On October 17, 2022, the NRC received an application from PFWN requesting to amend their specific license to export German-origin radioactive waste from PFWN processing facilities to Eckert and Ziegler Nuclitech GmbH located in Germany. The application seeks authorization to export no greater than 800,000 kilograms (8.5 terabecquerels (TBq)) of treated low-level radioactive waste, originally received from Germany in the form of liquid, shredded and combustible material produced from research, medical, and other industries (excluding nuclear power plants). The material to be treated includes plastics, paper, wood, personal protective equipment, and glass, primarily contaminated with carbon-14, cesium-137, cobalt-60, nickel-63, radium-226 and strontium-90. The treated waste to be returned to Germany will consist of residual ash and residual metal or non-combustible material that cannot be recycled. The applicant requests an expiration date of September 1, 2026.
