

**A. Purpose**

The General Services Administration Acquisition Regulation (GSAR) 552.236–79, Construction-Contractor-as-Constructor, requires the contractor to submit proposals to establish the final estimated cost of the work, to convert the contract to a firm-fixed-price, and to determine the final settlement for construction-manager-as-constructor (CMc) projects.

The CMc refers to a project management and contracting technique that is one of three predominant methods used for acquiring construction services by GSA. The other two methods are design-bid-build and design-build.

The information is used by contracting officers to evaluate proposals and negotiate contract modifications during contract administration. GSA would be unable to assess readily and equitably offers fairly and competitively if they were not allowed to collect data required in the information collection.

**B. Annual Reporting Burden**

Total public reporting burden for this collection of information is estimated to average 400 total hours (\$33,004) annually, including the time for reviewing instructions, searching existing data sources, gathering, and maintaining the data needed, and completing and reviewing the collection of information. The estimated burden hours to the public for the below clauses are as follows:

GSAR 552.236–79, Construction-Contractor-as-Constructor, requires the contractor to submit proposals to establish the final estimated cost of the work, to convert the contract to a firm-fixed-price, and to determine the final settlement.

*Total Response Burden Hours:* 400.

GSAR 552.236–80, Accounting Records, contains a recordkeeping requirement that is subject to the Paperwork Reduction Act (44 U.S.C. 3501, *et seq.*). The clause requires the contractor to keep all relevant documents for a period of three years after the final payment. However, the clause does not add burden to what is already estimated for the existing FAR clause at 52.215–2, Audit and Records by a previous information collection (see OMB Control Number 9000–0034).
