Overview of This Information Collection

Title: Entry Summary.

OMB Number: 1651–0022.

Form Number: CBP Form 7501.

Current Actions: Revision.

Type of Review: Revision.

Affected Public: Importer, importer's agent for each import transaction.

Abstract: CBP Form 7501, *Entry Summary*, is used to identify merchandise entering the commerce of the United States, and to document the amount of duty and/or tax paid. CBP Form 7501 is submitted by the importer, or the importer's agent, for each import transaction. The data on this form is used by CBP as a record of the import transaction; to collect the proper duty, taxes, certifications, and enforcement information; and to provide data to the U.S. Census Bureau for statistical purposes. CBP Form 7501 must be filed within 10 working days from the time of entry of merchandise into the United States. Collection of the data on this form is authorized by 19 U.S.C. 1484 and provided for by 19 CFR 141.61 and 19 CFR 142.11. CBP Form 7501 and accompanying instructions can be found at: https://www.cbp.gov/newsroom/publications/forms?title_1=7501.

New Change:

CBP is proposing to add the following required data fields to Form 7501:

- For certain Harmonized Tariff Schedule (HTS) classifications of steel imports, the country where the steel used in the manufacture of the product was melted and poured; the country where the steel used in the manufacture of the product was melted and poured applies to the original location where the raw steel is first produced in a steel-making furnace in a liquid state; and then poured into its first solid shape.

- For certain HTS classifications of aluminum imports, the countries where the largest and second largest volume of primary aluminum used in the manufacture of the imported aluminum product was smelted; and the country where the aluminum used in the imported aluminum product was most recently cast. The fields requiring identification of the countries where the largest volume of primary aluminum used in the manufacture of the product was smelted applies to the country where the largest volume of new aluminum metal is produced from alumina (or aluminum oxide) by the electrolytic Hall-Héroult process. Importers may be required to report if primary aluminum from specific countries is used in the imported aluminum product, if required by law and/or Presidential Proclamation.¹

- Importers will be required to report on the Form 7501 the steel country of melt and pour and aluminum countries of smelt and cast for imports under those steel and aluminum HTS classifications subject to the Commerce Department's steel and aluminum import license applications, and where applicable, the Section 232 steel and aluminum measures.

These data fields will substantially align the Form 7501 reporting requirements with the Commerce Department's existing reporting requirements for steel melt and pour and aluminum smelt and cast countries for steel and aluminum import license applications under 19 CFR 360.103(c)(1) and 19 CFR 361.103(c)(1). The aluminum and steel license application information is used by the Commerce Department for monitoring of anticipated imports of certain aluminum and steel products into the United States. The Form 7501 data is used by CBP to determine, when imports are entered for consumption, the proper amount of duties, applicable fees, taxes, and imports subject to quota.

These data fields are also required to enforce the tariff rate quotas for imported steel and aluminum established by the following Presidential Proclamations under section 232 of the Trade Expansion Act of 1962, as amended: for products of the European Union, Proclamation 10327 of December 27, 2021 (87 FR 1, January 3, 2022) and Proclamation 10328 of December 27, 2021 (87 FR 11, January 3, 2022); for products of Japan (steel-only), Proclamation 10356 of March 31, 2022 (87 FR 19351, April 1, 2022); and for products of the United Kingdom, Proclamation 10405 of May 31, 2022 (87 FR 33583, June 3, 2022) and Proclamation 10406 of May 31, 2022 (87 FR 33591, June 3, 2022).
