The specific take numbers are outlined in the permit application but include both lethal and non-lethal take of CV spring-run Chinook salmon, non-lethal take of CCV steelhead, and non-lethal take of sDPS of green sturgeon.

This proposed scientific enhancement effort is expected to provide valuable information for the most southern extent of CV spring-run Chinook salmon, CCV steelhead, and the sDPS of green sturgeon to the SJRRP and the California Department of Fish and Wildlife's comprehensive monitoring plan for steelhead in the Central Valley, respectively. The proposed monitoring by USFWS is consistent with recommendations and objectives outlined in NMFS' Recovery Plan for Central Valley salmonids and the sDPS of green sturgeon. See the application for Permit 20571-2R for greater details on the scientific enhancement proposal and related methodology.
