Erie Boulevard Hydro Power, L.P.; Hudson River—Black River Regulating District; Notice of Petitions for Declaratory Order

Take notice that on January 25, 2023, pursuant to Rule 207(a)(2) of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, Hudson River—Black River Regulating District (District) filed a petition for declaratory order in Project Nos. 2318-053 and 12252-035 requesting the Commission declare that Erie Boulevard Hydro Power, L.P. (Erie Boulevard), the licensee for the E.J. West Project No. 2318, must continue to maintain a necessary property interest in the head created, owned, and controlled by the District as part of the Great Sacandaga Lake Project No. 12252 (GSL Project), as more fully explained in the petition.

On January 27, 2023, pursuant to Rule 207(a)(2) of the Commission's Rules of Practice and Procedure, Erie Boulevard filed a petition for declaratory order in Project Nos. 2318-054 and 12252-036 requesting the Commission declare that the Federal Power Act preempts the regulatory authority of the District to assess charges under state law to Erie for releases from the District's GSL Project and that the District is precluded from materially changing its operation of the GSL Project by diverting releases around Erie Boulevard's E.J. West Project No. 2318 or significantly modifying the

timing of GSL Project releases without prior Commission authorization, as more fully explained in the petition.

Any person desiring to intervene or to protest these filings must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the petitioners.

Any person wishing to comment on the petitions may do so. The Commission encourages electronic submission of protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426. Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Hazardous Waste Combustors (40 CFR part 63, subpart EEE) apply to the following types of new and existing combustion units that burn hazardous waste: incinerators, cement kilns, lightweight aggregate kilns, solid fuel boilers, liquid fuel boilers, and hydrochloric acid production facilities. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

Form Numbers: None.

Respondents/affected entities: Owners and operators of hazardous waste combustors.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart EEE).

Estimated number of respondents: 170 (total).

Frequency of response: Initially, occasionally, semiannually, and quarterly.

Total estimated burden: 59,100 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$9,690,000 (per year), which includes \$2,770,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: The decrease in burden from the most-recently approved ICR is due to an adjustment(s). The adjustment decrease is due to an overall decrease in the number of respondents. This ICR updates the number of facilities and HWC units based on correspondence with EPA regions.

There is a decrease in O&M costs from the most-recently approved ICR due to the decreased number of respondents and a correction to the number of respondents incurring costs for COMs/opacity monitoring. The decrease is offset somewhat by a correction to the

respondents incurring O&M costs for correlation testing. The number of new sources is expected to remain the same as estimated for the previous ICR; therefore, there are no changes to the capital costs.

Director, Regulatory Support Division.
