I. Procedural Matters

A. Final Regulatory Flexibility Analysis

1. No Final Regulatory Flexibility Analysis is required under the Regulatory Flexibility Act, 5 U.S.C. 604, because the amendments adopted herein pertain to agency organization, procedure, and practice, or because there is "good cause" to conclude that notice and comment and delayed effectiveness are unnecessary for non-substantive, editorial revisions.

B. Final Paperwork Reduction Act of 1995 Analysis

2. This document does not contain new or modified information collection requirements subject to the Paperwork Reduction Act of 1995, Public Law 104–13. In addition, therefore, it does not contain any new or modified information collection burden for small business concerns with fewer than 25 employees, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198 see 44 U.S.C. 3506(c)(4).

C. Congressional Review Act

3. The Commission has determined, and the Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget, concurs that these rules are non-major under the Congressional Review Act, 5 U.S.C. 804(2). The Commission has sent a copy of this Order to Congress and the Government Accountability office, pursuant to 5 U.S.C. 801(a)(1)(A).

II. Introduction

4. In this Order, the Federal Communications Commission (the Commission or FCC) takes action to modernize and streamline its operations by making changes to its International Bureau as well as certain parts of the Consumer and Governmental Affairs Bureau (CGB) and Office of Managing Director (OMD). In this Order, we amend the Commission's rules to reflect these new organizational structures and describe the functions being realigned. We find it appropriate to make these organizational changes to strengthen the efficiency and effectiveness of the Commission's activities and operations. In addition, we make other non-substantive rule revisions to reflect changes in Commission procedures and to modernize certain references to the Chairperson of the FCC.

5. First, to better support United States leadership in the emerging space economy, to promote long-term technical capacity within the FCC to address non-federal satellite programs and policies, and to improve coordination with other agencies on issues related to space, we conclude that the proper dispatch of our business and the public interest will be served by reorganizing the International Bureau into: (1) a Space Bureau to handle policy and licensing matters related to satellite communications and other in-space activities under the Commission's jurisdiction; and (2) an Office of International Affairs to handle issues involving foreign and international regulatory authorities as well as

international telecommunications and submarine cable licensing. We find these organizational changes will provide the FCC with the updated structure it needs to provide essential international leadership in the ever-evolving global telecommunications marketplace.

6. In addition, to improve the efficiency of the agency's operations, bolster the Commission's records and document management systems, and enhance public access to critical public records, the Commission has concluded that the proper dispatch of its business and the public interest will be served by taking the following actions:

a. Transfer the Reference Information Center (RIC) from CGB to the Office of the Secretary in OMD;

b. Merge the records management program in OMD's Performance Evaluation and Records Management (PERM) group with OMD's Information Technology (IT) group;

c. Rename PERM to be the Performance and Program Management (PPM) group in OMD; and

d. Transfer the Enterprise Acquisition Center (EAC) in the Front Office of OMD to a new stand-alone group in OMD.

III. Discussion

A. Establishment of Space Bureau and Office of International Affairs and Elimination of International Bureau

7. Under this reorganization, the Space Bureau will promote a competitive and innovative global telecommunications marketplace via space services. The Space Bureau will do so by undertaking policy analysis and rulemakings as well as authorizing satellite systems for the purpose of facilitating the deployment of satellite services, streamlining regulatory processes and maximizing flexibility for operators to meet customer needs, and fostering the efficient use of spectrum and orbital resources. The Space Bureau will also serve as a focal point for coordination with other U.S. government agencies on matters of space policy and governance, and will support the Office of International Affairs for meetings with other countries, international organizations and foreign government officials that involve space policy matters.

8. The Office of International Affairs will develop international telecommunications policy to facilitate competition in the provision of international services and further U.S. strategic objectives in global telecommunications policy. The Office of International Affairs will be responsible for policy development and

licensing for international telecommunications facilities and services, submarine cables, and advising and making recommendations to the Commission on foreign ownership issues. The Office of International Affairs will also have responsibility for all intergovernmental leadership, negotiation, and representational functions. The Office of International Affairs will oversee and coordinate the FCC's global participation in international organizations and multilateral conferences, regional organizations, cross-border negotiations, and international standard setting efforts. The Office of International Affairs will also oversee bilateral meetings with other countries and foreign government officials.

9. To further these objectives and functions, the Space Bureau and the Office of International Affairs will utilize professional staff from within the Commission's current International Bureau as well as other parts of the Commission as needed.

10. To accomplish this organizational change, the following actions are taken.

- The Commission will eliminate the International Bureau and generally reallocate the International Bureau's authorities and functions between the Space Bureau and Office of International Affairs.

- The Space Bureau will consist of three divisions: the Satellite Programs and Policy Division, the Satellite Licensing Division, and the Earth Station Licensing Division. These new divisions will have responsibilities and authorities for the analysis and functions currently housed within the Satellite Division of the International Bureau, including its branches, the Policy Branch, the Engineering Branch, and the System Analysis Branch.

- The Office of International Affairs will consist of the Global Strategy and Negotiation Division and the Telecommunications and Analysis Division. The Global Strategy and Negotiation Division will be moved to the Office of International Affairs from the International Bureau as currently organized, including each of its existing Branches and will maintain its current responsibilities and authorities. Similarly, the Telecommunications and Analysis Division will be moved to the Office of International Affairs from the International Bureau as currently organized and will maintain its current responsibilities and authorities.

- The International Bureau's front office staff, including management and administrative staff within the front office, will be reassigned to the Space Bureau or the Office of International

Affairs depending upon their roles and responsibilities.

11. Furthermore, to implement these changes, we delegate the authority to the Space Bureau and the Office of International Affairs to make any necessary edits and updates to the Commission's rules and any forms, policies, web addresses, systems, or other documents associated with the International Bureau to ensure all relevant references and procedures are updated consistent with the provisions of this Order, including any changes needed for renaming the International Bureau Filing System (IBFS) to the International Communications Filing System (ICFS). Any previous delegation to the International Bureau also is transferred to the Satellite Bureau and/or the Office of International Affairs, as appropriate.

B. Reorganization of the Consumer and Governmental Affairs Bureau and the Office of Managing Director

12. The key objectives of this reorganization are to strengthen the effectiveness and efficiency of the Commission's operations and management of prominent public-facing functions as well as vital internal information management operations.

1. Transfer the Reference Information Center to the Office of the Secretary

13. The RIC serves as the FCC custodian for designated public records, with functions including intake of records, file maintenance, reference services, retrieval of records, and retirement or archiving of files in accordance with record retention schedules approved by the National Archives and Records Administration (NARA). The RIC is also currently responsible for managing the Commission's Electronic Comment Filing System (ECFS) and scanning and uploading documents filed on paper into ECFS as needed.

14. Section 0.11 of the Commission's Rules instructs OMD to "direct agency efforts to improve management effectiveness, operational efficiency, employee productivity, and service to the public." Pursuant to Section 0.11(b), the Secretary of the Commission is designated the "official custodian of the Commission's documents." The Office of the Secretary in OMD oversees prompt and orderly processing of all matters presented to the Commission and supports the Commission decision-making process to ensure efficient operations. To preserve the integrity of the Commission's records, the Office of the Secretary supervises the receipt and distribution of documents filed by the

public through electronic and paper filing systems. In addition, the Office of the Secretary gives effective legal notice of Commission decisions by publishing them in the **Federal Register** and the FCC Record. The Secretary serves as legal custodian of the Commission's official records and publishes official documents to the agency's website.

15. After this reorganization, the Office of the Secretary will be responsible for the management of ECFS in addition to the document custodial functions it performs today. Since the Office of the Secretary currently manages both electronic documents (EDOCS) and the Electronic Commission's Lifecycle Agenda Tracking System (ECLAS), the addition of ECFS to its list of responsibilities will create further efficiencies in the management and planning of these important internal and public facing systems.

16. In addition to giving it responsibility over ECFS, we transfer administration and management of the RIC from CGB to the Office of the Secretary. By taking this action, we locate the Commission's public records reference functions with the internal organization that currently carries out other reference functions, including management of the FCC Library.

17. We also update the Commission's rules to reflect the revised procedures for the public to access the RIC. Due to the updated security protocols associated with the FCC's new headquarters, all visitors to the RIC will be required to have a scheduled appointment in advance of accessing the facility.

2. Transfer of Records Management From PERM to IT

18. In OMD, the PERM group has responsibility for the administration and implementation of the FCC's agency-wide records management program, as opposed to the RIC which oversees an important subset of publicly available FCC records. PERM's records management program develops policies, procedures and processes to facilitate retrieval, selection, retention, and disposition of record and non-record materials and coordinates the records management program throughout the FCC and with NARA. The FCC's Agency Records Officer in PERM is responsible for complying with and updating the records schedules set by NARA.

19. As discussed at the outset of this Order, with our actions today, we merge and relocate the records management program and functions into OMD's IT group. The IT group is currently responsible for providing support and

services for the information technology component of records management. Thus, merging the implementation and information technology components of these programs within the IT group will facilitate internal coordination and create additional efficiencies by eliminating unnecessary redundant oversight and management.

Furthermore, integrating records management considerations into the development and implementation of the FCC's information systems will facilitate the records retention and disposal process, and strengthen compliance with records schedules.

20. As a result of this transfer, PERM will be renamed as the Performance and Program Management (PPM) group in OMD. The PPM group will retain all of PERM's previous functions with the exception of records management as described above.

3. Establish a Stand-Alone Enterprise Acquisition Center in OMD

21. To reflect the Commission's focus on strengthening all aspects of its procurement process, we conclude that the proper, efficient and effective dispatch of our business will be served by moving the EAC staff from the OMD Front Office and establishing EAC as a stand-alone group within OMD dedicated to the FCC's procurement activities. By establishing this group as a stand-alone entity, it is the Commission's objective to continue to improve efficiencies, independence, accountability and performance in the management of its acquisition strategy, planning and procurement activities.

C. Other Rule Changes

22. In addition to the changes otherwise identified herein, we update the Commission's rules by replacing the references to the agency's Chairman with references instead to the Chairperson throughout and revise other rules that refer to "chairman" to instead specify "chairperson."

23. We also make minor modifications to reflect slight changes to procedures related to Privacy Act requests, to update rule 0.460 concerning requests for inspection and copies of records which are routinely available for public inspection to reflect current procedures, and to remove from the Code of Federal Regulations a display of approved information collections that is no longer updated and has become obsolete. We also eliminate certain Notes to rules and instead move the language from the Note into a subsection of the relevant rule to conform to the publishing conventions of the National Archives

and Records Administration's Office of the Federal Register.

IV. Ordering Clauses

24. Accordingly, *it is ordered that*, pursuant to sections 4, 5(b), 5(c), and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154, 155(b), 155(c), 303(r), this Order *is adopted*.

25. *It is further ordered* that Parts 0, 1, 19, 20, 25, 27, 43, 52, 54, 63, 64, 67, 68, 73, 74, 76, 79, 80, 87, 90, 95, 97, and 101 of the Commission rules *are amended* as set forth in the Appendix.

26. *It is further ordered* that this Order *will become effective* on the date this Order is published in the **Federal Register** following the appropriate clearance in accordance with the Consolidated Appropriations Act, Public Law 117–103, at Division E, Title VI, § 608, 136 Stat. 287 (2022).

27. *It is further ordered*, that pursuant to section 801(a)(1)(A) of the Congressional Review Act, 5 U.S.C. 801(a)(1)(A), the Commission *shall send* a copy of this Order to Congress and to the Government Accountability Office.

■ 49. Revise § 1.1202 to read as follows:

§ 1.1202 Definitions.

For the purposes of this subpart, the following definitions apply:

(a) *Presentation.* A communication directed to the merits or outcome of a proceeding, including any attachments to a written communication or documents shown in connection with an oral presentation directed to the merits or outcome of a proceeding. Excluded from this term are communications which are

inadvertently or casually made, inquiries concerning compliance with procedural requirements if the procedural matter is not an area of controversy in the proceeding, statements made by decisionmakers that are limited to providing publicly available information about pending proceedings, and inquiries relating solely to the status of a proceeding, including inquiries as to the approximate time that action in a proceeding may be taken. However, a status inquiry which states or implies a view as to the merits or outcome of the proceeding or a preference for a particular party, which states why timing is important to a particular party or indicates a view as to the date by which a proceeding should be resolved, or which otherwise is intended to address the merits or outcome or to influence the timing of a proceeding is a presentation. A communication expressing concern about administrative delay or expressing concern that a proceeding be resolved expeditiously will be treated as a permissible status inquiry so long as no reason is given as to why the proceeding should be expedited other than the need to resolve administrative delay, no view is expressed as to the merits or outcome of the proceeding, and no view is expressed as to a date by which the proceeding should be resolved. A presentation by a party in a restricted proceeding not designated for hearing requesting action by a particular date or giving reasons that a proceeding should be expedited other than the need to avoid administrative delay (and responsive presentations by other parties) may be made on an ex parte basis subject to the provisions of § 1.1204(a)(11).

(b) *Ex parte presentation.* Any presentation which:

(1) If written (including electronic submissions transmitted in the form of texts, such as for internet electronic mail), is not served on the parties to the proceeding; or

(2) If oral, is made without advance notice to the parties and without opportunity for them to be present.

(c) *Decision-making personnel.* Any member, officer, or employee of the Commission, or, in the case of a Joint Board, its members or their staffs, who is or may reasonably be expected to be involved in formulating a decision, rule, or order in a proceeding. Any person who has been made a party to a proceeding or who otherwise has been excluded from the decisional process shall not be treated as a decision-maker with respect to that proceeding. Thus, any person designated as part of a

separate trial staff shall not be considered a decision-making person in the designated proceeding. Unseparated Bureau or Office staff shall be considered decision-making personnel with respect to decisions, rules, and orders in which their Bureau or Office participates in enacting, preparing, or reviewing. Commission staff serving as the case manager in a hearing proceeding in which the Commission is the presiding officer shall be considered decision-making personnel with respect to that hearing proceeding.

(d) *Party.* Unless otherwise ordered by the Commission, the following persons are parties:

(1)(i) In a proceeding not designated for hearing, any person who files an application, waiver request, petition, motion, request for a declaratory ruling, or other filing seeking affirmative relief (including a Freedom of Information Act request), and any person (other than an individual viewer or listener filing comments regarding a pending broadcast application or members of Congress or their staffs or branches of the Federal Government or their staffs) filing a written submission referencing and regarding such pending filing which is served on the filer, or, in the case of an application, any person filing a mutually exclusive application;

(ii) Persons who file mutually exclusive applications for services that the Commission has announced will be subject to competitive bidding or lotteries shall not be deemed parties with respect to each others' applications merely because their applications are mutually exclusive. Therefore, such applicants may make presentations to the Commission about their own applications provided that no one has become a party with respect to their application by other means, e.g., by filing a petition or other opposition against the applicant or an associated waiver request, if the petition or opposition has been served on the applicant.

(iii) Individual listeners or viewers submitting comments regarding a pending broadcast application pursuant to § 1.1204(a)(8) will not become parties simply by service of the comments. The Media Bureau may, in its discretion, make such a commenter a party, if doing so would be conducive to the Commission's consideration of the application or would otherwise be appropriate.

(2) Any person who files a complaint or request to revoke a license or other authorization or for an order to show cause which shows that the complainant has served it on the subject of the complaint or which is a formal

complaint under 47 U.S.C. 208 and § 1.721 or 47 U.S.C. 255 and either § 6.21 or § 7.21 of this chapter, and the person who is the subject of such a complaint or request that shows service or is a formal complaint under 47 U.S.C. 208 and § 1.721 or 47 U.S.C. 255 and either § 6.21 or § 7.21 of this chapter;

(3) The subject of an order to show cause, hearing designation order, notice of apparent liability, or similar notice or order, or petition for such notice or order;

(4) In a proceeding designated for hearing, any person who has been given formal party status; and

(5) In an informal rulemaking proceeding conducted under section 553 of the Administrative Procedure Act (other than a proceeding for the allotment of a broadcast channel) or a proceeding before a Joint Board or before the Commission to consider the recommendation of a Joint Board, members of the general public after the issuance of a notice of proposed rulemaking or other order as provided under § 1.1206(a)(1) or (2).

(6) To be deemed a party, a person must make the relevant filing with the Secretary, the relevant Bureau or Office, or the Commission as a whole. Written submissions made only to the Chairperson or individual Commissioners will not confer party status.

(7) The fact that a person is deemed a party for purposes of this subpart does not constitute a determination that such person has satisfied any other legal or procedural requirements, such as the operative requirements for petitions to deny or requirements as to timeliness. Nor does it constitute a determination that such person has any other procedural rights, such as the right to intervene in hearing proceedings. The Commission or the staff may also determine in particular instances that persons who qualify as "parties" under this paragraph (d) should nevertheless not be deemed parties for purposes of this subpart.

(8) A member of Congress or his or her staff, or other agencies or branches of the federal government or their staffs will not become a party by service of a written submission regarding a pending proceeding that has not been designated for hearing unless the submission affirmatively seeks and warrants grant of party status.

(e) *Matter designated for hearing.* Any matter that has been designated for hearing before a presiding officer.

■ 59. Revise § 1.10001 to read as follows:

§ 1.10001 Definitions.

All other applications. We consider all other applications officially filed once you file the application in the International Communications Filing System (ICFS) and applicable filing fees are received and approved by the FCC, unless the application is determined to be fee-exempt. We determine your official filing date based on one of the following situations:

(1)(i) You file your Satellite Space Station Application or your Application for Earth Stations to Access a Non-U.S. Satellite Not Currently Authorized to Provide the Proposed Service in the Proposed Frequencies in the United States in ICFS.

(ii) Your official filing date is the date and time (to the millisecond) you file your application and receive a confirmation of filing and submission ID.

(2) You file all other applications in ICFS and then do one of the following:

(i)(A) Pay by online Automatic Clearing House (ACH) payment, online Visa, MasterCard, American Express, or Discover credit card payment, or wire transfer payment denominated in U.S. dollars and drawn on a United States financial institution and made payable to the Federal Communications Commission (through ICFS)

(B) Your official filing date is the date your online payment is approved. (Note: You will receive a remittance ID and an authorization number if your transaction is successful).

(ii)(A) Determine your application type is fee-exempt or your application qualifies for exemption to charges as provided in this part

(B) Your official filing date is the date you file in ICFS and receive a confirmation of filing and submission ID.

Application. A request for an earth or space station radio station license, an international cable landing license, or an international service authorization, or a request to amend a pending application or to modify or renew licenses or authorizations. The term also includes the other requests that may be filed in ICFS such as transfers of control and assignments of license applications, earth station registrations, and foreign carrier affiliation notifications.

Authorizations. Generally, a written document or oral statement issued by us giving authority to operate or provide service.

International Communications Filing System. The International Communications Filing System (ICFS) is a database, application filing system, and processing system for all International and Satellite services. ICFS supports electronic filing of many applications and related documents in the Space Bureau and Office of International Affairs, and provides public access to this information.

International services. All international services authorized under this part and parts 63 and 64 of this chapter.

Satellite services. All satellite services authorized under part 25 of this chapter.

Satellite Space Station Applications (other than DBS and DARS) and Applications for Earth Stations to Access a Non-U.S. Satellite Not Currently Authorized to Provide the Proposed Service in the Proposed Frequencies in the United States. We consider a Satellite Space Station application (other than DBS and DARS) and an Application for an Earth Station to Access a Non-U.S. Satellite Not Currently Authorized to Provide the Proposed Service in the Proposed Frequencies in the United States

officially filed the moment you file them through ICFS. The system tracks the date and time of filing (to the millisecond). For purposes of the queue discussed in § 25.158 of this chapter, we will base the order of the applications in the queue on the date and time the applications are filed, rather than the “Official Filing Date” as defined here.

Submission ID. The Submission ID is the confirmation number you receive from ICFS once you have successfully filed your application. It is also the number we use to match your filing to your payment.

Us. In this subpart, “us” refers to the Commission.

We. In this subpart, “we” refers to the Commission.

You. In this subpart, “you” refers to applicants, licensees, your representatives, or other entities authorized to provide services.

■ 60. Revise § 1.10005 to read as follows:

§ 1.10005 What is ICFS?

(a) The International Communications Filing System (ICFS) is a database, application filing system, and processing system for all International and Satellite Services. ICFS supports electronic filing of many applications and related documents in the Space Bureau and Office of International Affairs, and provides public access to this information.

(b) We maintain applications, notifications, correspondence, and other materials filed electronically with the Space Bureau and Office of International Affairs in ICFS.

■ 61. Revise § 1.10006 to read as follows:

§ 1.10006 Is electronic filing mandatory?

Electronic filing is mandatory for all applications for international and satellite services for which an International Communications Filing System (ICFS) form is available. Applications for which an electronic form is not available must be filed through the Electronic Comment Filing System (ECFS) in PDF format until new forms are introduced. See §§ 63.20 and 63.53 of this chapter. As each new ICFS form becomes available for electronic filing, the Commission will issue a public notice announcing the availability of the new form and the effective date of mandatory filing for this particular type of filing. As each new form becomes effective, manual filings will not be accepted by the Commission and the filings will be returned to the applicant without processing. Mandatory electronic filing requirements for applications for

international and satellite services are set forth in this part and parts 25, 63, and 64 of this chapter. A list of forms that are available for electronic filing can be found on the ICFS homepage. For information on electronic filing requirements, see §§ 1.1000 through 1.10018 and the ICFS homepage at <https://licensing.fcc.gov/icfs>.

■ 62. Amend § 1.10007 by revising paragraph (a) to read as follows:

§ 1.10007 What applications can I file electronically?

(a) For a complete list of applications or notifications that must be filed electronically, log in to the ICFS website at <http://licensing.fcc.gov/icfs>.

■ 64. Amend § 1.10009 by revising paragraphs (a)(2), (a)(3)(v), and (a)(4), the paragraph (b) heading, paragraphs (b)(1) and (2) and (4) and (5), (c) introductory text, (c)(2)(i), (d), (e)(1)(iii), (e)(2), (e)(3)(i), and (e)(4) and (5) to read as follows:

§ 1.10009 What are the steps for electronic filing?

(a) * * *

(2) In order to process your electronic application, you must have an FRN. You may obtain an FRN either directly from the Commission Registration System (CORES) at <https://www.fcc.gov/licensing-databases/online-filing>, or through ICFS as part of your filing process. If you need to know more about who needs an FRN, visit CORES at <https://www.fcc.gov/licensing-databases/online-filing>.

(3) * * *

(v) Payer, you are required to have and use an FRN when filing applications and/or paying fees through ICFS.

(4) We use your FRN to give you secured access to ICFS and to pre-fill the application you file.

(b) *Step 2: Register with ICFS.* (1) If you are already registered with ICFS, go to Step 3.

(2) In order to complete and file your electronic application, you must register in ICFS, located at <https://www.fcc.gov/icfs>.

(4) ICFS will issue you an account number as part of the registration process. You will create your own password.

(5) If you forget your password, send an email to the ICFS helpline at icfsinfo@fcc.gov or contact the helpline at (202) 418-2222 for assistance.

(c) Step 3: Log into ICFS, select the application you want to file, provide the required FRN(s) and password(s) and fill out your application. You must completely fill out forms and provide all requested information as provided in parts 1, 25, 63, and 64 of this chapter.

(2) * * *

(i) The referenced information is filed in ICFS.

(d) Step 4: File your application. If you file your application successfully through ICFS, a confirmation screen will appear showing you the date and time of your filing and your submission ID. Print this verification for your records as proof of online filing.

(e) * * *

(1) * * *

(iii) You can run a draft electronic submission of payment online form through ICFS, in association with a filed application, and the system will automatically enter your required fee on the form.

(2)(i) A complete FCC electronic submission of payment online form must accompany all fee payments. You must provide the FRN for both the applicant and the payer. You also must include your submission ID number on the electronic submission of payment online form in the box labeled “FCC Code 2.” In addition, for applications for transfer of control or assignment of license, call signs involved in the transaction must be entered into the “FCC Code 1” box on the FCC electronic submission of payment online form. (This may require the use of multiple rows on the electronic submission of payment online form for a single application where more than one call sign is involved.)

(ii) You can generate a pre-filled FCC electronic submission of payment online form from ICFS using your IB submission ID. For specific instructions on using ICFS to generate your FCC electronic submission of payment online form, go to the ICFS website (<http://licensing.fcc.gov/icfs>) and click on the “Getting Started” button.

(3) * * *

(i) Pay by credit card (through ICFS);

(4) You must electronically submit payment o within fourteen (14) calendar days of the date that you file your application in ICFS. If not, we will dismiss your application.

(5) For more information on fee payments, refer to Payment Instructions

found on the ICFS internet site at <http://licensing.fcc.gov/icfs>, under the Using ICFS link.

■ 65. Revise § 1.10010 to read as follows:

■ 66. Amend § 1.10011 by revising paragraph (a) to read as follows:

§ 1.10011 Who may sign applications?

(a) The Commission only accepts electronic applications. An electronic application is “signed” when there is an electronic signature. An electronic signature is the typed name of the person “signing” the application, which is then electronically transmitted via ICFS.

■ 67. Revise § 1.10012 to read as follows:

§ 1.10012 When can I file on ICFS?

■ a. Revising the second sentence of paragraph (a), the second sentence of

paragraph (b), and the first and third sentences of paragraph (c);
■ b. Revising paragraph (d); and
■ c. Removing the first sentence of paragraph (e) and the third sentence of paragraph (h)(2); and
■ d. Revising paragraphs (i) and (j) and the third sentence of paragraph (m) introductory text.

The revisions read as follows:

§ 73.702 Assignment and use of frequencies.

(a) * * * Six months prior to the start of each season, licensees and permittees shall by informal written request, submitted to the Commission electronically in the International Communications Filing System (ICFS), indicate for the season the frequency or frequencies desired for transmission to each zone or area of reception specified in the license or permit, the specific hours during which it desires to transmit to such zones or areas on each frequency, and the power, antenna gain, and antenna bearing it desires to use.

* * *

(b) * * * After receipt of such notification, the licensee or permittee shall, in writing, not later than two months before the start of the season in question, electronically inform the Commission in ICFS either that it plans to operate in accordance with the authorization which the Commission intends to issue, or that it plans to operate in another manner. * * *

(c) If after submitting the request required under the provisions of paragraph (a) of this section, but before receipt of the Commission's notification referred to in paragraph (b) of this section, the licensee or permittee submits a request for changes of its original request electronically in ICFS such requests will be accepted for consideration only if accompanied by statements showing good cause therefor and will be honored only if conditions permit. * * * If after the licensee or permittee submits the information required under the provisions of paragraph (b) of this section, but before the start of the season in question, the licensee or permittee submits electronically in ICFS a request for changes in its manner of operation for the season in question, the request will be accepted for consideration only if accompanied by statements showing good cause therefor and will be honored only if conditions permit. * * *

(d) The provisions of paragraphs (a), (b), and (c) of the section shall apply to licensees, to permittees operating under program test authority, and to permittees who anticipate applying for and receiving program test authority for

operation during the specified season. Permittees who during the process of construction wish to engage in equipment tests shall by informal written request, submitted to the Commission electronically in ICFS not less than 30 days before they desire to begin such testing, indicate the frequencies they desire to use for testing and the hours they desire to use those frequencies. No equipment testing shall occur until the Commission has authorized frequencies and hours for such testing. Such authorizations shall be only for one season, and if it is desired to continue equipment testing in a following season, new requests for frequencies and hours must be submitted at least 30 days before it is desired to begin testing in the following season.

(e) Within 14 days after the end of each season, a report shall be filed with the Commission electronically in ICFS by each licensee or permittee operating under program test authority who has been issued a seasonal schedule for that season. * * *

* * * * *

(h) * * *

(2) * * * Stations desiring to operate in this band must submit sufficient antenna performance information electronically in ICFS to ensure compliance with these restrictions.

* * *

* * * * *

(i) Frequencies requested for assignment must be as near as practicable to the optimum working frequency (unless otherwise justified) for the zone or area of reception for the period and path of transmission, and should be chosen so that a given frequency will provide the largest period of reliable transmission to the selected zone or area of reception. Moreover, at the zone or area of reception frequencies shall provide protection to the transmissions of other broadcasting stations which, in the opinion of the Commission, have priority of assignment.

(1) Requests for frequency-hours shall be accompanied by all pertinent technical data with reference to the frequencies and hours of operation, including calculated field strengths delivered to the zones or areas of reception.

(2) It is preferable that calculated field strengths delivered to zones or areas of reception be equal to or greater than those required by I.F.R.B. Technical Standards, Series A (and supplements thereto), in order for the I.F.R.B. to afford the notified assignment protection from interference.

Nevertheless, calculated field strengths less than those required by the I.F.R.B. standards for protection will be acceptable to the Commission. However, licensees should note that if such lesser field strengths are submitted no protection from interference will be provided by the I.F.R.B. if their technical examination of such notifications show incompatibilities with other notified assignments fully complying with I.F.R.B. technical standards.

(3) Licensees are permitted to engage in multiple operation as defined in § 73.701(d).

(4) Seasonal requests for frequency-hours will be only for transmissions to zones or areas of reception specified in the basic instrument of authorization. Changes in such zones or areas will be made only on separate application for modification of such instruments made electronically in ICFS.

(j) Not more than one frequency will be assigned for use at any one time for any one program transmission except in instances where a program is intended for reception in more than one zone or area of reception and the intended zones or areas cannot be served by a single frequency: Provided, however, That on a showing of good cause made electronically in ICFS a licensee may be authorized to operate on more than one frequency at any one time to transmit any one program to a single zone or area of reception.

(m) * * * If for a forthcoming season the total of the requests for daily frequency-hours of all licensees exceeds 100, all licensees will be notified and each licensee that makes an adequate showing electronically in ICFS that good cause exists for not having its requested number of frequency-hours reduced and that operation of its station without such reduction would be consistent with the public interest may be authorized the frequency-hours requested.

■ 141. Amend § 73.713 by revising the second sentence of paragraph (a) to read as follows:

§ 73.713 Program tests.

(a) * * * Such request shall be electronically filed with the FCC in the International Communications Filing System (ICFS) at least 10 days prior to the date on which it is desired to begin such operation. * * *

■ 142. Revise § 73.732 to read as follows:

§ 73.732 Authorizations.

Authorizations issued to international broadcasting stations by the Commission will be authorizations to permit the construction or use of a particular transmitting equipment combination and related antenna systems for international broadcasting, and to permit broadcasting to zones or areas of reception specified on the instrument of authorization. The authorizations will not specify the frequencies to be used or the hours of use. Requests for frequencies and hours of use will be made by electronic filing in the International Communications Filing System (ICFS) as provided in § 73.702. Seasonal schedules, when issued pursuant to the provisions of § 73.702, will become attachments to and part of the instrument of authorization, replacing any such prior attachments.

■ 143. Amend § 73.759 by revising the last sentence of paragraph (c)(2) to read as follows:

(g) Other changes, not specified above in this section, may be made at any time without the authority of the Commission: Provided, That the Commission shall be immediately notified electronically in ICFS thereof and such changes shall be shown in the next application for renewal of license.

■ 145. Amend § 73.762 by revising the second sentence of paragraph (b) and the first two sentences of paragraph (c) to read as follows:

§ 73.762 Time of operation.

(b) * * * However, in such cases, the FCC shall be immediately notified by electronic filing in the International

Communications Filing System (ICFS) of such limitation or discontinuance of operation and shall subsequently be notified by electronic filing in ICFS when the station resumes regular operation.

(c) In the event that causes beyond a licensee's control make it impossible to adhere to the seasonal schedule or to continue operating for a temporary period of more than 10 days, the station may not limit or discontinue operation until it requests and receives specific authority to do so from the FCC by electronic filing in ICFS. When the station subsequently resumes regular operation after such limited operation or discontinuance of operation, it shall notify the FCC in Washington, DC by electronic filing in ICFS. * * *

■ 146. Amend § 73.1212 by revising the second and fifth sentences of paragraph (k) to read as follows:
