

leeway to allow requestors to add park/research-specific questions not in the PKQ. However, all questions must fit within the scope of the approved Topic Areas. The Social Science Program will continue to conduct necessary reviews and quality control before submitting each information collection request to OMB for expedited review and approval before the collection is administered.

The submission materials contain the request for continued flexibility in survey design within the bounds of the requirements and guidelines for individual collections leveraging this clearance. The NPS is requesting the following updates and revisions for this clearance. The previously approved 11 Topic Areas and subcategories were reorganized and expanded. A climate change subcategory was added under Topic Area 8: Environmental Health and Resource Management. Topic Area 10 was renamed Environmental Justice and expanded to have the following subcategories: Constraints and Barriers; Diversity, Equity, and Inclusion; Accessibility; and Traditional Ecological Knowledge. Finally, the PKQ was streamlined to remove redundant questions. It was also reorganized to accommodate changes to the Topic Areas. Questions were added to the new subcategories and to existing sections throughout the PKQ to include question variations principal investigators and NPS staff requested over the last three years.
