## NUCLEAR REGULATORY COMMISSION

### 10 CFR Chapter I

[NRC-2023-0052]

#### Consideration of Current Operating Issues and Licensing Actions in License Renewal

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Draft regulatory issue summary; request for comment.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) is seeking public comment on a draft regulatory issue summary (RIS) concerning how the NRC considers current operation of a facility in the NRC's license renewal review under NRC regulations. NRC regulations identify the technical information that must be submitted in a license renewal application (LRA) to enable the NRC staff to make a determination that the license may be renewed. In part, an applicant is required to demonstrate that the effects of aging on the functionality of structures and components subject to an aging management review will be adequately managed; the consideration of recent operating experience is an important aspect of that demonstration. In addition, as required by NRC regulations, license renewal applicants need to update their applications with new information related to any current licensing basis changes that could impact aging management of structures and components.

**DATES:** Submit comments by May 8, 2023. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

**ADDRESSES:** You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website:

##### II. Background

The NRC is issuing this regulatory issue summary (RIS) to provide information to applicants and licensees on how the NRC considers current operation of a facility in the NRC's license renewal review under part 54 of title 10 of the *Code of Federal Regulations* (10 CFR), "Requirements for Renewal of Operating Licenses for Nuclear Power Plants." Revision 1 of RIS 2014-06, "Consideration of Current Operating Issues and Licensing Actions in License Renewal," provides additional clarity on NRC staff expectations of how operating experience that occurs in all stages of the license renewal process should be considered in an applicant's demonstration of the adequacy of proposed aging management activities. This RIS requires no action or written response on the part of any addressee.

The NRC issues RISs to communicate with stakeholders on a broad range of matters. It provides guidance to applicants and licensees on the scope and detail of information that should be provided in licensing applications to facilitate NRC review.

As noted in 83 FR 20858 (May 8, 2018), this document is being published in the "Proposed Rules" section of the **Federal Register** to comply with publication requirements under 10 CFR chapter I.

### III. Proposed Action

The NRC is requesting public comments on the draft RIS. All comments that are to receive consideration in the final RIS must be submitted electronically or in writing as indicated in the **ADDRESSES** section of this document. The NRC staff will make a final determination regarding issuance of the RIS after it considers any public comments received in response to this request.

Dated: March 1, 2023.
