

inspired, solution-oriented research that has directly impacted people’s everyday lives. At every stage, investments across this spectrum have been deeply intertwined.

NSF’s Directorate for Technology, Innovation, and Partnerships (TIP) doubles down on the agency’s commitment to support use-inspired research and the translation of research results to the market and society. In doing so, the new directorate strengthens the intense interplay between foundational and use-inspired work, enhancing the full cycle of discovery and innovation. This is best illustrated through the programs within the TIP Directorate portfolio—America’s Seed Fund, Convergence Accelerator, Innovation Corps (I-Corps), Partnerships for Innovation, Pathways to Enable Open-Source Ecosystems, and Regional Innovation Engines—all reflect and represent the various phases of the technology transition/translation spectrum, while accentuating the core theme of use-inspired and solution-oriented research.

Due to the specialized nature of these programs, it is necessary for the TIP Directorate to refine its reviewer recruitment efforts and reach out to individuals that have the adequate and appropriate combinations of expertise and experience to serve as proposal reviewers for these programs. To recruit cognizant reviewers that have the set of unique skills and credentials—ones that

meet and align well with the needs of these programs, the NSF TIP Directorate requests the Office of Management and Budget (OMB) approval of a customizable, directorate-wide *Reviewer Request Form* to collect information that is germane and bespoke to each program within the TIP Directorate.

There are two parts to the Form. The first part is similar to the agency-wide Reviewer Request Form (NSF 428A), in that information pertaining to the individual’s name, contact information, demographics, education level, and professional experience will be asked. The second part will vary based on the program, as some programs in TIP are more topically-driven, and/or theme-focused than others. The information collected on the second part encompasses, but is not limited to, the following areas: type of employing institutions, areas of expertise, provision of the individual’s LinkedIn or professional web page, and potential conflict of interests. Such data collection will enable the Program Directors to better assess whether the combination of experience, expertise, and skills of the interested individuals are adequate and well-suited to help the programs to evaluate proposals through the merit review criteria as set forth by the agency and the National Science Board. (For more information on NSF merit review principles and criteria, please consult the NSF Proposal &

Award Policies & Procedures Guides (PAPPG), Chapter III.A.)

Following standard OMB requirements, NSF will require OMB approval in advance and provide OMB with a copy of the form containing these questions and/or data fields. Data collected will be used strictly for reviewer recruiting purposes. The data collection burden to the individuals will be limited to no more than 10 minutes of the respondents’ time in each instance.

Respondents: The respondents generally have the education and/or experience level commensurate to a university assistant professor.

Estimated Number of Annual Respondents: 5,000.

Burden on the Public: The respondents of the *NSF TIP Reviewer Request Form*, albeit with varying education level and professional experience, are generally doctorate degree holders. According to a study conducted by U.S. Bureau of Labor Statistics in 2021, the median income for doctorate degree holders was around \$99,268 (“Education pays, 2021,” Career Outlook, U.S. Bureau of Labor Statistics, May 2022). Using that as the basis for the calculation—divide that median income by the number of standard annual work hours (2,080), which calculates to approximately \$48 per hour, the annualized estimate of cost to the respondents is around \$40,000 per year.

Respondent type	Number of respondents	Burden hours per respondent	Average hourly rate	Estimated annual cost
Pls	5,000	0.167	\$48	\$40,000
Total	835	40,000
