

methylmethcathinone (2-(methylamino)-1-(4-methylphenyl)propan-1-one; mephedrone), 3-methylmethcathinone is controlled under schedule I of the CSA. As such, additional permanent controls will not be needed if 3-methylmethcathinone is placed in Schedule II of the Convention on Psychotropic Substances.

FDA, on behalf of the Secretary of HHS, invites interested persons to submit comments on the notifications from the United Nations concerning these drug substances. FDA, in cooperation with the National Institute on Drug Abuse, will consider the comments on behalf of HHS in evaluating the WHO scheduling recommendations. Then, under section 201(d)(2)(B) of the CSA, HHS will recommend to the Secretary of State what position the United States should take when voting on the recommendations for control of substances under the 1971 Convention at the CND meeting in March 2023.

Comments regarding the WHO recommendations for control of 2-methyl-AP-237, etazene, etonitazepine, and protonitazene under the 1961 Single Convention will also be forwarded to the relevant Agencies for consideration in developing the U.S. position regarding narcotic substances at the CND meeting.
