

Abstract: The Annual Protection and Advocacy of Individual Rights (PAIR) Program Performance Report (Form RSA–509) will be used to analyze and evaluate the PAIR Program administered by eligible protection and advocacy (P&A) systems in states and the P&A serving the American Indian Consortium. These systems provide services to eligible individuals with disabilities to protect their legal and human rights. RSA uses the form to meet specific data collection requirements of Section 509(k) of the Rehabilitation Act of 1973 (Rehabilitation Act), as amended by Title IV of the Workforce Innovation and Opportunity Act (WIOA), 29 U.S.C. 794e(k), and its implementing Federal regulations at 34 CFR 381.32. The data reported by PAIR grantees using the form include demographic information about the individuals served, information describing the types of issues addressed through individual and systemic advocacy, and information about the results of these activities. PAIR grantees must report annually using the form that is due on or before December 30 each year.

The collection of information through Form RSA–509 is necessary for RSA to furnish the President and Congress with data on the provision of PAIR services, as required by sections 13(a) and 509(k) of the Rehabilitation Act. Data reported by PAIR grantees through the RSA–509 have also helped RSA to establish a sound basis for future funding requests. RSA also uses data from the form to evaluate the effectiveness of eligible systems within individual States and the PAIR serving the American Indian Consortium in meeting annual priorities and objectives, pursuant to section 13(b) of the Rehabilitation Act. Last, RSA has found the RSA–509 data useful in projecting trends in the provision of services from year to year.

Several respondents are private not-for-profit organizations. RSA included the respondents and the national organization that represents them (National Disability Rights Network (NDRN)) in the initial development of this collection of information in an effort to ensure that the information requested could be provided with minimal burden to the respondents.
