

available on www.regulations.gov and www.reginfo.gov.

The public may also examine publicly available documents at DOL–MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, VA 22202–5452. Sign in at the receptionist’s desk on the 4th floor via the East elevator. Before visiting MSHA in person, call 202–693–9455 to make an appointment, in keeping with the Department of Labor’s COVID–19 policy. Special health precautions may be required.

Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

III. Current Actions

This information collection request concerns provisions for Radiation Sampling and Exposure Records. MSHA has updated the data with respect to the number of respondents, responses, burden hours, and burden costs supporting this information collection request from the previous information collection request.

Type of Review: Extension, without change, of a currently approved collection.

Agency: Mine Safety and Health Administration.

OMB Number: 1219–0003.

Affected Public: Business or other for-profit.

Number of Respondents: 4.

Frequency: On occasion.

Number of Responses: 404.

Annual Burden Hours: 402 hours.

Annual Respondent or Recordkeeper Cost: \$20.

MSHA Form: MSHA Form 4000–9, Record of Individual Exposure to Radon Daughters.

Comments submitted in response to this notice will be summarized in the request for Office of Management and Budget approval of the proposed information collection request; they will become a matter of public record and will be available at <https://www.reginfo.gov>.

Song-ae Aromie Noe,

Certifying Officer, Mine Safety and Health Administration.

[OMB Control No. 1219–0048]

Proposed Extension of Information Collection; Respirator Program Records

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Request for public comments.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed collections of information in accordance with the Paperwork Reduction Act of 1995. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments on the information collection for Respirator Program Records.

DATES: All comments must be received by MSHA’s Office of Standards, Regulations, and Variances on or before May 22, 2023.

ADDRESSES: Comments concerning the information collection requirements of this notice may be sent by any of the methods listed below. Please note that late, untimely filed comments will not be considered.

- *Federal E-Rulemaking Portal:* <https://www.regulations.gov>. Follow the on-line instructions for submitting comments for docket number MSHA–2022–0056.

- *Mail/Hand Delivery:* DOL–MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, VA 22202–5452. Before visiting MSHA in person, call 202–693–9455 to make an appointment, in keeping with the Department of Labor’s COVID–19 policy. Special health precautions may be required.

MSHA will post all comments as well as any attachments, except for information submitted and marked as confidential, in the docket at <https://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances, MSHA, at MSHA.information.collections@dol.gov

(email); (202) 693–9440 (voice); or (202) 693–9441 (facsimile). These are not toll-free numbers. These are not toll-free numbers.

SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal or other mines.

30 CFR 56.5005 (Surface metal and Nonmetal Mines—Control of exposure to airborne contaminants) and 57.5005 (Underground Metal and Nonmetal Mines—Control of exposure to airborne contaminants) require, whenever respiratory equipment is used, that metal and nonmetal mine operators institute a respirator program governing selection, maintenance, training, fitting, supervision, cleaning, and use of respirators. These requirements seek to control miner exposure to harmful airborne contaminants by using engineering controls to prevent contamination and vent or dilute the contaminated air. However, where accepted engineering control measures have not been developed or when necessary by the nature of work involved (for example, while establishing controls or occasional entry into hazardous atmospheres to perform maintenance or investigation), employees may work for reasonable periods of time in concentrations of airborne contaminants exceeding permissible levels if they are protected by appropriate respiratory protective equipment.

30 CFR 56.5005 and 57.5005 incorporate, by reference, requirements of the American National Standards Institute’s Practices for Respiratory Protection (ANSI Z88.2–1969). These incorporated requirements mandate that miners who must wear respirators are fit-tested to the respirators that they will use. Certain records are also required to be kept in connection with respirators, including: written standard operating procedures governing the selection and use of respirators; fit-test results; and records of emergency respirators inspection.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information

collection. MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information has practical utility;
- Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

The information collection request will be available on <https://www.regulations.gov>. MSHA cautions the commenter against providing any information in the submission that should not be publicly disclosed. Full comments, including personal information provided, will be made available on <www.regulations.gov> and <www.reginfo.gov>.

The public may also examine publicly available documents at DOL–MSHA, 201 12th South, Suite 4E401, Arlington, VA 22202–5452. Sign in at the receptionist's desk on the 4th floor via the East elevator. Before visiting MSHA in person, call 202–693–9455 to make an appointment, in keeping with the Department of Labor's COVID–19 policy. Special health precautions may be required.

Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

III. Current Actions

This request for collection of information contains provisions for Respirator Program Records. MSHA has updated the data with respect to the number of respondents, responses, burden hours, and burden costs supporting this information collection request.

Type of Review: Revision of a currently approved collection.

Agency: Mine Safety and Health Administration.

OMB Number: 1219–0048.

Affected Public: Business or other for-profit.

Number of Respondents: 350.

Frequency: On occasion.

Number of Responses: 6,300.

Annual Burden Hours: 3,588 hours.
Annual Respondent or Recordkeeper Cost: \$0. The estimated annual cost burden to respondents or recordkeeper decreased from \$140,000 to \$0 due to a modification to what costs contribute to recordkeeping and information collection burdens.

Comments submitted in response to this notice will be summarized and included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Song-ae Aromie Noe,

Certifying Officer, Mine Safety and Health Administration.

SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor (Secretary) to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal and metal and nonmetal mines.

This Information Collection Request concerns recordkeeping requirements related to: (1) Inspection of compressed-air receivers and other unfired pressure vessels; (2) Boilers; (3) Safety defects; examination; correction and records; and (4) Examination of working places in surface and underground metal and nonmetal mines.

30 CFR 56.13015 (Surface Metal and Nonmetal Mines—Inspection of compressed-air receivers and other unfired pressure vessels) and 57.13015 (Underground Metal and Nonmetal Mines—Inspection of compressed-air receivers and other unfired pressure vessels) require that compressed-air receivers and other unfired pressure vessels must be inspected by inspectors holding a valid National Board Commission and in accordance with the applicable chapters of the National Board Inspection Code, a Manual for Boiler and Pressure Vessels Inspectors, 1979. Safety defects found on compressed-air receivers and other
