

**ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:**

1. Access to patient-specific information located in Call Center databases and storage areas is restricted to VA employees and contract personnel on a “need-to-know” basis; strict control measures are enforced to ensure that disclosure to these individuals is also based on this same principle. Generally, VA Call Center areas are locked after normal duty hours or when the Call Center is closed, and the facilities are protected from outside access by the Federal Protective Service or other security personnel.

2. Access to VA and contracted Call Centers and computer rooms is generally limited by appropriate locking devices and restricted to authorized VA employees and vendor personnel. Information in VistA may be accessed by authorized VA employees or authorized contract employees. Access to file information is controlled at two levels; the system recognized authorized employees or contract employees by a series of individually unique passwords/codes as a part of each data message, and personnel are limited to only that information in the file which is needed in the performance of their official duties. Information that is downloaded from VistA and maintained on VA is afforded similar storage and access protections as the data that is maintained in the original files access to information stored on automated storage media at other VA and contract locations is controlled by individually unique passwords/codes.

3. Remote access to VHA information in VistA is provided to those Call Center employees, either VA or contract staff, that require access to information stored in the health record. Access to this information is protected through hardened user access and is controlled by individual unique passwords. Additionally, contracted Call Centers, either VA or private sector, are required to have a separate computer security plan that meets national information security requirements.

**RECORD ACCESS PROCEDURES:**

Individuals seeking information on the existence and content of records in this system pertaining to them should contact the system manager in writing as indicated above or may write or visit the VA facility location where they normally receive their care. A request for access to records must contain the requester’s full name, address, telephone number, be signed by the requester, and describe the records sought in sufficient detail to enable VA

personnel to locate them with a reasonable amount of effort.

**CONTESTING RECORD PROCEDURES:**

Individuals seeking to contest or amend records in this system pertaining to them should contact the system manager in writing as indicated above. A request to contest or amend records must state clearly and concisely what record is being contested, the reasons for contesting it, and the proposed amendment to the record.

**NOTIFICATION PROCEDURES:**

Generalized notice is provided by the publication of this notice. For specific notice, see Record Access Procedure, above.

**SUPPLEMENTARY INFORMATION:****I. Description of Proposed Systems of Records**

Information in this system of records is used to establish and maintain records of individuals participating in the Puppies Assisting Wounded Servicemembers for Veterans (PAWS) program. The Puppies Assisting Wounded Servicemembers for Veterans Therapy Act (hereinafter referred to as “the Act”) was signed into law by the President on August 25, 2021 (Pub. L. 117–37, 125, Stat. 329). Section (2) of the Act requires VA to conduct a pilot program to provide canine training to eligible Veterans. Section 2(h) establishes VA’s reporting requirements associated with the five-year pilot. Information is maintained in the PAWS Portal. The Portal will be the administrative repository of information required to support the program with ongoing assessment and monitoring. Designated VA staff will enter the contact and assessment information into the portal for each Veteran. This information will be available to service dog organizations (SDOs) to track attendance. Additionally, de-identified data generated from the PAWS Portal will be used in reports to OMHSP, VA Central Office and Congress on the effectiveness of the program. The PAWS Portal will collect Veteran patient demographic data to evaluate the success of the program.
