I. Background

Under the Medicare program, eligible beneficiaries may receive covered services in a critical access hospital (CAH), provided that certain requirements are met by the CAH.

Sections 1820(c)(2) and 1820(e) of the Social Security Act (the Act), establish statutory authority for states and the Secretary of the Department of Health and Human Services (the Secretary) to determine criteria for facilities seeking designation as a CAH. Regulations concerning provider agreements are at 42 CFR part 489 and those pertaining to activities relating to the survey and certification of facilities are at 42 CFR part 488. The regulations at 42 CFR part 485, subpart F specify the conditions that a CAH must meet to participate in the Medicare program, the scope of covered services, and the conditions for Medicare payment for CAHs.

Generally, to enter into an agreement, a CAH must first be certified by a state survey agency as complying with the applicable conditions or requirements set forth in part 485 of our regulations. Thereafter, the CAH is subject to regular surveys by a state survey agency to determine whether it continues to meet these requirements.

However, there is an alternative to surveys by state agencies. Section 1865(a)(1) of the Act states that if a provider entity demonstrates through accreditation by an approved national accrediting organization (AO) that all applicable Medicare conditions are met or exceeded, we will deem those provider entities as having met the requirements for that entity. Accreditation by an AO is voluntary and is not required for Medicare participation.

If an AO is recognized by the Centers for Medicare & Medicaid Services (CMS) as having standards for accreditation that meet or exceed Medicare requirements, any provider entity accredited by the national accrediting body's approved program would be deemed to meet the Medicare conditions. A national AO applying for approval of its accreditation program under part 488, subpart A, must provide us with reasonable assurance that the AO requires the accredited provider entities to meet requirements that are at least as stringent as the Medicare conditions. Our regulations concerning the approval of AO are set forth at § 488.5.

The Center for Improvement in Healthcare Quality (CIHQ) has submitted an initial application for CMS-approval of its CAH accreditation program.

II. Approval of Accreditation Organizations

Section 1865(a)(2) of the Act and our regulations at § 488.5 require that our findings concerning review and approval of a national AO's

requirements consider, among other factors, the applying AO's requirements for accreditation; survey procedures; resources for conducting required surveys; capacity to furnish information for use in enforcement activities; monitoring procedures for provider entities found not in compliance with the conditions or requirements; and ability to provide CMS with the necessary data for validation.

Section 1865(a)(3)(A) of the Act further requires that we publish, within 60 days of receipt of an organization's complete application, a notice identifying the national accrediting body making the request, describing the nature of the request, and providing at least a 30-day public comment period. We have 210 days from the receipt of a complete application to publish notice of approval or denial of the application.

The purpose of this proposed notice is to inform the public of CIHQ's initial request for approval of its CAH accreditation program. This notice also solicits public comment on whether the CIHQ's requirements meet or exceed the Medicare conditions of participation (CoPs) for CAHs.

III. Evaluation of Deeming Authority Request

CIHQ submitted all the necessary materials to enable us to make a determination concerning its request for initial approval of its CAH accreditation program. This application was determined to be complete on October 31, 2022. Under 1865(a)(2) of the Act and our regulations at § 488.5 (Application and re-application procedures for national AO), our review and evaluation of the CIHQ will be conducted in accordance with, but not necessarily limited to, the following factors:

- The equivalency of the CIHQ's standards for hospitals as compared with CMS' CAH CoPs.
- The CIHQ's survey process to determine the following:
 - ++ The composition of the survey team, surveyor qualifications, and the ability of the organization to provide continuing surveyor training.
 - ++ The comparability of the CIHQ's processes to those of state agencies, including survey frequency, and the ability to investigate and respond appropriately to complaints against accredited facilities.

++ CIHQ's processes and procedures for monitoring a CAH found out of compliance with CIHQ's program requirements. These monitoring procedures are used only when the CIHQ identifies noncompliance. If noncompliance is identified through

validation reviews or complaint surveys, the state survey agency monitors corrections as specified at § 488.9.

++ CIHQ’s capacity to report deficiencies to the surveyed facilities and respond to the facility’s plan of correction in a timely manner.

++ CIHQ’s capacity to provide CMS with electronic data and reports necessary for effective validation and assessment of the organization’s survey process.

++ The adequacy of the CIHQ’s staff and other resources, and its financial viability.

++ CIHQ’s capacity to adequately fund required surveys.

++ CIHQ’s policies with respect to whether surveys are announced or unannounced, to assure that surveys are unannounced.

++ CIHQ’s policies and procedures to avoid conflicts of interest, including the appearance of conflicts of interest, involving individuals who conduct surveys or participate in accreditation decisions.

++ CIHQ’s agreement to provide CMS with a copy of the most current accreditation survey together with any other information related to the survey as we may require (including corrective action plans).
