SUPPLEMENTARY INFORMATION: The Privacy Act of 1974 (5 U.S.C. 552a), as amended, embodies fair information practice principles in a statutory framework governing the means by which Federal agencies collect, maintain, use, and disseminate individuals' personal information. The Privacy Act applies to records about individuals that are maintained in a "system of records." A system of records is a group of any records under the control of a Federal agency from which information is retrieved by the name of an individual or by a number, symbol or another identifier assigned to the individual. The Privacy Act requires each Federal agency to publish in the **Federal Register** a System of Records Notice (SORN) identifying and describing each system of records the agency maintains, the purposes for which the Agency uses the Personally Identifiable Information (PII) in the system, the routine uses for which the Agency discloses such information outside the Agency, and how individuals can exercise their rights related to their PII information.

¹⁴³ 17 CFR 200.30-3(a)(12).

The modified Privacy Act system of records for titled, Government Contracting and Business Development (GCBD) System, (SBA 30) will be used by small business, SBA personnel and overseen by Office of Government Contracting and Business Development. Multiple SBA IT systems/applications are used to certify the participants on an SBA platform.

Certify.sba.gov is a certification management system used for elements of initial certification and continuing eligibility functions for the 8(a) Business Development program and for MPP. Its primary component is a custom developed application which includes an interface for small businesses to manage their eligibility documents and applications for various contracting programs, as well as workflows for SBA staff.

WOSB.Certify.sba.gov is a certification management system used for elements of initial certification and continuing eligibility functions for the WOSB Program. Its primary component is a custom developed application which includes an interface for small businesses to manage their eligibility documents and applications for various contracting programs, as well as workflows for SBA staff. HUBZone Certification Tracking System (HCTS) is a certification management system used for elements of initial certification and continuing eligibility for the HUBZone program. *veterans.certify.sba.gov* is a certification management system used for elements of initial application and continuing eligibility functions for the VOSB program. Its primary component is a custom developed application which includes an interface for small businesses to manage their eligibility documents and applications for various contracting programs, as well as workflows for SBA staff. To be eligible for certification in SBA's Veteran Small Business Certification Program, an applicant's small business must be owned and controlled by one or more qualifying veterans. A "qualifying veteran" is a veteran as defined by 38 U.S.C. 101(2) or a service-disabled veteran. The modification of SBA 30 will not have any undue impact on the

privacy of individuals and its use is compatible with collection.
