II. Applications to Register New Uses

In July 2019, EPA's Office of Pesticide Program granted a number of amendments to add new uses and make other labeling changes to three existing sulfoxaflor products registered for use under FIFRA. Those amendments were challenged in the Ninth Circuit Court of Appeals. *Center for Food Safety v. Reagan*, 56 F.4th 648 (9th Cir. 2022). Petitioners in that case contended that EPA failed to provide notice and opportunity for comment under FIFRA section 3(c)(4) on the 2010 application for use of sulfoxaflor on citrus, cotton, cucurbits, soybean, and strawberry crops and, for uses registered in 2016, removal of restrictions limiting use to post-bloom applications on berries, canola, okra, ornamentals, pome fruit, potato, stone fruit, fruiting vegetables, nuts, succulent and dry beans; prohibiting use on crops grown for seed; prohibiting tank mixing; and removing a 12' on-field aerial buffer. The Court agreed with the Petitioners on this issue, requiring EPA to issue a new FIFRA section 3(c)(4) notice with an opportunity for comment on those uses. This notice is intended to address that part of the Court's mandate.

This unit provides the following information about the applications received and on which comments are being sought: The EPA File Symbol or Registration number(s) and EPA docket ID number for the application; The name and address of the applicant; The name of the active ingredient, product

type and proposed uses; and the division to contact for that application. Additional information about the application may also be available in the docket.

- *EPA File Symbol:* 62719–631, 62719–623, 62719–625. *Docket ID Number:* EPA–HQ–OPP–2010–0889. *Applicant:* Corteva Agriscience, 9330 Zionsville Rd., Indianapolis, IN 46268. *Active Ingredient:* Sulfoxaflor. *Product Type:* Insecticide. *Proposed Use:* After conducting an extensive risk analysis, including review of one of the agency's largest datasets on the effects of a pesticide on bees, the Agency restored the 2015 vacated uses in 2019 on: citrus, cotton, cucurbits, soybeans, strawberry. The Agency also removed the following 2016 mitigations in 2019: A 12 foot on-field aerial buffer; prohibition for use on crops grown for seed; removal of the tank mix restriction; removal of restrictions limiting use to post-bloom applications on berries, canola, okra, ornamentals, pome fruit, potato, stone fruit, fruiting vegetables, nuts, succulent and dry beans. *Contact:* RD.
