

media. Exposure to lead is one of the country's most pressing environmental and human health concerns. Americans can be exposed to lead via lead-based paint, drinking water, soil, and air emissions. Ongoing exposures to lead in the environment present a health risk to many people nationwide, especially in communities overburdened by pollution, which are disproportionately communities of color and low-income communities. Some of these exposures result from non-compliance with laws designed to reduce or eliminate exposure and enforcement can play a key role in addressing this non-compliance. EPA's Lead Strategy (<https://www.epa.gov/lead/final-strategy-reduce-lead-exposures-and-disparities-us-communities>, at Objective E) sets forth a comprehensive strategy to implement its wide range of authorities to address noncompliance, obtain cleanups, deter future violations, and mitigate harm using available resources. EPA seeks comment on whether, in addition to the existing Lead strategy, we should identify our lead enforcement commitments as a new NECI.

2. *Addressing Coal Combustion Residuals (CCR)*. EPA has on-going efforts to address noncompliance with RCRA regulations for the safe disposal of CCRs, commonly known as coal ash, from coal-fired power plants. There are approximately 300 CCR facilities nationwide, comprised of 772 CCR units (239 CCR landfills and 533 CCR surface impoundments). However, these facilities are not evenly distributed throughout the country; approximately 45% are located in eight states (IA, IL, KY, MI, MO, NC, and TX). Most CCR impoundments and landfills are unlined, allowing metals and other contaminants to leach into groundwater. The impact or harm to human health and environment from CCR noncompliance is significant and can occur through direct exposure to impoundment wastewater or consumption of contaminated drinking water. EPA seeks comment on the idea of a CCR-focused NECI to reduce noncompliance in this sector.

C. Public Comments

The EPA will consider all comments to these proposals as it moves forward in the decision-making process. Additionally, the public is invited to propose any other areas for consideration as NECI's. Information in support of this Notice of Public Comment is available online at: <http://www.epa.gov/enforcement/national-compliance-initiatives>.

VI. Can the deadline for comments be extended?

EPA must receive public comments on potential NECI's by March 13, 2023 in order to complete consideration of public comment, issue a selection memo, and begin development of implementation strategies prior to the beginning of the FY 2023–2027 cycle.

Acting Assistant Administrator, Office of Enforcement and Compliance Assurance.
