Census Bureau

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Household Pulse Survey

On February 14, 2023, the Department of Commerce received clearance from the Office of Management and Budget (OMB) in accordance with the Paperwork Reduction Act of 1995 to conduct Phase 3.8 of the Household Pulse Survey (OMB No. 0607-1013, Exp. 10/31/23). The Household Pulse Survey was designed to meet a need for timely information associated with household experiences during the Covid-19 pandemic. The Department is committed to ensuring that the data collected by the Household Pulse Survey continue to meet information needs as they may evolve over the course of the pandemic. This notice serves to inform of the Department's intent to request clearance from OMB to make some revisions to the Household Pulse Survey questionnaire. To ensure that the data collected by the Household Pulse Survey continue to meet information needs as they evolve over the course of the pandemic, the Census Bureau submits this Request for Revision to an Existing Collection for a revised Phase 3.9 questionnaire.

Phase 3.9 includes an experiment involving new detailed race and ethnicity questions, as well as new questions on the use of antivirals to treat COVID, how households obtain COVID

tests, the use of infant formula with babies, children's mental health treatment, and pressure to move from current residence. There are also modifications to existing children's vaccine booster, COVID testing, infant formula, reasons not working, unemployment insurance, Medicaid, and inflation items. Several questions will be removed for Phase 3.9, including replacing the current race/ethnicity items, and questions about the receipt of updated COVID vaccines, intent to vaccinate children, childcare arrangements, children's mental health and behaviors, current rent amount, use of emergency rental assistance, and how children receive their education.

It is the Department's intention to commence data collection using the revised instrument on or about December 7, 2022. The Department invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously sought on the Household Pulse Survey via the **Federal Register** on May 19, 2020, June 3, 2020, February 1, 2021, April 13, 2021, June 24, 2021, October 26, 2021, January 24, 2022, April 18, 2022, July 2, 2022, and November 10, 2022. SUPPLEMENTARY INFORMATION:

I. Abstract

SelectUSA, within the International Trade Administration, provides programs and services that focus on facilitating job-creating business investment into the United States and raising awareness of the critical role that economic development plays in the U.S. economy. These programs include information products, services, and trade events to potential foreign investors into the United States and to U.S.-based economic development organizations. To accomplish its mission effectively, SelectUSA requires detailed information from clients in order to provide resources and services that meet each specific client's needs. This information collection item allows ITA to solicit clients' interest for the use of ITA products, services, and trade events. To promote optimal use and effective response to client needs through ITA services and programs, we are requesting approval for this clearance package. Upon approval by OMB, ITA will use the approved information collection to collect client input by the use of multiple data collection methods, including Comment Cards (*i.e.*, transactional-based surveys), web-enabled surveys sent via email, telephone interviews, automated telephone surveys, and in-person

surveys via mobile devices/laptops/tablets at trade events/shows. The use of these multiple data collection methods is suggested solely to reduce the public burden in responding to requests for input. Without this information, ITA is unable to systematically determine the actual and relative levels of user needs for its programs and products/services and to provide clear, actionable insights for client use. This information will be used for strategic planning, allocation of resources, and stakeholder reporting.

II. Method of Collection

The International Trade Administration is seeking approval for the following data collection methods to provide flexibility in conducting customer intake surveys and to reduce the burden on respondents: (1) an email message delivering a hot link to a web enabled survey with an email reminder sent if the client does not respond to the survey within two weeks; (2) a telephone survey/interview; and (3) a web-enabled survey conducted in-person at trade shows/events via a laptop, tablet or mobile phone so participants can immediately respond without having to provide their email address.
