

- Information gathered will be used only internally for general service improvement and program management purposes and is not intended for release outside of the agency;

- Information gathered will not be used for the purpose of substantially informing influential policy decisions; and

- Information gathered will yield qualitative information; the collections will not be designed or expected to yield statistically reliable results or used as though the results are generalizable to the population of study.

Feedback collected under this generic clearance provides useful information, but it does not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: the target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential non-response bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior to fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

As a general matter, information collections will not result in any new system of records containing privacy information and will not ask questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private.

The information collection will be used in the same manner as the current information collection.

AmeriCorps also seeks to continue using the currently approved information collection until the revised information collection is approved by OMB. The currently approved information collection is due to expire on February 28, 2023.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including

whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose, or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information. All written comments will be available for public inspection on [regulations.gov](https://www.regulations.gov).

Associate Director of Policy.

BILLING CODE 6050-28-P

DEPARTMENT OF DEFENSE

Office of the Secretary

Notice of Availability of Uniform National Discharge Standards (UNDS) for Vessels of the Armed Forces—Phase III Batch Two

AGENCY: Office of the Under Secretary of Defense for Acquisition and Sustainment, Department of Defense (DoD).

ACTION: Notice of availability.

SUMMARY: DoD has developed internal regulations on the design, construction, installation, and use of marine pollution control devices (MCPDs) to meet performance standards for 11 discharges incidental to the normal operation of a vessel of the Armed Forces into the navigable waters of the United States, the territorial seas, and the contiguous zone, and is making them publicly available.

FOR FURTHER INFORMATION CONTACT:

Mike Pletke; Chief of Naval Operations (N45), 2000 Navy Pentagon (Rm 2D253), Washington DC 20350-2000; (703) 695-5184; michael.r.pletke.civ@us.navy.mil.

SUPPLEMENTARY INFORMATION: Section 312 of the Clean Water Act (CWA), as amended by Section 325 of the National Defense Authorization Act of 1996, requires the Environmental Protection Agency (EPA) and DoD to develop Uniform National Discharge Standards (UNDS) to control certain discharges incidental to the normal operation of a vessel of the Armed Forces. The EPA and DoD have already issued required joint rules (64 FR 25126 (May 10, 1999) and 85 FR 43465 (July 17, 2020), 40 CFR part 1700). This notice announces that DoD is also issuing a DoD-only internal regulation as part of this requirement. Although issued by DoD alone, the regulation will apply (by agreement with the Department of Homeland Security) not only to DoD but also to the U.S. Coast Guard (at all times, including when it is a Service in the Department of Homeland Security).

Section 312(n)(4) of the CWA requires DoD, in consultation with EPA and the Secretary of the Department in which the U.S. Coast Guard is operating, to promulgate regulations governing the design, construction, installation, and use of MPCDs necessary to meet the discharge performance standards established in the EPA-DoD joint rules. The DoD internal regulations are issued under the authority of the Secretary in DoD Manual 4715.06, Volume 4, "Regulations on Vessels Owned or Operated by the Department of Defense: Discharges Incidental to Normal Operations," which can be found at: https://www.esd.whs.mil/Portals/54/Documents/DD/issuances/dodm/471506_vol4.PDF. There is no notice and comment requirement for the DoD internal regulations because they are internal to the Department and to the Coast Guard and otherwise exempt by 5 U.S.C. 553 (a)(1) and (2). Furthermore, EPA and DoD provided for notice and comment during the promulgation of the joint EPA-DoD regulations, as required by the CWA.

Because EPA and DoD determined that the joint EPA-DoD regulations, once finalized, would have federalism implications, they had several rounds of consultations with state and local governments during the promulgation of the joint EPA-DoD regulations, as described in the final rule at 85 FR 43465, July 17, 2020.

Dated: January 4, 2023.

Kayyonne T. Marston,

Alternate OSD Federal Register Liaison
Officer, Department of Defense.
