

offered within their country to make international calls to the point-of-contact in the United States. You may also view the ICR at <http://www.reginfo.gov/public/do/PRAMain>.

SUPPLEMENTARY INFORMATION: In accordance with the PRA and 5 CFR 1320.8(d)(1), we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on March 31, 2022 (87 FR 18809). We received one comment. The comment did not address information collection, so no action was taken.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again soliciting comments from the public and other Federal agencies on the proposed ICR that is described below. We are especially interested in public comment addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How the agency might minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personally identifiable information (PII) in your comment, you should be aware that your entire comment—including your PII may be made publicly available at any time. While you can ask us in your comment to withhold your PII from public review, we cannot guarantee that we will be able to do so.

Abstract: This collection seeks to gather information on harvest and satisfaction from waterfowl hunters on the open waters of Green Bay and Lake Michigan. From 2021 through 2025, the Wisconsin waterfowl hunting season had and will have a North, South, and Open Water Zone. The Open Water Zone will be specific to the offshore open waters of Lake Michigan and Green Bay. Specific regulations for this new zone, which starts 500 feet offshore and extends to the Wisconsin-Michigan state boundary, can be modified during the five-year period and input from hunters will provide critical information to improve hunter satisfaction. Former survey methods used to gather information on the season frameworks preferred by hunters under the 2016–2020 season structure cannot be applied to the Open Water Zone; thus, USGS plans to conduct both in-person and online surveys targeted toward open-water hunters to gather their input on season frameworks. Surveys will also be used to inform managers on what, where, and how many species of waterfowl are harvested in this open-water environment. Wisconsin waterfowl managers will use information collected from this survey to assist in developing season frameworks within this zone and provide information on harvest composition.

Title of Collection: Hunter Harvest and Satisfaction Surveys on Green Bay and Lake Michigan.

OMB Control Number: 1028–NEW.

Form Number: None.

Type of Review: New.

Respondents/Affected Public: Waterfowl hunters that hunt the open waters of Green Bay and Lake Michigan.

Total Estimated Number of Annual Respondents: 200.

Total Estimated Number of Annual Responses: 600.

Estimated Completion Time per Response: 10 minutes on average.

Total Estimated Number of Annual Burden Hours: 100.

Respondent's Obligation: Voluntary.

Frequency of Collection: Occur each time they hunt the open waters of Green Bay and/or Lake Michigan.

Total Estimated Annual Nonhour Burden Cost: None.

An agency may not conduct or sponsor, nor is a person required to respond to, a collection of information unless it displays a currently valid OMB control number. The authority for this

action is the PRA (44 U.S.C. 3501 *et seq.*).

Luke Fara,

Biologist, Mid-Continent Region, U.S. Geological Survey.

BILLING CODE 4338–11–P

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

[223A2100DD/AAKC001030/
AOA501010.999900]

Land Acquisitions; Central Council of Tlingit and Haida Indian Tribes of Alaska, Alaska

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: The Assistant Secretary—Indian Affairs made a final determination to acquire in trust 787 square feet, more or less, of land known as the Vavalis Parcel located in the City of Juneau, Alaska, (Site) for the Central Council of Tlingit and Haida Indian Tribes, (Tribe) to support tribal self-determination and for other purposes.

DATES: This final determination was made on November 17, 2022.

FOR FURTHER INFORMATION CONTACT: Trina Locke, Acting Director, Office of Trust Services, Bureau of Indian Affairs, MS–4620 MIB, 1849 C Street NW, Washington, DC 20240, trina.locke@bia.gov, (202) 617–0610.

SUPPLEMENTARY INFORMATION: On the date listed in the **DATES** section of this notice, the Assistant Secretary—Indian Affairs made a final agency determination to acquire the Site, consisting of 787 square feet, more or less, in trust for the Tribe under the authority of the Indian Reorganization Act of June 18, 1934, 25 U.S.C. 5108.

The Assistant Secretary—Indian Affairs, on behalf of the Secretary of the Interior, will immediately acquire title to the Site in the name of the United States of America in trust for Tribe upon fulfillment of all Departmental requirements. The 787 square feet, more or less, are described as follows:

Legal Description

Lot 15, Block 5, U.S. Survey No. 4694, Alaska, Addition to the Townsite of Juneau, Alaska, Juneau Indian Village, as accepted by the Chief, Division of Engineering, for the Director on July 22, 1964, containing 787 square feet. Said lot is further shown on the Retracement and Dependent Resurvey officially filed on Feb. 2, 2012, and on a Record of Survey, Plat No. 2018–40, Juneau Recording District, Alaska.

Authority: This notice is published in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 Departmental Manual 8.1, and is published to comply with the requirements of 25 CFR 151.12(c)(2)(ii) that notice of the decision to acquire land in trust be promptly provided in the **Federal Register**.

Bryan Newland,

Assistant Secretary—Indian Affairs.

DEPARTMENT OF THE INTERIOR

Bureau of Ocean Energy Management

[Docket No. BOEM–2020–0018]

Alaska Outer Continental Shelf, Cook Inlet Planning Area, Oil and Gas Lease Sale 258

AGENCY: Bureau of Ocean Energy Management (BOEM), Interior.

ACTION: Notice of Availability of a Record of Decision.

SUMMARY: BOEM announces the availability of the Record of Decision (ROD) for the Cook Inlet Outer Continental Shelf (OCS) Oil and Gas Lease Sale 258. This ROD identifies the selected alternative for Lease Sale 258, which is analyzed in the Alaska OCS: Cook Inlet Planning Area Oil and Gas Lease Sale 258 in the Cook Inlet, Alaska; Final Environmental Impact Statement (FEIS) (OCS/EIS EA BOEM 2022–061). The ROD and associated information are available on BOEM’s website at <https://www.boem.gov/ak258>.

FOR FURTHER INFORMATION CONTACT: Sharon Randall, Bureau of Ocean Energy Management, Alaska Regional Office, 3801 Centerpoint Drive, Suite 500, Anchorage, Alaska 99503, 907–334–5235.

SUPPLEMENTARY INFORMATION: BOEM is required to hold Lease Sale 258 on or before December 31, 2022, pursuant to the Inflation Reduction Act of 2022 (IRA, Pub. L. 117–169), signed into law on August 16, 2022. The Cook Inlet Lease Sale Area is located offshore of the State of Alaska in the northern portion of the Federal waters of Cook Inlet and is comprised of 224 OCS blocks. BOEM evaluated five alternatives and several sub-alternatives in the Lease Sale 258 FEIS. While BOEM has no discretion in whether to hold Lease Sale 258, BOEM issued the Lease Sale 258 FEIS and is issuing the ROD in accordance with its normal

leasing process to the fullest extent practicable.

After careful consideration, the Department of the Interior (DOI) has selected the Preferred Alternative in the Lease Sale 258 FEIS. The Preferred Alternative combines the two critical habitat exclusion alternatives and three mitigation alternatives: Alternative 3A (Beluga Whale Critical Habitat Exclusion), Alternative 3C (Beluga Whale Nearshore Feeding Areas Mitigation), Alternative 4A (Northern Sea Otter Critical Habitat Exclusion), Alternative 4B (Northern Sea Otter Critical Habitat Mitigation), and Alternative 5 (Gillnet Fishery Mitigation).

The Preferred Alternative will offer for lease 193 unleased OCS blocks (approximately 387,771 hectares (ha) or 958,202 acres). The Preferred Alternative excludes the 17 OCS blocks wholly or partially overlapping beluga whale and northern sea otter critical habitats. The Preferred Alternative also applies additional mitigation measures to reduce potential impacts to beluga whales and their critical habitat and feeding areas, sea otters and their critical habitat, and the gillnet fishery. Each of these mitigations will be implemented through lease stipulations to applicable leases. The selection of the Preferred Alternative includes the following exclusions and mitigation measures, described as alternatives in the FEIS:

Beluga Whale Critical Habitat Exclusion (Alternative 3A)

This exclusion applies to the 10 OCS blocks that overlap with the “Area 2” beluga whale critical habitat at the northern tip of the proposed sale area analyzed in the Lease Sale 258 FEIS. These OCS blocks will not be offered for lease and represent approximately 0.85 percent of the total area of the beluga whale critical habitat.

Beluga Whale Nearshore Feeding Areas Mitigation (Alternative 3C)

This mitigation measure creates temporal restrictions for on-lease seismic survey activities within the Lease Sale Area. On all 193 OCS blocks being offered for lease, no on-lease marine seismic surveys will be conducted between November 1 and April 1, when beluga whales are most likely to be present and distributed across the Lease Sale Area. The Protection of Beluga Whales Stipulation will be included on all leases issued as a result of Lease Sale 258.

Additionally, for blocks located within 10 miles of major anadromous streams, lessees will not conduct on-

lease marine seismic surveys between July 1 and September 30, when beluga whales are migrating to and from their summer feeding areas. The Protection of Beluga Whale Nearshore Feeding Areas Stipulation will be included on any leases issued for blocks located within 10 miles of major anadromous streams.

Northern Sea Otter Critical Habitat Exclusion (Alternative 4A)

This exclusion applies to the 7 OCS blocks that overlap with the northern sea otter southwest Alaska distinct population segment (SW DPS) critical habitat within the proposed sale area analyzed in the Lease Sale 258 FEIS. These OCS blocks will not be offered for lease.

Northern Sea Otter Critical Habitat Mitigation (Alternative 4B)

This mitigation measure prohibits lessees from discharging drilling fluids and cuttings and conducting seafloor disturbing activities (including anchoring and placement of bottom-founded structures) within 1,000 meters of areas designated as northern sea otter critical habitat. The Protection of Northern Sea Otter SW DPS Critical Habitat Stipulation will be included on any leases issued on the 7 OCS blocks within 1,000 meters of northern sea otter critical habitat.

Gillnet Fishery Mitigation (Alternative 5)

This mitigation measure applies to the 97 OCS blocks (whole or partial) located north of Anchor Point within the Lease Sale Area to reduce the potential for conflicts with the drift gillnet fishery. Lessees are prohibited from conducting on-lease seismic surveys during the drift gillnetting season as designated by the Alaska Department of Fish and Game (ADF&G) (approximately mid-June to mid-August). In addition, lessees are advised that the Cook Inlet drift gillnet fishery typically operates on Mondays and Thursdays during the drift gillnetting season as designated by the ADF&G. Lessees are required to notify the United Cook Inlet Drift Association (UCIDA) of any temporary or permanent structures planned during the drift gillnetting season. Lessees are encouraged to coordinate with the UCIDA to avoid conflicts. The Protection of Gillnet Fishery Stipulation will be included on any leases issued for these blocks.

Each of these Alternatives will be implemented through exclusions or lease stipulations, which would apply to all or some of the OCS blocks offered for lease. For each of the lease stipulations described above, lessees
