

The *Report and Order* substitutes channel 22 for channel 7 at Great Falls, Montana. According to the Petitioner, it has received many complaints from viewers unable to receive a reliable signal on VHF channel 7, and the Commission has recognized that VHF channels have certain characteristics that pose challenges for their use in providing digital television service. The Engineering Statement provided with the Petition confirmed that the proposed channel 22 contour would continue to reach virtually all of the population within the Station's current service area and fully cover the city of Great Falls. An analysis using the Commission's *TVStudy* software tool indicates that KRTV's move from channel 7 to channel 22 is predicted to create a small area where 554 persons are predicted to lose service. The loss area, however, is partially overlapped by the noise limited contour of other Scripps owned CBS affiliated stations. Once those other sources of CBS programming are factored into the loss analysis, the new loss area that would be created by the proposed channel substitution would contain only 255 persons, which is a level of service loss the Commission considers to be *de minimis*. Concurrence from the Canadian government was required and has been obtained.

This is a synopsis of the Commission's *Report and Order*, MB Docket No. 22-117; RM-11923; DA 22-1231, adopted November 29, 2022, and released November 29, 2022.
