

licensees/applicants, and higher cost burdens to licensees/applicants. By streamlining the Universal Licensing System (ULS), the Commission eliminates the filing of duplicative applications for wireless carriers; increases the accuracy and reliability of licensing information; and enables all wireless applicants and licensees to file all licensing-related applications and other filings electronically, thus increasing the speed and efficiency of the application process. The ULS also benefits wireless applicants/licensees by reducing the cost of preparing applications, and speeds up the licensing process in that the Commission can introduce new entrants more quickly into this already competitive industry. Finally, ULS enhances the availability of licensing information to the public, which has access to all publicly available wireless licensing information on-line, including maps depicting a licensee's geographic service area.
