

the worker's representative, and other designated parties.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection, and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend the approval of the information collection requirements contained in the Benzene Standard. The agency is requesting an adjustment decrease of 44,172 burden hours (from 158,770 hours to 114,598 hours). The decrease is due to a reduction in the number of workers exposed above the action level going from 104,093 workers to 69,742 workers. Also, there was an \$981,553 decrease in cost under Item 13 from \$11,940,431 to \$10,958,878. There was a 15 percent increase in medical care services which increased medical exams from \$177 to \$204 for workers. Also, there was an increase in the number of workers receiving medical examinations.

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.
