

understood, and the impact of collection requirements on respondents can be properly assessed. The Bureau of Labor Statistics (BLS) is soliciting comments concerning the proposed reinstatement with change of the “Contingent Worker Supplement (CWS) to the Current Population Survey (CPS)” to be conducted in July 2023. A copy of the proposed information collection request (ICR) can be obtained by contacting the individual listed below in the addresses section of this notice.

DATES: Written comments must be submitted to the office listed in the Addresses section of this notice on or before February 21, 2023.

ADDRESSES: Send comments to Erin Good, BLS Clearance Officer, Division of Management Systems, Bureau of Labor Statistics, Room G225, 2 Massachusetts Avenue NE, Washington, DC 20212. Written comments also may be transmitted by email to BLS_PRA_Public@bls.gov.

SUPPLEMENTARY INFORMATION:

I. Background

The purpose of this request for review is for the Bureau of Labor Statistics (BLS) to obtain clearance for a reinstatement with change for the Contingent Worker Supplement (CWS) to the Current Population Survey (CPS), which was last conducted in May 2017. The proposed CWS questions focus on contingent workers—those who do not expect their jobs to last or who report that their jobs are temporary—and workers in alternative employment arrangements, such as independent contractors, on-call workers, temporary help agency workers, and workers provided by contract firms.

Because this supplement is part of the CPS, the same detailed demographic information collected in the CPS will be available on respondents to the supplement. Comparisons will be possible across characteristics such as sex, race and ethnicity, age, and educational attainment of the respondent.

The CWS will provide information on the number and characteristics of workers in contingent jobs and alternative employment arrangements. Although the CWS was fielded 5 times from 1995 to 2005 and then in May 2017, there have been no comparable and reliable statistics in recent years to show how the number and characteristics of these workers are changing over time. The July 2023 CWS

will allow researchers and policy makers to evaluate how the number and characteristics of these workers has evolved. Policy makers also can use these data to inform the design of regulations for different types of workers.

BLS is proposing to add new questions and remove outdated questions to the CWS. New questions on task-based and app-based work are designed to provide insight into additional work arrangements like digital labor platform work. (This new content replaces the 2017 items on electronically-mediated employment.) The 2023 supplement will also ask about work arrangements on second jobs for multiple jobholders. Our data users noted the absence of information about second jobs as a particular shortcoming of prior supplements.

II. Current Action

Office of Management and Budget clearance is being sought for the CPS Contingent Worker Supplement to the CPS. A reinstatement with change of this previously approved collection, for which approval has expired, is needed to provide the Nation with timely information about contingent and alternative work arrangements.

III. Desired Focus of Comments

The Bureau of Labor Statistics is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

Title of Collection: Contingent Worker Supplement (CWS) to the Current Population Survey (CPS).

OMB Number: 1220–0153.

Type of Review: Reinstatement, with change.

Affected Public: Households.

Total Respondents: 47,000.

Frequency: Once.

Total Responses: 47,000.

Average Time per Response: 6 minutes.

Estimated Total Burden Hours: 4,700 hours.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they also will become a matter of public record.

Signed at Washington, DC, on December 16, 2022.

II. Discussion

The VBWR, NRC License No. DPR-1, and EVESR, NRC License No. DR-10, are licensed as nuclear power reactors under part 50 of title 10 of the *Code of Federal Regulations* (10 CFR), “Domestic Licensing of Production and Utilization Facilities.” The reactors are located at the GEH Vallecitos Nuclear Center (VNC) in Alameda County, California. The VBWR is considered to have permanently ceased operations on September 9, 1965, upon issuance of a possession-only license by NRC. Likewise, EVESR was considered permanently shut-down upon issuance of its possession-only license on April 15, 1970. The spent nuclear fuel from each reactor has been permanently removed from the VNC site.

The regulations in 10 CFR 50.82, “Termination of license,” govern the decommissioning of nuclear reactor facilities licensed by the NRC. Documents equivalent to decommissioning plans for the VBWR and EVESR were submitted to the NRC

on March 21, 1991 (ADAMS Accession Nos. ML20021A155 and ML20021A144, respectively). Paragraph (a)(4)(i) of 10 CFR 50.82, “Termination of license,” states that a Post-Shutdown Decommissioning Activities Report (PSDAR) shall be submitted prior to or within 2 years following permanent cessation of operations. However, since the decommissioning plans for the VBWR and EVESR were submitted before the regulations in 10 CFR 50.82 were first promulgated in 1996, the licensee was exempted from submitting PSDARs. The first paragraph of 10 CFR 50.82 describes that decommissioning plans submitted before the effective date of the rule, August 28, 1996 (61 FR 39278), are considered to be the PSDAR submittals for those reactors.

However, on September 21, 2022, as supplemented on November 22, 2022 (ADAMS Package Accession No. ML22326A351), GEH submitted a LPSDAR, for the VBWR and EVESR. A PSDAR is a description of the planned decommissioning activities along with a schedule for their accomplishment, a discussion that provides the reasons for concluding that the environmental impacts associated with site-specific decommissioning activities will be bounded by appropriate previously issued environmental impact statements, and a site-specific decommissioning cost estimate. Although not required to submit PSDARs for the VBWR and EVESR because of the previously submitted decommissioning plans, GEH prepared a LPSDAR according to the requirements of 10 CFR 50.82(a)(4)(i) and the NRC’s guidance for PSDARs in Regulatory Guide 1.185, Revision 1, “Standard Format and Content for Post-Shutdown Decommissioning Activities Report,” (ADAMS Accession No. ML13140A038) and submitted to the NRC on September 21, 2022. This was done to demonstrate how GEH would comply with the requirements of 10 CFR 50.82(a)(6) and 10 CFR 50.82(a)(7) which do apply to the decommissioning of the VBWR and EVESR. The requirements of 10 CFR 50.82(a)(6) and 10 CFR 50.82(a)(7) restrict the decommissioning activities that can be performed and require GEH to notify NRC of any changes to the decommissioning activities that are inconsistent with those described in the PSDAR.

While the requirements of a PSDAR submittal do not apply to the LPSDAR submittal for the VBWR and EVESR, including the requirements for NRC to notice receipt of the PSDAR, make it available for public comment, and to hold a public meeting in the vicinity of

the site, NRC is noticing receipt of the LPSDAR and making it available for public comment to enhance transparency and provide for public participation in our regulatory activities in accordance with NRC's approach to open government. While NRC will not be holding a public meeting in conjunction with this LPSDAR submittal, there will be public meetings held when GEH submits a License Termination Plan (LTP) for the VBWR by September 8, 2023, and by April 15, 2028, for the EVESR in accordance with 10 CFR 50.82(a)(9)(i) which requires LTPs to be submitted at least 2 years before termination of the license, and 10 CFR 50.82(a)(3) which requires that power reactor decommissioning be complete within 60 years of the permanent cessation of operations. An LTP must include a site characterization, identification of remaining dismantlement activities, plans for site remediation and the final radiation survey, an updated site-specific estimate of remaining decommissioning costs, a supplement to the environmental report describing any new information or significant environmental change associated with the proposed license termination activities, and identification of any parts of the site that were released for use before approval of the LTP.

III. Request for Comment

The VBWR and EVESR LPSDAR is available in ADAMS under Package Accession No. ML22264A324. The NRC is requesting public comments on the LPSDAR for the VBWR and EVESR by April 24, 2023. The NRC will review the LPSDAR to the requirements of a PSDAR and send a letter to GEH with the results of our evaluation, and the consideration of any public comments.

Dated: December 20, 2022.

For the Nuclear Regulatory Commission.

Shaun M. Anderson,

Chief, Reactor Decommissioning Branch, Division of Decommissioning, Uranium Recovery, and Waste Programs, Office of Nuclear Material Safety and Safeguards.

SUPPLEMENTARY INFORMATION:

(1) PBGC is proposing to update the Official Addresses, the citation to the Contesting Records Procedures section, and to clarify the Policies and Practices for Retention and Disposal of Records section.

PBGC is updating the Official Address to reflect PBGC's new headquarters location. When PBGC reviewed and revised its system of records notices in 2018, it inadvertently dropped the citation to its regulations that explain the process to contest information contained in records maintained by PBGC. PBGC is adding the citation to 29 CFR 4902.5 to the Contesting Records Procedures section of this SORN. Additionally, upon review, it was noticed that the Routine Uses section contained a typographical error. PBGC is amending the Privacy Act citation, changing it from 5 U.S.C. 522a(b) to 5 U.S.C. 552a(b).

PBGC is also clarifying the procedures outlined in Policies and Practices for Retention and Disposal of Records in accordance with NARA (44 U.S.C. 3301, *et seq.*). Finally, PBGC is updating the citation to the last time PBGC published this SORN.

(2) PBGC is proposing to amend the purpose of the system, categories of records contained in the system, amend the record source categories, amend one routine use, and add one routine use to PBGC-6: Plan Participant and Beneficiary Data.

PBGC is proposing the following revisions to PBGC-6: Plan Participant and Beneficiary Data (last published at 83 FR 6256 (February 13, 2018)): Amend the purpose of the system of records; categories of records contained in the system; amend the record source categories; amend one routine use; and add one new routine use.

PBGC is proposing to amend the purpose of the system of records to include "providing routine customer service; verifying the identity of participants, alternate payees, beneficiaries, spouses and authorized agents," which will permit PBGC to use
