

Amendment 53 to the Snapper Grouper FMP

Amendment 53 would establish a rebuilding plan for the South Atlantic gag based on the most recent stock assessment (SEDAR 71) indicating the stock is overfished and experiencing overfishing. The Amendment also includes modifications to the South Atlantic gag acceptable biological catch, annual catch limit, sector allocations, and commercial and recreational management measures. Catch limits are being adjusted in response to the latest stock assessment. Modifications to South Atlantic black grouper recreational management measures are also being considered in the amendment due to identification issues between the species.
