SUPPLEMENTARY INFORMATION:

Comments: As required by 5 CFR 1320.8(d), comments on the information collection activities as part of this study were solicited through the publication of a 60-Day Notice in the **Federal Register** on November 29, 2022, at 87 FR 73337. We received one comment from the Federation of American Societies for Experimental Biology (dated January 30, 2023), which was supportive of this information collection. NSF is proceeding with the request to OMB.

Title of Collection: NSF Evaluation of Anti-Harassment Term and Condition.

OMB Control No.: 3145–New.

Abstract: The purpose of the National Science Foundation’s (NSF) Office of Equity and Civil Rights (OECR) Awardee Survey Form is to collect awardee feedback and input on NSF’s awardee term and condition that requires NSF to be notified: (1) of any findings/determinations regarding the PI or co-PI that demonstrate a violation of awardee codes of conduct, policies, regulations or statutes relating to sexual harassment, other forms of harassment, or sexual assault; or (2) if the awardee places the PI, or co-PI on administrative leave or imposes an administrative action relating to a finding or investigation of a violation of awardee policies, codes of conduct, statutes or regulations relating to sexual harassment, other forms of harassment, or sexual assault. This survey will assist NSF OECR in assessing how the term and condition has been implemented at awardee organizations and whether improvements or adjustments to the term and condition are either necessary or appropriate to maximize its efficacy and ease of use. This survey will allow us to reach out directly to NSF awardees, to include Authorized Organizational Representatives, Title IX

coordinators and researchers, to better understand their respective experiences with the term and condition and to gather their comments for adjustments or enhancements to it.

Respondents: Representatives from NSF Awardee Institutions.

Estimated Number of Annual Respondents: 100.

Burden on the Public: Two methods of information collection will be used—interviews and a survey. Interviews will be conducted with no more than 70 participants, and the estimated time to complete the interview is 45 minutes based on the study team’s experience with other similar studies. The total burden for the interviews is 52.5 hours.

Survey responses will be requested from approximately 2,000, with an estimated response rate of 44%. The estimated time to complete the survey is 15 minutes, based on the study team’s experience with other similar studies. The total burden for the survey collection is 220 hours.

Dated: March 2, 2023.

Reports Clearance Officer, National Science Foundation.
