoice states only that the price is for “Supplied Case Red Bags” which was not enough information to determine if this would be typical for the SM008 supply. We also do not believe that the typical price for this supply has increased 460 percent in the 3 years since StrategyGen researched its pricing, especially given that we increased the price for the SM008 supply from 3.5 cents in CY 2019 to its current price of 8 cents for CY 2022.

- *International Normalized Ratio (INR) analysis and reporting system w-software (EQ312):* We did not receive an invoice for this equipment item, only a letter stating that the cost of the EQ312 equipment should be increased from the current price of \$19,325 to \$1,600,000. We previously finalized a policy in the CY 2011 PFS final rule (75 FR 73205) to update supply and equipment prices through an invoice submission process. We require pricing data indicative of the typical market price of the supply or equipment item in question to update the price. It is not sufficient to state a different price without providing information to support a change in pricing. Since we did not receive an invoice to support the higher costs asserted in the letter, we did not propose a new price for the EQ312 equipment item. Interested parties are encouraged to submit invoices with their public comments or, if outside the notice and comment rulemaking process, via email at [PE\\_Price\\_Input\\_Update@cms.hhs.gov](mailto:PE_Price_Input_Update@cms.hhs.gov). We also noted that in order to be considered a direct PE input, an equipment item must be individually allocable to a particular patient for a particular service. Costs associated with the implementation, maintenance, and upgrade of equipment that is not individually allocable to a particular patient for a particular service, or other costs associated with running a practice, would typically be classified as forms of indirect PE under our methodology.

Prior to the publication of the proposed rule, the same interested parties that addressed the pricing of the EQ312 equipment item questioned the assignment of the General Practice specialty crosswalk for indirect PE for home Prothrombin Time (PT)/INR monitoring services. These individuals stated that the predominant code used for PT/INR monitoring (HCPCS code G0249) will be significantly and negatively impacted by the continuing implementation over a 4-year period of changes in the clinical labor rates

finalized in the CY 2022 PFS final rule (86 FR 65024). The individuals requested that CMS change the crosswalk for home PT/INR monitoring services to All Physicians or Pathology which would partially offset the reduction that HCPCS code G0249 is facing due to changes in the clinical labor rates.

We noted for these interested parties in the CY 2021 PFS final rule (85 FR 84477 and 84478) that we finalized a crosswalk to the General Practice specialty for home PT/INR monitoring services (HCPCS codes G0248, G0249, and G0250). The data submitted by the commenters at the time indicated that the direct-to-indirect cost percentages to furnish home PT/INR monitoring are in the range of 31:69, similar to the ratio associated with the General Practice specialty. We disagreed, as we did in response to comments in the CY 2021 PFS final rule, that these home PT/INR monitoring services should be reassigned to a different specialty that is less reflective of the cost structure for these services to offset reductions in payment for the services that result from an unrelated policy proposal (the clinical labor pricing update). We also noted that we had not received any new information about PT/INR monitoring services since CY 2021 to indicate that Pathology would be more accurate choices for use in indirect PE allocation but are open to receiving new relevant information that CMS could consider in future rulemaking. As such, we did not propose to change the assigned specialty for PT/INR services; we direct interested parties to the previous discussion of this topic in the CY 2021 PFS final rule (85 FR 84477 and 84478) and again in the CY 2022 PFS final rule (86 FR 65000). Interested parties are encouraged to submit new information to support the most accurate specialty choice to use in indirect PE allocation for PT/INR monitoring services distinct from what has previously been reviewed during the last two rule cycles.

*Comment:* A commenter submitted additional direct and indirect cost data associated with pricing the INR analysis and reporting system w-software (EQ312) equipment. The commenter stated that they arrived at this amount based upon detailed review of all of the software system and related expenses involved with furnishing home INR monitoring services, including up front equipment and software purchases that comprise direct equipment practice expenses, up front maintenance and support services that comprise indirect practice expenses, and recurring support and telecommunications services that also comprise indirect

practice expenses. The commenter submitted invoices detailing a one-time direct cost of \$69,621, a one-time indirect cost of \$84,126.31, and recurring annual costs of \$963,638.52 associated with the EQ312 equipment.

*Response:* We agree with the commenter that the invoices support an increase in the purchase price of the equipment from the current \$19,325 to the price of \$69,621 listed on the invoices. However, we disagree that the one-time indirect cost of \$84,126.31 or recurring annual costs of \$963,638.52 listed on the invoices would constitute forms of direct PE which would be included in the equipment's price. The indirect costs on the submitted invoices are for project management and service order costs while the recurring annual costs comprise monthly maintenance and telecommunications expenses. We agree that these are real costs associated with the software, however they are classified as forms of indirect PE under our current methodology. The equipment cost formula that we use already incorporates maintenance and interest rates costs into the per-minute pricing calculation; if we were to include these expenses in the equipment cost as a form of direct PE, we would be making duplicative payment for the same expenses. We are therefore finalizing an increase in the price of the EQ312 equipment to \$69,621 but not including the indirect and recurring annual costs in the equipment price as they are classified as forms of indirect PE.

*Comment:* The same commenter reiterated their previous request made in PFS rulemaking for CY 2021 for CMS to change the crosswalk for home PT/INR monitoring services from the previously finalized General Practice specialty to the All Physicians or Pathology specialty. The commenter stated that the code used to report ongoing home PT/INR monitoring (HCPCS code G0249) will again be significantly and negatively impacted in CY 2023 as a result of changes in the clinical labor rates with the corresponding budget neutrality adjustment and the drop in the conversion factor. The commenter stated that the Pathology specialty provides a better reflection of the indirect to direct costs associated with home PT/INR monitoring and also reflects a more appropriate indirect practice cost index (IPCI) for a service with very high indirect costs, such as home PT/IN monitoring. The commenter stated their belief that the indirect cost data captured in their submitted invoices supports a crosswalk to the Pathology specialty given the

higher indirect costs of furnishing these services, including the on-going software costs that are not captured in the direct PE input; and that this specialty crosswalk change would help offset the cuts in the proposed rate for HCPCS code G0249.

*Response:* We continue to believe that assignment of the Pathology specialty for home PT/INR monitoring services as requested by the commenters would not be appropriate. As we stated in the proposed rule, we continue to disagree that these home PT/INR monitoring services should be reassigned to a different specialty that is less reflective of the cost structure for these services to offset reductions in payment that result from an unrelated policy proposal (the clinical labor pricing update). The commenter stated that home PT/INR monitoring services have high indirect expenses and suggested that this supported assignment of a specialty with a higher direct-to-indirect expense ratio than General Practice (which has a 31 to 69 percent ratio), such as Pathology (which has a 26 to 74 percent ratio). However, this is a misunderstanding of the direct-to-indirect ratio for each specialty, which is a ratio based on data from the Physician Practice Expense Information Survey (PPIS) conducted back in 2007. The direct-to-indirect ratio is merely a ratio, and not indicative of a specialty having higher or lower indirect expenses in absolute terms. Higher indirect expenses for a specialty are not correlated with a higher percentage of indirects as compared with direct in that ratio; in fact, the Independent Diagnostic Testing Facility specialty has both the highest indirect expenses of any specialty, as well as a low direct to indirect ratio (50 to 50%) precisely because IDTFs also have very high direct expenses as well. Similarly, the Pathology specialty had lower indirect expenses on the PPIS than the General Practice specialty; this contradicts the commenter's contention that the high indirect costs for home PT/INR monitoring services would justify a change to the Pathology specialty. We continue to believe that the data submitted by the commenters in the CY 2021 PFS final rule (85 FR 84477 and 84478) indicated that the direct-to-indirect cost percentages to furnish home PT/INR monitoring are not reflective of the Pathology specialty.

We note that the PE methodology, which relies on the allocation of indirect costs based on the magnitude of direct costs, should appropriately reflect the typical costs for the specialty the commenters suggest. However, we are cognizant that approach may not work

in all cases, particularly for newer services with costs that are not well accounted for in our PE methodology, or services with cost structures that do not necessarily reflect the specialties furnishing them. Although we have previously assigned the General Practice specialty to these codes, interested parties have provided additional information about these services suggesting assignment to a different specialty for purposes of allocating indirect cost. We believe that, as we work to identify ways to update the PE methodology and our data sources to better reflect costs for all services and changes in medical practice, it is best to apply a consistent approach in setting rates that does not over-allocate cost, which could result in significant increases in payments for these services. Considering our concerns, we will switch the specialty assignment for these services to the All Physician specialty, consistent with how we have treated other new services that do not quite fit our PE methodology in recent

rulemaking (see for example the discussion of HCPCS codes G2082 and G2083 in the CY 2022 PFS final rule (86 FR 65014 and 65015) and again in this rule). We believe this will allow for improved stability in payments, and preserve access to this care for beneficiaries, while we work to identify longer term solutions.

• *Remote musculoskeletal therapy system (EQ402)*: We received an invoice submission for a price of \$1,000 for the EQ402 equipment item. Since this equipment already has a price of \$1,000 we did not propose to make any changes in the pricing; we thank the interested party for their invoice submission confirming the current price.

The following are additional comments that we received associated with supply and equipment pricing:

*Comment*: Several commenters requested the creation of a new supply code to describe an alternate form of a basic injection pack. Commenters stated that for many services the use of Chloraprep (chlorhexidine) for intact

skin preparation has become more typical than Betadine (povidone-iodine solution) and that the current basic injection pack described by supply code SA041 no longer accurately reflects typical resource use. Commenters requested that CMS create an alternative pack which instead includes Chloraprep (chlorhexidine) so that specialties can select the injection pack with the most appropriate antiseptic. Commenters requested that the new pack should mirror the SA041 basic injection pack with the addition of the patient prep swab, 1.5 ml chloraprep (SJ081) supply and removal of the Betadine povidone soln (SJ041) and sponge tipped applicator (SG009) supplies.

*Response*: We appreciate the feedback from the commenters on the changing nature of what supplies are typically included in basic injection packs, and as a result, we are creating an alternate injection pack with the new supply code SA135 which will be priced at \$14.12 as detailed in Table 5.

**TABLE 5: Alternate Injection Pack Supplies (SA135)**

| SA135        | Pack, alternate injection                      | Number   | Pack        | 14.116       |
|--------------|--|----------|-------------|--------------|
|              | bandage, strip 0.75in x 3in                    | 1        | item        | 0.410        |
|              | underpad 2ftx3ft (Chux)                        | 1        | item        | 0.320        |
|              | gauze, sterile 4in x 4in                       | 2        | item        | 0.190        |
|              | gloves, sterile                                | 2        | pair        | 0.910        |
|              | gown, staff, impervious                        | 1        | item        | 1.186        |
|              | mask, surgical                                 | 1        | item        | 0.430        |
|              | drape, sterile, for Mayo stand                 | 1        | item        | 1.070        |
|              | needle, 18-27g                                 | 2        | item        | 0.040        |
|              | drape, sterile barrier 16in x 29in             | 1        | item        | 0.510        |
|              | gown, surgical, sterile                        | 1        | item        | 5.130        |
|              | cap, surgical                                  | 1        | item        | 1.140        |
|              | syringe 3ml                                    | 1        | item        | 0.250        |
|              | lidocaine 1%-2% inj (Xylocaine)                | 5        | ml          | 0.060        |
| <b>Added</b> | <b>swab, patient prep, 1.5 ml (chloraprep)</b> | <b>1</b> | <b>item</b> | <b>1.090</b> |

After consideration of the public comments, we are finalizing the creation of the SA135 alternate injection pack. We note that this supply is not currently included in any CPT or HCPCS codes but has been added to our direct PE database for future use in services.

*Comment*: A commenter expressed concern that the prices for the injectable fluorescein (SH033) and lidocaine (SH049) supplies were too low. The commenter submitted invoices for both supply items and requested that they be used to update their respective prices.

*Response*: After reviewing the invoices, we are updating the price of the fluorescein injectable (5ml uou)

(SH033) supply from \$38.02 to \$49.13 based on an average of prices from five submitted invoices. We did not include the sixth invoice for the SH033 supply (with a listed price of \$64.80) in this average as it described a different type of injectable fluorescein from the other five invoices (it described 2 mL of a 25% solution as opposed to 5 mL of a 10% solution on the other five invoices).

We are not updating the price of the lidocaine 2% w-epidural injectable (Xylocaine w-epi) (SH049) supply as the two submitted invoices were not usable for pricing. One of the invoices detailed a 3.5% type of lidocaine while the

SH049 supply code specifies that it is for 2% lidocaine. The other submitted invoice specifically noted that it was a “preservative free” version of lidocaine which was more expensive than the typical item; we do not agree that this invoice would be accurate for establishing a new national price for the SH049 supply. We remain interested in additional information regarding updated pricing information for the SH049 and other supply/equipment codes; as noted below, interested parties are encouraged to submit invoices with their public comments or, if outside the notice and comment rulemaking

process, via email at [PE\\_Price\\_Input\\_Update@cms.hhs.gov](mailto:PE_Price_Input_Update@cms.hhs.gov).

We did not make any proposals associated with HCPCS codes G0460 (*Autologous platelet rich plasma for chronic wounds/ulcers, including phlebotomy, centrifugation, and all other preparatory procedures, administration and dressings, per treatment*) or G0465 (*Autologous platelet rich plasma (prp) for diabetic chronic wounds/ulcers, using an FDA-cleared device (includes administration, dressings, phlebotomy, centrifugation, and all other preparatory procedures, per treatment)*) in the CY 2023 PFS proposed rule. In the CY 2021 PFS final rule, we established contractor pricing for HCPCS code G0460 for CY 2021 (85 FR 84497–84498). In the CY 2022 PFS final rule, we finalized a policy to maintain contractor pricing for HCPCS code G0460 as we did not have sufficient information to establish national pricing, and we did not receive public comments on either the proposal or comment solicitation to support establishing a national payment rate (86 FR 65019–65020). It remains unclear to us what the typical supply inputs would be for HCPCS code G0460 and whether they would include the use of the new 3C patch system.

*Comment:* Following the publication of the CY 2023 PFS proposed rule, we received two comments on the pricing of HCPCS codes G0460 and G0465, and the 3C patch system supply which is topically applied for the management of exuding cutaneous wounds, such as leg ulcers, pressure ulcers, and diabetic ulcers and mechanically or surgically-debrided wounds. One commenter submitted invoices associated with the pricing of the 3C patch system (SD343) supply for which we established a price of \$625.00 in the CY 2021 PFS final rule (85 FR 84498). The commenter requested that CMS update its supply database based on invoices submitted for SD343 to reflect an updated price of \$750.00 per unit. The commenter also requested national pricing for HCPCS codes G0460 and G0465, expressing concern that insufficient payment disproportionately impacts vulnerable populations. The commenter requested a payment rate of \$1,408.90 for HCPCS G0465 in the office setting, stating that this rate would appropriately account for the purchase of the 3C patch, as well as the other related costs and supply inputs required for point of care creation and administration.

Another commenter requested the establishment of new codes to allow for quantity-specific payment when multiple patches are needed to treat wounds of various surface sizes. Both

commenters stated that many months have passed since CMS updated NCD 270.3 in April 2021 (for Blood-Derived Products for Chronic, Non-Healing Wounds), however, the 3C patch remains nearly inaccessible in the office and facility settings because of insufficient payment by MACs. Both commenters suggested that, to date, just one MAC has assigned a payment rate for HCPCS code G0465, which the commenters believe is too low to cover the cost to purchase and administer the patch. One commenter expressed support for the professional fee to administer the patch in the facility setting determined by this MAC, First Coast (\$135.97), with the appropriate geographic adjustments, and urged CMS either to apply this rate nationally or to require MACs to set a carrier price in a timely and transparent manner. Both commenters stated that health care providers in the remaining MAC jurisdictions have faced denials even when they follow the coverage guidelines specified by our NCD 270.3. One commenter contended that, as of 2019, 27.5 percent of the traditional Medicare beneficiaries had a diabetes diagnosis. Both commenters highlighted that, within this population, the prevalence of diabetes is significantly higher among Medicare FFS beneficiaries who identify as Native American or Black/African American relative to their white counterparts, and furthermore, these historically underserved populations are also more likely to develop foot ulcers and infections that require amputation. The commenters stated that the 3C Patch has the potential to help cure these concerning health disparities and requested that we make the 3C Patch accessible by establishing national pricing for HCPCS codes G0460 and G0465.

*Response:* We do not have enough information to establish national pricing at this time. We will consider the commenters' feedback for future rulemaking while maintaining contractor pricing for CY 2023, which will allow for more flexibility for contractors to establish appropriate pricing using available information. We appreciate the invoice submission with additional pricing information for the SD343 supply and will update our supply database for supply code SD343 at a price of \$678.57 based on an average of the submitted invoices.

#### (1) Invoice Submission

We remind readers that we routinely accept public submission of invoices as part of our process for developing payment rates for new, revised, and

potentially misvalued codes. Often these invoices are submitted in conjunction with the RUC-recommended values for the codes. To be included in a given year's proposed rule, we generally need to receive invoices by the same February 10th deadline we noted for consideration of RUC recommendations. However, we will consider invoices submitted as public comments during the comment period following the publication of the PFS proposed rule, and would consider any invoices received after February 10th or outside of the public comment process as part of our established annual process for requests to update supply and equipment prices. Interested parties are encouraged to submit invoices with their public comments or, if outside the notice and comment rulemaking process, via email at [PE\\_Price\\_Input\\_Update@cms.hhs.gov](mailto:PE_Price_Input_Update@cms.hhs.gov).

#### c. Clinical Labor Pricing Update

Section 220(a) of the PAMA provides that the Secretary may collect or obtain information from any eligible professional or any other source on the resources directly or indirectly related to furnishing services for which payment is made under the PFS, and that such information may be used in the determination of relative values for services under the PFS. Such information may include the time involved in furnishing services; the amounts, types and prices of PE inputs; overhead and accounting information for practices of physicians and other suppliers, and any other elements that would improve the valuation of services under the PFS.

Beginning in CY 2019, we updated the supply and equipment prices used for PE as part of a market-based pricing transition; CY 2022 was the final year of this 4-year transition. We initiated a market research contract with StrategyGen to conduct an in-depth and robust market research study to update the supply and equipment pricing for CY 2019, and we finalized a policy in CY 2019 to phase in the new pricing over a period of 4 years. However, we did not propose to update the clinical labor pricing, and the pricing for clinical labor has remained unchanged during this pricing transition. Clinical labor rates were last updated for CY 2002 using Bureau of Labor Statistics (BLS) data and other supplementary sources where BLS data were not available; we refer readers to the full discussion in the CY 2002 PFS final rule for additional details (66 FR 55257 through 55262).

Interested parties raised concerns that the long delay since clinical labor

pricing was last updated created a significant disparity between CMS' clinical wage data and the market average for clinical labor. In recent years, a number of interested parties suggested that certain wage rates were inadequate because they did not reflect current labor rate information. Some interested parties also stated that updating the supply and equipment pricing without updating the clinical labor pricing could create distortions in the allocation of direct PE. They argued that since the pool of aggregated direct PE inputs is budget neutral, if these rates are not routinely updated, clinical labor may become undervalued over time relative to equipment and supplies, especially since the supply and equipment prices are in the process of being updated. There was considerable interest among interested parties in updating the clinical labor rates, and when we solicited comment on this topic in past rules, such as in the CY 2019 PFS final rule (83 FR 59480), interested parties supported the idea.

Therefore, we proposed to update the clinical labor pricing for CY 2022, in conjunction with the final year of the supply and equipment pricing update (86 FR 39118 through 39123). We believed it was important to update the clinical labor pricing to maintain relativity with the recent supply and equipment pricing updates. We proposed to use the methodology outlined in the CY 2002 PFS final rule (66 FR 55257), which draws primarily from BLS wage data, to calculate updated clinical labor pricing. As we stated in the CY 2002 PFS final rule, the BLS' reputation for publishing valid estimates that are nationally representative led to the choice to use the BLS data as the main source. We believe that the BLS wage data continues to be the most accurate source to use as a basis for clinical labor pricing and this data will appropriately reflect changes in clinical labor resource inputs for purposes of setting PE RVUs under the PFS. We used the most current BLS survey data (2019) as the main source of wage data for our CY 2022 clinical labor proposal.

We recognized that the BLS survey of wage data does not cover all the staff types contained in our direct PE database. Therefore, we crosswalked or

extrapolated the wages for several staff types using supplementary data sources for verification whenever possible. In situations where the price wages of clinical labor types were not referenced in the BLS data, we used the national salary data from the Salary Expert, an online project of the Economic Research Institute that surveys national and local salary ranges and averages for thousands of job titles using mainly government sources. (A detailed explanation of the methodology used by Salary Expert to estimate specific job salaries can be found at [www.salaryexpert.com](http://www.salaryexpert.com)). We previously used Salary Expert information as the primary backup source of wage data during the last update of clinical labor pricing in CY 2002. If we did not have direct BLS wage data available for a clinical labor type, we used the wage data from Salary Expert as a reference for pricing, then crosswalked these clinical labor types to a proxy BLS labor category rate that most closely matched the reference wage data, similar to the crosswalks used in our PE/HR allocation. For example, there is no direct BLS wage data for the Mammography Technologist (L043) clinical labor type; we used the wage data from Salary Expert as a reference and identified the BLS wage data for Respiratory Therapists as the best proxy category. We calculated rates for the "blend" clinical labor categories by combining the rates for each labor type in the blend and then dividing by the total number of labor types in the blend.

As in the CY 2002 clinical labor pricing update, the proposed cost per minute for each clinical staff type was derived by dividing the average hourly wage rate by 60 to arrive at the per minute cost. In cases where an hourly wage rate was not available for a clinical staff type, the proposed cost per minute for the clinical staff type was derived by dividing the annual salary (converted to 2021 dollars using the Medicare Economic Index) by 2080 (the number of hours in a typical work year) to arrive at the hourly wage rate and then again by 60 to arrive at the per minute cost. We ultimately finalized the use of median BLS wage data, as opposed to mean BLS wage data, in response to comments in the CY 2022 PFS final

rule. To account for the employers' cost of providing fringe benefits, such as sick leave, we finalized the use of a benefits multiplier of 1.296 based on a BLS release from June 17, 2021 (USDLE-21-1094). As an example of this process, for the Physical Therapy Aide (L023A) clinical labor type, the BLS data reflected a median hourly wage rate of \$12.98, which we multiplied by the 1.296 benefits modifier and then divided by 60 minutes to arrive at the finalized per-minute rate of \$0.28.

After considering the comments on our CY 2022 proposals, we agreed with commenters that the use of a multi-year transition would help smooth out the changes in payment resulting from the clinical labor pricing update, avoiding potentially disruptive changes in payment for affected interested parties, and promoting payment stability from year-to-year. We believed it would be appropriate to use a 4-year transition, as we have for several other broad-based updates or methodological changes. While we recognized that using a 4-year transition to implement the update means that we will continue to rely in part on outdated data for clinical labor pricing until the change is fully completed in CY 2025, we agreed with the commenters that these significant updates to PE valuation should be implemented in the same way, and for the same reasons, as for other major updates to pricing such as the recent supply and equipment update. Therefore, we finalized the implementation of the clinical labor pricing update over 4 years to transition from current prices to the final updated prices in CY 2025. We finalized the implementation of this pricing transition over 4 years, such that one quarter of the difference between the current price and the fully phased-in price is implemented for CY 2022, one third of the difference between the CY 2022 price and the final price is implemented for CY 2023, and one half of the difference between the CY 2023 price and the final price is implemented for CY 2024, with the new direct PE prices fully implemented for CY 2025. An example of the transition from the current to the fully-implemented new pricing that we finalized in the CY 2022 PFS final rule is provided in Table 6.

TABLE 6: Example of Clinical Labor Pricing Transition

|                        |        |  |
|------------------------|--------|--|
| Current Price          | \$1.00 |  |
| Final Price            | \$2.00 |  |
| Year 1 (CY 2022) Price | \$1.25 | 1/4 difference between \$1.00 and \$2.00 |
| Year 2 (CY 2023) Price | \$1.50 | 1/3 difference between \$1.25 and \$2.00 |
| Year 3 (CY 2024) Price | \$1.75 | 1/2 difference between \$1.50 and \$2.00 |
| Final (CY 2025) Price  | \$2.00 |  |

(1) CY 2023 Clinical Labor Pricing Update Proposals

For CY 2023, we received information from one interested party regarding the pricing of the Histotechnologist (L037B) clinical labor type. The interested party provided data from the 2019 Wage Survey of Medical Laboratories which supported an increase in the per-minute rate from the \$0.55 finalized in the CY 2022 PFS final rule to \$0.64. This rate of \$0.64 for the L037B clinical labor type is a close match to the online salary

data that we had for the Histotechnologist and matches the \$0.64 rate that we initially proposed for L037B in the CY 2022 PFS proposed rule. Based on the wage data provided by the commenter, we proposed this \$0.64 rate for the L037B clinical labor type for CY 2023; we also proposed a slight increase in the pricing for the Lab Tech/Histotechnologist (L035A) clinical labor type from \$0.55 to \$0.60 as it is a blend of the wage rate for the Lab Technician (L033A) and Histotechnologist clinical labor types. We also proposed the same

increase to \$0.60 for the Angio Technician (L041A) clinical labor type, as we previously established a policy in the CY 2022 PFS final rule that the pricing for the L041A clinical labor type would match the rate for the L035A clinical labor type (86 FR 65032). The proposed pricing increase for these three clinical labor types is included in Table 7; the CY 2023 pricing for all other clinical labor types would remain unchanged from the pricing finalized in the CY 2022 PFS final rule.

BILLING CODE 4150–28–P

**TABLE 7: Proposed CY 2023 Clinical Labor Pricing**

| Labor Code | Labor Description                                 | Source                                       | CY 2021 Rate Per Minute | Final Rate Per Minute | Y2 Phase-In Rate Per Minute | Total % Change |
|------------|---|--|-------------------------|-----------------------|-----------------------------|----------------|
| L023A      | Physical Therapy Aide                             | BLS 31-2022                                  | 0.23                    | 0.28                  | 0.255                       | 22%            |

\* Updated for CY 2023

#### BILLING CODE 4150-28-C

*Comment:* Several commenters noted that there was an error in the proposed clinical labor pricing table in the CY 2023 PFS proposed rule (87 FR 45874) where the final rate per minute for the L041A Angio Technician clinical labor type was incorrectly listed at 0.58 rather than the correct 0.60 as specified in the preamble text.

*Response:* We agree that the incorrect rate per minute for the L041A clinical labor type was reflected in Table 5 of the proposed rule, and have corrected this error in Table 7 of this final rule. We apologize for any confusion that may have been caused by this mistake.

As was the case for the market-based supply and equipment pricing update, the clinical labor rates will remain open for public comment over the course of the 4-year transition period. We updated the pricing of a number of clinical labor types in the CY 2022 PFS final rule in response to information provided by commenters. For the full discussion of the clinical labor pricing update, we direct readers to the CY 2022 PFS final rule (86 FR 65020 through 65037).

The following is a summary of the comments we received and our responses.

*Comment:* Several commenters stated their support for the proposed pricing updates to the Histotechnologist (L037B) and the Lab Tech/Histotechnologist (L035A) clinical labor types and urged CMS to finalize the updated pricing.

*Response:* We appreciate the support for our proposals from the commenters.

*Comment:* Several commenters requested that CMS update the clinical labor description of the Angio Technician (L041A) clinical labor type to “Vascular Interventional Technologist.” The commenters stated that this updated title for the L041A clinical labor type would better align with industry recognition of the advanced certification required to assist physicians with minimally invasive, image-guided vascular procedures.

*Response:* We appreciate the feedback and are finalizing a change in the descriptive text of the L041A clinical labor type from “Angio Technician” to “Vascular Interventional Technologist” as requested by the commenter.

*Comment:* Several commenters disagreed with the proposed pricing for several different technologist clinical labor types. The commenters stated that basic certification is required for a radiologic technologist and that there are additional advanced modality certifications, such as for Computed Tomography (CT), Magnetic Resonance (MR), and Vascular Intervention (VI), which require additional educational programs and training for these advanced modalities/disciplines. The commenters stated that the proposed pricing for the Vascular Interventional Technologist (L041A), the Mammography Technologist (L043A), the CT Technologist (L046A), and the MRI Technologist (L047A) clinical labor types did not reflect the training and certification required for these occupations. The commenters submitted wage data from the 2022 Radiologic Technologist Wage and Salary Survey and requested that the pricing for these four clinical labor types be updated to reflect the wage data from the submitted survey.

*Response:* When we initiated the clinical labor pricing update last year, we lacked specific wage data for the Vascular Interventional Technologist (L041A), the Mammography Technologist (L043A), and the CT Technologist (L046A) clinical labor types; and relied on crosswalks for their pricing. Based on the information contained in the 2022 Radiologic Technologist Wage and Salary Survey, we now have specific wage data which will allow us to no longer rely on crosswalks for pricing for these clinical labor types. Therefore, we are finalizing an update in the pricing of these three clinical labor types: from 0.60 to 0.84 for the Vascular Interventional Technologist (L041A), from 0.63 to 0.79 for the Mammography Technologist (L043A), and from 0.76 to 0.78 for the CT Technologist (L046A). For the MRI Technologist (L047A), we were able to make use of direct BLS wage data for the occupation. In addition, since we continue to believe that the BLS is the most accurate source of information for wage data, we are not finalizing an increase in the pricing of the L047A clinical labor type. As a reminder, CY

2023 is the second year of the four-year transition to the updated clinical labor pricing, and we will continue to transition the prices established for these three clinical labor types over the next two years of the update.

*Comment:* A commenter thanked CMS for the agency’s recent work in updating clinical labor pricing and stated that nurses and other nonphysician providers have been drastically undervalued for many years which could help to alleviate staffing shortages. The commenter stated that the table of clinical labor types in the proposed rule listed registered nurses (RNs) as their own category for labor pricing under the L051A clinical labor code, but then also included RNs in eight other categories of clinical labor with other practitioners. The commenter requested having RNs identified uniquely and removing the RN option from the other clinical labor categories, as the commenter stated that leaving RNs in other categories would only make the clinical labor update more confusing and could end up disadvantaging RNs in the long term which could exacerbate the current staffing shortage and worsen patient care.

*Response:* We do not agree that RNs should be removed from the other eight clinical labor types currently listed in our direct PE database. There is a long history of using these “blended” clinical labor categories under the PFS, and together these eight clinical labor types make up the overwhelming majority of all clinical labor (especially the RN/LPN/MTA blend described by the L037D clinical labor code). In the absence of alternative pricing information to value these blended clinical labor types, we continue to believe that the proposed prices are the most accurate valuations. We also note for the commenter that the pricing for the RN (L051A) clinical labor type is drawn directly from BLS wage data and the inclusion of RNs in other “blended” clinical labor types has no effect on the pricing of the L051A category itself.

*Comment:* A commenter stated that the current RN/LPN (L042A) clinical labor type assigned to CPT code 36516 did not accurately reflect the costs associated with this procedure. The

commenter stated that CPT code 36516 is a complex extracorporeal blood therapy procedure, conducted over a 5–1/2 to 6-hour period, that requires extensively trained and experienced nurse operators known as apheresis nurses. The commenter stated that the current assignment of the RN/LPN (L042A) clinical labor type for CPT code 36516 seriously undervalues the critical nurse labor cost component of this nearly six-hour procedure and requested that CMS establish a new “Apheresis Nurse” clinical labor type with a valuation of approximately \$1.14 per minute. The commenter also stated that there are additional supply items not currently captured in the direct PE inputs for CPT code 36516 including a 4-liter accessory waste bag, several types of fluids, and biohazard waste costs.

*Response:* We remind the commenter that we did not propose the creation of any new clinical labor types nor did we propose any changes in the direct PE inputs for CPT code 36516. If the commenter has reason to believe that the RN/LPN (L042A) clinical labor type is not capturing the typical labor costs associated with CPT code 36516 or that there are additional supply costs not being captured in its direct PE inputs, we encourage them to nominate CPT code 36516 as potentially misvalued for additional review.

*Comment:* Several commenters stated that, to promote predictability and stability in physician payments and mitigate the financial impacts of significant fluctuations in physician payments that might accompany the clinical labor pricing update, CMS should consider using a threshold to limit the level of reductions in payments for specific services that

would occur in a single year. Several commenters noted that in the CY 2023 Inpatient Prospective Payment System final rule, CMS implemented a permanent 5 percent cap on the reduction in an MS–DRG’s relative weight in a given fiscal year; the commenters suggested applying a similar cap of 5 percent, 10 percent, or 15 percent for the Physician Fee Schedule.

*Response:* We agree with the commenters on the importance of avoiding potentially disruptive changes in payment for affected interested parties and the need to promote payment stability from year-to-year. This is why we finalized the use of a multi-year transition for the clinical labor update in last year’s CY 2022 PFS final rule to help smooth out the changes in payment resulting from the updated data (86 FR 65024). We also note for the commenters that section 1848(c)(7) of the Act, as added by section 220(e) of the PAMA, specifies that for services that are not new or revised codes, if the total RVUs for a service for a year would otherwise be decreased by an estimated 20 percent or more as compared to the total RVUs for the previous year, the applicable adjustments in work, PE, and MP RVUs shall be phased-in over a 2-year period. For additional information regarding the phase-in of significant RVU reductions, we direct readers to the CY 2016 PFS final rule with comment period (80 FR 70927 through 70929). Given the mechanisms already in place to smooth payment changes and promote stability, and considering the need to establish appropriate resource-based valuations, we do not believe the limitation suggested by commenters is warranted.

*Comment:* Several commenters stated that CMS should prioritize stability and predictability over ongoing updates and temporarily freeze the implementation of further policy updates. These commenters requested that CMS pause the ongoing clinical labor pricing update to avoid significant payment redistributions associated with the pricing update.

*Response:* We finalized the implementation of the clinical labor pricing update through the use of a 4-year transition in the CY 2022 PFS final rule (86 FR 65024). As we stated at the time, although we recognize that payment for some services will be reduced as a result of the pricing update due to the budget neutrality requirements of the PFS, we do not believe that this is a reason to refrain from updating clinical labor pricing to reflect changes in resource costs over time. The PFS is a resource-based relative value payment system that necessarily relies on accuracy in the pricing of resource inputs; continuing to use clinical labor cost data that are nearly two decades old would maintain distortions in relativity that undervalue many services which involve a higher proportion of clinical labor. As noted above, we also finalized the implementation of the pricing update through a 4-year transition to help address the concerns of the commenters about stabilizing RVUs and reducing large fluctuations in year-to-year payments.

After consideration of the comments, we are finalizing the clinical labor prices as shown in Table 8.

\* Updated for CY 2023

#### BILLING CODE 4150-28-C

As was the case for the market-based supply and equipment pricing update, the clinical labor rates will remain open for public comment over the remaining course of the 4-year transition period. We welcome additional feedback on clinical labor pricing from commenters in next year's rulemaking cycle, especially any data that will continue to improve the accuracy of our finalized pricing.

#### d. Technical Corrections to Direct PE Input Database and Supporting Files

We did not propose any technical corrections to the direct PE input database or supporting files in the proposed rule. However, commenters identified the following issues after we issued the CY 2023 PFS proposed rule:

*Comment:* Several commenters requested that the SD332 bubble contrast supply, an ultrasound-specific contrast agent, should be removed from the direct PE inputs for CPT codes 76978 (*Ultrasound, targeted dynamic microbubble sonographic contrast characterization (non-cardiac); initial lesion*) and 76979 (*Ultrasound, targeted dynamic microbubble sonographic contrast characterization (non-cardiac); each additional lesion with separate injection*). Commenters stated that this supply item does not need to be included in the direct PE inputs for these two CPT codes because contrast agents are reported separately using existing HCPCS Level II supply codes, such as Q9950 (*Injection, sulfur hexafluoride lipid microspheres, per ml*).

*Response:* We appreciate the additional information from the commenters indicating that the SD332

supply is duplicative for CPT codes 76978 and 76979 since the supply is separately reported using HCPCS Level II supply codes. Therefore, we are finalizing the removal of the SD332 supply from these two CPT codes.

In the CY 2020 PFS final rule (84 FR 63102 through 63104), we created two new HCPCS G codes, G2082 and G2083, effective January 1, 2020, on an interim final basis for the provision of self-administered esketamine. In the CY 2021 PFS final rule, we finalized a proposal to refine the values for HCPCS codes G2082 and G2083 using a building block methodology that summed the values associated with several codes (85 FR 84641 through 84642). Following the publication of the CY 2021 PFS final rule, interested parties expressed concerns that the finalized PE RVU had decreased for HCPCS codes G2082 and G2083 as compared to the proposed valuation and as compared to the previous CY 2020 interim final valuation. Interested parties questioned whether there had been an error in the PE allocation since CMS had finalized increases in the direct PE inputs for the services.

We reviewed the indirect PE allocation for HCPCS codes G2082 and G2083 in response to the interested party inquiry and discovered a technical change that was applied in error. Specifically, we inadvertently assigned a different physician specialty than we intended ("All Physicians") to HCPCS codes G2082 and G2083 for indirect PE allocation in our ratesetting process during valuation of these codes in the CY 2020 PFS final rule, and continued that assignment into the CY 2021 PFS proposed rule. This specialty

assignment caused the PE value for these services to be higher than anticipated for CY 2020. We intended to revise the assigned physician specialty for these codes to "General Practice" in the CY 2021 PFS final rule; however, we neglected to discuss this change in the course of PFS rulemaking for CY 2021. Since we initially applied this technical change in the CY 2021 PFS final rule without providing an explanation, we issued a correction notice (86 FR 14690) to remove this change from the CY 2021 PFS final rule, and to instead maintain the All Physicians specialty assignment through CY 2021. We apologize for any confusion this may have caused.

For CY 2022, we finalized our proposal to maintain the currently assigned physician specialty for indirect PE allocation for HCPCS codes G2082 and G2083 to maintain payment consistency with the rates published in the CY 2020 PFS final rule and the CY 2021 PFS proposed rule. Although we had previously intended to assign the General Practice specialty to these codes, interested parties have provided additional information about these services suggesting that maintaining the All Physicians specialty assignment for these codes will help maintain payment stability and preserve access to this care for beneficiaries. We solicited public comments to help us discern which specialty would be the most appropriate to use for indirect PE allocation for HCPCS codes G2082 and G2083. We note that the PE methodology, which relies on the allocation of indirect costs based on the magnitude of direct costs, should appropriately reflect the typical costs for the specialty the commenters suggest. For example, we do not believe

it would be appropriate to assign the Psychiatry specialty for these services given that HCPCS codes G2082 and G2083 include the high direct costs associated with esketamine supplies. The Psychiatry specialty is an outlier compared to most other specialties, allocating indirect costs at a 15:1 ratio based on direct costs because psychiatry services typically have very low direct costs. Assignment of most other specialties would result in allocation of direct costs at roughly a 3:1 ratio. We requested that commenters explain in their comments how the indirect PE allocation would affect the payment for these services. Specifically, to ensure appropriate payment for HCPCS codes G2082 and G2083, we wanted to get a better understanding of the indirect costs associated with these services, relative to other services furnished by the suggested specialty.

As we noted in the CY 2021 PFS final rule (85 FR 84498 through 84499) and CY 2022 PFS final rule (86 FR 65042), the RAND Corporation was studying potential improvements to our PE allocation methodology and the data that underlie it. We were interested in exploring ways that the PE methodology can be updated, which could include improvements to the indirect PE methodology to address newer services similar to those described by G2082 and G2083 which have a direct to indirect ratio that does not match their most commonly billed specialties. In CY 2022, we agreed with the commenters who supported the proposal to maintain the currently assigned physician specialty (All Physicians) for indirect PE allocation for these codes. After consideration of the public comments, we finalized our proposal to maintain the All Physicians specialty for indirect PE allocation for HCPCS codes G2082 and G2083 for CY 2022.

For CY 2023, we did not make any proposals regarding the assigned physician specialty for indirect PE allocation for HCPCS codes G2082 and G2083; however, we received public comments on this topic from interested parties. The following is a summary of the comments we received and our responses.

**Comment:** One commenter urged CMS to adopt a clear and recurring process to update, on an annual basis, supply costs for codes G2082 and G2083 with the most recently available wholesale acquisition cost (WAC) data and to include the “Psychiatry” specialty type in the allocation of the indirect PE for G2082 and G083. The commenter believed these recommended actions directly support the following two priority CMS

initiatives: the CMS Behavioral Health Strategy and an approach to improve the PE methodology within the PFS. The commenter stated that the technical correction for CY 2021 to assign these HCPCS codes to the “All Physician” specialty preserved Medicare beneficiary access and was an improvement over the original CMS intent to assign them to the “General Practice” specialty but “demonstrated the sensitive and intricate dependency of Medicare beneficiary access on reimbursement.”

The commenter urged CMS to provide additional insight behind its specialty designation of “All Physicians” for HCPCS codes G2082 and G2083, and argued that CMS deviated from its normal practice of using the specialty mix contained in the claims data for these codes. The commenter stated that, while CMS has cited concerns in applying the actual specialty mix, CMS has not provided sufficient information or data to suggest that the rates produced when the “Psychiatry” specialty is included produces an inaccurate payment. The commenter also requested that CMS consider the implementation of policies that allow for the construction of specialty blends in unique cases, such as HCPCS codes G2082 and G2083, in which the agency has concerns about applying a service’s actual specialty mix. The commenter stated that, based on utilization data published with the CY 2023 PFS proposed rule, over 70 percent of practitioners administering esketamine are psychiatrists. Considering that it is primarily psychiatrists administering esketamine and CMS recognizes the imperative to improve the indirect PE and PFS rate setting methodology for behavioral health services, the commenter recommended a transition of specialty designation for HCPCS codes G2082 and G2083 to its actual specialty mix through a three-year phased-in approach. The commenter recognized CMS’ concerns about assigning the Psychiatry specialty for HCPCS codes G2082 and G2083 given the higher supply costs for these services, but recommended that CMS adopt a specialty blend of three-fourths “Psychiatry” specialty type and one-fourth “All Physician” specialty type. The commenter believed that this specialty blend would result in appropriate reimbursement and acknowledge the role of psychiatrists while also addressing our concerns.

The commenter also stated that in CY 2021, CMS updated the price for the esketamine supply item for these codes using wholesale acquisition cost (WAC) data from the most recent available

quarter, but did not again update the price using the latest WAC data in the CY 2022 PFS final rule, or propose to update the price in the CY 2023 PFS proposed rule. The commenter stated that, based on WAC data on submitted invoices for the most recently available quarter, the supply input that describes 56 mg (supply code SH109) for HCPCS code G2082 should be priced at \$683.67, and the supply input describing 84 mg of esketamine (supply code SH110) for HCPCS code G2083 should be priced at \$1025.50. The commenter urged CMS to align with its prior action and stated intention to address input price updates in future rulemaking by updating the supply pricing for SH109 and SH110 using WAC data annually, and to make clear the additional data or processes interested parties should follow to support annual updates for the esketamine supply items for these codes.

**Response:** We continue to believe that the All Physicians specialty most accurately captures the indirect PE allocation associated with HCPCS codes G2082 and G2083. We do not assign a blended combination of specialties for any other services and the commenters did not provide new data to support a change in specialty assignment aside from noting that many practitioners who report HCPCS codes G2082 and G2083 are in the Psychiatry specialty. We continue to believe that it would not be accurate to assign the Psychiatry specialty for HCPCS codes G2082 and G2083 due to its outlier status among specialties, whereby Psychiatry allocates indirect costs at a 15:1 ratio based on direct costs as compared to most other specialties having approximately a 3:1 ratio. We do not believe that Psychiatry would be an accurate specialty designation for HCPCS codes G2082 and G2083 given the high direct costs associated with esketamine (which would translate into disproportionately high indirect PE allocation at the 15:1 ratio). We also disagree that these services should be reassigned to a different specialty to offset reductions in payment that result from an unrelated policy proposal (the clinical labor pricing update).

However, to account for the cost of the provision of the self-administered esketamine as a direct PE input, we agree with the commenters that we should update supply costs to reflect the wholesale acquisition cost (WAC) data from the most recent available quarter. For HCPCS code G2082, we are finalizing an updated price of \$683.67 for the supply input that describes 56 mg (supply code SH109) and for HCPCS code G2083, we are finalizing an

updated price of \$1025.50 for the supply input describing 84 mg of esketamine (supply code SH110) based on the submitted invoices.

After consideration of the public comments, we continue to believe that the All Physician specialty is the most accurate specialty assignment for HCPCS codes G2082 and G2083, and we are not finalizing any changes to the specialty assignment. However, as noted above we are finalizing an increase in the price of the SH109 supply to \$683.67 and an increase in the price of the SH110 supply to \$1025.50 to reflect the updated market-based prices associated with esketamine. We also received comments on other policies relating to these services that were not addressed in the CY 2023 PFS proposed rule, and which we are not addressing in this final rule. We appreciate the feedback from the commenters and will take it into consideration for possible future rulemaking.

#### 5. Soliciting Public Comment on Strategies for Updates To Practice Expense Data Collection and Methodology

The PE inputs used in setting PFS rates, including both the development of PE RVUs and, historically, the relative shares among work, PE, and malpractice RVUs across the PFS, are central in developing accurate rates and maintaining appropriate relativity among PFS services and overall payment among the professionals and suppliers paid under the PFS. Consequently, the underlying PE data inputs are a consistent point of interest among interested parties. However, unlike other payment systems with cost reporting systems, PFS data inputs are primarily based on exogenous proprietary data that become available as the data are collected. Specifically, we rely on historical survey data (almost all of which is over a decade old), some publicly available data collected for other purposes (for example, Bureau of Labor Statistics (BLS) wage data), recommendations from the American Medical Association and other provider groups, and annual Medicare claims data.

##### a. History of Updates to PE Inputs

Each year we continue to improve accuracy, predictability, and sustainability of updates to the PE valuation methodology to reduce the risks of possible misvaluation and other unintended outcomes. We have continued to develop policies geared toward providing more consistent updates to the direct PE inputs used in PFS ratesetting, including supply/

equipment pricing and clinical labor rates. These efforts to develop these policies should contribute to improved standardization and transparency for all PE inputs used to update the PFS. As we continue our work to improve the information we use in our PE methodology, we issued a general comment solicitation to better understand how we might improve the collection of PE data inputs and refine the PE methodology.

In recent years, we have refined specific PE data inputs using a combination of market research and publicly available data (for example, market research on medical supply and equipment items and BLS data to update clinical labor wages) to update the direct PE data inputs used in the PFS ratesetting process. Last year, we implemented a final transition year for supply and equipment pricing updates and started the first year of a 4-year phase-in update to the clinical labor rates. However, the indirect PE data inputs remain tied to legacy information that is well over a decade old. To build on much needed progress, we now believe indirect PE would also benefit from a refresh that implements similar standard and routine updates. We believe that a data refresh, and use of data sources that receive routine refreshes, would reduce the likelihood of unpredictable shifts in payment, especially when such shifts could be driven by the age of data available rather than comprehensive information about changes in actual costs.

##### b. Data Collection, Analysis and Findings

In light of feedback from interested parties, CMS has prioritized stability and predictability over ongoing updates, and has taken a measured approach to updating PE data inputs. We have worked with interested parties and CMS contractors over a period of years to study the landscape and identify possible strategies to reshape the PE portion of physician payments. The fundamental issues are clear, but thought leaders and subject matter experts have advocated for more than one tenable approach to updating our PE methodology. Thus, we must balance the various interests of the public, and any path forward should allow for ongoing and routine cycles of PE updates.

Of the various PE data inputs, we believe that indirect PE data inputs, which reflected costs such as office rent, IT costs, and other non-clinical expenses, present the opportunity to build consistency, transparency, and predictability into our methodology to

update PE data inputs. The primary source for indirect PE information is the Physician Practice Information Survey (PPIS), fielded by the AMA. The survey was most recently conducted in 2007 and 2008 (reflecting 2006 data). The survey respondents were self-employed physicians and selected nonphysician practitioners.

In general, interested parties have expressed the following concerns regarding CMS's approach to indirect PE allocation:

- CMS seems to rely on increasingly out-of-date data sources, and there is a dearth of mechanisms to update empirical inputs.
- The approach exacerbates payment differentials that possibly create inappropriate variation of reimbursement across ambulatory places of service (for example, significantly higher payments for the same service provided in a hospital outpatient department versus a physician office).
- CMS's method of indirect PE allocation may not accurately reflected variation in PE across different types of services, different practice characteristics, or evolving business models. Beyond these issues, we have also explored other concerns with our indirect PE allocation method in depth in previous rulemaking. For example, refer to our previous comment solicitation and discussion of resource costs for services involving the use of innovative technologies in our CY 2022 PFS proposed rule (86 FR 39125). PE data inputs, and the methodological and evidence-based principles that shape use of such information in the context of reimbursement, are discussed in depth in a RAND Corporation ("RAND") report prepared for CMS, entitled *Practice Expense Methodology and Data Collection Research and Analysis*, available at [https://www.rand.org/pubs/research\\_reports/RR2166.html](https://www.rand.org/pubs/research_reports/RR2166.html).<sup>1</sup>

Various interested parties have taken issue with the use of certain costs in our current PE allocation methodology that they do not believe are associated with increased indirect PE. Some interested parties argue that the costs of disposable supplies, especially expensive supplies, and equipment are not relevant to allocating indirect PE; or that similarly, work in the facility setting (for example, work RVUs for surgical procedures) is not relevant to allocating indirect PE,

<sup>1</sup> Burgette, Lane F., Jodi L. Liu, Benjamin M. Miller, Barbara O. Wynn, Stephanie Dellva, Rosalie Malsberger, Katie Merrell, et al. "Practice Expense Methodology and Data Collection Research and Analysis." RAND Corporation, April 11, 2018. [https://www.rand.org/pubs/research\\_reports/RR2166.html](https://www.rand.org/pubs/research_reports/RR2166.html).

though they agree that work in the office setting may be relevant to allocating indirect PE.<sup>2</sup> However, we do not believe that there is sufficient, if any, data or peer-reviewed evidence available to definitively show that shifting indirect PE allocations based on the setting of care, or based on specialty, would result in improved allocations of PE that reflect true costs. Further, varying indirect PE allocations based on setting of care or based on specialty might create unintended consequences such as reduced access to care for beneficiaries, or reduced competition and autonomy of small group practices or individual clinicians whose revenue is based in part on services furnished under contract in the facility setting.

We believe it is necessary to establish a roadmap toward more routine PE updates, especially because potentially improper or outdated allocation of PE across services may affect access to certain services, which could exacerbate disparities in care and outcomes. Establishing payments that better reflect current practice costs would mitigate possible unintended consequences, such as labor market distortions due to indirect cost allocations that do not reflect the current evolution of health care practice.<sup>3</sup> Interested parties have reiterated their desire for CMS to move away from the current PE allocation approach and continued to raise concerns with CMS's methodology and the underlying PE data inputs. In response to these and other concerns, we continue to review the methodology we use to establish the PE RVUs and to identify refinements. As part of this effort, we have contracted with RAND to develop and assess potential improvements in the current methodology used to allocate indirect practice costs in determining PE RVUs for a service, model alternative methodologies for determining PE RVUs, and identify and assess alternative data sources that CMS could use to regularly update indirect practice cost estimates.<sup>4</sup>

In this final rule, we are signaling our intent to move to a standardized and routine approach to valuation of indirect PE and we solicited feedback from interested parties on what this may entail, given our discussion above. We would propose the new approach to valuation of indirect PE in future rulemaking.

We solicited comment on the following topics related to identification of the appropriate instrument, methods, and timing for updating specialty-specific PE data:

- Potential approaches to design, revision, and fielding of a PE survey that foster transparency (for example, transparency in terms of the methods of survey design, the content of the survey instrument, and access to raw results for informing PFS ratesetting); and
- Mechanisms to ensure that data collection and response sampling adequately represent physicians and non-physician practitioners across various practice ownership types, specialties, geographies, and affiliations.

We also solicited comment on any alternatives to the above that would result in more predictable results, increased efficiencies, or reduced burdens. For example:

- Use of statistical clustering or other methods that would facilitate a shift away from specialty-specific inputs to inputs that relate to homogenous groups of specialties without a large change in valuation relative to the current PE allocations.
- Avenues by which indirect PE can be moved for facility to non-facility payments, based on data reflecting site of service cost differences.
- Methods to adjust PE to avoid the unintended effects of undervaluing cognitive services due to low indirect PE.
- A standardized mechanism and publicly available means to track and submit structured data and supporting documentation that informs pricing of supplies or equipment.
- Sound methodological approaches to offset circularity distortions, where variable costs are higher than necessary costs for practices with higher revenue.

We also solicited comment on the cadence, frequency, and phase-in of adjustments for each major area of prices associated with direct PE inputs (Clinical Labor, Supplies/Equipment). We requested that commenters address the following:

- Whether CMS should stagger updates year-to-year for each update, or establish "milestone" years at regular

intervals during which all direct PE inputs would be updated in the same year.

- The optimal method of phasing in the aggregate effect of adjustments, such that the impacts of updates gradually ramp up to a full 100 percent over the course of a few years (for example, 25 percent of the aggregate adjustment in Year 1, then 50 percent of the aggregate adjustment in Year 2, etc.).

- How often CMS should repeat the cycle to ensure that direct PE inputs are based on the most up-to-date information, considering the burden of data collection on both respondents and researchers fielding instruments or maintaining datasets that generate data.

We received public comments on data collection, analysis and findings. The following is a summary of the comments we received and our responses.

*Comment:* Most commenters that responded to this RFI recommended that CMS delay any change to update the indirect PE survey inputs. Many commenters urged CMS to wait for AMA data collection efforts prior to implementing changes. In responding to our RFI, the AMA RUC underscored that CMS wrote in this year's proposed rule that the AMA PPIS continues to be the best available source of data necessary for the purpose of calculating indirect PE. AMA also points to the fact that CMS has relied on AMA physician cost data for 50 years in updating the MEI and 30 years updating the RBRVS. Additionally, the RUC urged that CMS continue to work with the AMA and various specialty societies involved in the previous data collection effort, and wait for an updated set of data to become available for use. The AMA indicated that it has continued work on updates and would likely be ready by early CY 2024 with refreshed data. One commenter submitted a jointly-signed letter that did not support the AMA RUC approaches, and described a different means of data collection and analysis for updating the PE methodology. In addition to emphasizing some of the same themes noted in findings from RAND's review of the PE landscape, the letter recommended that CMS form an expert advisory group, multidisciplinary in composition, and backed with a dedicated research and development team of CMS staff, to support CMS' strategic plans to update PFS ratesetting. In this letter, the commenter also posited that indirect allocations would eventually be unnecessary, as the methodology could be evolved toward an entirely different means to capture actual costs of services. Overall, we received few direct responses to many

<sup>4</sup> Burgette, Lane F., Jodi L. Liu, Benjamin M. Miller, Barbara O. Wynn, Stephanie Dellva, Rosalie Malsberger, Katie Merrell, et al. "Practice Expense Methodology and Data Collection Research and Analysis." RAND Corporation, April 11, 2018.

of the specific prompts included in our request for information.

*Response:* We reiterate that we continue to believe that the current AMA PPIS data does represent the best available source of information at this time. However, as we continue to engage with a broad range of perspectives from interested parties who frequently ask for CMS policy to better reflect rapidly changing health care costs, we acknowledge, in consideration of these perspectives and our work to analyze these issues, that these concerns may be addressed by consistent and transparent data refreshes.

We remain interested in possible alternatives to use of a sole source of data. We believe that transparency and repeatability should be key principles for examining future work to update indirect PE inputs. We have clear agreement among interested parties that the economic and medical landscapes have changed, and rapidly. Our intent remains to seek data that capture such changes on a more frequent basis, and allow for others to explore and study how best to assess and account for changes with more rapid feedback loops. Conversely, we understand that the competitive marketplace may create a dynamic whereby some market participants receive revenue for the licensing and sharing of proprietary information itself. We believe it remains important to avoid interference with this type of business arrangement between vendors and their customers, yet, we also believe that there is a strong public interest to support open, transparent, and low-cost means to conduct research on these topics. For example, we are not aware of any independent, third-party, peer-reviewed research focused on the characteristics of the health care labor market in light of advancements in automation (for example, empirical analysis of how software implementation may have a causal link to changes in the health care labor market). Simply put, there are no available studies that adequately answer the question, with sufficient predictive power and adequate empirical data, of how much clinical labor is saved, or replaced, by use of automation, in the context of furnishing practitioner services. Further, many, if not all examinations of automation and its effects on labor take a far broader focus than health care workforce only, and mainly use anecdotal information, with conclusions or hypotheses that focus on job gains/losses. We note that many commenters highlighted themes this year focusing on labor shortages, rather than labor surplusage. The comments that noted refreshed survey data alone

would address the need for more precise, and up-to-date, allocations of indirect expenses seem discordant with other comments we received about updating our PE methodology to account for current advancements in automation, and associated software costs. Therefore, there are a number of competing concerns that CMS must take into account when considering updated data sources, which also should support and enable ongoing refinements to our PE methodology.

For these reasons, it is possible that CMS would look to using verifiable, more objective data sets in the future to supplement or augment survey data alone. Such action would be similar to how certain specialty data are used in current indirect PE calculations, and sourced from specialty societies themselves, as required by statute, in some cases as PPIS data were not available. Alternatively, we may explore the use of data already in the public domain. We believe that fast-moving changes to the distribution of costs and use of evolving technology, and more generally the innovations in how vendors support practices, reshape indirect expenses in ways that would require flexible but standardized methods to account for these on a more frequent basis in our ratesetting methodology.

We reiterate our needs described in our initial discussion for this RFI. We note that this interest to develop a roadmap for updates to our PE methodology is underpinned by a need to have better understanding of repeatability and reproducibility of results, as we move toward more consistent and frequent data collection. Some commenters expressed concerns over bias and validity. We believe some of those concerns may be alleviated by having means to refresh data and make transparent with more accuracy and precision how the information affects valuations for services payable under the PFS.

Further, we note that it is possible that with the current timing for AMA's planned updates, we would be unable to refresh data for several years. This would result in CMS using data nearly 20 years old to form indirect PE inputs used to set rates for services on the PFS. As these survey data are static inputs, and leverage only the responses gathered at the time of collection, which are applied using a methodology without any dynamic variables, this is quite distinct from each of the MEI and various other inputs in PE methodology.

We believe both the somewhat stale and static aspects of the PPIS, along with expected timing for updates is

significantly at tension with the feedback we receive on a regular basis. Consistently, a broad range of perspectives across various interested parties frequently ask for CMS to better reflect costs in what has been a rapidly changing health care payment landscape. The medical community and others continue to point to shortcomings in our ratesetting methodology, which may be improved by consistent and transparent data refreshes.

Additionally, we acknowledge that some hold disparate points of view about the above process of updating our PE methodology. We note that part of the public comment process aims to encourage thinking and build consensus, or identifies a lack of consensus. We appreciate the dialogue, multiple perspectives, and encourage that the broader national community of health policy thought leaders, health economists, and health systems researchers, all continue to have such conversations with one another and with CMS. A diversity of perspectives is important to foster a more robust set of options for the best available path forward.

We again thank commenters for submitting feedback on our RFI. We reiterate that our RFI does not contain any specific proposals for CY 2023. We will consider possible proposals in future rulemaking.

#### c. Changes to Health Care Delivery and Practice Ownership Structures, and Business Relationships Among Clinicians and Health Care Organizations

Market consolidation, and shifts in workforce alignment, as well as an evolution in the type of business entities predominant in health care markets, all suggest significant transformation in the composition and proportions of practice expenses required to furnish care. These evolving conditions collectively highlight the need for a comprehensive update to PE data inputs, and possibly the PE methodology as a whole.<sup>5</sup> Ideally, more comprehensive PE data inputs and a different PE calculation methodology would better account for indirect/overhead costs, current trends in the delivery of health care, the use of machine learning technology, and EHRs, and the cost differentials in

<sup>5</sup> Burgette, Lane F., Jodi L. Liu, Benjamin M. Miller, Barbara O. Wynn, Stephanie Dellva, Rosalie Malsberger, Katie Merrell, et al. "Practice Expense Methodology and Data Collection Research and Analysis." RAND Corporation, April 11, 2018. [https://www.rand.org/pubs/research\\_reports/RR2166.html](https://www.rand.org/pubs/research_reports/RR2166.html).

independent versus facility-based practices.

We solicited comment on current and evolving trends in health care business arrangements, use of technology, or similar topics that might affect or factor into indirect PE calculations. We are interested in learning whether any PE data inputs may be obsolete, unnecessary, or misrepresentative of the actual costs involved in operating a medical practice.

We received public comments on current and evolving trends in health care business arrangements, use of technology, or similar topics that might affect or factor into indirect PE calculations. The following is a summary of the comments we received and our responses.

*Comment:* A few commenters responding to our prompt to explore avenues by which indirect PE can be moved for facility to non-facility payments, based on data reflecting site of service cost differences, suggested that indirect PE inputs should not be part of payment for the facility rate of payment.

Commenters explained that because the facility bears the indirect costs for provision of services at the facility, and the physician or practitioner would receive indirect PE allocations for any in-office services, the indirect PE portion of the facility fee for a physician service is unwarranted.

*Response:* We note that the face value of a change that would reduce the indirect PE portions of our current facility fees for physicians' services to zero may have merit. We have open questions about this feedback, which we will explore further in our ongoing research. We believe, and related feedback from interested parties suggests, there are two considerable shifts in today's healthcare business models. First, many physicians and NPP's have become employed staff, versus independent practitioners. Second, the landscape includes far more variation in the ways that organizations interact and contract for clinical staff and auxiliary personnel, and structure their compensation. We would aim to better understand whether potentially reducing to zero any indirect PE portion that is part of the facility fee for physician services may or may not reduce competition, or have the unintended effect of favoring certain forms of arrangements over others.

Further, before proposing any policy, we would need to understand whether the policy could address related open questions. Our work with RAND to explore the relationship between different types of indirect costs and

direct cost inputs remains one of few empirical efforts to examine the issue in-depth. In this year, and in previous years, when we have requested similar information from the public, we continue to receive anecdotal, if any evidence, when feedback from commenters aims to take issue with findings in the RAND studies.

#### d. Unintended Consequences and Missing Information

We solicited comment on additional information that we may have not considered or discussed above about updating and maintaining PE data inputs, as well as any unintended impacts (or positive outcomes) that could result from changes to the overall strategy. We are especially interested in public comment on any concerns about beneficiaries' access to care, possible consolidation of group practices, or burden on small group or solo practitioners. We are also interested in public comments on any collateral program integrity or quality issues that could arise from potential updates. We requested that any respondents who provide feedback ensure that the response includes discussion of any possible health equity impacts.

We received public comments on unintended consequences and missing information. The following is a summary of the comments we received and our responses.

*Comment:* A few commenters expressed concern that topics of AI, a related evolution of software and technology used to support provision of services, and ties to health equity are not well-suited for the process of updates to our annual rulemaking cycle. Commenters expressed concerns that the public comment process alone is not sufficient to provide information, and requested a separate RFI. We received a similar response from many interested parties that question how CMS has in the past, and will in the future, address definition of topics and terms that shape our PE inputs.

*Response:* We encourage interested parties to continue to provide feedback and suggestions to CMS that in general, give an evidentiary basis to shape optimal PE data collection and methodological adjustments over time. Submissions should discuss the feasibility and burden associated with implementation of any suggested adjustments, and should highlight opportunities to optimize the cadence, frequency, and phase-in of resulting adjustments. In the interim, we will continue to consider ways that we may engage in dialogue with interested parties to better understand how to

address possible long-term policies and methods for PFS ratesetting.

#### 6. Soliciting Public Comment on Strategies for Improving Global Surgical Package Valuation

In preparation for future rulemaking, we solicited public comment on strategies to improve the accuracy of payment for the global surgical packages (herein referred to as "global packages") under the PFS. Currently, there are over 4,000 physicians' services paid as global packages under the PFS. Global packages generally include the surgical procedure and any services typically provided during the pre- and postoperative periods (including evaluation and management (E/M) services and hospital discharge services). There are three types of global packages:

- The 0-day global package, which includes the procedure and the preoperative and postoperative physicians' services on the day of the procedure.
- The 10-day global package, which includes services on the day of, and 10 days after, the procedure.
- The 90-day global package, which includes services furnished one day prior to the procedure, and on the day of, and 90 days immediately following the day of the procedure.

More detail about how global packages are billed and what activities are included may be found in Chapter 12, Section 40, of the Medicare Claims Processing Manual (Pub. 100–04).

We have applied the concept of global payment for some procedures since the inception of the PFS on January 1, 1992 (54 FR 59502). However, in the past decade we have engaged with interested parties regarding numerous concerns about the accuracy and validity of the valuation of global packages, with particular attention paid to the E/M visits included in the services. We have made previous requests for public feedback on global packages, including solicitations for information or data that could be used to help support more accurate valuations. We now wish to expand on our conversations with the public, considering the current status of a multi-year data collection and analysis project, as well as ongoing changes we have made to payments for other types of patient care that may impact the global packages.

##### a. History of Global Valuation Discussion

In the CY 2013 PFS proposed rule (77 FR 44737 through 44738), we discussed two reports released by the HHS Office of the Inspector General in 2005 and

2012 with findings that practitioners were performing fewer E/M postoperative visits than had been included in the valuation for these global packages, suggesting that Medicare was paying for care that was not being delivered. In response to the concerns raised by the OIG reports, we solicited public feedback on methods of obtaining accurate and current data on E/M services furnished as part of a global package. We summarized public comment in the CY 2013 PFS final rule (77 FR 68911 through 68913).

In the CY 2015 PFS proposed rule (79 FR 40341), we delved into barriers to accurate valuation of global packages, especially as compared to other forms of bundled payments made under the inpatient or outpatient prospective payment systems. In addition to the ongoing concerns about whether E/M visits presumed to be furnished in connection with global packages were actually being performed by the physician receiving the global package payment, we noted issues such as:

- E/M services in the global period that occur post-discharge are valued with PE values associated with follow-up visits in the physician's office. Many of these follow-up visits may occur in a hospital outpatient department where the physician may not incur many PE costs.

- The direct PE inputs often differ slightly between an E/M service furnished in a global period and a stand-alone E/M service. For example, follow-up visits for certain surgeries may include specialized clinical labor such as an RN rather than a general nurse blend.

- The types of physicians furnishing a specific service dictate the direct and indirect percentages, as well as the indirect practice cost index, in the PE methodology. Most surgical specialties have a lower direct percentage mix, resulting in higher indirect costs that extend to the E/M visits in the global periods.

- Because the E/M visits embedded in the global package are not reported separately and do not appear in claims data, it is difficult to quantify the number and level of E/M services furnished in connection with global packages under the fee-for-service system.

- In some cases we have limited billing of the 10- and 90-day global packages in conjunction with some of the payment policies intended to encourage coordination of care through payments for non-face-to-face services, such as transitional care management and chronic care management, because

of presumed overlap between these services.

To address these concerns, we solicited comment and finalized a policy in the CY 2015 PFS final rule (79 FR 67586) intended to, over a period of several years, transition all services with 10-day and 90-day global periods to 0-day global periods. As stated in the CY 2015 PFS final rule, we believed it would be more accurate to value the surgical procedure-day services separately from postop E/M visits, and would avoid potentially duplicative or unwarranted payments. For our full discussion and rationale, refer to 79 FR 67586 through 67591. Implementation of this policy, however, was halted by the Medicare Access and CHIP Reauthorization Act (MACRA) of 2015 (Pub. L. 110–14). Section 523(a) of the MACRA amended section 1848(c)(8) of the Act to prohibit the Secretary from implementing the transition policy finalized in the CY 2015 PFS final rule. The amendments to section 1848(c)(8) of the Act also require CMS to collect additional data on how best to value global packages and to reassess every 4 years the continued need for this data collection. Section 1848(c)(8) of the Act directs CMS to use the information collected to improve the accuracy of valuation of these services under the PFS starting in CY 2019. (Refer to the CY 2016 PFS final rule at 80 FR 70915 for additional discussion of these requirements.)

In response to the statutory requirements as added by section 523(a) of the MACRA, we engaged in multiple discussions with interested parties about methods of data collection and analysis, including through public comment solicitation in the CY 2016 PFS proposed rule (80 FR 41707) and CY 2017 PFS proposed rule (81 FR 46191), a national listening session, and a town hall meeting. (Materials for the January 20, 2016 listening session are available at <https://www.cms.gov/Outreach-and-Education/Outreach/NPC/Downloads/2016-01-20-MCRA-Presentation.pdf>. The transcript of the town hall meeting held August 25, 2016 is available at <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/Downloads/CY2017-PFS-FR-Townhall.pdf>.) In the CY 2017 PFS final rule (81 FR 80209 through 80213), we finalized a claims-based process to collect data from practitioners on both the number and level of postoperative visits furnished as part of the 10- and 90-day global packages. We also contracted with RAND to support this data collection and analysis.

b. Data Collection, Analysis, and Findings

In 2019, RAND issued two reports based on its analysis of the data collected through the data collection process we established. The reports examined, using claims-based and survey-based data, the number of postoperative visits furnished during the 10- and 90-day global periods for certain high-volume procedures and the level of visits furnished for certain procedures. (Complete details about the data collected are discussed in the CY 2017 PFS final rule starting at 81 FR 80212, the CY 2020 PFS final rule at 84 FR 62857, and in the reports themselves, available at <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/Global-Surgery-Data-Collection->.) Notably, RAND's analysis found that, according to claims-based data, the reported number of E/M visits matched the expected number (included for purposes of PFS valuation) for only 4 percent of reviewed 10-day global packages and 38 percent of reviewed 90-day global packages. Based on these analyses, RAND released a third report that analyzed the current valuation of global packages based on the difference between the number of postoperative E/M visits observed via the claims-based data collection process and the expected number of such E/M visits. The report modeled how valuation for global packages would change by adjusting the work RVUs, physician time, and direct PE inputs to reflect the observed number of E/M visits. The report provided hypothetical valuations for the global packages based on these adjustments. These three RAND reports were made available to the public and are available at <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/Global-Surgery-Data-Collection>.

The RAND reports were shared with the public, and we received public comment about these reports in the CY 2020 PFS final rule (84 FR 62866). Public commenters raised concerns about the findings in the reports, including questions as to whether the E/M visit data were collected from a true representative sample of practitioners, and various other challenges to the validity of the RAND methodology. Other members of the public, however, were supportive of our overall efforts to collect and analyze the data, and supplied additional data similarly suggesting that the 10- and 90-day global packages are overvalued. In 2021, RAND responded to the CY 2020 public comments that were critical of

the methodologies used in the three earlier reports in a separate report entitled, "Responses to Comments on RAND Global Services Reports," which is available at [https://www.rand.org/content/dam/rand/pubs/research\\_reports/RR4300/RR4314-1/RAND\\_RR4314-1.pdf/](https://www.rand.org/content/dam/rand/pubs/research_reports/RR4300/RR4314-1/RAND_RR4314-1.pdf/).

While some interested parties have challenged the methodology or conclusions of the RAND reports, we have not yet received data suggesting that postoperative E/M visits are being performed more frequently than indicated by the data collected and analyzed in the RAND reports. We continue to be concerned that our current valuations of the global packages reflect certain E/M visits that are not typically furnished in the global period, and thus, are not occurring. We also believe that RAND has adequately responded to critiques of its methodologies and findings. However, as part of our ongoing assessment of our data collection process, we continue to welcome any comments from the public on ideas for other sources of data that would help us to assess global package valuation (including the typical number and level of E/M services), as well as our data collection methodology and the RAND report findings. We received some public comments in our request for comments on possible additional data sources and on our data collection methodology. These comments are summarized as follows:

*Comment:* Some commenters supported the findings and methodology of the RAND reports. Several commenters stated that the RAND's findings regarding E/M visit performance aligned with their own anecdotal observations and experiences. However, other commenters expressed skepticism of the RAND report findings and methodology, and many urged us to continue to rely on RUC valuations of global packages (including the number of embedded E/M visits included in the RUC surveys.) Several commenters observed that getting truly accurate information from claims data may be difficult; one commenter pointed out that since work done by NPPs or clinical staff is often not reported separately, it is difficult to get a complete picture of postoperative work. As in previous public discussions, commenters urged CMS to continue to examine claims data and electronic health records, or obtain postoperative E/M information through direct surveys of practitioners. Several commenters noted that we have spent many years performing data collection in response to the MACRA requirements, and one commenter requested that we cease our data

collection efforts to avoid any additional burden on practitioner. Many commenters urged us to continue to work in collaboration with practitioners and other impacted parties to identify sources of postoperative E/M data and to maintain transparency about any additional collection efforts.

*Response:* We found that the comments we received, particularly those critical of the RAND reports and methodology, echo the feedback we received several years ago when we shared the RAND reports for public comment. Please see the discussion of the RAND reports and findings in the CY 2020 PFS final rule (84 FR 62866) and RAND's responses to the CY 2020 public comments in the RAND report entitled, "Responses to Comments on RAND Global Services Reports," which is available at [https://www.rand.org/content/dam/rand/pubs/research\\_reports/RR4300/RR4314-1/RAND\\_RR4314-1.pdf/](https://www.rand.org/content/dam/rand/pubs/research_reports/RR4300/RR4314-1/RAND_RR4314-1.pdf/). We note that we did not receive new data that might either affirm or contradict RAND's overall findings regarding E/M performance. We agree with commenters' observations that we have spent many years collecting and analyzing data regarding E/M performance in response to the MACRA requirements and other public concerns about the valuation of globals. While we will continue to evaluate potential sources of data regarding E/M performance, we agree with commenters who suggest that the overall lack of transparency within global packages can make identifying the nature of postoperative care provision difficult and continues to call into question the accuracy of globals that have been valued through standard valuation processes.

#### c. Changes to Health Care Delivery and Payment for E/M Services

Since the inception of the PFS 30 years ago, there have been significant changes in health care, including improvements in medical and information technology, new models of health care delivery and coordination between multiple clinicians furnishing care to a single patient, and an expanding beneficiary population. (For information on Medicare service utilization, beneficiary demographics, provider characteristics, and payment models, please visit the resources at [data.cms.gov](https://www.cms.gov).) We asked to hear from the public on whether the postoperative health care landscape has changed in ways that impact the relevance of the global packages.

We believe that changes to health care delivery may impact proper valuation of global services. We solicited comment

on whether changes to health care delivery, including changes in coordination of care and use of medical technology over the past 3 decades, as well as during the recent PHE, have impacted: the number and level of postoperative E/M visits needed to provide effective follow-up care to patients; the timing of when postoperative care is being provided; and who is providing the follow-up care. We have formed hypotheses that some beneficiaries are not receiving the number of postoperative visits that were contemplated when valuing the global surgical packages or are not receiving any follow-up E/M visits at all during global periods either because the physician who performed the surgical procedure has determined they are unnecessary (perhaps due to improvements in medical technology or evolution in standards of care) or as the result of more comprehensive discharge planning. It has also been suggested by some interested parties that physicians are, in fact, performing the number of postoperative visits that were contemplated when valuing the global surgical packages, but the visits may, for various reasons, be scheduled outside the global period. Others have suggested that physicians are, without formally transferring follow-up care to another clinician, instructing patients to follow up with another physician or NPP (such as the patient's primary care physician or other practitioner), and that the other clinician then furnishes and bills for E/M services furnished for postoperative care (whether the care is performed during or after the global period). We appreciate comments on these ideas, and on other factors not mentioned here that could affect the ways that postoperative E/M care is provided.

We also solicited comment on whether, or how, recent changes in the coding and valuation of separately billable E/M services may have impacted global packages. One change is the expansion of payment for non-face-to-face care management services. Historically, an advantage of global packages was that they compensated physicians for non-face-to-face work related to the patient's transition from the hospital to the community, or management of other health care needs following a procedure or serious illness. Over the years, we have implemented payment for many care management services to better reflect non-face-to-face time spent by physicians and clinical staff on behalf of patients with complex health care needs, including transitional care management services in CY 2013 (77 FR 68978); chronic care

management in CY 2015 (78 FR 74414) and CY 2019 (83 FR 58577); complex chronic care management in CY 2017 (81 FR 80244); and principal care management in CY 2020 (84 FR 62962). We solicit comment on whether global packages, and especially those with 10- and 90-day global periods, continue to serve a purpose when physicians could otherwise bill separately not only for the postoperative E/M visits they furnish, but also for aspects of postoperative care management they furnish for some patients. We also would like to hear generally what, if any, components of preoperative or postoperative care are currently only compensated as part of payment for global packages.

We have also heard from some interested parties who believe that recent changes to the coding and valuation of standalone office and outpatient E/M visits finalized in the CY 2021 PFS final rule have skewed the relativity between these visits and the E/M visits included in the current global package valuations (which were not modified in response to the coding and valuation changes). In the CY 2020 PFS final rule (84 FR 62851 through 84 FR 62854), we finalized new—and generally increased, RVUs for the CPT-revised office and outpatient E/M code set. Some commenters encouraged us to increase the value of the E/M visits included in the global surgical packages commensurate with the increased RVUs for the standalone E/M visits. However, we declined to do so, noting that at the time that it was unclear whether it would be appropriate to treat the E/M visits reflected in global packages as discrete components of the package (in other words, to use a building-block approach to calculating the value of the service, versus valuing the services using the more holistic magnitude estimation, or possibly another approach.) Furthermore, we cited the uncertainty as to whether the E/M services included in valuing the global packages are typically furnished as part of global surgery services, reasoning that if the number and level of E/M services for global packages is not appropriate, adopting increases in the value of E/M services in global surgery codes would exacerbate rather than ameliorate any potential relativity issues. (Refer to the CY 2020 PFS final rule at 84 FR 62856 through 62860 for a complete summary of comments and our responses on the topic of increasing the value of E/M visits included in the global packages.) We welcomed additional comments on the perceived misalignment between the E/M visits included in global packages and separately billable E/M services,

including thoughts on how this current tension reflects on global payment valuation and the appropriate methodology for determining appropriate values for global packages.

We received some public comments on whether changes to health care delivery and payment for E/M services may impact the performance of E/M visits or overall relevance of E/M visits. The following is a summary of the comments we received and our responses.

*Comment:* Several commenters noted that while patients in general seem in greater need of critical care, there is also (from various commenters' perspective) either increasing opportunity or mounting pressure on practitioners to discharge patients from hospitals and arrange at-home care after surgeries. Many commenters stated that postoperative care provided by the proceduralists should still be considered a best practice. However, a few commenters agreed with some of our hypotheses—namely that for clinical reasons patients may not need to return for in-person postoperative care within the global period, or that scheduling conflicts may make timely return difficult. A few commenters also agreed that patients may, for reasons of convenience, receive some postoperative care from community practitioners rather than returning to the hospital where the surgical procedure was performed. Some commenters also suggested that there may be clinical reasons why it is better for a patient to receive postoperative care from a practitioner or NPP other than the proceduralist, such as in circumstances when the patient needs long-term or specialized postoperative care outside the expertise of the proceduralist. Overall, commenters expressed ambivalence about the impact the PHE and use of telehealth has had on postoperative care. A few commenters noted that some aspects of postoperative care—including sharing of test results or consultations—can be done via telehealth, while others described types of postoperative care that can only be done in-person. Commenters also expressed doubt about the impact of expanded payments for non-face-to-face services, noting that payments for care management or other non-face-to-face services do not include all post-surgical conditions and do not address in-person care.

Regarding our questions about the overall relevance of global packages, some commenters stated that paying for postoperative care as standalone visits would ensure that Medicare was only paying for the care that was being

delivered. A few commenters suggested that postoperative care should be not only paid for separately, but paid at a higher rate. Other commenters stated that global packages continue to be necessary because they reduce administrative burden on practitioners and ensure payment of care provided by NPPs and clinical staff.

*Response:* While we did not receive a great deal of feedback on our specific request for information as to whether global packages are still relevant, we believe the information we received demonstrates that there may be variations in patients' individual postoperative care needs. While we agree with commenters that in-person visits with the proceduralist is the standard of care on which global packages were based, we will continue to examine whether this specific model of postoperative care is still necessary or relevant for all procedures.

*Comment:* Many commenters provided input on the valuation of the E/M visits embedded in global packages as compared to standalone E/M visits. Although commenters did not provide feedback on whether the misalignment reflects on the relevance of surgical packages, many commenters suggested that we should increase the value of global packages to reflect the increase in standalone E/M visits (both the office/outpatient increases finalized in CY 2020 at 84 FR 62851 through 84 FR 62854, and increases to certain hospital inpatient E/M visits proposed in CY 2023 at 87 FR 45993.) Some commenters suggested that the data collection requirement in the MACRA amendments to the statute does not preclude CMS from applying such increases to all global packages. Other commenters, however, agreed with our decision not to increase the global packages pending our inquiry into the performance of postoperative E/M visits.

*Response:* We direct commenters to the CY 2020 PFS final rule (84 FR 62851 through 84 FR 62854), where we discussed similar concerns. We continue to disagree with commenters' interpretation of the MACRA amendments. We note that section 1848(c)(8) of the Act, as amended by section 523(a) of the MACRA (Pub. L. 110–14), directs CMS to use the information collected to improve the accuracy of valuation of these services specifically requires that we use the data we obtain through data collection to revalue the global packages. Our data currently suggests that at least some global packages are inaccurately, revalued, and until we identify data that demonstrates otherwise, we do not believe it would be appropriate to apply

an across-the-board adjustment to the packages that is not supported by data. Additionally, we are also working to reconcile public recommendations that we revalue global packages on a holistic or case-by-case basis (discussed in greater detail in section II.B.6.d. of this final rule) with recommendations that we apply across-the-board increases to all global packages.

#### d. Strategies To Address Global Package Valuation

Consistent with the discussion above, we continue to believe that: (1) there is strong evidence suggesting that the current RVUs for global packages are inaccurate; (2) many interested parties agree that the current values for global packages should be reconsidered, whether they believe the values are too low or too high; and (3) it is necessary to take action to improve the valuation of the services currently valued and paid under the PFS as global surgical packages.

We would like to re-engage with the public about whether the global packages are indeed misvalued, and if so, what would be an appropriate approach to valuation. We have previously sought assistance from the public on possible methods of revaluation, such as in the CY 2015 PFS final rule (79 FR 67586).

As noted in the “Data Collection, Analysis, and Findings” section above (section II.B.6.b.), RAND has provided a comprehensive roadmap for a possible revaluation strategy. (See specifically the RAND report, “Using Claims-Based Estimates of Postoperative Visits to Revalue Procedures with 10- and 90-Day Global Periods,” available at <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/Global-Surgery-Data-Collection->. We solicited additional input on the RAND methodology, including advantages and drawbacks of applying the RAND methodology to revaluation (in addition to previous feedback that was provided by the public in the CY 2020 PFS final rule at 84 FR 62867). We also requested input on specific alternatives, including: (1) requesting the RUC to make recommendations on new values; or (2) another method proposed by the public.

We solicited feedback from the public on possible strategies for a revaluation process for global services. We believe that the available information provided in the RAND reports (discussed in section II.B.6.b. of this final rule and available at <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/Global-Surgery-Data-Collection->) indicates that

there is a mismatch between the value of the global package and work being performed. In particular, it appears that for some services, the number of postoperative visits typically furnished by the billing physician is much lower than what was reflected in the global package value, and thus we believe it may be necessary to revalue those services. (As noted in section II.B.6.b. of this final rule, RAND’s analysis found that the reported number of E/M visits matched the expected E/M visits for only 4 percent of reviewed 10-day global packages and 38 percent of reviewed 90-day global packages. We referred specifically to the RAND report, “Claims-Based Reporting of Postoperative Visits for Procedures with 10- or 90-Day; Global Periods—Updated Results Using Calendar Year 2019 Data” available at <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/Global-Surgery-Data-Collection->). Because there are a large number and volume of services paid as global packages, we must consider the resources needed to revalue even a subset of the global packages, as well as the impacts across the PFS and healthcare delivery system in general if we were to change the values of a significant number of services at one time. We considered various approaches we could pursue, such as: (1) revaluing all 10- and 90-day global packages at one time (perhaps with staggered implementation dates); (2) revaluing only the 10-day global packages (because these appear to have the lowest rate of postoperative visit performance, per RAND’s analysis of claims data); (3) revaluing 10-day global packages and some 90-day global packages (such as those with demonstrated low postoperative visit performance rates as identified in RAND’s analysis of these services); or (4) relying on the Potentially Misvalued Code process to identify and revalue misvalued global packages over the course of many years. (We noted that regardless of whether we review particular global packages as part of a specific revaluation strategy, the public may always nominate any global packages to be reviewed through the Potentially Misvalued Code process; refer to the description of the Potentially Misvalued Code process in section II.C. of this final rule.) We solicited comment on any of the strategies identified in this paragraph, as well as any additional ideas members of the public may have that would address the concerns described above about valuation of global packages. We also solicited comment on ancillary considerations

including timing considerations for implementation of any future strategy (such as whether to have staggered effective dates for new valuations and what criteria to use if assigning staggered effective dates.)

We also solicited comment on additional considerations affecting valuation of global services that may not have been thoroughly explored in previous public comment opportunities. For instance, we are aware that some interested parties are concerned that not enough attention has been paid to the value of preservice work bundled into the global payment, which could affect accurate valuation of 10- and 90-day global packages, as well as the value of the service if it is transitioned to a 0-day global. We solicited additional information about this concern, as well as any other concerns about valuation not otherwise mentioned here.

We received public comments on strategies to address global package valuation. The following is a summary of the comments we received and our responses.

*Comment:* Some commenters agreed that global surgical packages are misvalued and encouraged CMS to revalue the packages in order to reduce the impacts of improper valuation on the relative value scale. A few commenters agreed that packages were misvalued, but suggested we continue to work with impacted parties to find a method for revaluation. Other commenters stated that they do not believe that global packages were misvalued or, if they are misvalued, they should be revalued on a holistic and case-by-case basis using the RUC process or the Potentially Misvalued Code process. A few commenters suggested that CMS and the RUC collaborate on a specific method to revalue global packages. Commenters also noted that revaluing through the RUC process could take a number of years and may present resource challenges.

We received diverse comments on approaches for revaluing the codes, including revaluing all 10- and 90-day packages, revaluing some 10- and 90-day packages, or focusing just on the 10-day packages. Commenters who recommended focusing on the 10-day packages suggested that this would address services with lower demonstrated postoperative E/M visit rates, and would provide us with insight about revaluation that could then be applied to the 90-day packages as needed. Other commenters made suggestions including phasing out global packages by not valuing new CPT codes as globals, or changing the length

of global periods. While one commenter was in favor of revaluing all packages at one time, many commenters suggested revaluing over a number of years to avoid too much disruption to the relative value scale. One commenter suggested we wait until after the conclusion of the PHE to revalue any packages.

*Response:* We believe that the spectrum of comments demonstrates that there is not, at this time, clear public consensus on this issue or the preferred strategy for valuing globals. We will consider the specific strategies proposed by the commenters and the concerns regarding impact on the relative value scale and the resources that would be required to revalue these codes.

#### e. Other Payment Structure Changes, Unintended Consequences, and Missing Information

We solicited public comment on any other aspects of the global payment structure (aside from the valuation of services) that commenters believe are noteworthy. Much of the discussion over the years has focused on whether global surgical packages are properly valued and whether they are needed at all. We encourage commenters to point out ways in which global surgical packages may continue to have a positive impact on health care delivery (such as their potential to support innovation). We also solicited suggestions on other ways that global surgical package payments could be modified (aside from changing their valuation) that could help improve accurate valuation or help address other concerns about the payments (such as the lack of transparency about what care is being provided as part of the package).

We also requested comment on additional information that we may not have considered or discussed above about proper valuation of the global packages, as well as any unintended impacts (or positive outcomes) that could result from changes to how we value global services. We are especially interested in public comment on any concerns about beneficiaries' access to care, continuity of care, cost sharing, or program integrity.

We received limited public comments on other payment structure changes, unintended consequences, and missing information. The following is a summary of the comments we received and our responses.

*Comment:* A few commenters opined on the consequences of unbundling global payments. A few of these commenters raised concerns that

unbundling the packages would reduce payments to physicians or NPPs. A few expressed concerns that beneficiaries might not want to pay the coinsurance for standalone E/M visits (should global packages be unbundled) and might decline postoperative care.

*Response:* We agree that the payments to practitioners might change in circumstances where globals are revalued, although we do not believe there is yet enough information to determine the financial impact should proceduralists bill separately for postoperative care for some procedures. We will continue to consider the potential impact of coinsurance for globals and postoperative care for beneficiaries.

After consideration of the comments, we wish to thank the commenters for their input. As outlined in the proposed rule, this discussion has spanned over a decade, with participation from specialty societies, advocacy groups, program integrity agencies, and Congress. We had hoped through this comment solicitation to nudge discussion into new or under-explored lanes of inquiry that would help us better understand how global packages fit into the current health care landscape. We appreciate the engagement we did receive with our requests for information regarding current health care practices. Additionally, numerous interested parties, those who have been engaged with the discussion for many years, as well as some new voices, provided comment that reinforced or reiterated concerns that have emerged in prior discussions.

In this year's comment solicitation, we received a spectrum of perspectives on: whether the globals are misvalued; if misvalued, whether they are undervalued or overvalued; whether we should continue to value them through our current processes or develop a new methodology that better addresses the unique challenges posed by bundled payments; and whether globals should be revalued individually, in batches, or in their entirety. Looking at the totality of the comments and keeping in mind discussion from prior years, we have identified a few common themes on which many seem to agree. The matter of global valuation is complex. Global packages comprise a large number of codes, and their valuation has a significant impact on the PFS relative value scale. Accurately valuing the work and other inputs of the globals is critically important to ensure not only that the practitioners providing those services are paid accurately for the work performed, but that there is no

inequitable impact on practitioners paid outside of 10- and 90-day global packages. The diversity of procedures paid under global packages may mean that blanket approaches to valuation or revaluation may not achieve the desired degree of accuracy. And, finally, while universally agreed-upon data strategies may prove elusive, good data analysis is a critical foundation on which to base any method for valuing these packages. We appreciate the public's engagement on this issue, and continue to welcome additional insights from interested parties as we consider appropriate next steps.

#### C. Potentially Misvalued Services Under the PFS

##### 1. Background

Section 1848(c)(2)(B) of the Act directs the Secretary to conduct a periodic review, not less often than every 5 years, of the relative value units (RVUs) established under the PFS. Section 1848(c)(2)(K) of the Act requires the Secretary to periodically identify potentially misvalued services using certain criteria and to review and make appropriate adjustments to the relative values for those services. Section 1848(c)(2)(L) of the Act also requires the Secretary to develop a process to validate the RVUs of certain potentially misvalued codes under the PFS, using the same criteria used to identify potentially misvalued codes, and to make appropriate adjustments.

As discussed in section II.E. of this final rule, Valuation of Specific Codes, each year we develop appropriate adjustments to the RVUs taking into account recommendations provided by the American Medical Association (AMA) Resource-Based Relative Value Scale (RVS) Update Committee (RUC), MedPAC, and other interested parties. For many years, the RUC has provided us with recommendations on the appropriate relative values for new, revised, and potentially misvalued PFS services. We review these recommendations on a code-by-code basis and consider these recommendations in conjunction with analyses of other data, such as claims data, to inform the decision-making process as authorized by statute. We may also consider analyses of work time, work RVUs, or direct PE inputs using other data sources, such as Department of Veteran Affairs (VA), National Surgical Quality Improvement Program (NSQIP), the Society for Thoracic Surgeons (STS), and the Merit-based Incentive Payment System (MIPS) data. In addition to considering the most recently available data, we assess the

results of physician surveys and specialty recommendations submitted to us by the RUC for our review. We also considered information provided by other interested parties. We conducted a review to assess the appropriate RVUs in the context of contemporary medical practice. We note that section 1848(c)(2)(A)(ii) of the Act authorizes the use of extrapolation and other techniques to determine the RVUs for physicians' services for which specific data are not available and requires us to take into account the results of consultations with organizations representing physicians who provide the services. In accordance with section 1848(c) of the Act, we determine and make appropriate adjustments to the RVUs.

In its March 2006 Report to the Congress ([http://www.medpac.gov/docs/Fee-for-Service-Payment/Physician\\_default-source/reports/Mar06\\_Ch03.pdf?sfvrsn=0](http://www.medpac.gov/docs/Fee-for-Service-Payment/Physician_default-source/reports/Mar06_Ch03.pdf?sfvrsn=0)), MedPAC discussed the importance of appropriately valuing physicians' services, noting that misvalued services can distort the market for physicians' services, as well as for other health care services that physicians order, such as hospital services. In that same report, MedPAC postulated that physicians' services under the PFS can become misvalued over time. MedPAC stated, "When a new service is added to the physician fee schedule, it may be assigned a relatively high value because of the time, technical skill, and psychological stress that are often required to furnish that service. Over time, the work required for certain services would be expected to decline as physicians become more familiar with the service and more efficient in furnishing it." We believe services can also become overvalued when PE costs decline. This can happen when the costs of equipment and supplies fall, or when equipment is used more frequently than is estimated in the PE methodology, reducing its cost per use. Likewise, services can become undervalued when physician work increases or PE costs rise.

As MedPAC noted in its March 2009 Report to Congress (<http://www.medpac.gov/docs/default-source/reports/march-2009-report-to-congress-medicare-payment-policy.pdf>), in the intervening years since MedPAC made the initial recommendations, CMS and the RUC have taken several steps to improve the review process. Also, section 1848(c)(2)(K)(ii) of the Act augments our efforts by directing the Secretary to specifically examine, as determined appropriate, potentially

misvalued services in the following categories:

- Codes that have experienced the fastest growth.
- Codes that have experienced substantial changes in PE.
- Codes that describe new technologies or services within an appropriate time-period (such as 3 years) after the relative values are initially established for such codes.
- Codes which are multiple codes that are frequently billed in conjunction with furnishing a single service.
- Codes with low relative values, particularly those that are often billed multiple times for a single treatment.
- Codes that have not been subject to review since implementation of the fee schedule.
- Codes that account for the majority of spending under the PFS.
- Codes for services that have experienced a substantial change in the hospital length of stay or procedure time.
- Codes for which there may be a change in the typical site of service since the code was last valued.
- Codes for which there is a significant difference in payment for the same service between different sites of service.
- Codes for which there may be anomalies in relative values within a family of codes.
- Codes for services where there may be efficiencies when a service is furnished at the same time as other services.
- Codes with high intraservice work per unit of time.
- Codes with high PE RVUs.
- Codes with high cost supplies.
- Codes as determined appropriate by the Secretary.

Section 1848(c)(2)(K)(iii) of the Act also specifies that the Secretary may use existing processes to receive recommendations on the review and appropriate adjustment of potentially misvalued services. In addition, the Secretary may conduct surveys, other data collection activities, studies, or other analyses, as the Secretary determines to be appropriate, to facilitate the review and appropriate adjustment of potentially misvalued services. This section also authorizes the use of analytic contractors to identify and analyze potentially misvalued codes, conduct surveys or collect data, and make recommendations on the review and appropriate adjustment of potentially misvalued services. Additionally, this section provides that the Secretary may coordinate the review and adjustment of any RVU with the periodic review

described in section 1848(c)(2)(B) of the Act. Section 1848(c)(2)(K)(iii)(V) of the Act specifies that the Secretary may make appropriate coding revisions (including using existing processes for consideration of coding changes) that may include consolidation of individual services into bundled codes for payment under the PFS.

## 2. Progress in Identifying and Reviewing Potentially Misvalued Codes

To fulfill our statutory mandate, we have identified and reviewed numerous potentially misvalued codes as specified in section 1848(c)(2)(K)(ii) of the Act, and we intend to continue our work examining potentially misvalued codes in these areas over the upcoming years. As part of our current process, we identify potentially misvalued codes for review, and request recommendations from the RUC and other public commenters on revised work RVUs and direct PE inputs for those codes. The RUC, through its own processes, also identifies potentially misvalued codes for review. Through our public nomination process for potentially misvalued codes established in the CY 2012 PFS final rule with comment period (76 FR 73026, 73058 through 73059), other individuals and groups submit nominations for review of potentially misvalued codes as well. Individuals and groups may submit codes for review under the potentially misvalued codes initiative to CMS in one of two ways. Nominations may be submitted to CMS via email or through postal mail. Email submissions should be sent to the CMS mailbox at [MedicarePhysicianFeeSchedule@cms.hhs.gov](mailto:MedicarePhysicianFeeSchedule@cms.hhs.gov), with the phrase "Potentially Misvalued Codes" and the referencing CPT code number(s) and/or the CPT descriptor(s) in the subject line. Physical letters for nominations should be sent via the U.S. Postal Service to the Centers for Medicare & Medicaid Services, Mail Stop: C4-01-26, 7500 Security Blvd., Baltimore, Maryland 21244. Envelopes containing the nomination letters must be labeled "Attention: Division of Practitioner Services, Potentially Misvalued Codes." Nominations for consideration in our next annual rule cycle should be received by our February 10th deadline. Since CY 2009, as a part of the annual potentially misvalued code review and Five-Year Review process, we have reviewed over 1,700 potentially misvalued codes to refine work RVUs and direct PE inputs. We have assigned appropriate work RVUs and direct PE inputs for these services as a result of these reviews. A more detailed discussion of the extensive prior

reviews of potentially misvalued codes is included in the CY 2012 PFS final rule with comment period (76 FR 73052 through 73055). In the same CY 2012 PFS final rule with comment period, we finalized our policy to consolidate the review of physician work and PE at the same time, and established a process for the annual public nomination of potentially misvalued services.

In the CY 2013 PFS final rule with comment period (77 FR 68892, 68896 through 68897) we built upon the work we began in CY 2009 to review potentially misvalued codes that have not been reviewed since the implementation of the PFS (so-called “Harvard-valued codes”). In the CY 2019 PFS proposed rule (73 FR 38589), we requested recommendations from the RUC to aid in our review of Harvard-valued codes that had not yet been reviewed, focusing first on high-volume, low intensity codes. In the fourth Five-Year Review of Work RVUs proposed rule (76 FR 32410, 32419), we requested recommendations from the RUC to aid in our review of Harvard-valued codes with annual utilization of greater than 30,000 services. In the CY 2013 PFS final rule with comment period, we identified specific Harvard-valued services with annual allowed charges that total at least \$10,000,000 as potentially misvalued. In addition to the Harvard-valued codes, in the CY 2013 PFS final rule with comment period we finalized for review a list of potentially misvalued codes that have stand-alone PE (codes with physician work and no listed work time and codes with no physician work that have listed work time). We continue each year to consider and finalize a list of potentially misvalued codes that have or will be reviewed and revised as appropriate in future rulemaking.

### 3. CY 2023 Identification and Review of Potentially Misvalued Services

In the CY 2012 PFS final rule with comment period (76 FR 73058), we finalized a process for the public to nominate potentially misvalued codes. In the CY 2015 PFS final rule with comment period (79 FR 67548, 67606 through 67608), we modified this process whereby the public and interested parties may nominate potentially misvalued codes for review by submitting the code with supporting documentation by February 10th of each year. Supporting documentation for codes nominated for the annual review of potentially misvalued codes may include the following:

- Documentation in peer reviewed medical literature or other reliable data that demonstrate changes in physician

work due to one or more of the following: technique, knowledge and technology, patient population, site-of-service, length of hospital stay, and work time.

- An anomalous relationship between the code being proposed for review and other codes.
- Evidence that technology has changed physician work.
- Analysis of other data on time and effort measures, such as operating room logs or national and other representative databases.
- Evidence that incorrect assumptions were made in the previous valuation of the service, such as a misleading vignette, survey, or flawed crosswalk assumptions in a previous evaluation.
- Prices for certain high cost supplies or other direct PE inputs that are used to determine PE RVUs are inaccurate and do not reflect current information.
- Analyses of work time, work RVU, or direct PE inputs using other data sources (for example, VA, NSQIP, the STS National Database, and the MIPS data).
- National surveys of work time and intensity from professional and management societies and organizations, such as hospital associations.

We evaluate the supporting documentation submitted with the nominated codes and assess whether the nominated codes appear to be potentially misvalued codes appropriate for review under the annual process. In the following year’s PFS proposed rule, we publish the list of nominated codes and indicate for each nominated code whether we agree with its inclusion as a potentially misvalued code. The public has the opportunity to comment on these and all other proposed potentially misvalued codes. In each year’s final rule, we finalize our list of potentially misvalued codes.

#### a. Public Nominations

In each proposed rule, we seek nominations from the public and from interested parties of codes that they believe we should consider as potentially misvalued. We receive public nominations for potentially misvalued codes by February 10th and we display these nominations on our public website, where we include the submitter’s name and their associated organization for full transparency. We sometimes receive submissions for specific, PE-related inputs for codes, and discuss these PE-related submissions, as necessary under the Determination of PE RVUs section of the rule. We summarize below this year’s

submissions under the potentially misvalued code initiative.

An interested party nominated the home-based physician visit codes: CPT code 99344 (*Home visit for the evaluation and management of a new patient, which requires these 3 key components: A comprehensive history; A comprehensive examination; and Medical decision making of moderate complexity. Counseling and/or coordination of care with other physicians, other qualified health care professionals, or agencies are provided consistent with the nature of the problem(s) and the patient’s and/or family’s needs. Usually, the presenting problem(s) are of high severity. Typically, 60 minutes are spent face-to-face with the patient and/or family*), CPT code 99345 (*Home visit for the evaluation and management of a new patient, which requires these 3 key components: A comprehensive history; A comprehensive examination; and Medical decision making of high complexity. Counseling and/or coordination of care with other physicians, other qualified health care professionals, or agencies are provided consistent with the nature of the problem(s) and the patient’s and/or family’s needs. Usually, the patient is unstable or has developed a significant new problem requiring immediate physician attention. Typically, 75 minutes are spent face-to-face with the patient and/or family*), CPT code 99349 (*Home visit for the evaluation and management of an established patient, which requires at least 2 of these 3 key components: A detailed interval history; A detailed examination; Medical decision making of moderate complexity. Counseling and/or coordination of care with other physicians, other qualified health care professionals, or agencies are provided consistent with the nature of the problem(s) and the patient’s and/or family’s needs. Usually, the presenting problem(s) are moderate to high severity. Typically, 40 minutes are spent face-to-face with the patient and/or family*), and CPT code 99350 (*Home visit for the evaluation and management of an established patient, which requires at least 2 of these 3 key components: A comprehensive interval history; A comprehensive examination; Medical decision making of moderate to high complexity. Counseling and/or coordination of care with other physicians, other qualified health care professionals, or agencies are provided consistent with the nature of the problem(s) and the patient’s and/or family’s needs. Usually, the presenting*

problem(s) are of moderate to high severity. The patient may be unstable or may have developed a significant new problem requiring immediate physician attention. Typically, 60 minutes are spent face-to-face with the patient and/or family) as potentially misvalued.

In their submission, the nominator expressed concern that there is no payment for transportation costs incurred when it is medically necessary for a physician to drive to the home of the patient for a face-to-face in-home E/M Visit, and that they are not compensated for opportunity loss they incur by seeing fewer patients because they spend time commuting to patients' homes, versus seeing more patients that come to their offices. The nominator also argued that Medicare does not compensate physicians for the work and time associated with assessing a patient's home environment, which provides insight into a patient's overall

health and living conditions. The nominator collectively called these non-medical factors that can affect a patient's overall health the "Social Determinants of Health" (SDoH). The nominator requested that we increase the overall RVUs for CPT codes 99344, 99345, 99349, and 99350, by including the resources associated with: (1) the physician's transportation costs to patients' homes; (2) lost income opportunity for home versus in-office visits; and (3) in-home SDoH assessment work. The nominator estimated that the adjustments to RVUs to reflect transportation costs and opportunity costs would result in a Medicare payment that is 67 percent higher than the current Home-based E/M Visits payment rates, and that adjustments to account for the physician's SDoH assessment would add an additional 55 percent increase to the payment rates for

Home-based E/M Visits. In total, the nominator suggests that if these resources were taken into account, the payment rates for Home-based E/M CPT codes would increase by what the nominator estimates as a 222 percent increase from their current amounts.

The nominator included references as evidence to support their claim that the home-based E/M CPT codes are potentially misvalued, such as the CMS "Medicaid Non-Emergency Medical Transportation Booklet for Providers" (April 2016)<sup>67</sup> and a press release from the Better Medicare Alliance entitled, "Report Shows Dramatic Increase in Medicare Advantage Activity to Address Social Determinants of Health, But Barriers Remain".<sup>8</sup>

We noted that the nominator did not nominate the entire family of home-based E/M visit codes (please see Table 9 for a list of home-based E/M codes).

**TABLE 9: Home-Based E/M CPT Codes for CY 2023**

| CPT                                     | CPT Descriptor                                       |
|---|--|
| <b>Nominated Home Visits Codes:</b>     |  |
| 99344                                   | New patient home visit, typically 1 hour             |
| 99345                                   | New patient home visit, typically 75 minutes         |
| 99349                                   | Established patient home visit, typically 40 minutes |
| 99350                                   | Established patient home visit, typically 1 hour     |
| <b>Home Visits Codes Not Nominated:</b> |  |
| 99341                                   | New patient home visit, typically 20 minutes         |
| 99342                                   | New patient home visit, typically 30 minutes         |
| 99343                                   | New patient home visit, typically 45 minutes         |
| 99347                                   | Established patient home visit, typically 15 minutes |
| 99348                                   | Established patient home visit, typically 25 minutes |

When we establish values for codes or consider whether codes are potentially misvalued under the PFS, we take into account the resources involved in furnishing the specific service as described by the CPT code. As such, historically, we do not take into account: (1) travel costs incurred by the physician or other practitioner; (2) potential opportunity costs to a physician or other practitioner when care is delivered in one setting versus another; or (3) the physician or other practitioner's work and time expended in performing activities that are outside the scope of the specific service as described by the CPT code. These are not considered to be resources involved

in furnishing the service, and they are not included in establishing payment rates under the PFS in accordance with section 1848 of the Act, and, as such, do not provide justification for potential misvaluation of those payments. That said, in February 2021, the AMA CPT Editorial Panel deleted the family of domiciliary codes, CPT codes 99324 to 99340, and merged the services described by those codes into the existing family of home-based E/M visits, CPT codes 99341 to 99350 (a range of codes that includes CPT codes 99344, 99345, 99349, and 99350). In addition, the AMA RUC made recommendations regarding the values for these home-based E/M codes as

discussed in section II.F. of the CY 2023 PFS proposed rule (87 FR 45999) and in section II.F. of this final rule. Since CMS had already received AMA RUC recommendations for these home-based E/M visit codes, we considered those recommendations and solicited additional public comments, recommendations, and independent analysis as supporting evidence from all interested parties regarding the valuations for the home-based E/M visits, including CPT codes 99344, 99345, 99349, and 99350. Because we discussed and solicited public comment on the valuation of these codes in the proposed rule, we stated that we were not considering these home-based E/M

[are,to%20the%20World%20Health%20Organization.](https://bettermedicarealliance.org/news/report-shows-dramatic-increase-in-medicare-advantage-activity-to-address-social-determinants-of-health-but-barriers-remain/#:-:text=Social%20determinants%20of%20health%20)

visits as potentially misvalued for CY 2023.

An interested party has nominated the following cataract surgery codes, CPT codes 65820 (*Goniotomy—Incision to improve eye fluid flow*), 66174 (*Transluminal dilation of aqueous outflow canal; without retention of device or stent*), 66982 (*Complex Extracapsular cataract removal with insertion of intraocular lens prosthesis (one stage procedure)*), manual or mechanical technique (e.g., irrigation and aspiration or phacoemulsification), 66984 (*Extracapsular cataract removal with insertion of intraocular lens prosthesis (one stage procedure)*), manual or mechanical technique (e.g., irrigation and aspiration or phacoemulsification), 66989 (*Complex Extracapsular cataract removal w/IOL insertion, complex; with insertion of intraocular (e.g., trabecular meshwork, supraciliary, suprachoroidal) anterior segment aqueous drainage device, without extraocular reservoir, internal approach, one or more*), and 66991 (*Extracapsular cataract removal w/IOL insertion; with insertion of intraocular (e.g., trabecular meshwork, supraciliary, suprachoroidal) anterior segment aqueous drainage device, without extraocular reservoir, internal approach, one or more*), as well as the following retinal procedure codes, CPT codes 67015 (*Aspiration or release of vitreous, subretinal or choroidal fluid, pars plana approach (posterior sclerotomy)*), 67036 (*Vitrectomy, mechanical, pars plana approach*), 67039 (*Vitrectomy, mechanical, pars plana approach; with focal endolaser photocoagulation*), 67040 (*Vitrectomy, mechanical, pars plana approach; with endolaser panretinal photocoagulation*), 67041 (*Vitrectomy, mechanical, pars plana approach; with removal of preretinal cellular membrane (e.g., macular pucker)*), 67042 (*Vitrectomy, mechanical, pars plana approach; with removal of internal limiting membrane of retina (e.g., for repair of macular hole, diabetic macular edema)*), includes, if performed, intraocular tamponade (i.e., air, gas or silicone oil), 67043 (*Vitrectomy, mechanical, pars plana approach; with removal of subretinal membrane (e.g., choroidal neovascularization)*), includes, if performed, intraocular tamponade (i.e., air, gas or silicone oil) and laser photocoagulation), 67108 (*Repair of retinal detachment; with vitrectomy, any method, including, when performed, air or gas tamponade, focal endolaser photocoagulation, cryotherapy, drainage of subretinal fluid, scleral buckling, and/or removal of lens by*

*same technique*), and 67113 (*Repair of complex retinal detachment (e.g., proliferative vitreoretinopathy, stage C–1 or greater, diabetic traction retinal detachment, retinopathy of prematurity, retinal tear of greater than 90 degrees), with vitrectomy and membrane peeling, including, when performed, air, gas, or silicone oil tamponade, cryotherapy, endolaser photocoagulation, drainage of subretinal fluid, scleral buckling, and/or removal of lens*), as potentially misvalued because there is currently no established non-facility payment rate for these global 090-day surgical procedures. These codes are complex surgical eye procedures, and they require dedicated spaces, similar to facility-based spaces that are not typically found in an ophthalmologist's office—such as a well-lighted and sterile surgical theater; specific eye surgery equipment; and, possibly, clinical staff and other medical personnel trained to assist in these surgeries and the patient's immediate post-surgery recovery, including anesthesia services. In the past, with concerns for patient safety and given the intricate and delicate nature of these surgeries, we understood that these procedures would only be performed in a well-equipped and fully staffed medical facility. For Medicare Part B, payment for these services is only made for procedures furnished in the facility settings, but this nominator suggests that these cataract and retinal procedures can be properly performed in the non-facility office, safely, effectively, and perhaps more conveniently for patients and physicians; and thus requests that we should establish non-facility RVUs under the PFS to recognize the additional resources that would be expended in the non-facility setting.

The nominator has included a list of practice expense (PE) items involved in furnishing these services in the non-facility setting to help us to consider establishing non-facility values for these codes. They include the possible number and types of clinical staff and their work time in minutes as well as a list of various equipment and supplies typically needed to furnish the services described by the nominated codes.

The nominator also noted that there is projected backlog for these cataract and retinal services that may have been building up due to the COVID–19 restrictions from the past 2 years. We solicited comment on the merits of continuing to value these codes only in the facility setting, as opposed to also establishing non-facility values for these cataract and retinal surgery codes. We also solicited comment on any appropriate safety considerations for

these codes in the non-facility setting, and whether these codes are potentially misvalued. We noted that in last year's CY 2022 PFS final rule with comment (86 FR 65096 through 65097), we did review CPT codes 66982, 66984, 66987, 66988, 66989, 66991, and 0671T (*Cataract Removal with Drainage Device Insertion*) and did not establish non-facility values for those services, but we did note a potential rank order anomaly when considering minimally invasive glaucoma surgeries (MIGS) and cataract surgeries together, and suggested that the AMA RUC should consider re-surveying all of the codes in this family.

An interested party nominated add-on CPT code 20931 (*Allograft, structural, for spine surgery only (List separately in addition to code for primary procedure)*) as a potentially misvalued service with respect to the physician's labor for spinal surgeries involving the use of biomechanical synthetic cage devices versus the use of structural allograft bone as it relates to a set of CPT codes related to anterior cervical discectomy and fusion (ACDF). Ordinarily, interested parties nominate a primary service code as potentially misvalued, or a primary service code and its related add-on codes, but not an add-on code alone. The valuation of an add-on code is typically developed with reference to some portion of the work (or other resource inputs) involved in furnishing the primary service code. For example, the AMA CPT 2022 Professional Edition, page 147, states “Use code 20931 in conjunction with codes 22319, 22532–22533, 22548–22558, 22590–22612, 22630, 22633, 22634, 22800–22812”. The primary spinal surgery codes and the add-on CPT code 20931 have not been recently reconsidered or reviewed by the AMA RUC or CMS, and no new or additional information has been included with this nomination to persuade CMS that CPT code 20931 is individually potentially misvalued. This nomination of an add-on code as potentially misvalued is similar to the nomination we discussed in the CY 2022 PFS proposed rule (86 FR 65044) of CPT code 22551 (*Arthrodesis, anterior interbody, including disc space preparation, discectomy, osteophylectomy and decompression of spinal cord and/or nerve roots; cervical below C2*) and the accompanying add-on codes.

The nominator refers to two different methods of vertebral fusion: one using biomechanical synthetic cage devices, the other using structural allograft bone; and describes a typical vertebral fusion case that uses three units of one of these products. Both of these methods of vertebral fusion are described by CPT

code 22551 (includes a 90-day global period), which has a work RVU of 25.00. Both methods of vertebral fusion also involve two units of CPT code 22552 (*Arthrodesis, anterior interbody, including disc space preparation, discectomy, osteophylectomy and decompression of spinal cord and/or nerve roots; cervical below C2, each additional interspace (List separately in addition to code for primary procedure)*), which have a total work RVU of 13.00 ( $6.50 \times 2$ ), and 1 unit of CPT code 22846 (*Anterior instrumentation; 4 to 7 vertebral segments (List separately in addition to code for primary procedure)*), which has a work RVU of 12.40. The vertebral fusion method employing three synthetic cage devices with plate would involve three units of CPT code 22853 (*Insertion of interbody biomechanical device(s) (e.g., synthetic cage, mesh) with integral anterior instrumentation for device anchoring (e.g., screws, flanges), when performed, to intervertebral disc space in conjunction with interbody arthrodesis, each interspace (List separately in addition to code for primary procedure)*) for a total work RVU of 12.75 ( $4.25 \times 3$ ), and one unit of CPT code 20930 (*Allograft, morselized, or placement of osteopromotive material, for spine surgery only (List separately in addition to code for primary procedure)*) with a work RVU of 0.00 (because Medicare considers this code to be bundled into codes for other services). The nominator states that the typical vertebral fusion employing three synthetic cage devices with plate would total to 63.15 work RVUs.

In contrast, the nominator asserts that the vertebral fusion method employing structural allograft bones with plate involves the same set of services and codes (that is, one unit of CPT code 22551, two units of CPT code 22552,

and one unit of CPT code 22846), but the structural allograft bone method includes CPT code 20931 (*Allograft, structural, for spine surgery only (List separately in addition to code for primary procedure)*), with a work RVU of 1.81, instead of CPT codes 22853 and 20930, for a total work RVU of 52.21. The nominator suggests that this difference in total work RVUs for the two methods of vertebral fusion, 63.15 versus 52.21, is evidence that add-on CPT code 20931 is potentially misvalued; however, we do not agree with this nominator's method of aggregating and comparing sums of work RVUs for groups of services that may be furnished together as being potentially misvalued, nor consider CPT code 20931 as the source of misvaluation within this grouping.

We understand that the nominator believes there should be an equivalent total sum payment for all services involved in vertebral fusion surgeries using either method, and that there should not be a potential incentive for physicians to prefer the method that uses synthetic cage devices because of the higher available payment amount. The nominator asserts that the total sum payment for this kind of spinal surgery using the structural allograft bone method is undervalued as compared to the total sum payment for this kind of spinal surgery using the synthetic cage method.

We note that CPT code 22853, which the commenter associates with the synthetic cage device method of vertebral fusion, is a 45-minute ZZZ-code (indicating an add-on code) with an IWPUT (intra-service work (RVU) per unit of time) of 0.0944, whereas CPT code 20931, which the commenter associates with the allograft method of vertebral fusion, is a 20-minute ZZZ-code with an IWPUT of 0.0905. Given the much longer intra-service time and

greater IWPUT for CPT code 22853 than for CPT code 20931, the allograft method of vertebral fusion would be expected to have a lower total sum of work RVUs.

The nominator's description of why and how each vertebral fusion method is potentially misvalued when compared to the other does not present a situation that fits within our process for identifying individual services that are potentially misvalued using certain criteria, as described in the beginning of this section. Our determination that one or more codes are potentially misvalued generally revolves around the specific RVUs assigned to individual codes, or with the inter-code relativity between the RVUs assigned to several individual codes found within a family of codes with hierarchical relationships. We generally do not examine the summed differences in total RVUs (as is the case presented here), based on billing patterns for a combination of codes representing differing physician work for different methods of performing a service, and then comparing the total RVUs of each method as evidence of the potential misvaluation of codes. We do not believe that the nominator has provided sufficient evidence to demonstrate that CPT code 20931 itself is misvalued, and therefore, we are not inclined to propose this code as potentially misvalued; however, we solicited additional comment and any independent analysis and studies (see the supporting documentation options listed above under "CY 2023 Identification and Review of Potentially Misvalued Services," particularly in regard to any changes in the resources to providing a service) as supporting evidence from commenters in agreement or disagreement with this nomination.

See Table 10 for the listing of nominated potentially misvalued codes.

**TABLE 10: Interested Parties' Nominations of CPT Codes as Potentially Misvalued for CY 2023**

We received public comments on our discussion of public nominations for potentially misvalued codes and decision not to propose them as potentially misvalued. The following is a summary of the comments we received and our responses.

We received a number of public comments on the nominated home-based E/M visit CPT codes 99344, 99345, 99349, and 99350.

*Comment:* Commenters were disappointed, stating that CMS did not take into account the inclusion of the nominator's request for consideration for: (1) travel costs incurred by the physician or other practitioner; (2) potential opportunity costs to a physician or other practitioner when care is delivered in the patient's home versus in the office or at a facility; or (3) the physician or other practitioner's work and time expended assessing a patient's home environment and/or "Social Determinants of Health" (SDoH) assessments. Commenters explained that the typical home-bound patient, who requires a physician home visit, is comparatively more frail, with multiple chronic conditions. Some commenters suggested add-on codes, similar to the codes for at-home COVID-19 Vaccinations, for physician

transportation costs to the patient's home.

*Response:* We appreciate the feedback from commenters and encourage further discussion as we gain more experience with the new codes. As discussed in our proposed rule, the costs identified by commenters are not considered to be specific work, practice expense, or malpractice expense resource inputs that are taken into account in valuation of individual services under the PFS, so they are not included in establishing payment rates under the PFS in accordance with section 1848 of the Act. As such, these costs do not provide justification for potential misvaluation of the identified codes. We also noted in the CY 2023 PFS proposed rule (87 FR 45883) that the AMA RUC made recommendations regarding the values for these home-based E/M visit codes. Since CMS had already received AMA RUC recommendations for these home-based E/M visit codes for this year's proposed rule, we referred readers to the discussion and solicitation of public comments on those recommendations in the proposed rule. We solicited additional public comments, recommendations, and independent analysis as supporting evidence from all interested parties regarding the valuations for the home-based E/M

visits, including CPT codes 99344, 99345, 99349, and 99350. We refer readers to section II.F. of this final rule for a summary and our responses to those comments. With regard to the comments requesting additional coding, we appreciate commenters' suggestions, and, as we gain information from utilization of the newly-reviewed codes and receive additional feedback from interested parties, we may consider changes in future rulemaking.

*Comment:* One commenter stated that his Home Visit PEs are not lower than those of an office practice, but did not offer any code-level details to support this statement.

*Response:* We appreciate the perspective of interested parties, but we would need code-level PE details to evaluate potential code valuation issues.

We received numerous comments on the Cataract and Retinal Surgery codes which were nominated as potentially misvalued with a request to establish nonfacility payment rates for these complicated 090-day global surgical procedures.

*Comment:* Several commenters requested that CMS revise the current work RVU for CPT code 66174 (*Transluminal dilation of aqueous outflow canal; without retention of device or stent*) and instead use the

higher AMA RUC-recommended work RVU value or, short of that, transition the valuation we established in the CY 2022 PFS final rule over 3 years.

**Response:** We thank commenters for this comment. CPT code 66174 was reviewed and finalized in last year's rule (85 FR 65095), and we will not consider this code as potentially misvalued for CY 2023. We did not identify or propose CPT code 66174 as potentially misvalued in the proposed rule. As such, this comment is outside the scope of the proposed rule.

**Comment:** Many commenters recounted the evolution of these Cataract and Retinal Surgery codes—once exclusively performed in hospital operating theaters, then performed in ASCs, and now perhaps maturing into the next phase of eye care and Office-Based Surgeries (OBS). Commenters were mainly in favor of establishing payment amounts for these services in the non-facility office setting, which would recognize the additional PE resources involved in furnishing the services in those settings. Commenters also stated that there are significant advantages to be gained when these cataract and retinal surgery services are furnished in non-facility office settings. OBS may offer faster scheduling and coordinating with the surgeon, patient, and patient's family caretaker, since they bypass additional schedule coordination, and avoid potential staffing or availability issues with the hospital or ASC operating room. These commenters suggested that scheduling activities may be more efficient and flexible in the OBS setting, leading to fewer and shorter delays in delivering these Cataract and Retinal Surgeries to alleviate the patient's urgent eye problem (especially during recent COVID-19-related restrictions). The commenters also suggested that office-based surgical staff are also more likely to be familiar to the patient than a hospital operating room or ASC staff. One commenter offered that organizations, such as the American Association for Accreditation of Ambulatory Surgery Facilities (AAAASF), may offer accreditation for practitioners interested in furnishing OBS for these services, to prove they can demonstrate they have adequate equipment, adequate sterility, adequate backup power and lights, adequate clinical surgery personnel, and adequate emergency personnel, should there be a need for them, compared to hospital operating rooms or ASCs, possibly maintaining certifications with periodic re-inspections.

Some Hospital/ASC-based commenters noted that, after decades of

ophthalmologist experience with these Cataract and Retinal Surgery codes, they had a number of concerns about these services shifting toward office-based surgeries compared with Hospital/ASC settings and whether OBS can adequately address these concerns, including: (1) Sterility controls equal or better than a hospital operating room or a dedicated ASC operating theater; (2) Anesthesia for the OBS that is different in the office where valium oral sedation may be used and the patient being monitored by the physician eye surgeon, rather than in an O.R. with general sedation via IV administered and monitored by an anesthesiologist; (3) Equipment quality and maintenance is a concern and in the smaller typical office setting, there may not be the backups and redundancies that may be found in the larger facility settings, with automatic emergency power switchovers that may not be installed for the OBS; (4) Patient complications being detected in the pre-screening phase, possible complications occurring during the surgical procedure phase, and possible complications during the post-procedure phase, are concerns for the OBS, which may not have the full facility resources to address emergency situations arising from the office based surgery; (5) Staff for OBS are likely to be well familiar with eye surgeries and the patients themselves, but a general O.R. or ASC staff might be more experienced in responding to a wider range of surgical related complications; (6) The intricate, delicate, and complicated surgical procedures performed by varying experienced eye surgeons remains a concern when these procedures are performed outside of a full facility operating theater; (7) There is considered by some commenters to be a paucity of independent, high-quality, peer-reviewed clinical data supporting the safety or feasibility of retina surgery performed in an office setting, nor do they believe that there is any widespread demand by retina specialists or patients for this OBS option.

**Response:** We appreciate commenters' perspectives regarding their experience and concerns for Cataract and Retinal Surgeries being furnished as OBS. As we continue to consider how and where these services are furnished, and whether they are typically furnished in different settings, information such as the comments provided by these and other commenters are helpful. Based upon commenters' feedback, we have concerns about these services being furnished in non-facility settings. It is also unclear whether these services are

routinely being furnished outside of facility settings. CMS will continue to evaluate whether these services are being furnished in non-facility settings and will consider establishing non-facility values for these services at that time.

**Comment:** The AMA RUC commented that it defers to the ophthalmology and retinal specialty societies to determine whether these services could be safely performed in the non-facility setting; the specialty societies recommend against CMS moving forward with making these services payable as OBS, citing many of the same commenters' concerns listed earlier in this section.

**Response:** We appreciate the AMA RUC's response to this issue, explaining that they defer to the specialty societies' position on this issue.

After consideration of public comments, we will continue to gather information concerning Cataract and Retinal Surgeries in the non-facility office settings and their implications to Medicare payment for future rulemaking.

We received a few public comments on the nominated CPT code 20931 (*Allograft, structural, for spine surgery only (add-on code)*) and other codes related to anterior cervical discectomy and fusion (ACDF).

**Comment:** One commenter agreed with the nominator that CPT code 20931 is misvalued when compared to CPT code 22853 (*Insertion of cage or mesh device to spine bone and disc space during spine fusion (add-on code)*) and other codes related to anterior cervical discectomy and fusion (ACDF), where the higher payment for CPT code 22853 inappropriately incentivizes surgeons to insert the synthetic cage spacer over the bone allograft. However, one commenter stated that there is no evidence that CPT code 20931 is misvalued, and that the valuation of CPT code 20931 should not be equivalent to CPT code 22853.

**Response:** We thank these commenters for their feedback. As this nomination is almost identical to a grouping of related codes for ACDF that had been presented in the CY 2022 PFS proposed rule (86 FR 65044), under CPT code 22551 as misvalued, and as it was discussed at that time and reviewed again in this rule, we do not believe that the nominator has provided sufficient evidence to demonstrate that CPT code 20931 is misvalued nor that this code's payment should be made equivalent to CPT code 22853. As stated earlier, our determination that one or more codes are potentially misvalued generally revolves around the specific RVUs assigned to individual codes, or with the inter-code relativity between the

RVUs assigned to several individual codes found within a family of codes with hierarchical relationships. We generally do not examine the summed differences in total RVUs (as is the case presented here), based on billing patterns for a combination of codes representing differing physician work for different methods of performing a service, and then comparing the total RVUs of each method as evidence of the potential misvaluation of codes. We do not believe that the nominator or other interested parties have provided sufficient evidence to demonstrate that CPT code 20931 itself is misvalued, and therefore, we are not inclined to propose (or adopt) this code as potentially misvalued.

After consideration of public comments, we are finalizing our proposal not to adopt any of the nominated codes as potentially misvalued codes. We encourage commenters who wish to nominate codes as potentially misvalued to consider the types of supporting documentation listed in the beginning of this section, as that information is important for us to consider in our process for reviewing nominations of potentially misvalued codes.

#### *D. Payment for Medicare Telehealth Services Under Section 1834(m) of the Act*

As discussed in prior rulemaking, several conditions must be met for Medicare to make payment for telehealth services under the PFS. See further details and full discussion of the scope of Medicare telehealth services in the CY 2018 PFS final rule (82 FR 53006) and CY 2021 PFS final rule (85 FR 84502) and in 42 CFR 410.78 and 414.65.

#### *1. Payment for Medicare Telehealth Services Under Section 1834(m) of the Act*

##### *a. Changes to the Medicare Telehealth Services List*

In the CY 2003 PFS final rule with comment period (67 FR 79988), we established a regulatory process for adding services to or deleting services from the Medicare Telehealth Services List in accordance with section 1834(m)(4)(F)(ii) of the Act (§ 410.78(f)). This process provides the public with an ongoing opportunity to submit requests for adding services, which are then reviewed by us and assigned to categories established through notice and comment rulemaking. Specifically, we assign any submitted request to add to the Medicare Telehealth Services List to one of the following two categories:

- *Category 1:* Services that are similar to professional consultations, office visits, and office psychiatry services that are currently on the Medicare Telehealth Services List. In reviewing these requests, we look for similarities between the requested and existing telehealth services for the roles of, and interactions among, the beneficiary, the physician (or other practitioner) at the distant site and, if necessary, the telepresenter, a practitioner who is present with the beneficiary in the originating site. We also look for similarities in the telecommunications system used to deliver the service; for example, the use of interactive audio and video equipment.

- *Category 2:* Services that are not similar to those on the current Medicare Telehealth Services List. Our review of these requests includes an assessment of whether the service is accurately described by the corresponding code when furnished via telehealth and whether the use of a telecommunications system to furnish the service produces demonstrated clinical benefit to the patient. Submitted evidence should include both a description of relevant clinical studies that demonstrate the service furnished by telehealth to a Medicare beneficiary improves the diagnosis or treatment of an illness or injury or improves the functioning of a malformed body part, including dates and findings, and a list and copies of published peer reviewed articles relevant to the service when furnished via telehealth. Our evidentiary standard of clinical benefit does not include minor or incidental benefits. Some examples of other clinical benefits that we consider include the following:

- Ability to diagnose a medical condition in a patient population without access to clinically appropriate in-person diagnostic services.
- Treatment option for a patient population without access to clinically appropriate in-person treatment options.
- Reduced rate of complications.
- Decreased rate of subsequent diagnostic or therapeutic interventions (for example, due to reduced rate of recurrence of the disease process).
- Decreased number of future hospitalizations or physician visits.
- More rapid beneficial resolution of the disease process treatment.
- Decreased pain, bleeding, or other quantifiable symptom.
- Reduced recovery time.

In the CY 2021 PFS final rule (85 FR 84507), we created a third category of criteria for adding services to the Medicare Telehealth Services List on a temporary basis following the end of the

PHE for the COVID–19 pandemic: Category 3. This new category describes services that were added to the Medicare Telehealth Services List during the PHE for which there is likely to be clinical benefit when furnished via telehealth, but there is not yet sufficient evidence available to consider the services for permanent addition under the Category 1 or Category 2 criteria. Services added on a temporary, Category 3 basis will ultimately need to meet the criteria under Category 1 or 2 in order to be permanently added to the Medicare Telehealth Services List. To add specific services on a Category 3 basis, we conducted a clinical assessment to identify those services for which we could foresee a reasonable potential likelihood of clinical benefit when furnished via telehealth. We considered the following factors:

- ++ Whether, outside of the circumstances of the PHE for COVID–19, there are concerns for patient safety if the service is furnished as a telehealth service.

- ++ Whether, outside of the circumstances of the PHE for COVID–19, there are concerns about whether the provision of the service via telehealth is likely to jeopardize quality of care.

- ++ Whether all elements of the service could fully and effectively be performed by a remotely located clinician using two-way, audio-video telecommunications technology.

In the CY 2021 PFS final rule (85 FR 84507), we also temporarily added several services to the Medicare Telehealth Services List using the Category 3 criterion described above. We assessed codes that were temporarily available on the list for the duration of the PHE to determine their appropriateness for inclusion on the Medicare Telehealth Services List on a Category 3 basis. We have reassessed the services that are temporarily available via telehealth for the PHE, based on both information provided by interested parties and our own internal review. We have assessed whether or not these services can, outside of the circumstances of the PHE, be furnished using the full scope of service elements via two-way, audio-video communication technology, without jeopardizing patient safety or quality of care, and we now believe that there are additional services that would be appropriate for addition to the Medicare Telehealth Services List on a Category 3 basis that we did not identify in the CY 2021 rulemaking. In the proposed rule, we proposed to add these additional services to the Medicare Telehealth Services List on a Category 3 basis, as further discussed below.

The Medicare Telehealth Services List, including the additions described later in this section, is available on the CMS website at <https://www.cms.gov/Medicare/Medicare-General-Information/Telehealth/index.html>.

Beginning in CY 2019, we stated that for CY 2019 and onward, we intend to accept requests through February 10, consistent with the deadline for our receipt of code valuation recommendations from the RUC (83 FR 59491). For CY 2023, requests to add services to the Medicare Telehealth Services List must have been submitted and received by February 10, 2022. Each request to add a service to the Medicare Telehealth Services List must have included any supporting documentation the requester wishes us to consider as we review the request. Because we use the annual PFS rulemaking process as the vehicle to make changes to the Medicare Telehealth Services List, requesters are advised that any information submitted as part of a request is subject to public disclosure for this purpose. For more information on submitting a request in the future to add services to the Medicare Telehealth Services List, including where to submit these requests, see our website at <https://www.cms.gov/Medicare/Medicare-General-Information/Telehealth/index.html>.

**b. Requests To Add Services to the Medicare Telehealth Services List for CY 2023**

Under our current policy, we add services to the Medicare Telehealth Services List on a Category 1 basis when we determine that they are similar to services on the existing Medicare Telehealth Services List for the roles of, and interactions among, the beneficiary, physician (or other practitioner) at the distant site and, if necessary, the

telepresenter. As we stated in the CY 2012 PFS final rule with comment period (76 FR 73098), we believe that the Category 1 criterion not only streamlines our review process for publicly requested services that fall into this category, but also expedites our ability to identify codes for the Medicare Telehealth Services List that resemble those services already on the Medicare Telehealth Services List. We add services on a Category 2 basis when the service does not fall within Category 1, and based upon our assessment of whether the services are accurately described by the corresponding code when delivered via telehealth and whether the use of a telecommunications system to deliver the service produces demonstrated clinical benefit to the patient. We add services on a temporary Category 3 basis when the services were temporarily included on the Medicare Telehealth Services List during the PHE, and we find that there is likely to be clinical benefit when furnished via telehealth, but there is not yet sufficient evidence available to consider the services for permanent addition under the Category 1 or Category 2 criteria.

We received several requests to permanently add various services to the Medicare Telehealth Services List effective for CY 2023. We found that none of the requests we received by the February 10th submission deadline met our Category 1 or Category 2 criteria for permanent addition to the Medicare Telehealth Services List. We also assessed the appropriateness of adding these services to the Medicare Telehealth Services List on a Category 3 basis instead.

We did not propose changes to the length of time the services that we temporarily included on a Category 3 basis will remain on the Medicare

Telehealth Services List; the services we temporarily included on the Medicare Telehealth Services List on a Category 3 basis will continue to be included through the end of CY 2023. In the CY 2023 PFS proposed rule, we noted that in the event that the PHE extends well into CY 2023, we may consider revising this policy.

We proposed to add some services to the Medicare Telehealth Services List on a Category 3 basis through the end of 2023, some of which we had not previously added to the Medicare Telehealth List during the PHE, but have been added on a subregulatory basis as provided in § 410.78(f) of our regulations. For some of these services, we received information from interested parties suggesting potential clinical benefit. For others, we continue to believe there is sufficient evidence of potential clinical benefit to warrant allowing additional time for interested parties to gather data to support their possible inclusion on the Medicare Telehealth Services List on a Category 1 or 2 basis. The Medicare Telehealth Services List requests for CY 2023 are listed in Table 11.

Additionally, the Consolidated Appropriations Act, 2022 (CAA, 2022) (Pub. L. 117–103, March 15, 2022) amended section 1834(m) of the Act to extend a number of flexibilities that are in place during the PHE for COVID–19 for 151 days after the end of the PHE. To align the availability of these services with those flexibilities extended under the Act, we proposed to continue to allow certain telehealth services that would otherwise not be available via telehealth after the expiration of the PHE to remain on the Medicare Telehealth Services List for 151 days after the expiration of the PHE.

**BILLING CODE 4150–28–P**

**TABLE 11: Services Requested for Addition to the Medicare Telehealth Services List for CY 2023**

| HCPCS                    | Long Descriptor   | Basis |
|--------------------------|---|-------|
| <b>Code Family</b>       |   |       |
| <b>Lactation classes</b> |   |       |
| S9443                    | Lactation classes, non-physician provider, per session  |       |
| <b>Telephone E/M</b>     |   |       |
| 99441                    | Telephone evaluation and management service by a physician or other qualified health care professional who may report evaluation and management services provided to an established patient, parent, or guardian not originating from a related E/M service provided within the previous 7 days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 5-10 minutes of medical discussion  | 3     |
| 99442                    | Telephone evaluation and management service by a physician or other qualified health care professional who may report evaluation and management services provided to an established patient, parent, or guardian not originating from a related E/M service provided within the previous 7 days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 11-20 minutes of medical discussion   | 3     |
| 99443                    | Telephone evaluation and management service by a physician or other qualified health care professional who may report evaluation and management services provided to an established patient, parent, or guardian not originating from a related E/M service provided within the previous 7 days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 21-30 minutes of medical discussion   | 3     |
| <b>Therapy</b>           |   |       |
| 90901                    | Biofeedback training by any modality  | 1     |
| 97110                    | Therapeutic procedure, 1 or more areas, each 15 minutes; therapeutic exercises to develop strength and endurance, range of motion and flexibility   | 1     |
| 97112                    | Therapeutic procedure, 1 or more areas, each 15 minutes; neuromuscular reeducation of movement, balance, coordination, kinesthetic sense, posture, and/or proprioception for sitting and/or standing activities   | 1     |
| 97116                    | Therapeutic procedure, 1 or more areas, each 15 minutes; gait training (includes stair climbing)  | 1     |
| 97150                    | Therapeutic procedure(s), group (2 or more individuals)   | 1     |
| 97161                    | Physical therapy evaluation: low complexity, requiring these components: A history with no personal factors and/or comorbidities that impact the plan of care; An examination of body system(s) using standardized tests and measures addressing 1-2 elements from any of the following: body structures and functions, activity limitations, and/or participation restrictions; A clinical presentation with stable and/or uncomplicated characteristics; and Clinical decision making of low complexity using standardized patient assessment instrument and/or measurable assessment of functional outcome. Typically, 20 minutes are spent face-to-face with the patient and/or family.   | 1     |
| 97162                    | Physical therapy evaluation: moderate complexity, requiring these components: A history of present problem with 1-2 personal factors and/or comorbidities that impact the plan of care; An examination of body systems using standardized tests and measures in addressing a total of 3 or more elements from any of the following: body structures and functions, activity limitations, and/or participation restrictions; An evolving clinical presentation with changing characteristics; and Clinical decision making of moderate complexity using standardized patient assessment instrument and/or measurable assessment of functional outcome. Typically, 30 minutes are spent face-to-face with the patient and/or family.    | 1     |
| 97163                    | Physical therapy evaluation: high complexity, requiring these components: A history of present problem with 3 or more personal factors and/or comorbidities that impact the plan of care; An examination of body systems using standardized tests and measures addressing a total of 4 or more elements from any of the following: body structures and functions, activity limitations, and/or participation restrictions; A clinical presentation with unstable and unpredictable characteristics; and Clinical decision making of high complexity using standardized patient assessment instrument and/or measurable assessment of functional outcome. Typically, 45 minutes are spent face-to-face with the patient and/or family. | 1     |
| 97164                    | Re-evaluation of physical therapy established plan of care, requiring these components: An examination including a review of history and use of standardized tests and measures is required; and Revised plan of care using a standardized patient assessment instrument and/or measurable assessment of functional outcome. Typically, 20 minutes are spent face-to-face with the patient and/or family.   | 1     |
| 97530                    | Therapeutic activities, direct (one-on-one) patient contact (use of dynamic activities to improve functional performance), each 15 minutes  | 1     |

| HCPSC   | Long Descriptor   | Basis |
|---|---|-------|
| 97535   | Self-care/home management training (e.g., activities of daily living (ADL) and compensatory training, meal preparation, safety procedures, and instructions in use of assistive technology devices/adaptive equipment) direct one-on-one contact, each 15 minutes   | 1     |
| 97537   | Community/work reintegration training (e.g., shopping, transportation, money management, avocational activities and/or work environment/modification analysis, work task analysis, use of assistive technology device/adaptive equipment), direct one-on-one contact, each 15 minutes   | 1     |
| 97542   | Wheelchair management (e.g., assessment, fitting, training), each 15 minutes  | 1     |
| 97750   | Physical performance test or measurement (e.g., musculoskeletal, functional capacity), with written report, each 15 minutes   | 1     |
| 97755   | Assistive technology assessment (e.g., to restore, augment or compensate for existing function, optimize functional tasks and/or maximize environmental accessibility), direct one-on-one contact, with written report, each 15 minutes   | 1     |
| 97763   | Orthotic(s)/prosthetic(s) management and/or training, upper extremity(ies), lower extremity(ies), and/or trunk, subsequent orthotic(s)/prosthetic(s) encounter, each 15 minutes   | 1     |
| 98960   | Education and training for patient self-management by a qualified, nonphysician health care professional using a standardized curriculum, face-to-face with the patient (could include caregiver/family) each 30 minutes; individual patient  | 1     |
| 98961   | Education and training for patient self-management by a qualified, nonphysician health care professional using a standardized curriculum, face-to-face with the patient (could include caregiver/family) each 30 minutes; 2-4 patients  | 1     |
| 98962   | Education and training for patient self-management by a qualified, nonphysician health care professional using a standardized curriculum, face-to-face with the patient (could include caregiver/family) each 30 minutes; 5-8 patients  | 1     |
| <b>Gastrointestinal tract imaging</b>   |   |       |
| 91110   | Gastrointestinal tract imaging, intraluminal (e.g., capsule endoscopy), esophagus through ileum, with interpretation and report   | 3     |
| <b>Ambulatory continuous glucose monitoring</b>                                     |   |       |
| 95251   | Ambulatory continuous glucose monitoring of interstitial tissue fluid via a subcutaneous sensor for a minimum of 72 hours; analysis, interpretation and report  | N/A   |
| <b>Electronic analysis of implanted neurostimulator pulse generator/transmitter</b> |   |       |
| 95976   | Electronic analysis of implanted neurostimulator pulse generator/transmitter (e.g., contact group[s], interleaving, amplitude, pulse width, frequency [Hz], on/off cycling, burst, magnet mode, dose lockout, patient selectable parameters, responsive neurostimulation, detection algorithms, closed loop parameters, and passive parameters) by physician or other qualified health care professional; with simple cranial nerve neurostimulator pulse generator/transmitter programming by physician or other qualified health care professional  | 1     |
| 95977   | Electronic analysis of implanted neurostimulator pulse generator/transmitter (e.g., contact group[s], interleaving, amplitude, pulse width, frequency [Hz], on/off cycling, burst, magnet mode, dose lockout, patient selectable parameters, responsive neurostimulation, detection algorithms, closed loop parameters, and passive parameters) by physician or other qualified health care professional; with complex cranial nerve neurostimulator pulse generator/transmitter programming by physician or other qualified health care professional   | 1     |
| 95970   | Electronic analysis of implanted neurostimulator pulse generator/transmitter (e.g., contact group[s], interleaving, amplitude, pulse width, frequency [Hz], on/off cycling, burst, magnet mode, dose lockout, patient selectable parameters, responsive neurostimulation, detection algorithms, closed loop parameters, and passive parameters) by physician or other qualified health care professional; with brain, cranial nerve, spinal cord, peripheral nerve, or sacral nerve, neurostimulator pulse generator/transmitter, without programming   | 3     |
| 95983   | Electronic analysis of implanted neurostimulator pulse generator/transmitter (e.g., contact group[s], interleaving, amplitude, pulse width, frequency [Hz], on/off cycling, burst, magnet mode, dose lockout, patient selectable parameters, responsive neurostimulation, detection algorithms, closed loop parameters, and passive parameters) by physician or other qualified health care professional; with brain neurostimulator pulse generator/transmitter programming, first 15 minutes face-to-face time with physician or other qualified health care professional   | 3     |
| 95984   | Electronic analysis of implanted neurostimulator pulse generator/transmitter (e.g., contact group[s], interleaving, amplitude, pulse width, frequency [Hz], on/off cycling, burst, magnet mode, dose lockout, patient selectable parameters, responsive neurostimulation, detection algorithms, closed loop parameters, and passive parameters) by physician or other qualified health care professional; with brain neurostimulator pulse generator/transmitter programming, each additional 15 minutes face-to-face time with physician or other qualified health care professional (List separately in addition to code for primary procedure) | 3     |
| <b>Adaptive behavior treatment and Behavior identification assessment</b>           |   |       |

| HCPSC | Long Descriptor  | Basis |
|-------|--|-------|
| 97151 | Behavior identification assessment, administered by a physician or other qualified health care professional, each 15 minutes of the physician's or other qualified health care professional's time face-to-face with patient and/or guardian(s)/caregiver(s) administering assessments and discussing findings and recommendations, and non-face-to-face analyzing past data, scoring/interpreting the assessment, and preparing the report/treatment plan | 2     |
| 97152 | Behavior identification-supporting assessment, administered by one technician under the direction of a physician or other qualified health care professional, face-to-face with the patient, each 15 minutes   | 2     |
| 97153 | Adaptive behavior treatment by protocol, administered by technician under the direction of a physician or other qualified health care professional, face-to-face with one patient, each 15 minutes   | 2     |
| 97154 | Group adaptive behavior treatment by protocol, administered by technician under the direction of a physician or other qualified health care professional, face-to-face with two or more patients, each 15 minutes  | 2     |
| 97155 | Adaptive behavior treatment with protocol modification, administered by physician or other qualified health care professional, which may include simultaneous direction of technician, face-to-face with one patient, each 15 minutes  | 2     |
| 97156 | Family adaptive behavior treatment guidance, administered by physician or other qualified health care professional (with or without the patient present), face-to-face with guardian(s)/caregiver(s), each 15 minutes  | 2     |
| 97157 | Multiple-family group adaptive behavior treatment guidance, administered by physician or other qualified health care professional (without the patient present), face-to-face with multiple sets of guardians/caregivers, each 15 minutes  | 2     |
| 97158 | Group adaptive behavior treatment with protocol modification, administered by physician or other qualified health care professional, face-to-face with multiple patients, each 15 minutes  | 2     |
| 0362T | Behavior identification supporting assessment, each 15 minutes of technicians' time face-to-face with a patient, requiring the following components: administration by the physician or other qualified health care professional who is on site; with the assistance of two or more technicians; for a patient who exhibits destructive behavior; completion in an environment that is customized to the patient's behavior.                               | 2     |
| 0373T | Adaptive behavior treatment with protocol modification, each 15 minutes of technicians' time face-to-face with a patient, requiring the following components: administration by the physician or other qualified health care professional who is on site; with the assistance of two or more technicians; for a patient who exhibits destructive behavior; completion in an environment that is customized to the patient's behavior.                      | 2     |

**BILLING CODE 4150-28-C**

We remind interested parties that the criterion for adding services to the Medicare Telehealth Services List under Category 1 is that the requested services are similar to professional consultations, office visits, and/or office psychiatry services that are currently on the Medicare Telehealth Services List, and that the criterion for adding services under Category 2 is that there is evidence of clinical benefit if provided as telehealth. As explained below, we find that none of the requested services listed in Table 11 met the Category 1 or 2 criteria.

We received a request to permanently add CPT code S9443 (*Lactation classes, non-physician provider, per session*) to the Medicare Telehealth Services List. This service has a status code of "I," which means that it is not valid for Medicare billing purposes. We understand that this is a temporary code established by a private payor for private payor use, and thus, it is not valid for nor payable by Medicare. As such, this code is not separately billable under the PFS. We generally do not add services to the Medicare Telehealth Services List unless they are separately

billable under the PFS. Outside of the circumstances of the PHE, the Medicare Telehealth Services List only includes services that are covered if they are furnished without the use of telecommunication technology in-person. Because CPT code S9443 is not billable under the PFS when furnished in-person, we do not believe it would be appropriate to allow the service to be billed separately when furnished as a Medicare telehealth service. As noted in the CY 2018 PFS final rule (82 FR 53011), if a service does not describe a service typically furnished in-person, it would not be considered a telehealth service under the applicable provisions of the statute. We did not propose to add CPT code S9443 to the Medicare Telehealth Services List.

*Comment:* A commenter requested that this code (CPT code S9443) be added on a Category 3 basis, citing financial pressures and staff shortages, which are affecting labor and delivery units.

*Response:* We thank the commenter for this comment, but as noted in the proposed rule, this code is not separately billable under the PFS when

furnished in-person, so we do not believe that it should be considered a telehealth service within the meaning of the statute. We continue to believe it would be inappropriate to allow CPT code S9443 to be billed separately when furnished as a Medicare telehealth service, and we are finalizing our proposal not to add CPT code S9443 to the Medicare Telehealth Services List.

**(1) Therapy Services**

We received requests to add Therapy Procedures: CPT codes 97110, 97112, 97116, 97150, and 97530; Physical Therapy Evaluations: CPT codes 97161–97164; Therapy Personal Care services: CPT codes 97535, 97537, and 97542; and Therapy Tests and Measurements services: CPT codes 97750, 97755, and 97763, to the Medicare Telehealth Services List on a Category 1 basis.

In the CY 2022 PFS final rule (86 FR 65051), we determined that these services did not meet the Category 1 criteria for addition to the Medicare Telehealth Services List because they involve direct observation and/or physical contact between the practitioner and the patient and, in many instances, are therapeutic in

nature, and that they did not meet Category 2 criteria, because we thought that the request did not provide sufficient detail to determine whether all of the necessary elements of the service could be furnished remotely. We continue to believe this is the case. We still do not have sufficient information to determine whether these services meet the Category 2 criteria. However, we noted that some of these codes, including codes 97110, 97112, 97116, 97150, 97530, 97161–97164, 97535, 97542, 97750, and 97755 have been added to the list on a temporary basis for the duration of the PHE.

In assessing the evidence that was supplied by interested parties in support of adding these services to the Medicare Telehealth Services List on a Category 2 basis, we concluded that there was not sufficient information to determine whether all of the necessary elements of these services could be furnished remotely. Information regarding safety, appropriateness, and that indicates that all elements of a given CPT code can be furnished via telehealth is still needed to assess whether these services meet the Category 2 criteria. However, we also believe that the therapy services that are currently on the Medicare Telehealth Services List on a temporary basis for the PHE (including CPT codes 97150, 97530, and 97542), but are not currently included on a Category 3 basis, may continue to be furnished safely via two-way, audio-video communication technology outside of the circumstances of the PHE.

Therefore, we proposed that CPT codes 97150, 97530, and 97542 (the set of therapy services that are currently on the Medicare Telehealth Services List on a temporary basis for the PHE) be added to the Medicare Telehealth Services List through the end of CY 2023 on a temporary, Category 3 basis, to allow time to gather additional data that could support their possible inclusion on the list on a permanent basis. CPT codes 97110, 97112, 97116, 97161–97168, 97535, 97750, and 97755 will continue to be available on the Medicare Telehealth Services List on a Category 3 basis. We anticipate that keeping these services on the Medicare Telehealth Services List on a Category 3 basis, as proposed, through the end of CY 2023 would preserve access to care and promote health equity, and based on information provided by interested parties and internal review, we believe that they may safely be furnished as telehealth outside of the circumstances of the PHE through the end of CY 2023. However, we remind readers that the practitioners who primarily furnish

these services, physical therapists, are not, outside the circumstances of the PHE (and the 151-day period following the expiration of the PHE), authorized to furnish Medicare telehealth services. We noted that, if the PHE and the 151-day period following the expiration of the PHE both end in CY 2023, the pre-PHE rules will take effect, and these services could no longer be furnished by therapists as Medicare telehealth services.

Certain other requested therapy services, namely CPT codes 97537, 97763, 90901, and 98960–98962 were not on the Medicare Telehealth Services List prior to June 16, 2022; however, we added these services to the Medicare Telehealth Services List on a temporary basis during the PHE, in accordance with § 410.78(f). As explained below in section II.D.1.d. of this final rule, services included on the Medicare Telehealth Services List on a temporary basis during the PHE that have not been added to the list on a Category 3 basis will remain on the list for 151 days following the end of the PHE. Furthermore, we proposed to add CPT codes 97537, 97763, 90901, and 98960–98962 to the Medicare Telehealth Services List on a Category 3 basis through the end of CY 2023. Our clinical analyses of these services indicate that they can be furnished in full using two-way, audio and video technology during the circumstances of the PHE, and information provided by requestors indicates that there may be clinical benefit; however, there is not yet sufficient evidence available to consider the services for permanent addition to the Medicare Telehealth Services List under the Category 1 or Category 2 criteria. Including these services on the Medicare Telehealth Services List during the PHE and through CY 2023 will allow additional time for the development of evidence for CMS to consider when evaluating these services for potential permanent addition to the Medicare Telehealth Services List on a Category 1 or 2 basis. We continue to encourage commenters to supply additional information in support of adding these services to the Medicare Telehealth Services List on a permanent basis, including information regarding the safety and appropriateness of furnishing these services via telehealth.

*Comment:* Several commenters supported our addition of the listed therapy services to the Medicare Telehealth Services List on a Category 3 basis. However, commenters stated that many of these codes should be added permanently; commenters specifically stated that therapy services, including

CPT codes 97110, 97112, 97116, 97150, 97161–97164, 97530, 97535, 97537, 97542, 97750, 97755, 97763, 90901, 98960, 98961, and 98962 should be added permanently, stating that these codes have been used successfully to provide telehealth services throughout the PHE and have shown that the same quality of care can be given with equal or higher levels of patient satisfaction as in-person visits. According to these commenters, the PHE has given ample data to support that, when used appropriately, telehealth can have a positive effect on outcomes for patients who are restricted from a full course of in-person therapy visits, which they claim is at a lower cost of care, and the inclusion of these therapy service codes on the Medicare Telehealth Services List on a Category 1 or Category 2 basis would preserve access to these services beyond the temporary extension and ease administrative burden should Congress act in the future to make rehabilitation services delivered via telehealth permanent.

*Response:* We note that all of the above-mentioned therapy services are either currently on the Medicare Telehealth Services List on a Category 3 basis, or we have proposed to add them on a Category 3 basis for CY 2023, to continue to gather data with regard to likely clinical benefit when furnished via telehealth outside of the circumstances of the PHE. We continue to believe that the process as discussed in the CY 2021 PFS final rule (85 FR 84506 through 84509), whereby we created the Category 3 basis for adding to or deleting services from the Medicare Telehealth Services List is the appropriate means of potentially adding services permanently for those services that were temporarily added under the circumstances of the PHE, as this process allows for the collection and evaluation of data that could potentially support permanent inclusion following the 151-day period after the end of the PHE. We believe our proposal, consistent with the amendments made by provisions of the CAA, 2022, to extend the period that these services will be available on the Medicare Telehealth Services List temporarily for the PHE by 151 days following the end of the PHE will further enhance the opportunity for the collection of information on the experiences of clinicians who are furnishing telehealth services during the PHE for COVID–19. This will also help us to determine which services may ultimately be eligible for permanent addition under Category 1 or Category 2 criteria, and we encourage interested parties to use this

extended time period to gather data on use of services, that is more than statements of support and more than subjective attestations of clinical benefit, to support their potential addition in future rulemaking.

*Comment:* Commenters requested clarification on whether CPT codes for Occupational Therapy (97165, 97166, 97167, and 97168) and Speech Therapy (92522 and 92523) were included in the list of Category 3 codes for CY 2023, and should be added on a Category 3 basis.

*Response:* We clarify that these codes (CPT codes 97165–97168 and 92521–92524) are currently included on the Medicare Telehealth Services List available on a Category 3 basis.

After consideration of public comments, we are finalizing our proposed addition of CPT codes 90901, 97150, 97530, 97537, 97542, 97763, and 98960–98962 to the Medicare Telehealth Services List on a Category 3 basis.

## (2) Telephone E/M Services
