National Agricultural Statistics Service

Title: Field Crops Objective Yield.

OMB Control Number: 0535-0088.

Summary of Collection: The primary objective of the National Agricultural Statistics Service (NASS) is to collect, prepare and issue State and national estimates of crop and livestock production, prices, and disposition as well as economic statistics, farm numbers, land values, on-farm pesticide usage, pest crop management practices, as well as the Census of Agriculture. The Objective Yield Surveys objectively predict yields for corn, cotton, potatoes, soybeans, wheat, citrus, almonds, walnuts, and hazelnuts. Sample fields are randomly selected for these crops, plots are laid out, and periodic counts and measurements are taken and then used to forecast production during the growing season. Production forecasts are published in USDA crop reports.

The fruit and nut objective yield surveys are conducted under cooperative agreements with several State Departments of Agriculture. The individual States will be reimbursing NASS for the costs associated with these additional surveys. The surveys will include: California citrus, almonds and walnuts; Florida citrus; and Oregon hazelnuts.

Need and Use of the Information: NASS will collect information on sample fields of, corn, cotton, potatoes, soybeans, and winter wheat. The information will be used by USDA to anticipate loan receipts and pricing of loan stocks for grains. Farmers and businesses use the production estimates in marketing decisions to evaluate expected prices and to determine when to sell. The fruit and nut data will be used by the State Departments of Agriculture and commodity marketing boards to make informed decisions concerning the stocks and marketing of these commodities.

Description of Respondents: Farms and businesses or other for-profit.

Number of Respondents: 13,550.

Frequency of Responses: Reporting: Monthly; Annually.

Total Burden Hours: 4,410.
